City Attorney Oast said that it was his understanding, from the Planning & Development Department and the applicant, that this is one phase of a plan that has been in process for several years. In the face of NCDOT plans that are at this point indefinite, Council needs to consider the proposal on its merit.

Upon inquiry of Councilman Mumpower, City Attorney Oast said that he could think of no condition that Council could attach to the permit requiring any employees hired by the applicant must be legal citizens, as that is not a land-use related issue.

In response to Councilman Mumpower, Mr. David Matney, attorney for Mr. Dennis Hulsing, owner of the Crowne Plaza Resort, said that Mr. Hulsing never knowingly has hired an illegal immigrant. He said that he could not, however, guarantee there are none working for him but if there are, he doesn't know about it and he does not want that.

Mayor Bellamy was concerned that if Council approves this conditional use permit, that the community might think Council's support of Alternate 4-B is diminished and Council is supporting a different route.

Regarding Mayor Bellamy's concern, City Attorney Oast said that development is already on the property and Council is considering an approval required by an ordinance to a project that will enable the applicant to complete their plan for a project already in progress. He did not think this project should enter into the consideration of what is or is not an appropriate route.

In response to Mayor Bellamy, City Attorney Oast said that Council's record could reflect that the consideration of this conditional use permit is not meant to be any change in position of the alternate that Council's support.

Councilman Newman asked that the minutes reflect that he remains very supportive of Alternate 4-B and hope that is what plan is chosen by the NCDOT.

Mr. Matney and Mr. Hulsing explained how these plans were well in the works before Council voted to endorse Alternate 4-B. Even though they understood Council's support of Alternate 4-B, they would like the authority to proceed with this project.

Councilman Miller spoke in favor of the proposal.

In response to Councilman Mumpower, City Attorney Oast said that this is a land use issue and with the plan for the connector being as indefinite as it still is, that Council does have an obligation to evaluate the plan on its merit.

Mayor Bellamy confirmed Council's commitment to support Alternate 4-B for the I-26 Connector. She wanted to make it clear that if this project is approved, the approval does not detract from Council's support for Alternate 4-B.

Councilman Mumpower asked that the minutes reflect that he voted against the support of Alternate 4-B.

Councilman Newman moved for the send and final reading of Ordinance No. 3707, granting a conditional use permit for the project identified as Crowne Plaza Resort at 1 Resort Drive for the proposed 3-phase Master Plan with approval of the proposed setback modifications,

subject to the following conditions: (1) The project shall comply with all conditions outlined in the TRC staff report; (2) All site lighting must comply with the City's Lighting Ordinance and be equipped with cut-off fixtures and directed away from adjoining properties and streets. A detailed lighting plan will be required upon submittal of detailed plans to be reviewed by the Technical Review Committee; (3) All existing vegetation that is to be preserved must be clearly indicated and dimensioned on the site, landscape and grading plans; (4) The building design, construction materials and orientation on site must comply with the conceptual site plan and building elevations presented with this application. Any deviation from these plans may result in reconsideration of the project by the reviewing boards; (5) This project will undergo final review by the TRC prior to issuance of any required permits; (6) Bridge reconstruction may require review by the Army Corps of Engineers; and (7) No building permits shall be issued until a solution is devised concerning resolution of the property line/building code matter. This motion was seconded by Councilman Russell and carried on a 6-1 vote, with Councilwoman Cape voting "no."

ORDINANCE BOOK NO. 25 – PAGE 194

Legislative Update

Mayor Bellamy said that she has just returned from a N.C. League of Municipalities Board of Director's meeting in Raleigh and provided Council with copies of the legislative update. She advised Council that there are 12 potential employers coming to our state. She asked staff to contact the Department of Commerce to let them know what we have in our inventory as far as available industrial land as well as our current contact information. She briefly reviewed the bills and asked that City Attorney Oast review the update and make sure that our community is not going to be hurt in this legislative session.

At 7:20 p.m., Mayor Bellamy asked to be excused from the remainder of the meeting because she had been travelling on City business since 4:00 a.m. and was exhausted. Therefore, Councilman Mumpower moved to excused Mayor Bellamy from the remainder of the meeting. This motion was seconded by Councilman Russell.

Mayor Bellamy said that later during the meeting Council will be making an appointment to the School Board. Even though she did not participate in the interviews, she thoroughly reviewed the applications and has personal knowledge of the individuals. In the event of a tie vote, she left her vote with Vice-Mayor Davis. As the liaison to the School Board she looked forward with working with whomever Council appoints to that important position.

The motion made by Councilman Mumpower and seconded by Councilman Russell carried unanimously.

At 7:20 p.m., Vice-Mayor Davis called for a 20-minute recess.

B. BUDGET PLANNING

Staff Report

Chief Financial Officer Ben Durant said that the purpose of this staff report is to provide an update on the status of Fiscal Year (FY) 2009-10 Budget Process, including the fees and charges recommendations that were discussed at the March 17 Finance Committee meeting.

During the 1st Quarter Financial Report, which was presented to City Council in November 2008, staff provided its initial budget forecast for the 2009-10 fiscal year which projected a $5.0 million General Fund deficit. Between November and January, staff worked to develop a set of budget balancing strategies to address this $5.0 million forecasted deficit.

In February, staff presented to Council an updated budget forecast for the General Fund which included estimated dollar savings associated with each of these budget balancing strategy. With full implementation of these strategies, staff forecasted that the budget deficit in the General Fund could be reduced to $375,000.

Initial Forecasted Gap	($5,000,000)
Eliminate Merit Pay (Salary Freeze)	$750,000
Annexation Gain	$325,000
Reduce Housing Trust Fund Transfer	$300,000
Re-Engineering/Mgmt. Streamlining	$1,000,000
Reduce Transit Fund Transfer	$500,000
Increase Cost Recovery from Fees	$500,000
Reduce Fund Balance from 19% to 18%	$1,000,000
Additional Cost Savings Opportunities	$500,000
Council Strategic Priorities	($250,000)
February Forecasted Deficit	($375,000)

Updated Budget Information

Since the February Council meeting, staff has refined the estimates for the proposed budget strategies as well as made additional technical adjustments as updated information has become measurable and available for both revenues and expenditures.

Revenue Update

The strategy of Increased Cost Recovery from Fees was referred to the Council Finance Committee, and their recommendations for fee adjustments will be presented tonight. If the full Council approves the Finance Committee's fee recommendations, it will add an additional $700,000 in revenue to the FY 2009-10 General Fund budget. In addition to the General Fund fee adjustments, the Committee also endorsed staff's recommendation for a 4% increase in the regular water rate and the water capital improvement fee, along with some other minor fee adjustments in the other Enterprise Funds. He reviewed the full set of fee recommendations and the minutes from the Finance Committee's March 17th meeting in which the fees were reviewed.

Since the February Council meeting, staff has also received an additional month of sales tax revenue from the State of North Carolina. January sales tax revenue was down 13.0% compared to January 2008, and sales tax revenue for the year is now down 4.7%. At the February meeting, staff had estimated that sales tax revenue would end the current fiscal year down 3.1%. Staff has now lowered that estimate to 4.7% based on the latest data. As a result, the budget gap has increased by $300,000.

Expenditure Update

In late February, staff received updated cost estimates for the City's FY 2009-10 street lighting budget as well as information from Buncombe County regarding the City's share of FY 2009-10 costs for joint programs such as CJIS/CDE, Crimestoppers, and the Police ID Bureau. The updated costs for street lighting and the City-County joint programs both exceeded staff's original estimates in these areas. These additional costs, along with some other minor technical adjustments added approximately $337,000 to the budget gap.

Current Budget Projection

The chart below shows the current budget gap once the original budget strategies were refined and the additional technical adjustments were made. At the moment the General Fund FY 2009-10 budget is out of balance by $812,300. This gap assumes that the full Council at its April 14 meeting will approve $700,000 in fee recommendations endorsed by a majority of the Finance Committee. The value of any fees not approved will add to the current budget gap.

February Budget Gap	($375,000)
Increased Utility & County Partnership Expenses	($337,300)
Reduction in Sales Tax Revenue Estimates	($300,000)
Additional Revenue from Fees & Charges	+ 200,000
Current Budget Gap	($812,300)

The budget gap assumes Council's adoption of fees and charges recommendations.

Mr. Durant said that staff will continue to work internally to further refine our strategies to address the adjusted gap and balance the budget in a meaningful and prudent way. In addition, staff has presented Council with the fees and charges that the Finance Committee has endorsed and will ask for consideration on those at the April 14 meeting.

Discussion occurred regarding how to address the budget gap as well as the process going forward.

Councilman Mumpower spoke against seeking short-term relief through Fund Balance in that there are flags that indicate this resource may be important going forward. He suggested staff review the budget in terms of what is necessary vs. nice or special projects. In addition, because personnel is where all the dollars go, he supported Council leading the way and reducing their salary as a model for senior management staff and others.

Finance Committee Recommendations

Councilman Russell, Chair of the Finance Committee, noted that the Finance Committee will be meeting on Friday, March 27 to (1) continue review of budget balancing strategies (a) service prioritization; and (b) compensation options; and (2) establishment of outside agency funding levels.

Councilman Russell felt there are three big budget issues – (1) salaries/payroll; (2) Fund Balance; and (3) property tax base. Council is clear that they do not support raising taxes. He wanted to make it clear that the Finance Committee will not give direction but will ask Council for consensus so the body can give direction to the Chief Financial Officer and City Manager to lead us through the budget adoption. If projections continue to drop and Council chooses to give direction to reduce salaries that direction needs to be soon in order for staff to begin re-engineering immediately. He was not opposed to going into Fund Balance to get through this tough time as he is optimistic about the future of Asheville.

City Manager Jackson said that on April 14, staff will ask for Council to act upon the fees and charges. Between now and then the Finance Committee will discuss other budget balancing strategies, such as service prioritization and compensation options. Council will also be asked on April 14 to review the recommendations from the Finance Committee on those items. On that date, staff will seek Council's direction on their major building block assumptions in order for staff to build the budget. The budget will then come back to Council in mid-May and the process will start in earnest, with adoption of the budget in June.

Councilman Newman noted that he does not like, nor never did like, the recycling fee – especially increasing it. Everyone pays property taxes, but this is a fee increase targeted at families who live in Asheville.

C. GREENLIFE GROCERY/MAXWELL STREET TRAFFIC CONTROL

Assistant Director of Transportation & Engineering Ken Putnam said that the purpose of this staff report is to provide an update regarding traffic related issues along Maxwell Street, rezoning plans, and traffic enforcement.

On Tuesday, August 28, 2007, City Council directed staff to meet with Greenlife Grocery staff to look at the possibility of adding on-street parking along Maxwell Street immediately adjacent to the Greenlife Grocery property. As a result of that meeting, we determined that two on-street parking spaces could be added and the work (signs installed) was accomplished on September 13, 2007.

On October 15, 2007, the Greenlife Grocery's local attorney called City staff to let us know that their private garbage hauler could not pick up the store's garbage because on-street parking was now allowed on both sides of the street. City staff then contacted the private garbage hauler to confirm their concerns and to try and identify any possible alternatives. After these discussions and further review by staff, the decision was made to remove the two recently installed on-street parking spaces and, this work was accomplished on October 30, 2007.

During the early part of 2008, City staff, including the City's Neighborhood Coordinator, began meeting with a couple of concerned citizens to discuss the decision to remove the two on-street parking spaces and to determine if any type of compromise could be reached. At the end of this process, which included two additional meetings with the private garbage hauler, City staff and the private garbage hauler agreed that one of the on-street parking spaces could be reinstalled without causing a negative impact. This parking space was reinstalled during the early part of May 2008 and until recently, City staff has not received any complaints.

On March 11, 2009, the Asheville Police Department responded to two calls regarding a parking issue resulting in a ticket for parking in the wrong direction and a potential towing of the vehicle. Before the vehicle was actually towed, the owner of the vehicle appeared and the owner of the vehicle and the towing operator agreed upon a compromise in the towing fee.

Typically, on-street parking is encouraged along city-maintained streets, especially along residential streets, because it enables citizens and/or visitors to park in front of their homes and it serves as probably the best traffic calming measure that is available. Section 19-140 of the Code of Ordinances states that a minimum 10-foot street width for free movement of vehicular traffic must be maintained and no vehicle should be parked in such a manner to create a street width less than 10 feet. As a general rule, City staff allows on-street parking on one side of a street with a minimum pavement width of 17 feet and both sides of a street with a minimum pavement width of 24 feet. The average pavement width of Maxwell Street is 25 feet; therefore, on-street parking is allowed on both sides of the street except in the immediate area of Greenlife Grocery.

Transportation and Engineering Department staff routinely drives by the site to observe existing conditions and it is reasonable to conclude that the trucks primarily using Maxwell Street are accessing the loading dock that is located on Maxwell Street. In addition, the larger trucks that are accessing the internal loading dock only use Maxwell Street to maneuver into the loading dock. Obviously, if the access point onto Maxwell Street were closed virtually all of the truck activity related to Greenlife Grocery would be eliminated along Maxwell Street.

Transportation and Engineering Department staff subsequently met with the Asheville Police Department on site and agreed that the single on-street parking space located in the

immediate vicinity of Greenlife Grocery should be marked on the street to clearly define its location and to supplement the existing signs. This work has been accomplished.

Planning & Development Director Judy Daniel said that Greenlife Grocery has no near term plans for modifications to their property. City staff spoke with their management recently and was informed that the economic downturn has affected their business, and they will not be moving forward in the near term with the modifications that would change the location of the loading dock. They cannot be compelled to proceed with a rezoning, and they are operating as authorized in terms of zoning compliance.

Councilman Newman wondered if a person is being penalized twice for one violation – given a ticket and being towed – is normal practice. Police Chief Hogan explained that incident involved two different officers arising out of two different calls at different times in the day, with the judgment of the second officer making the determination that the car was parked so far to the edge that it was obstructing the flow of traffic.

In response to Councilman Newman, City Attorney Oast said he would investigate the appeal process on the towing violation and report back to Council. Regarding the parking citation, Police Chief Hogan said that the appeal process would depend on which form the ticket was written on – a uniform citation form (which is a criminal violation) or the City's civil citation form. He said that he would be happy to direct the person to the correct appeal process if they contact him.

VI. NEW BUSINESS:

A. ORDINANCE NO.3718 - BUDGET AMENDMENT FOR THE REMOVAL OF EXISTING STREET LIGHTS FOR THE BILTMORE PARK PHASE I DEVELOPMENT FUNDED WITH REVENUE FROM BILTMORE FARMS

Public Works Director Mark Combs said that this is the consideration of a budget amendment, in the amount of $33,913, to appropriate revenue and budget expenditure accounts associated with the removal of existing streetlights for the Biltmore Park Phase I development.

Biltmore Farms has requested the City to authorize Progress Energy to remove existing street lights on their Biltmore Park Phase I project to enable installation of new streetlights conducive to their development plans. Authorization to Progress Energy by the City is necessary because the accounts are in the City's name.

Street lights are installed by Progress Energy and monthly charges are incurred for a specific term Since the existing streetlights are being removed prior to the term end, penalties are applicable. The calculation provided by Progress Energy for the removal of twenty (20) poles and associated lights is estimated at $33,912.76. Biltmore Farms has provided the necessary funds prior to authorization for removal by the City to Progress Energy, to cover all costs. Funds are shown in the street light removal line item.

This action complies with the City Council Strategic Operating Plan in that street lighting provides a safe environment for the public and reduces carbon emissions.

Pros:

- Removal of the existing street lights will allow the new street lights to blend with the new development.
- The street fixtures are being swapped out from dual head to single resulting in reduction of carbon emissions.
- No cost to the City.

Con:

- None identified.

There is no fiscal impact.

City staff recommends City Council adopt the budget amendment to appropriate revenue and budget expenditures associated with the removal of existing street lights for the Biltmore Park Phase 1 project.

Vice-Mayor Davis said that members of Council have been previously furnished with a copy of the ordinance and it would not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 3718. This motion was seconded by Councilwoman Cape and carried unanimously.

ORDINANCE BOOK NO. 25 – PAGE 217

B. RESOLUTION NO. 09-54 - RESOLUTION AUTHORIZING THE PURCHASE OF WATER TREATMENT CHEMICAL FROM SOLE SOURCE VENDOR AMERICAN DEVELOPMENT CORPORATION TO ENSURE A MORE EFFICIENT WATER TREATMENT PROCESS AT THE WILLIAM DEBRUHL WATER TREATMENT PLANT

Interim Water Resources Director Robert Griffin said that the Water Resources staff requests that the Mayor and City Council recognize American Development Corporation as the sole source for the water treatment chemical liquid Polyaluminum Hydroxychlorosulfate, or DelPac 2020, in mini-bulk form and compatible mini-bulk storage tank system and authorize Water Resources to purchase them from said vendor for the estimated annual amount of $35,000.

North Carolina General Statutes allow purchases without formal bidding when a product is only available from one source of supply.

Water Production staff contacted five (5) chemical vendors in the region to see if they produce and sale DelPac 2020 in the mini-bulk form since that is the form needed for use at the William DeBruhl Water Treatment Plant in Swannanoa. While other companies produce DelPac 2020 in a drum or large bulk tank, the only chemical company to produce DelPac 2020 in the mini-bulk form is the American Development Corporation. The William DeBruhl Water Treatment Plant currently uses the drum method, which requires employees to transport the chemical up a large hill and manually feed the chemical. This method is very labor intensive and difficult. Since the dose of chemical needed to treat water at the William DeBruhl WTP does not warrant a large bulk tank, the most viable and efficient solution is to use the mini-bulk form.

Staff has determined that the treatment plant chemical liquid Polyaluminum Hydroxychlorosulfate, or DelPac 2020, in mini-bulk form and compatible mini-bulk storage tank system is needed to ensure less labor intensity and a more efficient water treatment process at the William DeBruhl WTP. After contacting various chemical vendors, the American Development Corporation has been identified as the sole source manufacturer of the chemical in the mini-bulk form. As part of the chemical procurement, the vendor supplies a mini-bulk storage tank that is required with the purchase of the chemical. The vendor's mini-bulk storage tank will be used for as long as the City purchases this chemical in mini-bulk form from them. The storage tank system and maintenance of it are included in the price, which equates to approximately $35,000 annually.

Staff will work with the City's Purchasing Department to ensure future purchases of this chemical in mini-bulk form follow all appropriate procurement requirements.

These projects are part of City Council's strategic plans to comply with state and federal requirements for the water treatment process.

Pro:

- Recognizing American Development Corporation as the sole source manufacturer of the water treatment chemical DelPac 2020 and authorizing the purchase from this vendor will ensure better efficiency in the water treatment process and replace the labor intensive use of drums by utilizing mini-bulk storage.

Con:

- If the purchase of mini-bulk DelPac 2020 is not authorized from the sole source vendor American Development Corporation, Water Resources staff will have to continue to treat water at the William DeBruhl WTP from drums, which is very labor intensive and not the most efficient way to treat the water.

Cost of the mini-bulk water treatment plant chemical DelPac 2020 and compatible mini-bulk storage tank system, which is approximately $35,000 annually from the Water Resources Department / Water Production Division Chemical Operations Line Item.

Water Resources staff recommends that the Mayor and City Council recognize American Development Corporation as the sole source for the treatment chemical liquid Polyaluminum Hydroxychlorosulfate, or DelPac 2020, in the mini-bulk form and compatible mini-bulk storage tank system and authorize Water Resources to purchase them through the City's Purchasing procurement process from said vendor in the amount of approximately $35,000 annually.

Vice-Mayor Davis said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Newman moved for the adoption of Resolution No. 09-54. This motion was seconded by Councilwoman Cape and carried unanimously.

RESOLUTION BOOK NO. 31 – PAGE 466

C. ORDINANCE NO. 3719 - ORDINANCE REGULATING NON-CONSENSUAL TOWING FROM PRIVATE PARKING LOTS

City Attorney Oast said that this is the consideration of an ordinance regulating non-consensual towing from private parking lots.

For several years, City Council and City staff have been receiving complaints from individuals whose vehicles are towed from private parking lots. The vehicles in question are parked in private parking lots without authorization from the person in control of the lot, and are towed without consent of the vehicle owner. Sometimes, tow trucks are patrolling the lots for unauthorized parkers, and the tow is initiated almost as soon as the vehicles are parked. This practice is known variously as non-consensual towing, predatory towing, and trespass towing.

These incidents usually occur in the downtown or Biltmore Village areas, where visitor traffic is heavy and parking is at a premium. Not unusually, the incidents occur at night and on weekends, when private lots are largely empty. The complaints include reports of: vehicles being towed with pets trapped inside, vehicles being towed away even though the vehicle owner encounters the tow operator in the parking lot, fees for towing and storage being unreasonably high and arbitrary, the tow operator accepting cash only (no credit cards), vehicle storage areas being remote and unsafe, tow operators not responding to calls to retrieve vehicles, denying access to vehicle to retrieve personal property (including medicines). In addition to these complaints, the police recently completed a "sting" operation where two cars that had paid to park on a designated lot were towed. The tow operators have been charged criminally.

On the other side of this situation are the owners of the lots and the lessees of the spaces. Asheville has a substantial population of downtown residents, workers, and resident/workers, and they all depend on the availability of the space that they pay for or own in order to go about their daily business. Also, businesses depend on the availability of their parking to provide customers access to their stores or offices, and justifiably believe that they ought to have the ability to keep unauthorized parkers off their lots without having to install physical barricades or fences.

Over the years, Council has taken an incremental approach this issue beginning with simply requesting lot owners or businesses to barricade or post their lots with signs. In 2003, Council began to require the posting of lots in the downtown and Biltmore Village areas with signs prohibiting parking, and stating that unauthorized parkers will be towed. It is unknown how many incidents of unauthorized parking have been deterred by these efforts, but clearly incidents are continuing to occur.

Another factor in this equation is the tow operators. While there have certainly been legitimate complaints about non-consensual towing, most tow operators perform a sometimes necessary service for lot owners who request it. There have been reports of occasions when tow truck drivers engaged in removing a vehicle parked without authorization have been verbally abused and/or physically threatened. In addition, the operators have on occasion not received payment for the tow because stop payment orders are issued on personal checks or credit card authorizations are withdrawn, which has led some of the operators to require payment in cash only.

Non-consensual towing is really a matter between the lot owner, the vehicle owner, and the tow operator, and does not necessarily involve the City. However, when issues of public safety and the "peace and dignity" of the City arise, the City has a basis in State law for regulation. Due to the complex interplay of local, State, and federal law on this issue, determining how to structure and implement such regulations has required considerable investigation, and is continuing to evolve. Under federal law, local governments may regulate the price and other aspects of non-consensual towing as a matter of consumer protection. Within these limitations, cities in North Carolina and elsewhere have with increasing frequency been regulating nonconsensual towing.

The draft ordinance draws from ordinances that have been adopted in Raleigh and Wilmington. The main features of the ordinance are:

1. It applies only in the downtown and Biltmore Village areas.
2. It establishes a fee schedule for towing and related matters (see note below).
3. It requires the release of a vehicle if the vehicle owner encounters the tow operator in the parking lot.
4. It establishes some standards for the storage lot to which the vehicle is removed.
5. It requires the tow operator to notify the police if a tow is performed, and to respond to calls within a specified time.
6. It requires that vehicle operators be allowed to retrieve personal property from the vehicle.
7. It requires the tow operators to accept credit and debit cards, but prohibits persons from cancelling payments. He asked that Section 9 of the draft ordinance be amended to read "Failure or refusal by a vehicle operator to pay any of the fees assessed pursuant to this section is a violation of this section."
8. It prohibits interference with a tow operator performing a tow.
9. Violations of the ordinance are subject to civil and criminal penalties; repeated violations are subject to increasing civil penalties.

Note: The $100.00 "base fee" used in the draft ordinance is based on the Raleigh ordinance, as is the 50% "release fee." The rate schedule could also be established in the Fees and Charges manual, or could be keyed to the rate for police-initiated tows, which are negotiated periodically. Research into rates is continuing.

This item is consistent with the Strategic Operating Plan in that it supports the goal of improving public safety downtown; and is a form of community policing.

This item was reviewed by the Public Safety Committee on March 17, and their comments have been incorporated into the draft where possible. A proposal to license tow operators is being explored, but may require additional review as a business regulation.

The fiscal impact is that there may be some additional costs for administration and monitoring compliance, not likely to be offset by collected fines.

Pros:
- Regulates problematic activity while recognizing interests of parties
- Establishes reasonable/predictable fees
- Promotes safety

Con:
- Increases administrative burden on already-thin City staff

Adoption of the proposed ordinance is recommended, with delayed effective date to permit notification of interested parties.

City Attorney Oast responded to Councilman Miller on why the ordinance applies only within a 10-mile radius of the Central Business District and Biltmore Village.

In response to Councilman Miller, City Attorney Oast explained how the $100 base fee was suggested. He said that Council can establish that fee annually in the fees and charges manual. In fact, in the initial draft of the ordinance he suggested that the base fee be negotiated by the Police Department from the wrecker rotation list because that is a fee that has been negotiated with the tow truck operators and presumably they have had input into how much work is involved. That fee can be set a number of ways, but the $100 base fee seemed reasonable.

Vice-Mayor Davis' concern of Senator Nesbitt's $75 fee is that the tow operators who are doing a legitimate service need to be fairly compensated. Today's non-negotiated fees are higher than that and seemingly $100 was a fair price.

Councilman Miller questioned whether the fee for storing a towed vehicle should begin to accrue at 24 hours instead of 12 hours. City Attorney Oast said that most people will know their vehicle has been towed within 12 hours.

Councilman Kelly questioned if there was discussion in making the escalated civil penalties higher in order to stress the importance of this issue. City Attorney Oast said that we don't have escalated penalties often, but when we do, these are consistent with them. Since Council is getting into this matter in an incremental way and the issue really is between the private lot owners and the vehicle operators, he suggested that if these civil penalties do not achieve the required effect, then Council might consider increasing them.

In response to Councilman Mumpower, City Attorney Oast said that he did not speak with the tow operator association; however, he has spoken with people who own and operate parking lots.

City Attorney Oast responded to Councilman Mumpower regarding the language on existing signs.

There was a brief discussion, initiated by Councilman Mumpower, regarding credit and debit card payments. In summary, City Attorney Oast suggested Section (5) of the ordinance be amended to read "Any tow service that engages in a trespass tow shall accept at least two nationally recognized credit or debit cards in payment for any fee established in this ordinance."

Councilman Mumpower questioned the $25 a day storage fee and whether Council can put a cap on the accrual of those daily fees. City Attorney Oast said that Council can cap that amount; however, they may be getting into aspects of the tow operator where the responsibility falls on the person who owns the vehicle to do something about it than it does on the tow operator to contact them. Vice-Mayor Davis noted that tow operators have limited lot sizes and they don't want people to be encouraged to leave the vehicles for any length of time.

When Councilman Mumpower questioned whether Council could address issues regarding kick-backs, City Attorney Oast didn't know how we could regulate that practice, other than what we already do through criminal law.

There was a brief discussion, initiated by Councilman Mumpower, regarding whether the City wants to get into the business of a vehicle operator failing or refusing to pay any of the fees, or leaving that between the vehicle operator and the tow service. In summary, City Attorney Oast suggested that Section (9) of the ordinance be amended to read "Removal of a vehicle that is not a trespass vehicle from a private lot without the consent of the vehicle operator shall be a violation of this section."

Vice-Mayor Davis said that members of Council have been previously furnished with a copy of the ordinance and it would not be read.

Councilman Mumpower moved to adopt Ordinance No. 3719, with the following amendments: (1) Section 5 be amended to read "Any tow service that engages in a trespass tow shall accept at least two nationally recognized credit or debit cards in payment for any fee established in this ordinance." and (2) Section (9) be amended to read "Removal of a vehicle that is not a trespass vehicle from a private lot without the consent of the vehicle operator shall be a violation of this section." This motion was seconded by Councilman Russell.

Councilwoman Cape supported Councilman Miller's suggestion that the ordinance apply to the entire City, not just for a 10-mile radius of the Central Business District and Biltmore Village. Councilman Russell explained why he could not support that amendment, with City Attorney Oast explaining that the ordinance is being applied to areas where we can require proper signage.

There was a brief discussion regarding Councilman Newman's request that predatory towing of vehicles properly parked have significant penalties. In summary, City Attorney Oast suggested Section (9) of the ordinance be amended to read "Removal of a vehicle that is not a trespass vehicle from a private lot without the consent of the vehicle operator shall be a violation of this section, and shall subject the offender to civil penalties."

Councilman Miller asked for City Attorney Oast to continue his research on the issue of licensing tow operators.

Councilman Mumpower amended his motion to adopt Ordinance No. 3719, with the following amendments: (1) Section 5 be amended to read "Any tow service that engages in a trespass tow shall accept at least two nationally recognized credit or debit cards in payment for any fee established in this ordinance." and (2) Section (9) of the ordinance be amended to read "Removal of a vehicle that is not a trespass vehicle from a private lot without the consent of the

vehicle operator shall be a violation of this section, and shall subject the offender to civil penalties in an amount three times the amount specified in Appendix B." Councilman Russell accepted the amendment.

City Attorney Oast noted that this ordinance will not end non-consensual towing in Asheville, but if Council adopts this ordinance, they will have done as much as they can do and will have addressed the issues we have received complaints about.

A property owner at 144 Biltmore Avenue cited several incidences he has encountered with people parking illegally in his parking lot. He said that his lot has had probably 10 of the regulated no-parking signs and people have destroyed them in various ways. He supported adoption of this ordinance.

Mr. Ronnie Davis, Davis Automotive and Towing in west Asheville, spoke in favor of the ordinance, however, he felt it should be applied City-wide. He would welcome the opportunity to be on a committee to work through some concerns raised. Regarding acceptance of credit or debit cards, his company does accept that, however, he suggested MasterCard or Visa be the accepted cards.

In response to Councilwoman Cape, Mr. Davis said that he receives no compensation from the property owner of the 4 lots they monitor in town. He said that they average about 3 cars per week from the 4 lots they monitor.

After a brief discussion, City Attorney Oast suggested Section (5) of the ordinance be amended to read "Any tow service that engages in a trespass tow shall accept at least two nationally recognized credit or debit cards (such as MasterCard or Visa) in payment for any fee established in this ordinance."

Councilman Mumpower moved to amend his original motion to adopt Ordinance No. 3719, with the following amendments: Section (5) be amended to read: "Any tow service that engages in a trespass tow shall accept at least two nationally recognized credit or debit cards (such as MasterCard or Visa) in payment for any fee established in this ordinance."; and (2) Section (9) of the ordinance be amended to read "Removal of a vehicle that is not a trespass vehicle from a private lot without the consent of the vehicle operator shall be a violation of this section, and shall subject the offender to civil penalties in an amount three times the amount specified in Appendix B." Councilman Russell accepted the amendment.

When Mr. Davis said that their trucks do not have portable terminals to swipe the credit cards, it was suggested the trucks be provided with inexpensive manual printers.

Councilman Miller stressed that it is not okay to park illegally no matter the length of time being parked.

The amended motion made by Councilman Mumpower and seconded by Councilman Russell carried unanimously.

ORDINANCE BOOK NO. 25 – PAGE 219

D. RESOLUTION NO. 09-55 - RESOLUTION APPOINTING A MEMBER TO THE ABC BOARD

Vice-Mayor Davis said that the term of Barbara Field expired on November 13, 2007, and City Council extended her term until April 1, 2009.

At the March 10, 2009, meeting, it was the consensus of Council to interview Wilford Lack and Albert Anderson. Dr. Anderson called and asked not to be considered for a vacancy at this time.

Vice-Mayor Davis said that Council has received an e-mail today from ABC Board Chairman Charles Worley who requested that (1) due to her invaluable architectural services during their construction of 2 new ABC stores, that her term be extended through the completion of construction (approximately 3 months); or (2) her vacancy be filled with someone that has a professional planning/ design/construction type of experience as their long range plans call for more construction over the next year or so. If Council does not have an application on file to meet their needs, he requested the vacancy be re-advertised.

Councilman Mumpower, liaison to the ABC Board, spoke about the rarity of extending terms and would not support another extension. In addition, he felt it was unfair to extend the interview process after interviews have been conducted. Therefore, Councilman Mumpower moved to appoint Wilford Lack as a member of the Alcoholic Beverage Control Board, to serve the remainder of Ms. Field's original 3-year term, term to expire November 13, 2010, or until his successor has been appointed. This motion was seconded by Councilman Newman and carried unanimously.

It was noted that Mr. Lack's unexpired term on the Civic Center Commission will be advertised accordingly.

RESOLUTION BOOK NO. 31 – PAGE 469

E. CONSIDERATION OF A RESOLUTION APPOINTING A MEMBER TO THE CIVIL SERVICE BOARD

Vice-Mayor Davis said that the term of Sharon West, as a member of the Civil Service Board, expired on May 21, 2008.

At the March 10, 2009, meeting, it was the consensus of Council to interview Bridgette Odom, Davidson Jones and Beatrice Brown.

On March 24, 2009, Ms. Odom and Ms. Brown were interviewed. Mr. Jones did not respond to requests for an interview.

Due to a mid-process grievance hearing, City Attorney Oast recommended City Council delay action on making the appointment until after the outcome of the grievance, which should be within a week. He noted this is a delay that Council could not have anticipated.

Councilman Mumpower was impressed with both interviews and even though there is only one position open, he hoped the other candidate would be willing to serve on a board of equal importance.

It was the consensus of Council to delay action on this item until April 14, 2009.

F. RESOLUTION NO. 09-57 - RESOLUTION APPOINTING A MEMBER TO THE ASHEVILLE SCHOOL BOARD

Vice-Mayor Davis said that the term of Allison Jordan, as a member on the Asheville School Board, expire on April 1, 2009.

At the March 10, 2009, meeting, it was the consensus of Council to interview Sarah Sparboe Thornburg, Peggy Dalman and Honor Moor.

Regarding Mayor Bellamy's absence, City Attorney Oast said that since Mayor Bellamy is absent, her vote will not count.

Councilman Mumpower felt the School Board should be elected, not appointed. Even though he felt all three were strong candidates; it was his opinion the School Board needs people that speak up and are strong change agents. Since he did not sense that from any of the candidates, he withheld his vote.

After other Council members spoke highly of the strong candidates, Sarah Sparboe Thornburg received 1 vote; Peggy Dalman received 3 votes; and Honor Moor received 1 vote. Therefore, Peggy Dalman was appointed as a member of the Asheville School Board to serve a four-year term, term to begin on April 1, 2009, and expire on April 1, 2013, or until her successor has been appointed.

RESOLUTION BOOK NO. 31 – PAGE 471

VII. OTHER BUSINESS:

A. CLAIMS

The following claims were received by the City of Asheville during the period of February 20 – March 12, 2009: Nathan Ownbey (Water), Charter Communication (Water), Lisa Metcalf (Parks & Recreation), Ann Debrule (Water), Geneva Fate (Water), Swannanoa Cleaners (Streets), Jean Sponseller (Water), Eric Froiland (Street) and Yvonne Stillwell (Water).

These claims have been referred to Asheville Claims Corporation for investigation.

VIII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Gene Hampton, representing Asheville-Buncombe Citizens for Quality Government, spoke about the need for quality education.

IX. ADJOURNMENT:

Vice-Mayor Davis adjourned the meeting at 9:33 p.m.

Magdalen Bowleson
CITY CLERK

MAYOR

Tuesday – April 14, 2009 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Jan B. Davis; Councilwoman Robin L. Cape; Councilman Kelly M. Miller; Councilman R. Carl Mumpower (left meeting unexcused at 9:28 p.m.); Councilman Brownie W. Newman; Councilman William A. Russell Jr.; Assistant City Manager Jeffrey B. Richardson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Bellamy led City Council in the Pledge of Allegiance.

INVOCATION

Councilman Russell gave the invocation.

I. PROCLAMATIONS:

A. EMPLOYEE RECOGNITIONS

Assistant City Manager Richardson recognized (1) Jason Mann, Stephanie Osbourn, Dave Michelson, Tony McDowell and Richard Grant employees who were instrumental in obtaining approximately $300,000 for the state reimbursement for utility franchise fee; (2) Mark Combs, Steve Henderson and Wendy Simmons for their implementation of the new Roll Out Trash Can Program at Pisgah View apartments; (3) Sara McHone, Chad Pierce, Brad Davis, Leslie Carriero, Ron Kerns, Ivan Thomas, Nanci Farmer, Florie Presnell and Audran Stevens for their input into the Building Safety Department's ISO Certification, which auditor noted that the City of Asheville is a model organization for processes, education, training, and documentation; (4) Detective Kevin Taylor and Detective Yvonne Cobourne in the involvement in the cold case file of the death of Sandra Proffitt leading to the Asheville Police Department charging Terry Luther Spivey in the 1990 homicide; (5) Ken Putnam, David Foster, Dave Michelson, Jason Mann, Chad Pierce, Jeff Reble and Trisha Hardin for their efforts involving a public information outlet to notify the community about street closures; and (6) Gordon Reis – Parks and Recreation; David Rutledge – Police; Clarence McAfee – Fire; Patricia Hensley – Water; Beverly Ann King – Finance; David Anders – Fire; and Flavious Jackson (Transit Authority) who have retired with 30 years of service.

On behalf of City Council, Mayor Bellamy thanked the employees on what they do on behalf of the City of Asheville and City Council. She was proud of City staff and looked forward to highlighting more accomplishments.

Mayor Bellamy welcomed Ms. Edna Johnson as the new General Manager to the Transit Authority.

B. PROCLAMATION PROCLAIMING APRIL 2009 AS "AUTISM AWARENESS MONTH"

Vice-Mayor Davis read the proclamation proclaiming April 2009, as "Autism Awareness Month" in the City of Asheville. He presented the proclamation to Ms. Jean Alvarez, representing the Autism Society of North Carolina, who briefed City Council on some activities taking place during the month and thanked City Council for their support.

C. PROCLAMATION PROCLAIMING APRIL 2009 AS "JAZZ APPRECIATION MONTH"

Councilwoman Cape read the proclamation proclaiming April 2009, as "Jazz Appreciation Month" in the City of Asheville. She said that the proclamation would be sent to the WNC Jazz Society.

II. CONSENT AGENDA:

At the request of Councilman Mumpower, Consent Agenda Item "B" was removed from the Consent Agenda for discussion and/or an individual vote.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON MARCH 24, 2009

B. RESOLUTION AUTHORIZING THE CITY MANAGER TO APPLY FOR THE U.S. ENVIRONMENTAL PROTECTION AGENCY'S SMART GROWTH IMPLEMENTATION ASSISTANCE PROGRAM

This item was removed from the Consent Agenda for discussion and/or an individual vote.

C. RESOLUTION NO. 09-58 - RESOLUTION ACCEPTING ALLIANCE COURT, HEART DRIVE, MACHEN ROAD, RIDGEFIELD BOULEVARD AND RIDGEFIELD COURT AS CITY-MAINTAINED STREETS

Summary: The consideration of a resolution to accept three existing state-maintained streets as city-maintained streets and two privately-maintained streets as city-maintained streets, all from the recently annexed areas of the City of Asheville.

Code of Ordinances sec. 7-15-1(f)(4)a requires that streets dedicated for public use be accepted by resolution of the City Council. The recently annexed areas include the Ridgefield Business Park area and the Airport Road area. These areas were challenged through the Court system and the City prevailed.

SR 3624 (Ridgefield Blvd) from NC 191 (Brevard Road) to NC 191 (Brevard Road) is a state-maintained street that has an average width of 27 feet and 54 feet with 2-foot curb and gutter, a length of 0.83 mile, and a right-of-way width of 50 and 105 feet.

SR 3625 (Ridgefield Court) from SR 3624 (Ridgefield Blvd) to its dead-end is a state-maintained street that has an average width of 27 feet with 2-foot curb and gutter, a length of 0.24 mile, and a right-of-way width of 45 feet.

SR 3644 (Machen Road) from SR 3527 (Bradley Branch Road) to its dead-end is a state-maintained street that has an average width of 18 feet with 4-foot grass shoulder, a length of 0.11 mile, and a right-of-way width of 45 feet.

Alliance Court from SR 3625 (Ridgefield Court) to its dead-end is a developer constructed street (privately-maintained) that has an average width of 27 feet with 2-foot curb and gutter, a length of 0.05 mile, and a right-of-way width of 50 feet.

Heart Drive from SR 3624 (Ridgefield Blvd) to its dead-end is a developer constructed street (privately-maintained) that has an average width of 27 feet with 2-foot curb and gutter, a length of 0.18 mile, and a right-of-way width of 60 feet.

As a part of the Annexation Services Plan, the subject streets were inspected by Transportation and Engineering Department staff and Public Works Department staff and the general street conditions were determined to be satisfactory and any maintenance issues will be handled as part of the City's routine maintenance funding.

Typically, state-maintained streets that are entirely within the city and are classified as local type streets make good candidates to become city-maintained streets. Local type streets primarily provide access to property and many of these streets are found in residential communities.

Following City Council's approval of this resolution and approval by the North Carolina Department of Transportation for Ridgefield Blvd, Ridgefield Court, and Machen Road, the subject streets will be added to the official Powell Bill List.

This action complies with the City Council 2008-09 Strategic Operating Plan within the Sustainable Focus Area by accepting street infra-structure to help support the healthy growth of the City. In addition, this action complies with the Annexation Services Plan for the Ridgefield Business Park area and the Airport Road area that was approved by City Council on April 26, 2005.

Pros:

- The City of Asheville will receive Powell Bill Funds from the North Carolina Department of Transportation (NCDOT) to help maintain the streets.
- The streets provide access and connectivity in a residential community and a professional business park.

Con:

- Powell Bill Funds will not cover 100% of the total cost to maintain the streets.

There will be no initial financial impact to the City, although the responsibility of maintenance will belong to the Public Works Department. The City will receive Powell Bill Funds in the future to help maintain the streets. Currently, the Powell Bill Funds equate to $6,326 per mile compared to the City's maintenance cost of $18,189 per mile.

Staff recommends that City Council accept the subject streets as city-maintained streets.

RESOLUTION BOOK NO. 32 – PAGE 2

D. RESOLUTION NO. 09-59 - RESOLUTION AUTHORIZING THE CITY MANAGER TO WAIVE THE ANNOUNCEMENT REQUIREMENTS AS SET FORTH IN N.C. GEN. STAT. SEC. 143-64.31 TO PROVIDE ENGINEERING SERVICES FOR RANKIN AVENUE PARKING GARAGE

Summary: The consideration of a resolution authorizing the City Manager to waive the announcement requirements as set forth in N.C.G.S. § 143-64.31 to provide engineering services for Rankin Avenue Parking Garage.

The City of Asheville owns and operates three parking garages; Civic Center, Rankin Avenue, and Wall Street. The Civic Center deck was built in 1976. Rankin Avenue and Wall Street Garages were constructed in 1988. These parking decks have deteriorated and require restorative maintenance. This maintenance typically consists of waterproofing, concrete repairs, and re-caulking of joints between concrete slabs. The City of Asheville commenced a multi-year program to accomplish restoration of the garages in 2007. The restoration work was completed in Civic Center garage in 2008. Our capital program anticipated restoration work on Wall Street Parking Garage in fiscal year 2009 and in Rankin Avenue Parking Garage in fiscal year 2011.

Parking Services sent out a Request for Proposal to engineering firms for the restoration of Wall Street Parking Garage. The scope of work included a detailed assessment of the condition of the facility, preparation of working drawings, preparation of bid package for general contractors, and supervision of the restoration work. Five firms responded to the request for proposal. Based on qualifications, Walker Parking Consultants was selected to perform the work.

The Fiscal Year 2009 budget includes $500,000 in debt service for the proposed parking garage at 51 Biltmore Avenue. We will not need to make this debt service payment and would like to use this money to move ahead with the renovations to the Rankin Avenue Parking Garage. We requested that Walker Parking provide us with a fee to perform the design analysis for the Wall Street and the Rankin Avenue Garages. The fee is $82,000 and $34,750 for Wall Street and Rankin Avenue Garages respectively for a total fee of $116,750.00. City Council approved awarding the contract to Walker for the design of both parking garages on February 24, 2009, with the understanding that staff would need a waiver from the announcement requirements for the design of the Rankin Avenue Garage.

Staff is requesting authorization to waive the announcement requirements as set forth in N.C.G.S. § 143-64.31 to provide engineering services for Rankin Avenue Parking Garage.

This action complies with the City Council Strategic Operating Plan in that it addresses a plan to maintain the City's aging facilities.

Pros:

- Combining the engineering services for both Rankin Avenue and Wall Street garages significantly reduces the overall cost than if they were done separately.
- The advantage of this to the City is by correcting problems in the deck now will prevent more costly repairs later and will extend the useful life of the parking facilities.
- Precludes the City from having to fund a large debt service and restoration project in one fiscal year.

Con:

- Completing both garages at the same time can be administratively cumbersome but is not insurmountable.

Funds were approved in the Fiscal Year 2008-09 Operating and Capital Improvement Plan budgets.

City staff recommends City Council adopt a resolution authorizing the City Manager to waive the announcement requirements as set forth in N.C.G.S. § 143-64.31 to provide engineering services for Rankin Avenue Parking Garage.

RESOLUTION BOOK NO. 32 – PAGE 4

E. RESOLUTION NO. 09-60 - RESOLUTION AUTHORIZING EXECUTION OF EASEMENT FOR POWER LINE AT WNC AGRICULTURAL CENTER (AIRPORT ROAD)

Summary: The consideration of a resolution authorizing the Mayor to execute an easement for electrical power facilities at the Western North Carolina Agricultural Center (herein "WNCAC")

The land on which the WNCAC is located is owned by the City of Asheville. It is leased to the State of North Carolina, specifically, the Department of Agriculture and Consumer Services, which uses it for the WNCAC. A new facility, the "Arts and Crafts Center," is being constructed on the property, and this new facility requires electrical service. The new lines would run from Airport Road, east across the south edge of the parking lot to the transformer. The easement

area would include 10 feet for the line, with the line being in the center, and 10 feet around the enclosure for the transformer.

This installation has been approved by the Department of Agriculture, which requested it. Such improvements are within the scope of and contemplated by the lease.

This action complies with the City's Strategic Operating Plan in that it contributes to an existing partnership with the State for the operation of a regional facility, and promotes the Asheville area as an arts and crafts center.

Pros:
- Facilitates development and use of WNCAC
- Promotes arts and crafts heritage

Cons:
- None noted

No direct fiscal impact for City; marginal impact on State.

Adoption of the resolution is recommended

RESOLUTION BOOK NO. 32 – PAGE 5

Mayor Bellamy asked for public comments on any item on the Consent Agenda, but received none.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilwoman Cape moved for the adoption of the Consent Agenda. This motion was seconded by Vice-Mayor Davis and carried unanimously.

ITEMS REMOVED FROM THE CONSENT AGENDA FOR INDIVIDUAL VOTES

RESOLUTION NO. 09-57 - RESOLUTION AUTHORIZING THE CITY MANAGER TO APPLY FOR THE U.S. ENVIRONMENTAL PROTECTION AGENCY'S SMART GROWTH IMPLEMENTATION ASSISTANCE PROGRAM

Summary: The consideration of a resolution authorizing the City Manager to apply for U.S. Environmental Protection Agency's Smart Growth Implementation Assistance Program.

The EPA has issued a call for proposals via their annual Smart Growth Implementation Assistance (SGIA) Program. This program is available to communities that want to develop in ways that reflect the principles of smart growth in order to foster economic development, protect environmental resources, enhance public health and meet other social and community goals. As a governmental agency and community that has embraced and supported smart growth principles, Asheville is eligible to serve as a primary applicant and submit a request. Successful applications are awarded technical assistance in the form of a multi-day visit from a team of experts organized by EPA and other national partners to work with local leaders. Team members will be nationally known experts in disciplines to be determined by the community's unique needs expressed in the application documents. City staff (Planning, Economic Development and Transportation) has collaborated with private partners including Mountain Housing Opportunities and the Asheville Design Center, to submit an application for assistance. Applications are due by April 23, 2009, and require support from elected officials.

The City of Asheville and its partners will ask for technical assistance in exploring policy options that maintain the community's vehicular mobility via major transit corridors while exploring options for neighborhood revitalization through corridor re-development and infill development focused on mixed uses, multi-modal transportation and the inclusion of affordable, accessible housing. This policy analysis will address the problems that Asheville's highway corridors have effectively created and our comprehensive plan and current practices fail to correct: disconnected neighborhoods and a sprawling, suburban development pattern around the city's urban core.

The analysis will be guided by the community goal of integrating transportation and land use as an economic development vehicle. The focus area will be Tunnel Road and US 70 east where need and opportunity appears to be the greatest; however, emphasis will be placed on developing policy that can be adapted and replicated in other corridors.

The City would be the primary applicant for this proposal but will work closely with Mountain Housing Opportunities and the Asheville Design Center as co-applicants. Other community partners (or stakeholders) may include: Haw Creek Neighborhood Association; Asheville Buncombe County Christian Ministries; Pisgah Legal; River Link; the Clean Air Community Trust Fund; Land of Sky Regional Council; and the Western North Carolina Alliance.

Regarding Council's Strategic Operating Plan, the following two goals most directly addressed are: (1) Promote sustainable, high density infill growth that makes efficient use of existing resources; and (2) Ensure financial accountability by matching resources with strategic initiatives. Successful and effective policy in this area could also impact the following strategic goals: (1) Increase supply of affordable housing; (2) Support diversified job growth; (3) Promote emissions reducing transportation options; (4) Prioritize infrastructure investments that support citizen health and safety; and, (5) Develop plans with citizen participation.

This application proposal was shared with the Planning & Economic Development Committee at their March 11, 2009, meeting and was unanimously endorsed.

Pros:

- If awarded, provides free expert assistance to a challenging corridor.
- Provides opportunity for collaboration between City staff and private partners.
- Successful implementation has the potential for meeting a number of strategic goals.

Con:

- Requires time commitment on behalf of staff and private partners.

Successful applicants for the SGIA program would be required to provide equivalent in-kind services during the contract team visit, and resources must be dedicated to analysis implementation (post visit). Estimates of City of Asheville in-kind assistance include:

- Pre-award: 10 hours
- Contract team visit: 25 hours
- Post- award hours:
    - First month after visit (assistance with report preparation): 20 hours
    - First quarter after report (Council consideration of any resulting recommendations): 25 hours.

Long term resource dedication cannot be estimated at this time. There is no financial contribution by the City other than the in-kind resources listed above.

Staff recommends the adoption of the resolution authorizing the City Manager to apply for the EPA Smart Growth Implementation Assistance Program.

After Ms. Tuch was unable to specifically state the dollar amounts of the in-kind City contribution, Councilman Mumpower felt the federal government should concentrate on the responsibilities they (not the City) control and let the City handle their responsibilities, noting that the City has the expertise in smart growth principles.

After Mayor Bellamy asked for public comment, but received, none, Councilwoman Cape moved for the adoption of Resolution No. 09-57. This motion was seconded by Councilman Newman and carried on a 4-3 vote, with Vice-Mayor Davis, Councilman Mumpower and Councilman Russell voting "no."

RESOLUTION BOOK NO. 32 – PAGE 1

III. PRESENTATIONS & REPORTS:

A. HEALTH OF DOWNTOWN ASHEVILLE RECOMMENDATIONS

Mr. Mike Rangel, Owner of Asheville Pizza & Brewing Company, representing the Quick Action Committee, provided Council with the following background information (1) more letters, phone calls and e-mails from residents and visitors expressing concern over "Health of Downtown" received; (2) presentations to Asheville Downtown Commission and City Council by Kelly Miller in fall of 2008; and (3) four areas routinely mentioned were graffiti vandalism, towing, cleanliness and panhandling.

Council's direction was for the committee to (1) come back to City Council with quick action steps recommendations addressing the four main concerns; and (2) have City staff follow up on recommendations.

Regarding the following, (1) two Quick Action Committee meetings were held; (2) Committee included representatives from Asheville Downtown Association, Downtown Asheville Residential Neighbors, Asheville GreenWorks, Asheville Area Chamber of Commerce, Lexington Avenue Merchants Association, small business owners, and others; (3) City staff attended as a valuable tool; and (4) Councilman Miller has met several times with staff to make sure recommendations were legal and met strategic goals.

Regarding graffiti vandalism, key recommendations include quick action steps recommendations in four special areas of concentration (1) clean-up (a) City-owned property: Public Works to remove all reported graffiti vandalism on City-owned property by a specified time period; (b) City staff to work with recycling contractors, commercial waste haulers, and utility companies to remove graffiti vandalism from their properties within a specified period of time; (c) 50/50 matching grant program for property owners to help cover one-half graffiti abatement costs; (d) research and recommend to Council a possible third party to be the first responder for graffiti vandalism removal; and (e) encourage and promote more groups like Asheville GreenWorks, who are removing graffiti for property owners at cost, as well as providing graffiti removal kits for small surfaces; (2) enforcement (a) the purchase and installation of a high definition, moveable surveillance camera capable of catching graffiti vandals in the act; (b) increase the number of stakeouts; (c) CrimeStopper rewards for citizens turning in graffiti vandals; (d) make public aware of motion sensor lights as a major graffiti vandalism deterrent; (e) govern spray paint sales; and (f) more boot patrolling; (3) policy; and (4) community and education (a) officially launch "Vandal Free in 3," a voluntary community-wide program that residents and property owners pledge to do all they can to remove graffiti vandalism within 72 hours (3 days); (b) create "Vandal Free in 3" website and launch public relations campaign including press conference. Website will serve many purposes, including report graffiti vandalism; post before and after photos; graffiti vandalism removal tips; volunteer sign-ups; frequently asked questions, etc.; (c) establish a hotline to report all graffiti vandalism; (d) Shame Game: Committee recommended promoting names and photos of captured graffiti vandals. Subsequent research by staff revels conflicting viewpoints; and (e)

communicate to the community the economic impact of graffiti vandalism and how these acts increase consumer prices.

Regarding non-consensual towing, key recommendations include (1) regulate through ordinance (passed City Council on March 24, 2009); (2) convene major downtown property owners who own lots and discuss current challenges and opportunities regarding parking in private lots; (3) continue to explore feasibility of awarding parking contract to a third party parking vendor similar to other North Carolina cities; and (4) the integrated wayfinding program will be installed this summer/fall, directing drivers to City-owned parking decks. This should help in reducing the number of cars illegally parked in private lots.

Regarding cleanliness, key recommendations include (1) if dollars are available, have dedicated City staff tackle litter and weeds problem on a regular schedule; (2) Asheville GreenWorks to encourage monthly clean-ups by Adopt-A-Street sponsors; (3) more trash cans in Central Business District and at bus stops; and (4) make sure enough resources are available to keep Asheville's new "living room," Pack Square Park, clean.

Regarding panhandling, key recommendations include (1) re-launch "Spare Change for Real Change" effort; (2) increase number of "Spare Change" receptacles; (3) pursue City's strategic goal of establishing a "nuisance court" that can effectively deal with panhandlers; and (4) promote widely and encourage residents to call the Asheville Police Department at 252-1110 to report panhandling when witnessed.

In summary – Recommended Next Steps: (1) Ask staff to identify recommendations which can be implemented immediately with no budget impact; (2) Ask staff to identify recommendations which need budgetary funding for implementation; and (3) Ask staff to identify recommendations which need local ordinance adoption for legal implementation.

He said that to be successful, we must be diligent and focused on all four strategies.

Mayor Bellamy thanked Mr. Rangel for allowing the City to place their recycling center on his property as well as allowing the community to use his parking lot for the tailgate market.

Councilman Miller moved to direct City staff (1) to identify recommendations which can be implemented immediately with no budget impact; (2) to identify recommendations which need budgetary funding for implementation; (3) to identify recommendations which need local ordinance adoption for legal implementation; and (4) to report back to Council on May 26, 2009. This motion was seconded by Councilman Mumpower.

When Councilman Mumpower expressed concern over the length of time to report back to Council since the report was originally given to Council in October, Mayor Bellamy said that Asheville has been working throughout that time, citing the adoption of the non-consensual towing ordinance, kicked off the cleanliness campaign for April 25 with Asheville GreenWorks, continuing to work with the N.C. Dept. of Transportation on various projects, etc.

Mr. Rangel and Councilman Miller responded to various questions/comments from Councilwoman Cape, some being, but are not limited to: what entities are envisioned with the 50/50 matching grant program for property owners to help cover ½ of the graffiti abatement costs; is anyone aware of any grants that might be available for graffiti abatement; explanation of the first responder for graffiti removal; explanation of a third party parking vendor relative to the non-consensual towing ordinance; and suggestion of making a concerted effort to create relationships with clients of A-HOPE, ABCCM, etc. in order to make them feel a part of the community and perhaps participate in an Adopt-A-Street program.

Mayor Bellamy said that the Homeless Task Force has discussed this issue and the recipients of services from the Rescue Ministries and Homeward Bound have started cleaning up around their areas.

Councilman Newman updated Council on the nuisance court concept, which is moving forward. He felt it was possible to have the program running in the new fiscal year which will bring more accountability to the people who are being chronically arrested.

Councilman Russell was pleased to see the hotline to report graffiti vandalism and the use of volunteers.

Councilman Mumpower (1) suggested the City remove graffiti off their own property in three days (as is the same for property owners); (2) spoke against the 50/50 matching grant program in that the costs for that program would be difficult to determine; (3) supported the first responder relationship for graffiti removal as the costs of the initial equipment is defined; (4) spoke against governing spray paint sales due to complexity of enforcement; (5) spoke in support of a significant reward program for citizens turning in graffiti vandals; (6) supported a specific page on our website identifying all types of people that abuse our community; and (7) suggested information be placed on the Spare Change for Real Change boxes of the intent behind the boxes and a phone number to call if anyone is abused.

Ms. Susan Roderick, Executive Director of Asheville GreenWorks, spoke in support of the nuisance court and urged Council to continue their support of police officers.

Councilman Miller thanked representatives from Asheville GreenWorks, Mr. Rangel and all the Committee members for their hard work on this Committee and their on-going commitment to improve the health of downtown.

The motion made by Councilman Miller and seconded by Councilman Mumpower carried unanimously.

B. ECONOMIC STIMULUS PACKAGE UPDATE

RESOLUTION NO. 09-61 - RESOLUTION APPROVING APPLICATION TO THE CLEAN WATER STATE REVOLVING FUND FOR ECONOMIC STIMULUS FUNDING FOR THE SARDIS ROAD AREA SANITARY SEWER LINE PROJECT

RESOLUTION NO. 09-62 - RESOLUTION APPROVING APPLICATION TO THE CLEAN WATER STATE REVOLVING FUND FOR ECONOMIC STIMULUS FUNDING FOR THE AIRPORT ROAD AREA SANITARY SEWER LINE PROJECT

RESOLUTION NO. 09-63 - RESOLUTION APPROVING APPLICATION TO THE CLEAN WATER STATE REVOLVING FUND FOR ECONOMIC STIMULUS FUNDING FOR THE DINGLE CREEK STORMWATER IMPROVEMENTS PROJECT

RESOLUTION NO. 09-64 - RESOLUTION APPROVING APPLICATION TO THE CLEAN WATER STATE REVOLVING FUND FOR ECONOMIC STIMULUS FUNDING FOR THE ROSS CREEK STORMWATER IMPROVEMENTS PROJECT

RESOLUTION NO. 09-65 - RESOLUTION APPROVING APPLICATION TO THE CLEAN WATER STATE REVOLVING FUND FOR ECONOMIC STIMULUS

FUNDING FOR THE VICTORIA ROAD DRAINAGE IMPROVEMENTS PROJECT

RESOLUTION NO. 09-66 - RESOLUTION APPROVING APPLICATION TO THE CLEAN WATER STATE REVOLVING FUND FOR ECONOMIC STIMULUS FUNDING FOR THE OLD TOLL ROAD STORM DRAIN REPAIR AND STABILIZATION PROJECT

RESOLUTION NO. 09-67 - RESOLUTION APPROVING APPLICATION TO THE OFFICE OF COMMUNITY ORIENTED POLICING SERVICES HIRING RECOVERY PROGRAM

Assistant to the City Manager Lauren Bradley updated Council on the following application for the economic stimulus package. She said that as part of city staff's recurring ARRA update to Asheville City Council, staff is seeking Council consideration of Governing Board resolutions in support of applications for ARRA funding for six infrastructure projects from the Clean Water State Revolving Fund and for the salary costs of 12 full-time, sworn police officers from the Office of Community Oriented Policing Services (COPS) Hiring Recovery Program (CHRP).

Clean Water State Revolving Fund

At the City Council meeting on February 24, 2009, Council approved through consensus staff submission of letters of intent to apply for ARRA funding for six projects from the Clean Water State Revolving Fund. These six projects include a Sardis Road Area Sanitary Sewer Line, Airport Road Area Sanitary Sewer Line, Dingle Creek Stormwater Improvements, Ross Creek Stormwater Improvements, Victoria Road Drainage Improvements, and Old Toll Road Storm Drain Repair and Stabilization. At its March 26, 2009, meeting, the City Council Finance Committee reviewed the proposed projects and authorized staff to submit applications for funding. The Finance Committee also recommended that City Council approve a resolution in support of these applications, which is required as part of the application process. These projects are part of City Council's strategic goals to create jobs to aid in economic recovery and enhance the sustainability of city infrastructure.

Pros:

- Approval of these projects will ensure continuation of the application process. If awarded, the City of Asheville could realize significant savings in project costs.

Cons:

- If the resolutions are not approved, the application process and funding potential for these projects will not move forward, and the full project costs will be the City's responsibility.
- Approval does not guarantee the state will approve any or all of these projects.

There is no fiscal impact at this time for City Council to approve the resolution supporting these applications. If the projects are approved by the state, the CWSRF will award a zero percent interest loan, and forgive half the principal, to complete the projects.

Staff recommends that the Mayor and City Council approve resolutions for the six approved clean water projects known as Sardis Road Area Sanitary Sewer Line, Airport Road Area Sanitary Sewer Line, Dingle Creek Stormwater Improvements, Ross Creek Stormwater Improvements, Victoria Road Drainage Improvements, and Old Toll Road Storm Drain Repair and Stabilization.

Office of Community Oriented Policing Services (COPS) Hiring Recovery Program

At its March 26, 2009, meeting, the City Council Finance Committee authorized staff to submit an application to the COPS Hiring Recovery program for funding for entry-level salaries and benefits for 12 new full-time, sworn police officer positions. If awarded, the grant provides 100 percent funding for salaries and benefits for a period of three years (36 months). Grantees are then obligated to retain all positions awarded under the CHRP grant for a period of one year (12 months) following the conclusion of grant funding.

Pros:

- In order to meet City Council's strategic goals and projected community needs in public safety over the next four years, it is anticipated that the Asheville Police Department will need additional sworn personnel. This grant opportunity will allow the city to realize the benefit of additional officers over the next three years at no additional cost to the city.
- Additional officers will allow the Asheville Police Department to create a Downtown Patrol Unit, which has been identified as a priority based on results from the recent citizen survey indicating a need for greater law enforcement and crime prevention efforts in the downtown area.

Con:

- If the resolution is not approved, the application process and funding potential for these projects will not move forward, and the city will add public safety personnel incrementally as local funding allows.

There is no fiscal impact at this time for City Council to approve the Resolution supporting the COPS application. If Asheville receives funding for 12 officers, the grant funding requested for years 1-3 would total approximately $1,645,668 with no local match. At the end of three years, the city would be responsible for funding the full salary cost for the 12 officers totaling between approximately $578,160 and $652,109, depending on promotions and salary increases. In addition, the city will be responsible for purchasing uniforms, equipment and vehicles for the personnel hired under the COPS program in the first year, totaling $202,400 total for 12 requested officers.

Staff recommends that the Mayor and City Council approve the resolution authorizing the City Manager to apply for COPS funding under the American Recovery and Reinvestment Act program to increase the number of sworn police officers by twelve.

Vice-Mayor Davis wondered if there could possibly be a reduced stormwater fee for taxpayers if the stormwater projects are approved. Director of Transportation and Engineering Cathy Ball responded that these stormwater projects are not funded now and thus would not impact the fees currently charged.

In response to Vice-Mayor Davis, Ms. Ball said that the planning components on the four stormwater projects are complete and all these funds would be for the construction work.

Councilman Mumpower felt City government is responsible for all of these projects and the federal government should concentrate on their responsibilities which local governments cannot control, e.g., immigration enforcement.

Councilwoman Cape was very hopeful that the City receives funding on these projects as clean water is so essential to our children's future and to the future of our nature.

Mayor Bellamy said these infrastructure projects have been in need of addressing for many, many years and was pleased to see Council supporting these grants.

Police Chief Bill Hogan responded to various questions from Councilman Mumpower regarding the need for additional police officers and how the Police Department had plans to incrementally increase police positions due to the demands in downtown.

Councilman Mumpower spoke against the grant for additional police officers in that police enforcement is a City responsibility. He did, however, acknowledge that Council has done an excellent job in responding to the requests of Police administration for manpower and other forms of support. But, he reiterated that federal government is neglecting their responsibilities which local governments cannot control, e.g., immigration enforcement.

Councilman Newman noted that no part of the City's budget has received a greater percentage of our budget than public safety and this is a high priority.

Councilwoman Cape said that the federal government is doing what we ask – help with job creation.

Mayor Bellamy asked for public comment, but received none.

Mayor Bellamy said that members of Council have been previously furnished with copies of the resolutions and they would not be read.

Councilwoman Cape moved for the adoption of Resolution No. 09-61. This motion was seconded by Councilman Miller and carried on a 6-1 vote, with Councilman Mumpower voting "no."

RESOLUTION NO. 09-67 - RESOLUTION BOOK NO. 32 – PAGE 13

RESOLUTION NO. 09-68 - RESOLUTION AUTHORIZING THE MAYOR TO EXECUTE ON BEHALF OF THE CITY OF ASHEVILLE FEDERAL AVIATION ADMINISTRATION GRANTS

This is the consideration of a resolution authorizing the Mayor to execute several documents for funding opportunities for the Airport Improvement Program.

The Asheville Regional Airport Authority (ARAA) has several funding opportunities that will require the approval of the City and Buncombe County. The turnaround time to have these grants fully executed will be very short. As such, the ARAA is requesting that the City approve the acceptance of such grants and authorize the Mayor to execute these grants when they are received. Because we do not have them in advance of the request, the authorization for the Mayor's execution includes approval by the City Attorney.

The grants that the ARAA anticipate receiving and requiring approval are as follows:

1. ARAA is in the pipeline to receive $7.5 Million in stimulus funding that is dedicated to Airport improvements. This amount could be more based on final bids received and if additional stimulus funding becomes available due to other airports not being able to have their projects ready to accept a grant. This is a 100% grant with no local match requirement. This grant requires a Sponsor Certification with the grant application once bids have been received, and then execution of the final grant. It is requested that the City approve the acceptance of the stimulus funding grant if offered by the Federal Aviation Administration (FAA), and authorize the Mayor to execute the necessary documents.

2. ARAA will be receiving a second Airport Improvement Program (AIP) grant this year, which will be approximately $2.7 Million. This is a traditional 95% grant with a 5% local match. ARAA has the budgeted funds necessary for the local match. It is requested that the City approve the acceptance of the AIP grant when offered by the FAA, and authorize the Mayor to execute the necessary documents.

3. ARAA will have an opportunity to receive "fall-out" Fiscal Year 2009 AIP grant funds from the FAA in an amount yet to be determined. This will be a traditional 95% grant with a 5% local match. ARAA has the budgeted funds necessary for the local match. It is requested that the City approve the acceptance of the AIP grant when offered by the FAA and authorize the Mayor to execute the necessary documents.

The combination of funds will be utilized for the renovation of the Terminal A-Gates area, the renovation and upgrading of the roadway leading into the general aviation area, purchase of a new Rapid Intervention Vehicle, and the construction of new aircraft parking apron and a taxiway connector. The City will not be responsible for any of the matching funds, or for carrying out the terms of the grant agreements. Compliance will be the responsibility of the ARAA.

This action complies with the City's Strategic Operating Plan in that it contributes to the development of a multimodal transportation program, supports sustainable economic development, and contributes to Asheville's role as a regional economic and service center.

Pro:
- Facilitates development of Airport

Con:
- None noted

None to the City

Staff recommends adoption of a resolution authorizing the Mayor to execute several funding opportunities for the Airport Improvement Program, subject to approval of the City Attorney.

Airport Director David Edwards explained that there is the potential for the Airport to receive additional stimulus funds; therefore, he asked that the proposed resolution be amended so as to be flexible in the dollar amounts.

Councilman Newman recognized Mr. Edwards for his great work at the Airport and wished him well in his new position in Greenville, South Carolina.

In response to Councilman Mumpower, Mr. Edwards said that the Airport has approximately $5 Million in reserve funds which is set aside to fund the Airport budget for 12 months.

Councilman Mumpower spoke against the motion in that the Airport has made major improvements, but at a time of major economic crisis (with $5 Million readily available) he felt to accept money from the federal government is irresponsible.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Newman moved for the adoption of Resolution No. 09-68, as amended. This motion was seconded by Councilman Miller and carried on a 6-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 32 – PAGE 14

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER CONDITIONAL ZONING OF THE PROJECT IDENTIFIED AS WESTMORE APARTMENTS LOCATED ON WESTMORE DRIVE FROM RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT AND CI COMMERCIAL INDUSTRIAL DISTRICT TO RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT/CONDITIONAL ZONING FOR THE DEVELOPMENT OF A 72-UNIT APARTMENT COMPLEX

ORDINANCE NO. 3720 - ORDINANCE TO CONDITIONALLY ZONE A PROJECT IDENTIFIED AS WESTMORE APARTMENTS LOCATED ON WESTMORE DRIVE FROM RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT AND CI COMMERCIAL INDUSTRIAL DISTRICT TO RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT/CONDITIONAL ZONING FOR THE DEVELOPMENT OF A 72-UNIT APARTMENT COMPLEX

Mayor Bellamy opened the public hearing at 6:22 p.m.

Urban Planner Jessica Bernstein said that this is the consideration of an ordinance to conditionally zone the project identified as Westmore Apartments located on Westmore Drive

from RM-16 Residential Multi-Family High Density District and CI Commercial Industrial District to RM-16 Residential Multi-Family High Density District/Conditional Zoning for the development of a 72-unit apartment complex. This public hearing was advertised on April 3 and 10, 2009.

The site consists of five separate parcels located at 64 Westmore Drive with a combined area of approximately 5.518 acres. Four of the lots are zoned RM-16 with the remaining parcel (a portion of a larger parcel – recombination required) currently zoned CI – all lots are undeveloped. Adjacent parcels are similarly zoned CI and RM-16 as well as RS-8 to the north. This site is immediately adjacent to the ETJ to the west and to Deaverview Apartments to the East.

The applicant, Mountain Housing Opportunities (MHO), is proposing to construct a multi-family complex that will consist of seven (7) buildings ranging in size from 10,445 to 12,534 square feet. The buildings are all 2-3 stories in height (26'6" – 36' to top of roof peak) and contain 10-12 units each (a mix of 1, 2, 3 and 4 bedrooms) to reach the total of 72 units.

Access to the site is proposed from Westmore Drive, which was created through a major subdivision approval in 2005 and connects with Deaverview Road. A total of 94 parking spaces are provided (4 HC spaces) to serve the residential units and all spaces are located around the 2-way private looped-drive (which is essentially a circular parking area). A 6' sidewalk is proposed to circle the looped-drive and should connect to the existing sidewalk along Westmore Drive.

The project will be required to comply with applicable landscaping and open space standards, including a type A (20') property line buffer around the western and southern boundaries. Approximately 38,000 square feet of open space will be provided throughout the site (exceeding the minimum requirements of the ordinance) as well as more than 72,000 square feet of Tree Save Area. Additionally the site design proposes a central courtyard with a playground.

The site is at elevations over 2220' but has a slope of just under 15% - therefore steep slope regulations do not apply. There are several retaining walls placed throughout the project area, two of which have heights of 26' – 30' and will require additional landscaping/screening.

All 72 of the apartments in this project will be offered at rents affordable to those below 60% annual median income (AMI). This affordability is assured for 30 years under federal and state programs. Verification of rents and tenant income qualification will be provided to the City of Asheville Community Development Department at the time of initial occupancy as required by the Housing Trust Fund loan guidelines.

The proposal has been granted $470,000 in Housing Trust Fund monies and is awaiting approval of tax credits from the NCHFA (North Carolina Housing Finance Agency) as well as final approval of $225,000 in HOME grant funding.

A conditional zoning is being requested due to the fact that recombination of the parcels would result in a split-zoned lot. Both current zoning designations (RM-16 and CI) permit a similar density of approximately 16 units per acre. Given the acreage of the property, 96 units could be constructed. The development proposes 72 units, a density of approximately 13 units per acre.

This proposal was evaluated by the Technical Review Committee (TRC) on March 16, 2009, and was approved with conditions as outlined in the TRC staff report. The Planning & Zoning Commission unanimously approved the project on April 1, 2009 (5-0). No members of the public spoke regarding this project at either meeting.

Section 7-7-8(d)(2) of the Unified Development Ordinance (UDO) states that planning staff shall evaluate conditional zoning applications on the basis of the criteria for conditional use permits set out in Section 7-16-2. Reviewing boards may consider these criteria; however, they are not bound to act based on whether a request meets all seven standards.

1. **That the proposed use or development of the land will not materially endanger the public health or safety.**
   The proposed project has been reviewed by City staff and appears to meet all public health and safety related requirements. The project must meet the technical standards set forth in the *UDO*, the *Standards and Specifications Manual*, the *North Carolina Building Code* and other applicable laws and standards that protect the public health and safety.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.**
   The proposed use and development of the land is compatible with the natural features and topography of the site as well as the surrounding area. Although most of the existing vegetation will be removed, the site is not heavily vegetated to begin with. Appropriate landscaping and open space will be provided to that is fitting and compatible with the residential neighborhoods surrounding this location. There are no significant topographic features on the site.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.**
   The development is not expected to injure the value of adjoining or abutting properties. The use proposed is similar to adjacent parcels (residential). Although Westmore Drive is platted for single-family detached housing, Deaverview Apartments (adjacent to the east) consists of multiple multi-family buildings as well.

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.**
   Although a portion of the site and adjacent parcels are currently zoned CI, the uses on the developed portions of those lots are residential. Other uses in the immediate vicinity are also residential, with a mix of single-family and multi-family structures. Therefore the proposed use on this site is complementary to the neighborhood. Likewise, the number of residential units allowed is the same for both RM-16 and CI so there is no conflict with regards to density. The scale of the structures is similar to the adjacent existing multi-family development (Deaverview Apartments). Overall, this proposal should be compatible with the area in which it is located.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.**
   The *Asheville City Development Plan 2025* encourages a Smart Growth development pattern by recognizing the need for higher density residential infill projects located along transit lines (Rt. 15). With 72 units, this project is not only meeting that goal but also addresses what the *Plan* calls "the number one economic development problem for this community": lack of affordable housing. All units within this development will be offered as affordable rentals for households with less than 60% area median income for a 30-year period.

   City Council's goal of *sustainability* is realized by these projects that encourage high-density growth in an area with existing infrastructure as well as this project's location along a transit route (Rte. 15). The development proposes for all of the units as affordable (rental) and Energy Star rated, aligning with Council's priority area on providing *affordable* and *green* housing opportunities for all citizens.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.**
   This proposed development is located near major road facilities and along a City bus route (#15). In addition, basic infrastructure appears adequate and preliminary review by other service providers has not revealed any problems for future service to the development.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.**
   The proposed project has been reviewed by the City Traffic Engineer and it should not cause undue traffic congestion along the existing street infrastructure. The anticipated traffic at full build-out conditions is expected to be less than one hundred (100) vehicles per hour during the morning and afternoon peak hours during a typical weekday.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Pros:
- The project offers 100% affordable housing units, aligning with City Council's goals.
- Higher density development furthers the goals and objectives of the comprehensive plan.
- The proposed development provides housing in a transit-served area.
- The project will be designed to qualify for Energy Star rating.

Con: None noted.

Based on the above findings, staff recommends approval of the conditional zoning as requested by the applicant, with the standard conditions.

Mr. Scott Dedman, Executive Director of MHO, spoke in support of the conditional zoning, noting that they are requesting 72 safe, attractive and affordable apartments in a convenient neighborhood near jobs, schools, shopping and transportation. He explained how this development will serve working families in a broad income wage – from approximately $14,000 - $34,000 annually. As these are initial income levels to the apartments, as their incomes go up, their rent does not. He explained there is a market need of approximately 1,400 units just in this part of Asheville. They perform a strict credit and criminal check screening. These privately owned apartments will pay full property taxes. The Mayor's affordable housing plan calls for 500 similar workforce housing apartments per year and this is a small step toward that goal. He was pleased to note that the design for the apartments will look as dignified as any other nice apartment building. They have a strong professional management company that performs a strict screening of applicants.

Mr. Chris Day, representing Civil Design Concepts, spoke in support of the conditional zoning explaining many of the smart growth characteristics of the project. He then explained how the project meets many of the sustainability goals of the City. He felt this project will be a great addition to the west Asheville area.

When Mr. Fred English spoke in opposition of using taxpayer dollars to build this project, Mr. Dedman explained the funding package. Councilwoman Cape also explained the concept of the Housing Trust Fund.

Mayor Bellamy closed the public hearing at 6:33 p.m.

Mr. Dedman responded to various questions/comments from Councilwoman Cape, some being, but are not limited to: concerns expressed of more low income housing in west Asheville; description of types of jobs people have that will be living in this development; explanation of

workforce housing; reasons for building apartments in specific areas; note that this project is not low income housing, but workforce housing; and when MHO is looking at areas to build, do they take into consideration the number of children added to the particular school district.

Councilman Newman said that this proposal was reviewed by the Regional Housing Consortium, which is represented by local governments from Madison County, Transylvania County, Henderson County, and Buncombe County, and this was one of two projects unanimously agreed upon, which is an indication of how well the project was regarded.

In response to Councilman Mumpower, City Attorney Oast said that regarding the seven conditional use standards, Council needs to consider the appropriateness of the project on its own merits. The source of money to finance the development should not be weighed in consideration of the project.

Mr. Dedman responded to Councilman Mumpower's concerns about concentrating a high density development beside one (Deaverview Apartments) that is not working in terms of drug activity and crime. He gave examples of a number of large scale rental apartments they have built and are managing successfully.

City Attorney Oast cautioned Council about acting in reliance on the continued operation by MHO, as the property could change hands.

In response to Councilman Miller, Mr. Dedman said that MHO has developed 337 apartments in the City of Asheville and if this project is approved, will add an additional 72 units.

Mayor Bellamy, former employee of MHO, said that MHO is an organization that resolves problems. She cited an example of the apartments they built behind Claxton Elementary School. When problems arose, instead of walking away, they worked with the Police Department to have an officer live rent-free in those apartments in terms of patrolling and working with that community. In addition, they built apartments in the West End/Clingman Avenue area when there was no redevelopment in new housing over 50 years. It is now a vibrant neighborhood.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Newman moved for the adoption of Ordinance No. 3720 to conditionally zone the project identified as Westmore Apartments located on Westmore Drive from RM-16 Residential Multi-Family High Density District and CI Commercial Industrial District to RM-16 Residential Multi-Family High Density District/Conditional Zoning for the development of a 72-unit apartment complex, subject to the following conditions (1) The project shall comply with all conditions outlined in the TRC staff report; (2) All site lighting must comply with the City's Lighting Ordinance and be equipped with cut-off fixtures or full cut-off fixtures and directed away from adjoining properties and streets. A detailed lighting plan will be required upon submittal of detailed plans to be reviewed by the Technical Review Committee; (3) All existing vegetation that is to be preserved must be clearly indicated and dimensioned on the site, landscape and grading plans; (4) The building design, construction materials and orientation on site must comply with the conceptual site plan and building elevations presented with this application. Any deviation from these plans may result in reconsideration of the project by the reviewing boards; and (5) This project will undergo final review by the TRC prior to issuance of any required permits. This motion was seconded by Vice-Mayor Davis and carried unanimously.

ORDINANCE BOOK NO. 25 - PAGE 223

V. UNFINISHED BUSINESS:

A. PACK SQUARE CONSERVANCY

MOTION TO ACCEPT THE PACK SQUARE CONSERVANCY'S BUDGET AND APPROVE THE DESIGN CHANGES

Mayor Bellamy introduced the Pack Square Conservancy's new Board Chair Guy Clerici, who in turn introduced the new Executive Director Gary V. Giniat. Mr. Giniat briefly reviewed with Council the following executive summary on Pack Square Park:

Pack Square

The Conservancy is in the final weeks of construction on Pack Square. Rainy weather in late March and early April cost the crew a week of construction time, but work is proceeding rapidly nevertheless. The major tasks that remain in the square include landscaping, paving the street in front of the Biltmore building, completing work in front of Pack Place and the Asheville Art Museum, putting the finishing touches on brickwork throughout the square, and installation of granite pavers and Hoss Haley's bronze and stone fountain in Oates Plaza.

Once the contractor has completed construction, City representatives will inspect the square and notify the Conservancy if there are areas of concern. Once work in the square is completed to the satisfaction of all parties, the Conservancy will officially turn Pack Square over to the City of Asheville.

The Conservancy will announce a date for an opening celebration for Pack Square in the near future.

Roger McGuire Green

Work in the green has been running slightly ahead of schedule and may be completed by the end of July, weather permitting. The pillars for the pergola at the back of the stage are in place. The crew is building seating walls on the south side of Splasheville and continues to install granite veneer on sections of the stage, the seating walls and the fountain.

The workers are preparing to install brick pavers on the forecourt of the stage. Bright blue tiles by Weaverville ceramicist Kathy Triplett will be woven into the pattern of the brickwork. The foundation for the Veteran's Monument was completed two weeks ago and work is beginning on the upper portion of the structure.

Reuter Terrace

Work is about to begin in Reuter Terrace in the middle of the park. This section of the park will have a terraced lawn overlooking the main stage and will offer comfortable seating for main-stage events. Reuter Terrace will have extensive hardscape, including Visitors' Plaza, which will include decorative paving and movable furniture, a small stage, and a water feature. The 4,600 square-foot park pavilion will be located on College Street on the north side of the site.

The early work in Reuter Terrace will focus on hardscape and landscape. Work on the pavilion will begin somewhat later in order to avoid conflicting activities on the small site. Once work gets underway, the Conservancy will be able to develop a more accurate estimate of the completion date for this final portion of the park.

While updating Council on the construction of Pack Square Park, Mr. Giniat described the following four areas of changes and the reasons for those changes: (1) modified forecourt to compliment new museum design; (2) increased size of pavilion; (3) reduced size of water feature; and (4) added Veteran's Memorial.

Mr. Giniat said that Council has been provided with the Pack Square Conservancy's budget vs. actual as of February 28, 2009; their balance sheet as of February 28, 2009; and their Profit & Loss sheet of January through February 2009. Their current budget is $20 Million and that does not include the $2 Million endowment they are attempting to raise. So, when the Conservancy turns the Park over to the City they have funds for capital improvements to help with special maintenance. To date they have spent almost $12 Million on the project. He said they still have to raise an additional $3.9 Million and some of that is for the pavilion.

Mr. Giniat then requested approval of the Pack Square Conservancy's budget. In addition, he requested approval of design changes that have been made in Pack Square Park.

In response to Ms. Regan Evans, co-owner of Windows on the Park, Mr. Giniat said that the total footprint of the pavilion has not changed.

Mr. Fred English was pleased to note that the veterans group raised the money necessary for the veterans' memorial, but voiced concern over the rising costs of this Park – from $6 Million to now $20 Million.

Mayor Bellamy recalled that when this project was approved, Council said they wanted very little interaction as far as City dollars paying for this initiative going forward. The City has not invested $2-3 Million of local tax dollars; however, the City does have oversight of the federal dollars that have been garnered. But again, those dollars are not City tax dollars.

When Councilman Miller acknowledged that he serves in a volunteer capacity on the Pack Square Conservancy Board, City Attorney Oast said that there was no disqualifying conflict of interest for him participating in this matter.

There was a brief discussion, initiated by Councilman Newman, about the City's authority to approve the Conservancy's budget when that approval has not been regularly sought during the course of the project. City Attorney Oast said that the agreement reads, in part "PSC shall coordinate capital funding for the Project and submit a budget for the Project to the City and County for approval, which approval shall not be unreasonably withheld or delayed." Any approval authority we have would be really over the use of public funds, which the agreement contemplates to a certain extent. Regarding the design approval, it was his opinion that approval by the City and County is required.

In response to Councilman Mumpower, Mr. Giniat said that he has not received any concerns about the design changes. In fact, the changes in the forecourt were done as a result of working with people around the park.

Councilman Russell moved to approve the design changes. This motion was seconded by Councilwoman Cape.

In response to Councilman Newman, Assistant City Manager Richardson said that the City, County and the Conservancy are looking at a request for proposal to see how much it will cost next fiscal year to bring the park on line for day to day operational maintenance. The agreement calls for the City and County to share those costs. At budget time, the City and County will report back to their respective bodies for direction. In addition, Chief Financial Officer Ben Durant said that the City has put an initial placeholder in our budget of $100,000 for operational upkeep.

Discussion surrounded the on-going maintenance of the Park. Councilman Newman was excited about the Park but was concerned that because the costs have tripled since the project began, that might have an affect the operating costs. Assistant City Manager Richardson responded and Mr. Durant said that staff will be assessing the impact of the on-going operating

costs on this capital project (and all our capital projects) and will report back to Council as needed.

Councilman Miller said that Mr. Tim Marshall provided a major plan for maintenance, operations, security, programming and other costs. Now that the Park is coming on line in various stages, it allows us an opportunity to look at the recommendations made 4-5 years ago by Mr. Marshall and ask what is realistic.

Vice-Mayor Davis offered a friendly amendment to the motion that we accept the budget and approve the design changes as presented.

Councilwoman Cape noted this was an incredible initiative by a group of citizens in our community to do something amazing. The unknowns have been faced all along, but she felt sure we will look back on this great project.

Councilman Russell accepted the friendly amendment and moved to amend his motion to (1) accept the Conservancy's budget as presented; (2) approve the design changes as presented; and (3) waive the fee for the veterans' memorial dedication. Councilwoman Cape agreed to the amended motion. Said amended motion carried on a 6-1 vote, with Councilman Mumpower voting "no."

RESOLUTION NO. 09-69 - RESOLUTION AMENDING THE FEES AND CHARGES MANUAL TO ESTABLISH PARK RENTAL FEES FOR PACK SQUARE PARK

Cultural Arts Superintendent Diane Ruggiero said that this is the consideration of a resolution amending the Fees and Charges Manual to establish park rental fees for fees for Pack Square Park.

The use of Pack Square Park for outdoor special events has been limited due to park construction. Once complete, the park is destined to become one of the premier downtown event locations for organizations and event organizers. The first section of the park, Pack Square, will soon be complete and scheduled to open in late April or early May. Roger McGuire Green and Reuter Terrace are scheduled to open in the summer, but may not be immediately available for event use in order to protect the new turf. Staff is preparing to begin issuing outdoor special event permits for Pack Square section of the park.

Staff recommends separating park rental areas into four sections: Pack Square, Reuter Terrace, Roger McGuire Green and City/County Parking Lot. All use will follow the guidelines in the Outdoor Special Event Guide.

Please note as it pertains to the Outdoor Special Event Guide:

- Fees are charged from the time of event set-up to event break-down, not just the hours of the event.
- Priority for use is given in order to: 1) City of Asheville events; 2) Co-sponsored events; 3) Non-profit organizations whose event is of interest to the community; 4) Non-profit organizations whose event is of interest to the organization; 5) Commercial ventures and events organized for profit.
- Additional fees may be incurred for police support, fire/medic support, street closings, permits for tents, additional equipment needs, etc.
- Where available, park rental fees include electrical outlets and water supply.

Proposed Pack Square Park rental fees:

- Pack Square: $100 per first three hours, $25 for each additional hour

- Reuter Terrace and Roger McGuire Green: $500 per first three hours, $100 for each additional hour.

Note: Until the pavilion in Reuter Terrace is built, Reuter Terrace and Roger McGuire Green will be rented as one area. Once the pavilion is complete, the rental fee for the areas will be reassessed. Use of Roger McGuire Green includes use of the stage. Use of the stage may require use of the City/County Parking Lot.

Staff gathered public comment on the proposed park rental fees via three venues: 1) presentation to the Pack Square Conservancy Board on April 1, 2009; 2) public meeting with businesses surrounding the park on April 3; and 3) posting on the City of Asheville website for public comment. No specific issues or concerns were received via feedback.

This action complies with the Parks, Recreation, Cultural Arts and Greenway Master Plan in that it assures that administrative policies promote effective provision of community festivals and events.

This item was scheduled for review by the Recreation Advisory Board at its regular meeting on April 13 for their recommendation.

Pros:

- Allows the community affordable use of Pack Square Park
- Allows for permitting of the space to begin in conjunction with park construction completion
- Allows for better fee consistency across all City parks

Cons:

- Fees will not recover all operating costs Pack Square Park rental
- Heavy use of Pack Square Park could have an impact of the infrastructure, which may drive operational expenses higher in the future.

The fiscal impact of this action will be that park rental will generate revenue to offset operating cost.

Staff recommends City Council adopt a resolution amending the Fees and Charge Manual to establish park rental fees for Pack Square Park.

Ms. Regan Evans, co-owner of Windows on the Park, expressed concern over the way the Pack Square venue is drawn. The entire area should be split in half and there be a permitted area on North Pack Square and a permitted area on South Pack Square. Therefore, someone from the Pack Place side could host an event on the small green space in front of their building and Windows on the Park could host an event on the small green space on their side of Pack Square. If the area stays as one large area, only one event could be held. She asked Council instruct City staff to be lenient with their permitting process for the Pack Square area.

Ms. Ruggiero said that if someone gets a permit for Pack Square, it is the same as someone would rent for any one of our other parks. It just includes that use of the space. Street closings will be an additional fee charged through the Street Division. And, since there are parking meters along a portion of that street, Parking Services charges an additional fee to close each one of those meters if the event is on a weekday or a Saturday. Regarding permitting the entire Pack Square area, she said staff will definitely work with event organizers on a case by case basis if there are overlapping request for use, but it will depend on the scale of the different events, the event itself and the requirements for alcohol.

Councilman Russell supported event organizers not having to pay for the entire Pack Square area if their event is in a small area.

In response to Councilwoman Cape, Ms. Ruggiero said that just until the pavilion on Reuter Terrace is built, Reuter Terrace and Roger McGuire Green will be rented as one area. Once the pavilion is complete, the rental fee for the areas will be reassessed. We don't want to encourage event organizers to use just one of those spaces until the construction is completed in the middle section.

Councilman Miller agreed with Councilman Russell in that there should be some flexibility on the east corner of Pack Square.

In response to Councilman Miller, Ms. Ruggiero noted that a lot of the Pack Square area is sidewalk and currently we do not allow event organizers to block sidewalk access. In looking at the Pack Square as a whole, staff looked at what is the available usage space within that area.

In response to Councilman Miller, Ms. Ruggiero explained how costs for events that have been relocated to Dr. Martin Luther King Jr. Park are comparable to the events at the Reuter Terrace and Roger McGuire Green.

In response to Vice-Mayor Davis, Ms. Ruggiero said that they did not solicit comments from the Asheville Downtown Association because they hold co-sponsored events and their fees are waived through the co-sponsored event process. However, when the spaces are all opened, they will meet with all event organizers and solicit their feedback.

Councilman Mumpower suggested that after a period of time staff report back to Council with specific figures as to the actual recovery costs. Even though City taxpayers haven't invested much in the Park (other than infrastructure which would have had to be replaced), the City has agreed to take over maintenance of that Park, which will be a substantial cost to the community.

Councilman Russell supported letting the event organizers actually see the available spaces in the Pack Square area, but he does believe there should be some flexibility.

In response to Councilman Mumpower, Ms. Ruggiero said that once they get some feedback from all the event organizers as to what type of usage and the demand for that space, it will give staff a better idea of how they need to look at the space.

Councilman Mumpower wondered if Council should ask staff to come back with a specific proposal for sub-space rental or should Council build something into the language of the proposal that gives staff the flexibility to adjust for sub-space rental until staff can bring back a specific proposal. Ms. Ruggiero said that she could bring back a specific proposal on sub-space rental if that is Council's wish.

In response to a co-owner of Windows on the Park, Ms. Ruggiero explained that currently in our parks that have underground irrigation systems, we do not allow tents to be staked into the ground because there is the risk of puncturing the underground irrigation system. We ask that event organizers use weighted buckets to hold down their tents. Regarding pavers, they are not looking at permitting tents in the hardscape area due to the risk of damaging the public art.

Mayor Bellamy supported three separate rental fees – Pack Square, Reuter Terrace and Roger McGuire Green. She also supported waiving the veteran's memorial dedication ceremony fee.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Russell moved to adopt the proposed permitting fees, subject to (1) after completion of the pavilion, there be three separate rental fees (Pack Square, Reuter Terrace and

Roger McGuire Green); (2) staff bringing back a specific proposal on sub-space rental of the Pack Square area, with flexibility given to the rate structure; (3) waive the fee for the veterans' memorial dedication; and (4) staff report back to Council in 12-month for a review of the proposed rate structure. This motion was seconded by Councilman Mumpower and carried unanimously.

RESOLUTION BOOK NO. 32 – PAGE 16

At 8:00 p.m., Mayor Bellamy announced a 20-minute recess.

B. BUDGET PLANNING

ORDINANCE NO. 3721 - ORDINANCE ADOPTING FISCAL YEAR 2009-10 FEES AND CHARGES, EFFECTIVE JULY 1, 2009

Chief Financial Officer Ben Durant said that the purpose of this staff report is to provide an update on the status of Fiscal Year (FY) 2009-10 Budget Process, including the budget balancing strategies that were discussed at the March 27 Finance Committee meeting. Staff is also requesting that Council take action at this meeting on the FY 2009-10 proposed fee adjustments.

Fees & Charges

The proposed FY 2009-10 fee adjustments have been reviewed by the Council Finance Committee, and their recommendations for fee adjustments have been provided to Council. If the full Council approves the Finance Committee's fee recommendations tonight, it will add an additional $700,000 in revenue to the FY 2009-10 General Fund budget. In addition to the General Fund fee adjustments, the Committee also endorsed staff's recommendation for a 4% increase in the regular water rate and the water capital improvement fee, along with some other minor fee adjustments in the other Enterprise Funds. Staff is requesting that Council take action tonight on the fee recommendations so that the additional revenue from the fee adjustments can be included in the Manager's Proposed Budget, which is scheduled for presentation to Council on 5-12-09.

Budget Update

At the March 24th Council meeting, staff presented an update on the status of the FY 2009-10 budget which showed a remaining General Fund budget gap of approximately $800,000.

The following table summarizes the steps in the budget process that brought us from the initial fall General Fund budget forecast, which projected a $5.0 million deficit, to the March 24th report which showed a remaining budget gap of $800,000.

Initial Forecasted Gap	($5,000,000)
Eliminate Merit Pay (Salary Freeze)	$750,000
Annexation Gain	$325,000
Reduce Housing Trust Fund Transfer	$300,000
Re-Engineering/Mgmt. Streamlining	$1,000,000
Reduce Transit Fund Transfer	$500,000
Increase Cost Recovery from Fees	$700,000
Reduce Fund Balance from 19% to 18%	$1,000,000
Additional Cost Savings Opportunities	$500,000
Increased Utility & County Partnership Expenses	($325,000)
Reduction in Sales Tax Revenue Estimates	($300,000)

Add in Council Strategic Priorities	($250,000)
March 24 Budget Gap	($800,000)

At the March 27th Finance Committee meeting, staff presented to the Committee a set of specific strategies to address this remaining budget gap of $800,000. Those strategies were:

1. Apply Police Byrne Grant to Municipal Building security	$150,000
2. Drawdown available transit funding in current year	$500,000
3. Reduce General Fund overtime	$150,000

The Committee endorsed staff's recommended strategies, and staff is prepared to answer any questions that the full Council may have regarding these strategies.

Staff also indicated to the Committee that work was still being done to finalize the $500,000 in additional cost savings opportunities which was included as a placeholder in our initial budget balancing plan. Since the March 27th Finance Committee meeting, staff has completed a package of recommendations that will achieve this additional $500,000 needed to balance the budget. Recommendations include:

1. Eliminate General Fund subsidy to the Golf Fund	$150,000
2. Reduce brush collection to once per month	$140,000
3. Discontinue Civic Center skating and hockey	$ 50,000
4. Reduce budget for building security enhancement	$100,000
5. Apply Energy Block Grant to administration	$ 60,000

If revenues decline further, options include (1) additional service reductions; (2) additional fund balance appropriation; and (3) reduce deferred compensation.

Staff recommends that Council adopt the Finance Committee recommendations regarding fees & charges and provide additional direction regarding the remaining budget.

Throughout discussion, Mr. Durant responded to various questions/comments from Council, some being, but are not limited to: explanation of the fee cost recovery; and was there any discussion about (1) reducing Council's or management staff's salaries, (2) re-thinking some of Council's decisions, such as the performing arts venue on Depot Street; or (3) outside agency funding reductions; does staff feel that the revenue picture is likely to improve.

Councilman Mumpower felt that if Council approves the Finance Committee's recommendations regarding fees and charges, it would represent a tax increase. He suggested we resist the temptation of reaching into our Fund Balance.

In response to Councilman Newman, Public Works Director Mark Combs pointed out an error in the full cost recovery for recycling charges – it should be $2.63/household/month. When Councilman Newman asked what the logic is behind charging for one solid waste service and not another, Mr. Combs said that we City of Asheville performs sanitation services in-house and we contract out the recycling service to a third party. Councilman Newman hoped that Council would not increase the recycling fee in that it's like a property tax since it only affects families who live in the City. He supported either not increasing the recycling fee or set it as a long term goal to not charge for this type of service, especially since recycling is viewed as a basic service people expect to receive.

Vice-Mayor Davis said that the Civic Center Commission did confirm the discontinuance of skating and hockey at the Civic Center. He explained how there are greater costs associated with skating, especially the outdated equipment. Regarding the water rate increase, the City's

consultants advised Council a few years ago that had the City incrementally raised water rates, we wouldn't have had such a difficult time in repairing the water system. Therefore, he supported moving forward with implementing that increase.

Councilwoman Cape recalled Council giving direction not to reduce the Housing Trust Fund. Mr. Durant said staff's initial recommendation was to transfer the entire $600,000 of Housing Trust Fund monies. He felt the subsequent direction from Council was to cut it in half and not eliminate the entire transfer. Councilwoman Cape was not in support of reducing the Housing Trust Fund.

After Mayor Bellamy asked for public comment, but received none, she said that members of Council have been furnished with a copy of the ordinance and it would not be read.

Councilman Russell moved to (1) approve the General Fund fees and charges recommended by the Finance Committee; (2) approve the 4% increase in the regular water rate and the water capital improvement fee, along with some other minor fee adjustments in the other Enterprise Funds; (3) direct staff to continue with the strategies proposed; and (4) set as a long-term goal to not charge for recycling services. This motion was seconded by Councilman Miller.

Councilwoman Cape agreed with Councilman Newman that the City needs to look how we handle trash and solid waste and make a concerted effort to see what is the best way to encourage the proper disposal of solid waste. She felt that raising the recycling fee is the necessary thing to do, and for us to afford recycling pick-up at all, we need to have full cost recovery on it. She asked if the General Fund fees and charges could be voted on separately from the water rate increase.

Mayor Bellamy explained the discrepancy between the consultants recommended 3% incremental water rate increase vs. the 4% incremental water rate increase in the water bond documents. She also asked if the General Fund fees and charges could be voted on separately from the water rate increase.

Councilman Russell moved to amend his motion to (1) approve the General Fund fees and charges recommended by the Finance Committee; (2) direct staff to continue with the strategies proposed; and (3) set as a long-term goal to not charge for recycling services. This motion was seconded by Councilman Miller and carried on a 5-2 vote, with Mayor Bellamy and Councilman Mumpower voting "no"

Councilman Russell moved to approve the 4% increase in the regular water rate and the water capital improvement fee, along with some other minor fee adjustments in the other Enterprise Funds. This motion was seconded by Councilman Miller and carried on a 6-1 vote, with Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 25 - PAGE 228

C. LEGISLATIVE UPDATE

ORDINANCE NO. 3728 - ORDINANCE AMENDING ORDINANCE NO. 3719 REGARDING TRESPASS TOWING FROM PRIVATE PARKING LOTS TO CLARIFY THE EFFECTIVE DATE OF ON OR AFTER JUNE 1, 2009

City Attorney Oast said that this is the consideration of an ordinance amending Ordinance No. 3719 adopted on March 24, 2009, regarding trespass towing from private parking lots to clarify the effective date of on or after June 1, 2009.

Mayor Bellamy said that members of Council have previously been furnished with a copy of the ordinance and it would not be read.

After Mayor Bellamy asked for public comment, and none was received, Councilman Russell moved for the adoption of Ordinance No. 3728. This motion was seconded by Councilman Mumpower and carried unanimously.

ORDINANCE BOOK NO. 25 – PAGE 249

City Attorney Oast said that this is an update on legislation of interest to the City of Asheville from the 2009 N.C. General Assembly

The 2009 North Carolina General Assembly convened on January 9 for its "long" session. The deadlines for filing local bills were March 11 (Senate) and April 1 (House). The deadlines for filing Public (non-local) bills was March 25 (Senate) and April 8 (House). The deadline for filing bills related to appropriations and finance is May 6 for the House. The "crossover" deadline, the day by which bills must pass out of one chamber or the other in order to remain eligible for consideration in this session is May 14.

The City requested introduction of some local acts, and we have been following other general legislation. This report will cover the status of our local legislative requests, and summarize other legislation of interest.

A. Local Legislation

1. Non-consensual towing (HB 500). At the City's request, a bill regarding regulation of non-consensual towing in Asheville was introduced in the House by Representatives Goforth, Fisher and Whilden. This was requested in case it was needed to bolster our local efforts to deal with this issue. Since Council adopted the non-consensual towing ordinance on March 24, I have requested that our delegation not pursue adoption of this bill, or the bill introduced by Senator Nesbitt (SB 551) to cap the rate for non-consensual towing at $75.00. Raleigh and Wilmington have similar ordinances, and it appears that the federal law specifically permitting local regulation, together with the general police power, is sufficient.

2 Force Account Suspension (HB 747). This is the bill that will allow us to work with Buncombe County to complete the street paving and other work around the new jail with City work forces. Initially, some local contractors objected to this bill, seeing it as the "foot in the door" for further similar requests. Once the unique features of this project were explained, and that we did not plan to seek other similar local bills in this legislative session, the opposition was withdrawn and to Council for revision. This bill passed the House on first reading and has been re-referred to a committee

3. Property disposition (HB 502). This is the bill that would clarify our ability to place conditions on the sale of real property. This bill has encountered no trouble, and has passed the House.

4. Sullivan Act revisions (SB 552). This would allow the City to use up to 5% of water system revenues to make repairs/do construction on non-water infrastructure, in connection with water system work. Council requested other revisions as well, particularly with regard to making water service available in connection with voluntary annexation, but these were not included in the bill. Members of the local delegation have been advised that the City will continue to press for revisions to the Sullivan Acts. However, especially in view of Statewide efforts to limit annexation (see below – Rep. Goforth is study commission co-

chair), the bill in its current form is likely all that we can reasonably expect to get in the 2009 session. This bill was introduced in March.

5. Assessments for Energy Improvements (HB 1015). A bill has been introduced this week that would authorize the City to implement a program that would allow for the financing of energy conservation improvements made by homeowners to be financed through an assessment process. This would apply to such things as facilities for the generation of solar power, but is not limited to solar power. In essence, the City would pay for the equipment to be installed, and the cost of this work would be collected over time (10 years, usually) by the City in annual assessments. Water and sewer improvements are frequently financed in this way, and there is already a statutory framework. As drafted, this bill applies only to the City of Asheville, but could attract attention from other localities.

6. Civil Service (SB 556). A bill has been introduced a bill to revise the Asheville Civil Service law. Among other things, the bill would restrict the ability of former employees to serve on the Civil Service Board (CSB), would require that the CSB meet monthly, and would require that the City provide whatever administrative support the CSB needs, including legal assistance, at City expense. The bill contains a number of other provisions that go to details of process and that appear to be redundant or duplicative of State law, such as a requirement to observe the Open Meetings law.

   Many of these revisions have been proposed previously, and they were covered in a presentation made to the Council at a work session in October of 2008. Council has established a commission made up from various segments of the business community to review the current Civil Service law and recommend any changes, including whether the law continues to meets its objectives. This study commission has been meeting and gathering information, and will have some recommendations soon. The commission members are aware that a bill has been introduced.

   As a staff, we are formulating responses and recommendations on SB 556, and our timetable is necessarily driven by the legislative calendar. We will make the local delegation aware that the work of the study commission is progressing and, at Council's direction, will pass the commission's recommendations along to members of the local delegation.

B. GENERAL LEGISLATION. As of the date of this report, well over 2000 bills have been introduced, and there is one day left before the deadline for introduction of "public" or general bills passes. This is a lot to review and keep up with. As you might surmise, much attention in the legislature has been devoted to the current economic situation, governmental responses to it, and how to handle the federal stimulus initiatives. The State's budget has also taken up considerable attention. There have been certain areas of particular interest to municipalities – including Asheville – when there has been considerable activity.

1. Annexation. As you may know, municipal annexation has been the subject of a legislative study over the past year. Rep. Bruce Goforth co-chaired the legislative study commission. A conservative estimate is that over 20 bills have been introduced, not limited to specific cities, that would affect the ability of municipalities to engage in involuntary annexation. Other bills affect particular entities. The proposals include annexation moratoria, a requirement for a vote by property owners in the areas proposed for annexation, stricter qualifications for annexation, and increased requirements for provision of municipal services.

Of particular note, a bill that has been endorsed by the League of Municipalities (and was prepared with the League's assistance) has been introduced that is a measured response to many of the issues that have been raised. Because Asheville has been involved in some contested annexations, our input and comment was solicited (along with other municipalities) by the League.

He provided Council with an excerpt from correspondence from the League of Municipalities, summarizing the recommendations of the legislative study commission. He also provided Council with a copy of information from the League identifying particular issues, and the League's proposed response to it.

2. Immigration. There have been several bills introduced that deal with immigration in some substantive way. Most of them focus on the public contracting and work status verifications, and would require the use of some mechanism – like e-verify – as a condition of the award of public construction projects. Not surprisingly, many of these bills are also connected with the use of federal stimulus money. Of particular note is the proposed "North Carolina Illegal Immigration Reform Act" (SB 337), which appears to address the issue in a comprehensive way, requiring verification of work authorization of all local government employees, and to require public contractors to use federal work authorization verification program (which would include e-verify).

   A recent presentation at the UNC School of Government indicates that this particular area of the law – local regulation of immigration, including requiring e-verify as a condition of public contracts – is anything but settled. While it is clear that federal immigration law preempts State and local regulation in this area, the degree of this pre-emption is somewhat unresolved. However, with all of the public and governmental interest in illegal immigration, work eligibility for public projects, and the level of legislative activity, it seems probable that something will be done at the State level this year on this issue, and that the ability of local governments to regulate in this area will be affected and clarified.

3. Road maintenance issues.

   a. Bills have been introduced in both chambers (HB881 / SB 1001) under the somewhat innocuous name of "Transportation Corridor Mapping Changes." These bills are being advanced by the State Department of Transportation. If adopted, these measures would (1) allow the State to delay distribution of Powell Bill funds, (2) would make Powell Bill distributions discretionary rather than mandatory, and (3) would add approximately 22,000 miles of roads to local maintenance responsibility without increasing the amount of the distribution (an unfunded mandate).

   b. Secondary road maintenance. A bill has been introduced in the Senate (SB 758) that would, if adopted, transfer the maintenance responsibility for secondary roads to counties. The concerns with this bill are (1) that it would be a partially funded mandate, and (2) that it would leave road maintenance decisions up to the counties, with some potential for inconsistency. Interestingly, when the State took over maintenance of the secondary road system from the counties in the 1930's, one of the reasons was to address issues of inconsistent and inadequate maintenance. He provided Council with a memorandum to the N. C. Metro Mayors Coalition that provides some more detail on these bills, and a letter from the Coalition chair to the Speaker of the House.

He also provided the following information to Council from Public Works Director Mark Combs. Street maintenance means overlays (resurfacing) (a) potholes, reconstruction of sub-surface; signals; signs and markings; storm drain systems/erosion control; sidewalks; mowing and landscaping; tree maintenance; street lighting; litter administration; conduits; easements, encroachments; force majeure events; bridge maintenance; and conduit/utilities oversight.

Regarding Powell Bill funding, the state provides each year "...for the purpose of maintaining, repairing, constructing or widening of any street or public thoroughfare including bridges, drainage, curb and gutter..." (N.C. Gen. Stat. sec. 136-41.2). Regarding funding (a) 1 ¾ cents per gallon motor fuel tax; (b) disbursement is 75% based on population and 25% based on street mileage; (c) Powell Bill is dependent upon fuel taxes – more streets = dilution of the Fund; and (d) increases in City-maintained mileage is incrementally small (because 75% of disbursement is based on population).

Regarding Senate Bill 1001 and House Bill 881, there are 400 miles City-maintained streets and 147 miles maintained by NCDOT for a total of 547 miles of City or NCDOT maintained streets. The following is a NCDOT breakdown of streets in Asheville (a) 32 miles are "limited access" road ways (I-240, I-26, 19-23); (b) 40.5 miles are U.S. Highways"; (c) 12 miles are "N.C. Highways"; and (d) 62 miles are "State Roads" and "other". The City likely to get 50-60 miles of roads.

Asheville spends $17,100 per linear mile per year on streets. Asheville received $5,964 per linear mile in Powell Bill funding.

If the City is forced to maintain 55 miles of streets:
- Cost ($17,100 per L/mi.) = 55 x $17,100/mi = $940,500
- Powell Bill reimbursement (est.) = 55 x $5900/mi = $324,500

FINANCIAL IMPACT TO ASHEVILLE = $616,000

Regarding the potential impact to Asheville Citizens, 66% of maintenance costs will shift to Asheville tax payers.

4. Miscellaneous issues. There have been bills introduced that address several issues of interest to municipalities, some of which are of particular interest to Asheville or Western North Carolina.

   a. Fuel supply / emergencies. Some bills have been introduced in apparent response to the fuel shortage situation that affected parts of the country in the fall of 2008, following the hurricanes that closed down some Gulf Coast oil refineries. WNC was particularly affected. Some of these are study bills.

   b. Several bills have been introduced that would encourage the use of energy efficiency measures; some are local bills, and some are general law bills. These include relaxing restrictions on the placement of equipment, and providing incentives for incorporating efficiency measures into building projects.

   c. A bill has been introduced that would extend times for the validity of certain land use approvals. This is similar to what Asheville has already done on the local level.

d. Several bills have been introduced that address ethics for governmental officials. These include proposals to the State ethics rules applicable to local government, and to broaden the circumstances under which a local governing board member should be recused from a vote.

He said that copies of these bills, and other information where available, can be provided.

This report is primarily for information purposes. If Council directs, resolutions or letters can be prepared, or more information obtained.

Councilman Newman said that he shared with City Council earlier this year a proposal for revisions to the Sullivan Acts that would allow Asheville to use water resource funds to improve public infrastructure directly related to water line construction projects and allow Asheville to grow through the process of Voluntary Annexation.

At this time, Councilman Mumpower raised a point of order. Mayor Bellamy said that Councilman Newman has the floor and is in the middle of a statement. Once Councilman Newman puts the question on the floor, it would be the appropriate time for Councilman Mumpower to raise a point of order.

When Councilman Mumpower continued to raise a point of order, City Attorney Oast said that the Mayor is the presiding officer and as she pointed out, Councilman Newman is in the middle of a statement. He felt the appropriate time to address a concern is after Councilman Newman puts the question on the floor.

Councilman Newman continued in that he requested Council to affirm the proposal to settle the Sullivan Act dispute. As indicated in the legislative information prepared by City Attorney Oast, there has been a bill introduced by our legislators that addresses the infrastructure funding but not the Voluntary Annexation policy. He e-mailed to Council this morning the proposal.

He believes that Asheville's inability to grow through Voluntary Annexation is one of the single greatest threats to the economic health and viability of Asheville, in the near term and especially over the long term. The lessons of history are clear on this point. Cities that cannot grow die. And if the only way that Asheville can grow is through the poisonous and litigious process of Involuntary Annexation, we will never be able to grow in a manner that is healthy for our community or the region.

After Council's previous discussion and approval of the below proposal, he and Vice-Mayor Davis and Mayor Bellamy met with Senator Nesbitt and Representatives Goforth and Whilden. There was agreement on most of the items included in the proposal. The major substantive difference of opinion was on the issue of whether there should be a strict prohibition on Voluntarily Annexation of new developments that are non-contiguous with the city limits.

The proposal below is identical to the one approved by Council earlier this year, except for the two underlined sections. One change clarifies the size criteria for new developments that will require a Voluntary Annexation Agreement -- 16 residential units or 10,000 sq. feet of commercial facilities. The other change addresses the issue of non-contiguous properties.

Proposal to settle the Sullivan Act dispute:

Proposal:

- City of Asheville agrees there will be no differential rates charged for water customers inside and outside the city limits.
- The Sullivan Acts will be modified to allow Asheville to operate under the Voluntary Annexation policies that apply to all other cities in North Carolina. Asheville is open to policies to assure Voluntary annexation will not be abused. Potential policies could include:
    - No more than 5% of the city properties could be non-contiguous with the primary city limits unless specifically authorized by state legislation (such as the airport property). Existing state law allows cities to have up to 10% non-contiguous.
    - No properties could be Voluntarily Annexed into the city unless they are within one-half mile of the city limits. However, Asheville could still require other developments that more than a half mile from the city limits to sign an Voluntary Annexation agreement with the city if they wish to connect to city water lines, so that the city can bring them in to the city once the city has grown outwards to the point that the development is within one-half mile of the city.
    - Developments of less than 16 residential units or 10,000 square feet of commercial space would not be required to enter into a Voluntary Annexation Agreement with Asheville in order to access municipal water services.
    - No existing customers of the water system could be required to sign an annexation agreement as a condition of continuing to receive water service. The policy would apply only to new developments.
    - New developments that are located closer to another incorporated town or city than Asheville could not be required to sign a Voluntary Annexation Agreement with Asheville unless there is a "sphere of influence" agreement between Asheville and the other town or city.
- Members of the legislative delegation have indicated they may be unwilling to allow Asheville to Voluntarily Annex any properties that are not physically contiguous with the city limits. There are significant new developments being constructed very close to the city limits that should be incorporated into the city but which, due to topography or the presence of other unbuildable lands, are not contiguous with the city limits. While the City Council is open to policies that strictly limit annexations that are non-contiguous, an outright prohibition is poor public policy and Council does not support it. However, it would be even more disappointing to not include any Voluntary Annexation policy in the revisions to the Sullivan Act because there is a difference of opinion about this specific point.
- Asheville will not be allowed to divert Water Funds to the General Fund. However, up to 5% of Water Funds may be used for infrastructure improvement projects directly related to water line replacement (such as improving streets or sidewalks torn up during the line replacement process).
- City and County continue discussions about opportunities to work together to be partners on infrastructure and facilities that serve the larger region. The previous water agreement included the following City/ County Partnerships:
    - County reimbursed Asheville about $1.7 million annually for law enforcement services provided outside the city limits that are not provided in the city.
    - The County was financially responsible for the Nature Center, McCormick Field and the golf course.

The Sullivan Acts II and III. In 2004, the City Council decided to dissolve the Water Agreement that had governed management of the system since the early 1980s. In response, members of the legislative delegation passed Sullivan Acts II and III.

Sullivan Act II prohibits the city from charging differential water rates.

Sullivan Act III prohibits the city from using Water Funds for any purposes unrelated to management of the water system and prohibits Asheville from using Voluntary Annexation of new developments that wish to access City water services.

Benefits of the proposed settlement: The proposed settlement represents a compromise. Neither party gets everything they wish. However, it does address the core concerns identified by the City, County and legislators over the past several years.

Benefits of the settlement to Asheville:

- The water system will be managed by the City, which has demonstrated good stewardship of the system over the past several years, investing tens of millions in long overdue water infrastructure repairs.
- Voluntary Annexation will allow the city's tax base to grow as the area urbanizes.
- The city will have additional funds to upgrade streets and sidewalks as part of the process for replacing old water lines.

Benefits of the settlement to non-city residents:

- Assurance that water rates will be no higher for non-city customers than for those who live in Asheville.
- Assurance that for all existing customers, water cannot be used as a condition for annexation into the city.
- Assurance that payments made for water services cannot be diverted to the City's General Fund.

Benefits to the water system:

- Assurance that the infrastructure will be fixed as funds cannot be diverted to non-water system programs.

Councilman Mumpower felt it was extremely inappropriate to offer a last-minute proposal outside the established Council agenda. He also suggested that it was inappropriate for Council to discuss what amounts to a $1 Billion surrender plan without ample notice to the public and some opportunity to discuss alternatives. He challenged the Council's actions if this item moves forward and suggests that it was an intentional effort to conceal giving up full control of a $1 Billion City asset in the dark.

Councilman Newman responded that on this agenda (which is publicly advertised) is a legislative update. Changes to the Sullivan Act is already a part of this established agenda. As this was a complicated set of issues, he felt it was important to put some specific language on paper which was shared with members of the public and staff prior to this meeting. He felt Council is addressing an item which is part of the agenda.

Councilman Mumpower felt Councilman Newman was manipulating the public in that he felt the issue is hidden under the legislative update. There is no identifiable reference of the issue of our water system. He has no concern about Councilman Newman offering a proposal, but has problems with the timing. If there had been an interest in discussing proposals tonight, he would have added his own proposals.

Mayor Bellamy said that she has received Councilman Mumpower's agenda request for time to discuss other options regarding our water system and it will be scheduled as we do other agenda requests.

In response to Councilman Mumpower about the concerns raised earlier and about the addition of last minute documents outside of the Council agenda, City Attorney Oast said that because this is a regular meeting of Council, it's possible for things to be added to the agenda, just as he added the amendment to the non-consensual towing ordinance. It appears to what is being asked by Councilman Newman is to re-affirm a position that has already been taken, with some refinements.

When Councilman Mumpower asked if there was anything else he could do to intercept what he believes is inappropriate, City Attorney Oast said that he is not aware of anything other than to note the concerns raised.

At 9:28 p.m., Councilman Mumpower said that he personally was not willing to conduct the City's business in this manner and left the meeting unexcused.

Mayor Bellamy said that Council will continue with the business they were elected to do.

Vice-Mayor Davis felt it was appropriate to amend the language presented to our state legislators earlier. He didn't feel we are surrendering our $1 Billion City asset as we still have ownership and control of that system, although we can't use it to the degree that other municipalities can.

Councilman Miller felt that Council gave clear direction to Mayor Bellamy, Vice-Mayor Davis and Councilman Newman to meet with our local delegation on water issues. He felt it was incumbent upon Council to have dialogue with our legislators and continue to press these issues.

Mayor Bellamy said that since the City has lost the Sullivan Act lawsuits, we believe that it's important that we work with our state legislators on the larger issue of using our water system to the best degree that we can. We have put major emphasis on fixing our water system and are letting our legislators know of that priority. We are asking them to consider how Asheville can grow as a community. Councilman Newman is asking for a reaffirmation of our commitment that we, as a City, feel this is important for us to move forward.

Councilman Newman noted that his proposal was e-mailed out to members of the media at the same time it was e-mailed out to City Council.

Councilman Newman moved to communicate to our legislative delegation our prospective on the revisions to the Sullivan Act consistent with the language in the proposal outlined above. This motion was seconded by Councilwoman Cape and carried on a 6-1 vote, with Councilman Russell voting "no."

VI. NEW BUSINESS:

A. ORDINANCE NO. 3722 - BUDGET AMENDMENT FOR REIMBURSEMENT FOR OVERTIME EXPENSES RELATED TO ORGANIZED CRIME DRUG ENFORCEMENT TASK FORCE PARTICIPATION

Summary: This is the consideration of a budget amendment, in the amount of $19,000, for reimbursement for overtime expenses related to Organized Crime Drug Enforcement Task Force (OCDETF) participation.

The Asheville Police Department is an active member of the Drug Enforcement Administration (DEA) Task Force. As part of the agreement in joining, officers are authorized to work overtime which will be reimbursed by the Federal Government. The funds received vary depending upon the length and involvement in operations. In order to continue Asheville Police Department (APD) participation and long term involvement with operations, it is imperative that we continue to receive such overtime reimbursement. Based on the current operation APD has been allocated $19,000 by the US Department of Justice (DOJ) to apply toward OCDETF overtime expenses.

This action complies with the City Council Strategic Operating Plan in Fiscal Responsibility in that we are using Federal Funds to reimburse for overtime that would otherwise come from APD's Operating Budget and, 2) Safe City in that participating in the DEA Task Force

we are able to conduct long term operations that remove drug suppliers from our community, thus making Asheville a safer and more desirable community to live.

Pros:

- Provides a non-City revenue source to cover Police Department overtime expenses incurred during participation in the Drug Enforcement Administration (DEA) Task Force.

Con:

- None noted

As noted above, this grant provides a non-City funding source for a portion of APD's General Fund overtime expenses.

City staff recommends City Council adopt a budget amendment, in the amount of $19,000, to accept the US DOJ funds to offset overtime expenses for APD officers involved in OCDETF operations.

When Mayor Bellamy asked for public comments, none were received.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the ordinance and it would not be read.

Councilman Miller moved for the adoption of Ordinance No. 3722. This motion was seconded by Councilwoman Cape and carried unanimously.

ORDINANCE BOOK NO. 25 – PAGE 237

B. ORDINANCE NO. 3723 - BUDGET AMENDMENT FROM THE FRIENDS OF THE NATURE CENTER TO SUPPORT PROGRAMS AND IMPROVEMENTS AT THE NATURE CENTER

ORDINANCE NO. 3724 - BUDGET AMENDMENT FROM THE URBAN TRAIL COMMITTEE TO SUPPORT MAINTENANCE AND IMPROVEMENTS TO THE URBAN TRAIL

ORDINANCE NO. 3725 - BUDGET AMENDMENT FROM FUNDRAISING ACTIVITIES TO SUPPORT THE PUBLIC ART PROGRAM

ORDINANCE NO. 3726 - BUDGET AMENDMENT FROM THE ASHEVILLE PARKS & GREENWAYS FOUNDATION TO SUPPORT THE CULTURAL ARTS PROGRAM

ORDINANCE NO. 3727 - BUDGET AMENDMENT FROM THE ASHEVILLE PARKS & GREENWAYS FOUNDATION TO SUPPORT RECREATION PROGRAMS AND SPECIAL PROJECTS

Summary: This is the consideration of various budget amendments for contributions to support programming and special projects as outlined below.

The City of Asheville in the Parks, Recreation & Cultural Arts Department has received contributions to support programming and special projects within the department operations. Description of each is listed below.

- $7,500 from the Friends of the Nature Center to increase the budget to support programs and improvements at the Nature Center. The Friends of the Nature Center is a 501 (c) 3

non-profit organization whose purpose is to act as an advocate for and to raise funds to support the programs and enhancements at the Nature Center.

- $3,806 from the Urban Trail Committee to increase the budget to support maintenance and improvements to the Urban Trail. The Urban Trail Committee is a sub-committee of the Public Art Board.

- $4,363 from the fundraising activities to increase the budget to support the Public Art Program.

- $2,000 from the Asheville Parks and Greenways Foundation to increase the budget to support the Cultural Arts Program. The Asheville Parks and Greenways Foundation is a 501 (c) 3 non-profit organization whose purpose is to act as an advocate and to raise funds to support programs and enhancements in parks, greenways and recreation programs within the City of Asheville Parks, Recreation & Cultural Arts Department.

- $33,152 from the Asheville Parks and Greenways Foundation to establish a budget to support recreation programming and special projects.

This action complies with the Parks, Recreation, Cultural Arts & Greenway Master Plan in that it makes use of diverse funding sources for successful implementation in the delivery of parks, recreation and cultural art services.

Pros:
- Provide funds to support parks, recreation and cultural arts programming enhancements

Con:
- None

The fiscal impact for these actions will Increase the City's Fiscal Year 2008/09 capital improvement budget by $8,169, and special projects budget by $42,652.

Staff recommends City Council to adopt budget amendments authorizing the City Manager to increase the budgets for 1) Nature Center by $7,500, 2) Urban Trail by $3,806, 3) Public Art Program by $4,363, 4) Cultural Arts Program by $2,000; and to establish a budget for recreation programs and special projects by $33,152.

When Mayor Bellamy asked for public comments, none were received.

Mayor Bellamy said that members of Council have been previously furnished with copies of the ordinances and they would not be read.

Councilman Miller moved for the adoption of Ordinance No. 3723. This motion was seconded by Councilwoman Cape and carried unanimously.

ORDINANCE BOOK NO. 25 – PAGE 247

C. RESOLUTION AUTHORIZING THE CITY TO EXERCISE EMINENT DOMAIN TO CONDEMN AND ACQUIRE PROPERTY FOR THE WESTON ROAD WATER BOND PROJECT

At staff's request, this item was pulled from the agenda for consideration.

D. RESOLUTION NO. 09-70 – RESOLUTION AUTHORIZING THE CITY MANAGER TO MAKE PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE ASHEVILLE EARTH DAY EVENT

Summary: This is the consideration of a resolution authorizing the City Manager to make provision for the possession and consumption of malt beverages and/or unfortified wine at the Asheville Earth Day event on April 18, 2009.

Lake Eden Arts Festival has requested through the Asheville Parks, Recreation and Cultural Arts Department that City Council permit them to serve beer and/or unfortified wine at the Asheville Earth day event coordinated by Mountain Roots Management and allow for consumption at this event.

The Asheville Earth Day event will be held on Saturday, April 18, 2009 from 11:00 a.m. to 10:00 p.m. within the boundaries of Martin Luther King Jr. Park and will be free and open to the public.

Pro:

- Allows fundraising opportunity for Lake Eden Arts Festival

Con:

- Potential for public safety issues.

There is no fiscal impact for the City of Asheville.

Staff recommends City Council adopt a resolution authorizing the City Manager to make provision for the possession and consumption of malt beverages and/or unfortified wine at the Asheville Earth Day event located at Martin Luther King Jr. Park on April 18, 2009.

When Mayor Bellamy asked for public comments, none were received.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Newman moved for the adoption of Resolution No. 09-70. This motion was seconded by Councilwoman Cape and carried on a 6-1 vote, with Mayor Bellamy voting "no".

RESOLUTION BOOK NO. 32 – PAGE 18

E. RESOLUTION NO. 09-71 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION FOR REIMBURSEMENT OF FUNDS FOR SERVICE TO AND FROM BLACK MOUNTAIN

Summary: This is the consideration of a resolution authorizing the City Manager to enter into an agreement with the N. C. Dept. of Transportation (NC DOT) for the reimbursement of funds to be expended for service to Black Mountain.

The NC DOT has tendered a contract to the Asheville Transit System in which the NC DOT will contribute funds for bus service to Black Mountain. The Asheville Transit System will operate said service.

Asheville Transit System operates an intercity bus route between the City of Asheville and the Town of Black Mountain along US 70 with stops at the Asheville Mall, Veteran's Administration Hospital, and multiple residential areas. The service operates five times a day, six days a week. All financing will be provided by the State (maximum of $287,398), the Town of Black Mountain ($13,500), Mountain Mobility ($4,000), and Fare Box Revenue (approx. $20,000). The total budgeted cost for Fiscal Year 2009 is $324,898 which also covers the pass through funding to Mountain Mobility for the operation of their route in Black Mountain. These funds are currently programmed in the City budget, with no City funds being expended. Ridership on this route in Fiscal Year 2008 was 42,902, 18% more riders than the prior year.

NCDOT has notified the City that future funding for Intercity routes may be discontinued beginning next fiscal year if the routes do not follow definitions provided in FTA Circular 9040.1F which defines Intercity routes under section 5311(f).

Staff is working with the Institute of Transportation Research (ITRE), NCDOT and HDR, the Transit Master Plan consultants, to determine the changes needed to comply with the circular.

HDR has proposed under the master plan an express service that will connect Weaverville and Black Mountain with the Greyhound terminal, addressing the requirement for limited stops and meaningful connections with intercity service; staff is working on the details: final destinations, stops along the route, and scheduling; cost implications if the routes are extended to connect other urban areas and changes to the buses to accommodate luggage.

This proposal will be presented to NCDOT and ITRE consultants for consideration by the end of the month.

This action conforms with the (1) City Development Plan 2025: Goal VI: Develop a transit system that is capable of meeting the needs of all residents of and visitors to the region. Strategy 4: Expand inter-city service to Hendersonville, Black Mountain, Weaverville, Mars Hill, and Sylva; (2) City Council Strategic Operating Plan Section on Planning, Goal 2, Objective A, Creating a Multi-modal Transportation System, leveraging outside funding sources; and (3) City Council Strategic Operating Plan in the Green Focus Area to Establish a multi-modal transportation plan including sidewalks, bike paths, signal preemption, transit and other system improvements.

Pro:

- Increased mobility for the citizens of Asheville both within and outside the city at no additional cost to the City of Asheville.

Con:

- There are no disadvantages to the City of Asheville.

The City of Asheville will receive $324,898 for intercity route operations between Asheville and the Town of Black Mountain. These funds are currently programmed in the City budget, with no City funds being expended.

City staff recommends adoption of the resolution authorizing the City Manager to enter into an agreement with the N. C. Dept. of Transportation for the reimbursement of funds to be expended for service to Black Mountain.

Director of Transportation and Engineering Cathy Ball responded to a question raised by Councilwoman Cape.

When Mayor Bellamy asked for public comments, none were received.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilwoman Cape moved for the adoption of Resolution No. 09-71. This motion was seconded by Vice-Mayor Davis and carried unanimously.

RESOLUTION BOOK NO. 32 – PAGE 21

F. RESOLUTION NO. 09-72 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION FOR REIMBURSEMENT OF FUNDS FOR SERVICE TO AND FROM WEAVERVILLE

Summary: This is the consideration of a resolution authorizing the City Manager to enter into an agreement with the N. C. Dept. of Transportation (NC DOT) for the reimbursement of funds to be expended for service to Weaverville.

The NC DOT has tendered a contract to the Asheville Transit System in which the NC DOT will contribute funds for bus service to Weaverville. The Asheville Transit System operates said service.

Asheville Transit System operates an intercity bus route between the City of Asheville and the Town of Weaverville along US 25 Business with stops at UNCA, along Merrimon Avenue, in downtown Weaverville, at the Rose's Shopping Center, Arvarto, and other locations along the route. The service operates five times per day, six times per week. The State and the Town of Weaverville have funded the entire amount of the operating costs less fare box revenue. The total budgeted cost for Fiscal Year 2009 is $158,835. The State of NC is providing $143,335 for this Intercity Project. The Town of Weaverville has budgeted $10,000 to this route. The balance of $5,500 is expected from farebox revenues. There are no City funds in this operation, and the City is specifically exempted from funding any of these operations in the contract from the NC DOT for these routes. Ridership on this route in FY 2008 was 13,935, 5% less than last's year ridership (14,678).

NCDOT has notified the City that future funding for Intercity routes may be discontinued beginning next fiscal year if the routes do not follow definitions provided in FTA Circular 9040.1F which defines Intercity routes under section 5311(f).

Staff is working with the Institute of Transportation Research (ITRE), NCDOT and HDR, the Transit Master Plan consultants, to determine the changes needed to comply with the circular.

HDR has proposed under the master plan an express service that will connect Weaverville and Black Mountain with the Greyhound terminal, addressing the requirement for

limited stops and meaningful connections with intercity service; staff is working on the details: final destinations, stops along the route, and scheduling; cost implications if the routes are extended to connect other urban areas and changes to the buses to accommodate luggage.

This proposal will be presented to NCDOT and ITRE consultants for consideration by the end of the month.

This action conforms with the (1) City Development Plan 2025: Goal VI: Develop a transit system that is capable of meeting the needs of all residents of and visitors to the region. Strategy 4: Expand inter-city service to Hendersonville, Black Mountain, Weaverville, Mars Hill, and Sylva; (2) City Council Strategic Operating Plan Section on Planning, Goal 2, Objective A, Creating a Multi-modal Transportation System, leveraging outside funding sources, and Objective B, by creating a partnership between the state, the Town of Weaverville and the Asheville Transit System to mitigate congestion; and (3) City Council Strategic Operating Plan in the Green Focus Area to Establish a multi-modal transportation plan including sidewalks, bike paths, signal preemption, transit and other system improvements.

Pro:

- Increased mobility for the citizens of Asheville both within and outside the city at no additional cost to the City of Asheville.

Con:

- There are no disadvantages to the City of Asheville.

The City of Asheville will receive $158,835 for intercity route operations between Asheville and the Town of Weaverville. These funds are currently programmed in the City budget, with no City funds being expended.

City staff recommends adoption of the resolution authorizing the City Manager to enter into an agreement with the N. C. Dept. of Transportation for the reimbursement of funds to be expended for service to Weaverville.

When Mayor Bellamy asked for public comments, none were received.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilwoman Cape moved for the adoption of Resolution No. 09-72. This motion was seconded by Councilman Russell and carried unanimously.

RESOLUTION BOOK NO. 32 – PAGE 22

G. OAKLEY POLICE RESOURCE CENTER REPLACEMENT

RESOLUTION NO. 09-73 - RESOLUTION AUTHORIZING THE MAYOR TO ENTER INTO AN INTERLOCAL AGREEMENT WITH ASHEVILLE-BUNCOMBE TECHNICAL COMMUNITY COLLEGE FOR GREEN BUILT MODULAR HOME

RESOLUTION NO. 09-74 - RESOLUTION AUTHORIZING THE DEMOLITION OF CITY-OWNED PROPERTY LOCATED AT 711 FAIRVIEW ROAD

Assistant City Manager Jeff Richardson said that this is the consideration of a (1) resolution to authorize the Mayor to enter into an interlocal agreement with Asheville-Buncombe Technical Community College (AB Tech) to purchase a student built energy efficient modular

home replace a 100 year old Police Resource Center in the Oakley community; (2) resolution authorizing the demolition of City-owned property located at 711 Fairview Road.

Mr. Richardson was pleased to recognize two of our partners from AB Tech - Mr. C. Max Queen, Vice-President of Risk Management and Operations, and Mr. Vernon Daugherty, Dean of Engineering and Applied Technology.

Phase I analysis, for near term priority areas, showed significant constraints in the following facilities (1) City Hall (all floors) – impacts Customer Service Division, development services, internal support services; (2) Public Works Building (Department of Public Works and Building Safety) – impacts development services and Public Works administration operations; (3) Municipal Building (Police and Fire) – impacts downtown public safety operations; (4) Oakley Police Community Center – inadequate space with critical building code issues; (5) Parks Maintenance Facility (Aston area property) – inadequate space to maintain location and achieve redevelopment goals; and (6) Hunt Hill Purchasing Facility (McCormick Heights area) – inadequate space to maintain location and achieve redevelopment goals.

During the 2007 budget planning process, the City Council allocated a one-time infusion of $500,000 into the City's Capital Improvement Fund. Subsequently, through its master facility planning process, the City determined the Oakley Police Resource Center was a first priority of all existing City buildings as needing immediate restorative repair, as the house is structurally unsafe. This decision was made after the City contracted with a structural engineer to review the house, as well as requesting an internal Building Safety Department inspector walk-through. It was determined as result of these site assessments that the police resource center is in need of a minimum of $30,000 of immediate restorative maintenance in order to keep the house in usable condition. Additional significant investment was identified to modernize much of this house's outdated design features, which are not suited to accommodate the volume of police staffing traffic that occurs daily at this site.

The Oakley Police Community Center (1) is a 1910 residential structure with 1,200 usable square feet; (2) serves as northeast district office; (3) has 44 assigned sworn personnel; (4) has structural issues and space compatibility issues; and (5) has an estimated $30,000 for minimum restorative maintenance.

An interdepartmental project team reviewed this situation and unanimously recommended that the home be demolished and that the city pursue an energy efficient modular home replacement. The City contacted Max Queen, Vice President of Risk Management and Operations at AB Tech, to inquire about partnering to build a green modular home as a joint project, and learned that AB Tech had recently completed an energy efficient student-built modular home and was preparing to auction this home off in the near future.

Staff analysis of the replacement of the Oakley Police Community Center includes (1) $200,000 capital maintenance money available (Fiscal Year 2007); (2) modular energy efficient replacement pursued; and (3) AB Tech partnership opportunity (a) modular home available; (b) student constructed (2007-08); (c) built to NC Healthy Built standards; (d) 1,250 square feet / 1,250 unfinished basements; (e) AB Tech Carpentry Program willing to complete finish work on-site at materials-cost only (including exterior deck/porch roof); and (e) AB Tech Carpentry Program willing to finish basement at materials-cost only in future.

City staff has conferred with the Building Safety Department about the quality of this five star energy rated modular home. The Building Safety Department rates the building quality as outstanding. The Police Department staff toured the home and is impressed with the quality and features, stating that the home is perfect for their future needs.

As part of the demolition/site preparation process, the Asheville Fire & Rescue Department would like to conduct a live fire training using this structure. This will save the City

money disposing of debris from the site. In addition, staff is looking into salvaging usable items in the house before the live burn.

Interim planning steps include (1) quality inspection/review of home (building safety); (2) Police Department walk-through site review of home; (3) staff presentation to Council Public Safety Committee; (4) AB Tech staff discussion/Board of Trustees; and (5) Oakley neighborhood community meeting.

He then showed an artist's rendering of the house.

The City of Asheville and AB Tech held a community meeting on April 6 in the Oakley Community to discuss this project. One hundred letters were sent in advance of this meeting to alert homeowners of this proposed project. Twelve citizens attended this meeting, including the Oakley Neighborhood President. This project was endorsed by those citizens at this meeting.

Projected Budget:

Site Demolition Cost	$ 10,000
Home Purchase Cost	$110,000
Site Preparation/House Transport Cost	$ 57,000
Landscaping and paving/contingency	$ 15,000
Total	$192,000

This figure represents a 1,250 square foot finished home and also a 1,250 unfinished full basement.

This proposal was reviewed by the City Council Public Safety Committee on March 17, 2009, and they unanimously recommended that the project move forward for consideration.

This proposal aligns with many of the City's Strategic Plan goals to include: (1) Sustainable: (a) Expand partnerships with UNCA, AB Tech and other institutions to achieve goals in health and wellness, workforce development, and economic development, among others; (b) Develop a long-term plan to address the city's infrastructure including facilities; and (c) Supports the city council's desire to support the local economy through an effort to buy local; (2) Green: (a) Make environmentally efficient capital improvement decisions and support energy efficient funding for facilities and operations; and (3) Safe: (a) Prioritize public safety and infrastructure investments that support children's health and safety; and (b) Expand Community Policing Initiatives.

Pros:

- This project, if approved, aligns several key City Strategic Plan goals as noted above.
- This project is currently budgeted with earmarked capital money set aside in Fiscal Year 2007.
- The money paid to AB Tech will be used to fund future student built energy efficient modular home projects in this community.
- The design of this structure blends well ascetically with the characteristics of the Oakley community.
- Total square footage to include a full unfinished basement allows for necessary future growth needs in the Police Department.

Con:

- The APD North-East Patrol District will be required to temporarily be relocated to another site in the same vicinity during the timeframe that this project is completed. Estimated time to complete this project and open the new center is four months once underway.

Staff is recommending approval of the Intergovernmental Agreement with AB Tech, along with approval of demolition of the existing structure with the assistance of the Asheville Fire and Rescue Department.

Mr. Carlton Denning, Division Chief of the Safety and Training Division of the Asheville Fire Department, responded to Councilwoman Cape about the very strict federal, state and local guidelines that must be followed before a house is safe to burn. He also confirmed that a controlled burn is an excellent training for firefighters.

Mr. Queen explained how the carpentry in the modular home is exceptional and was pleased to partner with the City of Asheville.

Vice-Mayor Davis noted that this modular home is in keeping with the character of the Oakley community.

Mayor Bellamy said that members of Council have been previously furnished with copies of the resolutions and they would not be read.

Councilwoman Cape moved for the adoption of Resolution No. 09-73. This motion was seconded by Vice-Mayor Davis and carried unanimously.

RESOLUTION BOOK NO. 32 – PAGE 23

Vice-Mayor Davis moved for the adoption of Resolution No. 09-74. This motion was seconded by Councilman Russell and carried unanimously.

RESOLUTION BOOK NO. 32 – PAGE 24

H. RESOLUTION NO. 09-75 - RESOLUTION APPOINTING A MEMBER TO THE CIVIL SERVICE BOARD

Vice-Mayor Davis said that the term of Sharon West, as a member of the Civil Service Board, expired on May 21, 2008. Ms. West has agreed to remain on the Board until May 1, 2009.

At the March 10, 2009, meeting, it was the consensus of Council to interview Bridgette Odom, Davidson Jones and Beatrice Brown. On March 24, 2009, Ms. Odom and Ms. Brown were interviewed. Mr. Jones did not attend the interview.

Due to residency concerns, it was the recommendation of the Boards & Commissions Committee, and the consensus of City Council, that the appointment to Ms. West's seat be postponed and re-advertised.

In addition, the term of John Miall, as a member of the Civil Service Board, expires May 21, 2009. Since City Council has recently interviewed Mr. Miall and reappointed him as Chair to the Civil Service Board, it was the recommendation of the Boards & Commissions Committee, and the consensus of City Council, that Mr. Miall be reappointed to serve an additional two-year term, term to expire May 21, 2011, or until his successor has been appointed.

RESOLUTION BOOK NO. 32 – PAGE 25

I. BOARDS & COMMISSIONS

It was the consensus of Council to interview Mark Allison, Harry Weiss and Abigail Emison for a vacancy on the Downtown Commission.

It was the consensus of Council to interview Rachael Bliss, Milton Simpson, John Calligan and Matthew Howard for a vacancy on the URTV Inc. Board of Directors.

In response to Mayor Bellamy, Vice-Mayor Davis said that the Boards & Commissions Committee recommended the two liaisons for the URTV Inc. Board (Councilman Russell and County Chairman David Gantt) meet with the URTV Manager and URTV Board Chair to see if they can resolve some of the problems associated with the Board.

VII. OTHER BUSINESS:

A. CLAIMS

The following claims were received by the City of Asheville during the period of March 13 – April 2, 2009: Christopher Morris (Transit), Annie Jones (Fire), Randy Roland (Police), Mark Jackson (Streets), Ingrid Swayngim (Streets) and Karen Cianciulli (Traffic Engineering). These claims have been referred to Asheville Claims Corporation for investigation.

VIII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Ms. Kyle Ross urged the City of Asheville to get experts (forensic psychologist or forensic anthropologist) involved in solving crimes in Asheville, especially homicides. Mayor Bellamy said that Assistant City Manager Richardson would follow-up on her request.

Mr. Barry Durand thanked City Council for their earlier resolution of support for their (neighbors and others) efforts to encourage Environmental Protection Agency (EPA) restoration of soil and water quality in the area impacted by the CTS facility. He updated Council by saying that CTS is has now decided to enter into the State's voluntary remediation program, which incentive is a $3 Million liability cap. He urged Council to support the community as they lobby that the CTS facility's voluntary remediation program request be denied and that they do an appropriate, proper clean-up. They feel that is an inappropriate application of voluntary remediation.

In response to Mayor Bellamy, Mr. Durand said that this issue is on the Buncombe County Commissioners' agenda next week.

After a brief discussion, it was determined that participation in a brownfields remediation program may not be the most appropriate course of action in this instance, largely because the site was still active.

Vice-Mayor Davis noted that Congressman Shuler's office is involved and it may be appropriate to prepare a resolution of support for doing something more immediate through the Congressman's office.

Mayor Bellamy also noted that Senator Burr would be in Asheville tomorrow and they may have an opportunity to speak to him regarding this issue.

It was the consensus of Council to instruct the City Attorney to prepare a resolution, to be placed on the May 12, 2009, agenda, requesting the CTS facility's request for voluntary remediation be denied. Councilwoman Cape suggested said resolution to state that while the voluntarily compliance is good, when it applies, because it encourages people to be proactive in cleaning areas up, but in this situation, it does not apply.

IX. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 10:21 p.m.

Magdalen Burleson
CITY CLERK

MAYOR

Tuesday – April 28, 2009 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Jan B. Davis; Councilwoman Robin L. Cape; Councilman Kelly M. Miller; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; Councilman William A. Russell Jr.; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Bellamy led City Council in the Pledge of Allegiance.

INVOCATION

Mayor Bellamy gave the invocation.

PUBLIC HEALTH EMERGENCY – SWINE FLU

Dr. Martha Salyers, Director of Region 6 Public Health Team, explained that the United States is now in a declared "Public Health Emergency". Public health officials within the United States and throughout the world are investigating outbreaks of swine influenza (swine flu). Swine flu is a respiratory disease of pigs caused by a type A influenza virus that regularly causes outbreaks of influenza among pigs. Swine flu viruses do not normally infect humans; however, human infections with swine flu do occur. Public health officials have determined that this strain of swine flu virus spreads from human to human and can cause illness. The outbreak is ongoing and additional cases are expected.

The symptoms of swine flu in people are similar to the symptoms of seasonal flu in humans and may include: Fever (greater than 100°F or 37.8°C); Sore throat; Cough; Stuffy nose; Chills; Headache and body aches; and Fatigue.

Some people have reported diarrhea and vomiting associated with swine flu. Severe illness (pneumonia and respiratory failure) and deaths have been reported with swine flu infection in people. Like seasonal flu, swine flu may cause a worsening of underlying chronic medical conditions.

People entering the United States who are experiencing symptoms consistent with swine flu and have traveled to an affected area, or have been exposed to someone possibly infected with swine flu, during the last 7 days should report their illnesses to their health care provider immediately and inform them of their recent travel.

People traveling from the United States to affected areas should be aware of the risk of illness with swine flu and take precautions.

To prevent the spread of swine flu: (1) Avoid contact with ill persons; (2) When you cough or sneeze, cover your nose and mouth with a tissue or your sleeve (if you do not have a tissue). Throw used tissues in a trash can; (3) After you cough or sneeze, wash your hands with soap and water; or use an alcohol-based hand gel; (4) If you think you are ill with flu, avoid close contact with others as much as possible. Stay at home or in your hotel room; (5) Seek medical care if you are severely ill (such as having trouble breathing). There are antiviral medications for prevention and treatment of swine flu that a doctor can prescribe; and (6) do not go to work, school, or travel while ill.

Mr. Eddy Shook, Health Services Coordinator for the Buncombe County Health Department, explained how they are in constant communication with their local care providers.

In response to Councilwoman Cape, Dr. Salyers said that if your child has flu-like symptoms, you should contact your health care provider.

Mr. Allen Johnson, Superintendent of the Asheville City Schools, explained how the Asheville City School system is coping with this public health emergency.

Mayor Bellamy thanked Dr. Salyers and Mr. Shook for this informative update. She said that the City has been posting press releases on our website.

I. PROCLAMATIONS:

A. PROCLAMATION PROCLAIMING MAY 2009 AS "MOTORCYCLE AWARENESS MONTH"

Councilwoman Cape read the proclamation proclaiming May, 2009, as "Motorcycle Awareness Month" in the City of Asheville. She presented the proclamation to Mr. Roger Williams, who briefed City Council on some activities taking place during the month.

B. PROCLAMATION PROCLAIMING MAY 2009 AS "DRUG COURT MONTH"

Councilman Mumpower read the proclamation proclaiming May, 2009, as "Drug Court Month" in the City of Asheville. He presented the proclamation to Ms. Norma Grivich, Coordinator for the Buncombe County Adult Drug Treatment Court, who briefed City Council on some activities taking place during the month.

C. PROCLAMATION PROCLAIMING MAY 4-10, 2009, AS "PUBLIC SERVICE RECOGNITION WEEK"

Mayor Bellamy read the proclamation proclaiming May 4-10, 2009, as "Public Service Recognition Week" in the City of Asheville. She presented the proclamation to Mr. Mike Marshall, President of the Asheville Professional Firefighter Association, who accepted the proclamation on behalf of the firefighters and law enforcement officers.

D. PROCLAMATION PROCLAIMING MAY 6-12, 2009, AS "NURSES WEEK"

Councilman Miller read the proclamation proclaiming May 6-12, 2009, as "Nurses Week" in the City of Asheville. He presented the proclamation to Ms. Lourdes Lorenz, RN, Director of Integrative Healthcare Department at Mission Hospital, and Ms. Kathy Guyette, Vice-President and Chief Nursing Hospital at Mission Hospital, who briefed City Council on some activities taking place during the week.

E. PROCLAMATION PROCLAIMING MAY 12-16, 2009, AS "SENIOR GAMES WEEK"

Councilman Newman read the proclamation proclaiming May 12-16, 2009, as "Senior Games Week" in the City of Asheville. He presented the proclamation to Recreation Superintendent Danny Hopkins, Mr. David Herbert and Mr. Charles Canter, who briefed City Council on some activities taking place during the week.

II. CONSENT AGENDA:

At the request of Councilman Mumpower, Consent Agenda Item "E" was removed from the Consent Agenda for discussion and/or an individual vote.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON APRIL 14, 2009

B. RESOLUTION NO. 09-76 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO CONTRACTS WITH DALTON LAWN AND LANDSCAPING, AND RIVERTOP CONTRACTING INC. TO PROVIDE CONTRACTED MOWING SERVICES FOR THE CITY'S PARK SYSTEM BEGINNING JULY 1, 2009

Summary: The consideration of a resolution authorizing the City Manager to enter into contracts with Dalton Lawn and Landscaping and Rivertop Contracting, Inc. to provide city wide mowing services beginning July 1, 2009.

The purpose of the request for proposal for mowing services was to determine if grounds maintenance services for parks could be provided more cost effectively by the private sector under contract, and if so, to select a contractor to provide such services. The City of Asheville bid for mowing services was divided into five districts (East, West, North, Central and South) plus Riverside Cemetery for bidding purposes on a per cut basis with an estimated 14 cuts per year from April through October. A contractor could bid on one or more of the districts for providing mowing services but had to submit a bid for a complete district to be deemed responsive.

Dalton Lawn and Landscaping, located at 662 Bald Rock Rd., Hendersonville, NC is the lowest responsive and responsible bidder and is proposed to be selected to perform mowing services for the East, North and South Districts at a cost of $60,655.00. Rivertop Contracting, Inc., located at PO Box 1294, Black Mountain, NC is the next low responsive and responsible bidder at a cost of $33,012.00 and is proposed to be selected to perform mowing services for the West District. The Parks, Recreation and Cultural Arts Department found it more cost effective to continue to mow both the Central District and Riverside Cemetery.

Funding in the amount of $97,679.00 is proposed for contracted mowing services in the City's Fiscal Year (FY) 2009-2010 operating budget for park maintenance, and is contingent upon City Council approving the funds associated with providing contracted mowing services as part of the City's FY 2009-2010 operating budget.

This action complies with the City Council Strategic Operating Plan in that it supports and enhances basic city services and is part of the park facilities maintenance program to conduct ongoing facility maintenance. It is also consistent with the Parks, Recreation and Cultural Arts Master Plan in that it provides ongoing maintenance and care for our park system.

Pros:
- Provide funds for ongoing, core park maintenance services.
- Fulfill commitment for maintenance of park system.

Con:
- none

Regarding fiscal impact, $97,679.00 is proposed for contracted mowing services in the City's FY 2009-2010 operating budget for park maintenance, and is contingent upon City Council approving the funds associated with providing contracted mowing services as part of the City's FY 2009-2010 operating budget.

City staff recommends City Council to adopt a resolution authorizing the City Manager to enter into a contract to provide city wide mowing services with Dalton Lawn and Landscaping for a total of $60,655; and with Rivertop Contracting, Inc. for a total of $33,012.00 beginning July 1, 2009, contingent upon City Council approving the funds associated with providing contracted

mowing services as part of the City's FY 2009/2010 operating budget.

RESOLUTION BOOK NO. 32 – PAGE 26

C. RESOLUTION NO. 09-77 - RESOLUTION AUTHORIZING EXECUTION OF A UTILITY EASEMENT ACROSS CITY PROPERTY AT 35 BELL ROAD IN HAW CREEK FOR A NEW WATER PUMPING STATION

Summary: The consideration of a resolution granting a utility easement over city property in Haw Creek.

The City of Asheville owns approximately two acres at 35 Bell Road in Haw Creek. As part of the Town Mountain Revenue Bond Project, a new water pumping station has to be installed on this property. The best method to provide electrical power to the new water pumping station is for Progress Energy to install a new utility pole and overhead line to the site.

The easement that is being requested would be 30 feet in width, and Progress Energy would be permitted to construct and maintain its line (including poles, cables, wires, guys, anchors, underground conduits, and other pertinent facilities) and to keep the area cleared of trees, undergrowth, or any other obstructions that may endanger or hinder their operation and maintenance.

Pros:

- Allows for installation of a new water pumping station in order to proceed with the Town Mountain Revenue Bond Project.
- The new water pumping station will provide better water service to area residents.
- The new utility pole will provide electricity required to operate the new pump station.

Cons:

- May require periodic trimming / removal of vegetation within the easement area.
- The city cannot use the area in a manner that interferes with the easement.
- The city will have to ensure that future uses of the property are compatible with the easement.

This project is part of City Council's strategic plan to complete the Water Revenue Bond Projects to address capital needs and infrastructure demands.

Progress Energy is not charging the City to install and maintain the utility pole and overhead line. There is a $20.00 easement recording fee.

Water Resources staff recommends adoption of the resolution authorizing the Mayor to execute the easement, subject to approval of the City Attorney.

RESOLUTION BOOK NO. 32 – PAGE 27

D. RESOLUTION NO. 09-78 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH THE ASHEVILLE HUMANE SOCIETY FOR ANIMAL SHELTER SERVICES FOR ANIMALS WITHIN TERRITORIAL LIMITS OF THE CITY OF ASHEVILLE

Summary: The consideration of a resolution authorizing the City Manager to enter into an agreement with the Asheville Humane Society for animal shelter services for animals within territorial limits of the City of Asheville.

For the past few years, Buncombe County has required the City to pay for animal shelter services through the Asheville Humane Society who has contracted with the County to run the

animal shelter. The Asheville Humane Society has told City Staff that the cost for animal shelter to the City for Fiscal Year 2008-2009 will be $127,050. This cost is included in the Asheville Police Department's budget. The City and the Humane Society need to enter into an agreement for the shelter services for the term of July 1, 2009, through June 30, 2010.

Pro:

- The City will not have to pay for the construction and operation of its own animal shelter to take care of its animal sheltering needs and the Humane Society will be responsible for the care of all animals brought to the shelter.

Con:

- The City has to pay out of its general fund for shelter services where Buncombe County provides the same services to all other non-incorporated county residents at no additional cost except through county taxes.

The Shelter contract will cost the City $127,050 for Fiscal Year 2009-2010. This is the same amount as last year.

City staff recommends City Council adopt a resolution authorizing the City Manager to enter into a contract with the Asheville Humane Society for animal shelter services for the term of July 1, 2009, through June 30, 2010.

RESOLUTION BOOK NO. 32 – PAGE 29

E. MOTION SUPPORTING THE ASHEVILLE CITY SCHOOLS FOUNDATION REQUEST OF A $1,000 GRANT TO HELP SUPPORT THE LISTENING TO OUR TEENS SUMMIT ON JUNE 4-5, 2009

This item was removed from the Consent Agenda for discussion and/or an individual vote.

Mayor Bellamy asked for public comments on any item on the Consent Agenda, but received none.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Vice-Mayor Davis moved for the adoption of the Consent Agenda. This motion was seconded by Councilwoman Cape and carried unanimously.

ITEMS REMOVED FROM THE CONSENT AGENDA FOR INDIVIDUAL VOTES

E. MOTION SUPPORTING THE ASHEVILLE CITY SCHOOLS FOUNDATION REQUEST OF A $1,000 GRANT TO HELP SUPPORT THE LISTENING TO OUR TEENS SUMMIT ON JUNE 4-5, 2009

Summary: The consideration of a motion supporting the Asheville City Schools Foundation request of a $1,000 grant to help support the Listening to Our Teens Summit, scheduled for June 4-5, 2009.

The Asheville City Schools Foundation is sponsoring the Listening to Our Teens Summit on June 4-5, 2009. This summit will be an opportunity for local service providers, business leaders, parents, students, school staff and other concerned community members to learn about what middle school students in Asheville have expressed as their needs and desires. If granted the $1,000, the Foundation is working to produce a report that will detail the project process,

results, and recommendations at a total cost of $860. The remaining funds will be used to fund the creation of a digital version of the report.

This support will serve to continue to strengthen the partnership with the City of Asheville and Asheville City Schools and its Foundation, which aligns with the City's Strategic Plan to strengthen key governmental partnerships.

Pros:

- This summit will provide Asheville City Schools an opportunity to interest with young teens, ages 11-14 years old, and to involve the Asheville Police Department and other city and community agencies to better understand and serve this age group in the future.
- Funding has been identified through unspent money from the City Council's Fiscal Year 2008-09 Travel Budget.

Con:

- This request, due to timing, was not handled in the normal manner with other outside agency requests.

This expense may be covered from Mayor and City Council unexpended travel/training funds in the Fiscal Year 2008-09 budget.

This request was reviewed by the Public Safety Committee at its April meeting and the committee unanimously recommended that it be forwarded to the Asheville City Council for further consideration.

Councilman Mumpower said he didn't have an issue with this grant, but felt this request should have gone through the established Outside Agency Funding process.

After a brief discussion, it was the consensus of Council to ask the City Manager to draft an amendment to the Outside Agency Policy to provide for infrequent, exceptional and minor allocations to agencies independent of the regular funding cycle.

At the suggestion of Mayor Bellamy, City Manager Jackson said that there are some community oriented policing dollars that could be used for this type of action, along with the City providing some in-kind services, e.g., printing.

Councilwoman Cape moved for the adoption of allocating up to $1,000 (from community oriented policing dollars and in-kind support) in order to support the Asheville City Schools Foundation Listening to Our Teens Summit, scheduled for June 4-5, 2009. This motion was seconded by Vice-Mayor Davis and carried on a 5-2 vote, with Councilman Russell and Councilman Mumpower voting "no."

III. PRESENTATIONS & REPORTS:

A. HIGHLIGHTS OF THE ASHEVILLE-BUNCOMBE COMMUNITY RELATIONS COUNCIL

Mr. Bob Smith, Executive Director of the Asheville-Buncombe Community Relations Council (Council), introduced Chairman of the Asheville-Buncombe Community Relations Council Larry McCallum and Board member Sharon Lewis. They shared some statistics of the Asheville-Buncombe Community Relations Council and thanked City Council for their support. Some highlights include:

(1) The Council is the agency many of the very poorest citizens in the community seek out working out problems in their community. The Council works to address Police Community Problems. We have a presence in all of the Public Housing Communities. We are working with young people to resist gangs. We are working with families to assist them in going to work.

(2) The Council is involved with the Burton Street Community in the discussion about the I-26 Corridor.

(3) The Council is very involved in the West Asheville Weed & Seed Area. Through this effort bad elements are weeded out of the community and good elements are started such as After School Clubs.

(4) The Council through our Fair Housing efforts warder a disabled homeowner over $10,000 in a Fair Housing Claim. This allowed him to make a modification to his home, which allowed him to continue to live there. This was the largest Fair Housing Award in the western part of the state in the last year.

(5) The Council serves as the Fair Housing Enforcement Agency for the city and county. HUD recertified the ABCRC last year. In the HUD Monitoring Report it was noted that with such a high caseload and such a small staff, we could not close cases at an efficient rate. It was recommended that our funding be increased in order to hire an additional investigator.

(6) The Council is unable to serve the growing Latino Community due to our lack of bi-lingual staff.

(7) The Council closed 11 Housing Cases last year. This year we have already investigated 26 cases. This represents an increase of more than 100%.

(8) Last year the Council facilitated forums concerning how we accept differing points of view and immigration. The forums were held at the Unitarian Church and St. Eugene's Catholic Church. Both forums were very well attended and a wide range of views was expressed.

(9) The Council Staff facilitated workshops on Housing Discrimination, Employment Discrimination, Disabilities, Cultural Awareness, Diversity and others. We were not able to accommodate all of the requests for workshops due to the small staff.

(10) The Council hosted over 12 Mediation Sessions involving individuals, businesses, groups, organizations and Law Enforcement.

On behalf of City Council, Mayor Bellamy thanked Mr. Smith, Dr. McCallum, Ms. Lewis and the entire Community Relations Council Board and staff for their hard work and service to the community.

B. HEALTHY BUNCOMBE'S ACTIVE COMMUNITY COMMITTEE

Ms. Claudia Nix, Chair of Healthy Buncombe's Active Community Committee, updated Council on the progress of the coalition. They are a diverse group charged to promote policy and environmental changes that to enable our citizens to be more physically active and eat healthy thereby improving their health, reducing chronic disease and health care costs.

For decades health organizations focused their efforts mainly on encouraging individuals to change their behaviors and adopt healthy lifestyles. Twenty years ago 25% of the population was getting the recommended amount of physically activity; today we are still only at 25% and

related chronic diseases continued to rise. It is now clear that while personal responsibility is important; if we want people to adopt healthy lifestyles the means to do so must be accessible. This is especially true of the most disadvantaged in our community. Therefore, the shift to emphasize policy and environmental change approaches. People are more likely to use facilities instead of their cars for their short trips if they are nearby and convenient. By the same manner if healthy food choices are available and affordable, many people will choose them.

She then provided the Council with an update on our bicycle education program which was funded through NC's Eat Smart Move More Community Grants program. She provided Council with a brief background in that the bicycle education grant is the 5th grant they have received bringing $90,000.00 into our community. Briefly, the others have included:

- A mini-grant program to help middle schools support healthy eating and physical activity.
- The 2nd is a grant working with African American churches offering nutrition programs to teach healthy eating & cooking techniques as well as the MoveAbout program to encourage physical activity 150 minutes a week for 13 weeks which averages 30 min. a day. The mutual support that individuals received from their church community was very helpful in achieving results.
- Development of the Shiloh Community Garden with support from the Bountiful Cities Project was designed to make the garden sustainable, connect the water supply, purchase tools, and build a secure facility for storage. Further more the "Strong Roots Program" supported healthy lifestyles with multi-generational programs, sharing stories and traditions and publishing a cookbook.
- Last year's Downtown on the Move program was another expansion of MoveAbout focused on worksites in the central business district. A map was developed of walking routes that highlighted local errand sites, contained mileage and signage, (the green Eat Smart Move More Route signs) you see. Workers were encouraged to stay downtown during their lunch hour rather than drive to fast food restaurants.
- This year's grant was to develop a children's bicycle training program to help create a generation of physically active and safe youth and young adults. There are 2 components of this program. One is development and support of a bicycle club at Erwin Middle School. Students learn skills, how to maintain and repair their bikes, increase their level of physical activity, which builds self-esteem and confidence. The second component of the grant involves developing a bicycle rodeo program. We are using a program developed by the National League of American Bicyclist with a grant from the National Bicycle Dealer's Association. The rodeo teaches safety skills and traffic laws on a simulated streetscape and takes into consideration the development level and needs of different age groups. An Erwin Middle School staff member received national certification in Bicycle Safety Instruction and another community member refreshed her certification, giving Asheville 4 certified bicycle education instructors. We have purchased equipment, conducted two rodeo volunteer training sessions and have 40 volunteers ready to begin training children in appropriate bicycling behaviors. Our first rodeo will take place this Saturday at the YMCA's Healthy Kids Day. We will put on a total of 5 bicycle rodeos this spring. Others will be part of the Biltmore Village Earth Day Celebration, at Evergreen Charter School, Vance and Black Mountain Elementary Schools.

Beyond grant-funded initiatives, Healthy Buncombe is also involved in a number of other programs, as noted below:

(1) We trained 8 individuals to teach a bicycle and pedestrian safety module in area high school driver's education classes. So far we've worked with 228 teenagers.

(2) Two Healthy Buncombe members are certified trainers for the National Safe Routes to Schools Course that assists schools in planning safe routes programs and in applying for state and federal funds. These individuals with NC DOT brought the National Safe Routes to Schools community workshops to 4 elementary schools in Asheville and

Buncombe County. Out of these workshops, Vance Elementary received infrastructure improvements through regular city maintenance. They also received a city schools foundation grant to develop a successful pedestrian education program for their primary grade students. Emma Elementary and Black Mountain each received SRTS grants of $250,000 for infrastructure improvements around their schools and to develop encouragement and enforcement programs to make it safer for kids to walk to school.

(3) The Bike/Ped Task Force worked with the Asheville Police Dept. on an enforcement program to improve bicyclist behavior by ticketing those who blow thru red lights & stop signs, ride against traffic, ride at night without lights or those who pass autos on the right where there is no lane to do so. We hope to additional programs to ticket drivers who don't stop for pedestrians or yield to bicyclists when required. In this past year two pedestrians were hit by motorist while crossing Patton Avenue downtown.

(4) With multiple community partners we've provided free valet bike parking at the After 5 Concert Series and at the Lexington Arts Festival we parked a total of 150 bikes. Our plan is to continue this service and plan to expand our efforts to other city festivals.

(5) We've conducted two adult bicycle education clinics and a bicycle commuting workshop.

(6) Healthy Buncombe is a long-time partner in the annual Strive Not to Drive events. This program encourages people to try alternative travel during the week. The Mayor's Bike Ride is the kick-off event with a press conference. You have all been invited to ride with our illustrious Mayor Terry Bellamy to experience our bicycle facilities. The Blue Ridge Bike Club is assisting Healthy Buncombe and the city in putting on this event.

(7) Two years ago Asheville was recognized as a Fit Community with leadership from Healthy Buncombe in compiling the application. The application for re-designation was just finished and the City should hear shortly whether we receive that designation again.

Their plan is to grow and broaden our efforts this year, as well as add two additional big goals.

They would like Asheville to commit itself to a Complete Streets Initiative. This means when new roads are developed or older roads improvements all street users will be considered in the design and safety of the road not just the automobiles. This goal will help us achieve our second goal.

We want Asheville designated a Bicycle Friendly Community. The City must apply for this designation which is administrated by the League of American Bicyclist. It is given to communities who make conscientious efforts to encourage safe bicycling. Two years ago we applied for this designation to learn where we stood. The recommendations have been given to you along with an itemization of our accomplishments since then.

Earlier this month the Robert Wood Johnson Foundation reported that communities need to put more efforts toward disease prevention as a way to reduce health care costs. Central in their recommendations was the need for supportive policy and environments that make healthy lifestyles accessible to all citizens, such as spending funds on walking and biking facilities so their citizens can put physically activity into their daily lives.

They have made a lot of progress in the past two years. She hoped they can continue to expand on our progress.

On behalf of City Council, Mayor Bellamy thanked Ms. Nix for her report on their efforts and would invite her back next year to update Council on their progress.

C. ECONOMIC STIMULUS PACKAGE UPDATE

Ms. Brenda Mills, American Recovery & Reinvestment Act Project Manager, updated Council on the following application for the economic stimulus package.

Staff is seeking City Council approval of (1) a prioritized list of transportation projects for submission to the French Broad River Metropolitan Planning Organization in consideration of American Recovery & Reinvestment Act funding allocated for the Asheville urbanized area and (2) the setting of a public hearing date for May 12, 2009, for administering ARRA Homeless Prevention Funds.

Urbanized Area Transportation Funding

As part of the ARRA, the State of North Carolina will receive approximately $735 million for highways and bridges. This money is distributed by formula to each of the fourteen highway divisions in the state. Buncombe County is in NCDOT Division 13, which includes the counties of Buncombe, Madison, Yancey, Burke, McDowell, Mitchell, and Rutherford. The seven county Division will receive about $50-60 million of the state's share. The bulk of this money has been identified for highway improvements. Some of the state's highway funding is allocated by formula toward projects in urbanized areas of over 200,000 in population. The Asheville urbanized area will be allocated approximately $6 Million. Projects funded through this $6 million will be selected by the Transportation Advisory Committee (TAC) of the French Broad River Metropolitan Planning Organization (FBRMPO). In order to receive MPO consideration, the City of Asheville must submit a list of potential transportation projects by April 30, 2009.

The project list includes a range of eligible transportation projects including street resurfacing, multi-model and pedestrian improvements, and transit investments. Staff developed and prioritized the list based on existing transportation master plans, the city's capital improvement plan, and the street resurfacing schedule along with consideration for projects that met ARRA criteria, including required timeframes for project implementation.

Submission of these projects meets City Council's strategic goal to proactively pursue funding through the federal economic recovery program. It also aligns with Council's goals supporting infrastructure investment, job creation, and development of a multi-modal transportation network.

There is no financial implication for the City of Asheville to submit these projects to the FBRMPO. If awarded, the ARRA funds allocated for urbanized areas require no local match.

Pro:

- Approval of the project list will ensure its consideration for ARRA transportation funding, which requires no local match if awarded.

Con:

- If the project list is not approved, the ARRA funding potential for these projects will not move forward. In such a case, these projects will be delayed until the necessary funds can be allocated.
- Approval does not guarantee funding allocations for any or all of these projects.

Homeless Prevention Fund

As previously reported to the City Council Finance Committee, HUD has allocated $509,460 from the Homeless Prevention and Rapid Re-housing Program (HPRP) to Asheville. In order to be eligible to receive these funds, Asheville is required to complete a substantial amendment to the Consolidated Plan 2008 Action Plan. In addition, staff is analyzing the HPRP requirements to determine how the program will most benefit the community in the context of the existing Asheville-Buncombe 10 Year Plan to End Chronic Homelessness. Staff will use this analysis to develop a Homeless Prevention and Re-housing Plan, as required by HUD, to guide the administration of a community sub-grant award process.

To comply with HUD requirements, the adoption of the substantial amendment to the Consolidated Plan 2008 Action Plan must be preceded by a public comment period and a formal public hearing. Staff is asking City Council to set the public hearing date for the substantial amendment to the Consolidated Plan 2008 Action Plan for May 12, 2009.

She provided Council with a detailed schedule for administration of the Homeless Prevention Fund allocation. This schedule has been approved by the City Council Finance Committee, and the Housing & Community Development Committee has reviewed staff's work on the draft substantial amendment.

Proceeding with the necessary steps to move forward with administration of the HPRP funds supports City Council's strategic goal to end homelessness in Asheville.

Moving forward with the application process for the HPRP entitlement will allow the City of Asheville to receive $509,460, which can be sub-granted to agencies who provide homeless prevention and support services in the community. There is no local match required for this funding.

Pro:

- Setting the public hearing date for the substantial amendment to the Consolidated Plan 2008 Action Plan will allow the City of Asheville to proceed with the necessary steps to receive and administer Homeless Prevention Funds.

Con:

- If the public hearing is not set, the City of Asheville will miss HUD's deadline for receiving the HPRP allocation.

Staff recommends that City Council:

- Approve submission of the STP-DA Transportation project list to the French Broad River MPO, and;

- Set a public hearing on May 12, 2009, to solicit comments on a Substantial Amendment to the City's 2008-09 Consolidated Annual Action Plan, detailing the City's plan to establish funding guidelines and an allocation process for the Homeless Prevention and Rapid Rehousing Program grant of $509,460.

Councilman Newman felt this is a good list to put forward for these resources.

Councilman Mumpower felt all this money is borrowed and we should not lay this load on our children to repay.

Councilwoman Cape said that the money we will spend here, we will save it in the long run in terms of community health, etc. She believed we are making an investment in our community.

In response to Mayor Bellamy, Ms. Ball said that the City is in the process of evaluating the use of CNG buses since we have a CNG station. She will bring forward a recommendation to Council in the near future.

When Mayor Bellamy asked for public comments, she received none.

Councilman Newman moved to approve submission of the STP-DA Transportation project list to the French Broad River MPO. This motion was seconded by Councilwoman Cape and carried on a 6-1 vote, with Councilman Mumpower voting "no."

Councilman Newman moved to set a public hearing on May 12, 2009. to solicit comments on a Substantial Amendment to the City's 2008-09 Consolidated Annual Action Plan, detailing the City's plan to establish funding guidelines and an allocation process for the Homeless Prevention and Rapid Rehousing Program grant of $509,460. This motion was seconded by Councilwoman Cape and carried on a 6-1 vote, with Councilman Mumpower voting "no."

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO SOLICIT COMMENTS ON THE CITY'S CONSOLIDATED ANNUAL ACTION PLAN WHICH ALLOCATES COMMUNITY DEVELOPMENT BLOCK GRANT AND HOME PROGRAM FUNDS TO SPECIFIC PROJECTS FOR FISCAL YEAR 2009

Mayor Bellamy opened the public hearing at 6:22 p.m.

Ms. Shannon Tuch, Assistant Director of Planning & Development, introduced the City's new Community Development Director Jeff Staudinger.

Mr. Staudinger said that this public hearing to obtain citizen input on the Consolidated Action Plan for Fiscal Year 2009-10, which sets out the proposed use of federal Community Development Block Grant (CDBG) and HOME Investment Partnership Act (HOME) funds. This public hearing was advertised on April 17 and 24, 2009.

The City expects to have available $1,494,368 in CDBG funds and $1,407,367 in HOME funds in the fiscal year beginning July 1, 2009. This amount is estimated because HUD has not yet announced funding levels for the 2009 entitlement grants. This announcement may be made before the date of the public hearing. The City's Housing and Community Development Committee has made recommendations for the use of CDBG funds, which must be used in housing or community development programs in Asheville, and the Asheville Regional Housing Consortium has recommended uses for the HOME funds, which must be used for housing programs within the four-county Consortium area (Buncombe, Henderson, Madison, and Transylvania counties). A total of 38 programs are recommended for funding. Allocations are consistent with the Strategic Housing & Community Plan for 2005-2010.

If approved, the HOME funds and some CDBG funds will assist 316 housing units Consortium-wide. CDBG funds will also benefit more than 5,600 low-income City residents through homeless services, housing counseling, small business assistance, and other needed services. Our partner agencies will contribute over $25,000,000 of other funding to these programs, leveraging $9.78 for every $1 of HOME and CDBG funds.

He explained that some of the projected outcomes include 316 affordable housing units, 60 small businesses assisted, services for 5,600 low and moderate income households, and transit and sidewalk improvements in the City.

He reviewed with Council the summary of the annual action plan for 2009-10 as follows:

178

CDBG

Entitlement Grant		1,226,681
Funds for re-allocation from completed projects:		-
Unbudgeted 2007-08 program income		62,166
Unbudgeted 2008-09 program income (estimate)		139,058
Estimated Program Income for 2009-10:		66,463
Land sales	-	
Rents	15,463	
Loan Repayments	51,000	
Total CDBG Funds Available For Allocation		**1,494,368**

Proposed Use of Funds:

Asheville Area Habitat for Humanity- Housing Services	70,000
Asheville Buncombe Community Relations Council- Fair Housing	45,000
City of Asheville Transit Improvements	50,000
City of Asheville N. Louisiana Street Sidewalks	117,000
City of Asheville- Homeless Initiative Coordinator	18,000
CCCS- OnTrack- Financial/Housing Couns. & Ed.	37,430
CCCS- Service- OnTrack- Homebase Tenant Housing Counseling	40,000

A summary of the draft Action Plan and notice of this public hearing was published on March 29, 2009. A 30-day comment period is required. At the end of this period, staff will ask Council to take action to approve the plan on May 12. The plan is due to be submitted to HUD by May 16.

The draft Action Plan directly relates to the Council's Strategic Goal of "Affordable." This plan directly supports the City's affordable housing plan, supports the city-owned land redevelopment process, and will increase the supply of workforce housing. It supports initiatives to end homelessness in Asheville.

Pro:

- The public hearing process enables the City to continue its application process for federal entitlement funding.

Con:

- There are no cons to this public hearing process.

Through timely following of the public process, Asheville continues to be eligible for these CDBG and HOME entitlement funds, projected to be over $3.9 million for 2009-2010.

In response to Ms. George, Mr. Staudinger defined low and moderate income.

Mayor Bellamy closed the public hearing at 6:28 p.m.

Mayor Bellamy said that formal action to approve the plan will be held on May 12, 2009, meeting.

B. PUBLIC HEARING RELATIVE TO INITIALLY ZONE PROPERTIES RECENTLY ANNEXED AND LOCATED ALONG AIRPORT ROAD TO RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT WITH MANUFACTURED HOUSING COMMUNITY OVERLAY, HIGHWAY BUSINESS DISTRICT AND COMMERCIAL INDUSTRIAL DISTRICT

ORDINANCE NO. 3729 - ORDINANCE TO INITIALLY ZONE PROPERTIES RECENTLY ANNEXED AND LOCATED ALONG AIRPORT ROAD TO RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT WITH MANUFACTURED HOUSING COMMUNITY OVERLAY, HIGHWAY BUSINESS DISTRICT AND COMMERCIAL INDUSTRIAL DISTRICT

Mayor Bellamy opened the public hearing at 6:29 p.m.

Urban Planner Blake Esselstyn said that this is the consideration of an ordinance to initially zone properties recently annexed and located along Airport Road to RS-8 Residential Single-Family High Density District, RM-16 Residential Multi-Family High Density District with Manufactured Housing Community Overlay, Highway Business District and Commercial Industrial District. This public hearing was advertised on April 17 and 24, 2009.

The property presented to you for initial zoning is property annexed by the City of Asheville effective March 31, 2009. The properties (a total of 110 parcels) are located in the Airport, Glenn Bridge and Bradley Branch Road area. The land uses on these properties are varied. There is a mix of commercial, institutional, industrial, office, single-family residential, manufactured housing, and multi-family residential uses. Surrounding land uses are similarly varied. The zoning in the area (both City of Asheville and Buncombe County – Limestone Township Zoning) is a mix of commercial, residential, and industrial (EMP for Buncombe County).

At a meeting on April 1, 2009, the Asheville Planning and Zoning Commission recommended an initial zoning plan to the Asheville City Council for this area of RS-8 (Residential Single-Family High Density District), RM-16 with MHCO (Residential Multi-Family High Density District with Manufactured Housing Overlay), HB (Highway Business District), and CI (Commercial Industrial District) as depicted on the maps provided to Council. Staff has noted only one nonconforming use that would be created with the proposed zoning but recognizes that some development standards will not be met by the existing development.

Previously, staff had recommended to the Commission that a portion of the properties along Airport Road (east) be zoned Community Business II as they were smaller parcels and some were zoned Community Service or Residential by the County. After hearing from a number of property owners and looking at the nature of the development that exists on Airport Road, the Commission voted to propose zoning that area Highway Business. The properties that have been brought into the City along Airport Road to date have been zoned Highway Business. After hearing the comments, staff is supportive of the recommendation of the Commission.

At the Commission meeting eight individuals spoke. Six were requesting that the proposed CBII zoning area along Airport Road be zoned HB. One property owner was seeking information. Another property owner felt that the proposed RS-8 zoning area along Bradley Branch Road should be zoned CI. Staff has since received communication from another property owner on Bradley Branch Road who would like commercial zoning.

Pros:

- Supports the *Asheville City Plan 2025* goals for regional commercial corridor development.
- Is compatible with the zoning patterns (both City of Asheville and Buncombe County) in the area.
- Staff has noted only one nonconforming use that would be created by the proposed zoning.

Con:

- Some existing development will not meet the City standards for the proposed zoning districts.

The Planning and Zoning Commission on April 1, 2009, unanimously (6-0) recommended approval of initial zoning as follows:

RS-8 (Residential Single Family High Density District) – PINs 9643981845 ,9643983896, 9643983997, 9643986989, 9643988901, 9643994100, 9643994221, 9643994309, 9643994381, 9643996245, 9643996422, 9643999194, 9643999226, 9653081568, 9653081658, 9653081747, 9653081838, 9653090312, 9653090417, 9653090508, 9653091010, 9653091180, 9653091294, 9653091399, 9653092504, 9653092608.

RM-16 (Residential Multi-Family High Density District with Manufactured Housing Community Overlay) – PINs 9654007733 (partial), 9654115212 (partial).

HB (Highway Business District) – PINs 9643879762, 9643970479, 9643973509, 9643974676, 9643982107, 9653292952, 9654007733 (partial), 9654115212 (partial), 9654203012, 9654204021, 9654204554, 9654206145, 9654208539, 9654208710, 9654209767, 9654300634, 9654301815, 9654302943, 9654303227, 9654304704, 9654307434, 9654307745, 9654307961, 9654308495, 9654309310, 9654314011, 9654317286, 9654318034, 9654402538, 9654403403, 9654406526, 9654406790, 9654406803.

CI (Commercial Industrial District) – PINs 9643979895, 9643989726, 9643994969, 9643996754, 9643996963, 9643997516, 9643997880, 9643998420, 9643998661, 9644806904, 9644807734, 9644807806, 9644808772, 9644816118, 9644818218, 9644902290, 9644904138, 9644906173, 9644908051, 9644908165, 9644910120, 9644910522, 9644911623, 9644912501, 9644914587, 9644917206, 9644917778, 9644919736, 9653072967, 9653080222, 9653081289, 9653082426, 9653083111, 9653084150, 9653084284, 9653084401, 965308537, 9653086851, 9653087239, 9653087443, 9653090998, 9653092802, 9654010212, 9654010585, 9654011826, 9654013591, 9654017688, 9654112511, 9654112616, 9654112907, 9654113720, 9654115212 (partial).

Staff is supportive of this recommendation.

Mr. James Diaz, co-owner of 74 Bradley Branch Road and representative of 16 other property owners in the immediate area of Bradley Branch Road, expressed his opposition to the proposed initial zoning of the RS-8, requesting that it be zoned CI. Although his property is being zoned appropriately (CI), his neighbors immediately to the south request the RS-8 properties be zoned CI as well. He felt that all of this property should be classified in a united and consistent pattern based on the general uses of the surrounding properties. As he understood the need to protect and preserve affordable housing, on this particular road the actual viability of desirable housing is unattainable. He presented Council with the following petition, signed by 16 people: "We, the owners of property along Bradley Branch Road, concur with these statements and believe that allowing our property to be zoned RS-8 would be disadvantageous to our property. By signing this petition we are in solidarity that our properties should be appropriately zoned Commercial Industrial as it will benefit us and the community at large."

Mr. Robert Coxe, area property owner whose property is being zoned Commercial Industrial (which he supported), felt the area residents whose properties are proposed to be zoned RS-8 did not receive a color copy of the map and possibly misunderstood the designation, since most of the properties in that area are business in nature. He then presented a petition to Council where Hilda Gillard Foster, owner of property along Bradley Branch Road, asked that her property be zoned Commercial Industrial.

Mr. Curtis Burge, property owner on Bradley Branch Road, said that although his property is zoning zoned appropriately (CI), he supported all the RS-8 being zoned CI.

Mr. George Morazoni supported all the RS-8 property be zoned Commercial Industrial

At 6:49 p.m., Mayor Bellamy closed the public hearing.

In response to Councilman Mumpower, Mr. Esselstyn said that prior to this meeting, the majority of the property owners in the RS-8 area (especially on the east side) were in support of the the RS-8 zoning. He was not aware of anyone on the west side (except for one property owner) who had expressed a preference for Commercial Industrial.

In response to Councilman Mumpower, City Attorney Oast said that at this meetiing Council can zone all of the properties except the RS-8 properties. There is, however, a time constraint on zoning the RS-8 properties since there is a 60-day timeframe within which to take action. To zone the RS-8 properties to a higher designation, such as Commercial Industrial, will require a new notice and public hearing.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Mumpower moved to approve the initial zoning of the properties recently annexed and located along Airport Road to RM-16 Residential Multi-Family High Density District with Manufactured Housing Community Overlay, Highway Business District and Commercial Industrial District, excluding the RS-8 properties, and to instruct City staff to bring back a recommendation to Council for those RS-8 properties on May 26, 2009. This motion was seconded by Vice-Mayor Davis and carried unanimously.

ORDINANCE BOOK NO. 25 – PAGE 253

C. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE REGARDING CHANGES TO THE FLOODPLAIN ORDINANCE

ORDINANCE NO. 3730 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE REGARDING CHANGES TO THE FLOODPLAIN ORDINANCE

Mayor Bellamy opened the public hearing at 6:57 p.m.

Director of Transportation and Engineering Cathy Ball said that this is the consideration of an ordinance amending the Unified Development Ordinance (UDO) regarding changes to the floodplain ordinance. This public hearing was advertised on April 17 and 24, 2009.

She explained that this amendment will clarify the current ordinance as it relates (1) to change use and discontinued use so that it is aligned with the zoning ordinance; and (2) to allow the replacement manufactured homes in the flood fringe so long as the structure is elevated and secured.

Given the recent economic conditions, we have businesses that are struggling to survive. In trying to survive, some properties have realigned their business models including changes the type of business they operate. Our current flood protection ordinance, states that any change of use of a conforming building requires that the structure conform with the flood protection ordinance requiring flood proofing or elevating the finished floor elevation of the structure.

Staff is requesting a clarification that would state that so long as the change in use is allowed by the zoning district, the structure would not have to become conforming.

The second change is to align the definition of discontinued use to the zoning ordinance. Staff request that the current timeline for discontinued use be extended from 6 months to 12 months. Staff also recommends that the definition of discontinued use be clarified to exclude a discontinued use if the property is actively marketing the property and/or the utilities are continually actively operated.

The final change is to allow the replacement manufactured homes in the flood fringe so long as the structure is elevated and secured.

This request meets council's strategic goal of sustainability by reform and streamline the development review process.

The requested changes were presented to the Planning and Economic Development Committee in their March 2009, meeting. Planning and Zoning Commission approved this request unanimously at their April 1, 2009, meeting.

Pros:

- Allow more compatibility with the flood protection ordinance and the zoning ordinance.
- Allow property owners more flexibility to use their property in a viably economic manner, particularly during economically challenging times.

Cons:

- Some properties may receive money from flood damages in a future flood event.

Staff recommends that City Council approve changes to the flood protection ordinance.

Mr. Glenn Garson, area property owner, spoke in support of the changes.

Mayor Bellamy closed the public hearing at 7:01 p.m.

Ms. Ball responded to Councilman Mumpower when he asked how the amendments would decrease the vulnerabilities for businesses.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilwoman Cape moved for the adoption of Ordinance No. 3730. This motion was seconded by Councilman Miller and carried unanimously.

ORDINANCE BOOK NO. 25 – PAGE 256

At 7:04 p.m., Mayor Bellamy announced a short break.

V. UNFINISHED BUSINESS:

VI. NEW BUSINESS:

A. ORDINANCE NO. 3731 - ORDINANCE AMENDING THE ANIMAL CONTROL ORDINANCE

Police Chief William Hogan provided Council with an overview of the animal services operation, along with following information regarding the budget implications:

Ordinance amendments would create the need to fully staff Animal Services as originally formed. This would be a need for (4) full time employees. Currently, Animal Services has had to

reduce services to two (2) full time employees as well as Monday through Friday only, no weekends, and no on call to reduce overtime. After one year of assessment, an evaluation would be needed to determine if an increase of one (1) full time employee (FTE) is needed to meet service needs.

Salary and Benefits:	Entry Level: $25,396.98 annually + 26% for benefits = 1 Eliminated Position reinstituted 1 Vacant Position already budgeted	**$32,000.19**
Vehicles:	Fully equipped Animal Services Truck: $38,000.00 1 current Vehicle has 174,000 miles and 1 has 96,900 miles. Would need to replace 1 vehicle as part of current year Capital Purchases. No additional expenses expected.	
Laptop Computer:	1 Semi-ruggedized mobile computer @ $2,500.00 each	**$2,500.00**
Uniforms:	For 2 positions @ $700.00 each: $1,400.00 absorbed in current and 2010 budget	

Training, Travel and Certification: For 2 Positions @ $1,125.00 per week per Animal Services Officer. 2 weeks needed per Animal Services Officer **$4,500.00**

Total Fiscal Impact: $39,000.19

Assistant City Attorney Curt Euler briefed Council on the process and ordinance to amend the Animal Control Ordinance.

In July 2008, based on issues raised by the community regarding amending the existing Animal Control Ordinance, the Asheville Police Department in conjunction with the City Attorney's Office held a public meeting to seek public input regarding suggested changes to the current Animal Control Ordinance. The four prevalent issues brought to the meeting included: (1) reducing distance requirements for the keeping of fowl, (2) reduce the distance requirements for the keeping of bees, (3) allowing goats on a temporary basis for plant removal, and (4) to enhance the restrictions concerning the tethering of dogs on private property. In addition, staff also took this opportunity to address other important animal control issues such as dealing with injuries to people resulting from dog attacks and bear incidents within the City limits.

This background information ties into Council's Strategic Operating Plan in that an amended ordinance "could" provide a "safer" City for our citizens. Historically and currently, we encourage our Animal Services Officers to be proactive and the goal of our Animal Services Ordinance is compliance of the ordinance to ensure the safety of our citizens and their pets.

Tethering is the act of securing an animal to a fixed location so that it can only range within a set radius (i.e. tying a dog to a tree in one's backyard). Tethering has nothing to do with walking a dog on a leash and has no effect on one's ability to take his or her dog out for a walk. A segment of the City's population is requesting a complete ban on tethering dogs in the City. After researching this issue, it is staff's position that such an ordinance could increase the number of at large dogs and have a disparate impact on persons who cannot afford proper fencing. It is staff's position that it already has sufficient laws in place to deal with owners who mistreat their animals. He said that most of the jurisdictions in North Carolina that have adopted ordinances with a complete ban on tethering have grace periods so we haven't been able to determine how that has affected their operations. Staff also has amended the ordinance to allow for the installation of a T-Runner system to restrain dogs as an alternative to tethering. Staff has heard compelling arguments on both positions. Ultimately, the decision to allow or ban tethering on private property is a policy decision the governing body should make.

Another part of Council's Strategic Operating Plan includes "affordable." Reducing restrictions for the keeping of chickens and bees would allow residents to produce eggs and honey at home thereby reducing food bills. City staff has worked with City residents to relax the restrictions on having fowl within the City limits. Staff recommends that it continue permitting chicken coops and runs and such a practice could produce limited revenue. Staff also recommends continuing a licensing system to prevent persons from investing time and money in constructing coops that are not in compliance with the City ordinance. City staff supports the proposed changes to reducing the requirement for having fowl in the City with the proper staffing to ensure permitting and inspections are up to date. The staff also recommends the complete prohibition on having roosters on one's property.

He then reviewed a brief synopsis of suggested changes which includes, but is not limited to, the following:

Section 3-4:	Add definitions of Attractant, Refuse, and T-Runner
Section 3-5:	Allows the City to rescind a civil penalty if a dog owner registers his or her animal within 15 days after the issuance of a citation.
Section 3-9:	Adds, "No person shall knowingly or willingly leave or store any refuse, food product, pet food or grain in any manner which would constitute the attractant to any wild animal that causes a threat to the public health, safety and welfare of the community."
Section 3-12:	(f) Live animals known to transmit the rabies virus shall not be trapped, handled, kept, transported or destroyed except by Animal Control Officers or other authorized persons. (i) Allows the use of T-runners in lieu of a complete ban on tethering. NOTE: Council will be asked to completely ban and eliminate tethering by at least one group. (k) Restricts persons who conduct adoptions in public places to non-profit corporations whose primary place of business is within Buncombe County
Section 3-16:	Reduces the barrier for Beehives from neighboring household from 150 feet to 100 feet and requires the owner to get a permit.
Section 3-28:	(f) Allows the animal control officer to review and modify protective orders if the animal has been without incident for 24 months. (g) In cases where animals cause serious injury to persons, allows the City to seize the animal, terminate ownership rights and euthanize the animal. This decision shall be served on the owner and the owner has an opportunity to appeal prior to any action being taken place.
Section 3-29:	Requires that prior to being released from the shelter the animal is micro-chipped and the animal displays all the proper vaccination and City tags.
Section 3-36:	Allows a person to have livestock on a temporary basis on his or her property for plant removal upon the issuance of a temporary permit by the City.
Section 3-38:	Authorizes an annual fee and inspection for livestock. Mandates area be kept clean.
Section 3-50:	Prohibits roosters within the city limits. Reduces the barrier for Chicken Coops/Runs from neighboring household from 100 feet to 10 feet from all

property lines or 50 feet from the nearest residence (which ever is smaller). This is the same standard the City has used for dog kennels for since 2005 with no problems.
NOTE: Council may be asked to reduce restrictions to 25 feet by at least one group.

Section 3-51 — Authorizes the City to charge an annual license fee for fowl. Allows the City the option to conduct inspections on an as needed basis but does not mandate them.

Section 3-52 — Requires that the fowl coop and run be fully enclosed and that the fowl are kept in sanitary conditions.

Currently, the City enforces the animal control ordinance based on complaints made to the Department. Based on the existing staffing level, the City expects to continue to enforce the animal control ordinance on a complaint driven basis. In addition, as part of recent budget cuts, the Asheville Police Department had to take a hard look at staffing levels. We had/have two (2) Animal Services positions vacant and frozen. Reduction in staff obviously reduces services that can be rendered. An amended ordinance would increase calls for service and increase the number of permits to be issued from the current documented level of 11/year to an estimated 60-100/year (This number is derived from discussing the matter with chicken advocates and looking at other jurisdictions who reduced the restrictions on chickens). Thus, adopting additional enforcement provisions is cause for reconsidering animal control staffing requirements.

Pros:

- Public and citizen input were utilized in ordinance amendments.
- Suggested changes meet Council's Strategic Operating Plan in the areas of a safer city and a more affordable city.
- Promotes elimination of food sources for bears.

Cons:

- Amended ordinance would increase calls for service and need for additional staffing.
- Banning of tethering could adversely effect low income citizens and place financial burden on citizens to erect fences to confine dogs.
- Requiring fences to be erected for confinement as opposed to tethering may come into conflict with existing deed restrictions in some neighborhoods.

City staff recommends City Council adopt the revised Animal Control Ordinance as amended with the necessary staffing levels.

In response to Vice-Mayor Davis, Mr. Euler said that if a person wants more than six animals on their property, they need to get a permit.

When Councilwoman Cape asked about other cities having the flexibility of allowing tethering for 1-3 hours, Mr. Euler said it would be difficult for our officers to determine at what time the dog was tethered. He explained that our ordinance allows a person to tether the dog as long as the tether is over 50 feet and as long as the dog has access to adequate shelter, water and food. Councilwoman Cape felt the 3 hour time limit could be a complaint-driven process which could be documented by neighbors. Mr. Euler said that could be included in the ordinance if that is the wish of Council.

Councilwoman Cape wondered if we could provide a one-page informational sheet on how to build a chicken coop. She suggested that we have a process similar to the dog license permit renewal for renewal of chicken permits. She suggested a complaint-driven process, not only on the tethering portion of the ordinance, but the entire animal control ordinance.

Regarding the public nuisance section of the ordinance where "no person shall knowingly or willingly leave or store any refuse, food product, ... which would constitute an attractant to any wild animal ..." Councilwoman Cape suggested language be inserted to reflect that this is a temporary ban, not long-term as the proposed ordinance currently implies.

In response to Councilwoman Cape about it being unlawful to trap a wild animal, Police Chief Hogan said that the Police Department refers people to pest control companies that provide that service for a fee. He further explained that the reason why language is in the ordinance making it unlawful to trap a wild animals in the City limits is to comply with State law. State law prohibits the trapping and transporting of wild animals.

Councilwoman Cape was pleased to see the requirement for people to clean up after their animals.

Upon inquiry of Councilwoman Cape, Mr. Euler explained that staff tried to incorporate an either/or situation if a person does not have a 10-foot buffer lot line for a cage or pen. He explained that the cage or pen needs to be 10-feet from the outer limits of the lot; however, this setback requirement shall not be applicable where the placing of the cage or pen within the 10-foot area does not result in locating the cage or pen within 50 feet of the nearest household.

Councilman Mumpower moved to approve the animal control ordinance as recommended by staff. This motion was seconded by Councilwoman Cape.

Councilman Mumpower felt staff tried to find a point of balance with this ordinance and tried to afford people the liberty to have pets in Asheville and sources of food in a measured way that will limit intrusions on their neighbors but provide opportunity.

Councilman Mumpower understood that although this ordinance is not targeted at people trying to feed birds, the language attempted to limit bear incidents could be viewed as a heavy hand by the City. He said that drug dealers in public housing represent a much more dramatic threat and enforcement of that would be a better place to invest our energies. In response, Mr. Euler said that they did research other language and that staff was trying to target specific neighborhoods because if multiple bears continue to stay in an area, the issue of food could be a concern.

Regarding the concern of bear incidents, City Attorney Oast suggested amending Section 3-9 (a) (6) (a) to reflect that "knowingly or willingly" be a condition that exists only after the person has been told not to leave or store any refuse, etc. and they not be in violation of the ordinance until after a period of time after they have been told not to leave or store any refuse, etc. That way, you would only be in violation of the ordinance if there has been a report of a bear, or other wild animal, and you have been told to take your dog food in, secure your garbage, etc. and you still don't comply.

Councilwoman Cape asked that the suggested language begin with a phrase similar to "Having identified a situation by the Animal Control Officer ..." or "In emergency situations ..." or "If you are approached by an Animal Control Officer who has asked you to cooperate ..." City Attorney Oast said that he would craft on some language that Council could incorporate into the ordinance.

Councilman Mumpower and Councilwoman Cape accepted City Attorney's Oast suggestion of the amendment to Section 3-9 (a) (6) (a) as a friendly amendment to the main motion.

At 7:58 p.m., Mayor Bellamy explained the public hearing rules as follows, noting this is on the printed agendas: (1) applicants have up to ten minutes to complete a presentation; (2) electronic presentations are limited to agenda items with presentation materials provided prior to

the meeting by city staff, applicants, or organized opposition; (3) individuals have up to three minutes to speak to city council; (4) a person representing a group of three or more persons (not including the speaker) present in the council chamber has up to 10 minutes to address City Council; (5) public comment period for any item may not exceed one hour; and (6) additional information may be provided in hard copy and/or written form.

Ms. Peggy Irwin, representing ChainFree Asheville, provided Council with the following PowerPoint in which she said during the past six months they have freed 12 dogs from chains; developed a base of 300 people who supports them with time, labor and funds; and helped 50+ families who have received doghouses, vet services and backyard fog information.

The problem is that the current animal control ordinance allows the continuous chaining of dogs. She outlined the issues which include public safety, public nuisance, irresponsible pet ownership, cruelty and dog fighting.

Experts say do not chain. The U.S. Dept. of Agriculture (USDA) ... concluded that continuous confinement of dogs by a tether is inhumane. In 1997, the USDA ruled that people and organizations regulated by the Animal Welfare Act cannot keep dogs continuously chained. The American Veterinary Medical Association has also stated "Never tether or chain your dog because this can contribute to aggressive behavior. The Center for Disease Control concluded in a study that the dogs most likely to attack are male, unneutered, and chained. The Humane Society of the United States said "A chained animal is caught in a vicious cycle; frustrated by long periods of boredom and social isolation. He becomes a neurotic shell of his former self – further deterring human interaction and kindness. In the end, the helpless dog can only suffer the frustration of watching the world go by in isolation – a cruel fate for what is by nature a highly social animal. Any city, county or state that bans this practice is a safe, more humane community.

Myths and fears include (1) more dogs will roam the streets or be taken to shelters – A study of 12 communities show this is not true; (2) amendment will negatively affect low income people – (a) A 6 month educational period will be in place; and (b) a fence costs $300 – a lease is $3; (3) cable runners are okay – dogs still vulnerable, become entangled and aggressive; and (4) puts more workload on animal control officers – (a) other communities experience small increase then leveling off; and (b) ChainFree Asheville's partnership with City will help officers.

The solution is (1) prohibit tethering of dogs unless the owner is present – "attended tethering"; (2) require pen sizes of at least 200 feet for dogs larger than 20 pounds; and (3) implement a citizen observer program (a) has worked in other cities; (b) volunteers assist animal services officers; (c) "eyes and ears" – proactive; and (d) free.

Six reasons to enact their proposed amendments include (1) keep the public safe; (2) help decrease a public nuisance; (3) limit inhumane treatment; (4) help with dog fighting identification; (5) enhance image of Asheville; and (6) create an "Eyes and Ears" Program for the City.

ChainFree Asheville wants to work with the City to (1) help educate residents about the ordinance; (2) work with dog owners to find solutions; (3) teach people how to build fences; and (4) continue building fences and helping dogs in whatever way they can.

Ms. Jennie Mercer, representing the Steering Committee for Asheville City Chickens explained how they have gathered data from extension agents, public health officials and other municipalities that have successfully permitted chickens. They feel the ordinance is a reasonable compromise and a step in the right direction. She spoke about the benefits of family chickens as they provide nutritious, clean, inexpensive food and they are energy efficient. She then addressed some of the misconceptions of having chickens in the City, most of which have to do with larger agricultural settings. Roosters are noisy so staff clearly prohibited roosters in the City.

Hens are quiet. Commercial poultry operations have a bad odor; however, a small number of hens generate less manure than a medium sized dog and the ordinance requires the coop be clean and sanitary. She then outlined the extensive research on the fear of avian flu. Like all animals, they carry some diseases, but the rate of transmission to humans is so low as to be insignificant, particularly in a well-maintained coop. In the unlikely event of an outbreak, it is of paramount importance that flocks be permitted so that the Health Department can address this situation.

Mr. Scott Barnwell, also representing the Steering Committee for Asheville City Chickens, discussed the enforcement of the ordinance, along with the potential associated costs. A well crafted ordinance can actually lower enforcement costs. Roosters are the number one complaint in all areas that allow fowl and that is the reason they support no roosters in the City. He gave a few examples of the code enforcement violations from other cities associated with urban chickens, which was minimal. Asheville City Chickens has worked with City staff over the year on the very sincere public input process. If the ordinance is passed they hope to work with coop owners to help make sure they are in compliance with the ordinance, with continued emphasis on positive neighborhood and community relations. Some of the reasons to support hens include allowing people to produce a very healthy local food, protecting private property rights, educating our children about where food comes from, and also to support Council's Strategic Operating Plan to make Asheville a more affordable city. He urged City Council to support this proposed ordinance. He hoped Asheville City Chickens will be a resource to help provide some of the additional education outreach that is so critical to an ordinance being successfully enforced.

Mr. Fred English, east Asheville resident, supported tethering dogs and provided Council with a list of over 140 poultry diseases as he spoke against allowing chickens.

The following individuals spoke in support of banning and eliminating the tethering of dogs:

Young lady named Jennifer
Ms. Leslie Armstrong (provided Council with a list of North Carolina municipalities that have passed restricted or complete banned tethering ordinances)
Ms. Holly Newton, Asheville resident
Founder and CEO of Dogs Deserve Better and Mothers Against Dog Chaining Initiative
Mr. Mike McCreary
Mr. Bob Sinclair
Ms. Paige Henretta
Ms. Warren, Vice-President of Brother Wolf Animal Rescue
Mr. Patrick Erwin (read statement from Ms. Janice Smith)
Mr. Jim Palmer

The following individuals spoke in support of reducing restrictions for the keeping of chickens:

Mr. Brad Brock, north Asheville resident
Ms. Ashley English, author of a book on raising chickens
Ms. Diana Canter, Communications Director for the Buncombe County Republican Party (read letter of support from Chairman)

Mr. Jaquette, Owner of Wild Birds Unlimited, felt the reference to bird feeding in the City is too broad and too vague. Bird feeding is the second biggest hobby in the United States behind gardening. Asheville also is a bird sanctuary. He understands that the ordinance does not say people can't feed birds and that it's a temporary ban when there are identified bear problems, but the ordinance as written will be misinterpreted. He offered his assistance in a public education program. He understood the need behind the ordinance is to promote responsible bird feeding and through public education we can make responsible bird feeding a part of Asheville.

Ms. Cheryl Zoller felt the reference to bird feeding is too vague in the ordinance and urged Council to not ban bird feeders, but to educate the public on being responsible bird feeding.

When Mayor Bellamy asked if the section regarding bear incidents could be separated from the vote for further discussion, City Attorney Oast said Council could; however, he offered the following amendments: (1) under Section 3-7 (Powers and limitations of the Animal Control Officers), that the Animal Control Officer be empowered to issue warnings regarding the presence of bears or other wild animals in a direct area to residences to remove attractants including, but not limited to, pet food, garbage, refuse and other foods and limiting the duration of that order for no more than 60 days; and (2) delete the proposed public nuisance Section 3-9 (a) (6) (a) and in it's place insert "After receiving a warning or directive to remove attractants from a City of Asheville Animal Control Officer, leaving or storing attractants or foods in a manner contrary to such warning or directive."

Councilman Mumpower and Councilwoman Cape accepted City Attorney's Oast suggestion of the amendments to Section 3-7 and Section 3-9 (a) (6) (a) as a friendly amendment to the main motion.

Mayor Bellamy asked that if this proposed ordinance is approved that time be spent on discussing the issue of bird feeders for possible amendment. She suggested Council be provided with a 6-month review of this ordinance for possible revisions.

Councilman Newman suggested language be inserted that we recognize that we live in an area where there are bear incidents and this is in no way meant to generally prohibit or discourage bird feeders. City Attorney Oast felt the amendment accepted by Councilman Mumpower and Councilwoman Cape addresses the concerns people had about not knowing that "knowingly and willing" was and about it being a time limited prohibition.

In response to Councilman Mumpower, Police Chief Hogan said that he would be happy to meet with some of the leadership of ChainFree Asheville and create a special volunteer program. They could be in charge of recruiting and suggest ideas on how we can work together on things that they could do to help us and to protect dogs that are chained. He appreciated what they are doing in terms of building fences for people. If there is a complete ban of tethering, there will be a problem with deed restrictions in neighborhoods that prohibit fencing, but they will work with ChainFree Asheville to find some solutions.

Vice-Mayor Davis was concerned about the enforcement problems associated with these amendments, especially during this difficult budget time. He explained why he supported banning tethering, and why he could not support reducing the restrictions on fowl. He offered a friendly amendment that this be reviewed in 6 months to see how it is working from a cost standpoint, from an enforcement standpoint.

Councilman Mumpower accepted Vice-Mayor Davis' friendly amendment that this ordinance be reviewed in 6 months to see how it is working from a cost and enforcement standpoint.

When Councilwoman Cape withdrew her second to the main motion, Councilman Newman seconded the main motion with the two friendly amendments.

Councilman Miller supported the amendments proposed by staff, except he explained why he supported a complete ban on tethering dogs. Tethered dogs knock over their water, they bark constantly, and when they are left off their chains they do not know how to interact with people. There are responsibilities that come with dog ownership regardless of your income range. If there was no complete ban on tethering, he would support a 1-3 hour time limit on tethering, but the problem is enforcement.

When Mayor Bellamy questioned what the funding source was for the additional $39,000 for two more Animal Control Officers, Police Chief Hogan said that finding the funding source is the challenge.

Councilman Mumpower said it was his assumption that the people who are benefitting from changes in the ordinance would be assuming responsibility for enforcing the provisions. Police Chief Hogan said that it would help, but we can't be assured, not knowing how many people will want chickens, if that would generate sufficient funds to pay for an Animal Services Officer. In all fairness, it is an unknown of the demand that this will put on the Animal Control Officers. That is why he suggested replacing the one position that is frozen now and the one position they intended on deleting from the budget next year. He felt it would be appropriate to restore the Animal Control Services to four people and then see if it fits the need. If not, he will bring back statistics for call load. He did note that because of the two vacancies, that has eliminated the educational component for people to do the right things with their pets. We are answering calls for service and not being proactive with education.

Mayor Bellamy asked City Manager Jackson to provide Council with a copy of the fees and charges associated with this ordinance, e.g., the cost for a chicken permit, is the chicken permit an annual fee, etc.

Councilwoman Cape moved to offer an amendment to the main motion (1) to delete Section 3-12 (i) and insert the following language that there will be no tethering except with an attended leash: "Tethering is prohibited. Tethering is defined as tying or fastening a dog outdoors on a rope. This shall not include tying out or fastening a dog outdoors on an attended leash. Attended leash means that the tethered dog is in visual range of the responsible party."'; and (2) amend Section 3-9 (a) (3) to allow the cage or pen be within 35 feet (not 50 feet) of the nearest household occupied by persons other than the owner or keeper of the cage or pen; and (3) no annual inspection for chickens unless it was complaint driven, but an annual fee for licensing chickens; and (4) amend Section 3-4 to delete the definition of T-Runner.

Councilman Mumpower did not accept Councilwoman Cape's friendly amendment.

Councilman Newman suggested Councilwoman Cape offer a friendly amendment just focusing on the tethering issue.

Councilwoman Cape wondered if the City of Asheville could be held liable for training animals to be vicious and dangerous.

Councilwoman Cape moved to amend the main motion to only allow attended tethering. This motion was seconded by Councilman Miller.

Councilman Newman supported a goal that in Asheville's future we don't have chained dogs. If there is a majority of Council that supports this goal of moving in this direction in the future, Council should direct the City Manager to work towards that goal. However, if Councilwoman Cape's motion passes, he wants to make sure the resources are available to assist people who don't have the finances to build fences and that the City not enforce the ordinance against them unless the resources are there to support them. ChainFree Asheville has said they are committed to making sure that those funds will be available which will be raised by the citizens in the community who care a lot about these issues. He would support continuing the dialogue, making sure that there is some type of ongoing program in place to make sure we can support people in achieving that goal.

Councilwoman Cape wondered if we could craft the ordinance to read that individuals who are identified as having animals on tethers and who refuse the help of a community group to build fences would face the citation. If, however, the community group cannot build the fence,

then the citation is not given. City Attorney Oast responded that he would need to do additional research on this question.

City Attorney Oast said that tethering seems to be the issue, so he suggested Council move forward on the other parts of the ordinance and let staff come back to Council with a recommendation on how to address issues Council has raised.

Councilman Russell supported the main amended motion and that staff be directed to review the information available from other North Carolina municipalities that have passed tethering ordinances.

When Mayor Bellamy called for a vote on Councilwoman Cape's motion to amend the main motion to only allow attended tethering, said motion failed on a 2-5 vote, with Councilwoman Cape and Councilman Miller voting "yes" and Mayor Bellamy, Vice-Mayor Davis, Councilman Mumpower, Councilman Miller and Councilman Russell voting "no."

City Attorney Oast restated the main motion which Councilman Mumpower made and Councilman Newman seconded to approve the animal control ordinance as presented by staff, with the following amendments: (1) under Section 3-7 (Powers and limitations of the Animal Control Officers), that the Animal Control Officer be empowered to issue warnings regarding the presence of bears or other wild animals in a direct area to residences to remove attractants including, but not limited to, pet food, garbage, refuse and other foods and limiting the duration of that order for no more than 60 days; (2) delete the proposed public nuisance Section 3-9 (a) (6) (a) and in it's place insert "After receiving a warning or directive to remove attractants from a City of Asheville Animal Control Officer, leaving or storing attractants or foods in a manner contrary to such warning or directive." ; and (3) the ordinance be reviewed in 6 months to see how it is working from a cost and enforcement standpoint.

Councilman Newman moved to amend the main amended motion (1) to defer the provisions on tethering in the current ordinance until City staff reports back to Council within 30-60 days; (2) instruct staff to bring back to Council some recommendations on achieving a future goal where 24/7 tethering will not be permitted in Asheville; and (3) instruct staff to bring back some recommendations on making sure that people who do not have the resources to build a fence are not penalized as a result of this ordinance. This motion was seconded by Councilman Miller.

In response to Councilman Mumpower, Mr. Euler said that City staff has benchmarked the issue of tethering. Two ordinances (Raleigh and Durham) that have some sort of tethering ban are in grace periods so they were not able to determine how that has affected their operations.

Animal Control Officer Brenda Sears explained how she has dealt with a lot of these issues brought up. Many of the issues are animal cruelty and not necessarily a tethering issue. Just because you take tethering out of the equation doesn't mean you are eliminating the animal cruelty component.

When Mayor Bellamy called for a vote on Councilman Newman's amendment to the main motion, said motion carried on a 5-2 vote, with Councilman Mumpower and Councilman Russell voting "no."

Councilman Mumpower then withdrew his motion on the main motion.

Councilwoman Cape moved to approve the animal control ordinance as presented by staff, with the following amendments: (1) under Section 3-7 (Powers and limitations of the Animal Control Officers), that the Animal Control Officer be empowered to issue warnings regarding the presence of bears or other wild animals in a direct area to residences to remove attractants

including, but not limited to, pet food, garbage, refuse and other foods and limiting the duration of that order for no more than 60 days; (2) delete the proposed public nuisance Section 3-9 (a) (6) (a) and in it's place insert "After receiving a warning or directive to remove attractants from a City of Asheville Animal Control Officer, leaving or storing attractants or foods in a manner contrary to such warning or directive."; (3) the ordinance be reviewed in 6 months to see how it is working from a cost and enforcement standpoint; (4) to defer the provisions on tethering in the current ordinance until City staff reports back to Council within 30-60 days; (5) instruct staff to bring back to Council some recommendations on achieving a future goal where 24/7 tethering will not be permitted in Asheville; and (6) instruct staff to bring back some recommendations on making sure that people who do not have the resources to build a fence are not penalized as a result of this ordinance. This motion was seconded by Councilman Miller and carried on a 5-2 vote, with Vice-Mayor Davis and Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 25 – PAGE 258

B. RESOLUTION NO. 09-79 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH SUTTON-KENNERLY AND ASSOCIATES TO CONDUCT AN EXTERIOR INSPECTION FOR WATER INFILTRATION IN THE CITY BUILDING AND TO PROVIDE CONSTRUCTION DRAWINGS FOR ANY NEEDED REPAIRS

Superintendent of Parks & Public Facilities Kathy Connor said that this is the consideration of a resolution authorizing the City Manager to enter into a contract with Sutton-Kennerly & Associates to conduct an exterior inspection for water infiltration in the City Building.

City of Asheville City Building is a recognized local historic landmark and is a contributing building in the Downtown Asheville National Register Historic District. The structure was designed by Douglas Ellington and built in 1926-1928. Visual observations on the seventh and eighth floors indicate there is some amount of water intruding into the building at various locations. Considering the age and the historical significance of this building to the community, a qualified professional firm needs to be retained to thoroughly review the condition of the exterior of the building as well those portions of the structural support system, and to be to provide construction drawings for any repair work necessary.

The City conducted a request for qualifications for this project and Sutton-Kennerly & Associates was selected as the most qualified firm to conduct this exterior inspection because of their extensive work with similar historically significant structures. Sutton-Kennerly's offices are located at 530 Hendersonville Road in Asheville NC. The negotiated cost for the City Building Exterior Inspection project is for an amount not to exceed $77,940.00. The cost for the construction drawings will be negotiated once the cost of repairs is known.

This action complies with the City Council Strategic Operating Plan in that it supports and enhances basic city services and is part of the public facilities maintenance program to make facility improvements. It is also consistent with the Asheville City Development Plan 2025 which indicates the preservation of Downtown Asheville's historic buildings as a goal.

Pros:
- Provide funds to investigate exterior building conditions of the City Building and estimate the cost for repairs.
- Fulfill commitment to repair and maintain aging infrastructure.
- Preservation of an historic landmark.

Con:
- Potential fiscal impacts beyond this initial study should the facility require repair.

Funding in the amount of $85,000.00 for conducting an exterior inspection for water infiltration in the City Building was approved by City Council in the FY 2007-2008 capital

improvement budget. There is currently no additional funds budgeted to cover the cost of the potential repair work.

City staff recommends City Council to adopt a resolution authorizing the City Manager to enter into a contract with Sutton-Kennerly & Associates to conduct an exterior inspection for water infiltration in the City Building for an amount not to exceed $77,940.00, and to provide construction drawings for any needed repairs. The cost for the construction drawings will be negotiated once the cost of repairs is known.

When Mayor Bellamy asked for public comments, none were received.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Miller moved for the adoption of Resolution No. 09-79. This motion was seconded by Vice-Mayor Davis and carried unanimously.

RESOLUTION BOOK NO. 32 – PAGE 30

C. RESOLUTION NO. 09-80 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE A CONTRACT WITH BROWN AND CALDWELL ENVIRONMENTAL ENGINEERS FOR COMPLETION OF THE SWANNANOA FLOOD RISK MANAGEMENT PROJECT

Director of Transportation & Engineering Cathy Ball said that this is the consideration of a resolution authorizing the City Manager to execute a contract with Brown and Caldwell Environmental Engineers for the completion of the Swannanoa Flood Risk Management Project not to exceed $1,437,000.

One hundred percent of the funding for this project is through the Hurricane Recovery Act of 2005 (Senate Bill 7) allocated funds for planning and implementation of projects to aid in flood damage reduction for North Carolina communities hardest hit by the 2004 hurricane season. Staff is asking for consideration for the contract to be phased in order to allow the project to be used as a match for a cooperative agreement with the Corp of Engineers.

The Hurricane Recovery Act of 2005 (Senate Bill 7) allocated funds for planning and implementation of projects to aid in flood damage reduction for North Carolina communities hardest hit by the 2004 hurricane season. The Biltmore Village area of the City of Asheville (within the Swannanoa River watershed) was named as a recipient of this funding. From December 2005 through August 2006 a planning study was conducted to identify and prioritize flood damage reduction projects for implementation in the community. This planning study was conducted by the North Carolina Department of Environment and Natural Resources Division of Water Resources (DWR) and stakeholders from the Biltmore Village, City of Asheville and the Swannanoa watershed, with the assistance of a project consultant. In September 2006, expenditure of funding for implementation of this Plan was reviewed without objections by the NC Government Operations Committee.

Flood damage reduction stakeholders, DWR, and the project consultant agreed through the aforementioned planning study that the development of a watershed-wide program for comprehensive flood damage reduction was a top priority action for Biltmore Village and the Swannanoa River Watershed. To achieve this goal, the City of Asheville issued a request for proposals (RFP) from qualified engineering firms experienced in the design and management of such projects. The RFP directed that the Engineer provide technical assistance to the City of Asheville, North Carolina, to develop a Feasibility Study for flood damage reduction on the Swannanoa River watershed. The Feasibility Study will be a complete decision document, which presents the results of the feasibility phase and provides the basis for recommending the

construction of a project and preparation of Plans and Specifications. The feasibility study will present recommendations for the City of Asheville. The Engineer will complete the project through detailed coordination at the direction of the City of Asheville and in compliance with applicable laws, regulations, policies, and the project management plan.

The project will be conducted in three phases:

- Phase 1 – Watershed Modeling, Economic Analysis, and Project Development
- Phase 2 – Investigation / Implementation
- Phase 3 – Future conditions mapping

A proposal selection committee, comprised of representatives from the City of Asheville, the Town of Black Mountain, and Buncombe County, selected a team proposed by Brown and Caldwell as the most qualified of the submitting firms. In the Brown and Caldwell proposal and in subsequent interviews with the selection committee, Brown and Caldwell proposed an approach designed to accomplish an aggressive schedule, focus on the most promising flood risk reduction opportunities, and anticipate the available implementation funding sources.

In consultation with the City of Asheville staff, the selection committee, the North Carolina Division of Water Resources, the U.S. Army Corps of Engineers (USACE), and other agencies, a Scope of Work was developed to guide the successful completion of this important project. The services and deliverables are provided in three phases as specified in the City's RFP. In order to achieve the most cost-effective and timely project execution, the phases will be executed concurrently.

This action complies with the City's plans and commitments to administer $2.5M of Senate Bill 7 funding consistent with a contract executed with the North Carolina Division of Water Resources on (date of execution). This request meets Council's strategic goal of partnering with local experts, particularly the University of North Carolina at Asheville.

The contract with Brown and Caldwell includes a thirty-four percent local participation and five percent minority business participation.

The Flood Damage Reduction Task Force has endorsed this request.

Pros:

- Approval of this action will allow the City to move forward with development of a plan to reduce and better manage the flood risks in the Swannanoa floodplain.
- The project's scope of work identifies improvements in flood warning capabilities that will be implemented for this year's tropical storm season.
- The cooperation of the U.S. Army Corps of Engineers and execution of a Federal Cost Sharing Agreement will position our community to receive Federal investment in flood control projects.
- Over one-third of the work will be completed by local firms and by NEMAC/UNC-Asheville. Approximately 6% of the work will be performed by local minority and women-owned businesses. Brown and Caldwell will direct supply purchases and support services to qualified local minority business where practical. This represents an opportunity for those firms to increase their professional experience and train their staffs in new skills.
- Project allows support for RENCI engagement site in downtown.

Cons:

- The City's responsibilities during the project will require an approximately 20% full-time equivalent (FTE) staff assignment from the Engineering Department over the coming year.

- It is expected that most of the flood risk reduction projects will be implemented in the Swannanoa watershed outside the City limits and ETJ.
- Funds from this project fund one year of a multi-year lease, Funding for the remaining years will need to be identified in future years. The lease with the Grove Arcade Public Market Foundation can be terminated if funding is not available in future years.

The funds to be expended have been provided by the State in compliance with the Hurricane Recovery Act of 2005. City staff will provide project management oversight and will participate in a series of project meetings and workshops, public meetings, and meetings with regulatory agencies. Approximately 20% FTE staff assignment will be required. The in-kind cost associated with 20% FTE is approximately $20,000.

Council previously approved a budget amendment for the Hurricane Recovery Act of 2005 (Senate Bill 7) allocated funds.

Staff requests adoption of a resolution authorizing the City Manager to execute a contract with Brown and Caldwell Environmental Engineers for the completion of the Swannanoa Flood Risk Management Project not to exceed $1,437,000. Staff is asking for consideration for the contract to be phased in order to allow the project to be used as a match for a cooperative agreement with the Corp of Engineers.

In summary, Ms. Ball reviewed the following PowerPoint presentation. She gave a brief history of the project in that in September 2004 with Hurricane Frances and Ivan (1) 115 structures, 110 commercial, 5 residential; (2) $83 Million lost in tourism money; (3) Extensive property damage in Biltmore Village; (4) Two emergency life rescues on Swannanoa River; (5) City's water supply interrupted for three days; (6) Damage to 39 historic structures; (7) Hurricane Recovery Act 2005 (SB 7) - Supported by local delegation; (8) State appropriated $30 M to WNC; (9) City entered into agreement for $4.6 M with DWR on 04/04/2007; and (10) City agreed to serve as lead agency in partnership with Buncombe County and Town of Black Mountain.

The Swannanoa Watershed - $4.6 Million – revealed (1) $2.5 M Flood Risk Management Project; (2) $2.0 M Land Acquisition; (a) Purchased over $1 M property on Swannanoa River Road; and (b) Demolition to begin in next six weeks; (3) $75 K Biltmore Village Flood Action Plan; (a) Work completed by Corp of Engineers; and (b) Funding 50% matched by Corp of Engineers; and (4) $50 K Debris Removal (a) Work completed by Buncombe County.

Addition work completed (1) Developed flood operations plan for Burnette Dam; (2) Updated emergency action plans for Burnette and Bee Tree Dams; (3) Implemented flood warning system; and (4) Formation of Regional Flood Damage Reduction Task Force.

She then explained that a Flood Risk Management Plan is a project that evaluates various ways of reducing flood damage by: (1) Engineering analysis; (2) Inventory and survey structures; (3) Identify and analyze flood mitigation opportunities; (4) Developing cost/benefit analysis; (5) Create eligible projects (State and Federal Funding); and (6) Produce future floodplain mapping.

We are doing the project now (1) To prepare for next flooding event; (2) To avoid losing existing funding; (3) To prepare for implementation funding; (a) Additional $1 M from Senate Bill 7 appropriation; (b) Additional $3 M from State; (c) Additional $7.5 M from Corps of Engineers; and (d) Additional Economic Stimulus Funding; and (4) To stimulate local economy – 34% project for local jobs ($500 k).

The total project cost will not exceed $1,437,000. These costs include:

- Project Management and Quality Control 7.5%
- Agency Coordination and Public Involvement 8.6%

- Data Collection and Model Verification 7.1%
- Flood Damage Assessments 31.6%
- Engineering Evaluation of Projects 18.5%
- Plan Formulation and Benefit/Cost Analyses 23.2%
- Future Floodplain Mapping 3.5%

The money is paying for (1) Analysis of 85,000 acre watershed; (2) Flood Damage Assessment of over 1500 structures; (a) Up to 850 to be inventoried and surveyed; (b) Content value estimates and appraisals; and (c) Flood Proofing Analyses; (3) Over two dozen project opportunities already identified; and (4) Benefit/Costs Analyses of alternative plans.

Regarding who will pay for the project (1) 100% of funding from the North Carolina Hurricane Recovery Act of 2005 – SB 7 (Supported by local delegation and DENR); (2) No cash local match required; and (3) Estimated City staff time (20% of FTE or $20 K).

The deliverables of the project include (1) Significant public engagement during the project; (2) Extend floodplain models; (3) Upgrade of flood warning system; (4) GIS based inventory of structures, including formal or informal appraisals of property; (5) Extension of Biltmore Village Flood Action Plan; (6) Analyzing up to 24 project opportunities; and (7) Preliminary engineering and environmental assessments for approximately six projects.

Community partners include (1) UNCA (RENCI) – 10% percent of project – Includes some funds for downtown engagement site; (2) Local delegation; (3) Flood Damage Reduction Task Force; (4) Buncombe County and Town of Black Mountain; (5) United States Army Corp of Engineers; and (6) North Carolina Department of Environment and Natural Resources, Division of Water Resources.

The project involves local partners and has a commitment to use local and minority resources for additional services and supplies.

Next steps include (1) begin project; (2) formal partnering with the Corp of Engineers (agreement to Council in May 2009); (3) community engagement; (4) upgrade Automated Flood Warning System; (5) identify immediate projects; and (6) finalize preliminary engineering reports.

This action complies with Council's strategic goals as follows: (1) Safe – Reduce threat to life and property due to flooding; (2) Affordable – Protect affordable housing and businesses in floodplain; (3) Sustainable - Allow for recreational, educational and artistic uses to be incorporated into projects; (4) Green – Many projects will improve water quality; and (5) Fiscally responsible – Projects will be evaluated on a cost/benefit analysis.

Ms. Mary Leonard White, Chair of the Flood Damage Reduction Task Force, spoke in favor of the resolution as this project will approaches all levels of threatening floods.

Ms. Ball responded to several questions raised by Councilman Newman, some being, but are not limited to: do these funds have to be used for planning purposes or could they be spent on other things that would make a positive difference in the watershed; is there anyway we can spend less on the analysis work that might have margin returns and more on implementation; is it staff's opinion that if we proceed in this process the outcome will be real projects that are feasible and cost effective that will reduce the future impact of flooding in our community; and will the process also look at other solutions, other than engineering fixes to the problems.

Ms. Ball outlined some of the potential projects: Lake Craig rehab; Sweeten Creek Detention and Channel improvements; conveyance improvements near new bridge in Biltmore Village (and elsewhere); Warren Wilson College and Quarry Projects; Left Fork Road – (water supply protection); automated flood warning system upgrades; emergency action plans for 14 regulated dams; and localized flood proofing.

Councilman Mumpower felt this is a significant waste of tax money for a study. Every study on flood control cites the prevention is keeping rivers clean. After four years and $50,000, we have only cleaned up a marginal part of the river.

Councilman Miller spoke in support noting that over 800 structures in the Swannanoa floodplain between Montreat and Biltmore Village will be inventoried for the project's economic analysis. The flood risks and potential damages to each of these structures will be quantified. Structures that are within the designated floodway will be identified. The inventory of structures will be analyzed to determine which ones may be flood proofed or otherwise protected by non-structural measures. With the loss of millions of dollars from flooding, he felt this is a good first start.

Councilwoman Cape supported this initiative in that we have the ability to take this money and do what is necessary for the region watershed.

Mayor Bellamy said that back in 2004 Mr. Chuck Tessier said that the City and County needed to "immediately appoint a flood commission from both private and public sectors. The commission should first identify what resources can immediately be made available to help those in need and secondly identify how the resources can best be used to rebuilt in a way that helps fix the problem and not make it worse. The flood commission needs to create a plan of action that will significantly change these areas of devastation, integrating the long-term objectives of flood control, transportation, economic development, recreation and environmental preservation." She acknowledged that since 2005 Council has appointed the Flood Damage Reduction Task Force. Not only has the commission been established, we have put in rain gauges to help monitor water; we have applied for Environmental Protection Agency grants to help clean up a brownfields area along the Swannanoa River; and we have worked with the N.C. Dept. of Transportation for engineering funds to look at the roadway system. This is another layer of how we are addressing the problems that we have in this watershed. Even though these processes have not been fast, they have been steady.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilwoman Cape moved for the adoption of Resolution No. 09-80. This motion was seconded by Councilman Miller and carried on a 6-1 vote, with Councilman Mumpower voting "no".

RESOLUTION BOOK NO. 32 – PAGE 31

D. RESOLUTION NO. 09-81 - RESOLUTION AUTHORIZING THE CITY MANAGER TO APPROVE CHANGE ORDERS FOR THE ELEVEN WATER REVENUE BOND PROJECTS

ORDINANCE NO. 3732 - BUDGET AMENDMENT FOR WATER SYSTEM IMPROVEMENTS AND WATER REVENUE BOND PROJECTS

Interim Water Resources Director Robert Griffin said that this is the consideration of a resolution by City Council authorizing the City Manager to sign change orders increasing the project budgets and contract amounts totaling $38,331,310.67 for the eleven Water System Improvement Projects to $39,235,036.67, or an increase of $903,726.00.

On August 26, 2008, the City Council approved increasing the revenue bond construction project budgets and contract amounts to $38,331,310.67.

Numerous issues have arisen since then that could not be accounted for. These issues include but are not limited to rerouting lines due to encountering unknown underground utilities; additional easement, right-of-way and property acquisitions; encountering subsurface rock which required removal; changes in N.C. Dept. of Transportation (NCDOT) roadway repair requirements; and unsuitable subsurface conditions that required placement of crushed stone backfill. These issues have resulted in unplanned work requirements and time delays, which lead to a necessary increase in the contract amount from $38,331,310.67 to $39,235,036.67.

Funding is currently available in other capital projects to cover this adjustment. A capital project includes from 10% to 15% contingency, based on the project and complexity. Contingencies for unforeseen expenses that were not needed and lower than anticipated costs allow these funds to be reallocated from completed projects, so no other projects will require a delay. The redistribution of funds from other capital projects is temporary until some of the bond projects can be closed out and unspent contingencies and lower costs can be released. The sum of these budget amendments reflects an approximate 2.36% adjustment.

This project is part of the City Council strategic plan to improve City infrastructure.

Pro:

- Approval of the increase in contract amount will allow completion of the eleven water system improvement projects in a timely manner.
- These projects meet the City's goal to systematically repair / replace the aging water system infrastructure, improve the reliability of water service to affected customers, and improve available fire protection.
- The escalation of maintenance and repair costs for the aging water infrastructure will be reduced creating a more efficient system, which will reduce energy costs and the City's overall carbon footprint.

Con:

- Failure to approve the increase in contract amount will result in major changes in the scope of these projects, which would require some of the projects to be only partially completed resulting in failure to achieve the intended goals of the projects.

The budget for the eleven Water System Improvement Projects is currently at a total cost of $38,331,310.67. The $903,726.00 total in change orders will increase the total project budget to $39,235,036.67. These funds must be temporarily reallocated from other capital projects until savings are realized on the bond projects and can be credited back to those other projects.

City staff recommends City Council adopt a resolution authorizing the City Manager to sign change orders for $903,726.00 additional increasing the total contract amount of $38,331,310.67 for the eleven Water System Improvement Projects to $39,235,036.67 and further allow staff to move the additional funds as needed between the 11 projects as cost estimates come in higher or lower than expected.

Councilman Mumpower said that he would continue to vote against projects as long as the current realities continue to unfold in that most of the sites where the City is repairing its water system very few, if any, people speak English. That does not mean that they are all here illegally, but statistically it means a significant number of them probably are. He felt it was irresponsible of the City to be supporting initiatives of any sort that don't hire legal citizens.

When Mayor Bellamy asked for public comments, she received none.

Mayor Bellamy said that members of Council have been previously furnished with copies of the resolution and ordinance and they would not be read.

Councilman Miller moved for the adoption of Resolution No. 09-81. This motion was seconded by Councilman Russell and carried on a 6-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 32 – PAGE 32

Councilman Russell moved for the adoption of Ordinance No. 3732. This motion was seconded by Councilman Miller and carried on a 6-1 vote, with Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 25 – PAGE 282

Mayor Bellamy asked Council be provided the City's street repaving schedule. In addition, she asked that information be made available on the City's website and in its newsletter.

Vice-Mayor Davis said that he has talked with several merchants in the downtown area who were pleased with the communication efforts regarding waterline repairs in that area.

City Manager Jackson noted that this will be the last week Interim Water Resources Director Robert Griffin will be in the interim position as a new director arrives next week. He thanked Mr. Griffin for his outstanding job in this role.

E. ENDORSEMENT FOR THE CITY OF ASHEVILLE'S PARTICIPATION IN THE APPLIED SOLUTIONS COALITION AND ENDORSEMENT OF THE READING, RIDING AND RETROFIT PROJECT CONCEPT

Councilwoman Cape, speaking on behalf of the Asheville-Buncombe Sustainable Community Council (ABSCC), said that the Asheville HUB, our regional economic development alliance, created the Asheville Buncombe Sustainable Community Council (ABSCC) this year in response to an Economic Development Overview Study, which concluded that sustainable community development is essential to the healthy economic development of the region. ABSCC membership consists of private entities (Biltmore Estate, local energy businesses), public organizations (Buncombe County, City of Asheville, Land-of-Sky Regional Council, Advantage West), non-profit groups (Kleiwerks), and institutional partners (Asheville-Buncombe Technical College, Warren Wilson College, University of North Carolina Asheville).

ABSCC has endorsed four main initiatives:

- Development of a community-wide Sustainability Plan;
- Regional participation in the Applied Solutions Coalition and support of the Reading Riding and Retrofit project, and;
- Development of a Community Sustainability Web portal.

The purpose of this presentation is to seek City Council endorsement of the City of Asheville's participation in the Applied Solutions Coalition and the Reading Riding and Retrofit project. Essentially it's a community vision for greening the school systems.

The Applied Solutions Coalition is a coalition of cities, each co-located near National Laboratories and with strong track records for responding with energy and conservation solutions, is being formed around a mutual goal of creating locally based, integrated projects that address resource conservation, energy and carbon reductions and local economic development.

The Coalition will jointly:

- Petition the federal government and DOE to create and support a competitive grant process (similar to the NC Clean Water Management Trust Fund) for the realization of these locally based, objective focused projects;
- Seek to influence legislation with an aim to support local responses to community challenges;
- Demonstrate community level readiness to implement integrated projects for rapid impact to crucial issues;
- Collaborate with one another by sharing ideas and support for the development of strong local projects;
- Collaborate with other local governments and organizations, businesses and the National Labs for project development and DOE objectives, and;
- Create templates for duplication by other communities for future grant cycles.

It was for this Coalition that the ABSCC created our local project Reading Riding and Retrofit. At the initial gathering of the Coalition, which occurred in Sonoma County in February 2009, this project received great support and was confirmed as a model project. Asheville-Buncombe representatives Mack Pearsall, David Spector and Robin Cape, with initial support from the school district superintendents, participated in the conference and are seated on the steering committee and the DOE outreach committee for the Coalition. Currently, the Coalition is moving forward on its national agenda, while locally we are building support and the team to enact the ideas within the program. RRR has been adopted by the Asheville-Buncombe Sustainable Community Council, (ABSCC) as the premier project toward building community sustainability. Commissioner K. Ray Bailey has joined the local steering committee to move this project forward.

Participation in this coalition aligns with the strategic goals of ABSCC, SACEE, CEAC (Progress Energy's Community Energy Advisory Council) and Asheville City Council's own commitment to reduce the organization's energy consumption by 2 percent annually. In addition, Asheville's participation fosters intergovernmental relations and supports Council's overall goals in the areas of sustainability, workforce and community development and education.

There is no financial implication for Asheville to participate in the Coalition.

Pros:

- Meets federal criteria for taking advantage of grant opportunities.
- Synergizes the efforts of local schools systems to achieve individual goals.
- Enhances youth education and adaptation.

Con:

- None noted.

She has met with Ray Bailey and the school superintendents who thanked her for her leadership in facilitating potential grant funding for sustainable green construction on school campuses primarily in the form of retrofits and renovations to increase energy efficiency. Mr. Tony Baldwin said that Buncombe County Schools will be an active participant in joining Asheville City Schools and A-B Technical Community College in these efforts.

Mr. Richard Mauney, Acting President of Asheville-Buncombe Technical College, was excited to have the opportunity to play a role in this initiative and looked forward to working with her to further develop this initiative.

She asked for Council's endorsement of the City of Asheville's participation in the Applied Solutions Coalition and the concept of the Reading Riding and Retrofit project.

In response to Councilman Russell, Councilwoman Cape said that we here to aid the efforts of the school systems. She is not planning on asking the City for funds as there is $400 Million in DOE competitive grants and we are well on the way of being competitive for those funds. They are asking the City for their support to can help supplement their ability to fix their buildings.

When Mayor Bellamy asked for public comment, she received none.

Councilman Miller moved to endorse (1) the City of Asheville's participation in the Applied Solutions Coalition; and (2) the Reading, Riding and Retrofit Project concept. This motion was seconded by Vice-Mayor Davis and carried on a 6-1 vote, with Councilman Mumpower voting "no."

F. RESOLUTION NO. 09-82 - RESOLUTION APPOINTING A MEMBER TO THE DOWNTOWN COMMISSION

Vice-Mayor David said that the term of Pat Whalen expired on December 31, 2008, and City Council extended his term until April 1, 2009. On behalf of Council, he expressed their appreciation to Mr. Whalen's valuable work on the Commission.

At the March 10, 2009, meeting, it was the consensus of Council to ask the Downtown Commission what experience they needed on the board.

At the April 14, 2009, meeting, it was the consensus of Council to interview Mark Allison, Harry Weiss and Abigail Emison. Ms. Emison was interested, however, was unable to attend the interview.

After Council spoke highly of the candidates, Mark Allison received no votes; Harry Weiss received six votes; and Abigail Emison received one vote. Therefore, Mr. Weiss was appointed as a member of the Asheville Downtown Commission, to serve the remainder of Mr. Whalen's original 3-year term, term to expire December 31, 2011, or until his successor has been appointed.

RESOLUTION BOOK NO. 32 – PAGE 33

G. RESOLUTION NO. 09-83 - RESOLUTION APPOINTING A MEMBER TO THE URTV INC. BOARD OF DIRECTORS

Vice-Mayor Davis said that Mr. Mark Wilson resigned from the URTV Inc. Board of Directors, thus leaving an unexpired term until June 30, 2009.

At the March 10, 2009, meeting, it was the consensus of Council to re-advertise for this vacancy.

At the April 14, 2009, meeting, it was the consensus of Council to interview Rachael Bliss, Milton Simpson, John Calligan and Matthew Howard. Mr. Simpson was interested; however, he was unable to attend the interview. Mr. Calligan was unable to attend the interview.

After Council spoke highly of the candidates, Rachael Bliss received one vote; John Calligan received no votes; Matthew Howard received six votes and Milton Simpson received no votes. Therefore, Mr. Howard was appointed as a member of the URTV Inc. Board of Directors to serve the unexpired term of Mr. Wilson, term to expire June 30, 2009, and then a full two-year term, term to expire June 30, 2011, or until his successor has been appointed.

RESOLUTION BOOK NO. 32 – PAGE 34

VII. OTHER BUSINESS:

Planning & Zoning Commission Request

Vice-Mayor Davis noted that the Planning & Zoning Commission has requested the use of the Council Chamber in the event of a large crowd in their regular meeting room of the First Floor Conference Room in City Hall. Because of technical concerns and the installation of City Council laptops on the Council dais, it was the consensus of Council to consider the request on a case-by-case basis.

Claims

The following claims were received by the City of Asheville during the period of April 3-16, 2009: AT&T (Water), Dakota Brewer (Sanitation), Doug Wagner (Sanitation), Keller Knight (Streets), David Douglas (Streets), Scotta Orr (Streets), Robbie Pittman (Streets), Brenda Mullen (Streets), AT&T (Water), PSNC (Water), Kayla J. Benfield (Streets) and Steve Kiraly (Water).

These claims have been referred to Asheville Claims Corporation for investigation.

VIII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Gene Hampton, Founder of Asheville Citizens for Quality Government, spoke about how we can achieve quality government in Buncombe County.

IX. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 10:27 p.m.

Magdalen Burleson
CITY CLERK

MAYOR

Tuesday – May 12, 2009 - 5:00 p.m.

Regular Meeting

Present: Vice-Mayor Jan B. Davis, Presiding; Councilwoman Robin L. Cape; Councilman Kelly M. Miller; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; Councilman William A. Russell Jr.; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: Mayor Terry M. Bellamy

PLEDGE OF ALLEGIANCE

Vice-Mayor Davis led City Council in the Pledge of Allegiance.

INVOCATION

Vice-Mayor Davis gave the invocation.

I. PROCLAMATIONS:

A. RESOLUTION NO. 09-84 - RECOGNITION OF APPRECIATION TO FORMER ASHEVILLE FIRE & RESCUE CHIEF GREGORY H. GRAYSON

On behalf of City Council and the citizens of Asheville, Vice-Mayor Davis was pleased read the resolution of appreciation to former Asheville Fire & Rescue Chief Greg Grayson. He also presented Chief Grayson with his helmet and badge. He explained that Chief Grayson served as Chief of the Asheville Fire and Rescue Department since November, 2000, and has resigned from his position as Fire and Rescue Chief effective May 25, 2009. He noted that he will be continuing his career as Fire Chief for the City of Greensboro, North Carolina. On behalf of the citizens of Asheville, Vice-Mayor Davis thanked him for his many years of valuable service and highly commended him for the manner in which he has carried out his responsibilities and duties.

On behalf of the County Fire Chiefs Association, Association Vice President Richard Sales (Chief of the Reynolds Volunteer Fire Department), presented Chief Grayson with a Plaque of Appreciation.

Resolution No. 09-84 was adopted by acclamation.

RESOLUTION BOOK NO. 32 – PAGE 35

B. RECOGNITION OF THE CITY OF ASHEVILLE YOUTH LEADERSHIP ACADEMY GRADUATES

Vice-Mayor Davis said that the City of Asheville Youth Leadership Academy (CAYLA) is committed to providing its students with (a) a meaningful summer work experience; (b) leadership development through seminars and community service; and (c) college preparatory activities, including yearlong academic support.

CAYLA is an integral part of the City's 'Grow Our Own' initiative, as envisioned by City of Asheville Mayor Terry Bellamy and the Asheville City Council. The City is committed to giving Asheville's young people the opportunity to stay and work in Asheville, as well as to have valuable work experiences that will advance their future careers wherever they go.

Now completing its second full year, the City of Asheville Youth Leadership Academy is committed to developing the next generation of civic leaders in Asheville. Each spring, Asheville High School students are selected for prestigious summer internships with the City and our participating partners. The students are also asked to commit to yearlong leadership opportunities through community service. The 2008-2009 Class of CAYLA has completed more than 400 hours of community service this year with organizations such as Kids Against Hunger, ABCCM, RiverLink, and the Asheville Housing Authority. Seven of the CAYLA students are graduating seniors, and all seven will be attending college this fall. The City commends them for their hard work and dedication. We are very proud of their accomplishments in the CAYLA program. These students are an amazing group of young people with even more amazing futures lying ahead.

He recognized the Class of 2008-09 Graduates: Keevon Baten, Keshawnna Benjamin, Taurean "TJ" Davidson, Chelsea Finley, DJay Horton, Martel Jackson, Jordan Link, Tyrell Mauldin, Keva Miller, Sohna Njie, Nina Reynolds, Bianca Scott, Anice Smith, James Smith, Jill Smith, Sarah Smith, Jasmyne White, Jeanisha Williams, and Ciera Woods. He also thanked Ms. Erika Germer for her continued work with the CAYLA Program.

C. PROCLAMATION PROCLAIMING MAY, 2009, AS "FOSTER CARE MONTH"

Councilman Miller read the proclamation proclaiming May, 2009, as "Foster Care Month" in the City of Asheville. He presented the proclamation to Ms. Alisha Davis, with the Buncombe County Department of Social Services, who briefed City Council on some activities taking place during the month and thanked City Council for their support.

D. PROCLAMATION PROCLAIMING MAY 10-16, 2009, AS "POLICE APPRECIATION WEEK"

Councilman Newman read the proclamation proclaiming May 10-16, 2009, as "Police Appreciation Week" in the City of Asheville. He presented the proclamation to Police Chief Bill Hogan who briefed City Council on some activities taking place during the week and highlights of the Police Department.

E. PROCLAMATION PROCLAIMING MAY 17-23, 2009, AS "NATIONAL PUBLIC WORKS WEEK"

Councilman Mumpower read the proclamation proclaiming May 17-23, 2009, as "National Public Works Week" in the City of Asheville. He presented the proclamation to Mr. Chris Daniels from the Streets Division, Mr. Henry Glaze from the Sanitation Division and Mr. Kevin Haughinberry from the Fleet Management Division. Public Works Director Mark Combs who briefed City Council on some activities taking place during the week.

II. CONSENT AGENDA:

At the request of Councilman Mumpower, Consent Agenda Items "B" and "C" were removed from the Consent Agenda for individual votes.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON APRIL 28, 2009

B. RESOLUTION OF THE ASHEVILLE CITY COUNCIL REGARDING THE N.C. DEPT. OF ENVIRONMENT AND NATURAL RESOURCES' CONSIDERATION OF CTS CORPORATION'S REQUEST TO IMPLEMENT A VOLUNTARY REMEDIAL ACTION PROGRAM FOR THE FORMER CTS OF ASHEVILLE SITE

This item was removed from the Consent Agenda for discussion and/or an individual vote.

C. RESOLUTION AUTHORIZING THE SUBMITTAL OF A GRANT APPLICATION TO SOUTHEAST ENERGY ALLIANCE

This item was removed from the Consent Agenda for discussion and/or an individual vote.

D. RESOLUTION NO. 09-87 - RESOLUTION ESTABLISHING A POLICY FOR GRANTING APPROVAL OF ROADSIDE SOLICITATION REQUESTS

RESOLUTION NO. 09-88 - RESOLUTION AUTHORIZING THE ASHEVILLE PROFESSIONAL FIREFIGHTER ASSOCIATION LOCAL 865 TO COLLECT MONEY FOR THE MUSCULAR DYSTROPHY ASSOCIATION ON MAY 15, 2009 (RAIN DATE MAY 29, 2009) AND SEPTEMBER 18, 2009 (RAIN DATE SEPTEMBER 25, 2009) AT THE INTERSECTION OF LOUISIANA AND PATTON AVENUES

Summary: The consideration of a resolution (1) establishing a policy for granting approval of roadside solicitation requests; and (2) authorizing the Asheville Firefighter's Association Local 865 to collect money for the Muscular Dystrophy Association on May 15, 2009 (rain date May 29, 2009) and September 18, 2009 (rain date September 25, 2009), at the intersection of Louisiana and Patton Avenues.

The Asheville Firefighter's Association and the Muscular Dystrophy Association (MDA) made a presentation to the Public Safety Council Committee requesting authorization to conduct roadside solicitation to benefit the Muscular Dystrophy Association. The Association has conducted roadside solicitation in the past as part of a nationwide MDA "Fill the Boot" campaign. This campaign is a partnership between the MDA and the International Association of Firefighters. A high percentage of the MDA's funding is derived from the "Fill the Boot" campaign.

In 2002, Asheville City Council adopted an ordinance prohibiting roadside solicitation due to the large number of groups that were conducting this activity in Asheville. The ordinance was in response to safety concerns of the soliciting groups as well as the motoring public. In 2006, the North Carolina General Assembly adopted G.S. 20-175 authorizing roadside solicitation under certain circumstances. The new law requires a written application providing certain information and also requires the applicant to possess a minimum of $2 Million of liability insurance.

Regarding City Council's Strategic Operating Plan, by adopting a policy to address roadside solicitation requests under G.S. 20-175, this resolution assists in making Asheville a safer city based upon metrics of similarly sized cities, by establishing due process to address the safety of this activity.

The City Council Public Safety Committee unanimously recommended that this be forwarded to City Council for further consideration.

Pros:

- By establishing a due process to address the safety of this activity, approved roadside solicitation will be conducted with reduced risks to solicitors and the motoring public.

Cons:

- Council may see an increase in requests for roadside solicitation.

City staff recommends City Council (1) establish a policy for granting approval of roadside solicitation requests: (2) authorize the Asheville Firefighter's Association Local 865 to

collect money for the Muscular Dystrophy Association on May 15, 2009 (rain date May 29, 2009) and September 18, 2009 (rain date September 25, 2009), at the intersection of Louisiana and Patton Avenue; and (3) review the roadside solicitation policy in six months.

RESOLUTION NO. 09-87 - RESOLUTION BOOK NO. 32 – PAGE 38
RESOLUTION NO. 09-88 - RESOLUTION BOOK NO. 32 – PAGE 41

Vice-Mayor Davis asked for public comments on any item on the Consent Agenda, but received none.

Vice-Mayor Davis said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Russell moved for the adoption of the Consent Agenda. This motion was seconded by Councilwoman Cape and carried unanimously.

ITEMS REMOVED FROM THE CONSENT AGENDA FOR INDIVIDUAL VOTES

B. RESOLUTION NO. 09-85 - RESOLUTION OF THE ASHEVILLE CITY COUNCIL IN OPPOSITION TO CTS CORPORATION'S REQUEST TO IMPLEMENT A VOLUNTARY REMEDIAL ACTION PROGRAM FOR THE FORMER CTS OF ASHEVILLE SITE, AS IS BEING CONSIDERED BY THE N.C. DEPT. OF ENVIRONMENT AND NATURAL RESOURCES

Summary: Pursuant to Council's direction at the April 14, 2009, City Council meeting, our office has prepared a resolution regarding NCDENR's consideration of CTS Corporation's request to implement a voluntary remedial action program for the former CTS of Asheville site.

In preparing this resolution, the City Attorney's staff met with Mr. Barry Durand, reviewed the information Mr. Durand provided to our office, and examined the relevant statutes.

At its May 5 meeting, the Buncombe County Board of Commissioners heard a presentation on this matter, and directed that a letter be prepared expressing the Board's concerns with the CTS site and the remediation efforts.

Mr. Barry Durand provided Council with a brief recap of the imminent hazard situation. He urged Council's support of the resolution prepared by City Attorney Oast discouraging a voluntary remedial action program for the CTS of Asheville site and asked that the resolution be amended to ask for a full, proper and timely remediation of the CTS Asheville site.

Mr. Tate McQueen expressed concerns over this imminent threat affecting our community.

A resident on Sweeten Creek Road, who has been involved with this since 1990, explained that representatives from the EPA, N.C. Dept. of Environment and Natural Resources and others knew CTS was dumping barrels as far back as in the 1960's or early 1970's. He also pointed out where the N.C. Dept. of Environment and Natural Resources has not followed their notification laws.

Councilman Mumpower moved to adopt Resolution No. 09-85 with the following amendments: (1) the resolution title be amended to read "Resolution of the Asheville City Council in opposition to CTS Corporation's request to implement a voluntary remedial action program for the former CTS of Asheville site, as is being considered by the N.C. Dept. of Environment and Natural Resources;" (2) to amend item 2 (a) to reflect that the Dept. of Environment and Natural Resources give strong consideration to whether the conditions at the CTS of Asheville site constitute an imminent hazard pursuant to N.C. Gen. Stat. sec. 130A-310.5 (a); (3) amend item 2

(b) to delete the phrase "...before entering into a voluntary remedial agreement with CTS Corporation; and (4) amend item 2 to add a new 2 (c) "to deny the request of CTS Corporation to enter into a voluntary remediation agreement. This motion was seconded by Councilwoman Cape.

After discussion, Councilman Mumpower accepted other word-smithing amendments to the resolution as follows: (1) add the word timely into the phrase "a full and proper remediation of the CTS Asheville site is necessary ...;" (2) amend the second Whereas to read "substances are likely to migrate..."

The amended motion made by Councilman Mumpower and seconded by Councilwoman Cape carried unanimously.

RESOLUTION BOOK NO. 32 – PAGE 36

C. RESOLUTION NO. 09-86 - RESOLUTION AUTHORIZING THE SUBMITTAL OF A GRANT APPLICATION TO SOUTHEAST ENERGY ALLIANCE

Summary: The consideration of a resolution authorizing submittal of a grant for $500,000 from the Southeast Energy Alliance (SEEA).

The intention of this grant is to establish an operating company which serves as a "one-stop shop" clearinghouse for regional energy efficiency, energy conservation, and renewable energy projects in the community's existing building stock. The end goal of this grant is to reduce electricity and natural gas consumption city wide by 20-30% over the next five years. To achieve this goal, the $500,000 foundation funded grant award would be used in three phases: 1) Planning: Hiring staff, solidifying board, fortifying partnerships; 2) Financing: Securing financial partnerships, leveraging grant funds with investors; and 3) Implementation: marketing, communication and energy improvement project implementation.

The primary role the City of Asheville will play in this program is to receive and reallocate the grant, provide leadership to the operating company, and support the outreach and communication phase by having the program be branded as a City of Asheville initiative.

The service this operating company will provide is to establish the necessary partnerships with financial institutions, energy auditors, and equipment installers. Through these back stage efforts, the operating company can then serve the customer as the primary point of contact to guide them through each step of the process to identify, finance and implement an energy project.

The Land of Sky Regional Council (LOSRC) has submitted a letter of intent committing to serve as the operating company and function as the clearinghouse. The Waste Reduction Partners program of LOSRC has existing frame work and capacity to solicit participation from the commercial and industrial sectors of the community. In addition, the Western North Carolina Green Building Council (WNCGBC) has the existing framework and capacity to work with the residential and small business sector. The WNCGBC has also submitted a letter of intent committing to act as subcontractors under LOSRC.

Furthermore, this effort requires participation and support from partnering organizations. The following entities have submitted letters of support for this grant application:

- The North Carolina State Energy Office
- Progress Energy Carolinas
- Asheville-Buncombe Technical Community College
- AT & T
- Sustainability Advisory Committee on Energy & the Environment
- Sundance Power Systems

- Warren Wilson College
- Governor Purdue (pending)
- Congressman Shuler of N.C. 11th District (pending)
- Buncombe County Commissioners (pending)
- N.C. Dept. of Natural Resources (pending)
- Self Help Credit Union (pending)
- Community Action Opportunities (pending)

This action complies with the following areas of the City Council Strategic Operating Plan (1) Support diversified job growth and small business development; (2) Work with regional partners to create incentives for green building, energy conservation and energy intendance; and (3) Expand community education programs to attract volunteers to initiatives, including climate awareness, water conservation, recycling, storm water and sustainability.

Pros:

- A local energy alliance would support citizens, businesses and industries through reducing upfront investments in energy efficiency projects while sustaining reduced expenses on energy
- Centralizing energy usage reduction efforts through a local energy alliance reduces duplication of efforts and centralizes resources who have substantial existing capacity in the Asheville area
- Funds, if awarded to the City, may be leveraged to gain access to competitive federal stimulus dollars
- Participation in this partnership model demonstrates energy efficiency and renewable energy leadership to a national audience

Cons:

- Achievement of the grant goals is determined through successfully leveraging funding during less than favorable economic climate.
- The long term funding source of this effort will not be determined until after the receipt of the award and staff has been hired to create a business model.

There is no fiscal impact. In the event the grant is awarded to the City of Asheville, it is anticipated that up to 1/5 of the Energy Coordinators time would be dedicated to steer program development to be recuperated through grant administrative expenses.

City staff recommends City Council authorize the submittal of the grant application to the Southeast Energy Alliance.

Councilman Mumpower felt that in view of our current economic conditions, this is not the proper time or investment of our energies.

Councilwoman Cape supported this item action as its money coming from someone other than a governmental organization. In addition, it's a great mechanism by which to create an energy efficiency clearinghouse for our community to find out how they can make their own homes and businesses much more energy efficient.

Councilwoman Cape moved for the adoption of Resolution No. 09-85. This motion was seconded by Councilman Miller and carried on a 5-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 32 – PAGE 37

III. PRESENTATIONS & REPORTS:

A. CIVIL SERVICE BOARD BLUE RIBBON COMMISSION REPORT

Ms. Maria Roloff, Vice-President of Human Resources at Mission Hospitals, and member of the Blue Ribbon Commission, said that this is the consideration of the Blue Ribbon Commission recommendations in adopting proposed legislation to revise the Asheville Civil Service law.

On February 10, 2009, Council appointed a Blue Ribbon Commission to review the effectiveness of the Asheville Civil Service Board and Civil Service law. The Blue Ribbon Commission was chartered with offering advice on future policy direction and bringing forward any recommended changes. City Council appointed Gene Bell, Lou Bissette, Bill Cook, Linda McDaniel and Maria Roloff to the Commission. Civil Service Board members include Chairman John Miall, Sidney Bach, Virginia Robinson and Marv Rosen.

The Blue Ribbon Commission held four meetings. During these meetings, they reviewed the current Civil Service law, the 5 remaining Civil Service laws of other North Carolina cities, and grievance data and trends. They also met with the current members of the Civil Service Board.

The Blue Ribbon Commission focused on best practice, efficiency, consistency, fairness and equity, cost implications and clarification of existing language when considering recommendations.

On March 12, 2009, the City of Asheville received word that Senator Nesbitt had introduced SB 556 in the General Assembly. The General Assembly deadline for crossover bills is Thursday, May 14, 2009.

She then reviewed the following summary of recommendations from the Blue Ribbon Commission and proved Council with a draft of the Civil Service law incorporating the recommended changes:

1. Elimination of rule making authority except as to procedural matters (Delete Sections 4 and 5)

   State Law grants the power to the City Manager general supervisory authority over all employees, and to direct and supervise the administration of all departments and agencies, subject to such general rules, regulations, and policies as the Council adopts. The Human Resource field has become increasingly complex and requires a high level of expertise in order to manage the City's human capital. No fiscal impact.

2. Judicial review in nature of certiorari instead of trial de novo (Section 8 f.)

   Provides for a less burdensome and a less resource intense (time and money) process for each party. Similar to review for other administrative proceedings, including other civil service boards in NC. Empowers the Board with full quasi-judicial hearing and decision making authority. Decreases fiscal impact to employee and City.

3. Clarify Subpoena power to Board during grievance hearings (Section 8 c)

   Best practice based upon review of other Civil Service laws in the State. No fiscal impact.

4. Assistant Directors added to those not covered by Civil Service (Section 2 b)

   Assistant Directors are members of the City Manager's executive team and are frequently called upon to act as an extension of the Department Director. The City Manager, Department Directors and Assistant Directors are held to very high level of accountability to City Council on operational, budget and personnel matters. The City Manager needs

the latitude to be held solely accountable to City Council for the actions and behavior of these personnel. No fiscal impact.

5. Council's right to control the City's finances (Section 1)

   Common language in other existing Civil Service laws. Law should recognize Council's/Manager's legal authority to eliminate positions to address budget needs. No fiscal impact.

6. City Clerk acts as Secretary (Section 2 c)

   Best Practice in other existing Civil Service Laws. The City Clerk can designate someone to fulfill these duties. The City Clerk already has duties in the grievance process under the current law and is designated under State laws as records custodian and proper person for service of process. Grievance hearings typically are recorded by Court reporters. May have fiscal impact.

7. HR Director ex officio non voting member of the Board (Section 2 d)

   Patterned after Wilmington's Civil Service law. Maintains a role in the process for Human Resources and allows for a resource for the Civil Service Board regarding City policy and procedures during grievance hearings. Allows HR Director to be present in closed sessions. No fiscal impact.

8. Employees may wear uniforms (Section 3 b)

   Employees may wear uniforms to meetings but are not considered on duty or compensated while at meetings unless required to be there by subpoena or the City Manager. No fiscal impact.

9. Outside Counsel for grievance hearings (Section 8 c)

   Formalizes the current practice of providing a qualified outside attorney for grievance hearings. The City Attorney shall approve the qualifications and fees. No significant change in fiscal impact.

10. Membership requirements (Section 2 b)

    Provides for a broader base of possible Board members by extending the membership to all qualified voters of Buncombe County. This article also restricts employees who have been employed within the previous 5 years from serving on the Board. No fiscal impact.

11. Board makes own rules of procedure (Section 10)

    Formalizes the Board's ability to make their own rules of procedure including meeting frequency and times. No fiscal impact.

In summary, the Blue Ribbon Commission recommendations include: (1) Elimination of rule making authority; (2) Judicial review in nature of certiorari; (3) Clarify subpoena power of the Board; (4) Exempt Assistant Directors; (5) City Council's right to control finances; (6) City Clerk as Secretary and HR Director as ex officio non-voting member; (7) Employees can wear uniforms; (8) Outside Counsel for grievance hearings; (9) Board membership requirements; (10) Board Rules of Procedures; and (11) Law and Board should be reviewed every 2 to 3 years for effectiveness.

She said that most of the changes have no fiscal impact to the City. If the Council chooses to adopt some but not all of these changes, this may create additional fiscal impact.

City staff recommends City Council consider the Blue Ribbon Commission's recommendations in adopting proposed legislation to revise the Asheville Civil Service law.

There was a brief discussion, initiated by Councilman Mumpower, regarding the elimination of the rule making authority, except as to procedural matters, and if there is any oversight of the City Manager's authority by perhaps City Council. City Attorney Oast said that under general law in North Carolina, the city manager has the supervisory authority over personnel and the administration of the city, subject to such general rules and direction that council may approve. Under the Civil Service Law, the manager's role is taken by the civil service board. The Commission's recommendation is that the State law is the best practice and the manager may come to council which whatever rules that have been reviewed by the Human Resources professionals for general direction and approval. Councilman Mumpower suggested City Manager Jackson craft some language that provides him with rule-making authority along with some procedure to ensure inclusion and openness of the Civil Service Board and other employee organizations.

Councilman Mumpower spoke against extending the Board membership to qualified voters in Buncombe County; and in support of some periodic review of the Civil Service Board and Law.

City Attorney Oast said that the deadline for submitting local legislation has passed in the General Assembly. But, one of our legislators has introduced a bill that is currently pending to amend the Asheville Civil Service Law, not as comprehensively has this Commission has recommended. He has sent to our legislator copies of the Commission's recommendations letting him know Council will be considering the recommendations.

Councilman Mumpower moved to approve the Blue Ribbon Commission's recommendations with the following amendments: (1) instruct the City Manager to come up with a process or procedure to provide for input from the Civil Service Board, employee organizations, etc.; (2) keep the Civil Service Board membership to qualified voters of the City of Asheville; (3) the Civil Service Board provide City Council with an annual report on the Board's work that provides some opportunity for the Civil Service Board and Civil Service Law to be reviewed, as necessary. This motion was seconded by Councilman Russell.

Mr. Mike Marshall, representing the Asheville Firefighters Association, urged Council to review the recommendations closer. He noted that the first recommendation is to delete Sections 4 and 5. He felt that will basically take the authority of City Council out of any rule approvals.

City Attorney Oast explained that deleting Sections 4 and 5 does not mean that the City Manager can make rules that don't get reviewed by anyone. He would be subject to State law, which requires Council approval.

Mr. Rondell Lance, President of the Fraternal Order of Police in Buncombe County, spoke in opposition of the recommendations presented by the Commission. He felt the Civil Service Law has worked well for the employees and they like the law the way it is written. We had some concerns, which resulted in the appointment of this Blue Ribbon Commission. He felt many of these recommendations take away the power of the Civil Service Board and many of them take away a process that benefits the employees of the City of Asheville. They are asking that the rules of the Civil Service Law be followed and that the employees who have to come before the Civil Service Board receive a fair hearing. He felt the recommendations presented take that away from employees. He felt the recommendations deteriorate the confidence employees have in the Civil Service Board. He also noted that he was not contacted or interviewed, nor was Mr. Marshall or Mr. Dave Anders (who represent employees) by the Blue

Ribbon Commission. He urged Council not to adopt the recommendations and let the employees review the recommendations first.

In response to Vice-Mayor Davis about being more specific in his concerns, Mr. Lance said that when the rule-making authority is taken away from the Civil Service Board, you are taking away the oversight for hiring, firing and promotion process.

Councilman Mumpower recalled the Boards & Commissions Committee suggesting the Blue Ribbon Commission interview appropriate staff organizations as part of their mission. He felt it was important to receive input from organized organizations.

Mr. Lou Bissette, member of the Blue Ribbon Commission, said that given the time restraints and mission, they did not interview employees. He explained that the Committee spent a great deal of time with Civil Service Board members, noting that Mr. Bach and Ms. Robinson are the City employee representatives on the Civil Service Board so they feel they did get the view from the employee organizations. He noted there are two parts of the Civil Service Law – (1) the rule making authority for hiring, firing and disciplining; and (2) the grievance procedure. He explained that with all the complicated human resource laws and policies in this day and time that a lay Civil Service Board was not the appropriate body to manage personnel. Regarding the grievance procedure, he explained how the Commission actually strengthened the role of the Civil Service Board and how it is now more streamline and efficient for employees. He noted that all meetings of the Commission were open to the public.

When Councilman Mumpower noted that the minutes of the Boards & Commissions Committee did not reflect language outlining specific groups the Blue Ribbon Commission should seek input from, he felt a step was missed by not talking to employee organizations and withdrew his motion.

Because Councilman Newman felt City Council should take a little more time to review the recommendations, he moved to table action on this matter until May 26, 2009, and give an ad hoc committee of Council (Vice-Mayor Davis, Councilman Mumpower and Mayor Bellamy) the opportunity to meet with employee organizations to hear their specific concerns and to report those back to the full Council on May 26. This motion was seconded by Councilman Mumpower and carried unanimously.

On behalf of City Council, Vice-Mayor Davis thanked the Commission members for their hard work on this issue.

Due to the fact that that the Civil Service Board Blue Ribbon Committee recommendations action was continued until after the cross-over deadline in the legislature, it ws the consensus of Council to instruct the City Attorney to contact the legislators and ask them to take whatever action is necessary to allow for Council's recommendation to get full and fair consideration at the appropriate time.

B. ECONOMIC STIMULUS PACKAGE UPDATE

RESOLUTION NO. 09-89 - RESOLUTION AUTHORIZING THE CITY TO APPLY FOR THE 2009 BYRNE JUSTICE ASSISTANCE GRANT AND TO ENTER INTO A MEMORANDUM OF UNDERSTANDING WITH BUNCOMBE COUNTY

RESOLUTION NO. 09-90 - RESOLUTION AUTHORIZING THE CITY TO APPLY FOR FEDERAL TRANSIT ADMINISTRATION FUNDING FOR TRANSIT INVESTMENTS FOR GREENHOUSE GAS AND ENERGY REDUCTION GRANT APPLICATION

American Recovery & Reinvestment Project Manager Brenda Mills updated Council on the following applications for the economic stimulus package.

She said that staff is seeking City Council approval of (1) a resolution authorizing the City to apply for the 2009 Byrne Justice assistance grant and to into a Memorandum of Understanding (MOU) with Buncombe County; and (2) a resolution to apply for Federal Transit Administration funding for Transit Investments for Greenhouse Gas and Energy Reduction. In addition, Council will hear an update by David Nash of the Housing Authority's stimulus funding priorities.

Edward Byrne Justice Assistance Grant (JAG) – Local Solicitation

The Asheville Police Department is applying for the JAG – Local Solicitation Award. This is a predetermined amount of funds based on the Part 1 Uniform Crime Reporting Crimes. Asheville Police and Buncombe County Sheriff have been allocated $372,630 with Asheville receiving $265,466 and Buncombe receiving $107,164. As part of this grant APD will adopt a MOU with Buncombe County that authorized APD to administer the Grant and disperse the appropriate funds to the Buncombe County Sheriff's Department.

Equipment:

The APD plans to purchase security enhancement equipment for the Municipal Building which will replace funding that was eliminated from the 2009-2010 Budget. The improvements will update the video security system within the Municipal Building, update and add key card access to doors as needed, and integrate an alarm system that makes internal notification of unauthorized entries to secure areas. It is estimated that this will cost approximated $225,956.

Additionally APD plans to purchase a SPEX AFIS system that will enable APD to scan and enter fingerprints and palm prints into a local system that will analyze the prints and compare with previous sets. This will be a great improvement to the current system as it will use the increasing data compiled local for comparison. It will also be able to use palm prints which we currently do not process.

At its May 5, 2009, meeting, the City Council Finance Committee reviewed the proposed projects and authorized staff to submit the application and MOU for approval by City Council which is a requirement for funding.

Municipal Building Security:

Upgrade to camera system (32 cameras), key card access to critical office areas (50) and integrated alarm system to include associated computer hardware	$225,956
SPEX AFIS/APIS:	
Computer, monitor, modem, scanner, etc.	$30,500
Interface with SPEX central server	$995
Yearly software support	$1,895
Interface with CCID (Buncombe Detention)	$995
Shipping, packing and handling	$625
INDENTIX service contract *	$4,500
Total:	$265,466

This is a 100% non-matching grant that will enable the APD to greatly improve the Municipal Building Security and improve the processing of fingerprints and palm prints to compare to those compiled locally.

There is no fiscal impact at this time for City Council to approve the resolution supporting this application and MOU. The funding is allocated as part of a predetermined amount of funds based on the Part 1 Uniform Crime Reporting Crimes. Most of the equipment is replacement of older equipment and is accounted for in the budget.

Pros:

- Security enhancement equipment for the Municipal Building which will replace funding that was eliminated from the 2009-2010 Budget.
- Update to the video security system, add key card access to doors as needed, and integrate an alarm system that makes internal notification of unauthorized entries to secure areas.
- Added technology to scan and enter fingerprints and palm prints into a local system which is great improvement to the current system.

Con:

- None.

FTA Funding for Transit Investment for Greenhouse Gas and Energy Reduction Grant

An interagency team composed by the City of Asheville, Buncombe County and Henderson County transit agencies is proposing that the City of Asheville apply for the Federal Transit Administration (FTA) Funding for Transit Investment for Greenhouse Gas and Energy Reduction (TIGGER) Grant. This program is available to transit agencies for capital projects that either, reduce energy consumption, and greenhouse gas emissions of the transit agency, or both.

The FTA has issued a call for proposals via the American Recovery and Reinvestment Act 2009. The TIGGER program is dedicating $100 Million in discretionary grants for public transportation projects that reduce a transit system's greenhouse gas emissions or result in a decrease in a transit system's energy use. The proposals must be in the range of $2 million minimum to $25 million maximum. FTA is allowing agencies to submit consolidated proposals from different transit agencies.

The interagency team is focusing in replacement vehicles to replace their existing fleet. City of Asheville's Transit System still needs funding to replace four of the 1996 diesel buses; these buses have already reached their life-cycle and though they are still operative, have begun presenting the problems attributable to age, engine repairs, transmissions and other parts. Since these buses are not manufactured anymore, parts are spare and difficult to find and maintenance costs have become burdensome and have increased the operational costs in at least thirty percent (30%). Staff is recommending acquiring four hybrid buses to replace the existing ones; this option offers reduction in greenhouse gas emissions and energy consumption.

Buncombe County and Henderson County are proposing replacing their vehicles (twelve vans and one LTV, respectively) with CNG technology. Henderson County is also applying for a new CNG pump station. Projects selected will be funded 100%. The proposals exclude fleet expansion.

Applications are due by May 22, 2009, and although the City is the primary applicant for this proposal, the projects are awarded to individual projects based on the merits of the proposal.

The City of Asheville's request is $2,240,000. The total request including Buncombe and Henderson Counties is $3,749,125. FTA will fund 100% of the project, therefore with no direct impact to the City.

Pros:

- Access to FTA funds will allow the entire fleet replacement which will traduce in savings in maintenance costs, and fuel consumption, as well as reduction in carbon footprint emissions.
- FTA will fund 100% of the project.

Con:

- None.

City staff recommends (1) Adoption of the resolution authorizing the City Manager to apply for the 2009 Byrne Justice assistance grant and to enter into a MOU with Buncombe County; and (2) Adoption of a resolution to apply for Federal Transit Administration funding for Transit Investments for Greenhouse Gas and Energy Reduction.

Councilman Mumpower did not support deficit spending by the federal government in this fashion. He spoke against purchasing hybrid bus and the viability of this new technology.

Director of Transportation and Engineering Cathy Ball said that we have recently learned that we can also request funding that would cover the gap that we needed between the appropriations that we received from Congressman Shuler's office. In 2008, we received $294,000 for hybrid buses and in 2009 we received $238,000. We are requesting an additional $600,000 to purchase both of those hybrid buses.

Councilwoman Cape felt we can't get all this technology worked out until we have a willingness to put it on the street and try it.

Housing Authority Stimulus Funding Priorities

Mr. David Nash, representing the Housing Authority of the City of Asheville (HACA), said that the Housing Authority received a formula allocation of $3,384,718 in Public Housing Capital Funds under the Recovery Act. Consistent with HUD requirements and with the expedited spending requirements of the Recovery Act, HACA is prioritizing projects that are already in the pipeline:

- Phase 4 of the Klondyke Homes (500 Montford Avenue) modernization and energy efficiency project is being expanded to cover more units and advanced to begin this year. This project is carried out primarily by force account labor, with some external contracting. Work is expected to begin in June or July.

- Roof replacements at Bartlett Arms (121 Bartlett Street) and Altamont Apartments (72 N. Market Street.) will be advanced to begin within the next 12 months. If determined feasible, those roof replacements will be combined with solar energy installations. These projects will be contracted to private sector companies. The Housing Authority is currently evaluating proposals from architect/engineering teams and has solicited proposals from solar energy companies. Design work should begin in June, so that a contractor can be selected in the fall.

- The Housing Authority is currently evaluating energy efficiency options in all developments with our energy performance contractor and may revise these plans or use some of our regular 2009 Capital Fund distribution for other opportunities determined to be feasible.

In our experience, at least 50% of our construction expenditures are for labor. Based on the Buncombe County average annual wage of $32,968, we estimate that at least 45 jobs will be preserved or created as a result of these projects. This calculation does not include any estimate of the multiplier effect of those wages circulating in the community, or of the jobs created in manufacturing the materials, appliances and equipment purchased for the jobs

In response to Councilwoman Cape, Mr. Nash said that regarding the Klondyke Homes renovation, the Housing Authority has already modernized approximately 50 units and this funding will add approximately 25 more.

When Vice-Mayor Davis asked for public comments, he received none.

Vice-Mayor Davis said that members of Council have been previously furnished with copies of the resolutions and they would not be read.

Councilman Newman moved for the adoption of Resolution No. 09-89. This motion was seconded by Councilman Russell and carried on a 5-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 32 – PAGE 42

Councilwoman Cape moved for the adoption of Resolution No. 09-90, with the additional $600,000 request to purchase hybrid buses. This motion was seconded by Councilman Miller and carried on a 5-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 32 – PAGE 43

At 6:56 p.m., Vice-Mayor Davis announced a short break.

C. PRESENTATION OF THE DOWNTOWN MASTER PLAN AND SETTING A PUBLIC HEARING ON SAID PLAN FOR MAY 26, 2009

Ms. Sasha Vrtunski, Project Manager for the Downtown Master Plan, said that the final version of the Downtown Master Plan is being presented by the consultant team. Public comments are not scheduled for this meeting. The public hearing on the master plan will be held at the Council meeting on May 26, with Council discussions to follow in subsequent meetings.

From the beginning of this process, the Downtown Commission stressed to the consultant team that our community is one of many opinions, and that they would have to work hard to find common ground, and to craft a plan that could meet the needs of many different perspectives. The plan strives to do just that. The recommendations are carefully balanced to help form our future downtown while allowing for creativity, flexibility and new initiatives, offering action on the elements that arose as most important to the greatest number of those who were a part of the process.

The master planning process provided numerous opportunities for citizen and stakeholder input. The turnout was very high - much higher than in any effort in recent years – an estimated 4,000 hours of citizens' time; and there was wide representation of many different perspectives. The consultant team turned that input into a set of design and plan principles and then a set of strategies. Some of these recommendations were initially controversial, and there were numerous discussions between stakeholders to find common ground. Reflecting that effort, some elements that began as recommended strategies evolved into recommendations for future consideration located in the Plan Appendix. As a result, there is a strong feeling among the majority of those who participated in the process that the plan now presents an important middle ground that will improve downtown development through predictability, rational standards and clarity.

Key Dates and Actions:

		Actions Taken
Planning & Zoning Commission	April 1, 2009	Voted 6-0 in support of the plan with two recommendations to Council.
Downtown Commission	April 3, 2009	Voted 8-0 in support of the plan
Downtown Master Plan Advisory Committee	April 9, 2009	Voted 13-0 in support of the plan.

* The Planning and Zoning Commission recommendations are noted in their April 1, 2009, minutes.

A public hearing will be scheduled for the May 26 Council meeting. At this meeting Council will hear from the public, providing a further opportunity for the Council to understand the process and hear varied points of view regarding the plan. The staff recommends that the Council discuss the plan at a meeting in June, at which time the Council can refine their thoughts about the plan, establish areas of general support, and direct staff to come back with any additional information they wish to see regarding specific elements of the Plan.

Regarding City Council's Strategic Operating Plan, City Council has recently adopted the goal of completing the Downtown Master Plan and to begin implementation.

Staff recommends that City Council set a public hearing on May 26, 2009, to hear public comments on the final plan. Staff also recommends that City Council make the most of the consultants' presence through questions regarding the plan recommendations and strategies. The consultant team has a keen understanding of the complexities of cities, experience nationwide and a solid knowledge of downtown Asheville. This will be the consultants' last trip to Asheville and will complete their contract.

Mr. Pat Whalen, immediate past Chairman of the Downtown Commission, explained how the downtown matters to everyone and it is now a nationally recognized jewel. He thanked City Council for agreeing with the Downtown Commission that it was time to update the Master Plan. After two years of extensive interviews, public meetings and public input and discussion, we now have a new Master Plan.

Mr. David Dixon, representing Goody Clancy, said that the Downtown Master Plan represents the broad-based consensus of Asheville's whole community of downtown stakeholders.

The context for the Plan is (1) New era of growth and change demands better management to preserve downtown's essential character; (2) Economic conditions are fluctuating; (3) Downtown stakeholders have diverse perspectives; (4) ...hence management, resiliency and balance are essential themes; and (5) Plan has deliberate near- and long-term elements.

Community vision includes (1) Sustain Downtown Asheville's dynamic and diverse culture and economy; (2) Enhance Downtown Asheville's role as the larger community's "front porch;" (3) Strengthen Downtown Asheville's identity as a series of residential neighborhoods; (4) Preserve and enhance Downtown Asheville's diverse architecture, historic resources, walkable streets, view corridors; (5) Provide good, interconnected transportation choices for better access *and* better health; (6) Make Downtown Asheville a national model of sustainable planning, development and operations at every level; and (7) Establish creative strategies for managing this special place.

He explained the seven interdependent strategies under three primary themes: (1) Experiencing Downtown Asheville; (2) Shaping Downtown Asheville; and (3) Managing Downtown Asheville. There is also the overall policy under main strategy and details in the appendix.

Mr. Tom Gallaher, sub-consultant for Goody Clancy, explained the following strategies as follows:

One - Cultivate essential cultural and historic resources: (1) *Key issues:* (A) Support affordable housing, the arts and other elements central to downtown's success; and (B) Continue rich legacy of historic preservation. (2) *Response:* (A) Help diverse arts organizations and individuals work together; (B) Support ongoing projects: Art museum expansion, Performing Arts Center, Artists' Resource Center etc.; (C) Update downtown historic district with more landmarks; and (4) Keep historic properties economically viable.

Two – Expand convenient choices for access and mobility: (1) *Key issues:* (A) Ensure parking is available to support downtown businesses; and (B) Improve downtown walkability; and (2) *Response:* (A) Wayfinding, payment, lighting and other safety/convenience improvements for public parking; (B) Additional priority pedestrian streets with ped-friendly design guidelines; and (C) Downtown shuttle study.

Mr. Ben Carlson, with Goody Clancy, explained the following strategies:

Three – Inaugurate an urban design framework to extend downtown's sense of place and community: (1) *Key issues:* (A) Strengthen sense of place; (B) Encourage change where it will help; encourage preservation where it is merited; and (C) Expand the success of the traditional core to areas of untapped potential; and (2) *Response:* (A) Five unique districts – that quality new development will help shape; and (B) Attention to adjoining corridors and neighborhood transitions.

Four – Shape building form to promote quality of place: (1) *Key issues:* (A) Prevent inappropriate building height, mass; and (B) ...but don't curtail economic, cultural, aesthetic opportunity; and (2) *Response:* (A) Defined height zones; (B) Slender buildings with views and daylight between them, reflecting local 1920's precedent; (C) Attention to street scale, character; and (D) Before/after photomontages for evaluation.

Five – Update design guidelines to be current and clear, and to promote sustainable development: (1) *Key issues:* (A) Make guidelines clear and effective; (B) Address housing, scale, other new elements; and (C) Take leadership in green design; and (2) *Response:* (A) Streamlined, updated design review checklist integrating *required* zoning requirements and *recommended* design guidelines; and (B) Green design incentives.

Mr. Dixon explained the following final strategies:

Six – Make project review transparent, predictable, and inclusive of public: (1) *Key issue:* (A) Fix broken review process; and (2) *Response:* (A) Early, ongoing public input opportunity; (B) New project review categories – reserving City Council input for the largest projects; (C) Political accountability preserved; (D) Limited use of Conditional Use Permit; (E) Enhanced roles for Downtown Commission (design review), Planning & Zoning Commission (site review); and (F) Defined review period time limits.

He reviewed a chart of the proposed review process for downtown projects with public comments accepted at all steps.

Seven – Nurture a sustainable and resilient economy through active management of downtown: (1) *Key issues:* (A) Keep downtown clean, safe and green; (B) Maintain downtown's

remarkable mix of businesses; grow new businesses and jobs; and (C) Reinvest in downtown for continued success; and (2) *Response:* (A) Establish Community Improvement District (CID) to help manage downtown above and beyond city role, maintain healthy mix of businesses and uses; (B) create an economic development arm within CID; and (C) Phase in community benefits fund.

Downtown's stakeholders are ready to put the plan to work. Much of the plan can be implemented soon by City staff at little cost. Economic downtown presents a good opportunity to revise the policy.

Councilwoman Cape thanked the community for participating in this process. Our staff and consultants have done an amazing amount of work. She felt this is a plan that the City of Asheville can utilize as a backbone. She hoped that this Plan will serve a lot of other organizations as well as the City.

Councilman Newman supported delegating more of these decisions to the Planning & Zoning Commission and other bodies, but it appeared to him that the big controversial projects still come to City Council. He questioned how different this process is than what is currently being practiced. He understands the developers want certainty, but if the project is before Council, Council has an obligation to make a meaningful review.

Mr. Dixon said that the review thresholds have been raised by 75% and the Appendix contains a stronger foundation of standards.

Councilman Mumpower felt the primary job of City government is to keep it safe and clean. He didn't feel efforts to have control over others is the best use of our time and resources.

In response to Councilman Mumpower, Economic Development Director Sam Powers said that the contract with the consulting firm was $170,000 for fees and associated expenses. The other costs (e.g., obtaining 5,000 hours of public input, 14 public meetings, etc.) is estimated at approximately $37,000.

In response to Councilman Mumpower, Ms. Vrtunski explained the concept of the Community Improvement District and the community benefits fund.

Councilman Mumpower moved to set a public hearing on May 26, 2009, to hear public comments on the final Downtown Master Plan. This motion was seconded by Councilwoman Cape and carried unanimously.

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO SOLICIT COMMENTS ON A SUBSTANTIAL AMENDMENT TO THE CITY'S 2008-09 CONSOLIDATED ACTION PLAN, DETAILING THE CITY'S PLAN TO ESTABLISH THE FUNDING GUIDELINES AND ALLOCATION PROCESS FOR THE HOMELESS PREVENTION AND RAPID REHOUSING PROGRAM OF $509,460

RESOLUTION NO. 09-91 - RESOLUTION AMENDING THE CITY'S 2008-09 CONSOLIDATED ACTION PLAN, DETAILING THE CITY'S PLAN TO ESTABLISH THE FUNDING GUIDELINES AND ALLOCATION PROCESS FOR THE HOMELESS PREVENTION AND RAPID REHOUSING PROGRAM OF $509,460

Vice-Mayor Davis opened the public hearing at 7:59 p.m.

Ms. Amy Sawyer, the City's Homeless Coordinator, said that this is the consideration of a resolution amending the City's 2008-09 Consolidated Action Plan, detailing the City's plan to establish the funding guidelines and allocation process for the Homeless Prevention and Rapid Rehousing Program of $509,460. This public hearing was advertised on May 1 and 8, 2009.

The Community Development Division proposes that the City substantially amend its 2008-09 Consolidated Annual Action Plan to enable the City to receive funding under the Homelessness Prevention and Rapid Re-Housing Program (HPRP). The total amount of federal "Homeless Prevention Funds" funds, which have been made available to the City per Division A, Title XII of the American Recovery and Reinvestment Act of 2009, is $509,460.

The City of Asheville is expected to receive $509,460 in Homelessness Prevention and Rapid Re-Housing Program (HPRP) funds. Eligible activities are financial assistance, housing relocation and stabilization services, data collection and administration, and administrative costs.

The City of Asheville Planning Department's Community Development Division proposes to competitively distribute HPRP funding to local agencies, which will use these funds to prevent homelessness and to rapidly re-house persons who have become homeless. The Division expects that up to 150 households will receive financial assistance and housing relocation and stabilization services with the HPRP funding.

A commitment to community input is evidenced by the plan's incorporation of the City of Asheville's public meetings policy, discussions with the Homeless Coalition, and discussions with the Homeless Initiative Advisory Committee.

A pre-application process will identify eligible agencies. Eligible agencies will be asked to submit an application for funding. Applications will be reviewed and funds will be committed before September 30, 2009. HPRP guidelines require that all funds be used within a thirty-six month period, or by September 30, 2012. Additionally, guidelines require that all program activities be recorded using the Carolina Homeless Information Network's Homeless Management Information System, or HMIS. The City and Sub-Grantee(s) will use five percent of the $509,460 allocated to City of Asheville for administration of the grant. The program will be coordinated by the Community Development Division of the City of Asheville and subject to all associated US HUD regulations.

Partner agencies of the Homeless Initiative have already implemented elements found in the HPRP program guidelines in existing programs. The County, along with partner agencies of the Homeless Initiative, sees this as a strength and is hoping to apply to the State of North Carolina for an additional $500,000-$1,000,000 in HPRP funds to bolster the City's program.

The Substantial Amendment to the Consolidated Action Plan directly relates to the Council's Strategic Goal of *Affordable,* meeting the objective of implementing strategies in the 10-Year Plan to End Homelessness. Specifically, this amendment will allow funds to be directed to prevention and rapid re-housing, strategies that thus far have been drastically underfunded.

Pros:

- Approval of the Action Plan paves the way for the receipts of $509,460 in HUD funding to the City, which will be used to prevent homelessness and rapidly re-house approximately 150 people.

- The City's application promotes a similar application by Buncombe County for North Carolina's HPRP funds, which could more than double the impact of HPRP funds in our community.

Cons:

- HPRP funding, like all funds from America's Reinvestment and Recovery Funds, have a very tight timeline and strict outcomes reporting, which requires staff time and community collaboration to successfully implement.

- HPRP funding will not renew, and must be spent within two-three years once the grant agreement is signed. When HPRP funding ends, other funding sources will be needed to sustain the program if it is deemed successful and vital to meeting the goals of the 10-Year Plan to End Homelessness.

By preventing homelessness and rapidly re-housing households that are in a housing crisis, we limit the probability that individuals will become chronically homeless. The 10-Year Plan estimates that it can cost up to $12,000 in public funds to pay for someone who is experiencing chronic homelessness. The project increases the likelihood that individuals and families will maintain their employment, education, and community relationships.

Staff recommends approval of the resolution authorizing submission of a substantial amendment to the City's Consolidated Annual Action Plan for 2008-09 to the U.S. Dept. of Housing and Urban Development.

Vice-Mayor Davis closed the public hearing at 8:02 p.m.

In response to Councilwoman Cape, Ms. Sawyer said that to qualify for the program, people have to show that they will be able to sustain their own housing after the financial assistance is over. The longest period of financial assistance someone could receive is 18 months.

When Councilman Mumpower asked if the faith based communities will have access to this funding option, Ms. Sawyer said this is just like any other grant that has come through the Community Development Division.

Councilman Mumpower said that he has a personal concern that the 10-Year Plan devotes a lot of revenue to what is arguably an unsustainable model, which basically follows the public housing model. He is concerned we will not find the funding for it going forward. He felt that public housing in this community has proven to be an incubator for drugs, crimes, etc. that put our children and elderly at risk. He felt that the faith based communities can achieve a better sustainability aspect regarding social services for providing permanent housing or transitional housing. He has requested Mayor Bellamy schedule a presentation from the faith based communities regarding where there might be better places to invest our dollars. He was also concerned that there is a never ending supply of homeless people in our community and that we are chasing an impossible effort. Not that we shouldn't continue to try, but to use our dollars wisely and we are not doing that. He was also concerned spending these borrowed federal dollars. He felt that the lack of accountability in a lot of our services is a missing part of the equation.

Councilwoman Cape said that the world has always had people that needed care and we are trying to find compassionate and healthy successful models. .

Councilman Miller was confident that with the help of private organizations and the faith based community we can strive to reduce homelessness.

Councilman Newman supported this action in that in our current economy there are thousands of people who are without a secure paycheck living paycheck to paycheck. This program will help them from becoming homeless.

Vice-Mayor Davis stated that there are a lot more people on the street, whether they are there by choice or situation. He would be amiss not to support funding to help curb that,

however, the atmosphere in the western corridor of Asheville needs some accountability and we must continue to try to do something different.

Vice-Mayor Davis said that members of Council have previously received a copy of the resolution and it would not be read.

Councilman Newman moved for the adoption of Resolution No. 09-91. This motion was seconded by Councilman Miller and carried on a 4-2 vote, with Councilman Russell and Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 32 – PAGE 44

V. UNFINISHED BUSINESS:

A. QUARTERLY REPORTS

Planning & Economic Development Chair Report

Councilwoman Cape, Chair of the City Council Planning & Economic Development Committee, provided Council with an update of their activities during the last quarter. She thanked her other Committee members of Vice-Mayor Davis and Councilman Russell for their hard work on this Committee.

Strategic Operating Plan

Assistant City Manager Jeff Richardson reviewed with Council the 2008-09 Strategic Operating Plan.

In the affordable focus area (1) Preliminary HOPE VI feasibility study complete (funded by the City of Asheville); (2) Focusing on two properties, Aston Park Tower and Lee-Walker Heights; (3) Proposals for architectural and engineering services currently being evaluated; (4) Design teams selected by end of May to proceed with site planning, analysis and design work; (5) Community outreach meetings underway and will continue throughout design process; (6) Three new Housing Trust Fund loans were approved, totaling $670,000; (7) The Asheville Regional Housing Consortium allocated $1.5 million dollars of federal HOME for affordable housing in the four county consortium region; (8) The HOME and CDBG application process resulted in the preliminary approval for funding for the creation of 316 new units of affordable housing; and (9) 37 Asheville City homes owned by lower-income households will be improved using new CDBG funding.

In the green focus area (1) Public Works (a) Collected 17,958.81 tons of solid waste in Fiscal Year (FY) 2008-2009; (b) Collected 3,877.70 tons of recyclable material in FY 2008–09; (c) Completed 35 side walk maintenance work orders and installed two ADA ramps; (d) Swept 1,341 miles of roadway and collected 1,010 tons of debris; and (e) Completed two energy conservation campaigns with Asheville Fire & Rescue Department (AFR) and Parks and Recreation; (2) Information Technology (a) Telework Program - Supports 5-10% of work force.; (b) Automatic PC Shutdowns - Estimated savings of $12,000; and (c) Hardware Procurement - Achieved 100% of CRT to LCD monitor replacements (69% less energy consumed); and (3) Transportation and Engineering (a) Received grant money from Congressman Heath Shuler for Hybrid bus; and (b) Continued implementation of the Environmental Management Systems Training.

In the safe focus area of AFR (1) AFR's annual compliance report was approved by the Center for Public Safety Excellence. This approval allows AFR to remain an accredited fire and rescue department; and (2) AFR is working on a transitional agreement to service a portion of the current Haw Creek fire district for FY 2009-10.

In the safe focus area of the Asheville Police Department (APD) Downtown Initiatives (1) In 2008 APD conducted 6,469 business contacts made and 117 plainclothes/surveillance operations; (2) Improvements in 2008: (a) Violent Crime in the downtown reduced by 30%; and (b) Property Crime reduced by 13%; (3) As of April 2009 APD conducted (a) 3,760 business contacts; and (b) Over 69 plainclothes/surveillance operations; and (4) 2009 Initiatives (a) Downtown Task Force; and (b) South Central District to the Economic Development Office. In addition, 18 cadets from the APD Academy graduated in March of 2009.

In the sustainability focus area (1) City of Asheville Leadership Academy (CAYLA) (a) All CAYLA Seniors have been accepted and will attend college in fall; and (b) CAYLA class completed 402 hours of community service this academic year; (2) Building Safety First Quarter Reporting (a) 2007 avg. 246 Building Permit Applications; (b) 2008 avg. 320 Building Permit Applications; (c) 2009 avg. 220 Building Permit Applications; (d) % change from 2008 to 2009 - 31% decrease; and (e) % change from 2007 to 2009 - 10.5% decrease; (3) Water Bond Project (a) Water Bond projects are approximately 90% complete; (4) Partnership Expansion with UNC-Asheville (a) GIFT Program for Reid Center; (b) Health and Wellness; (c) Culture and Recreation; (d) Economic Development and Technology; and (e) Public Safety; and (5) Partnership expansion with A-B Tech (a) Oakley Police Sub-station.

Mr. Richardson said that Council has been provided with an economy report for Fiscal Year 2008-09 (3rd Quarter). He reviewed charts on (1) employment change by major industry; (2) unemployment rates; (3) monthly home sales - units; (4) monthly home sales - average price; (5) residential building permits - units; (6) residential building permits - value; (7) City business licenses; and (8) special focus of unemployment rate by Metro.

He said that Council has been provided with the Asheville Police Department's outreaches/actions for January-March 2009.

B. BUDGET

3rd Quarter Financial Report

Chief Financial Officer Ben Durant briefed Council on the following City's overall financial position for the fiscal year through March 2009.

In summary, regarding General Fund revenues, (1) Property Taxes: (a) 96% of budget collected to date; (b) Will exceed budget by $150,000; (2) Sales Taxes: (a) 9 months collected to date; (b) Down 4.2% compared to prior year; and (c) Will come in under budget by $1.7-1.8 million; (3) Intergovernmental: (a) Will exceed budget by $400,000 (State Utility Taxes); and (4) Overall, revenues will fall short of budget by $800-900,000.

In summary, regarding General Fund expenditures (1) Departments remain on track to achieve $1.0 million targeted savings goal (a) Selective hiring program; (b) Delay vehicle & equipment purchases; (c) Civic Center capital project savings; and (d) Departmental line item reductions; and (2) Health care expenses are trending higher in recent months; (a) Possible budget amendment prior to June 30.

He then reviewed the bottom line of Fund Balance being the adopted budget was 20.3%, the current budget is 19.9% and the year-end estimate is 19.8%.

The following is more detailed information:

Amendments. During the 3rd quarter, the General Fund budget was amended two times, resulting in an overall increase in the budget of $152,926. The amendment for the cleaning of the City Hall ventilation system included an appropriation from fund balance of $119,013. Below is a

summary of all of the General Fund budget amendments adopted since the start of the fiscal year.

Amendment	Amount
Bullet Proof Vest Grant	$23,018
Energy Management Plan*	50,000
Unison Economic Development Incentive*	47,250
Grove Park Inn Fireworks Donation	40,000
City Hall Ventilation System Cleaning*	119,013
Biltmore Park Street Light Removal	33,913
Total Amendments	$313,694

* Fund balance appropriations total $216,263

Revenues. Through March 31, 2009, the City has collected $72.9 million in General Fund revenue, which represents approximately 82% of the total General Fund revenue budget. At the end of the 1st quarter, staff projected that the economic recession would result in a $1,000,000 revenue shortfall in the General Fund in the current year. In recent months, sales tax collections have continued to decline, however, other revenues have improved such that the overall revenue picture remains nearly unchanged. Staff now projects that FY 2008-09 year-end *revenue will fall short of budget by $1,100,000.*

Expenditures. General Fund expenditures through March 31st, total $64.6 million or 71% of the budget. Staff reported to Council in October that the management team had identified a set of budget savings strategies to address the current year budget shortfall, which at that point was projected to be $1.0 million. These strategies included, among others, implementation of a selective hiring program and the delay of capital equipment purchases. These expenditure targets remain on track as of the end of the third quarter. Staff is currently monitoring health care expenses and may return to Council prior to June 30 to request an amendment to the health care budget.

Fund Balance. The City ended FY 2007-08 with available fund balance of $19.67 million or 19.3% of year-end FY 2007-08 expenditures. Based on current year-end revenue and expenditure estimates, which include the $1.0 million in budget savings mentioned above, staff is projecting that *unreserved fund balance will end FY 2008-09 at $17,699,260, which will equate to 19.8% of estimated year-end expenditures.*

Formal Budget Presentation

Chief Financial Officer Ben Durant said that the objectives are to (1) provide an overview of the Fiscal Year (FY) 2009-10 General Fund budget; and (2) review the remaining budget schedule.

Budget themes for revenues include sales tax decline, property tax base growth/ annexation, no property tax increase, and user fee increases.

Budget themes for expenditures include significant cost increases; no service cuts; no market or merit pay adjustments; management streamlining and reorganization; and minimal capital funding.

Using charts he reviewed the recession impact regarding sales taxes and also property tax base growth.

Revenue adjustments include (1) No property tax rate increase; and (2) Revenue Enhancements: (a) Council-Approved fee adjustments - $700,000 (i) Adjust household recycling

to 100% cost recovery; and (ii) Increase Nature Center admission fees; and (b) Ridgefield/Airport Road Annexation Net Gain - $325,000.

Cost increases total $2,558,000. They are health insurance - $870,000; Biltmore Town Center Economic Development Payment - $450,000; Electricity - $200,000; Street Lighting $175,000; Election Costs - $160,000; Technology Expenses - $150,000; Fleet Maintenance - $130,000; Fire Annexation Contracts - $120,000; Joint City/County Programs - $107,000; Recycling Program - $76,000; Tipping Gees - $65,000; and Emergency Notification System - $55,000.

Personnel budget reductions include (1) Salary Freeze (a) Eliminate Market Adjustments - $1,000,000; (b) Eliminate Merit Pay - $750,000; (2) Re-Engineering & Management Streamlining (a) Eliminate 20 General Fund positions - $1,000,000; (b) Reduce overtime requests by 7.5% - $150,000; and (3) Early Retirement Incentive (a) 63 employees accepted; (b) Absorbed payouts with managed savings; and (c) Savings to be realized in subsequent budgets.

Operating reductions include (1) Transit Fund Subsidy - $700,000; (2) Housing Trust Fund Contribution - $300,000; (3) Fund Municipal Building Security w/ Grant - $150,000; (4) Discontinue Ice at the Civic Center - $50,000; and (4) Fund Sidewalks with ARRA Grant - $140,000.

Strategic priorities include (1) downtown cleanliness - $100,000; and (2) Pack Square Park maintenance (County will reimburse the City $150,000) - $300.000.

Capital improvements for major funded projects include: Annexation Sewer Projects - $1,870,000; Street & Sidewalk Maintenance - $952,300; Vehicle Replacement - $752,000; Golf Course Irrigation Phase II - $300,000; Overlook Park Land Purchase - $250,000; Civic Center Improvements - $250,000; Walton Street Pool Improvements - $200,000; and Building Security - $125,000.

He then reviewed the General Fund revenue and expenditure summaries.

Finally, he outlined the recommended schedule of (1) May 26 – Budget worksession at 2:30 p.m.; (2) June 9 – public hearing; and (3) June 23 – budget adoption.

Councilman Russell moved to set a budget worksession on Tuesday, May 26, 2009, at 2:30 p.m. in the Council Chamber, located on the 2nd Floor of City Hall. This motion was seconded by Councilwoman Cape and carried unanimously.

Motion setting a public hearing on June 9, 2009, for adoption of the Fiscal Year 2009-10 Annual Operating Budget

Councilman Newman moved to set the public hearing for adoption of the Fiscal Year 2009-10 Annual Operating Budget on June 9, 2009. This motion was seconded by Councilwoman Cape and carried unanimously.

C. PARKING GARAGE AFTER-HOURS PARKING RATES

Director of Transportation and Engineering Cathy Ball said this is an opportunity for City Council to revisit after-hours parking rate increases adopted by Council as part of the Fiscal Year 2009 budget.

In April 2008, City Council approved increasing the after-hours parking rates as shown in below. After-hours refers to hours where the parking garages are not staffed. These hours are from 7:00 p.m. to 10:00 a.m. and weekends except for special event parking.

	Current	Approved FY 2009	
Wall Street	Flat $2.00	$0.75 per hour	Max. $8.00
Rankin Avenue	Flat $1.00	$0.75 per hour	Max. $8.00
Civic Center	Flat $1.00	$0.50 per hour	Max $8.00

The rates above were scheduled to be implemented following the installation of parking control equipment capable of tracking these costs. Ninety-percent of the equipment was installed this winter, with only the prepaid acceptors remaining.

Using a chart, she showed the current rates along with the proposed rates for each of the three parking garages.

As Council is aware, our economic landscape has changed over the past year to the point that staff wanted to give City Council the opportunity to revisit this change prior to implementation.

The new parking garage located on College Street and operated by Buncombe County charges $1.00 per hour and a maximum daily rate of $8.00.

Staff presented this item to Downtown Association in April 2009. The comments from the group were mixed with some representatives requesting no change and others support the increase as a way to increase revenue for future parking infrastructure. The issue will be presented to the Downtown Commission on May 8, 2009. The Commission requested staff to review their recommendations of: (1) a volume discount for monthly parkers (a) currently 160 qualify; (b) proposal if > 10 spaces = 10% discount; and (c) $15,000 cost; and (2) a volume discount for validation coupons (a) approximately 30,000 per year; (b) 10% discount > 100 coupons; and (c) maximum cost of $3,000.

The Finance Committee of City Council reviewed this request and asked staff to bring this issue before the entire Council.

The approval of these fees complies with the City's plans and commitments to continue with a sustainable funding source for the parking enterprise fund for the purpose of providing public parking in downtown.

Pros:

- Additional revenue generated will offset the capital cost of the parking control equipment.
- Additional revenue will be used to fund future parking infrastructure in downtown.
- The increased rate may encourage people to purchase monthly parking spaces in the Civic Center Garage.
- Allows for consistency in applying the parking rates.

Con:

- The increased rate may discourage use of the parking garages.

Staff anticipates additional revenue of approximately $30,000 per year as a result of the approved rate increase. The increase is not as high as originally expected because Council requested that the first hour free apply to after-hours rate. (The first hour is not free currently after-hours.)

Staff requests Council review and direct staff to implement the rate increase as approved by City Council in the Fiscal Year 2009 budget.

In response to Councilman Miller, Ms. Ball said that some benefits of the new equipment include easier use of dollar bills and debit and credit cards being accepted.

Ms. Ball responded to Councilman Mumpower's inquiry about enforcement of parking meters after 6:00 p.m. She said the Downtown Master Plan has a recommendation in it to increase the hours of enforcement. As a result of that we have been doing some evaluation of the cost and benefits associated with it. There are some challenges in that our current meters are not illuminated and an enforcement officer cannot easily be able to determine whether someone is parked illegally or not. During the summer months it may be possible to increase the time without having the meters changed out at a capital expense. She noted that it would be cheaper for people to park in the parking garages if they are parking for 3 hours or less. At this point, it is not staff's recommendation to increase the hours of enforcement.

Upon inquiry of Councilman Russell, Ms. Ball said that she would be happy to review the Downtown Commission's recommendations and report back to the City Council Finance Committee.

Vice-Mayor Davis felt the Downtown Commission would be looking for more than a 10% discount for monthly parkers, but the volume discount for validation coupons may have some merit.

In response to Councilwoman Cape, Ms. Ball said that if people had to pay this hourly rate (approved earlier by Council), the best they can determine is they would pay more than $60 a month (opposed to $40 a month currently). There is also the recommendation of a 10% discount for monthly parkers.

Councilman Miller encouraged staff to work with the Downtown Association to promote the benefits of using the parking garages vs. metered parking.

Councilman Newman said that since we have extra capacity at the Civic Center, he suggested we look at a more deeply discount at the Civic Center Parking Garage. Let's try to give people some less expensive option than parking at the metered spaces.

Councilwoman Cape felt that parking in our parking garages is a bargain compared to parking in other cities.

Ms. Ball said that staff has developed a 30-day communication plan so we do ask that the rates be effective July 1, 2009, opposed to being implemented immediately.

Councilman Mumpower suggested that any decisions made about rate increases should be part of a comprehensive effort, rather than an incremental effort. Therefore, he recommended the after-hour parking rate increase action be tabled and occur at the same time the volume discounts are discussed.

Councilman Russell said that this issue was discussed six months ago and supported moving forward.

In response to Councilwoman Cape, it was the consensus of Council to instruct City Attorney Oast to research the issue enforcement limitations for on-street handicap parking.

It was the consensus of Council to instruct City staff to review the recommendations of the Downtown Commission regarding volume discounts for monthly parkers and validation coupons and report back to Council with an analysis in approximately 4 weeks, so it can be adopted prior to the new fiscal year.

Councilman Russell moved to implement the after-hours parking rate increases as approved by City Council in Fiscal Year 2009 budget, effective July 1, 2009. This motion was

seconded by Councilman Newman and carried on a 5-1 vote, with Councilman Mumpower voting "no."

D. RESOLUTION NO. 09-92 - RESOLUTION APPROVING THE CITY'S CONSOLIDATED ANNUAL ACTION PLAN FOR FISCAL YEAR 2009-10 WHICH ALLOCATES COMMUNITY DEVELOPMENT BLOCK GRANT AND HOME PROGRAM FUNDS TO SPECIFIC PROJECTS

Community Development Director Jeff Staudinger said that this is the consideration of a resolution authorizing submission of the City's Consolidated Action Plan for Fiscal Year (FY) 2009-2010 which sets out the proposed use of federal Community Development Block Grant (CDBG) and HOME Investment Partnership Act (HOME) funds for the coming fiscal year.

The City expects to have available an estimated $1,500,614 in CDBG funds and $1,553,887 in HOME funds in the fiscal year beginning July 1, 2009. The City's Housing and Community Development Committee has made recommendations for the use of CDBG funds, which must be used in housing or community development programs in Asheville, and the Asheville Regional Housing Consortium has recommended uses for the HOME funds, which must be used for housing programs within the four-county Consortium area (Buncombe, Henderson, Madison, and Transylvania counties). A total of 38 programs are recommended for funding. Allocations are consistent with the Strategic Housing & Community Plan for 2005-2010.

If approved, the HOME funds and some CDBG funds will assist 316 housing units Consortium-wide. CDBG funds will also benefit more than 5,600 low-income City residents through homeless services, housing counseling, small business assistance, and other needed services. Our partner agencies will contribute over $25,000,000 of other funding to these programs, leveraging $9.78 for every $1 of HOME and CDBG funds.

A public hearing was held at the Council meeting of April 28. No comments were received at the meeting, and none have been submitted in writing. The plan is due to be submitted to HUD by May 15.

This action complies with the City Council's Strategic Operating Plan in that it Plan directly relates to the Council's Strategic Goals of: Affordable: This plan directly supports the City's affordable housing plan, supports the city-owned land redevelopment process, and supports the development of new workforce housing in the City. It supports initiatives to end homelessness in Asheville; Green: All new housing units will, at a minimum, be Energy Star rated, and most will exceed that level of energy efficiency. A new weatherization program in the West Riverside Weed and Seed area will increase energy efficiency for at least 25 existing low income households there; Safe: Transit shelters and sidewalk improvement will improve the safety of our public infrastructure. Emergency home repairs will improve the health and safety of at least 37 Asheville households, primarily elderly households; and Sustainable: New apartments will be affordable for at least 30 years to households earning 50%-60% of median income. A new job training program for youth will focus on emerging jobs in "green" businesses.

Pros:

- Approval of the Action Plan paves the way for the receipts of over $2,900,000 of HUD funding to the City, which will be used to create affordable housing, create jobs, and improve public infrastructure.
- HUD funding will leverage $25,000,000 of additional funding for these projects.
- Reflects the carefully considered recommendations of the City's Housing & Community Development Committee and the Asheville Regional Housing Consortium.

Con:

- It is not possible to fund all the applications received, and most of those funded will receive less than the amount requested.

The Action Plan is fully funded from federal CDBG & HOME entitlement grants, unused funds from previous completed projects, and estimated program income. New assisted housing units to be constructed in Asheville will add at least $10,600,000 to the City's tax base.

Staff recommends approval of the resolution authorizing submission of the City's Consolidated Annual Action Plan for 2009-10 to the U. S. Dept. of Housing and Urban Development.

When Vice-Mayor Davis asked for public comments, none were received.

Councilman Mumpower felt this money will be for nice, but not necessary projects. He did not think this is the appropriate expenditures of revenues.

Councilwoman Cape said that the amount of return is phenomenal on these projects. This money will be well spent stimulating our economy.

Vice-Mayor Davis said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilwoman Cape moved for the adoption of Resolution No. 09-92. This motion was seconded by Councilman Miller and carried on a 5-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 32 – PAGE 45

Introduction

City Manager Jackson was pleased to recognize new Water Resources Director Steve Shoaf.

E. RESOLUTION NO. 09-93 - RESOLUTION TO ESTABLISH A PLAN FOR MULTIPLE PERMITTING FOR PACK SQUARE IN PACK SQUARE PARK

Ms. Diane Ruggiero, Superintendent of Cultural Arts, said that this is the consideration of a resolution to establish a plan for multiple permitting for Pack Square in Pack Square Park.

The use of Pack Square Park for outdoor special events has been limited due to park construction. Once complete, the park is destined to become one of the premier downtown event locations for organizations and event organizers. The first section of the park, the Pack Square area, will soon be complete and scheduled to open in late April or early May. The Pack Square area consists of 3 distinct sub areas, each of which may accommodate events without requiring the use of other sub areas. The sub lease plan would allow for separate events to be permitted within the Pack Square area of Pack Square Park.

The lawn area adjacent to the Biltmore Building (orange shaded area – Area A) would lease for the standard park usage fee of $100 for the first three hour and $25 for each additional hour. Per the Outdoor Special Event Guide, fees would be charged from the time of event set up to breakdown. Event organizers would have access to available electricity and water and would be required to obtain and additional required permits.

The streets within the Pack Square area (N. Pack Square and S. Pack Square – Area B) would not require the park usage fee. However, event organizers would still be required to obtain required permits such as outdoor special event permit, street closing permit, parking meter closings, building fire safety permit, etc. This would enable event organizers to obtain an Outdoor

Special Event Permit for a street festival or event without use of the lawn. Should the event organizer require use of the lawn, the park usage fee would be applied.

The plaza area in front of Pack Place and Asheville Art Museum (Area C) would not require the park usage fee, would only be available for small programs and may be subject to additional permitting. Events proposed in that area will be reviewed individually with consultation of other City departments to determine the safety and appropriateness of the event.

This action complies with the Parks, Recreation, Cultural Arts and Greenway Master Plan in that it assures that administrative policies promote effective provision of community festivals and events.

Pros:

- Allows the community affordable use of the Pack Square area of Pack Square Park;
- Allows for multiple events within the proposed area;
- Allows for permitting of the space to begin in conjunction with park construction completion;
- Allows for better fee consistency across all City parks.

Cons:

- Fees will not recover all operating costs Pack Square Park rental;
- Heavy use of Pack Square area could have an impact of the infrastructure, which may drive operational expenses higher in the future;
- Multiple events in the Pack Square area may compete with each other and may require additional coordination with event organizers.

Park rental will generate revenue to offset operating cost.

Staff recommends City Council adopt a resolution to establish multiple permitting plan Pack Square.

When Vice-Mayor Davis asked for public comments, none were received.

Councilman Miller said that while construction is on-going, he suggested some permanent ties in specific areas for tenting.

Vice-Mayor Davis said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Mumpower moved for the adoption of Resolution No. 09-93. This motion was seconded by Councilman Russell and carried unanimously.

RESOLUTION BOOK NO. 32 – PAGE 48

VI. NEW BUSINESS:

A. RESOLUTION NO. 09-94 - RESOLUTION AUTHORIZING THE MAYOR TO ACCEPT THREE EASEMENT DONATIONS FROM 265 BROADWAY LLC FOR THE PURPOSE OF IMPLEMENTING PHASE IV OF THE REED CREEK GREENWAY

Ms. Nikki Reid, Real Estate Manager, said that this is the consideration of a resolution authorizing the Mayor to accept three (3) easement donations (portions of PIN# 9649-23-7361-00000, 9649-23-8213-00000, and 9649-23-8163-00000) from 265 Broadway, LLC for the purposes of implementing Phase IV of the Reed Creek Greenway.

The City is in need of easements through three (3) contiguous properties in an effort to obtain 100% of the right-of-way necessary to implement Phase IV of the Reed Creek Greenway. The owner of all three (3) properties, 265 Broadway, LLC, has offered to donate the easements to the City. Once accepted, the City will have a majority of the right-of-way required for the project.

The total size of the contiguous easements is 0.10 acres. The City has not commissioned a professional appraisal of the property. Based upon the latest Buncombe County tax appraisal, the total value of the land being donated to the City is estimated at $45,150. The City will pay for all transaction costs associated with the easement.

This action complies with (1) City Council's Strategic Plan in the Green Focus Area in that it advances a multi-modal transportation plan, which includes greenways, and pursues opportunities to preserve open space; (2) the Asheville City Development Plan 2025 in that it implements the adopted Greenway Master Plan; and (3) the 2008 Parks, Recreation, Cultural Arts, and Greenways Master Plan in that it provides for further development of an existing greenway identified in the Master Plan.

The Greenway Commission unanimously approved of the acceptance of the easements during their regular meeting on April 9th, 2009.

Pros:
- The easement is being donated, allowing significant costs savings for the City.
- Acceptance of the easement will allow the project to be completed.
- Increases the City's inventory of park space.

Con:
- Added maintenance costs.

Cost savings estimated at $45,150. City staff will prepare closing documents and perform final closing.

City staff recommends City Council adopt a resolution authorizing the Mayor to accept three (3) easement donations (PIN# 9649-23-7361-00000, 9649-23-8213-00000, and 9649-23-8163-00000) from 265 Broadway, LLC for the purposes of implementing Phase IV of the Reed Creek Greenway.

When Vice-Mayor Davis asked for public comments, none were received.

Vice-Mayor Davis said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Mumpower moved for the adoption of Resolution No. 09-94. This motion was seconded by Councilwoman Cape and carried unanimously.

RESOLUTION BOOK NO. 32 – PAGE 50

B. RESOLUTION NO. 09-95 - RESOLUTION AUTHORIZING THE MAYOR TO ACQUIRE IN FEE SIMPLE A 0.214 +/- ACRE PARCEL LOCATED ON BROADWAY STREET FROM MIEGAN AND CHANDLER GORDON FOR THE PURPOSE OF IMPLEMENTING PHASE II OF THE REED CREEK GREENWAY

Ms. Nikki Reid, Real Estate Manager, said that this is the consideration of a resolution authorizing the Mayor to execute all necessary documents to perform the fee simple acquisition

of a portion of PIN # 9649-14-5085-00000 located on Broadway Street, for the purposes of implementing Phase II of the Reed Creek Greenway, for the amount of $20,000.

The subject property is located on Broadway Street about 400 feet west of the intersection of Ocala Street and Broadway. The property size totals 1.48 acres, however to accommodate for the Reed Creek Greenway, Phase II, the City is requesting authorization to purchase a 0.214 acre portion from owners Miegan and Chandler Gordon. A MSD sewer line runs the length of this 0.214 acre portion. The Gordons are requesting to retain a sewer easement on the property in order to maintain access to sewer line as part of this transaction, with the exact location of the easement to be determined prior to closing. The property was appraised Richard Smith of Dry Ridge Appraisal Services, LLC. Nikki Reid, Real Estate Manager, reviewed the appraisal and recommended a fair market value of $20,000 based on the appraisal.

This action complies with (1) City Council's Strategic Plan in the Green Focus Area in that it advances a multi-modal transportation plan, which includes greenways, and pursues opportunities to preserve open space; (2) the Asheville City Development Plan 2025 in that it implements the adopted Greenway Master Plan; and (3) the 2008 Parks, Recreation, Cultural Arts, and Greenways Master Plan in that it provides for further development of an existing greenway identified in the Master Plan.

The Greenway Commission unanimously approved of the purchase of a 0.214 portion of PIN # 9649-14-5085-00000 on Broadway Street during their regular meeting on April 9th, 2009.

Pros:
- With the purchase of the property, the City will have acquired 100% of the right-of-way necessary to implement the Phase II of the Reed Creek Greenway, therefore allowing the implementation phase to begin.
- Increases the City's inventory of park space.

Con:
- Added maintenance costs.

The fiscal impact is the compensation for property to the Gordons in the amount of $20,000. Funding for the stated purchase has been allocated by City Council via the Fiscal Year 2008/09 capital budget. City staff will prepare closing documents and perform final closing.

City staff recommends City Council adopt a resolution authorizing the Mayor to establish $20,000 as the just compensation for the property and to execute all necessary documents to perform the fee simple acquisition of a 0.214 acre portion of PIN # 9649-14-5085-00000 on Broadway Street for the purposes of implementing Phase II of the Reed Creek Greenway.

When Vice-Mayor Davis asked for public comments, none were received.

Vice-Mayor Davis said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Mumpower moved for the adoption of Resolution No. 09-95. This motion was seconded by Councilman Russell and carried unanimously.

RESOLUTION BOOK NO. 32 – PAGE 51

C. RESOLUTION NO. 09-96 - RESOLUTION AUTHORIZING THE CITY MANAGER TO MAKE PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE MOUNTAIN SPORTS FESTIVAL ON MAY 29-31, 2009

Ms. Diane Ruggiero, Superintendent of Cultural Arts, said that this is the consideration of a resolution authorizing the City Manager to make provisions for the possession and consumption of malt beverages and/or unfortified wine at the Mountain Sports Festival on May 29-31, 2009.

Mountain Sports Festival, Inc. has requested through the Asheville Parks, Recreation and Cultural Arts Department that City Council permit them to serve beer and/or unfortified wine at the Mountain Sports Festival event coordinated by the City of Asheville and allow for consumption at this event.

Mountain Sport Festival, Inc. has received the special one time permit from the North Carolina Alcoholic Beverage Control Commission (ABC) for each of the dates and event organizers are expected to complete the ABC Responsible Seller Training Program which is offered at no charge and can be done in person or on line.

The Mountain Sports Festival will be held on Friday, May 29, 2009 from 5:00 p.m. to 10:00 p.m., Saturday, May 30, 2009 from 10:00 a.m. to 10:00 p.m., and Sunday, May 31, 2009 from 12:00 p.m. to 6:00 p.m. within the boundaries of Carrier Park and will be free and open to the public.

This action does not comply with the City Council Strategic Operating Plan nor does it comply with the Parks, Recreation and Cultural Arts Master Plan.

Pro:

- Allows fundraising opportunity for Mountain Sports Festival, Inc.

Con:

- Potential for public safety issues.

There is no fiscal impact to this decision.

City staff recommends City Council adopt a resolution authorizing the City Manager to make provision for the possession and consumption of malt beverages and/or unfortified wine at the Mountain Sports Festival on May 29 – May 31, 2009.

When Vice-Mayor Davis asked for public comments, none were received.

Vice-Mayor Davis said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Newman moved for the adoption of Resolution No. 09-96. This motion was seconded by Councilwoman Cape and carried on a 5-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 32 – PAGE 52

D. RESOLUTION NO. 09-97 - RESOLUTION AUTHORIZING THE CITY MANAGER TO MAKE PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE DOWNTOWN AFTER 5 EVENTS ON MAY 15, JUNE 19, JULY 17, AUGUST 21 AND SEPTEMBER 18, 2009

Ms. Diane Ruggiero, Superintendent of Cultural Arts, said that this is the consideration of a resolution authorizing the City Manager to make provisions for the possession and consumption of malt beverages and/or unfortified wine at Downtown After Five on May 15, June 19, July 17, August 21, and September 18, 2009.

The Asheville Downtown Association, Inc. has requested through the Asheville Parks, Recreation and Cultural Arts Department that City Council permit them to serve beer and/or unfortified wine at the Downtown After Five event and allow for consumption at this event.

The Asheville Downtown Association has received the special one time permit from the North Carolina Alcoholic Beverage Control Commission (ABC) for each of the dates and event organizers are expected to complete the ABC Responsible Seller Training Program which is offered at no charge and can be done in person or on line.

Downtown After Five will be held on Friday, May 15, 2009 from 5:00 p.m. to 9:30 p.m., Friday, June 19, 2009 from 5:00 p.m. to 9:30 p.m., Friday, July 17, 2009 from 5:00 p.m. to 9:30 p.m., Friday, August 21, 2009 from 5:00 p.m. to 9:30 p.m., and Friday, September 18, 2009 from 5:00 p.m. to 9:30 p.m. within the boundaries of the 100 block of Lexington Avenue and will be free and open to the public.

This action does not comply with the City Council Strategic Operating Plan, nor does it comply with the Parks, Recreation and Cultural Arts Master Plan.

Pro:

- Allows fundraising opportunity for the Asheville Downtown Association.

Con:

- Potential for public safety issues.

The fiscal impact would be overtime pay for Asheville Police officers per City co-sponsorship agreement.

City staff recommends City Council adopt a resolution authorizing the City Manager to make provision for the possession and consumption of malt beverages and/or unfortified wine at Downtown After Five on May 15, June 19, July 17, August 21 and September 18, 2009.

When Vice-Mayor Davis asked for public comments, none were received.

Councilman Mumpower felt that the climate of activity changes with alcohol and we don't need to encourage that in our activities, especially since there are bars downtown that provide that service.

Councilwoman Cape would be open to hearing the conversation from the Downtown Association after they poll their merchants to see how they feel about the sale of alcohol at these events.

In response to Councilman Russell, City Attorney Oast said that there is a provision in the law that requires the City's approval to allow open containers on the streets. Councilman Russell noted that people cannot go into a restaurant or bar during Bele Chere to buy a drink and then drink it on the street.

Vice-Mayor Davis said that the groups (which are generally charitable and non-profits) that actually sell the wristbands are beneficiaries of the alcohol sales. The Downtown Association has difficulty funding these events without the sale of alcohol. He felt this does have a good economic effect and is well controlled.

Vice-Mayor Davis said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Newman moved for the adoption of Resolution No. 09-97. This motion was seconded by Councilwoman Cape and carried on a 5-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 32 – PAGE 55

E. RESOLUTION NO. 09-98 - RESOLUTION REQUESTING FEDERAL FUNDING FOR THE AUTOMATED VEHICLE LOCATION SYSTEM

Director of Transportation and Engineering Cathy Ball said that this is the consideration of requesting federal funding for an Automated Vehicle Location system (AVL) in the amount of $416,000 for the transit fleet as part of the upcoming Highways and Transit Authorization bill. This reauthorization process takes place every 5 years, and offers an opportunity to include high priority transportation projects for funding.

In preparation for the upcoming Highways and Transit Authorization bill that will substitute the current SAFETEA-LU – Safe, Accountable, Flexible, Efficient Transportation Equity Act - , the House Committee on Transportation and Infrastructure has issued a request for projects to be included in the new bill.

The City of Asheville is requesting funding for an AVL system. The AVL system has two components: (1) A Global Positioning System (GPS) that enables transit operations to remotely track the location of its vehicle fleet in real-time; (2) A user interface that allows communications with the riders through cellular technology, internet and real-time information on main transit stops.

The use of AVL systems improves fleet management and customer service. In operational terms the system provides information to better scheduling the service and to identify problems (buses running hot, delays, accidents on the road, etc). In addition, this information is available to the riders in a website especially designed for the customers, indicating the location and arrival time of the next bus and is also available through text messages.

AVL is shown to increase ridership, capital savings (potential reductions in fleet size due to better utilization of vehicles), lower annual maintenance costs and generally a lower vehicle cost per mile. AVL systems improve schedule adherence, monitoring and transfer coordination. AVL allows for improved ability of dispatchers to control bus operations as well as better monitoring of driver performance. AVL provides the capability to inform passengers of predicted bus arrival times enhancing the quality of transit service and allowing travelers to make better travel decisions. AVL provides more complete and accurate data for scheduling and planning of routes and bus stops.

The cost of the AVL system is $502,000. The City is requesting funding for 80% of the cost and will contribute with the additional 20%. The City will seek for additional 10% through the N.C. Dept. of Transportation (NCDOT).

Applications are due by May 14, 2009.

From City Council's adopted 2008-09 Strategic Plan, the two goals most directly addressed are (1) Establish a multi-modal transportation plan including sidewalks, bike paths, signal preemption, transit and other system improvements; and (2) Achieve short term and long term energy goals and reduce city carbon emissions by 2% per year.

Pro:

- The AVL system will improve transit operations, safety response and customer service.

Con:

- The City has to contribute with 20% of the cost, though staff will seek for additional 10% funding through NCDOT.

The City of Asheville's request is $416,000. If the City is successful in obtaining these funds, we would need to contribute $86,000 as part of the local match and will seek for 10% of this amount through the NCDOT.

City staff recommends City Council support to request funding for the Automated Vehicle Location system in the amount of $416,000.

When Vice-Mayor Davis asked for public comments, none were received.

Councilman Newman felt this technology will add value to our existing system.

In response to Councilman Russell, Ms. Ball said that this has been an unfunded project on the Stat's Transportation Improvement Plan. City Council and the Transit Study consultants have previously endorsed this project.

In response to Councilman Mumpower, Ms. Ball said that most riders have cell phones and the information can be sent or searched for in many different ways. People can even sign up for automatic messages.

In response to Councilman Mumpower, Ms. Ball said that she would be happy to provide Council with information on the progress to keep our buses on schedule.

Councilman Mumpower felt we need to fix the problem of making sure our buses are where they're supposed to be within reason. He felt this is a request for federal borrowed dollars and questioned if this is a legitimate expenditure.

Councilman Miller wanted to make sure that the interface is as user-friendly as possible.

Vice-Mayor Davis said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Newman moved for the adoption of Resolution No. 09-98. This motion was seconded by Councilwoman Cape and carried on a 5-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 32 – PAGE 58

F. BOARDS & COMMISSIONS

It was the consensus of Council to reappoint Brian Woods, Michael Burke and George Keller, and interview J.L. Thompson for a vacancy on the Civic Center Commission.

It was the consensus of Council to interview Larry Harris for a vacancy on the Civil Service Board.

It was the consensus of Council to reappoint Harry Harrison, and appoint Jenny Bowen and a board member from the Asheville Area Arts Council to the Public Art Board.

Due to the date and time conflict for a Council member to serve on the Pack Place Board of Directors, Vice-Mayor Davis said that he would contact the Chair of the Pack Place Board to see if there is any flexibility in their meeting date or time.

Councilman Russell suggested that when there are board openings that the chair for that board contact the City Clerk to let her know if there are any board recommendations for appointment.

VII. OTHER BUSINESS:

E-Verify

Councilman Mumpower said that he spoke with Ms. Debora C. Fikes, CPA, Forensic Auditor for the Department of Homeland Security, who sent him the following e-mail "I understand that there are a number of contractors working on multiple projects in the Asheville area that could possibly be employing unauthorized workers. I would like to propose your city contracting and/or permit office to set up a time/place for my co-worker, Darren Vazquetelles and myself to come speak about correct preparation of the I-9 form and how E-Verify and IMAGE (ICE Mutual Agreement between Government and Employers) can assist the business owners/human resource managers in hiring only those authorized to work in the United States." He asked if Council would be interested in hosting an ICE informative seminar, possibly in cooperation with the Chamber of Commerce and some manufacturing organizations in the community. It was the consensus of Council to ask City staff proceed in making these arrangements.

Claims

The following claims were received by the City of Asheville during the period of April 17-30, 2009: 32 Broadway Association (Water), Keller Knight (Water), Mary Hagan (Streets), Michelle Denton (Water), Piedmont Paper (Streets), Paul Finder (Police), Louise Dixon (Police), Phil Ramsey (Water), Milton Honig (Police), Patricia Helms (Sanitation), Kacey Rawson (Transit), Jean Stephens (Water) and Michael Greene (Streets).

These claims have been referred to Asheville Claims Corporation for investigation.

VIII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

IX. ADJOURNMENT:

Vice-Mayor Davis adjourned the meeting at 10:02 p.m.

Magdalen Burleson
CITY CLERK

MAYOR

Tuesday – May 26, 2009 – 2:30 p.m.

Worksession

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Jan B. Davis; Councilwoman Robin L. Cape (arrived at 2:57 p.m.); Councilman Kelly M. Miller; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; Councilman William A. Russell Jr.; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

City Council held a worksession to discuss the budget and the economic stimulus package update.

Budget

Chief Financial Officer Ben Durant said that on May 26, 2009, City Council will hold a budget worksession at 2:30 p.m. to discuss the Fiscal Year 2009/2010 Manager's Recommended Budget.

At the May 12, 2009, formal City Council meeting, staff presented the Fiscal Year 2009/2010 Manager's Recommended Budget, with a focus on the general fund.

Staff would suggest that Council use the remaining time during the worksession to review and discuss the budget fund by fund. If there are questions that require more extensive research, we will provide those responses at a subsequent Council meeting. As usual, staff from each of the departments will also be available at the worksession to answer questions.

A public hearing on the Fiscal Year 2009/2010 Manager's Recommended Budget will be conducted on June 9, 2009, and City Council is scheduled to adopt the budget on June 23, 2009.

Staff recommends that City Council discuss the Fiscal Year 2009/2010 Manager's Recommended Budget fund by fund.

Mr. Durant began the budget worksession with a brief recap of the general fund budget themes that were discussed at the May 12th meeting, and provided an overview of some pending issues that may impact the general fund budget.

He said that the objectives of this worksession are to (1) have a staff overview of the FY 2009-10 budget; and (2) have City Council review of the budget fund by fund.

General Fund budget themes include (1) Sales tax decline; (2) Property tax base growth/annexation; (3) No property tax increase; (4) $1.5 million fund balance appropriation; (5) Higher cost recovery from fees; (6) Significant cost increases; (7) No service cuts; (8) No market or merit pay adjustments; (9) Management streamlining & reorganization; and (10) Minimal capital funding.

General Fund pending issues include (1) Animal Control: $32,000; (2) Civil Service Legal Fees: $100,000; (3) Further Sales Tax Decline?; (4) Health Care & Other Inflationary Trends (a) $1.3 million health care amendment in current year; and (5) Stimulus Funds.

Budget Director Tony McDowell then presented a summary of the major budget themes for each of the City's seven enterprise funds.

Water Fund budget themes include (1) 6.3% decrease due to the removal of $3.5 million in one time capital expenses for Brevard Road project; (2) Significant inflation in key areas; (a) Health Care: $220,000; and (b) Electricity & Chemicals: $400,000; and (3) $5.6 million for capital improvement projects.

He then reviewed the Water Fund Capital Improvement Projects fund, which totals $5,597,735.

Transit Fund budget themes include (1) 4.9% budget increase; (2) Additional federal & state funding of $947,000; (3) $693,000 decrease in general fund subsidy; and (4) Increased operating costs (a) Fuel & maintenance; and (b) Black Mountain & Weaverville service (state reimbursed).

Stormwater Fund budget themes include (1) 12.3% budget decrease; (2) Development permit revenue reduced 29% from $287,000 to $204,000; and (3) One position eliminated & two positions will be paid from capital & grant funded projects.

Parking Fund budget themes include (1) 8.4% budget decrease; (2) Recession has impacted garage revenue (a) $300,000 decrease; (3) $500,000 for possible debt service payment on Biltmore Avenue parking deck; and (4) $57,240 to fund signage for the Wayfinding program.

Civic Center budget themes include (1) 6.9% budget decrease; (2) General fund subsidy reduced from $397,000 to $391,000; (3) Capital funding reduced from $400,000 to $250,000; and (4) Discontinued ice installation (a) $50,000 in immediate savings; and (b) Avoidance of another $150,000 in repair work to the chiller.

Golf Fund budget themes include (1) 14.1% budget decrease; (2) Restructuring & streamlining of operations (a) 3 positions eliminated; and (b) $150,000 in savings; and (3) Will operate without a general fund subsidy.

Festivals Fund budget themes include (1) 30% budget decrease (a) Reduction in the overall footprint for 2009 Bele Chere and (b) No ticketed event at the 2009 Bele Chere; (2) Recession impacting revenues (a) Attendance is expected to be down 10-12%; and (b) $35,000 decrease in sponsorship revenue budget; and (3) Continuation of general fund subsidy (a) $184,726 (2008-09 was $162,675).

Using a chart, he reviewed the enterprise fund summary.

Throughout the presentation, Mr. Durant, Mr. McDowell and Civic Center Director Sherman Bass responded to various questions/comments from Council, some being, but are not limited to (noting that information not readily available would be provided to Council): update on the sales tax and what the state is using for their calculations; does City staff have any concerns the state will come to local governments to balance their budget; what is the rate of inflation from the last 6 months; explanation of the 3% overall budget increase; does the Consumer Price Index make allowances for health care; is there a better figure to compare our costs to than the Consumer Price Index; what was the analysis regarding health care costs for employees; if there are funds left over at the end of the Fiscal Year, do they go back into the General Fund Fund Balance; why is the investment income flat; suggestion to look at advertising opportunities in our parking decks to raise revenue; what has staff done, and how has staff reacted, to filling the $5 Million gap learned about in November, 2008; what constitutes the emerging issue of $100,000 Civil Service legal fees; what are our fuel costs based on this year; additional detailed information on health care costs, factors associated with the 15% increase, and what innovative ways is the City doing to reduce health care costs; what is the Metropolitan Sewerage District's projected revenue loss; reminder that there are available spaces in the parking deck for people who would like to rent them; why and how was the Civic Center capital improvement plan decreased; request

for an update on the Civic Center's white paper presented to Council several years ago; and how many people will be affected with the deletion of the ice at the Civic Center.

In response to Councilman Mumpower, City Manager Jackson said that input and review of applicable Capital Improvement Project lists have been sought from all appropriate boards.

At 3:30 p.m., Mayor Bellamy announced a 5 minute recess.

Economic Stimulus Package Update

American Recovery & Reinvestment Project Manager Brenda Mills said that the purpose of this report is to provide City Council with an update on staff work to date on the American Recovery & Reinvestment Act (ARRA) funding opportunities and next steps.

Staff has worked since the February 17, 2009, when the $789 billion funding for the American Recovery & Reinvestment Act (ARRA) was signed by President Barack Obama to respond to opportunities offered by the ARRA while ensuring the highest level of transparency and project coordination.

The federal stimulus package provides about $6.2 billion in direct aid to North Carolina to create jobs and rebuild infrastructure, including highways and schools. The recovery program will also inject additional funding into the state through targeted tax cuts, additional grants from federal agencies and direct funding for specific federal programs in the state. We anticipated that the majority of recovery fund opportunities for the City of Asheville would come through specific grant or other program funding opportunities offered by state agencies.

Funding Announcements & Applications:

Entitlements

- Homeless Prevention Funds ($509,460)
- Community Development Block Grant - R ($332,942)
- Energy Efficiency & Conservation Block Grant ($804,700) - $250,000 for Community Projects
- Edward Byrne Justice Assistance Grant ($265,466) – Memorandum of Understanding with Buncombe County
- Transit Capital Projects ($2,500,000) – French Broad River Metropolitan Planning Organization (MPO) to guide choices for this funding – prioritized list submitted April 30, 2009
- Transportation Small Enhancement Projects (shovel ready under $100,000) – staff submitted projects by letter in February
- MPO Urbanized Area Funding ($6,000,000) - French Broad River MPO to guide choices for this funding – prioritized list submitted April 30, 2009

Grant Applications

- Neighborhood Stabilization Program (NSP2) - NSP 2 funding is available only for communities and neighborhoods showing high need. HUD has published the maps that indicate the high need areas for foreclosure and vacancy. Our Community Development Director, Jeff Staudinger, has reviewed the maps for the City of Asheville and no census

tracks in our city meet the high need criteria. He advises that we are not eligible for NSP 2 funding.

- N.C. Dept. of Environment and Natural Resources (NCDENR) Drinking Water State Revolving Fund – Four Applications
- NCDENR Clean Water State Revolving Fund – Seven Applications
- Department of Energy Mobile Source Emissions Reductions Grant ($60,000)
- Federal Transit Administration – Transit Investment for Greenhouse Gas and Energy Reduction Grant (TIGGER) -$2,240,000
- Department of Justice (DOJ) – COPS Hiring Grant ($1,645,668)
- DOJ – Local Youth Mentoring Initiative ($482,250)
- DOJ – Competitive Byrne Grant: Project Safe Neighborhoods GREAT Families
- DOJ - Competitive Byrne Grant: Downtown Safety & Crime Prevention Initiative - equipment

Transparency and Accountability:

The ARRA website page is kept updated on funding announcements and applications that pertain to the City of Asheville. Resource links are provided to help with additional information on funding and granting opportunities.

The ARRA newsletter began in April and is sent to the community at large with updates, information and education on the ARRA funding and how it affects Asheville and WNC. There is a link to sign up for the newsletter as well. We are receiving positive feedback on the information.

Public meetings were held on May 14th and May 21st to provide information to the community which was very well received. Information from the meeting is online for future reference and we are continuing to answer inquiries in regards to the ARRA funding.

Next Steps for Staff:

We will be working on meeting and training with affected departments on being 'shovel ready,' ARRA funding requirements and reporting, grant receipts and procedures and contracting procedures once grant funding is awarded. It is our goal to help the process be transparent for the community and run smoothly for staff in getting projects out for contracting and bidding. This will also include a plan to advertise contracting opportunities in addition to what is provided with our regular contracting practices.

We will be meeting with community stakeholders in regards to their ARRA funding. We hope they will provide updates to City Council in the near future on their plans for ARRA funding. Our goal is to provide update to the community on how ARRA funding is affecting our area overall.

Ms. Mills responded to Mayor Bellamy's question of what the City's commitment is to make sure that we are hiring locally and what we can do to encourage our co-application agencies to hire local people as well.

Councilman Mumpower was concerned that this is basically Washington's Community Welfare Program based on borrowed dollars that will have to be repaid. He was concerned that

our enthusiasm will bring us short-term returns, but long-term our children and grandchildren will have to pay for this.

In response to Councilman Mumpower, Ms. Mills explained how we are making information readily available for contractors to check on the legal status of employees. City Attorney Oast also noted that he will update Council on any new state initiatives regarding employing local, legal citizens.

At 3:51 p.m., Mayor Bellamy announced a recess prior to beginning the formal Council meeting.

Regular Meeting **Tuesday, May 26, 2009 – 5:00 p.m.**

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Jan B. Davis; Councilwoman Robin L. Cape (excused at 10:05 p.m.); Councilman Kelly M. Miller; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; Councilman William A. Russell Jr.; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Bellamy led City Council in the Pledge of Allegiance.

INVOCATION

Councilwoman Cape gave the invocation.

I. PROCLAMATIONS:

II. CONSENT AGENDA:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON MAY 12, 2009

B. RESOLUTION NO. 09-99 - RESOLUTION AUTHORIZING THE MAYOR TO EXECUTE AN EASEMENT FOR THE INSTALLATION OF POWER UTILITY LINES AND FACILITIES ON CITY PROPERTY ON AIRPORT ROAD (WNC AGRICULTURAL CENTER – NEW LIVESTOCK FACILITY)

Summary: The consideration of a resolution authorizing the Mayor to execute an easement for electrical power facilities at the Western North Carolina Agricultural Center (herein "WNCAC")

The land on which the WNCAC is located is owned by the City of Asheville. It is leased to the State of North Carolina, specifically, the Department of Agriculture and Consumer Services, which uses it for the WNCAC. A new livestock facility is being constructed on the property, and this new facility requires electrical service. The new line would run from an existing transformer west about 30 feet and then north about 150 feet to new transformer to serve the new facility. The easement area would include 10 feet for the line, with the line being in the center, and 10 feet around the enclosure for the transformer.

This installation has been approved by the Department of Agriculture, which requested it. Such improvements are within the scope of and contemplated by the lease.

This action complies with the City's Strategic Operating Plan in that it contributes to an existing partnership with the State for the operation of a regional facility, and promotes community education on agriculture.

Pros:
- Facilitates development and use of WNCAC
- Promotes community education on agriculture

Con:
- None noted

No direct fiscal impact for City; marginal impact on State.

Adoption of the resolution is recommended

RESOLUTION BOOK NO. 32 – PAGE 59

C. RESOLUTION NO. 09-100 - RESOLUTION APPOINTING MEMBERS TO THE PUBLIC ART BOARD

Summary: The terms of Harry Harrison, Dana Irwin and Bill Fishburne, as members of the Public Art Board, expired on December 31, 2008. Mr. Fishburne is not eligible for reappointment and Ms. Irwin has resigned.

At the May 12, 2009, meeting, it was the consensus of Council to (1) reappoint Mr. Harrison to serve a three year term, term to expire December 31, 2011, or until his successor has been appointed; and (2) appoint Ms. Jenny Bowen (to replace Ms. Irwin) to serve a three year term, term to expire December 31, 2011, or until her successor has been appointed.

RESOLUTION BOOK NO. 32 – PAGE 61

Mayor Bellamy asked for public comments on any item on the Consent Agenda, but received none.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Mumpower moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Russell and carried unanimously.

III. PRESENTATIONS & REPORTS: None.

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING RELATIVE TO INITIALLY ZONE PROPERTIES RECENTLY ANNEXED AND LOCATED ALONG AIRPORT ROAD TO COMMERCIAL INDUSTRIAL DISTRICT

ORDINANCE NO. 3733 - ORDINANCE TO INITIALLY ZONE PROPERTIES RECENTLY ANNEXED AND LOCATED ALONG AIRPORT ROAD TO COMMERCIAL INDUSTRIAL DISTRICT

Mayor Bellamy opened the public hearing at 5:13 p.m.

Urban Planner Blake Esselstyn said that this is the consideration of an ordinance to initially zone properties recently annexed and located along Airport Road Commercial Industrial District. This public hearing was advertised on May 15 and 22, 2009.

On April 28, 2009, the Asheville City Council voted unanimously to zone 86 of 112 parcels in the Airport Road Annexation Area as Commercial Industrial, Highway Business, and RM-16 Districts. At that meeting, property owners in and around the other 26 parcels in the annexation area, which staff had recommended for RS-8 zoning, voiced an interest in Commercial Industrial zoning, despite being an area predominately comprised of single-family residential development. Their interest was based on the facts that the area was surrounded by commercial and industrial businesses and that the property had previously been zoned EMP (Employment) District by Buncombe County.

This property, more specifically, is located off of Bradley Branch Road, Gilliam Road, Machen Road, and Benwood Drive. As previously stated, the property is primarily single-family in nature, but does contain a paving business, a few multi-family structures, and a family care home. Initially, the Planning staff and Asheville Planning and Zoning Commission had recommended these properties be zoned RS-8 in keeping with the existing development pattern. Additionally, Commercial Industrial does not allow single-family residences which would make the existing homes grandfathered, nonconforming uses.

Staff met with property owners in the area on Monday, May 11, 2009, in order to discuss the issues with them and get a sense of their interests. At the meeting and subsequent to the meeting, it became clear that the consensus in the area was for the properties to be zoned Commercial Industrial. In these early communications, staff failed to mention the fact that the single-family homes in the area would be nonconforming and thus, unable to expand. Staff provided that information to the affected property owners and they recommended their property be rezoned Commercial Industrial District.

In light of the interests of the property owners, staff is supportive of the following 26 parcels being zoned Commercial Industrial (CI) District:

> ***CI Commercial Industrial District*** – PINs 9643981845 ,9643983896, 9643983997, 9643986989, 9643988901, 9643994100, 9643994221, 9643994309, 9643994381, 9643996245, 9643996422, 9643999194, 9643999226, 9653081568, 9653081658, 9653081747, 9653081838, 9653090312, 9653090417, 9653090508, 9653091010, 9653091180, 9653091294, 9653091399, 9653092504, 9653092608.

Pros:

- Supports the *Asheville City Plan 2025* goals for regional commercial corridor development.
- Is compatible with the zoning patterns (both City of Asheville and Buncombe County) in the area.

Con:

- The single-family homes would become grandfathered nonconforming uses in the Commercial Industrial District.

In response to the interest of the property owners, staff is supportive of these 26 parcels being zoned Commercial Industrial (CI) District.

Mayor Bellamy closed the public hearing at 5:15 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 3733. This motion was seconded by Councilman Miller and carried unanimously.

ORDINANCE BOOK NO. 25 – PAGE 285

B. PUBLIC HEARING TO SOLICIT COMMENTS ON A SUBSTANTIAL AMENDMENT TO THE CITY'S 2008-09 CONSOLIDATED ACTION PLAN, DETAILING THE CITY'S PLAN TO DISTRIBUTE $332,952 COMMUNITY DEVELOPMENT BLOCK GRANT FUNDS (CDBG-R) ALLOCATED TO THE CITY OF ASHEVILLE

RESOLUTION NO. 09-101 - RESOLUTION AMENDING THE CITY'S 2008-09 CONSOLIDATED ACTION PLAN, DETAILING THE CITY'S PLAN TO DISTRIBUTE $332,952 COMMUNITY DEVELOPMENT BLOCK GRANT FUNDS (CDBG-R) ALLOCATED TO THE CITY OF ASHEVILLE

City Attorney Oast noted that Council's rules specify that a public hearing must be set by special order of the Council, except in zoning items. Staff was not advised in time for the public hearing to be set at Council's last meeting. Therefore, Councilwoman Cape moved to waive the rules and proceed with the public hearing. This motion was seconded by Councilman Newman and carried unanimously.

Mayor Bellamy opened the public hearing at 5:18 p.m.

Mr. Jeff Staudinger, Community Development Director, said that this is the consideration of a resolution authorizing submission of a Substantial Amendment to the Consolidated Action Plan for Fiscal Year (FY) 2008-09, enabling the City to receive $332,942 in CDBG-R grant funding from the U.S. Department of Housing and Urban Development. This public hearing was advertised on May 15 and 22, 2009.

The American Recovery and Reinvestment Act authorized the US Department of Housing and Urban Development to distribute an additional $1 billion of Community Development Block Grant funds to eligible recipients. The City has been allocated $332,942 of these funds, allocated as "CDBG-R" funding.

HUD is requiring unusually fast action on the part of grantees to receive and further allocate these funds. Entitlement cities (of which Asheville is one) have until June 5, 2009, to submit their plan for the use of the funds to HUD. HUD has in turn waived regular citizen participation provisions, requiring only a seven-day public comment period and reduced publishing requirements. City staff prepared and published on the City web site as of May 18, 2009, the proposed Substantial Amendment, thus satisfying the public notice requirements

The City's Housing and Community Development Committee has made recommendations for the use of CDBG-R funds, which must be used in housing or community development programs in Asheville. The recommended uses are consistent with the Strategic Housing & Community Development Plan for 2005-2010. Although statutorily available for any eligible community development activity, HUD *"strongly suggests that grantees incorporate consideration of the public perception of the intent of the Recovery Act in identifying and selecting projects for CDBG-R funding."* Section 1602 of the Recovery Act requires that grantees shall use grant funds in a manner that maximizes job creation and economic benefit.

HUD also states, *"HUD strongly urges grantees to use CDBG-R funds for hard development costs associated with infrastructure activities that provide basic services to residents or activities that promote energy efficiency and conservation through rehabilitation or retrofitting of existing buildings."*

According to HUD: *"In selecting projects to be funded, recipients shall give priority to projects that can award contracts based on bids within 120 calendar days from the date the funds are made available to the recipients; and that for CDBG-R funds being used for infrastructure investments, recipients shall give preference to activities that can be started and completed expeditiously, including a goal of using at least 50 percent of the funds for activities that can be initiated not later than 120 calendar days after February 17, 2009."*

In order to meet the program rules and the intent of the ARRA, the following projects have been recommended for funding:

- **Tier II Emergency Home Repair, $75,000.** Sub-recipient: Mountain Housing Opportunities (MHO). MHO facilitates the extensive repair of homes owned by very-low and low-income, special need households. The maximum investment per home is $15,000. MHO coordinates weatherization activities with Community Action Opportunities; the repairs facilitated by MHO enable weatherization activities to be allowable and effective. MHO will be able to immediately implement the CDBG-R activities. Local building contractors are informed of the program, and MHO will assist those who need help obtaining DUNS and CCR numbers.

- **Weed and Seed Weatherization Program, $75,000.** Sub-recipient: Western North Carolina Green Building Council (WNCGBC). WNCGBC will market and facilitate weatherization for 60 low-income households in the West Riverside area of Asheville. They will partner in this program with the Community Action Opportunities Weatherization program. Marketing of the program will begin immediately upon funding. Youth participating in the Asheville GO program will serve as paid apprentices performing the weatherization work.

- **Mountain BizCapital, $26,000.** Mountain BizCapital is a revolving loan fund for start-up businesses. Entrepreneurs are trained by Mountain BizWorks, which also administers the RLF. Education and training are ongoing, producing an ongoing pool of start-up business applications for the Revolving Loan Fund. At least two start-up businesses will be assisted with these funds.

- **City of Asheville, $123,648.** The City of Asheville will use these funds to contract for a sidewalk serving a lower-income neighborhood in the City. Forty percent of residents of that neighborhood do not own cars, and must currently walk along a road with no sidewalks to schools, jobs, shopping and public transportation. All rights-of-way for the section of sidewalk to be built with CDBG-R funds have been obtained, and the City is prepared to contract for this work upon completion of the environmental review, which is underway.

- **City of Asheville, $33,294: Program Administration.** 10% of grant funds are for administration.

The recommended use of these funds complies with the City Council's Strategic Operating Plan in that it directly relates to the Council's Strategic Goals as noted: (1) Affordable: This plan will assist at least 65 Asheville households remain in affordable housing; (2) Green: The weatherization program in the West Riverside Weed and Seed area will increase energy efficiency for at least 60 existing low income households there; (3) Safe: Sidewalk improvements will improve the safety of our public infrastructure. Emergency home repairs will improve the health and safety of at least 5 Asheville households, primarily elderly households; and (4) Sustainable: New jobs created through the entrepreneurship training program have an increased chance of success.

Pros:

- Approval of the Action Plan paves the way for the receipts of over $332,942 of HUD funding to the City, which will be used to preserve affordable housing, create jobs, and improve public infrastructure.
- HUD funding will leverage $ 345,813 of additional funding for these projects.
- Reflects the carefully considered recommendations of the City's Housing & Community Development Committee.
- Because these projects were funded from the pool of existing approved 2009-2010 applications, some of this year's CDBG funds will be freed up for reallocation.

Con:

- Were more time available, a greater range of projects might have been able to be considered for funding.

The Action Plan proposed amendment is fully funded from federal CDBG entitlement grants.

The Housing and Community Development Committee and staff recommend the approval of the resolution to approve the Substantial Amendment to the Consolidated Action Plan for FY 2008-09, enabling the City to receive $332,942 in CDBG-R grant funding from the U.S. Department of Housing and Urban Development.

Mr. Gordon Walton, President of the Board of Homeward Bound, introduced Ms. Fran Harvey, the new Executive Director, and Rev. Heather Spencer, the new Director of A-Hope. Ms. Harvey explained that the mission of Homeward Bound is to end the cycle of chronic homelessness and briefed Council on their overall success rate. Rev. Spencer explained that her role will be more community focused and she looked forward to working with the City of Asheville.

Vice-Mayor Davis felt it would be beneficial for Rev. Spencer to hold a neighborhood meeting in order to introduce herself and perhaps pledge her support in working with the neighborhood in finding some solutions to the difficulties arising from clients at A-Hope.

Mayor Bellamy closed the public hearing at 5:29 p.m.

Councilman Mumpower could not support the action in that this is basically Washington's Community Welfare Program based on borrowed dollars that will have to be repaid. In addition, he was concerned whether the choices are a wise investment of those dollars given the realities of our current economy.

Mayor Bellamy said that members of Council have previously received a copy of the resolution and it would not be read.

Councilwoman Cape moved for the adoption of Resolution No. 09-101. This motion was seconded by Councilman Miller and carried on a 6-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 32 – PAGE 62

C. PUBLIC HEARING ON THE DOWNTOWN MASTER PLAN

RESOLUTION NO. 09-102 - RESOLUTION ADOPTING THE DOWNTOWN MASTER PLAN IN CONCEPT

Ms. Sasha Vrtunski, Project Manager for the Downtown Master Plan, said that this is the consideration of a resolution adopting the Downtown Master Plan. This public hearing was advertised on May 15 and 22, 2009.

City Council heard a presentation of the final version of the Downtown Master Plan by the consultants on May 12, 2009. City Council authorized the development of a Downtown Master Plan in June, 2007. Goody Clancy was selected from a field of highly qualified consultants and began work in April 2008. A draft of the plan was presented at a public meeting on January 15, and further changes were made. The final draft was released to the public on March 23 and has been presented to and approved by the Planning and Zoning and Downtown Commissions and the Advisory Committee.

From the beginning of this process, the Downtown Commission stressed to the consultant team that our community is one of many opinions, and that they would have to work hard to find common ground, and to craft a plan that could meet the needs of many different perspectives. The plan strives to do just that. The recommendations are carefully balanced to help form our future downtown while allowing for creativity, flexibility and new initiatives, offering action on the elements that arose as most important to the greatest number of those who were a part of the process.

The master planning process provided numerous opportunities for citizen and stakeholder input. The turnout was very high - much higher than in any effort in recent years – an estimated 4,000 hours of citizens' time in public meetings and committee meetings; and there was wide representation of many different perspectives. In addition to public meetings the consultants conducted over 100 interviews and meetings with stakeholders, and presentations were made at dozens of groups throughout the community.

The consultant team turned that input into a set of design and plan principles and then a set of recommended strategies. Some of these recommendations were initially controversial, and there were numerous discussions between stakeholders to find common ground. Reflecting that effort, some elements that began as recommended actions evolved into recommendations for future consideration located in the Plan Appendix. As a result, there is a strong feeling among the majority of those who participated in the process that the plan now presents an important middle ground that will improve downtown development through predictability, rational standards and clarity.

It is crucial to understand that the Master Plan and the Master Plan Appendix serve two different functions. The Plan is the "roadmap" for Council, staff and the community, while the Appendix supplies additional information and suggestions to staff and the community. By adopting the plan, City Council will not be adopting the Appendix. This preserves flexibility over time in being able to adapt to changing conditions. Key detailed numbers such as exact height of buildings are found in the Appendix, not the Plan itself. After implementation, exact details will be specified and worked out through amendments to the UDO and design guidelines. As always, this amendment process will include Council-appointed Boards and Commissions as appropriate.

Staff would like to note that some editing has been done to correct typos, and ensure consistency throughout the plan. The plan content, however, remains exactly the same.

Key Dates and Actions:

		Actions Taken
Planning & Zoning Commission	April 1, 2009	Voted 6-0 in support of the plan with two recommendations to Council.
Downtown Commission	April 3, 2009	Voted 8-0 in support of the plan
Downtown Master Plan Advisory Committee	April 9, 2009	Voted 13-0 in support of the plan.

A public hearing will provide the opportunity for Council to hear from the community. If Council chooses to adopt the master plan, staff will begin work on the higher priority items. Staff will report annually to the Council on the accomplishments of implementing the master plan. The Downtown Commission is prepared to assist with the implementation through a pursuit group that would have some representation of the commission, but would consist largely of stakeholders from the different sectors of downtown, and differing viewpoints.

Regarding the City Council Strategic Plan, City Council adopted the goal of completing the Downtown Master Plan and to begin implementation.

Pros:

- Establish a clear direction and a coordinated effort to guide staff, advisory boards and commissions and elected officials in efforts to enhance the arts, transportation, development and management of downtown Asheville.
- Help future development in our downtown through greater clarity in requirements, design guidelines and development process, which in turn will increase predictability and objectivity in the development approval process.

Con:

- None noted.

Recommendations about the arts and downtown management are to be triggered by the private sector for implementation. Implementation of the other recommendations in the plan can be folded into the work plans of current staff. The plan calls for supporting projects such as the Performing Arts Center, the Art Museum addition and the rehabilitation of the Diana Wortham Theater, but this support is not specified as financial support per se.

Staff recommends that City Council adopt the plan and direct staff to begin work on implementation of items that are highest priority to Council.

Mr. Jesse Plaster, Chairman of the Downtown Commission, said that this plan is the culmination of a series of planning efforts, beginning with the Asheville Revitalization Plan of 1978 through the Asheville Design Guidelines and the 2002 Center City Plan. The master plan discussion began in earnest at the Downtown Commission's annual retreat in 2007. The need for a master plan comes from all members of the community and addresses their needs. Developers needed a clear picture on what the City wanted and needed clear guidance on the route to approval. Thousands of people have come together from all walks of life during this master plan process to contribute to the plan and influence the future of Asheville. No single party or interest group has gotten exactly what they wanted from the plan. The Downtown Commission approved the plan unanimously and urged Council to do the same.

At 5:38 p.m., Mayor Bellamy opened the public hearing.

The following individuals spoke in support of adopting the Downtown Master Plan:

Ms. Susan Griffin, Chair of the Downtown Asheville Residential Neighbors (DARN)
Mr. Gordon Smith, downtown business owner
Mr. Pat Whalen, past Chair of the Downtown Commission
Mr. Peter Alberice, member of Downtown Commission
Ms. Stephanie Pankiewicz, landscape architect and member of the Downtown Master Plan Advisory Committee
Mr. Larry Holt, member of DARN and member of the Downtown Master Plan Advisory Committee
Ms. Rebecca Heck, representing the Lexington Area Merchants Association
Ms. Ruth Summers, Executive Director of the Grove Arcade Public Market Foundation and member of the Downtown Master Plan Advisory Committee

Mr. Joe Minicozzi, member of the Downtown Master Plan Advisory Committee
Ms. Stephanie Twitty, member of the Downtown Master Plan Advisory Committee

Mr. Steve Rasmussen supported most of the Downtown Master Plan, but expressed two concerns (1) degree of authority transferred from elected official to appointed Planning & Zoning Commission; and (2) need for a fair and well defined procedure for City residents affected by a proposal to appeal. He explained that the Master Plan only allows for developers to appeal a denial of their project to City Council. He proposed adding language to Strategy 6, Item J as follows "And enable aggrieved parties, as defined by City ordinance and state law, to appeal approved proposals to the City Council within a reasonable time period." These two issues should be examined further.

Ms. Jenny Bowen, member of the Downtown Master Plan Advisory Committee, expressed two concerns (1) the need for a citizen appeal process; and (2) the need for requirements to get information out to the public about upcoming projects. She could not validate the plan, but supported it as a treaty for growth.

Mr. Albert Sneed felt that there are many special interest group agenda items hidden in the plan, e.g, limit shadows on public parks and designated historic structures. A balanced overall view of the entire City is necessary or these special agendas will seriously impair future development in our City. The genius of downtown Asheville is hundreds of people making independent decisions and pursuing their own visions. It would be a terrible mistake for the City to impose a comprehensive monolithic plan that would prevent this type of growth in the future.

Ms. Leesa Kulba explained why she felt the City did not need a business improvement district. She also didn't like the assumption that developers owe the community something.

Mr. W. Louis Bissette, partner in the law firm of McGuire, Wood and Bissette, P.A., and member of Drhumor Associates LLC explained that the LLC owns the Drhumor building and a parcel of property located on Patton Avenue between Church Street and Lexington Avenue. The parcel of property located on Patton Avenue measures 19,166.4 square feet and is currently used for employee and client parking. The LLC would like to develop the property at some point in the future. He said the plan looks good at 50,000 feet, but the problems become apparent when you get to street level and start applying the compromise restrictions and regulations to specific pieces of property. Urban sprawl will be encouraged because of excessive restrictions and over-regulation of downtown development. When you try to apply the restrictions included in the Master Plan Appendix to a lot such as ours at the corner of Church and South Lexington, it becomes a mind-boggling task to determine what, if anything, can actually be built there.

Ms. Kitty Love, member of the Downtown Commission, hoped that if the Plan is adopted that the City will work with an alliance of arts organizations and individuals to create a cultural experience that benefits some of the broader goals, e.g., tourism, arts, cultural heritage and economic development.

Mr. Chris Lyman, partner with McGuire, Wood and Bissette, P.A., said that there are 11 restrictions in the Appendices which may apply to the property at the corner of Church and South Lexington. Some include (1) limited to 15 stories (even though the lot is in the middle of downtown); (2) subject to front and side step-back restrictions (taking building space from the development); (3) subject to top floor plate limitations (taking 2/3 of otherwise buildable space); (4) subject to a shadow study (because of small pocket park); (5) other restrictions if the lot is determined to be in a view corridor; and (6) due to the proximity of two historic buildings we would be subject to architectural standards to match the buildings. He opposed the adoption of the Plan on the basis that it is overly restrictive of their rights, will diminish the architectural diversity of Asheville, and limit the ability to build green and LEED projects.

Using pictures from the Master Plan, Mr. Jeffrey Owen, attorney with McGuire, Wood and Bissette, P.A., explained how the property value of the parking lot on Church and South Lexington Avenue will be reduced with adoption of the Plan if they develop the property in the future.

Mayor Bellamy closed the public hearing at 6:28 p.m.

Councilman Miller, former member of the Downtown Master Plan Advisory Committee, said that this Master Plan is a compromise and is not perfect. There are some unintended consequences but felt confident that staff will do a good job in working out the details. He supported this Plan as it's predictable, transparent, actionable and pro-active.

Mayor Bellamy said that Council has the option of adopting the Plan in its totality or ask staff to bring the Plan back in phases attaching recommendations on implementation.

Vice-Mayor Davis agreed that the Plan is good and it's not perfect. Since there will be expectations that the Plan will be implemented once adopted, he suggested staff provide an implementation matrix.

Councilwoman Cape spoke in support of the Plan. Due to the 5,000 volunteer hours spent on this Plan, she felt we owe it to the community to adopt the Plan and the resources of staff to work out the details.

In response to Councilman Newman, Planning & Development Director Judy Daniel said that staff can present all the necessary Unified Development Ordinance amendments to Council at one time and then if Council has questions, the amendments can be continued until those questions are answered.

Councilman Mumpower explained how he felt this is an ill advised, expensive indulgence by the City. He felt government's job is to keep downtown clean and safe and if we adopt this Plan, we are expanding the bureaucracy and rules of that indulgence. He felt that adoption of this expensive exercise is expanding City government and curtailing downtown property owner's liberties.

Councilman Newman felt this is a pro-growth plan for downtown and felt there will be more development downtown because of the clarity on what can be built.

Mayor Bellamy said that members of Council have previously been furnished with a copy of the resolution and it would not be read.

Councilman Miller moved to adopt the Downtown Master Plan (not the Appendix) in concept and to direct City staff to begin working on recommendations and a timetable specific to the seven strategies articulated in the Plan. This motion was seconded by Councilwoman Cape and carried on a 5-2 vote, with Councilman Mumpower and Councilman Russell voting "no."

Mayor Bellamy said it was going to be very important for staff to bring back the recommendations and timetable in a timely fashion because personally the adopted concept might be different than what will really be implemented.

On behalf of Council, Mayor Bellamy thanked Ms. Vrtunski for her commitment in making this process inclusive to the community. She also thanked those who participated in the process and the countless hours in crafting this Plan.

RESOLUTION BOOK NO. 32 – PAGE 63

Closed Session

At 7:06 p.m., Councilman Miller moved to go into closed session for the following reason: (1) To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including litigation involving the following parties: Troy Steven Wyatt, City of Asheville, City Manager Gary Jackson, Police Chief Bill Hogan, Police Officer Chad Bridges, and John Doe, individually and in their capacity as Asheville Police Officers or employees - The statutory authorization is contained in G.S. 143-318.11(a) (6); and (2) To prevent disclosure of information that is privileged and confidential, pursuant to the laws of North Carolina, or not considered a public record within the meaning of Chapter 132 of the General Statutes. The law that makes the information privileged and confidential is N.C. Gen. Stat. sec. 143-318.10(e). The statutory authorization is contained in N.C. Gen. Stat. sec. 143-318.11(a)(1). This motion was seconded by Councilman Mumpower and carried unanimously.

At 7:30 p.m., Councilman Russell moved to come out of closed session. This motion was seconded by Councilman Miller and carried unanimously.

V. UNFINISHED BUSINESS:

A. HEALTH OF DOWNTOWN ASHEVILLE UPDATE

RESOLUTION NO. 09-103 - RESOLUTION AUTHORIZING SUBMITTAL OF AN APPLICATION TO KEEP AMERICA BEAUTIFUL FOR THE GRAFFITI HURTS NATIONAL GRANT PROGRAM

Assistant City Manager Jeff Richardson said that the purpose of this staff report is to provide staff analysis on quick action steps recommended by the Health of Downtown Committee focusing on four key areas: (1) Graffiti Vandalism, (2) Cleanliness, (3) Panhandling, and (4) Towing.

At its meeting on April 14, 2009, City Council received a report from the Health of Downtown Quick Action Committee including recommendations to address four main areas of concern. Pursuant to the report, City Council directed staff to review the recommendations to determine (1) which recommendations could be implemented immediately with no budgetary impact; (2) which recommendations require budgetary funding for implementation, and; (3) which recommendations need local ordinance adoption for legal implementation. Staff was directed to report back its analysis to the City Council on May 26, 2009.

He then reviewed with Council a chart which summarizes staff analysis based on City Council's direction.

Staff analysis of the Health of Downtown recommendations relate to several of City Council's focus areas included in the City of Asheville's 2009-2010 Strategic Plan, including Green, Safe and Sustainable.

Pro:

- Approval of these items will operationally jump start action on downtown issues that have been identified as problematic and needing the community's attention and oversight for improvement.

Con:

- Items requiring additional budgetary resources will require identification of a dedicated funding stream, or reprioritization of existing services.

Staff has provided preliminary information about the budgetary implications for implementing specific committee recommendations.

Staff recommends City Council: (1) Identify which items in each category for which staff should develop specific operational implementation plans. Provide guidance to staff in coordination with the adoption of the FY 2009-2010 budget as to funding levels and provide further direction on the level of service or program to be implemented, and; (2) Consider passing the resolution authorizing staff to apply for the Keep America Beautiful Graffiti Hurts Grant in the amount of $2,500 to provide funding for the education and outreach component of the Committee's recommendations, or of any other portion of the recommendations Council may otherwise wish to see supported by grant funds.

In response to Councilman Newman, City Manager Jackson said that we have a placeholder of $100,000 for downtown improvements.

Mr. Richardson then reviewed the following recommendations and policy/resource/legal analysis. Discussion occurred on each recommendation and direction was given on each policy question.

Graffiti/Vandalism: Cleanup

- City-owned property: Public Works to remove all reported graffiti vandalism on City-owned property by a specified time period – Continue database of complaints and disposition maintained, Public Works staff removes with 48 hours notification. Public Works work with N.C. Dept. of Transportation, Parks and Recreation and Asheville GreenWorks.
- City staff to work with recycling contractors, commercial waste haulers, and utility companies to remove graffiti vandalism from their properties within a specified period of time – Continue, Sanitation Division contacting affected parties.
- 50/50 matching grant program for property owners to help cover one-half vandalism abatement costs – (1) requires policy direction to establish fund and approve criteria and award process; (2) requires additional budgetary resources; and (3) requires staff resources to manage process, review applications and make recommendations to Council or designated body.
- Research and recommend to Council a possible third party to be the first responder for graffiti vandalism removal on private property – (1) requires policy direction and an ordinance to mandate removal by third parties; and (2) requires a Request for Proposals process to assess capabilities and address liability issues.
- Encourage and promote more groups like Asheville GreenWorks, who are removing vandalism for property owners at cost, as well as providing graffiti removal kits for smaller surfaces – Requires staff resources to coordinate program; potential to be included as part of the City's volunteer program coordination.

(1) Does City Council want to require private property owners to clean up graffiti at the property owners' cost under any circumstances?

It was the consensus of Council to instruct the City Attorney to explore the potential for contracting with non-profit agencies or other organizations for graffiti clean-up.

There was discussion to (1) have private property owners cleaning up graffiti either by themselves within a specific amount of time or by signing a waiver that allows someone else on their property to clean up the graffiti; and (2) launch a public awareness campaign making the business community, especially in the downtown area, that they have a responsibility to get graffiti off their buildings quickly.

It was the consensus of Council to instruct staff to get graffiti off public property within 48 hours.

(2) Does City Council want to pilot a removal incentive program like a grant fund? ($5,000, 50/50 match)

There as no consensus for this pilot removal incentive program.

(3) Does City Council want to dedicate resources to a 2-person downtown cleanliness team responsible for loose litter, weeds, sidewalk cleaning, median landscaping and other maintenance? ($127,474 – potential for ARRA funding to cover some costs).

It was the consensus of Council to ask staff to bring back to Council some partnerships opportunities with other organizations.

(4) Does City Council want to allocate funding for 12 additional trash receptacles in downtown? ($12,000)

There was no consensus for this allocation.

Graffiti/Vandalism: Enforcement

- The purchase and installation of a high definition, moveable surveillance camera capable of catching graffiti vandals in the act – Asheville Police Department (APD) has ordered two units to detect graffiti vandals in the act and report the incident for immediate police response.
- Increase the number of stakeouts – Requires additional budgetary resources to increase special operations. APD had conducted a number of stakeouts focused on graffiti vandals and have made a number of arrests.
- CrimeStopper rewards for citizens turning in graffiti vandals – Requires policy approval by the CrimeStoppers Board. Important to note that prosecuting requires catching vandals in the act of the crime.
- Make public aware of motion sensor lights as a major graffiti vandalism deterrent – Able to implement in CPTED immediately.
- Govern spray paint sales – Requires legal review, policy direction and an ordinance to govern sales. Important to note that most vandals arrested are between 18 to 30's, and so limiting sales to minors may not have intended impact.
- More boots patrolling – Requires policy direction and additional budgetary resources.

(1) Does City Council want to allocate additional funding for the purchase of additional detection devices? ($7,500 – 5 units)

It was the consensus of Council to evaluate the detective devices recently purchased and if they are successful, Chief Hogan was instructed to return to the Public Safety Committee with a recommendation for more.

(2) Staff recommends waiting on the award status of ARRA funding dedicated to creating a downtown patrol unit before considering allocating additional resources to enforcement personnel.

It was the consensus of Council to continue to wait on award status.

Mayor Bellamy said that the City of Asheville allocates $25,000 annually to the CrimeStoppers Committee. After a brief discussion, it was the consensus of Council to allocate a one-time addition of $5,000 (in $1,000 increments) for the charging of graffiti vandalism and asked staff to work with the CrimeStoppers Board on the process.

Graffiti/Vandalism: Communication & Education

- Officially launch "Vandal Free in 3," a voluntary community-wide program that residents and property owners pledge to do all they can to remove graffiti vandalism within 72 hours (3 days)
- Create "Vandal Free in 3" website and launch press release campaign including press conference. Website will serve many purposes, including: (1) report graffiti vandalism; (2) post before and after photos; (3) graffiti vandalism removal tips; (4) volunteer sign-ups; and (5) frequently asked questions.
- Establish a hotline to report all graffiti vandalism
- Shame Game: Committee recommended promoting names and photos of captured graffiti vandals. Subsequent research by staff reveals conflicting viewpoints.
- Communicate to the community the economic impact of graffiti vandalism and how these acts increase consumer prices.

For the policy/research/legal analysis for the Communication and Education section, the following items are identified: (1) requires additional budgetary resources and/or a reassignment of existing resources through policy direction. Does not require legal review; (2) An estimate of necessary resource hours is outlined as follows (some work could be completed on contract) (a) campaign design: 4-8 hours; (b) press conference: 4-8 hours; (c) web portal: (i) page creation/design: 8-16 hours (within City's site and template); (ii) content development: 8-16 hours; (c) volunteer coordination: 16 hours for initial set-up; 8 hours/month ongoing; (iv) ongoing maintenance: 1-2 hours/week; and (v) IT support: 4-8 hours; (d) hotline (i) IT support: 4-8 hours; and (ii) ongoing APD support: 5-10 hours/weeks; (e) other resource considerations: (i) paid advertising: $1000-$1500; (ii) printed materials: Varies; and (iii) presentation materials: 8-16 hours; (f) Total resource hours (i) public relations: 16-40 hours; (ii) production: 16-40 hours; (iii) volunteer coordination: 16 hours; (iv) IT services: 8-16 hours; (v) ongoing hotline support: 1-2 hours/week; (vi) ongoing website support: 1-2 hours/week; and (vii) ongoing volunteer coordination: 4-8 hours/month.

Staff recommends Council authorize staff to apply for a $2,500 Graffiti Hurts grant from Keep America Beautiful to apply toward community education and outreach.

When Mayor Bellamy asked for public comment, no one spoke.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Mumpower moved to adopt Resolution No. 09-103 (application for a $2,500 grant) to apply toward the recommendations regarding graffiti/vandalism communication and education. This motion was seconded by Councilman Russell and carried unanimously.

Towing

- Regulate through ordinance (passed Asheville City Council on March 24, 2009) – Initial notification and implementation; monitor for effectiveness.
- Convene major downtown property owners who own lots and discuss current challenges and opportunities regarding parking in private lots – Parking reservation system for private lots currently being researched by staff. Will require policy direction, Request for Proposals for software services, and a public outreach process. Staff to make recommendation to Council in the next 120 days.
- Continue to explore feasibility of awarding parking contract to a third party parking vendor similar to other North Carolina cities – See item above. Would voluntarily expand City parking opportunities and regulation to private lots.

- The integrated wayfinding program will be installed this summer/fall, directing drivers to City-owned parking decks. This should help in reducing the number of cars illegally parked in private lots. – One-half of funding is approved in current fiscal year and remaining amount is budgeted if Fiscal Year 2009-10.

Cleanliness

- If dollars are available, have dedicated City staff tackle litter and weeds problem on a regular basis. – Requires additional budgetary resources. Currently operational crews are reassigned as available to complete. City has applied for ARRA funding for landscaping needs.
- Asheville GreenWorks to encourage monthly clean-ups by Adopt-A-Street sponsors. – Staff can coordinate with GreenWorks to encourage program.
- More trash cans in Central Business District and at bus stops. – Requires additional budgetary resources. Staff has identified 12 new locations for trash cans – cost $12,000.
- Make sure enough resources are available to keep Asheville's new "living room," (Pack Square Park), clean.

(1) The Downtown Cleanliness Team Detail duties and responsibilities would include (1) loose litter clean-up; (2) graffiti removal; (3) median landscaping and weed removal; (4) sidewalk cleaning and weed removal; and (5) sidewalk pressure washing (night schedule). The budget detail would be 2 full-time employees ($67,474); specialized equipment – sidewalk pressure washing ($30,000); and supplies, equipment and vehicle ($30,000) – for a total Clean Team Total of $127,474.

There was no consensus for the allocation of more trash cans in the Central Business District and at bus stops.

Panhandling

- Re-launch "Spare Change for Real Change" effort. – Requires policy direction and budgetary resources if the City were to be the lead agency in re-launching effort. Council may pass resolution encouraging the Downtown Association to re-launch effort.
- Increase number of "Spare Change" receptacles. – Requires policy direction and budgetary resources if the City were to add receptacles.
- Pursue City's strategic goal of establishing a "nuisance court" that can effectively deal with panhandlers. – Requires budgetary resources to develop and launch the nuisance court model. Approximately $25,000 in court administration annually, plus an additional amount to link offenders with services and alternative sentences in addition to police and social worker overtime. Requires policy direction in the form of formal memorandums of understanding with community partners including district attorney, courts, public defender, Buncombe County Department of Social Services, and community agencies.
- Promote widely and encourage residents to call Asheville Police Department at 252-1110 to report panhandling when witnessed. Councilman Mumpower suggested signage used by Savannah, Georgia. – Requires policy direction.

(1) Nuisance Court: Should staff move forward with pursuit of intergovernmental Memorandums of Understanding? Does City Council want to allocate funding to pilot the nuisance court in Fiscal Year 2009-10? ($35,000 estimate for court costs and personnel overtime)

In response to Councilman Mumpower, Police Chief Hogan anticipated there would be fines associated with the conviction and also there would be community service. The District Attorney has committed an assistant to meet on a monthly basis. The money would go towards

(1) hiring a retired judge to conduct court one day a month; and (2) support the Clerk of Court's Office for the official judicial proceedings.

When Mayor Bellamy asked for public comment, no one spoke.

Vice-Mayor Davis moved to (1) develop the nuisance court model in the amount of $35,000; (2) have staff research what other cities are investing in their program; and (3) instruct staff to move forward with the various Memorandums of Understanding for creation of a nuisance court. This motion was seconded by Councilman Russell and carried unanimously.

Councilman Mumpower said that if it turns out that a nuisance court is too expensive to continue, he suggested the City provide the Police Chief with additional resources to track chronic offenders.

When Mayor Bellamy asked for public comment, no one spoke.

Councilman Miller moved (1) to allocate $2,000 toward increasing the number of "Spare Change" receptacles in the Central Business District; and (2) ask staff to provide Council with an estimate to install no panhandling signs, similar to those used in Savannah, Georgia, in the downtown area. This motion was seconded by Councilman Newman and carried unanimously.

Mayor Bellamy said that as soon as staff has the additional information, it will be placed on the Council's agenda.

RESOLUTION BOOK NO. 32 – PAGE 64

B. CIVIL SERVICE BOARD BLUE RIBBON COMMISSION STATUS REPORT

Councilman Mumpower, liaison to the Civil Service Board, said that the Civil Service Board Blue Ribbon Commission reported their recommendations on the Civil Service Board on May 12, 2009. During that meeting it was determined that organized employee organizations were not consulted in that process. It was the consensus of City Council at that meeting to ask the former Boards & Commissions Committee (Mayor Bellamy, Vice-Mayor Davis and Councilman Mumpower) to meet with those organized employee organizations. That meeting occurred on May 19, 2009, which resulted in some significant actions. Since that time, however, Council determined that there was an issue on the table that the Council Subcommittee was not aware of – that there was new legislation as of May 12 that was introduced in Raleigh. Council had some apprehensions in locking the City into agreements where there is a legislative action occurring in Raleigh that the City Council nor staff was a part of. Council is being told what is happening and not being included in the process. On the basis of that, the Council Subcommittee convened an emergency meeting with the 3 of the 4 employee representatives earlier in the day. What the Council Subcommittee would like to bring to the table are the 5 things that the Subcommittee and the employee representatives reached consensus on. There are other issues we could not reach consensus on which will result in further detailed discussions in the near future. Those consensus items are listed below:

Blue Ribbon Commission Recommendation #6

City Clerk acts as Secretary (Section 2 c)

Best Practice in other existing Civil Service Laws. The City Clerk can designate someone to fulfill these duties. The City Clerk already has duties in the grievance process under the current law and is designated under State laws as records custodian and proper person for service of process. Grievance hearings typically are recorded by Court reporters. May have fiscal impact.

City Council Subcommittee Recommendation: Consensus to have City Clerk, or his/her designee, to act as Secretary.

Blue Ribbon Commission Recommendation #7

HR Director ex officio non voting member of the Board (Section 2 d)
Patterned after Wilmington's Civil Service law. Maintains a role in the process for Human Resources and allows for a resource for the Civil Service Board regarding City policy and procedures during grievance hearings. Allows HR Director to be present in closed sessions. No fiscal impact.

City Council Subcommittee Recommendation: Consensus for HR Director not to be an ex-officio non-voting member of the Board, but that the HR Director will be a staff resource and allowed in closed session only upon invitation of the Board.

Blue Ribbon Commission Recommendation #8

Employees may wear uniforms (Section 3 b)
Employees may wear uniforms to meetings but are not considered on duty or compensated while at meetings unless required to be there by subpoena or the City Manager. No fiscal impact.

City Council Subcommittee Recommendation: Consensus.

Blue Ribbon Commission Recommendation #10

Membership requirements (Section 2 b)
Provides for a broader base of possible Board members by extending the membership to all qualified voters of Buncombe County. This article also restricts employees who have been employed within the previous 5 years from serving on the Board. No fiscal impact.

City Council Subcommittee Recommendation: Consensus to reject Blue Ribbon Commission recommendation to allow qualified voters of Buncombe County to serve on the Board. Also consensus to enable former employees to serve on the Board after five years post-employment.

Blue Ribbon Commission Recommendation #11

Board makes own rules of procedure (Section 10)
Formalizes the Board's ability to make their own rules of procedure including meeting frequency and times. No fiscal impact.

City Council Subcommittee Recommendation: Consensus for Board to make their own rules of procedure including regular monthly meetings, however, the Board shall have the flexibility to cancel meetings and make schedule adjustments upon Board majority.

The following are the other items from the May 19, 2009, meeting which did not receive consensus and will be discussed at the next meeting:

Blue Ribbon Commission Recommendation #1

Elimination of rule making authority except as to procedural matters (Delete Sections 4 and 5)

State Law grants the power to the City Manager general supervisory authority over all employees, and to direct and supervise the administration of all departments and agencies, subject to such general rules, regulations, and policies as the Council adopts. The Human Resource field has become increasingly complex and requires a high level of expertise in order to manage the City's human capital. No fiscal impact.

Police and Fire association representative reaction

Section 4. The BRC recommended deleting this section. This section gives the Civil Service Board the authority to make and amend rules for promoting efficiency in the Classified Service of the City. Currently, the Council has the authority to approve or deny the Board's rules and make their own rules. By deleting this section, the Blue Ribbon Commission is recommending that city staff be able to make personnel rules without any accountability to anyone looking over their shoulders, even the City Council and citizens of the City. The Council would give up much of their jurisdiction they currently have over the rule making process governing the city's civil service positions.

- *The flawed reasoning of the Blue Ribbon Commission is very evident. If the funds paying the salaries and benefits of the employees were paid for by the City Manager and his staff, their way of thinking would make more sense. However, accountability as how tax payer's funds are spent requires another level of safeguards. Legislators in 1953 designed the current Civil Service Law so that the substantive rules governing public employees would be produces in the full view of the public. The RBC is recommending to the City Council that the process for substantive rules governing public employees be hidden in the back rooms of City Hall.*

- *As the law is now, and when everyone follows the law, the city manager and his staff can be involved with the Civil Service Board during the rule making process all the way through the City Council's approval or amendment of the Civil Service Board's proposed rules.*

Section 5. This section is for standardization and classification and efficiencies of all positions within the classified service as authorized by Section 4 and requires the designee of the City Manager to consult representatives of the Police and Fire Departments to establish criteria to be used to fill positions within the respective departments. It also gives the Civil Service Board the authority to approve any criteria established. Again, the city staff wants to make the rules for promotion with very little accountability to public and City Council. If Sections 4 and 5 were deleted, rules could be adopted without the Council fully understanding the reasons behind the rule making process and how employees are managed.

Council subcommittee recommendation

Reject the recommendation. Retain current provisions of Sections 4 and 5, with one clarifying amendment. In the first sentence of Section 4, scratch "shall make, and may amend" and insert "shall recommend.

Blue Ribbon Commission Recommendation #2

Judicial review in nature of certiorari instead of trial de novo (Section 8 f.)
Provides for a less burdensome and a less resource intense (time and money) process for each party. Similar to review for other administrative proceedings, including other civil service boards in NC. Empowers the Board with full quasi-judicial hearing and decision making authority. Decreases fiscal impact to employee and City.

Police and Fire association representative reaction

This should be rejected. Although it rarely happens, this is just another way to keep the employee from having their day in court or to be able to petition a trial by jury.

Council subcommittee recommendation

Inclined to reject subject to further advice from the City Attorney.

Blue Ribbon Commission Recommendation #3

Clarify Subpoena power to Board during grievance hearings (Section 8 c)
Best practice based upon review of other Civil Service laws in the State. No fiscal impact.

Police and Fire association representative reaction

We feel this should be rejected. The first sentence of the underlined words allows the city staff to reject any attorneys they do not like. The remainder of the underlined is not needed with the current language in SB 556.

Council subcommittee recommendation

Seek advice of the City Attorney.

Blue Ribbon Commission Recommendation #4

Assistant Directors added to those not covered by Civil Service (Section 2 b)
Assistant Directors are members of the City Manager's executive team and are frequently called upon to act as an extension of the Department Director. The City Manager, Department Directors and Assistant Directors are held to very high level of accountability to City Council on operational, budget and personnel matters. The City Manager needs the latitude to be held solely accountable to City Council for the actions and behavior of these personnel. No fiscal impact.

Police and Fire association representative reaction

Why should the assistant directors of any departments be exempt from being a member of the Civil Service?

- *Suppose the assistant director was being told to do something that was immoral or illegal and he refused. He/she could be fired without cause. If he/she were unable to appeal a grievance before the Civil Service Board the incorrectness of the original order would mostly be lost. All city employees are accountable to the public. Why not allow the process to work for the efficiencies of city government.*

Council subcommittee recommendation

Accept the recommendation to exempt Assistant Directors based on executive management status of the positions.

Blue Ribbon Commission Recommendation #5

City Council's right to control the City's finances (Section 1)
Common language in other existing Civil Service laws. Law should recognize Council's/Manager's legal authority to eliminate positions to address budget needs. No fiscal impact.

Police and Fire association representative reaction

Part of their proposal 'and nothing in this law shall be so construed as to deprive the Asheville City Council of its control of the finances of the City."

- *The City Council should reject this addition. In over 56 years, the Civil Service Board has never caused a problem that affected the City's finances **BUT**, if this language were in the Civil Service Law, the City Staff could over rule any decision by the Board to subpoena witnesses they did not want to be heard by saying the Board is depriving the City Council of its control of the City's finances.*
- *The staff could even use this to deny the Board to meet saying the cost is denying the Council control of the City's finances.*

Council subcommittee recommendation

Inclined to accept the recommendation to retain Council's financial control.

Blue Ribbon Commission Recommendation #9

Outside Counsel for grievance hearings (Section 8 c)
Formalizes the current practice of providing a qualified outside attorney for grievance hearings. The City Attorney shall approve the qualifications and fees. No significant change in fiscal impact.

Police and Fire association representative reaction

We feel this should be rejected. The first sentence of the underlined words allows the city staff to reject any attorneys they do not like. The remainder of the underlined is not needed with the current language in SB 556.

Council subcommittee recommendation

Seek the advice of the City Attorney.

Other Blue Ribbon Commission Recommendations

Clarify provisions 8(b) enabling the Board to extend the time in taking action and 8(e) specifying board decisions shall include findings of fact. Delete language in Section 11.

Police and Fire association representative reaction

Section 8. *Subsection (b) recommendation seems to be grammatically incorrect and the lack of helping words causes this sentence to make no sense.*
Subsection (e) recommendation is trying to structure the law so that any witnesses' testimony could be rejected. They can always claim that any testimony, even if it is eye witnessed, is not "substantial and competent evidence of record." This is too much room for interpretation.

Section 11. *Just deleting repetitive language and is okay.*

Council subcommittee recommendation

Seek the advice of the City Attorney.

In addition to the discussion of the Blue Ribbon Commission Recommendations, the subcommittee and association representatives discussed the SB 556 provision of criminal penalties for violation of either the civil service law or civil service procedural rules. The

association strongly recommended reinstatement, of pre-1999 criminal penalties, as a deterrent to oppressive management.

Councilman Mumpower moved to approve the City Council Subcommittee recommendations on the five items outlined above (Numbers 6, 7, 8, 10 and 11). This motion was seconded by Vice-Mayor Davis and carried unanimously.

Vice-Mayor Davis said that a meeting has been arranged for Monday, June 1, 2009, with the City Council Subcommittee and the employee organization representatives to work out the remaining details. Mayor Bellamy said that when those details are worked out, they would be brought back to City Council for consideration.

Councilman Miller suggested City Attorney Oast be invited to the next meeting for any attorney clarification that may be necessary.

C. ANIMAL CONTROL ORDINANCE – TETHERING

Assistant City Attorney Curt Euler said that Chain Free Asheville has proposed that the City of Asheville adopt an ordinance prohibiting the tethering of animals on private property within the City limits.

On Tuesday April 28, 2009, the City Council adopted a revised animal control ordinance. In the revised ordinance, staff did not have any provisions which prohibited the tethering of dogs on private property. At the public hearing on the revised animal control ordinance, Chain Free Asheville along with a number of individual citizens requested that the City Council adopt an ordinance prohibiting the tethering of dogs on private property in the City limits. Council adopted the revised animal control ordinance but requested that staff come back to Council with information on the issues of achieving a goal of the prohibition on tethering twenty-four hours a day/seven days a week in Asheville in the future and give recommendations on making sure that people who do not have the resources to build a fence to secure their dog are not unfairly penalized.

In terms of achieving the goal of completely prohibiting tethering on private property in the City of Asheville, staff believes there are two methods for Council to consider. First, Council could adopt a tethering prohibition but delay the implementation of the prohibition until a later date. When implementing the tethering prohibitions, Durham County, Orange County, the Town of Chapel Hill, and the City of Raleigh delayed the date the ordinance went into effect. For example, Durham County adopted the ordinance on September 8, 2008, and it does not go into effect until January 1, 2010. Raleigh adopted its ordinance on March 3, 2009, and it is not effective until July 1, 2009. Orange County adopted its ordinance on November 18, 2008, and it will not be effective until November 19, 2009. Chapel Hill's ordinance goes into effect March 1, 2010, but they will only be issuing warning citations for the first three months. Actual enforcement of the Chapel Hill Ordinance with penalties begins June 1, 2010. We also looked at New Hanover County and found that their ordinance had no waiting period. They are also responsible for no tethering in the City of Wilmington, which is a similar size of Asheville. The enforcement in New Hanover County is through the issuance of fines. Therefore, Council has the option of adopting a tethering prohibition but delaying the effective enforcement date of the ordinance for any period of time in order to educate the public and give dog owners who tether the chance to make alternate arrangements for keeping one's dog on his or her property.

The second option for Council, if Council does not wish to actually adopt a tethering prohibition at this time, is to place in the tethering provision of the animal control ordinance on a mandatory review date where staff must conduct a review of the tethering issue and report back to Council on an annual or bi-annual basis. City Council in other situations has mandated staff review of other City ordinances on a bi-annual basis.

Staff also researched at whether a tethering prohibition can only be enforced against persons who have the financial ability to purchase a fence. First, it should be noted there are no provisions in the current City Code that requires an individual to secure a dog on his or her property by means of a fence or electric fence. The City Code Sec. 3-27 prohibits a person from allowing his or her dog from being at large (i.e. off the owner's property without a leash). The City has no say in how a person keeps a dog on his or her property as long as the dog stays on the person's property and the means of securing the dog is humane. Therefore, under the current ordinance, except for potentially dangerous and dangerous dogs, there is no way for the City to make a person build a fence to secure his or her dog.

A tethering prohibition would be adopted pursuant to N.C.G.S. § 160A-186 in order to protect the public, health safety and welfare of the citizens. Staff could find no examples of existing public health and safety ordinances enforced on persons based on financial means. In addition, staff could find no case law or enabling legislation that would allow a municipality to apply a public health and safety ordinance to persons based on their financial status. It is staff's position that any financial test which triggers the enforcement of a public safety ordinance may violate the equal protection clause of the U.S. and North Carolina Constitutions and that the best practice for enforcing a public safety ordinance is for the ordinance to apply to all persons as opposed to a select few based on financial considerations.

Staff was also asked to look at whether the tethering prohibition could only be enforceable against persons who tether and refuse the help of community groups to build a fence. Furthermore, if the community group could not build the fence then the City would not issue the citation to the person tethering the dog. While it is possible to craft an ordinance with these provisions, it is staff's position that such an ordinance would be operationally unfeasible and enforcement would be based on a private group's ability to build a fence in the City. When researching tethering ordinance across the country, staff could not find any ordinances with similar provisions. If the City adopted such an ordinance, the enforceability of the tethering prohibition would totally be dependent on a non-profit or community group's ability to build fences. Such an ordinance would create numerous operational headaches for the animal control officer attempting to enforce the ordinance.

As stated in the April 28, 2009, Staff Report, tethering is the act of securing an animal to a fixed location so that it can only range within a set radius (i.e. tying a dog to a tree in one's backyard). Tethering has nothing to do with walking a dog on a leash and has no effect on one's ability to take his or her dog out for a walk. After researching this issue, it is staff's position that a tethering prohibition on private property initially will increase the number of at-large dogs and increase the number of dogs brought to the shelter. In addition, it is staff's position that adopting a complete tethering prohibition will create more calls for service and require an additional staff person to ensure proper education and enforcement of the tethering prohibition.

Pros:

- Eliminates the risk of a dog being injured by getting tangled in its tether.
- The City will be promoting a preferred practice in animal care.
- The prohibition may discourage persons from getting a dog when the persons are not prepared for the responsibilities associated with securing the dog on one's property.
- Improved quality of life for the dog.

Cons:

- Adopting a tethering ban would increase calls for service and need for additional staffing.
- The prohibition of tethering could adversely effect low income citizens and place financial burden on citizens to erect fences to confine their dogs.
- Person may allow his or her dog to roam freely on the person's property as opposed to building a fence thereby creating more at large dog calls for service.

- Persons may surrender their dogs to the animal shelter because of the increase costs of securing one's dog on his or her property through fencing or purchasing an invisible fence system.
- Requiring fences/invisible fences to be erected for confinement as opposed to tethering may come into conflict with homeowner associations' bylaws/restrictive covenants in some neighborhoods.

A tethering ban would increase the number of calls for services for animal control officer. This would create the need for one (1) additional full time employee for a total of five (5) Animal Services Officers.

Salary and Benefits:		
Entry Level:	$25,396.98 annually + 26% for benefits =	$32,000.19
Vehicles:	Fully equipped Animal Services Truck: 1 current Vehicle has 174,000 miles and 1 has 96,900 miles. Would need to replace 1 vehicle as part of current year Capital purchases.	$38,000.00
Laptop Computer:	1 Semi-ruggedized mobile computer:	$2500.00
Uniforms:	For 1 position:	$700.00
Training, Travel and Certification:	For 1 Position:	$1125.00
	Total Fiscal Impact:	**$74325.19**

If City Council decides to adopt an ordinance prohibiting the tethering of dogs on private property, from an operational standpoint, Staff recommends the following: (1) Create another animal control officer position to deal with the increased enforcement and educational issues associated with a tethering prohibition; (2) Do not begin enforcement of a tethering prohibition until September 1, 2010. The cost of the additional officer and equipment can be placed in the 2010-2011 budget as opposed to 2009-2010 budget.; (3) Adopt a total prohibition on unattended tethering at all times on private property. City staff believes that allowing a dog to be tethered unattended for a certain number of hours per day will be impossible to enforce in that staff has no adequate way to determine when a dog was first placed on a tether; and (4) Allow "attending tethering" within the City (i.e. the owner or person responsible for the dog must be present at all times when the dog is tethered on private property).

Upon inquiry of Mayor Bellamy about a public comment process, City Attorney Oast said that the public hearing on this was not a required public hearing and it's up to Council on whether they want to solicit additional public comment at this time. Staff was directed by Council to come back with information about tethering ordinances. If Council wants to provide staff with further direction on an ordinance, then at that time public comment would be appropriate.

Councilman Newman was very concerned about making criminals out of people who don't have the finances for a fence or compliance. It seems like most communities have an education period before they move into the enforcement phase and that makes sense. Since there are many people in the community who care a lot about this issue and who are spending their own funds to help people build fences, he suggested creating a fund with resources provided by those people. If we move towards prohibiting 24/7 tethering, during Phase One of the educational period we could work on the creation of a pool of resources raised by people in the community who care about these issues so when we move into Phase Two (the enforcement) we can feel confident that there will be some resources to help those who financially cannot comply. He did support moving forward with a policy prohibiting tethering of dogs, but contingent upon the creation of the fund outlined above.

Councilwoman Cape would like to adopt prohibiting tethering of dogs immediately. She noted that when you get a dog, you are supposed to apply for a $10 dog license from the City of Asheville. We can amend the dog license form to show that the City does not allow tethering and perhaps a line that asks how will your dog be cared for. She felt we can phase out unattended tethering by September 1, 2009. She also felt that staff could work on a complaint driven basis for allowing tethering for a short number of hours.

In response to Councilwoman Cape, Police Chief Hogan said that the September 1, 2010, enforcement date was suggested in order to add the cost of the additional full-time animal control officer and equipment in the 2010-2011 budget. In addition, it would give staff a sufficient amount of time to work with ChainFree Asheville and other organizations to help in the education process, build fences, etc. We're not saying that you have to have to build a fence, or have an invisible fence installed – you can chose to take your dog inside. He also felt it would be wise for a grace period of warning citations.

Councilman Mumpower personally was against tethering, however, he did not support government getting involved in that role. A greater concern to him is that we can't stop drug dealers from running open air drug markets in our public housing developments, graffiti vandals, aggressive panhandlers, etc. He was very hesitant to see us distracted from our primary mission. He felt we should passionately concentrate on abuses through complaints and hold those people who are doing things wrong accountable. If the prohibition is adopted, he suggested some consideration be given to grandfathering.

Vice-Mayor Davis supported prohibiting tethering with enforcement beginning on September 1, 2010.

Councilman Miller also supported prohibiting tethering with enforcement beginning on September 1, 2010.

In response to Councilman Miller, Ms. Peggy Irwin, representing ChainFree Asheville, said that ChainFree Asheville wants a total ban on tethering, but would be open to a 3-hour time frame of unattended tethering, noting that it would be difficult to enforce. There are about 200-300 tethered dogs in the City, noting it's hard to see many of those as they are hidden in alleyways and behind homes. It costs roughly $300 to build a fence for a single dog. They do have serious monetary commitments from people in the community to build fences.

Upon inquiry of Mayor Bellamy, Mr. Euler explained that under our current laws, tethering means you are required to keep your dog on your property. How you keep your dog on your property is up to you (invisible fence, built fence, or inside). What the tethering ban would do is prevent you from tying the dog, whether that's using a rope, chain, etc. to a fixed location and leaving it outside on your property. T-runners would also not be allowed. The definition of tethering does not include a leash, so that does not prevent anyone from taking their dog out for a walk. All it does is prevent you from leaving your dog tied to a rope which is tied to a fixed location, so the dog can't run free.

Upon inquiry of Mayor Bellamy, City Attorney Oast said that if the owner is outside with the dog and the dog is on a T-runner that is "attended" tethering and that is one of the recommendations which Council can consider. He understood that the recommendation is to adopt a total prohibition on unattended tethering.

Mayor Bellamy said that we need to be crystal clear on the recommendation. She felt we need some level of "attended" tethering in the ordinance. She agreed we do not want dogs on chains or ropes all day long, but felt strongly felt we need some form of "attended" tethering.

Councilwoman Cape agreed with the recommendation to adopt a prohibition on unattended tethering, except for a 3 hour period when the person responsible for the dog is

present for not. She noted we are all trying to get to the end result of ending cruelty and dangerous aspects to animals, understanding there are a lot of variables.

In response to Councilman Newman, Police Chief Hogan said that we can change the form so that we can recognize it's a new animal that was not registered the prior year and have a notice that with this new dog you cannot tether the new dog. But, it will take (1) additional administrative time; and (2) a follow-up to ensure that the ordinance is being followed in that the new dog is not being tethered. He did feel it was doable through our licensing process.

Councilman Newman moved that it is the intent of City Council (1) to move forward with a policy on the prohibition of 24/7 unattended tethering (with perhaps a secondary motion on the period of time when the person responsible for the dog is present); (2) that there be a Phase One of the policy that during the time that the policy is adopted until September 1, 2010, we work on an educational component; (3) to support creating a fund using private dollars raised by people in the community who care about this issue used once we move into Phase Two (enforcement phase) to assist people complying with the law that have a legitimate financial hardship to achieve compliance with the ordinance; (4) to make execution entering into Phase Two contingent upon the creation of this community fund; and (5) to direct staff to work with ChainFree Asheville and others in the community on what level of funding there will likely need to be in the community fund. This motion was seconded by Councilman Miller.

Councilman Miller explained why he felt everyone should be allowed to take advantage of the community fund, regardless of income and offered a friendly amendment to remove the legitimate financial hardship as a condition of accessing the community fund. Councilman Newman accepted the friendly amendment.

Mayor Bellamy offered a friendly amendment to the motion to include a short hour period for "attended" tethering. Councilman Newman accepted the friendly amendment.

Councilwoman Cape was concerned that if the fund doesn't have $90,000 (300 fences for $300 each) that we are not going to move into enforcement of the ordinance. She suggested Phase One be an educational process and a fund-building process, and Phase Two be enforcement.

Councilman Newman felt that community fund needs to be a condition precedent going into Phase Two. He believes this is the right thing to do but not make people criminals that do not have the financial resources to build a fence.

Mayor Bellamy said that at this point, Council is giving direction to staff to come back to Council with an ordinance using the parameters discussed. If a Council member would like to work with staff on crafting such an ordinance, she felt that would be appropriate.

Councilman Newman said that the community can see that Council is committed to the law. He felt confident that the community will come forward with the resources to make sure that enforcement of the law is done in a way that is fair to the existing dog owners who do not have the financial means to comply with the law.

Upon inquiry of Councilman Mumpower, Police Chief Hogan said that he would provide Council with data for the past year on the number of dog bites and the percentage associated with tethered dogs.

The amended motion made by Councilman Newman and seconded by Councilman Miller as follows: "that it is the intent of City Council (1) to move forward with a policy on the prohibition of 24/7 unattended tethering, except for a short period of time of "attended" tethering; (2) that there be a Phase One of the policy that during the time that the policy is adopted until September 1, 2010, we work on an educational component; (3) to support creating a fund using private

dollars raised by people in the community who care about this issue used once we move into Phase Two (enforcement phase) to assist people in compliance with the law; (4) to make execution entering into Phase Two contingent upon the creation of this community fund; and (5) to direct staff to work with ChainFree Asheville and others in the community on what level of funding there will likely need to be in the community fund, carried on a 5-2 vote, with Councilman Mumpower and Councilman Russell voting "no."

Mayor Bellamy said that staff will bring back an ordinance for Council's consideration.

D. RESOLUTION NO. 09-104 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH MATHEWS ARCHITECTURE FOR WC REID CENTER CREATIVE ARTS CONSTRUCTION DOCUMENTS

Parks, Recreation and Cultural Arts Director Roderick Simmons said that this is the consideration of a resolution authorizing the City Manager to enter into a contract with Mathews Architecture to develop the construction documents for the construction of the WC Reid Center for Creative Arts for an amount not to exceed $278,600.

City Council reviewed and approved the new construction plan for the WC Reid Center for the Creative Arts on January 13, 2009.

The City conducted a request for qualifications (RFQ) to develop the WC Reid Center construction documents. The City's policy was followed which included posting RFQ at the mandated locations and number of days, and adhered to the Minority Business Plan. The City received 11 qualified submittals and selected three finalists to interview.

Mathews Architecture was selected as the most qualified firm to develop the construction documents since it demonstrated the most direct experience in recreation and community center design through representative projects that were similar to the scope and scale of this project. The firm most thoroughly articulated the site planning process and the integration of LEED design in terms of a proposed center design.

Mathews Architecture's offices are located at 34 Wall Street, Asheville, North Carolina. The negotiated cost for the construction documents is for an amount not to exceed $278,600.

This action complies with the City Council Strategic Operating Plan in that it contributes to the Sustainable Goal of addressing the city's aging infrastructure including facilities, as well as the Green Goal of making environmentally efficient capital improvement decisions and support energy efficient funding for facilities and operations.

This project complies with the Parks, Recreation, Cultural Arts and Greenway Master Plan in that it supports strategically increasing recreational programming level of service, ensures a continued high level of service in parks, and increases connectivity to parks and greenways.

Pros:
- Next step in the process to fulfill the city's commitment to construct a new WC Reid Center for Creative Arts

Cons:
- If not proceed with construction documents at this time will delay the project resulting in a loss of public and private grant and donation funding

Construction of the Reid Center is funded by 25% of City of Asheville funds as approved in the Fiscal Year 2006-07capital improvement budget, and by 75% of public and private grants

and donations. Cost associated with development of the construction documents is part of the total estimated project cost and budgeted in these funds previously allocated for project.

City staff recommends City Council adopt a resolution authorizing the City Manager to enter into a contract with Mathews Architecture to develop the construction documents for the WC Reid Center for Creative Arts for an amount not to exceed $278,600.

Mr. Simmons responded to Vice-Mayor Davis' concerns regarding $278,600 being spent for a $2 Million project and the reasoning behind a change from the original architect firm.

Councilwoman Cape was pleased that we will be using LEED standards with this building.

Councilman Mumpower was concerned that we are pursuing new construction when we are having tremendous difficulty in maintaining what we currently have. He was also concerned that this project will leave us with an old building that we are still going to have to do something with.

In response to Councilman Mumpower for low bid information, Mr. Simmons said that design work is not bid out. It's done by a Request for Qualifications. A vendor is selected and then a contract is negotiated. City Attorney Oast said that for construction projects over a certain size we are required to solicit proposals from certain types of professionals, but we are prohibited by law from seeking the low bid. The best qualified firm is selected and then a price is negotiated. He has seen where firms supply the hourly fees charged and that can vary depending on who's doing the work.

Councilman Newman felt that the project has strong merits and a lot of people have contributed and raised money for this project. It's true we do have a lot of capital needs for the City, but opposition to this project does not solve those problems for the City of Asheville.

When Mayor Bellamy asked for public comments, none were received.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilwoman Cape moved for the adoption of Resolution No. 09-104. This motion was seconded by Councilman Miller and carried on a 5-2 vote, with Vice-Mayor Davis and Councilman Mumpower voting "no".

RESOLUTION BOOK NO. 32 – PAGE 65

E. RESOLUTION NO. 09-105 - RESOLUTION AUTHORIZING NOTICE OF INTENT TO EXERCISE OPTION TO PURCHASE 29.62 ACRES OF REAL PROPERTY (BEAUCATCHER MOUNTAIN / WESTERN SLOPE) PURSUANT TO LEASE – PURCHASE AGREEMENT WITH THE TRUST FOR PUBLIC LAND

City Attorney Oast said that this is the consideration of a resolution authorizing the acquisition of 29.5 acres on Beaucatcher Mountain for park purposes

In May of 2007, the City entered into a 3-year lease purchase agreement with the Trust for Public Land (TPL) to acquire the property (approximately 29.5 acres) known as Overlook Park. We are entering the third year of that agreement, and the contract with TPL requires us to give notice of our intent to purchase the property on or before June 2, 2009, with closing to occur on or about August 1, 2009.

He provided Council with (1) copy of a March 20, 2007, memorandum outlining projected costs for developing and maintaining the park, and (2) copy of a May 15, 2007, staff report outlining the transaction, including acquisition costs. Reference to the previous documents is made for a detailed explanation of the transaction, including "pros and cons".

The entire amount remaining due on the property for 2009 is $476,431, which includes principal and interest, and under the agreement, the City is responsible for all of it. Assuming that other pledges (including Buncombe County's pledge of $191,000) are fulfilled as expected, the remaining obligation will be $200,053. A recent conversation with representatives of TPL indicates that funds are on hand with TPL currently such that the City's obligation at closing is anticipated not to exceed $260,000. This is a conservative estimate (principal and interest), and assumes that TPL will receive no more donations for this project, and that some pledges will be unfulfilled. We have reasonable expectations that additional funding will be received, and representatives from TPL and private funding sources will be present at Tuesday's meeting to address this.

Application for the PARTF Grant referred to in the May 15, 2007 staff report, which was supposed to be used in year 2 of the agreement, has been deferred until this year. If the PARTF grant is awarded, it is possible that all of the City's costs for the third year lease payment (and other costs of acquisition) will be covered by it. For budgeting purposes, however, the City should plan on expenditures as outlined herein, and some amount (conservatively, $20,000) to cover closing costs and taxes. The proposed budget for 2009-2010 has sufficient funding to complete this transaction. As noted, this "account" remains open at TPL for the receipt of funds, and we will continue to be credited or reimbursed for our acquisition costs as pledges are fulfilled. In order to allow time for a decision to be made on the award of the PARTF grant and for other pledges to be fulfilled, we will see if it is possible to negotiate an extension of the August 1 closing date.

If Council desires to proceed with this acquisition, adoption of the resolution is recommended.

In response to Councilman Mumpower, Parks, Recreation and Cultural Arts Director Roderick Simmons said that he would be happy to provide Council with a comparison of the cost of our Parks, Recreation and Cultural Arts Department with other cities our size in North Carolina.

Mr. Slade Gleaton, representing the TPL, reported that they have $148,000 in pledges, noting that there are still questions on whether the pledges will be forthcoming due to the economy.

Councilwoman Cape said that the project was $2.6 Million and we still have the possibility of a $500,000 PARTF grant. She felt we have a good chance for that kind of grant because of all the participatory funding of private and public sources. She said that people that are interested in putting funds into the development but they can't do that until we own it. To offer this type of asset to our community and visitors is a great gift.

Ms. Stephanie Pankiewicz, member of the Greenway Commission, read a statement from the Greenway Commission. In part, it said that the Commission supports efforts to improve and expand parks and greenways throughout the City. The proposal concerning Overlook Park is an opportunity to do that. It also fulfills a commitment made by the Council to the TPL and to the citizens to take advantage of an opportunity to obtain a unique and desirable property at a fraction of the property's value. The $260,000 funding amount due now from the City represents 10% of the property's $2.6 Million value."

Councilman Mumpower thought this is a good purchase, however, he has trouble with promises made and not fulfilled (not intentional) and having the City taxpayer pick up the

pressure. He was concerned that the City would not receive the PARTF grant since the State is contemplating a $3 Billion reduction.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilwoman Cape moved for the adoption of Resolution No. 09-105. This motion was seconded by Councilman Mumpower and carried on a 6-1 vote, with Councilman Mumpower voting "no".

RESOLUTION BOOK NO. 32 – PAGE 66

VI. NEW BUSINESS:

A. ORDINANCE NO. 3734 - BUDGET AMENDMENT FROM WARREN WILSON SUMMER TO ENHANCE THE SUSTAINABILITY OFFICE PROGRAM

Summary: This is the consideration of a budget amendment, in the amount of $1,500, to appropriate revenue and budget expenditure accounts associated with the payment for a part time temporary intern in the Office of Sustainability.

The City of Asheville and Warren Wilson College formed a strategic partnership in June 2007 to collaborate in our efforts to reduce green house gas emissions. One of the specific elements of this partnership is to provide opportunities to Warren Wilson College students through internship. The Sustainability Management and Policy Intern will support the Energy Coordinators efforts in annual reporting requirements and data analysis part time for a 3 month period. The stipend associated with this work total $1,500.

Warren Wilson College will provide the necessary funds for payment to the Sustainability Management and Policy Intern upon approval of this budget amendment request.

This action complies with the City Council Strategic Operating Plan in the following ways: (1) Expand partnerships with UNC-Asheville, AB Tech and other institutions; (2) Provide leadership in buying local products and services; and (3) Achieve short term and long term energy goals and reduce city carbon emissions by 2% each year.

Pros:

- Internship provides green collar job skills
- Internship supports the City Office of Sustainability efforts to reduce carbon footprint of city operation
- No cost to the City.

Con:

- None identified.

The $1,500 to payment of intern wages will be provided by Warren Wilson College to be paid through the City of Asheville to the intern.

City staff recommends City Council adopt the budget amendment to appropriate revenue and budget expenditures associated with payment of intern wages.

When Mayor Bellamy asked for public comments, none were received.

Mayor Bellamy said that members of Council have been previously furnished with copies of the ordinance and it would not be read.

Councilman Russell moved for the adoption of Ordinance No. 3734. This motion was seconded by Councilman Mumpower and carried unanimously.

ORDINANCE BOOK NO. 25 – PAGE 287

B. RESOLUTION NO. 09-106 - RESOLUTION AUTHORIZING THE CITY TO ENTER INTO AN INTERLOCAL AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION TO PURCHASE FAREBOXES FOR THE TRANSIT FLEET

Summary: This is the consideration of a resolution authorizing the City Manager to enter into an Interlocal Agreement with the N.C. Dept. of Transportation (NCDOT) as State match to purchase fareboxes for the transit fleet.

City staff is in the process of acquiring new fareboxes for the transit system. Part of the effort was to pursue 10% State match for the capital expenditure. Staff applied with the NCDOT and the funds were granted.

The fareboxes are an essential part of operations; they are used to collect the cash fares ensuring a safe environment for drivers and system users. The acquisition of new fareboxes will enhance driver effectiveness and work conditions. The proposed technology stores cash, and accept magnetic swipe cards which will expedite boardings and will increase safety. The farebox system records fares and passenger data and produce accurate and reliable reports about system usage. This technology can be upgraded to issue tickets, handle transfers and read smart cards.

Staff has developed the technical specifications for the fareboxes. The bid and selection process it is expected to take two months. Production process is estimated to take four months.

The estimated cost of this project is $220,400. The City is funding this project using Section 5307 of the Federal Transit Administration which provides eighty percent (80%) for capital projects or $176,320. The City will provide 10% or $22,040 and with this Interlocal Agreement the State will contribute the additional 10%.

This action complies with the Strategic Operating Plan proactively leveraging funding from the State and other funding sources for regional transportation improvements.

Pro:

- Entering into an Interlocal Agreement with the NCDOT reduces the City's contribution to 10% of the cost of the project.

Con:

- None at this time.

The project cost will be $220,040, with 80% of this total to be paid by federal funds - FTA section 5307; 10% or $22,040 by the City and 10% or 22,040 by the State.

City staff recommends City Council authorizing the City Manager to enter into an Interlocal Agreement with the North Carolina Department of Transportation in the amount of $22,040 as State match to purchase fareboxes for the transit fleet.

When Mayor Bellamy asked for public comments, none were received.

Councilman Mumpower reminded Council we are using borrowed dollars from the federal government. He said the help we need from the State of North Carolina, at any level, is for help with the court system. We can buy fareboxes, but we can't fix the court system.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Russell moved for the adoption of Resolution No. 09-106. This motion was seconded by Councilwoman Cape and carried on a 6-1 vote, with Councilman Mumpower voting "no".

RESOLUTION BOOK NO. 32 – PAGE 67

C. RESOLUTION NO. 09-107 - RESOLUTION AUTHORIZING THE CITY MANAGER TO APPLY FOR THE 2010 TRANSPORTATION DEMAND MANAGEMENT GRANT PROGRAM AND ENTER INTO AN AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION FOR ADMINISTRATION COSTS OF THE PROGRAM

Assistant Director of Transportation and Engineering Ken Putnam said that this is the consideration authorizing the City Manager to apply for the 2010 Transportation Demand Management (TDM) grant program and enter into an agreement with the N.C. Dept. of Transportation (NCDOT) for administration costs of the program.

TDM programs are programs which promote an alternative transportation option to the single occupant vehicle. Included among these alternatives are carpooling, vanpooling, telecommuting, transit, bicycle, flexible work hours, compressed work weeks, and parking policies and price structures.

NCDOT's Public Transportation Division is funding TDM programs across the state to support the provisions of the Ambient Air Quality Improvement Act of 1999, Senate Bill 953, to address growing concerns over ground level ozone pollution from motor vehicles and the need to deal with increasing vehicle miles traveled (VMT) and NO_x emissions. This bill established the goals of reducing emissions of nitrous oxides (NO_x) from motor vehicles by 25% by 2009 and reducing the growth of VMT in the State by 25% by 2009.

This program only funds the administrative costs associated with the TDM program, up to 50% of the total administrative expenses. This includes salaries, fringe benefits, marketing, etc.

There are six TDM strategies that the City of Asheville's TDM program is required to employ in order to accomplish the TDM Program Goals set by NCDOT. They are:

1. Conduct marketing efforts/activities identified in a marketing plan.
2. Coordinate with local transportation and land use planning efforts.
3. Facilitate ridematching services through the ShareTheRideNC website.
4. Promote the Best Workplaces for Commuters^{SM} Program.
5. Collect and calculate data on VMT and NO_x reductions through TDM activities.
6. Operate in a manner consistent with the NCDOT goals regarding making our transportation network safer, making our transportation network move people and goods more efficiently, and making our infrastructure last longer.

The City's TDM program began in August 2005 and was administered under the French Broad River Metropolitan Planning Organization (MPO) and the City of Asheville's Transportation and Engineering Department. Since the functions of the MPO have been relocated to the Land of Sky Regional Planning Council, the TDM program was given its own budget code of 1606 to help with accountability. The 2009/10 budget for this program is currently in the City of Asheville's budget process.

Programs currently being administered are, but not limited to:

- The *PASS*port (employer bus pass) Program
- The Emergency Ride Home Program
- Strive Not to Drive – annual promotional event
- Share the Ride NC – Statewide ridematching program

On March 10, 2009, the City of Asheville applied for the Fiscal Year 2010 TDM Grant. In June 2009, the Board of Transportation will vote on whether or not to approve the funds in the maximum amount of $84,636 for the City of Asheville's TDM Grant.

The total amount for this grant is $84,636, of which 50% is reimbursed by NCDOT.

This TDM program supports the City of Asheville's 2009/10 Strategic Plan by helping to promote emission-reducing options, as well as supporting the Asheville Transit System though programs such as the *PASS*port program.

Pros:

- The current 50% match is reimbursed by NCDOT.
- To date, these statewide programs have reduced the growth of VMT by 24.6% - the goal for Senate Bill 953 was 25%.
- This program funds 50% of the TDM Coordinator position.

Con:

- None.

The project cost will be $84,636; 50% of this total will be paid by NCDOT and 50% by the City.

City staff recommends City Council authorize the City Manager to apply for the 2010 TDM grant program and enter into an agreement with the NCDOT for administration costs of said program.

In response to Vice-Mayor Davis, Mr. Putnam said that he would be happy to provide Council with a report of performance measures on the effectiveness of the programs.

Councilman Mumpower said the help we need from the State of North Carolina, at any level, is for help with the court system. These are nice projects, but not necessary.

When Mayor Bellamy asked for public comments, none were received.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Newman moved for the adoption of Resolution No. 09-107. This motion was seconded by Councilwoman Cape and carried on a 5-2 vote, with Councilman Russell and Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 32 – PAGE 68

D. RESOLUTION NO. 09-108 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A FEDERAL COST SHARE AGREEMENT WITH THE ARMY CORP OF ENGINEERS TO ASSIST IN THE COMPLETION OF THE SWANNANOA RIVER FLOOD RISK MANAGEMENT PROJECT

Director of Transportation and Engineering Cathy Ball said that this is the consideration of a resolution authorizing the City Manager to complete negotiations and sign a Federal Cost Share Agreement (FCSA) with the U.S. Department of the Army ("Government'), represented by the U.S. Army Engineer, Nashville District for the Government services assisting in the completion of the Swannanoa Flood Risk Management Project (Project) approved by Council on April 28, 2009.

The Hurricane Recovery Act of 2005 (Senate Bill 7) allocated funds for planning and implementation of projects to aid in flood damage reduction for North Carolina communities hardest hit by the 2004 hurricane season. The Biltmore Village area of the City of Asheville (within the Swannanoa River watershed) was named as a recipient of this funding. From December 2005 through August 2006 a planning study was conducted to identify and prioritize flood damage reduction projects for implementation in the community. This planning study was conducted by the North Carolina Department of Environment and Natural Resources Division of Water Resources (DWR) and stakeholders from the Biltmore Village, City of Asheville and the Swannanoa watershed, with the assistance of a project consultant. In September 2006, expenditure of funding for implementation of this Plan was reviewed without objections by the NC Government Operations Committee. The requested action complies with the City's plans and commitments to administer $2.5M of Senate Bill 7 funding consistent with a contract executed with the North Carolina Division of Water Resources on April 4, 2007.

Council approved a resolution on April 28, 2009, authorizing the City Manager to complete negotiations and sign a contract with Brown and Caldwell for the completion of the Swannanoa Flood Risk Management Project. The Project plan requires the involvement of the U.S. Army Corps of Engineers. The Secretary of the Army is authorized by Section 205 of the Flood Control Act of 1948, Public Law 80-858 to allot appropriations for the implementation of small structural and non-structural projects for flood control and related purposes; provided that no more than $7,000,000 shall be allotted for a project at any single locality.

The FCSA will recognize a majority of the work completed by the Brown and Caldwell project team as "work-in-kind" matching to Section 205 funds allotted to the Project. However, in order to complete the work requested of the U.S. Army Corps of Engineers, agreement to a cash match of up to $110,000 is required. In addition, once identified flood control projects have proceeded to the final design and construction stages and as additional study needs (e.g. geotechnical or property acquisition services) are identified, additional funding may be required. The cost sharing ratio for final design and construction is generally 35% local, 65% Federal.

The agreement will cover basic services to be provided by the Government during the Project period (expected completion in June 2011). The total cost of this project is $1,958,000 of which the City of Asheville is responsible for 50% of this cost. Work in Kind (WIK) from the Swannanoa River Flood Risk Management Study can be used toward the match from the City. The total cash match for this project is $110,000 of which the monies will be budgeted in the Transportation and Engineering Department for $30,000 in Fiscal Year 2010 and $80,000 in Fiscal Year 2011 of which will be reimbursed from the SB 7 funds.

Pros:

- The cooperation of the U.S. Army Corps of Engineers and execution of a Federal Cost Sharing Agreement will position our community to receive Federal investment in flood control projects (35% local, 65% Federal sharing).
- The initial $110,000 cash cost sharing match will be paid from Senate Bill 7 funds.
- The City may proceed with a request that one-half of the future cost sharing (above the requested $110,000) be provided by funds allocated to the N.C. Division of Water Resources Capital Projects fund.

Cons:

- The City cannot currently know the ultimate cost of planning, design and construction of the projects to be recommended for implementation.

- The City's responsibilities during the study will require an approximately 20% full-time equivalent (FTE) staff assignment from the Engineering Department over the coming 2 years.
- It is expected that most of the flood risk reduction projects will be implemented in the Swannanoa watershed outside the City limits and extraterritorial jurisdiction.

The funds to be expended have been provided by the State in compliance with the Hurricane Recovery Act of 2005. City staff will provide project management oversight and will participate in a series of project meetings and workshops, public meetings, and meetings with regulatory agencies. Approximately 20% FTE staff assignment will be required over a two year period.

City staff recommends City Council adopt a resolution authorizing the City Manager to negotiate and then execute a Federal Cost Share Agreement (FCSA) with the Department of the Army for an amount not to exceed $110,000.

When Mayor Bellamy asked for public comments, none were received.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Newman moved for the adoption of Resolution No. 09-108. This motion was seconded by Councilman Russell and carried on a 6-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 32 – PAGE 69

E. RESOLUTION NO. 09-109 - RESOLUTION AUTHORIZING THE CITY MANAGER TO MAKE THE PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGE AND/OR UNFORTIFIED WINE TO WINDOWS ON THE PARK FOR A PRIVATE EVENT IN PACK SQUARE PARK IN PACK SQUARE ON THE LAWN AREA ON JUNE 6, 2009, FROM 3:00 P.M. TO 11:59 P.M.

Ms. Diane Ruggiero, Superintendent of Cultural Arts, said that this is the consideration of a resolution authorizing the City Manager to make provision for the possession and consumption of malt beverages and/or unfortified wine to Windows on the Park for a private event in Pack Square Park in Pack Square on the lawn area on June 6, 2009, from 3:00 p.m. to 11:59 p.m.

Those Girls, LLC has requested through the Asheville Parks, Recreation and Cultural Arts Department that City Council permit them to serve beer and/or unfortified wine at a private event on the lawn area in the Pack Square area in Pack Square Park adjacent to their business, Windows on the Park, located in the Biltmore Building.

The malt beverages and unfortified wine will be served in glass containers and bottles.

Those Girls, LLC have requested a temporary extension of their ABC permit (premise 0016753AJ) from the North Carolina Alcoholic Beverage Control Commission (NCABC) for the date of the event. Event organizers will follow all City policies outlined in the Outdoor Special Event Guide and ordinances regarding alcohol on City property.

This resolution is pending the ability for the City of Asheville to issue an Outdoor Special Event permit for the lawn area in the Pack Square area in Pack Square Park and the event organizers receipt of the temporary extension from NCABC.

This action does not comply with the City Council Strategic Operating Plan nor does it comply with the Parks, Recreation and Cultural Arts Master Plan.

Pro:

- None.

Cons:

- Potential for public safety issues;
- The event is not open to the public.

There is no fiscal impact.

City staff recommends City Council adopt a resolution authorizing the City Manager to make provision for the possession and consumption of malt beverages and/or unfortified wine on the lawn area in the Pack Square area in Pack Square Park on June 6, 2009 from 3:00 p.m. to 11:59 p.m. for Those Girls, LLC.

When Mayor Bellamy asked for public comments, none were received.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilwoman Cape moved for the adoption of Resolution No. 09-109. This motion was seconded by Councilman Newman and carried on a 5-2 vote, with Mayor Bellamy and Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 32 – PAGE 70

At 10:05 p.m. Councilwoman Cape asked to be excused from the remainder of the meeting due to her travelling schedule. Therefore, Councilman Mumpower moved to excuse Councilwoman Cape from the remainder of the meeting. This motion was seconded by Councilman Russell and carried unanimously.

F. ALTERNATIVE PROPOSAL ON RESOLVING THE WATER SYSTEM CONFLICT

Councilman Mumpower presented Council with an alternative proposal to the Asheville resolving the water system conflict.

He provided a bit of history as follows: (1) Asheville leaders purchased our two primary watersheds as Asheville City owned properties in the early part of the twentieth century – we are all blessed by their foresight and investment; (2) Sullivan Act I was passed in the early thirties during a time of major economic upheaval. It covered a limited number of private and public water systems that were absorbed into the Asheville water system – very little of the absorbed lines and infrastructure remain in use; (3) It is a fact that Asheville has taken money from the water revenue through the years – just like every other city in NC; (4) One of the biggest reasons is that Asheville, unlike every other city in NC and the country, refused to default on bonds during the Great Depression. To our credit we repaid our debt and used our resources to do the right thing; (5) There is a long standing history of neglecting water and other infrastructure in Asheville *and* every other city in NC and America (think bridges, roads, civic buildings, etc.) Some of the worst neglect occurred when we had a joint politicized water authority during the eighties, nineties, and the early part of this century; (6) When Mayor Worley, to his strong credit, took the leadership in legally retaking control of Asheville's water system, he demonstrated an unusual level of political courage that is to his permanent credit; (7) When Asheville leaders (unanimously) supported the Mayor, Buncombe county leaders immediately began a public misinformation campaign; (8) To add insult to injury, county staff collaborated with local legislative representatives in creating draft legislation for Sullivan Acts II and III in order to steal control of

Asheville's water system; (9) Our local legislative representatives at that time (Nesbitt, Goforth, Apodoca, & Fisher are currently serving) successfully convinced their Raleigh colleagues to pass Sullivan Acts II and III. These acts uniquely singled Asheville out from all other city owned water systems and effectively took control of Asheville's water resources; (10) City leadership (again unanimously) voted to legally fight this unprecedented state intrusion on local government affairs; (11) We lost at every level – *but* – in every case what was validated by the courts was the right of the state to seize our assets – *not* the rightness of doing so; and (12) Fast forward to last month and we have the Mayor and Asheville City Council majority inserting a last minute compromise plan into the agenda whereby we effectively surrender to an unprecedented state action to essentially seize control of an Asheville citizen asset worth $1.25 Billion (Brown and Caldwell study – 2008).

He explained a minority position of (1) We do not need to surrender control and thus realistic ownership of Asheville's water assets; (2) The City should stand strong until we have a change of heart by our local state legislators *or* Asheville residents see that a change of representation is in their interest; and (3) In the interim, there are options...

Option One (1) Continue to call for open public negotiations with county and state representatives; (2) Stand firm on treating Asheville like *all* other cities in North Carolina who own their water system; and (3) Cooperate on one point of compromise that insures fairness for city and county residents – *Implementing the equal treatment of Asheville over a longer term period – up to 10 years if such is necessary – to insure an agreement and permanent resolution of our water war.*

Advantages - fair; treats Asheville like other cities; places no unreasonable burden on city or county residents; resolves conflict in positive manner; provides a "political" out; and avoids complex political agreements that are difficult to implement and maintain.

Option Two (1) Accept the legislative theft of Asheville's water delivery system; (2) Separate the watersheds, reservoirs and treatment plant from the water delivery system; (3) Establish a regional water authority and deed control, debt, and responsibility for the water delivery system to that authority; (4) Invite other cities (Hendersonville and Weaverville for example) to join that regional authority; and (5) Charge a reasonable rate for water coming out of Asheville reservoirs and use this Asheville resource to off-set city resident's excessive tax burden.

Advantages - we are able to legally counter the theft of the most valuable components of our water system; we support the creation of a regional water authority; Asheville city residents will receive compensation for ownership of their watershed, reservoirs and water treatment facilities; and the conflict between the city, county, and state is ended.

Action steps forward include (1) Policy discussion tonight; (2) Review of our legal authority in this matter; (3) Public information campaign; (4) Public hearing; (5) Public discussion with state and county representatives; and (6) Timely movement forward.

He said that the legislative theft of our citizen's water resources is the most reprehensible political action in Asheville's history. As our city's elected officials, we should exhaust our options for resisting this action – we may lose – we should never surrender...

Councilman Newman asked for Council's support in asking our City Attorney to review any potentials to the points outlined in Option Two.

Councilman Newman felt that City Attorney Oast is constantly searching for a better outcome for the citizens of Asheville and feels confident that he would report back to Council if he uncovers anything useful.

Mayor Bellamy stressed that she did not think it was in the best interest of the City rate payers to have our water system (our number one asset) to be taken from us and placed into a body that is not elected and not accountable to the general public. If people don't like what we're doing with our water system, they can vote City Council out of office. She will not support an independent authority. She did not believe in any way that we surrendered our water system. We went to court and fought to work for changes to legislation on Sullivan Acts II and III and we lost that battle. Now we are working with our legislators to get some changes to make sure that we can at least use some of the revenue to improve stormwater upgrades and improve streets and sidewalks as we improve our water system. And, we will continue to show how well we have operated the system since 2005 through improvements and investments. We now have a new Water Resources Director who will take us to a better place with the system.

Upon inquiry of Councilman Mumpower, City Attorney Oast said that he would have to research separating the watersheds, reservoirs and treatment plant from the water delivery system. Since the watersheds and reservoirs were acquired in a different manner, there may be some basis for treating them differently.

Councilman Newman explained why he didn't think a regional authority would be politically viable.

Councilman Russell would be open to asking City Attorney Oast to investigate a regional authority.

Vice-Mayor Davis agreed that we have not surrendered our water system. He recalled that the independent authority did not work. He felt the legislators now recognize there is some merit to the tremendous improvements we've made to the system since 2006.

Mayor Bellamy felt that to allow an authority to have oversight of rates and improvements is wrong. We know our system needs millions of dollars of investment and the authority would have control over those rate increases. It would not be the political body which is accountable to the citizens. That is not right. When others in our region were talking about mandatory drought conservations, we were doing voluntary conservation in an adequate manner.

Even though there was not the majority Council asking City Attorney Oast to review any potentials to the points outlined in Option Two, he said that as time permits he will continue to look into this matter.

G. RESOLUTION NO. 09-110 - RESOLUTION APPOINTING MEMBERS TO THE CIVIC CENTER COMMISSION

Vice-Mayor Davis, Chair of the Boards & Commissions Committee, said that this is the consideration of appointing members to the Civic Center Commission.

The terms of Brian Woods, George Keller and J. Michael Burke, as members on the Civic Center Commission, expire June 30, 2009. In addition, Mr. Bill Lack resigned from the Civic Center Commission, thus leaving an unexpired term until June 30, 2011.

At the May 12, 2009, meeting, it was the consensus of Council (1) to reappoint Mr. Woods, Mr. Keller and Mr. Burke to each serve a three-year term respectively, terms to expire June 30, 2012, or until their successors have been appointed; and (2) to interview J.L. Thompson.

Councilman Mumpower moved to (1) reappoint Mr. Woods, Mr. Keller and Mr. Burke to each serve a three-year term respectively, terms to expire June 30, 2012, or until their successors have been appointed; and (2) appoint J.L. Thompson as a member of the Civic Center Commission to serve the unexpired term of Mr. Lack, term to expire June 30, 2011, or

until his successor has been appointed. This motion was seconded by Councilman Miller and carried unanimously.

RESOLUTION BOOK NO. 32 – PAGE 73

H. RESOLUTION NO. 09-111 - RESOLUTION APPOINTING A MEMBER TO THE CIVIL SERVICE BOARD

Vice-Mayor Davis, Chair of the Boards & Commissions Committee, said that this is the consideration of appointing a member to the Civil Service Board.

The term of Sharon West, as a member of the Civil Service Board, expired on May 21, 2008. Ms. West is not interested in reappointment.

On March 24, 2009, City Council interviewed Ms. Odom and Ms. Brown. Ms. Brown has moved outside Asheville's City limits and is therefore not eligible for appointment. Mr. Davidson Jones did not attend the interview.

On May 12, 2009, it was the consensus of Council to interview Larry Harris.

Councilman Mumpower moved to appoint Larry Harris as a member of the Civil Service Board to serve the unexpired term of Ms. West, term to expire May 21, 2010, or until his successor has been appointed. This motion was seconded by Councilman Russell and carried unanimously.

RESOLUTION BOOK NO. 32 – PAGE 74

VII. OTHER BUSINESS:

Mayor Bellamy was pleased to announce the dedication of the new Veterans Memorial at Memorial Stadium which was unveiled on May 25, 2009. The tablets are engraved with the names of Western North Carolina servicemen who lost their lives in World Wars I and II. Councilman Mumpower was pleased to be a part of the dedication ceremony.

Claims

The following claims were received by the City of Asheville during the period of May 1-21, 2009: Gary N. Weaver (Transit), Yvonne Benson (Sanitation), John Retherford (Streets), Susan Feinblatt (Streets), AT&T (Streets), Charmane A. Cox (Sanitation) and Brooke D. Dickson (Streets).

These claims have been referred to Asheville Claims Corporation for investigation.

VIII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

IX. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 10:32 p.m.

Magdalen Burleson
CITY CLERK

MAYOR

Tuesday – June 9, 2009 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Jan B. Davis; Councilwoman Robin L. Cape; Councilman Kelly M. Miller; Councilman R. Carl Mumpower (excused from meeting at 8:59 p.m.); Councilman Brownie W. Newman; Councilman William A. Russell Jr.; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Bellamy led City Council in the Pledge of Allegiance.

INVOCATION

Councilman Miller gave the invocation.

I. PROCLAMATIONS:

II. CONSENT AGENDA:

At the request of Councilman Mumpower, Consent Agenda Item "E" was removed from the Consent Agenda for discussion and/or an individual vote.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON MAY 26, 2009

B. RESOLUTION NO. 09-113 - RESOLUTION AUTHORIZING THE CITY CLERK TO ADVERTISE AN OFFER TO PURCHASE AIR SPACE AT 51 BILTMORE AVENUE

Summary: The consideration of a resolution authorizing the City Clerk to advertise an offer to purchase air space at 51 Biltmore Avenue.

A bid has been received from McKibbon Hotel Group, Inc. in the amount of $889 for the purchase of 187 square feet of air space at the 51 Biltmore Avenue property, further identified by the PIN # 964849357600000.

The property at 51 Biltmore Avenue is the currently being used as a surface parking area. A public-private mixed use development has been proposed for the site, and includes the construction of a 145-room hotel; 2,600 square feet of retail space, an 83-seat restaurant and a public parking deck. This project has received approval from the Downtown Commission, the Planning and Zoning Commission, and the final Technical Review Committee approval was granted on April 20, 2009. Council approval was granted on October 14, 2008.

This air rights request is specific to the proposed hotel, the Aloft by Starwood, via McKibbon Hotel Group, Inc. According to the plans, the hotel building will be sited at the corner of Biltmore Avenue and Aston Street. At 90' above the sidewalk level on the Aston Street side, a decorative seam metal roof element, known as a "swoof", is designed that will extend 5'6" over the right-of-way boundary (sidewalk), with a corresponding length of 34'. The total area of this architectural feature that encroaches into the public right-of-way equals 187 square feet.

Past appraisals indicate that the value of air space over public rights of way is 20% of the per square foot land value of the property applied to the horizontal area of the airspace. This method was used to extrapolate a value for the air space using the tax assessment for the property at 51 Biltmore Avenue. The estimated value of the air space for 187 square feet is $889. The bid from McKibbon Hotel Management is to acquire the air space for the architectural details for the sum of $889.

This action complies with the City Council Strategic Operating Plan in that this development proposal supports the strategic goal of sustainability by providing infill growth where infrastructure currently exists and encourages economic development in the downtown.

Pros:

- The sale will be at fair market value.
- The architectural details will provide a more visually interesting roof feature on the building.

Con:

- None

The fiscal impact for this sale of air rights will be finalized once the upset bid process has concluded.

City staff recommends City Council adopt a resolution which will initiate the sale of the air space through the upset bid process.

There as a brief discussion, initiated by Councilman Mumpower, regarding the current formula to determine the value of air space. It was the consensus of Council to have staff review the current formula for possible revisions, along with best practices in other cities, and report their findings to the City Council Planning & Economic Development Committee for review.

Economic Development Director Sam Powers said that he would get a response to Councilwoman Cape's question regarding if the 187 square feet of air rights is included in the tax bill.

RESOLUTION BOOK NO. 32 – PAGE 76

C. RESOLUTION NO. 09-114 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH KEEN IMPRESSIONS INC. FOR PRINT SERVICES

Summary: The consideration of a resolution authorizing the City Manager to enter into an agreement not to exceed $175,000 with Keen Impressions, Inc. for print services.

Approximately every three years, the City of Asheville conducts an analysis to determine the most cost effective means for fulfilling the organization's print needs. This exercise is consistent with best practices for ensuring internal services are provided at the lowest possible cost given defined standards for quality and responsiveness.

This year, city staff issued a Request for Proposals for print services to compare costs proposed by external print companies to the costs associated with operating an internal print shop. The lowest responsive bidder, Keen Impressions, demonstrated the ability to provide print services at rates 30 percent lower than the full cost recovery rates of the internal print shop. Keen Impressions also demonstrated the ability to meet the organization's expectations for turn around times, job delivery, and quality of print work.

As a result, staff is seeking City Council authorization to enter into an agreement with Keen Impressions that sets rates for a comprehensive set of print services utilized by the City of Asheville. These rates will remain in effect for a period of three years with an allowance for a fixed paper price increase of not more than 2 percent each year.

This action complies with the City Council Strategic Operating Plan by upholding Council's commitment to operate the city to the highest levels of fiscal responsibility.

Pros:

- Establishes print rates from a lowest responsive bidder established through a competitive process.
- Expected to yield a net cost savings to the General Fund in year two of contract implementation.
- Existing staff members from the internal print shop will be offered employment opportunities with the organization.

Con:

- Requires a transition period for the organization to learn the processes and procedures of facilitating print work through an external vendor.

The contract is structured not to exceed $175,000 throughout the course of each fiscal year, although staff expects the actual amount spent on print services to be less as a result of targeted efforts to limit paper use across the organization. The print services contract will be rebid after three years. The contract is expected to result in a net savings to the General Fund of at least $40,000 in year two of implementation.

City staff recommends City Council adopt a resolution authorizing the City Manager to enter into an agreement with Keen Impressions, Inc. in an amount not to exceed $175,000 for print services.

RESOLUTION BOOK NO. 32 – PAGE 77

D. ORDINANCE NO. 3735 - BUDGET AMENDMENT FOR TO SETTLE THE LAWSUIT CAPTIONED TROY WYATT VS. CITY OF ASHEVILLE, ET AL

Summary: The consideration of a budget amendment, in the amount of $150,000, to settle the lawsuit captioned Troy Wyatt v. City of Asheville et al. (file no. 1:09-CV-00023, WDNC).

On January 25, 2006, Troy Steven Wyatt was injured when the Asheville Police Department (APD) conducted a raid on a suspected drug house. APD deployed a distraction device into a room that was occupied by Mr. Wyatt and others. This action resulted in injury to Mr. Wyatt when the device burned him. Mr. Wyatt sued the individual officers and the City of Asheville on the basis that the officers used excessive force and falsely arrested him. The officers and City denied the allegations. The Asheville Claims Corporation, through its attorneys, has reached a settlement with Mr. Wyatt in the amount of $300,000. Because the proposed settlement amount exceeds the settlement authority of the Asheville Claims Corporation, City Council approval of it is required. Sufficient budget authority already exists in the City's liability insurance budget to pay for half of this settlement; however a budget amendment in the amount of $150,000 is needed to cover the full amount of the settlement. This $150,000 will be appropriated from the liability insurance fund balance reserves.

The Asheville Claims Corporation settles claims against the City of Asheville.

This action complies with the City Council Strategic Operating Plan – Sustainability, in that the fund balance exists to be used for this type of situation.

Pros:

- Settlement has been reached with Mr. Wyatt.
- This settlement will release the City and its officers from any future liability.
- The City's guidelines regarding the deployment of distraction devices have been reviewed and changes have been made.
- Settlement would be made under the City's actual damages administrative policy. Facts and law specific to this case have been reviewed by City Staff and City Council. Payment is not a waiver of governmental immunity.

Con:

- The Liability Claim Fund balance will have a net decrease of $150,000.

$150,000 will be appropriated from the liability insurance fund balance. The City itself is self insured up to $500,000 for liability claims rising against the City. The Asheville Claims Corporation mitigates and settles claims for the City of Asheville. Based on the most recent actuarial recommendation, the liability insurance fund balance will remain healthy to pay future claims. Because the liability insurance fund balance is considered reserved, the $150,000 appropriation will not impact the City's available fund balance.

The Asheville Claims Corporation requests that City Council adopt a budget amendment, in the amount of $150,000, for settlement of the lawsuit Troy Wyatt v. City of Asheville et al.

Councilman Mumpower said that this settlement has the potential to save City taxpayers a lot of money, but this settlement illuminates what is a nightmare problem in our country – a dysfunctional judicial system. We are going to pay someone who was in a crack house $300,000 and this action is very distasteful.

Mayor Bellamy noted that there is more to the story than someone going into a crack house and felt this settlement is the best outcome for all parties.

ORDINANCE BOOK NO. 25 – PAGE 289

E. MOTION WAIVING FIRE, ZONING AND TECHNICAL REVIEW FEES FOR DOWNTOWN ASHEVILLE RESIDENTIAL NEIGHBORHOODS TO CONDUCT A CULTURAL ART PROGRAM AT PRITCHARD PARK

This item was removed from the Consent Agenda for discussion and/or an individual vote.

F. RESOLUTION NO. 09-115 - RESOLUTION AUTHORIZING THE MAYOR TO EXECUTE AN EASEMENT FOR THE INSTALLATION OF POWER UTILITY LINES AND FACILITIES ON CITY PROPERTY ON RESERVOIR ROAD (WHITE FAWN RESERVOIR – UNITED STATES CELLULAR)

Summary: The consideration of a resolution authorizing the Mayor to execute an easement for electrical power facilities at the White Fawn Reservoir property for an extension to the United States Cellular (herein "US Cellular") tower on the site.

The land on which the White Fawn Reservoir is located is owned by the City of Asheville. The subject property contains a cellular tower used by US Cellular. The utility lines on the property will be installed underground, and three (or is it four) power poles will be removed. The new installation will involve a 36 foot span over Reservoir Road to a new pole, and then 270 feet underground to a new pad-mounted transformer and light. Approximately 300 feet of existing overhead line and at least two poles will be removed. The easement area will be 30 feet for the

new overhead facilities, and 10 feet on either side of the underground line, and 10 feet around the new transformer and light.

This action complies with the City's Strategic Operating Plan in that it supports sustainable economic development, and contributes to Asheville's role as a regional economic and service center in the operation of the cellular telecommunications tower regional facility. The project has been reviewed by the City's arborist, who notes that one semi-mature tulip poplar will be removed, but no other significant vegetation. The new tower facility is expected to serve some of the City's communication needs.

Pros:

- Facilitates development of telecommunications towers
- New lines will be mostly underground; above ground lines removed
- City communication capability will be enhanced

Con:

- None noted

The fiscal impact is eventual cost saving to City from relocation and consolidation of communications facilities.

Adoption of the resolution is recommended.

RESOLUTION BOOK NO. 32 – PAGE 78

G. RESOLUTION NO. 09-116 - RESOLUTION SUPPORTING THE CITY OF ASHEVILLE BOARD OF ALCOHOLIC CONTROL'S OPERATION OF ABC STORES AND OPPOSING MERGER OF ABC BOARDS AND "AGENCY STORES"

Summary: The Asheville Board of Alcoholic Control has requested City Council support of spirit sales through ABC Stores and in opposition to "agency stores."

Councilman Mumpower, liaison to the ABC Board, felt that the state government is looking for additional revenue sources and intruding on local authority. This creates basically two lines of operational opportunity over the ABC services and urged Council to support the resolution opposing the merger of the ABC Boards and "agency" stores.

RESOLUTION BOOK NO. 32 – PAGE 80

Mayor Bellamy asked for public comments on any item on the Consent Agenda, but received none.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilwoman Cape moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Miller and carried unanimously.

ITEMS REMOVED FROM THE CONSENT AGENDA FOR INDIVIDUAL VOTES

E. MOTION WAIVING FIRE, ZONING AND TECHNICAL REVIEW FEES FOR DOWNTOWN ASHEVILLE RESIDENTIAL NEIGHBORHOODS TO CONDUCT A CULTURAL ART PROGRAM AT PRITCHARD PARK

286

Summary: The consideration of a request from Downtown Asheville Residential Neighborhoods (DARN) to waive fire, zoning and technical review fees in the amount of $286 for a cultural arts program at Pritchard Park.

DARN has proposed conducting a cultural art program at Pritchard Park during the park's regular operation hours according to the dates and event descriptions listed below. All of the events conducted by DARN will be free and open to the public.

The total event permits include park rental fees (valued at $8,725) as well as fire, zoning and technical review fees (valued at $286) for the said events. The Recreation Board will review DARN's request to waive the park rental fee (valued at $8,725) for the cultural art program at its meeting on June 8, 2009. If the Recreation Board does not waive the park rental fee, it will be reported to City Council at its meeting on June 9, 2009.

DARN is asking that the Asheville City Council consider waiving the fire, zoning and technical review fees, valued at $286, for the cultural arts programming. The Recreation Board does not have the authority to consider waiving these fees because they fall outside the scope of the Parks, Recreation and Cultural Arts Department.

Descriptions of the events and dates that will comprise DARN's proposed cultural arts program include:

- Entertainment every Tuesday and Thursday at 5–7 p.m.; and Wednesday at noon through September 2009. Activities will most often include music performances.
- Arts Market every Saturday at 10 a.m. – 4 p.m. through September 2009. Local artists will display and sell their work.
- Movies in the Park every Saturday in August 2009 at 8 – 10 p.m. An outdoor movie will be shown each night.
- Pritchard Park Birthday Party, August 1, 2009 at 10 a.m. – 1 p.m. Pritchard Park was originally dedicated as a public park on July 31, 1932. The event will celebrate the park's 77th year as a public park with children activities and music.
- Santa in the Park every Saturday November 28 through December 19 at 9 a.m. – 4 p.m. Santa will greet park visitors and holiday entertainment.

DARN is a neighborhood association for residents in the Central Business District of downtown Asheville to connect residents to the community and support neighborhood issues. Besides supporting Pritchard Park, DARN collaborates with Asheville Greenworks, MANNA Foodbank, Homeward Bound, Arts 2 People, Asheville Mural Project and the Asheville Downtown Association to benefit downtown Asheville.

DARN is working with the City of Asheville to enhance Pritchard Park to 1) partner with Asheville Downtown Association to provide and install holiday lights in the park, 2) beautify the park by donating and maintaining planters with seasonal plant material.

This item has been reviewed by the Council's Public Safety Committee at its meeting on May 19, 2009.

Pros:

- Enhances DARN's ability to provide cultural arts programming in Pritchard Park
- Supports recommendations of the Downtown Social Issues Task Force

Cons:

- Reduces the annual revenue in the included service areas.

In 2008, the City supported the entertainment and arts market component of the cultural arts program in Pritchard Park via an agreement with Art2People in which the City allocated $10,000 and waived the park rental fee and event permit fees for a total value of $17,585. The current proposal includes waiver of the park rental fee and event permit fees for a total value of $9,011. The remainder of the cost associated with the 2009 program is included in the volunteer services as provided by DARN.

City staff recommends City Council to approve the permit fee waiver in the amount of $286 for fire, zoning and technical review fees for the cultural arts program provided by Downtown Asheville Residential Neighborhoods in Pritchard Park.

Councilman Mumpower felt that providing cultural art programs at Pritchard Park is a City function. In addition, he didn't believe it was fair to create special deals to a special interest groups.

Councilwoman Cape felt this is an example of citizens taking responsibility and engagement with their neighborhood park. They have raised a lot of money, put in flower boxes and spent countless hours being engaged with that park. This feels like a partnership with DARN rather giving them a special deal.

Ms. Susan Griffin, Chair of DARN, said that they are partnering with two groups that have two main focuses in the park – (1) beautification; and (2) programming. They have installed 21 planters in the park and raised money for the maintenance of them. Also, this year they are not asking for any funds from the City for programming – they have raised all the funds themselves.

Mayor Bellamy said that other neighborhood groups often times have the opportunity to utilize their neighborhood park for very limited cost or not at all. She felt this is an opportunity for the City to continue their partnership with DARN especially since we have seen the curbing of some illegal activities in Pritchard Park due to the positive nature of the programming as well as the variety of people from across downtown that are actually utilizing the park.

Councilwoman Cape moved to approve the permit fee waiver in the amount of $286 for fire, zoning and technical review fees for the cultural arts program provided by Downtown Asheville Residential Neighborhoods in Pritchard Park. This motion was seconded by Vice-Mayor Davis and carried on a 6-1 vote, with Councilman Mumpower voting "no."

ADDITIONS TO CONSENT AGENDA

A. RESOLUTION FAVORING AN INDEPENDENT ENERGY EFFICIENCY ADMINISTRATOR FOR THE STATE OF NORTH CAROLINA

Councilwoman Cape said that there is a bill in the legislature to create NC SAVES ENERGY, which legislation is to establish an independently administered statewide energy efficiency program to reduce energy usage and costs for low and moderate income households across the state. She felt this is an important tool, noting that the program will not be administered by the power companies. She explained that this would be a very low surcharge (approximately $1) on the power bill, which will go to reduce consumption.

She provided Council with the following resolution: "WHEREAS, the NC General Assembly has passed a very modest Renewable and Efficiency Portfolio Standard, which calls only for up to 5% efficiency by the state's electric utilities by 2021; and WHEREAS, electrical production is a major contributor to air pollution and greenhouse gases, and baseload power plants, less than 40% efficient themselves, constitute the single largest locus of inefficiency and wasted heat in NC's energy budget, as well as a significant contributor to drought vulnerability and degradation of aquatic ecosystems; and WHEREAS, studies by several energy experts have shown that efficiency gains of at least 19% are achievable cost-effectively, even before

implementation of any taxation or cap and trade limits for greenhouse gas emissions; and WHEREAS, low- and moderate-income households with poor quality housing use a disproportionate amount of energy to heat and cool their homes and thus disproportionately pay 'per unit used' energy surcharges, our state's energy plan should include weatherization and other energy efficiency programs to assist these households, which will provide a meaningful improvement to the quality of life of these citizens as well as a significant environmental impact, and WHEREAS, legislation to establish an independently administered statewide energy efficiency program for electric and gas customers, NC SAVE$ ENERGY, House Bill 1050, has been introduced into the House of Representatives of the NC General Assembly, to reduce energy usage and costs for low and moderate income households and a small program for government buildings, schools and hospitals, create thousands of green jobs, prevent the building of any new baseload power plants, and reduce pollution and climate changing emission. NOW THEREFORE, BE IT RESOLVED BY ASHEVILLE CITY COUNCIL that: Section 1.The North Carolina legislature and especially our region's representatives, are urged to pass House Bill 1050 in 2009, in order to create NC SAVE$ ENERGY, a statewide energy efficiency independent administrator, and the Governor is urged to sign the legislation, to begin implementation of the programs at the earliest possible date. Section 2. That such a North Carolina energy efficiency program be required to save significant energy and reduce greenhouse gas emissions; be fairly funded by all electricity and gas customers in proportion to their energy use; and provide incentives to customers to both conserve energy and implement energy efficiency measures, and finances and efficiency accomplishments be independently evaluated annually. Section 3. That the priorities for the North Carolina energy efficiency plan include addressing the unmet needs of working families and those on fixed incomes for assistance in implementing energy efficiency measures, as well as the need to create new North Carolina-based public and private jobs in the growing efficiency and conservation markets. Section 4. That such a program be fairly funded by electric and gas customers in proportion to their energy use, with exemptions for participants in a range of federal and state subsidy programs for low and fixed income and disabled persons. Section 5. This resolution shall be effective on and after its passage."

Councilwoman Cape said that the purpose in bringing this to Council at this meeting is because time is of the essence in that the bill is in the House Energy Committee now and will be moving forward into the Budget Committee. She noted that a lot of the particulars have not been worked out yet, but it's saying that we recognize the need for encouraging more opportunities for energy efficiency and that the consideration of an independent administrator is a good idea.

Councilwoman Cape moved to adopt a resolution supporting NC SAVES ENERGY, House Bill 1050. This motion was seconded by Councilman Mumpower.

After a short discussion, Councilwoman Cape asked that her motion be withdrawn and that she be allowed to bring the resolution back up for Council consideration at the next meeting after Council has had an opportunity to study and receive more information on the requested action.

B. RESOLUTION NO. 09-123 – RESOLUTION URGING STATE LAWMAKERS TO REDUCE CUTS IN PUBLIC EDUCATION FUNDING IN THE 2009 BIENNIAL STATE BUDGET

Mayor Bellamy said that as a result of the teacher's meeting last night there has been a request for Council to urge state lawmakers to reduce cuts in public education funding. The Buncombe County School Board has passed a resolution asking the state to minimize their projected cuts in funding for their education programs for 2009-10 so as to reduce teacher job loss, preserve manageable class size, and to ensure the continued availability of quality public education in North Carolina.

In response to Councilman Mumpower, Mayor Bellamy said the urgency in bringing this to Council at this meeting is the pending vote for the State budget.

Mayor Bellamy then read the following resolution: "WHEREAS, the State of North Carolina is experiencing financial problems of historic proportions, resulting in reductions of funding for many government programs; and WHEREAS, in response to anticipated budget cuts, public school systems across the State are eliminating teacher staff positions and increasing class size; and WHEREAS, a quality public education program is important to the State's future, and essential to the well-being of its population; and WHEREAS, a well-educated work force will be a key component of sustained economic recovery, and will buffer the State from the effects of future economic downturns; and WHEREAS, competent elementary and high school teachers and assistants, together with manageable class sizes and sufficient resources, are the foundation of a quality public education program. NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF ASHEVILLE THAT: The Governor and the State legislature are hereby respectfully urged to minimize projected cuts in funding for public education programs in the 2009 biennial budget so as to reduce teacher job loss, preserve manageable class size, and ensure the continued availability of quality public education in North Carolina."

When Mayor Bellamy asked for public comment, she received none.

Councilman Mumpower moved to adopt Resolution No. 09-123, with the following amendment: "WHEREAS, our State leaders continue to spend limited resources on non-essential services that have a direct impact on the education budget." This motion was seconded by Councilman Russell.

Councilman Miller asked for a friendly amendment to read "WHEREAS, local school systems are being required to provide additional math and science instruction, but are not provided with funds to hire the necessary personnel."

Councilman Mumpower and Councilman Russell accepted the friendly amendment and said amended motion carried unanimously.

RESOLUTION BOOK NO. 32 – PAGE 93

III. PRESENTATIONS & REPORTS:

A. ECONOMIC STIMULUS PACKAGE UPDATE

RESOLUTION NO. 09-117 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE A MEMORANDUM OF UNDERSTANDING BETWEEN THE CITY OF ASHEVILLE AND BUNCOMBE COUNTY FOR THE 2009 BYRNE JUSTICE ASSISTANCE GRANT PROGRAM

American Recovery & Reinvestment Project Manager Brenda Mills updated Council on the following applications for the economic stimulus package.

Staff is seeking City Council approval of a resolution authorizing the City to apply for additional funding under the 2009 Byrne Justice Assistance Grant (JAG) and enter into a Memorandum of Understanding (MOU) with Buncombe County.

Edward Byrne Justice Assistance Grant (JAG) – Local Solicitation

The Asheville Police Department is applying for additional funding available for the JAG – Local Solicitation Award. This is a predetermined amount of funds based on Part 1 Uniform Crime Reporting. Asheville Police and Buncombe County Sheriff have been allocated $90,560 with Asheville receiving $64,516 and Buncombe receiving $26,044. As part of this additional allocation grant, APD must adopt another MOU with Buncombe County that authorizes APD to

administer the Grant and disperse the appropriate funds to the Buncombe County Sheriff's Department.

APD plans to purchase twelve (12) in-car cameras that are digital in nature and provide high quality and high resolution video/audio recording of events in and around the patrol car. Recordings such as this help protect the interests of citizens as well as the interests of police officers. Recordings captured with these cameras could potentially aid in mitigating civil liability for the City of Asheville by illustrating in detail the actual events that transpired. The secure storage device and wireless upload capabilities of the system create a user friendly video storage system that is extremely secure and versatile. These recordings would generally serve as evidence to be utilized in court for the prosecution of criminal cases. However, these recordings could also be used to aid in resolving allegations of wrongdoing by police officers. This would allow for an even greater level of protection of police officers and citizens.

These cameras are based on Asheville Police Department's contract through risk management, which is scheduled to come to the Council Finance Committee in June.

12 Digital Ally In-Car Camera systems ($5,350 each)	$64,200.00
Cost of Equipment Rep to provide installation and training for staff	316.00
Total:	**$64,516.00**

This action conforms to the City Council's Strategic Plan under ***Safe*** to make Asheville the safest city in America based on approved metrics for similarly sized cities and by strengthening the enforcement of existing laws and regulations as opposed to adding new ordinances.

This is a 100% non-matching grant that will enable the APD to purchase and install 12 Digital Ally In-Car Camera systems which includes the cost of equipment representative to provide installation and training for APD staff.

Pros:

- The Police Department obtains needed in-car video equipment to document traffic stops and other incidents for prosecution.
- More video/audio recorded evidence is available to review when critical incidents occur.
- The Police Department will receive 12 new in-car video units that will compatible with the propose wireless upload system.

Con:

- The City will have to bear the full cost of maintaining the equipment in future budgets after the warranties expire.

The City will have the cost of maintenance in future budgets at an annual cost of $2,400 for all 12 cameras following a one-year warranty.

City staff recommends City Council adopt the resolution authorizing the City Manager to apply for the 2009 Byrne Justice assistance grant for additional funding and to into a Memorandum of Understanding (MOU) with Buncombe County.

Councilman Mumpower felt we should fund our own police services, noting these are nice, but not necessary expenses. He noted that these are borrowed federal dollars that will have to be repaid by our children and grandchildren.

When Mayor Bellamy asked for public comments, none were received.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Vice-Mayor Davis moved for the adoption of Resolution No. 09-117. This motion was seconded by Councilman Newman and carried on a 6-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 32 – PAGE 81

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER THE ADOPTION OF THE 2008-09 ANNUAL OPERATING BUDGET

Mayor Bellamy opened the public hearing at 5:41 p.m.

Chief Financial Officer Ben Durant said that this is a public hearing to receive public input on the budget issues before the Annual Operating Budget is adopted. This public hearing was advertised on May 29 and June 5, 2009.

The Fiscal 2009/2010 Annual Operating Budget was presented to City Council on May 12, 2009. In accordance with the North Carolina Local Government Budget and Fiscal Control Act, a summary of the Budget along with a notice of the Public Hearing was published on May 29, 2009 and June 5, 2009. Adoption of the Budget Ordinance is scheduled for June 23, 2009, at the regularly scheduled City Council meeting.

The Fiscal Year 2009/2010 Annual Operating Budget is balanced with an Ad Valorem tax rate of $0.42 per $100 of assessed value. All essential City services are continued in the Proposed Budget.

A copy of the Budget is available for public inspection in the City Clerk's office. In accordance with the North Carolina Local Government Budget and Fiscal Control Act, the Budget may be changed by City Council in any way before adoption. It may also be changed by budget amendment after adoption with the only exception being the Ad Valorem Tax rate, which cannot be changed once adopted.

He recapped the budget by saying that (1) this has been a difficult budget yet with the sales tax decline and significant cost increases; (2) there is no property tax increase; (3) there are no service cuts; (4) there is no market or merit pay adjustments for employees; and (5) there is minimal capital funding.

Staff recommends City Council conduct the public hearing on the City of Asheville Fiscal Year 2009/2010 Annual Operating budget and include public input in considerations on the Budget.

Mayor Bellamy said that adoption of the 2008-09 annual operating budget is scheduled for June 23, 2009.

As there was no public comment, Mayor Bellamy closed the public hearing at 5:44 p.m.

Mayor Bellamy urged the public to contact the Finance Department with any questions they may have on the budget. In addition, the budget is on-line and several bound copies are available in the Finance Department.

In response to Councilwoman Cape, Mr. Durant said that when you look at the budget you have to put it in some type of context. You have to decide if you are dealing with short-term cyclical issues that you can rebound in a couple of years or are you looking at some structural imbalances, meaning that you have costs that are on an on-going basis significantly outpacing your revenue growth. In the later scenario there are policy decisions that Council has to make, e.g., do you want to raise taxes to deal with that structural gap, do you want to curtail certain services or do you want to do a combination of both. Once you frame your budget situation you then need to gear your strategies toward that scenario. He explained why he personally felt we have some structural imbalances that will grow out of this recession that we're not going to be able to recover from immediately. Consumers are not going to be as free spending their money because they are going to have to replenish some of the wealth that they lost in their homes, their 401-K's and investments. He personally didn't think the economy will bounce back as quickly as it does when you are dealing with a typical recession. He thinks there are some structural issues that will be here for awhile that we will have to deal with.

Mr. Durant responded to Councilman Mumpower regarding the Consumer Price Index.

Housing & Community Development Committee Recommendations on Outside Agency Grant requests

Community Development Director Jeff Staudinger said that the Housing and Community Development Committee (HCD) has reviewed the Outside Agency Grant applications for 2009.

The City has tentatively budgeted $161,000 for Outside Agency Grants, level-funded from last year. Two of the previously funded organizations (Asheville Green Works and Asheville-Buncombe Community Relations Council) were exempted from the competitive process, and their funding removed from the pool of available funds, leaving a total of $101,000 available for competitive distribution. Seventeen organizations submitted applications totaling $368,325.

In a change from prior year practice, this year's recommendations are being made by the Housing and Community Development Committee (HCD). A three-person staff team from Community Development, Finance, and Economic Development, initially reviewed the applications, scored them according to criteria approved by the HCD, and presented application summaries, scoring, and funding recommendations to the HCD.

At the HCD meeting of May 27, 2009, the committee acted upon the funding applications, and is recommending that the City fund thirteen organizations for a total grant amount of $95,700.

A table of applicant organizations and recommended funding per organization is below.

This proposed action complies with the City Council's Strategic Operating Plan in that it directly relates to the Council's Strategic Goals of: Affordable: These funding recommendations directly support organizations in Asheville that promote affordability for Asheville residents; Green: Two of the programs have an environmental education component; Safe: Six of the programs address issues of abuse and safety; and Sustainable: Three of the programs include resources to prepare workers and businesses for future employment.

Pros:

- Approval of Outside Agency Grants provides operating and project support to Asheville-based organizations that improve the quality of life for Asheville residents.
- Reflects the carefully considered recommendations of the City's Housing & Community Development Committee.

Con:

- It is not possible to fund all the applications received, and most of those funded will receive less than the amount requested.

Outside Agency Grants are funded from the City's general fund. The amount available is projected to be the same as last year.

The HCD recommends approval of the Outside Agency Grants as presented below:

Outside Agency	Summary Statement	2008-09 Amount Awarded	2009-10 Amount Requested	HCD Rec.
Asheville Area Arts Council	General operating support, targeted to three elements: expand website ($50,000); increasing support of area artists ($5,000); arts in education ($5,000) and general administration ($15,000)	$ 12,500	$ 75,000	$ -
Asheville Art Museum	Expansion planning: complete design development phase	5,000	50,000	$ 5,000
The Arc of Buncombe County	General operating support		15,000	$ -
Center for Diversity Education	Fee to show four traveling exhibits in mutually decided locations		1,200	$ 1,200
Child Abuse Prevention Services, Inc.	General operating support targeted to parenting education and outreach ($6,000) and crisis intervention counseling for non-offending parent support groups	-	10,000	$ 6,000
Children First /Communities in Schools	Project MARCH: after-school safe-haven program at three housing complexes in the City	22,500	40,000	$ 22,500
Design Center	Coordinating community and design professional work on public infrastructure projects		15,000	$ 5,000
Downtown Association	Hire executive director to support economic development and cultural development in downtown		50,000	$ -
Hall Fletcher PTO	Build playground and outdoor classroom in West Asheville		20,000	$ 5,000
Homeward Bound of Asheville-AHOPE	A HOPE Day Center outreach, intake and support for homeless persons. Operates mornings seven days a week, and afternoons Monday through Friday	20,000	25,000	$ 20,000
Kids Voting Buncombe County	Recruits and trains high school students to be advocates for voting	1,000	2,000	$ 1,000
Math mentorship (UNCA)	UNCA students act as mentors to prepare at-risk middle school students for algebra		20,125	$ -

Meet the Geeks	Provides classes, membership networking, job referrals to grow the IT sector of the local economy	3,000	10,000	$ 3,000
One Youth at a Time	Provides mentoring, job training and placement assistance to at-risk students	7,000	10,000	$ 7,000
United Way 2-1-1 and Hands On	Comprehensive community information and referral provider (2-1-1). Volunteer coordination for wide variety of community services (Hands-On)	5,000	10,000	$ 5,000
YWCA of Asheville and WNC	Support Our Students (SOS) is an afterschool and day-long summer camp for at-risk students; with screening and intervention services for students involved with gangs	10,000	10,000	$ 10,000
Housing Authority-Youthful HAND	After-school program for children residing at Lee Walker Heights housing development will purchase lap-top computers for the students' use	5,000	5,000	$ 5,000
Total		$ 91,000	$ 368,325	95,700

When Mayor Bellamy asked for any comments from the public, she received none.

Councilman Miller moved to direct staff to include the outside agency grant requests recommended by the HCD Committee in the budget. This motion was seconded by Councilman Newman.

Councilman Mumpower felt we are essentially supporting non-profit agencies who already receive the benefit of not having to pay taxes with another forced subsidy from taxpayers. He felt the reason we have non-profits is because those of us who care about the community and want to contribute can do so, and deduct those contributions.

Councilman Newman commented that the process used this year worked well. He noted that most allocations are very small amounts that in essence to a lot of different groups being able to list the City as an official partner on their projects is very important to them.

Vice-Mayor Davis did not want to second-guess the HCD Committee's recommendations, stating that he felt sure that the HCD Committee reviewed the projects thoroughly, but he did question some of the allocations, in particular the non-funding of the math mentorship at UNC-Asheville.

Mayor Bellamy explained this was a key time to invest in helping our students be successful in math and the math mentorship at UNC-Asheville would be a good place for the City to contribute to a real need. She asked for Council's support to help with this initiative and questioned the "low" staff rating the program received.

In response to Mayor Bellamy, Mr. Staudinger explained the 100 point rating system, which was an attempt to bring fairness in comparing applications to each other. Qualifications included whether the program directly supported the Council's strategic operating plan, whether it directly supported the goals of the City, how the organization would leverage the money, how responsible were the organizations handling of their own finances and their accountability for that,

etc. In terms of the Math mentorship program, the major issue was that the City was asked to pay for 100% of the cost of the project, which would have required 20% of the available funds to one applicant. In addition, the application did not clearly identify the direct relationship to Council's goals. As every application was worthy, in comparison with the other applications, it was difficulty to give them a high rating. He also explained that the goal for next year is to increase the transparency of this process and to bring early on in the process what the rating criteria would be so everyone will have a clear understanding of the process.

Councilman Mumpower did not argue against the programs, but argued against the forced taxpayer dollars and where we are spending them. He felt we are taking dollars that could be invested in things that no one else can do (e.g., paving streets, hiring additional police officers) and allocating those dollars to programs that others can do.

Mayor Bellamy noted that every budget our Police Chief has put forward has been approved. There have been good efforts arising from the Public Safety Committee including illuminating people who have been caught and we are also working with the Housing Authority to address problems at the public housing developments. She explained that there is a direct correlation between individuals who are not successful in school and the penal system. It has been repeatedly proven that those individuals who are not prepared for school are more likely to drop out and when they drop out, they are more likely to be found in our court system. If we are not investing in some of these programs, we will be investing in the police department. She noted there is more participation from the residents in the South French Broad area and as a result you see less crime happening in those neighborhoods. She didn't want to diminish in any way the work that has been done.

The motion made by Councilman Miller and seconded by Councilman Newman carried on a 4-3 vote, with Vice-Mayor Davis, Councilman Mumpower and Councilman Russell voting "no."

Mayor Bellamy supported the recommendations but noted that she would prepare a resolution to be placed on the next Council agenda asking for monetary support for the UNC-Asheville Math Mentoring Program because she felt it was something our community should support to help address the math concerns at the middle school.

Closed Session

At 7:01 p.m., Councilman Miller moved to go into closed session for the following reason: (1) To consider the qualifications, competence, performance, character, fitness, conditions of appointment of an individual public officer or employee. The statutory authorization is contained in G.S. 143-318.11(a)(6); and to prevent the disclosure of information that is confidential pursuant to G.S. 160A-168, the Personnel Privacy Act. The statutory authorization is contained in G.S. 143-318.11(a)(1). This motion was seconded by Councilman Russell and carried unanimously.

At 7:16 p.m., Councilman Miller moved to come out of closed session. This motion was seconded by Councilwoman Cape and carried unanimously.

B. PUBLIC HEARING TO CONSIDER AMENDMENTS TO THE MASTER DEVELOPMENT PLAN FOR MONTFORD COMMONS URBAN VILLAGE IN ORDER TO CHANGE THE DEVELOPMENT INTENSITY

ORDINANCE NO. 3736 - ORDINANCE AMENDING THE MASTER DEVELOPMENT PLAN FOR MONTFORD COMMONS URBAN VILLAGE

Mayor Bellamy opened the public hearing at 7:19 p.m.

Urban Planner Jessica Bernstein said that this is the consideration of an ordinance to amend the master development plan for Montford Commons Urban Village in order to change the development intensity. This public hearing was advertised on May 29 and June 5, 2009.

The project area consists of 51 separate parcels with a combined area of approximately 11.3 acres (including unopened rights-of-way). The site, which is bounded by Hill Street to the south, Gudger Street to the east, the Montford Local Historic District to the north and Isaac Dickson School to the west, was rezoned to Urban Village by City Council on September 25, 2007. Adjacent zoning districts include RS-8, RM-8 and Office.

The rezoning to Urban Village is accompanied by a corresponding conceptual master development plan that indicates a general street network, mix of uses, development intensity, open space, pedestrian amenities and proposed parking configurations. This conceptual plan was also approved by Council on September 25, 2007.

Changes to the Master Plan

Section 7-8-23 of the Unified Development Ordinance (UDO) states that Council shall review any revisions to a master plan that ***increases the overall development intensity*** or ***changes the proposed mix of uses by increasing or reducing any use category by 25%*** or more, along with a number of other criteria. The developer has revised this project in the following ways, thereby requiring review by Council:

Mix of Uses:	Residential increased 38.6% Commercial decreased 26.7% Office newly designated
Overall Development Intensity:	Greater residential and office intensity; less commercial intensity

Other Changes (notable revisions, but do not trigger review by City Council):

- The site shall be traversed by a network of internal streets – which should seek to avoid dead-ends roads and other features that hamper connectivity. Roads may terminate at a green space – in such cases, a sidewalk or other connection must be provided to ensure the goals of connectivity.
  - Due to the placement of the Phase 1 building, the road layout has changed. A pedestrian pathway circles the Phase 1 structure, connecting an emergency access to the east and a turn-around for utility vehicles to the west.

- Phase 1 – Previous plan proposed 8 buildings, 5 of which were small, a mix of multi-family
  Options. Current plan proposes a single large multi-family apartment building
  Phase 2 – Previous plan proposed 1 building. Current plan shows 1 building but in a slightly different location
  Phase 3 - Largely unchanged

The following chart provides a breakdown of the overall development as previously approved by Council compared to the proposed revisions:

2007	2009
PHASE I • Approximately 5.67 acres • 145 residential units • +/- 25 units/acre	**PHASE I** • **Approximately 6.5 acres** • **280 residential units** • **+/- 43 units/acre**

• 48,000 square feet commercial
• 1-4 stories
  o 1A – commercial, 52 apartments
  o 1B – (2) senior living 81 units
  o 1C – (3) SF
  o 1D – (3) attached SF 9 units
• Parking in 2 garages (1 under, 1 above) and on-street
• Open space 0.28 acres
	• **20,000 square feet commercial**
	• 4 stories
	  o **1 building – commercial & residential (280 units)**
	• **Parking in 1 garage and on-street**
	• **Open space 0.33 acres**

PHASE II
• Approximately 1.5 acres
• 50 residential units
• +/- 33 units/acre
• 10,000 square feet commercial
• 4 stories
  o 2A – commercial, 50 apartments
• Parking lot and on-street
• No open space
	PHASE II
	• **Approximately 0.9 acres**
	• **0 residential units**
	• **0 units/acre**
	• **22,500 square feet commercial**
	• **67,500 square feet office**
	• 4 stories
	  o Commercial & office
	• Parking - surface lot
	• **Open space 0.05 acres**

PHASE III
• Approximately 4 acres
• 25 residential units
• +/- 6 units/acre
• No commercial
• 1-3 stories
  o 3C – 18 apartment units
  o 3D – (7) SF
• Private parking and on-street
• Open space 2.07 acres
	PHASE III
	• Approximately 4 acres
	• 25 residential units
	• +/- 6 units/acre
	• No commercial
	• 1-3 stories
	  o 3C – 18 apartment units
	  o 3D – (7) SF
	• Private parking and on-street
	• Open space 2.07 acres

OVERALL • 220 residential units • 19.4 units/acre • 58,000 commercial • 0 office identified • 4 story maximum • 2.35 acres open space	**OVERALL** • 305 residential units **(85 additional units – increase 38.6%)** • 26.9 units/acre **(Residential density increased 7.5%)** • 42,500 commercial **(15,500 SF less - decrease 26.7%)** • 67,500 office **(none previously)** • 4 story maximum • **2.45 acres open space**

Similar to the previously approved layout, this project is still divided into three phases. Where the proposal differs is that the residential density has increased overall, as has the amount of office space. Commercial space has decreased. The development phases still structure the proposed intensity of uses in a way that seeks to integrate with the surrounding neighborhood and existing uses. The office and commercial node and areas of highest density and building height remain along Hill Street in Phases 1 & 2, where there is an existing commercial/office/business presence. Development intensity tapers off into single-family homes towards the historic Montford neighborhood. *Where there were previously single-family or duplex*

uses proposed along the portion of the site that borders the Isaac Dickson School, there is now a single, multi-family apartment building. The lower density residential node incorporates large areas of public open space to create a more natural neighborhood feel and to buffer them from the higher-density multi-family and commercial development. The large apartment building in Phase 1 is buffered from the property adjacent to the west. Ample street trees and on-street parking throughout the project further seek to mirror a relationship with the adjacent neighborhood.

Buildings are proposed to be between one and four stories, with the two four-story structures sited towards Hill Street. In the previous plan, building heights, massing and project densities receded as the development moved away from Hill Street. In the current plan, *the area of greatest intensity is now more site-centered*. The revised layout complies with the Urban Village standard, although the design is not as visually complementary to the adjacent existing development as the original plan.

As mentioned earlier, the urban village district requires that the site shall be traversed by a network of internal streets – which should seek to avoid dead-ends roads and other features that hamper connectivity. Roads may terminate at a green space – in such cases, a sidewalk or other connection must be provided to ensure the goals of connectivity. The road network has changed notably from the previous plan, *resulting in less vehicular connectivity*, although pedestrian access has not been impeded as a clearly designated pathway is provided around the Phase 1 structure.

Required Reviews

At their May 4, 2009, meeting, the Technical Review Committee (TRC) approved this project with the conditions listed in their staff report. A number of Asheville residents were present to seek more information and to voice concern regarding stormwater and erosion control issues and property value impacts. Communication has been received from an adjacent property owner, expressing concerns regarding traffic and a strong desire to see the construction entrance moved from Jason Street due to the impact on residences and business along this roadway, not included in the Urban Village. The City's Transportation & Engineering Department included a condition to the TRC that Jason Street should not be used as the construction entrance.

The applicant attended a meeting of the Montford Neighborhood Association on May 19, 2009, and answered questions and concerns from the residents regarding increased traffic, pedestrian connectivity to downtown and loss of existing vegetation. The applicant also discussed including an area within the project site to connect into the City's greenways master plan trail system.

Summary

The amendments to the previously approved conceptual master development plan indicate a greater residential density, more office space, slightly less commercial space, larger (but not taller) structures and a diminished roadway network. These changes comply with the standards and requirements of the Urban Village district and although the resulting plan is not as complementary to the existing surroundings as the previous layout, it does not jeopardize the success of the proposed development.

Pros:

- Provides more residential units.
- Supports good pedestrian access and links to the City Greenway system.

Cons:

- Previous plan focused area of highest intensity along Hill Street whereas the current proposal shows the greatest intensity in the center of the site.

- Phase 1 of the previous plan showed a greater number of buildings, but smaller in scale whereas the current proposal has just one large structure.

The proposed revisions to this project comply with the requirements of the Urban Village district and staff still supports the project. The previous plan configuration and layout more directly fit the vision for the Urban Village district, but current market conditions appear to have made that layout less viable.

Mr. Vince Smarjesse, representing Frontier Syndicate, LLC, explained the reason for the requested amendment is the change in economy. They have re-designed the plan and feel this is a better than ideal project. All units are rental and vary in size from 540 square to 1700 square feet, ranging in price from $1.10 to $1.27 per square foot, which puts them in the range of workforce housing.

Mayor Bellamy closed the public hearing at 7:25 p.m.

Vice-Mayor Davis hoped the project would be successful and that the finished product would look like the conceptual plan, as that is not always the case.

Mayor Bellamy was pleased that we will be able to use visualization tools which will help Council and the community know what the finished product would look like. She suggested the City Council Planning & Economic Development Committee review at that tool.

In response Mayor Bellamy about alleviating traffic from using Hill Street, Mr. Smarjesse said that a hypothetical design was a new street from Montford Avenue to Gudger Street and that is actually on the Chamber of Commerce's property using their curb-cut off Montford Avenue. They have provided the Chamber with a traffic study and a civil design plan, and they are in the process of providing them with more requested information on traffic, specifically as it pertains to the high tourist season. That connection is still on the table and they are open to discussions with the Chamber for that use.

In response to Mayor Bellamy about the narrow sidewalks on Hill Street, Assistant Director of Transportation & Engineering Ken Putnam said that the sidewalks will be increased to 7 feet.

In response to Mayor Bellamy about the process for the greenway, Mr. Smarjesse said that he is working with City staff on implementing the greenway connection. Ms. Bernstein noted that staff has added the following condition in the amendment that "the site is in the Greenway Master Plan overly and a location for the greenway has been identified by City Staff. The applicant has agreed to work with staff on implementing the greenway connection (most likely will be integrated into Phase 3)."

Mr. Putnam responded to Councilman Newman's concern that if the connection through the Chamber's property does not happen, what other kind of improvements could be made to the Hill Street connector, e.g., traffic signals.

In response to Councilwoman Cape, Mr. Smarjesse said that the 507 parking deck is being built for all phases of the project, including the commercial component in Phase II.

In response to Councilman Mumpower, Mr. Putnam said that they will build a full bus shelter that is Americans with Disabilities Act compliant, to compliment the two Top A Stops in the area.

Councilman Mumpower felt the City was penalizing the developer by asking for upgrades to the street system when the traffic is not originating from the neighborhood or immediate area.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 3736 amending the master development plan for Montford Commons Urban Village showing changes to the mix of uses and overall development intensity, adopting the proposed master development plan for the Urban Village subject to the standard conditions and the additional conditions recommended by staff: (1) The project must comply with all conditions outlined in the TRC staff report; (2) All site lighting must comply with the City's Lighting Ordinance; (3) All existing vegetation that is to be preserved must be clearly indicated and dimensioned on the site, landscape and grading plans; (4) The building design, construction materials and orientation on site must comply with the conceptual site plan and building elevations presented with this application. Any deviation from these plans may result in reconsideration of the project by the reviewing boards; (5) This project will undergo final review by the TRC prior to issuance of any required permits; and (6) The site is in the Greenway Master Plan overlay and a location for the greenway has been identified by City staff. The applicant has agreed to work with staff on implementing the greenway connection (most likely will be integrated into Phase 3). This motion was seconded by Councilman Newman and carried unanimously.

ORDINANCE BOOK NO. 25 – PAGE 291

C. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE BILTMORE PARK TOWN CENTER SIGN PACKAGE

ORDINANCE NO. 3737 - ORDINANCE AMENDING THE BILTMORE PARK TOWN CENTER SIGN PACKAGE

Mayor Bellamy opened the public hearing at 7:51 p.m.

Assistant Planning & Development Director Shannon Tuch said that this is the consideration of an ordinance amending the Biltmore Park Town Center sign package. This public hearing was advertised on May 29 and June 5, 2009.

In July 2007, City Council approved a signage plan for the Biltmore Park Town Square (BPTS) urban village project. Comprehensive signage plans are allowed by ordinance and enable larger development sites to develop a custom plan for signage that addresses unique needs and contexts in a comprehensive and harmonious manner. The BPTS plan was the City's first and most comprehensive; however, as individual buildings begin to open for business and more and more units and commercial/office space comes available, the signage needs are becoming better understood and insufficiencies in the approved plan are being identified. The developer is now requesting some new signs that had not been contemplated as part of the original proposal.

For efficiency, only the amendments are detailed below.

Temporary Sign

Description: The applicant is requesting a temporary banner-style sign to be placed on the back side of the movie theater for a period of four months with a one-time renewal option of an additional four months. The sign is proposed to be 625 square feet to maximize visibility from I-40 and would contain a simple text message of "Apartments, Condos, Retail shops, Office Space" with simple high contrast colors. For context, the average billboard is typically 300 square feet.

Considerations: Council recently adopted a new standard to allow temporary style banners for new multi-family structures coming onto the market. The adopted standards restrict the

period of display to four months (no renewal) and to 10% of the building face up to a maximum of 400 square feet. Standards from other municipalities appear to limit the size of the sign to a percentage of the wall face between 10-20%. This sign appears to cover approximately 25-30% of the wall face.

Monument Sign

Description: Two 60 square foot stone monument signs were originally located at the entrance to the park. A recent road widening project removed one of the two signs and the remaining sign is designed primarily as a basic monument sign. With a number of national retailers locating to the development, the owner would like to replace this with a larger 188 square foot free-standing monument sign with individual panels used to advertise the large, national retailers.

Considerations: The site is very large (42 acres) and the entrance is located approximately 1000 feet from the primary intersection with Long Shoals Road. Consequently the monument signs are located off-site at the intersection of Schenck Parkway with Long Shoals Road. While current sign code standards do not allow off-premise signs, these particular signs had been grandfathered and could be maintained for a period of five years. The Highway Business zoning district does, however, allow free-standing multi-tenant signs with a maximum of 200 square feet of sign face. Thus, the proposed sign would be consistent with a free-standing multi-tenant sign in the HB district.

Project Identity Sign

Description: The developer is requesting a separate project identity sign to be attached to the side of the parking structure. The requested sign is designed to be more visible from the interstate at a size of 510 square feet than the originally approved sign.

Considerations: The original request had included a rooftop sign at 700 square feet. That request was amended to 350 square feet to be lowered from the roof and placed on the side of the structure. Prior to the installation of this permanent sign, staff has approved the installation of a 350 square foot temporary sign which has served as a reasonable study in determining the effectiveness of the sign's readability from the interstate (exit 37). Redesigning the existing sign could improve the readability (using darker letters and illumination), but it is clear that the 350 square feet limits the size of the letters. To increase the size of the letters would necessitate increasing the sign allowance.

The proposed sign would not be illuminated in the day but is proposed to be internally illuminated at night (LED lighting).

The developer is also proposing to remove two monument signs (75 square feet each) that had been previously approved as part of the original plan.

Staff feels that the unique context and nature of this large urban project warrants special consideration and there are no significant concerns for either the temporary or monument signage requested changes.

Increasing the size of the project identity sign also seems warranted; although it is unclear how much of an increase is necessary to afford relief. The submitted renderings appear awkward and out of proportion to the structure on which they are mounted. It is also difficult to determine from the renderings submitted how the design may (or may not) blend with the parking structure. Staff has requested additional photo examples along with other considerations from the applicant and will be prepared to discuss this request at the time of the hearing.

Regarding the City Council Strategic Operating Plan, this proposal most closely supports the goal of sustainability through improved identity and advertisement supporting the economic viability of the overall project.

Pros:

- Addresses a specific need and context
- Provides enhanced entrance identification and wayfinding from interstate
- (Generally) consistent and harmonious with other signage already approved

Cons:

- Size of temporary sign may create a feeling of disparate regulation and may elicit similar requests from other smaller developments
- Size of permanent identity sign appears out of scale with structures (covers openings in deck)
- Monument signs would remain off-premise (although still on property owned by the developer)

There will be no direct fiscal impact to the City. It could be argued that improved signage will contribute to the sale and leasing of available space along with improved identity, providing a positive fiscal impact through new property and sales tax.

Staff recommends approval of the signage plan amendments. Should Council members express concern over individual signs, staff recommends voting on the requests separately, as follows: (1) Temporary Sign at 625 s.f. to be located on the side of the movie theater for a period of 4-8 months; (2) Multi-tenant Monument Sign at 188 s.f. to be located at the entrance off of Long Shoals Road; and (3) Project Identity Sign at 510 s.f. to be located on the side of the parking structure.

Mr. Chris Squier of Crosland, representing the developer, said that the BPTS Master Sign Program was passed by City Council in August of 2007 and this is the first request for amendment (1) temporary sign to create awareness; (2) modification of entrance monument sign; and (3) modification of project identity sign. He explained the temporary sign (4 to 8 month) would (1) be 625 square feet; (2) based on context, not "minimum square feet" or "% of façade"; (3) be entirely on their own property; (4) adjacent property is the N.C. Dept. of Transportation right-of-way; and (4) from an economic standpoint they need people to know what they are. The entrance monument sign (1) of the existing two 60 square feet signs at the entrance (120 square feet total), they would replace with one 158 square foot sign; (2) Long Shoals Road and their tenants have changed; and (3) allows for better visibility and quicker decisions for drivers. Regarding the project identity sign, the buildings shield view of new sign for all but intended viewers. The current approved 350 square feet is just too small. A compromise solution would be (1) lowered off a parapet down to side of deck; and (b) reduced from requested 700 square feet down to 350 square feet. They are requesting (1) a modern adaption of the historic identity sign; (2) still below rooftops; not visible from Biltmore Park homes; (3) modified to be more readable; and (4) more energy efficient using LED lighting. The specifications would be (1) Navy Blue lettering, non-illuminated during day; (2) square footage = 510 square feet; (3) modify deck by using perforated metal backer; (4) at night, internally illuminated using LED lighting; and (5) energy use is approximately 24% of standard lighting. Physical and economic hardships include (1) current approved size (350 square feet) not visible; and (2) new size of 510 square feet more feasible. In exchange, they will not build currently approved (1) two 75 square feet monument signs near Biltmore Park homes; and (2) one 350 square feet identity sign (combined 500 square feet). This will promote city goals of wayfinding and business identification without negatively affecting surrounding homes.

Ms. Cathy McCartan, President of the Biltmore Park Association, could not support the large Biltmore Park identity sign for the side of the parking deck for the following reasons (1) the original sign "Biltmore Park Town Square" correctly identified the commercial/retail/residential center being advertised and they request the "Town Square" reference remain on any sign; (2) the proposed Biltmore Park identify sign is unattractive and does not convey that Town Square is an upscale, desirable destination; (3) the proposed sign is too large and the opaque backing adds

to the mass making the sign completely dominate the space in an unappealing way; and (4) the maximum letter height should equal the height of the concrete deck wall and not extend above or below – the width of each word needs to be proportionally increased to accommodate the letter height and they would prefer a frame support rather than the proposed opaque backing. Basically, the Biltmore Park Association supports a larger illuminated version of the originally approved sign.

Mayor Bellamy closed the public hearing at 8:15 p.m.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the ordinance and it would not read.

Councilwoman Cape moved to approve the (1) Temporary Sign at 625 s.f. to be located on the side of the movie theater for a period of 4-8 months; (2) Multi-tenant Monument Sign at 188 s.f. to be located at the entrance off of Long Shoals Road; and (3) Project Identity Sign at 510 s.f. to be located on the side of the parking structure. This motion was seconded by Councilman Mumpower.

Regarding the project identity sign, there was some discussion, initiated by Councilwoman Cape, about allowing the developer construct the parapet sign that they originally requested back in July of 2007. Mr. Squier said that they would have to go through their own internal process, but structurally they lost the opportunity to build that because the parking deck was structurally built on what was approved by Council. To construct a parapet sign now would not be feasible.

Discussion surrounded amending the project identity sign to include "Town Center", noting that the developer would need a sign 650 square feet. Options at this meeting could be that Council approve the temporary sign and monument sign amendments and (1) approve a 650 square foot project identity sign and ask the developer to develop a revised sign with the words "Town Center" and bring the revised sign back to Council at their next meeting; or (2) approve the project identity sign at 650 square feet and give the developer the flexibility to develop an attractive revised sign with the words "Town Center" in keeping with the theme of the project.

Councilwoman Cape moved to amend her motion to (1) approve the Temporary Sign at 625 s.f. to be located on the side of the movie theater for a period of 4-8 months; (2) approve the Multi-tenant Monument Sign at 188 s.f. to be located at the entrance off of Long Shoals Road; and (3) instruct the developer to work with City staff and the Biltmore Park Association on a revised Project Identity Sign at 650 s.f. to include the words "Town Center" to be located on the side of the parking structure, said sign not being contingent upon the Biltmore Park Associations' approval. This motion was seconded by Councilman Mumpower and carried on a 6-1 vote, with Mayor Bellamy voting "no."

Mayor Bellamy noted that she supported the temporary sign and the multi-tenant monument sign, but not the project identity sign.

ORDINANCE BOOK NO. 25 – PAGE 294

D. PUBLIC HEARING TO CONSIDER AMENDMENTS TO THE UNIFIED DEVELOPMENT ORDINANCE TO RESPOND TO THE CURRENT ECONOMIC CLIMATE

ORDINANCE NO. 3738 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO RESPOND TO THE CURRENT ECONOMIC CLIMATE (ARTICLE 5: SITE PLAN REVIEW: CUMULATIVE DEVELOPMENT THRESHOLD)

ORDINANCE NO. 3739 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO RESPOND TO THE CURRENT ECONOMIC CLIMATE (ARTICLE 11: ACCESS REQUIREMENTS FOR FLAG LOTS)

ORDINANCE NO. 3740 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO RESPOND TO THE CURRENT ECONOMIC CLIMATE (STREET TREES)

ORDINANCE NO. 3741 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO RESPOND TO THE CURRENT ECONOMIC CLIMATE (LANDSCAPING ALTERNATIVE COMPLIANCE)

ORDINANCE NO. 3742 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO RESPOND TO THE CURRENT ECONOMIC CLIMATE (ATTACHED SIGNAGE FOR TENANTS IN PED-ORIENTED AREAS)

ORDINANCE NO. 3743 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO RESPOND TO THE CURRENT ECONOMIC CLIMATE (INTERIM PARKING AND CONSTRUCTION STAGING USES)

ORDINANCE NO. 3744 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO RESPOND TO THE CURRENT ECONOMIC CLIMATE (ACCESSORY STRUCTURES ON NON-CONFORMING LOTS OR LOTS WITH NON-CONFORMING STRUCTURES)

Mayor Bellamy opened the public hearing at 8:41 p.m.

Urban Planner Jessica Bernstein said that this is the consideration of seven amendments to the Unified Development Ordinance (UDO) for the purposes of responding to the current economic climate to assist businesses and development proposals to open and operate more easily, while still meeting the technical UDO standards along with City adopted goals. This public hearing was advertised on May 29 and June 5, 2009.

This series of economic relief amendments is proposed to relax certain non-life safety standards that affect businesses and smaller economic endeavors while still addressing public welfare and supporting city adopted goals.

The first phase of the economic relief amendments was brought before City Council on March 10, 2009. At the time City Council supported the amendment as a starting point and directed staff to continue to review applicable ordinances for additional opportunities to provide relief and encourage economic opportunities for large and small scale commercial endeavors.

The current list is derived from a review of the UDO and requests from the development/ business community for relief from specific standards that have affected business or development opportunities. While offering relief is currently an important consideration, careful attention has also been paid to the impacts or consequences of relaxing standards that have been long held. The benefits and impacts are identified for each item.

Staff is proposing seven (7) separate code changes that will assist enterprises facing difficulties and offer additional opportunities for small business ventures. The seven changes are grouped together for purposes of this report although they are distinct in their directives and will therefore be described separately below. Each item will require a separate vote.

The proposed wording amendments are focused in four areas of the UDO:

- Threshold requirements that affect cumulative development (Article V)
- Design and development standards (Article XI)
- Sign regulations (Article XIII)
- Uses by right subject to special requirements (Article XVI)

The changes included in this report are the second set of changes as requested by Council. Staff continues to meet with neighborhood representatives, property owners, members of the business community and other stakeholders to consider these and other additional changes.

1. **Issue: Modify the distance criteria that require that projects be cumulatively combined for purposes of plan review submittal processes.**

   Current: Development proposals that are within 1500 feet of each other and are permitted within three (3) years and are under the same ownership, are required to be combined and considered as a single development for the purposes of determining development review thresholds and criteria. This has required that somewhat separate and independent projects be combined and reviewed together in a fashion similar to multi-phased projects. This often results in a higher standard of review and, in some instances, can evolve into a Level III Conditional Use Permit application.

   Proposal: The change would be to reduce the distance of projects from 1500 feet down to 500 feet and maintain the three (3) year time frame of the permit approval time period overlap.

   Relevant Code Sections: 7-5-9(a)(1)b., 7-5-9(b)(1)b. and 7-5-9(c)(1)g.

   Pros:
   - Potentially reduces the permit review time for project applications
   - Reduces the disincentive for successful developers (owners) to initiate new investment in proximity to earlier projects
   - Maintains sufficient technical review of development proposals
   - May reduce the number of conditional use permits (CUP)

   Cons:
   - May remove some incremental developments from coming before the public hearing process (limits public input)
   - Reduces the ability to mitigate the impacts of incremental development(s) by holding them to a higher standard

2. **Issue: Reduce the width of the access way at the street (flagpole) from 25 feet to 20 feet for flag lots in order to match the requirement for alternative access subdivisions.**

   Current: Flag lots are required to provide a 25 foot wide access way where the lot connects to the public street (the rest of the lot must meet the lot size standard by district for the buildable portion of the lot). Alternative access subdivisions are special subdivisions requiring the establishment of a lesser 20 foot right-of-way (ROW) with a 16 foot wide paved private driveway to serve up to four lots.

   Proposal: Having identified no apparent problems with the narrower ROW areas for the alternative access subdivisions, and as a matter of consistency, it was recommended that the flagpole portion of the lot be reduced to 20 feet wide to match.

Relevant Code Sections: 7-11-2(j)(1)c.2.

Pros:

- May allow more lots to be subdivided
- Provides consistency between access methods for different types of subdivisions
- Benefits the smaller scale developers and the individual property owner
- The maximum length of the flag pole section remains unchanged

Cons:

- The narrower access way limits the ability to adjust the driveway profile in steeper grade situations - reduces design flexibility in general

3. **Issue: Offer more options for providing street trees in urban, pedestrian-oriented development areas to respond to developer preference and site conditions.**

Current: The landscape section for street trees (Article XI) prescribes a single option for urban street trees that specifies a structural soil vault under a sidewalk at a rate of 200 square feet per tree. After implementation of several proposals in recent years, it is clear that additional options in satisfying the street tree requirement in response to specific site conditions would be beneficial.

Proposal: Amend the section to reduce the dimensions of the root zone area in structural soil plantings from 200 square feet to 300 cubic feet (for example, 10'X10'X3'). A second change would be to allow the option of providing amended soil or structural soil in the tree planting area. Finally, this proposal provides additional tree planting space options:

1) A reinforced suspended sidewalk system around a tree grate;
2) A continuous planting area between trees that is a minimum of 4-feet wide;
3) A system of tree grates or pervious paving that allows water infiltration and oxygen exchange for tree root systems;
4) An on-street bulb-out which has been reviewed and approved by the traffic engineer for traffic safety.

Relevant Code Sections: 7-11-3(d)(3)e.

Pros:

- Reducing the root zone dimensions better accommodates typical downtown sidewalks
- Additional options for street trees provides flexibility to respond to site conditions such as underground utilities and narrower streets and sidewalks
- Tree bulb-outs can provide protection for on-street parking spaces and may be a cost savings
- Using a cubic foot standard instead of square feet is more appropriate to address the growth requirements for trees that include de-compaction of soil to the depth of the root run

Cons:

- Structural soil plantings have provided mixed results for street trees
- Field verification of cubic volume may be difficult

4. **Issue: The Tree Commission needs expanded authority to approve alternative compliance requests in situations where existing buildings and utilities are the cause of the constraint and the reason for the non-compliance.**

Current Procedure: The landscape code allows the Tree Commission to consider alternative compliance requests from the standards of the landscape ordinance with specific stipulations. In addition to the stipulations, the Tree Commission is not permitted to approve an alternative that reduces a standard by more than 50%. This provides a particular hardship for existing buildings that are required, through expansion or renovation, to bring an entire site into compliance with the ordinance.

Proposal: Allow the Tree Commission to consider requests for a greater than 50% reduction in required landscaping in situations with existing buildings when the existing utilities or buildings are the reason for the non-compliance. For these specific situations, the Tree Commission will consider on-site alternatives to the landscape standard to mitigate the loss of the required landscaping in addition to the existing seven (7) alternative compliance standards.

Relevant Code Sections: 7-11-3(e)(5)

Pros:

- Allows greater alternatives for sites that have limited options
- Provides some incentive for renovation and improvement of existing sites
- Supports the goal of adaptive reuse of structures that may be non-conforming
- Allows the Tree Commission greater flexibility to work with developers (owners) to provide an appropriate and effective alternative to the landscape standards

Cons:

- Some sites have minimal / low value structures that are better replaced
- Neighboring properties may not receive the benefits of landscape improvement

5. **Issue: Provide a new option to allow up to two signs for tenants in multi-tenant developments where the projects or developments meet standards for pedestrian oriented design with minimal building setbacks from the right of way area. For these more urban forms of development the sign allowance could be split between two different types of attached signs (window sign and a wall sign; or projecting sign and a window sign) that would better inform an individual approaching the business from multiple directions.**

Current Procedure: Businesses in multi-tenant buildings may place a single sign at the side of the building with the primary entrance based on the allowances provided in the ordinance.

Proposal: Allow up to two attached signs split between an attached sign and a window sign or other combination that in total would not exceed the square footage allowance. This would be limited to buildings that meet the standards for pedestrian oriented design that are placed a minimal distance from the right of way line (or such setbacks to create pedestrian oriented amenities).

Relevant Code Sections: 7-13-4(c)b.2.b.

Pros:

- Provides a new option for better meeting the identification needs of pedestrian oriented developments
- Encourages the types of signage that enhances the pedestrian experience of the district
- Does not result in additional sign area allowances

Cons:

- Increases the number of signs
- Opens the door to additional requests to increase allowances

6. **Issue: As denser urban areas are redeveloped, there are often few viable options for providing for interim needs related to construction such as staging of materials and equipment, parking for construction staff and queuing areas for delivery vehicles etc. as well as displacement for existing parking for the new building or project.**

   Current Procedure: As new districts are redeveloped in a more urban form (as encouraged by the comprehensive plan and city council goals), there are few viable options to locate temporary uses related to, or displaced by, the new construction. This issue includes construction support for development occurring on another parcel or parking displaced by construction particularly common in the Central Business District.

   Proposal: The proposal is to allow commercial lots as a use by right subject to special requirements on an interim (but renewable) basis to be used for staging in support of other commercial development without specific site improvements commonly required of development (street trees and parking lot landscaping) using the following standards:

   - The parcel is not zoned residential or is located within 500 feet of residentially zoned districts
   - The temporary use is permitted for a period of two years and may be extended along with a valid open building permit by reapplying and referencing the open building permit
   - The lot may be used in succession with subsequent building permits on other parcels but must be reestablished by permit
   - Activities may include: parking for construction workers and stand alone parking, materials staging, delivery queuing, equipment storage
   - Site improvements will not be required during this time except that sidewalks will be constructed and traffic issues will be reviewed
   - Grading and other applicable permits will be applied for separately
   - Use of the lot, as a stand alone use (aside from this interim-use provision) will be governed by applicable UDO standards

   Relevant Code Sections: 7-16-1(b) and 7-16-1(c)

   Pros:

   - Facilitates redevelopment activity in commercial districts
   - Mitigates negative impacts of construction by providing suitable areas for staging on a interim basis
   - May provide a temporary economic driver for underdeveloped parcels

   Cons:

   - Nearby parcels may experience the impacts of additional construction traffic without mitigation (landscaping)

7. **Issue: Provide a new option for accessory structures on non-conforming lots in residential districts as an amendment to the Uses by Right, Subject to Special requirements section (USSR).**

Current Procedure: It is a particular hardship to construct additions to, or provide new accessory structures on non-conforming residential lots because the use is subject to USSR standards and are only allowed on conforming lots.

Proposal: Allow accessory structures on non-conforming lots subject to the following changes to the USSR standards:

- New buildings or expansions will comply with setback standards
- New structures will be limited to 350 square feet
- Structures will meet all building code requirements

Relevant Code Sections: 7-16-1(c)

Pros:

- Allows homeowners to fully utilize their parcels
- Provides relief for what is a fairly common situation in older parts of the city or recently annexed and ETJ areas (and not previously subject to City subdivision standards)

Cons:

- May create concern from nearby residential property owners
- Increases the intensity of use on a property that already has some other size or dimensional disadvantage

Items regarding landscaping changes were presented to the Tree Commission at their meeting on Monday, May 18, 2009. The Tree Commission supported the changes to provide more options for street trees in urban areas and the landscape alternative compliance changes. This report was shared with the Coalition of Asheville Neighborhoods and their only comment was regarding using the lot on an interim basis for construction and they felt it should be renewed on a yearly basis, instead of every two years.

Collectively, these amendments may encourage some additional or small scale development or re-development without increasing a need for service. Fiscal benefits include those typically associated with new development or re-development but are difficult to predict.

The Planning and Zoning Commission recommended approval of the seven UDO amendments as presented by a vote of 5-0. City staff also recommends approval of the code amendments.

Mayor Bellamy closed the public hearing at 8:48 p.m.

In response to Mayor Bellamy, Ms. Bernstein said that all these changes are permanent changes to the UDO.

Mayor Bellamy said that members of Council have been previously furnished with copies of the ordinances and they would not be read.

Councilman Newman moved for the adoption of Ordinance No. 3738 (Article 5: Site Plan Review: Cumulative Development Threshold). This motion was seconded by Councilman Russell and carried unanimously.

ORDINANCE BOOK NO. 25 – PAGE 298

Vice-Mayor Davis moved for the adoption of Ordinance No. 3739 (Article 11: Access Requirements for Flag Lots). This motion was seconded by Councilman Mumpower and carried unanimously.

ORDINANCE BOOK NO. 25 – PAGE 300

Councilman Newman moved for the adoption of Ordinance No. 3740 (Street Trees). This motion was seconded by Councilwoman Cape and carried unanimously.

ORDINANCE BOOK NO. 25 – PAGE 302

Councilman Mumpower moved for the adoption of Ordinance No. 3741 (Landscaping Alternative Compliance). This motion was seconded by Councilman Russell and carried unanimously.

ORDINANCE BOOK NO. 25 – PAGE 304

Councilman Mumpower moved for the adoption of Ordinance No. 3742 (Attached Signage for Tenants in Ped-Oriented Areas). This motion was seconded by Councilman Russell and carried unanimously.

ORDINANCE BOOK NO. 25 – PAGE 306

Councilman Mumpower moved for the adoption of Ordinance No. 3743 (Interim Parking and Construction Staging Uses). This motion was seconded by Councilman Russell and carried unanimously.

ORDINANCE BOOK NO. 25 – PAGE 308

Councilman Mumpower moved for the adoption of Ordinance No. 3744 (Accessory Structures on Non-Conforming Lots or Lots with Non-Conforming Structures). This motion was seconded by Councilman Russell and carried unanimously.

ORDINANCE BOOK NO. 25 – PAGE 310

V. UNFINISHED BUSINESS:

VI. NEW BUSINESS:

A. RESOLUTION NO. 09-118 - RESOLUTION ADOPTING THE 2009 UPDATE TO THE TEN YEAR SOLID WASTE MANAGEMENT PLAN FOR THE JURISDICTIONS OF BUNCOMBE COUNTY

Solid Waste Manager Wendy Simmons said that this is the consideration of a resolution by City Council to adopt the 2009 Update to the Ten Year Solid Waste Management Plan for the jurisdictions of Buncombe County.

Pursuant to NC General Statute 130A-309A(b), each unit of local government is required to develop a Ten Year Solid Waste Management Plan and update the plan every three years. In Buncombe County, the original plan was adopted in 1997 and has been updated every third year since. The 2009 plan update was completed in cooperation with all six local municipal governments in Buncombe County and was prepared in accordance with the latest Ten Year Solid Waste Management Plan Guide issued by NC Division of Waste Management. The plan presents a progressive vision for managing solid waste in the jurisdictions of Buncombe County through the development of intended actions for solid waste planning elements which include: reduction; collection; recycling and reuse; composting and mulching; incineration; transfer; disposal; education; special wastes; illegal disposal/litter; purchasing of recycled products; disaster response; collection of discarded electronics; and management of abandoned manufactured homes.

She reviewed some Plan highlights for Asheville, including 23% City recycling rate in Fiscal Year 2008 opposed to 11% Buncombe County recycling rate in Fiscal Year 2008; 8.6% increase in amount recycled from 2005 to 2008; and increased types of recycling materials collected.

The following jurisdictions participated in the development of the plan update: Asheville, Biltmore Forest, Black Mountain, Montreat, Weaverville, Woodfin, and Buncombe County.

Pros:

- Maintains compliance and fulfills the requirements of the Solid Waste Management Act of 1989
- Promotes City of Asheville recycling efforts
- Promotes waste diversion from the landfill, decreasing tipping fees

Con:

- None

There is no additional funding impact to accepting the Plan update.

City staff recommends City Council adopt a resolution accepting the 2009 update to the Ten Year Solid Waste Management Plan for the jurisdictions of Buncombe County.

When Mayor Bellamy asked for public comments, none were received.

Councilman Mumpower pointed out that the City has dramatically failed in waste reduction. According to the statistics, the average person in Buncombe County generated .91 tons of solid waste in 1999 and most recently we generated 62% more than that.

Ms. Simmons explained that the Plan was originally put in place with the goal that the entire state would reduce the amount of solid waste that is generated by 40% by 2001. We didn't, nor did the state as a whole, reach that goal. The rate Councilman Mumpower mentioned was a rate that the members of the Committee who wrote the Plan set – it was a self-inflicted goal that we didn't reach. It has been adjusted to a more realistic rate of 10% over the next 10 years.

Councilman Mumpower and Councilwoman Cape felt that the 10% reduction over the next 10 years is too low.

Councilwoman Cape said that one way the City can play into this conversation is to switch the dynamic of what we charge for and what we don't charge for. Now it's free to throw things away and it costs to recycle. What we should do is implement a "Pay to Throw Program" with weights on the side of our trucks that measures the amount of waste thrown away and charge them for that amount. And then let people recycle for free. That would encourage them to shift on how they react to their trash. We must be willing to have this conversation even if it's not a politically comfortable one.

In response to Councilman Newman, Public Works Director Mark Combs said that staff would be happy to put together a program at Council's direction. The program will result in a lot of administrative costs, and a lot of equipment and capital costs. He said pros would be a disincentive to throw waste away and to compost. The cons would be billing, up front capital costs, maintaining the weight systems on the trucks, working out the billing, additional customer service staff and additional field staff. One neighbor may complain that their other neighbor is putting their trash into their can and making them pay for it. He felt that program would be far more costly than the roughly $3-4 Million to collect the solid waste every year now.

Vice-Mayor Davis explained some of the items that were discussed when he served on the Environmental Affairs Board for Buncombe County. The result of those efforts was a state of the art landfill and that is now beginning to fill. He felt that this will require a regional approach as

there are budget implications. There is also the issue of exporting household and commercial waste to another county or state. That is not a good thing but something we will have to consider in the near term.

In response to Councilman Mumpower on any policy direction Council can give to staff to help reduce solid waste per person, Mr. Combs said that we should strengthen the recycling program more, and promote solid waste and recycling education from K-8, along with strengthening composting and other peripheral programs.

Councilman Mumpower suggested we ask staff to come up with some incremental steps that they might recommend to us for policy consideration and that we review this issue on an annual basis.

Mr. Combs responded to Councilwoman Cape on why the City of Asheville does not recycle downtown.

In response to Mayor Bellamy, Mr. Combs said that the pending legislation about mandatory recycling will not impact the City. If it is mandatory for the households, City staff would have to knock on doors and leave notices on homes where we don't see their recycling bins out when it's their pick-up time. That could impact us in terms of staff. Eight out of 10 households recycle now and we would concentrate on the other 20% of households. Mayor Bellamy asked staff to be prepared with a plan if the state does call for mandatory recycling. She looked forward to hearing some options going forward on how we can better outreach to our community.

Councilman Russell felt our society is a throw away society instead of a recycling society, so until some of these programs and ideas come into reality, we still have to manage what is put on the curb now.

Mayor Bellamy suggested sending these ideas to the City Council Finance Committee prior to coming before the full Council because if there are changes, there will be budgetary impacts. She also noted that the Sustainability Advisory Committee on Energy and the Environment can review the ideas as well. She asked staff to bring include this Plan in Council's quarterly Strategic Plan update.

It was the consensus of Council to ask staff to review some best practices and come up with some incremental no-cost small steps that they might recommend to Council for policy consideration and that this Plan be included in Council's quarterly Strategic Plan update.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Russell moved for the adoption of Resolution No. 09-118. This motion was seconded by Vice-Mayor Davis and carried on a 6-1 vote, with Councilman Mumpower voting "no".

RESOLUTION BOOK NO. 32 – PAGE 82

B. RESOLUTION NO. 09-119 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH CURBSIDE MANAGEMENT INC. TO PROVIDE CURBSIDE RECYCLING COLLECTION PROGRAMS AND RELATED SERVICES

ORDINANCE NO. 3745 - ORDINANCE AMENDING THE FISCAL YEAR 2009-10 FEES AND CHARGES MANUAL TO REVISE THE RECYCLING CHARGE

Solid Waste Manager Wendy Simmons said that this is the consideration of (1) a resolution authorizing the City Manager to enter into a contract with Curbside Management, Inc. (CMI) to provide curbside recycling collection programs and related services for City of Asheville residences and facilities; and (2) an ordinance amending the Fiscal Year 2009-10 Fees and Charges Manual in order to revise the Recycling Charge to $2.95 per household per month.

The City issued a request for proposal for curbside recycling collection and related services in April 2009. A five member City Review Committee evaluated each bidder's proposal for providing economical, efficient, uniform, and safe curbside recycling collection services to residences and City facilities. The committee unanimously recommended CMI as having the lowest responsive and responsible bid. The contract is for an initial term of five years with one-year renewal options for each successive year.

The monthly bid prices received through the biding process for City facility collections and bi-weekly residential collections are listed below:

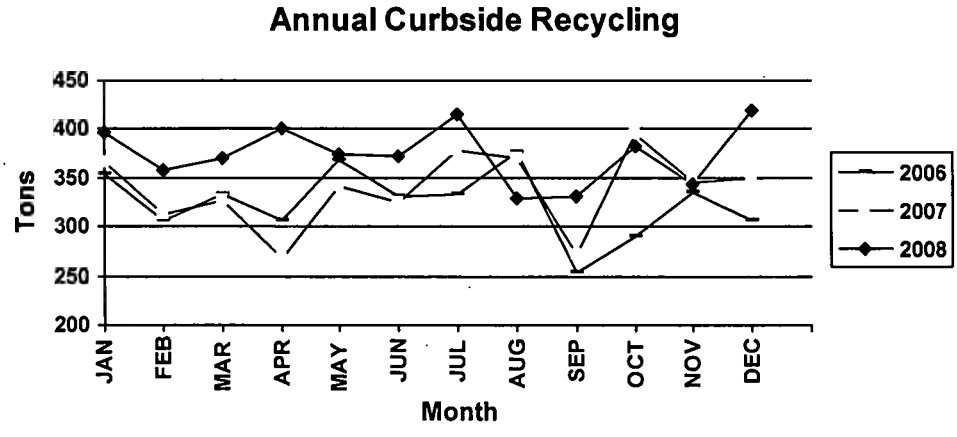
Curbside Management, Inc.	$ 73,542.00/month
Waste Management of Carolinas, Inc.	$ 124,378.00/month
Waste Industries	$ 133,229.70/month

CMI's bid includes the familiar bin collection system for residential customers on a bi-weekly basis. It also includes scheduled collections from City facilities.

A detailed cost structure proposed by CMI is listed as follows:

Service Recipient	Collection Frequency	Container Type	Cost/recipient/month
Residential	Bi-weekly	Bins (min. 2)	**$2.66/household/month**
Residential On-premise	Bi-weekly	Bins (min. 2)	**$5.98/household/month**
City Facilities	Weekly	Bins (min. 2)	**$8.00/facility/month**
City Facilities	Weekly	Roll out cart	**$32.00/facility/month**
City Facilities	Bi-weekly	Bins (min. 2)	**$4.00/facility/month**
City Facilities	Bi-weekly	Roll out cart	**$16.00/facility/month**
City Facilities	Monthly	Bins (min. 2)	**$4.00/facility/month**
City Facilities	Monthly	Roll out cart	**$12.00/facility/month**

This action complies with the Strategic Operating Plan in that it promotes the City's strategic priorities to be green and environmentally sustainable by reducing waste and encouraging recycling. The City has one of the most efficient recycling programs in the state. In 2008, 9,748,813 pounds of recyclables were collected through the City's curbside recycling program. The below chart graphs historical data for the amount of recyclables collected through the curbside recycling program.



Pros:

- Most efficient and cost effective proposal
- New recycling materials will be added to the collection program
  - aluminum pie plates and aluminum trays
- CMI provides current recycling service, resulting in no disruption of service to residential and City facility service recipients.
- Promotes City of Asheville recycling efforts
- Promotes waste diversion from the landfill, decreasing tipping fees

Cons:

- Five year contract term
- The recycling fee proposed for next fiscal year does not cover the increased contract costs by $0.30

The initial term of the contract is for five years. Based on the pricing structure previously outlined in this report, the total annual cost to the City for the CMI contract is $910,066 with pricing subject to adjustment based on the Consumer Price Index each year on July 1st.

Currently, the City charges $1.32 per household per month for the recycling program. The Manager's projected budget for the recycling program for Fiscal Year 2009-10 provided for full cost recovery of the entire recycling program. The entire recycling program includes the curbside collection contract costs as well as the costs for the following services: recycling drop-off center, advertising, outreach materials, Mobile Environmental Learning Center, and recycling supplies. To obtain full cost recovery, the budget included an overall increase of $1.33 per household per month or $2.65 per household per month. CMI's bid exceeded the projection by $0.30. Consequently, to fully recover the increased costs for the CMI contract through the residential recycling fee, the rate charged per household per month will need to be adjusted by $0.30 for fiscal year 2009-10 to $2.95 per household per month. If the rate is not increased from $2.65 per household per month to $2.95 per household per month, the cost of the recycling program will exceed the amount included in the Fiscal Year 2009-10 Manager's recommended budget by $132,957.

City staff recommends City Council (1) adopt a resolution authorizing the City Manager to enter into contract with Curbside Management, Inc. to provide curbside recycling collection programs and related services at an annual estimated cost of $910,066 for residential and City facility collections, as amended; and (2) adopt an ordinance amending the Fiscal Year 2009-10 Fees and Charges Manual in order to revise the Recycling Charge to $2.95 per household per month.

When Mayor Bellamy asked for public comments, no one spoke.

Councilwoman Cape moved to adopt resolution authorizing the City Manager to enter into contract with Curbside Management, Inc. to provide curbside recycling collection programs and related services at an annual estimated cost of $910,066 for residential and City facility collections, as amended. This motion was seconded by Councilman Mumpower.

Councilman Newman initiated discussion regarding making curbside recycling a basic City service and that this fee be phased out in the next 3-4 years. He then asked for an amendment to the motion that it is the intent of Council to phase this fee out in the next 4 years.

Councilwoman Cape accepted the amendment. Councilman Russell also accepted the amendment noting that even though the citizen will not be paying the fee, it will have to be paid for out of the General Fund.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and ordinance and they would not be read.

Councilwoman Cape moved for the adoption of Resolution No. 09-119, as amended by phasing the recycling fee out in the next 4 years. This motion was seconded by Councilman Mumpower and carried unanimously.

RESOLUTION BOOK NO. 32 – PAGE 83

Councilman Russell moved for the adoption of Ordinance No. 3745 as amended. This motion was seconded by Councilwoman Cape and carried on a 6-1 vote, with Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 25 – PAGE 312

C. ORDINANCE NO. 3746 - BUDGET AMENDMENT FOR FUNDING FROM THE N.C. DEPT. OF PUBLIC INSTRUCTION FOR THE 21st CENTURY COMMUNITY LEARNING CENTER IN ASHEVILLE'S WEED & SEED TARGETED AREA

Mr. Danny Hopkins, Recreation Superintendent, said that this is the consideration of a budget amendment, in the amount of $103,000, for funding from the N.C. Dept. of Public Instruction for the 21st Century Community Learning Center in Asheville's Weed & Seed targeted area.

In October 2004, elected officials, city staff and Asheville citizens mobilized to develop comprehensive strategies to address issues of law enforcement, neighborhood restoration, and prevention/intervention/treatment programs and activities in the West Riverside area of Asheville as part of a Weed and Seed initiative. The program was introduced to the community via a series of public meetings to determine the concerns of target area residents and was received favorably with the understanding that residents would be integrally involved in the planning and implementation of the initiative. In July 2006, the U.S. Department of Justice announced the designation of Asheville as an "Officially Recognized" site for the federal Weed and Seed initiative aimed at reducing crime and improving quality of life.

Weed & Seed sites are required to leverage additional funds to carry out their respective goals and objectives. The 21st Century Community Learning Center grants funds for academic based afterschool programs serving youth who are not performing at grade level. Asheville's model will serve any middle and high school student attending Asheville City Schools. Programs will take place at the Pisgah View Community Center and the Burton Street Recreation Center, both of which are designated Weed & Seed Safe Havens. This grant represents the first time these highly competitive funds have been awarded in Buncombe County.

This action complies with the City Council Strategic Operating Plan in that it expands community policing initiatives and supports recreation and employment alternatives for youth at risk of gang exposure. In addition, this action complies with the community driven Weed & Seed goals of 1) reducing crime and improving public safety, 2) enhancing the relationship between the community and law enforcement, 3) providing accessible programs for youth, 4) increasing parent involvement in education and afterschool activities and 5) increasing job readiness among youth and adults. The program also meets needs identified in other citywide collaborative efforts such as the Mayor's RICH Taskforce and Asheville City Schools' School Success Council.

Pros:

- Program will bring much needed academic assistance to middle and high school students who are struggling in school.
- Program works with community resources to affect change.
- Program will enhance the Weed & Seed strategy of providing a comprehensive crime prevention plan to address law enforcement, neighborhood restoration and prevention/intervention/treatment programs for residents of the target area.

Con:

- Additional funds will need to be leveraged during the 2010-2011 school year to sustain the program since funding decreases by 20% in that year and 40% the following year.

Grant revenue in the amount of $103,000 will cover all operating expenses related to the afterschool program at no additional cost to the City in FY 2009-10. However, as noted above, grant revenue will not cover all of the expenses if the program continues in FY 2010-11. Expenses include, but are not limited to: salary for a full time program director, part-time assistants, contracted tutors and resource providers, and supplies and transportation costs.

City staff recommends City Council adopt a budget amendment authorizing the City Manager to establish a budget in the amount of $103,000 for the 21st Century Community Learning Centers which will occur in Asheville's Weed & Seed target area.

Councilman Mumpower was concerned that we are asking the State to fund our Weed & Seed target area at the same time they are firing teachers in public education.

Mr. Hopkins responded to Councilwoman Cape when she questioned where the 40% funding for the following year would come from.

When Mayor Bellamy asked for public comments, none were received.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the ordinance and it would not be read.

Councilman Newman moved for the adoption of Ordinance No. 3746. This motion was seconded by Councilman Miller and carried on a 6-1 vote with Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 25 – PAGE 314

D. RESOLUTION NO. 09-120 - RESOLUTION AUTHORIZING THE CITY MANAGER TO APPLY FOR THE 2009 FEDERAL TRANSIT ADMINISTRATION APPORTIONMENT AND AUTHORIZING THE MAYOR TO EXECUTE SAID GRANT

Director of Transportation and Engineering Cathy Ball said that this is the consideration of a resolution authorizing the City Manager to apply for the 2009 Federal Transit Administration apportionment in the amount of $1,945,172; and the authorize the Mayor to execute said grant.

The City of Asheville has received the 2009 Federal Transit Administration apportionment under Division I of the "Omnibus Appropriations Act 2009". Section 5307 authorizes Federal funding for capital and in some cases, for operating assistance, and planning activities for transit in Urbanized areas. The City was reclassified as Urbanized Area, as part of the 2000 Census and therefore restricted in its ability to use operating assistance. However, the City, among others, will be allowed to use part of this year's allocation in operating assistance, in the amount of $484,022.

As part of the reclassification Henderson County's Apple Country became part of the transit systems in the Metropolitan Area. As such the City and the County share the federal

allocation. The County will receive approximately $439,911 of the total allocation. The City and the County had signed a Sub-recipient Agreement in which it is specified how the funds are disbursed as well as the oversight of these funds. The city is responsible before FTA of the use of these funds and owns all the capital items Henderson County purchases with the allocation.

The City is intended to use these funds for operating assistance, and for capital items allowed under the Master Agreement, such as preventive maintenance, Americans with Disabilities Act (ADA) service, and for other minor capital items (repairs to the Transit Garage and Transit Center, small equipment for the buses, etc.). 1% of the allocation must be used for security purposes.

This action complies with the Strategic Operating Plan proactively leveraging funding from the Federal Government and other funding sources for transportation improvements.

Pro:

- These funds were budgeted in the 2009 City Budget and will offset costs related to operations, preventive maintenance and ADA services.

Con:

- The city has to contribute with 20% of the capital items, including preventive maintenance and ADA services; and 50% of the operational expenses. The city has already incurred in these expenses.

The project cost will be $1,945,172, with $439,911 being allocated to Henderson County. The City's contribution to transit this fiscal year was $1,814,313.

City staff recommends City Council authorizing the City Manager to apply for the 2009 Federal Transit Administration apportionment in the amount of $1,945,172; and the Mayor to execute said grant.

Councilman Mumpower felt that we have a terrible state deficit and we are receiving borrowed funds that our children and grandchildren will have to repay.

When Mayor Bellamy asked for public comments, none were received.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Newman moved for the adoption of Resolution No. 09-120. This motion was seconded by Councilwoman Cape and carried on a 6-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 32 – PAGE 84

E. RESOLUTION NO. 09-121 - RESOLUTION AUTHORIZING THE CITY MANAGER TO MAKE PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE 2009 INGLES 4TH OF JULY CELEBRATION

RESOLUTION NO. 09-122 - RESOLUTION AUTHORIZING THE CITY MANAGER TO MAKE PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE 2009 BELE CHERE FESTIVAL

Ms. Diane Ruggiero, Cultural Arts Superintendent, said that this is the consideration of a resolution making provisions for the possession and consumption of malt beverages and/or unfortified wine at the 2009 Ingles 4th of July Celebration and the 2009 Bele Chere Festival.

2009 Ingles 4th of July Celebration

Benevolent Patriotic Order of the Does have requested through the Asheville Parks, Recreation & Cultural Arts Department that City Council permit them to serve beer at the 2009 Ingles 4th of July Celebration and allow for consumption at this event.

The 2009 Ingles 4th of July Celebration will be held at Martin Luther King, Jr. Park on Saturday, July 4, 2009 from 4:00 PM – 10:00 PM. The festival area will be open on Saturday, July 4 from 4:00 PM – 10:00 PM. The sale of malt beverages will end at 9:30 PM. However, the possession of open containers of malt beverages or consumption of malt beverages would be allowed during the festival hours of 4:00 PM – 10:00 PM.

2009 Bele Chere Festival

The following organizations: Asheville Ski Club, The Mediation Center, Benevolent Patriotic Order of the Does, Phi Beta Lambda –AB Tech, Cataloochee Ski Patrol, Brother Wolf Canine Rescue, Xi Omega Chapter of Beta Sigma Phi, Sigma Nu Fraternity, Wild South, Asheville Inner City Outings, and Friends of the Nature Center have requested through the Asheville Parks, Recreation & Cultural Arts Department that City Council permit them to serve beer and/or unfortified wine at the 2009 Bele Chere Festival and allow for consumption at this event.

The 2009 Bele Chere Festival's Festival Area will be open on Friday, July 24, 2009 from12:00 PM – 10:00 PM, Saturday, July 25, 2009 from 10:00 AM – 10:00 PM and Sunday, July 26, 2009 from 12:00 PM – 6:00 PM.

The sale of malt beverages and/or unfortified wine will end at 9:45 PM in all instances; however, the possession of open containers of malt beverages and/or unfortified wine or consumption of malt beverages and/or unfortified wine would only be allowed during the periods as follows:

Friday, July 24, 2009, from 12:00 Noon to 10:00 PM
Saturday, July 25, 2009, from 10:00 AM to 10:00 PM

There will be no sales and/or consumption of malt beverages and/or unfortified wine permitted on Sunday July 26, 2009.

This action does not tie-in with the Strategic Operating Plan. This action does not comply with any of the adopted City plans.

Pro:

- Allows fundraising opportunities for charity

Con:

- Potential for public safety issues

The fiscal impact will be overtime pay for Ashville Police Department officers.

City staff recommends City Council adopt a resolution authorizing the City Manager to approve a resolution making provisions for the possession and consumption of malt beverages and/or unfortified wine at the 2009 Ingles 4th of July Celebration and the 2009 Bele Chere Festival.

When Mayor Bellamy asked for public comments, none were received.

Mayor Bellamy said that members of Council have been previously furnished with copies of the resolutions and they would not be read.

Councilman Russell moved for the adoption of Resolution No. 09-121. This motion was seconded by Councilwoman Cape and carried on a 5-2 vote, with Mayor Bellamy and Councilman Mumpower voting "no"."

RESOLUTION BOOK NO. 32 – PAGE 85

Councilman Newman moved for the adoption of Resolution No. 09-122. This motion was seconded by Councilwoman Cape and carried on a 5-2 vote, with Mayor Bellamy and Councilman Mumpower voting "no"."

RESOLUTION BOOK NO. 32 – PAGE 88

At 8:59 p.m., Councilman Mumpower asked to be excused in order to observe the Phish concert at the Civic Center. Councilman Russell moved to excuse Councilman Mumpower. This motion was seconded by Vice-Mayor Davis and carried unanimously.

F. BOARDS & COMMISSIONS

Councilman Newman moved to instruct the City Clerk to prepare the proper paperwork to reappoint Tommy Wilson, Fred Pratt and Harold Garland; and appoint Phil Wilson and Randy Osborne to the Board of Electrical Examiners. This motion was seconded by Councilman Russell and carried unanimously.

Councilwoman moved to instruct the City Clerk to prepare the proper paperwork to reappoint Brad Brock and Beth Gillespie to the Historic Resources Commission. This motion was seconded by Councilman Russell and carried unanimously.

Councilman Miller moved to instruct the City Clerk to prepare the proper paperwork to reappoint Jim Fink (regular), Barbara Hodgson (regular) and John Hayes (alternate) to the Noise Ordinance Appeals Board. This motion was seconded by Councilman Russell and carried unanimously.

Councilman Russell moved to instruct the City Clerk to prepare the proper paperwork to reappoint Wanda Hawthorne, Sara Manuel and Spencer Hardaway to the Recreation Board; and to re-advertise for the two other vacancies on the Recreation Board. This motion was seconded by Councilwoman Cape and carried unanimously.

Councilwoman Cape moved to instruct the City Clerk to prepare the proper paperwork to appoint David Erb to the Transit Commission. This motion was seconded by Councilman Russell and carried unanimously.

Mayor Bellamy moved to instruct the City Clerk to prepare the proper paperwork to appoint Dale Joyner for a vacancy on the URTV Inc. Board of Directors. This motion was seconded by Councilwoman Cape and carried unanimously.

Vice-Mayor Davis said that the Pack Place Board of Directors is willing to amend their regular meeting time and date in order for a Council member to be appointed to replace former Council Member Holly Jones. It was the consensus of Council to appoint Councilman Russell to the Pack Place Board with Vice-Mayor Davis coordinating the new schedule with the Pack Place Board Chair Karen Tessier and Councilman Russell.

VII. OTHER BUSINESS:

VIII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

IX. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 9:09 p.m.

Magdalen Bateson
CITY CLERK

MAYOR

Tuesday – June 23, 2009 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding (arrived at 6:22 p.m. from a N.C. League of Municipalities Board of Directors meeting in Raleigh, N.C.); Vice-Mayor Jan B. Davis; Councilwoman Robin L. Cape; Councilman Kelly M. Miller; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; Councilman William A. Russell Jr.; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Vice-Mayor Davis led City Council in the Pledge of Allegiance.

INVOCATION

Councilman Mumpower gave the invocation.

I. PROCLAMATIONS:

A. PROCLAMATION PROCLAIMING JULY 2009 AS "I NEED U2 KNOW ITS TIME TO END THE HIV/AIDS STIGMA MONTH"

Councilwoman Cape read the proclamation proclaiming July, 2009, as "I Need U2 Know Its Time to End the HIV/AIDS Stigma Month" in the City of Asheville. She presented the proclamation to Dr. Jamie Whitehouse and Mr. Lee Nesbitt, who briefed City Council on some activities taking place during the month.

B. RECOGNITION OF STRIVE NOT TO DRIVE AWARD WINNERS

Vice-Mayor Davis was pleased to recognize the following award winners: (1) Golden Spoke Award - Zac Altheimer who works for the Music Allies and was nominated by Lynn Player. Zac has made it his goal to ride his bike to work every day for the past 5 years to reduce his carbon footprints. Rain and snow do not deter him from riding his bike. He encourages others to do the same. Lynn says, she has started riding her bike to work because of Zac's encouragement; (2) Golden Sneaker Award - Marilyn Tondy who has given up driving. Marilyn works in landscaping and carpools or walks to landscaping jobs often carrying her tools. She also uses the Greyhound Bus extensively for getting around on longer trips. She was nominated by a friend, Roberta Greenspan who says, "Marilyn serves as an example to all our friends ALWAYS walking and she often refuses an offer for a ride as she prefers to walk."; (3) Golden Wheel Award - Blake Esselstyn who uses a combination of his bike and the bus to commute to work because he leaves the one car that he owns for his wife and small daughter to use. He has done this for 5 years. Blake works in city planning and was nominated by Yuri Koslen & Shannon Tuch; and (4) Employer Challenge Award - the Grove Park Inn who was the only employer who actually saw an increase in the bus-pass program. The others had a decline of employees. Mr. Ron Morin accepted the Award on behalf of the Grove Park Inn.

II. CONSENT AGENDA:

At the request of Councilman Mumpower, Consent Agenda Items "B", "C", "D", "G", "H" and "O" were removed from the Consent Agenda for discussion and/or individual votes.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON JUNE 9, 2009

B. RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A LEASE AGREEMENT WITH ONTARIO INVESTMENTS INC. FOR GOLF CARTS AND MAINTENANCE EQUIPMENT AT THE ASHEVILLE MUNICIPAL GOLF COURSE

This item was removed from the Consent Agenda for discussion and/or an individual vote.

C. RESOLUTION AFFIRMING THE IMPORTANCE OF EXISTING INTERCITY TRANSIT ROUTES TO THE CITY AND TO THE REGION

This item was removed from the Consent Agenda for discussion and/or an individual vote.

D. MOTION SETTING A PUBLIC HEARING FOR A SUBSTANTIAL AMENDMENT TO THE 2009-10 ACTION PLAN DETAILING THE CITY'S PLAN TO DISTRIBUTE $1,503,557 OF COMMUNITY DEVELOPMENT BLOCK GRANT FUNDS AND $1,542,387 OF HOME INVESTMENT PARTNERSHIP ACT FUNDS ALLOCATED TO THE CITY OF ASHEVILLE

This item was removed from the Consent Agenda for discussion and/or an individual vote.

E. RESOLUTION NO. 09-126 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A MULTI-YEAR LEASE AGREEMENT AND AN EQUIPMENT LEASE AGREEMENT WITH HAW CREEK FIRE AND RESCUE INC.

Summary: The consideration of a resolution authorizing the City Manager to enter into a multi-year lease agreement and an equipment lease agreement with Haw Creek Fire and Rescue, Inc.

Haw Creek Fire and Rescue, Inc. has asked the City of Asheville to assume fire protection responsibility for a portion of the Haw Creek Fire District beginning July 1st, 2009. The Buncombe County Commissioners passed a resolution on June 16th, 2009, authorizing the County Manager to enter into a fire protection agreement with the City of Asheville for this portion of the Haw Creek Fire District. The multi-year lease agreements allow for the operation of the Haw Creek Fire Station and Equipment to be operated by the Asheville Fire and Rescue Department. The lease agreement is for an annual payment of $1. The City of Asheville will receive the proportionate share of Haw Creek Fire District taxes to which the City will be entitled to in consideration of performing its duties under this agreement.

Regarding the City Council Strategic Operating Plan, by authorizing, this resolution assists in making Asheville a safer city based upon metrics of similarly sized cities, by increasing the standard of cover within the City of Asheville. This resolution also is an opportunity to consolidate city and county services.

Pros:

- This agreement allows for a strong fire and rescue presence to be maintained in the Haw Creek Community while strengthening the level of service provided within the City of Asheville.
- This agreement is an excellent city and county partnership that consolidates services.

Cons:

- None

This agreement has a negligible fiscal impact as the amount of the lease is $1 annually.

City staff recommends City Council adopt a resolution authorizing the City Manager to enter into a multi-year lease agreement and an equipment lease agreement with Haw Creek Fire and Rescue.

RESOLUTION BOOK NO. 32 – PAGE 96

F. RESOLUTION NO. 09-127 - RESOLUTION AUTHORIZING THE MAYOR TO EXECUTE A CONTRACT WITH DIXON HUGHES PLLC FOR AUDITING SERVICES FOR FISCAL YEAR 2008-09

Summary: The consideration of a resolution authorizing the Mayor to execute a contract with Dixon Hughes, PLLC, Certified Public Accountants and Advisors, for auditing services for Fiscal Year 2008-2009.

NC General Statute sec. 159-34 requires that local governments of North Carolina have their accounts audited each fiscal year and submit a copy of the audit to the Local Government Commission.

In response to the aforementioned general statute, staff recommends retaining the services of Dixon Hughes to conduct the basic audit of the city's accounts for the fiscal year ending June 30, 2009. Staff has previously worked with Dixon Hughes and they have consistently provided a thorough and high quality audit for the City.

Staff also anticipates needing to contract with Dixon-Hughes to provide various auxiliary financial services that are beyond the scope of their basic audit engagement but are necessary for its completion. Those services include preparation of various city financial statements and production of the Comprehensive Annual Financial Report, which are traditionally performed in-house by various accounting staff. Due to staff's current commitment to converting the City to a new core financial system, which has a scheduled "go-live" date of January 1, 2010, staff currently does not have the capacity to perform the auxiliary financial services without additional support from Dixon-Hughes.

A base fee of $110,000 has been proposed for the basic audit and is included in the Finance Department's portion of the Fiscal Year 2009-2010 annual operating budget scheduled for adoption on June 23, 2009.

Dixon-Hughes is currently developing an estimate for the necessary auxiliary financial services, the cost of which be funded from professional services accounts in the Finance Department and the Business Technology Improvement (BTIP) project budget.

City staff recommends adoption of the resolution authorizing the Mayor to execute a contract with Dixon Hughes PLLC, Certified Public Accountants and Advisors, for basic auditing services in the amount of $110,000 for fiscal year 2008-2009. Staff will ask for Council's consideration of an amendment to the contract at a future date at such time that an estimate for various auxiliary services becomes available.

RESOLUTION BOOK NO. 32 – PAGE 97

G. RESOLUTION OF SUPPORT FOR THE UNC-ASHEVILLE MATH MENTORING PROGRAM

This item was removed from the Consent Agenda for discussion and/or an individual vote.

H. RESOLUTION FAVORING AN INDEPENDENT ENERGY EFFICIENCY ADMINISTRATOR FOR THE STATE OF NORTH CAROLINA

This item was removed from the Consent Agenda for discussion and/or an individual vote.

I. RESOLUTION NO. 09-128 - RESOLUTION AUTHORIZING THE MAYOR TO ENTER INTO AN AGREEMENT WITH BUNCOMBE COUNTY TO PLACE THE ENERGY LOOP SCULPTURE IN THE NEW PLAZA LOCATED ON THE COLLEGE STREET SIDE OF PROPERTY LOCATED AT 35 WOODFIN STREET

Summary: The consideration of a resolution authorizing the Mayor to enter into an agreement with Buncombe County to place the Energy Loop sculpture in the new plaza located on the College Street side of property located at 35 Woodfin Street in Downtown Asheville.

The Energy Loop sculpture is Asheville's first piece of public art. Created in 1983 by local artist Dirk Cruiser and commissioned by Quality Forward (now Asheville Greenworks), the Energy Loop was located in the what is now Pack Square Park. In 2006, the sculpture was removed for a complete restoration by local artist R.S. Gursky.

Original hopes were that the Energy Loop would be placed back in Pack Square Park, but as the plans for the park developed, the environmental conditions that the sculpture requires were not able to be met.

In an effort to keep the Energy Loop in a prominent, downtown location staff identified the County-owned plaza which was recently completed along with the new parking deck. The new location meets all of the environmental considerations required along with the site selection criteria adopted by the Public Art Board:

Sites where public art is to be displayed should:

- Experience high levels of pedestrian traffic and be part of the city's circulation paths;
- Be easily visible and accessible to the public;
- Serve to energize and identify the site;
- Enhance the overall public environment and pedestrian streetscape experience;
- Locations that allow for reflection and provide a break from social activity;
- Locations that are enhanced by public art (such as, the location is void of visual interest, or the addition of artwork would complete the location's visual experience);
- Help to create a place of congregation and activity; and
- Establish landmarks and neighborhood gateways.

Other guidelines about public art site placement include:

- Artworks should not block windows or entranceways, nor obstruct normal pedestrian circulation in and out of a building (unless such alteration is specifically a part of the experience or design of the artwork);
- Art should not be placed in a given site if the landscaping and maintenance requirements of that site cannot be met;
- Work displayed in interior public spaces will be accessible to the public at least during normal building operating hours without requiring the public to obtain special passes or permits to view the work;

- Work displayed in exterior public spaces should be accessible to the public 24 hours per day. If a work is sited in a park or similar setting, it should be accessible during the normal operating hours of that site or facility;
- Work should not block windows or entranceways or obstruct normal pedestrian circulation entering or exiting a building (unless it is specifically a part of the experience or design of the work); and
- Art should not be placed in a site where it is overwhelmed by nor competing with the scale of the site or adjacent architecture, large retail signage, billboards, etc.

Pursuant to this agreement the City agrees to the following:

- Shall be responsible for the installation of the Sculpture including but not limited to all moving and installation costs, site alterations and restoration.
- Shall be responsible for the ongoing care and maintenance of the Sculpture including, but not limited to, routine conservation measures, preservation measures, and cleaning of the Sculpture.
- Shall be responsible for determining if major restoration of the Sculpture is required and will hire a professional conservator to assess and repair the Sculpture.
- Shall endeavor to remove graffiti from Sculpture as soon as possible after notification. Only materials and methods approved by a professional conservator will be used to remove graffiti.
- Shall be responsible for the marketing and promotion of the Sculpture in conjunction with the entire City's public art collection.

Public comment regarding the location selected was solicited in two ways: online questionnaire and public meetings. For the online questionnaire, 85 people responded to the survey with over 62.3% of the respondents rating the proposed location as between fair and excellent (7.1% were not familiar with the proposed location). When asked what was most important in considering a location for the Energy Loop 61.2% said "a downtown location", 50.6% said "easy to see from the street and sidewalk" and 42.4% said a "grass area". City staff held two public meetings on Friday, June 12 at 9:00am and at noon at the Public Works building and was announced through a press release. The morning meeting was attended by one person who felt that the location was "just fine". The noon meeting was not attended.

This action supports the Parks, Recreation, Cultural Arts, and Greenways Master Plan in that it enhances public confidence and appreciation of the arts, and builds public and organizational capacity for the arts.

The location has been voted on and approved by the Public Art Board at the April, 2009 meeting.

Pros:

- Provides a prominent, Downtown location for the Energy Loop;
- The location meets the environmental needs of the sculpture.

Con:

- The location is not City-owned property.

The City will maintain the area around the sculpture.

City staff recommends City Council adopt a resolution authorizing the Mayor to enter into an agreement with Buncombe County to place the Energy Loop sculpture in the new plaza located on the College Street side of property located at 35 Woodfin Street in Downtown Asheville.

J. RESOLUTION NO. 09-129 - RESOLUTION APPOINTING MEMBERS TO THE BOARD OF ELECTRICAL EXAMINERS

Summary: The terms of Tommy Wilson, Ronnie McAbee, Fred Pratt, Brian Kintner and Harold Garland, as members on the Board of Electrical Examiners, expire on July 1, 2009.

On June 9, 2009, it was the consensus of Council to (1) reappoint Mr. Tommy Wilson (electrical contractor), Mr. Fred Pratt (utility representative), and Mr. Harold Garland (layman); and (2) appoint Mr. Phil Wilson (journeyman electrician) and Mr. Randy Osborne (licensed engineer) to each serve a three-year term respectively, terms to expire July 1, 2012, or until their successors have been appointed.

RESOLUTION BOOK NO. 32 – PAGE 99

K. RESOLUTION NO. 09-130 - RESOLUTION APPOINTING MEMBERS TO THE ASHEVILLE-BUNCOMBE HISTORIC RESOURCES COMMISSION

Summary: The terms of Brad Brock and Beth Gillespie, as members of the Asheville-Buncombe Historic Resources Commission, expire on July 1, 2009.

On June 9, 2009, it was the consensus of Council to reappoint Mr. Brock and Ms. Gillespie to each serve a three-year term respectively, terms to expire July 1, 2012, or until their successors have been appointed.

RESOLUTION BOOK NO. 32 – PAGE 100

L. RESOLUTION NO. 09-131 - RESOLUTION APPOINTING MEMBERS TO THE NOISE ORDINANCE APPEALS BOARD

Summary: The terms of Mr. James Fink (regular member), Ms. Barbara Hodgson (regular member) and Mr. John Hayes (alternate member) on the Noise Ordinance Appeals Board expire July 1, 2009.

On June 9, 2009, it was the consensus of Council to reappoint Mr. Fink (regular member), Ms. Hodgson (regular member) and Mr. Hayes (alternate member) to each serve a three-year term respectively, terms to expire July 1, 2012, or until their successors have been appointed.

RESOLUTION BOOK NO. 32 – PAGE 101

M. RESOLUTION NO. 09-132 - RESOLUTION APPOINTING MEMBERS TO THE RECREATION BOARD

Summary: The terms of Wanda Hawthorne, Wind Peter Motika, Sara Manuel, Spencer Hardaway and Adam Pittman, as members on the Recreation Board, expire on June 30, 2009. Mr. Motika and Mr. Pittman were not interested in reappointment.

On June 9, 2009, it was the consensus of Council to reappoint Ms. Hawthorne, Ms. Manuel and Rev. Hardaway to each serve a three-year term respectively, terms to expire June 30, 2012, or until their successors have been appointed.

Also on June 9, 2009, it was the consensus of Council to re-advertise for the two vacancies on the Recreation Board.

RESOLUTION BOOK NO. 32 – PAGE 102

N. RESOLUTION NO. 09-133 - RESOLUTION APPOINTING A MEMBER TO THE TRANSIT COMMISSION

Summary: There currently exists a vacancy left by Mr. Larry Chapman until December 31, 2010.

On June 9, 2009, it was the consensus of Council to appoint David Erb to serve the unexpired term of Mr. Thompson, term to expire December 31, 2010, or until his successor has been appointed.

RESOLUTION BOOK NO. 32 – PAGE 103

O. RESOLUTION APPOINTING A MEMBER TO THE URTV INC. BOARD OF DIRECTORS

This item was removed from the Consent Agenda for discussion and/or an individual vote.

P. RESOLUTION NO. 09-134 - RESOLUTION APPOINTING A MEMBER TO THE PUBLIC ART BOARD

Summary: The term of Bill Fishburne, as a member of the Public Art Board, expired on December 31, 2008. He is not eligible for reappointment.

At the May 12, 2009, meeting, it was the consensus of Council to appoint Robert Todd to serve a three year term, term to expire December 31, 2011, or until his successor has been appointed.

RESOLUTION BOOK NO. 32 – PAGE 104

Vice-Mayor Davis asked for public comments on any item on the Consent Agenda, but received none.

Vice-Mayor Davis said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Russell moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Mumpower and carried unanimously.

ITEMS REMOVED FROM THE CONSENT AGENDA FOR INDIVIDUAL VOTES

B. RESOLUTION NO. 09-124 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A LEASE AGREEMENT WITH ONTARIO INVESTMENTS INC. FOR GOLF CARTS AND MAINTENANCE EQUIPMENT AT THE ASHEVILLE MUNICIPAL GOLF COURSE

Summary: The consideration of a resolution authorizing the City Manager to enter into a lease agreement with Ontario Investments, Inc. for golf carts and maintenance equipment at the Asheville Municipal Golf Course.

The City of Asheville currently leases 72 golf carts and maintenance equipment located at the Asheville Municipal Golf Course via three separate lease agreements with Ontario Investments at a cost of $152,000 per year.

The City conducted a request for proposals for golf course equipment lease services and Ontario Investments, located at 2519 James Street in Syracuse, New York was the sole bidder and is proposed to be selected as the provider of the lease.

A new lease with Ontario Investments will consolidate the three leases for the existing equipment into one lease. The term of the lease is from September 1, 2009 through August 31, 2010 at a cost of $114,000 with an option to extend the Lease for an additional twelve (12) months. The consolidated lease will result in a savings of $38,000.

Funding for the lease in the amount of $114,000 is proposed in the City's FY 2009-2010 operating budget for the golf course. Funding for the twelve (12) month extension, if exercised, will be contingent upon City Council approving the funds for 2010-2011.

This action complies with the City Council Strategic Operating Plan in that it supports and enhances basic city services and is part of the city maintenance program to conduct ongoing facility maintenance. It is also consistent with the Parks, Recreation and Cultural Arts Master Plan in that it provides ongoing maintenance and care for the City's parks and recreation system.

Pros:

- Provide resources for ongoing maintenance services at golf course
- Retain and maintain quality golf course equipment
- Cost savings by consolidating three existing lease agreements into one agreement

Con:

- None

Funding in the amount of $114,000 for the lease agreement is contingent upon City Council approving the funds as part of the FY 2009-2010 operating budget. Funding for the twelve (12) month extension, if exercised, will be contingent upon City Council approving the funds as part if the FY 2010-2011 operating budget.

City staff recommends City Council adopt a resolution authorizing the City Manager to enter into a lease agreement for golf course carts and maintenance equipment with Ontario Investments Inc. for a total of $114,000, with any extensions, contingent upon City Council approving the funds for each fiscal year applicable to the lease agreement.

Councilman Mumpower felt that as long as there is prostitution and an open air drug market he did not feel the City should be in the golf course business.

Councilman Russell moved for the adoption of Resolution No. 09-124. This motion was seconded by Councilman Miller and carried on a 5-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 32 – PAGE 94

C. RESOLUTION NO. 09-125 - RESOLUTION AFFIRMING THE IMPORTANCE OF EXISTING INTERCITY TRANSIT ROUTES TO THE CITY AND TO THE REGION

Summary: The consideration of a resolution affirming the importance of existing intercity transit routes to the city and to the region.

As you have been made aware through other presentations, the Asheville Transit System (ATS) operates intercity routes that connect Black Mountain and Weaverville to Asheville. The routes began operation in 2002 and 2005 respectively and thereby fulfilled elements of the City Development Plan 2025.

Each route operates five times a day, Monday-Saturday. The Black Mountain routes operates along US 70 (Tunnel Road) between downtown Asheville and Black Mountain. The Weaverville Route operates along US 25 (Merrimon Avenue/Weaverville Highway) and then to Weaver Boulevard and Arvato Digital Services (formerly Sonopress). Each makes stops along the route. Once in their respective cities, these routes connect to local Mountain Mobility deviated route service.

In the past, the North Carolina Department of Transportation (NCDOT) has contributed 90% of the operation costs for these two routes, and the remaining 10% has come from the towns of Black Mountain and Weaverville, Buncombe County, and from the routes' farebox revenue.

The Federal Transit Administration (FTA) defines intercity bus service as:

> ...regularly scheduled bus service for the general public which operates with limited stops over fixed routes connecting two or more urban areas not close in proximity, which has the capacity for transporting baggage carried by passengers, and which makes meaningful connections with scheduled intercity bus service to more distant points, if such service is available.

The model that you may be familiar with is the service offered by Greyhound or Trailways, rather than a regular city bus service model. NCDOT has notified the city that this service, as currently configured, does not meet the FTA definition, and will be ineligible for funding in the future unless it conforms to FTA's intercity definition.

City and ATS staff are working with the Institute of Transportation Research (ITRE), North Carolina Department of Transportation (NCDOT), and HDR, the transit master plan consultants, to determine how best to modify the service to meet FTA requirements for funding. Once possible solutions have been identified and evaluated for conformance with the requirements, Council will be asked to act on those recommendations.

The need for these routes is made clear by both the willingness of the Town of Black Mountain to invest in the operation of the routes, and by the ridership. The Town of Weaverville has decided not to contribute with the route anymore since the route is not serving their population. FY 2008 ridership on the ATS Weaverville route was 13,935, and ridership on the ATS Black Mountain route was 42,902. Ridership on the Black Mountain Route grew 18% from FY 2007 to FY 2008. Ridership on the Weaverville route declined by 5%. The Black Mountain Trailblazer has carried approximately 7,200 passengers in 2007 and grew 13% in 2008 carrying close to 8,000 passengers.

As a step in the process of saving this valuable service, city staff has asked for an expression of City Council sentiment on the importance of intercity service to connect Black Mountain and Weaverville to Asheville.

The Transit Commission has passed a resolution requesting City Council's support to the intercity service between Asheville and Black Mountain and Asheville and Weaverville.

This action supports the City Council Strategic Operating Plan in the green and sustainable focus areas. Specific tasks are to "fully leverage funding from the State and other funding sources for regional transportation improvements," and to "establish a multi-modal transportation plan including sidewalks, bike paths, signal preemption, transit and other system improvements."

Pros:

- This is a step toward retaining the service and funding

- It does not commit the City of Asheville to any specific action

Cons:

- None

City staff recommends City Council adopt a resolution supporting intercity transit service between Asheville and Black Mountain and Asheville and Weaverville.

Director of Transportation and Engineering Cathy Ball responded to various questions/ comments from Council, some being about the Asheville-Weaverville route.

Councilman Mumpower was concerned about the amount the City is subsidizing for transit.

Councilwoman Cape moved for the adoption of Resolution No. 09-125. This motion was seconded by Councilman Miller and carried on a 4-2 vote, with Vice-Mayor Davis and Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 32 – PAGE 95

D. MOTION SETTING A PUBLIC HEARING FOR A SUBSTANTIAL AMENDMENT TO THE 2009-10 ACTION PLAN DETAILING THE CITY'S PLAN TO DISTRIBUTE $1,503,557 OF COMMUNITY DEVELOPMENT BLOCK GRANT FUNDS AND $1,542,387 OF HOME INVESTMENT PARTNERSHIP ACT FUNDS ALLOCATED TO THE CITY OF ASHEVILLE

Summary: The consideration of a motion setting a public hearing for July 14, 2009, to obtain citizen input on a Substantial Amendment to the Consolidated Action Plan for Fiscal Year (FY) 2009-10, which sets out the proposed use of federal Community Development Block Grant (CDBG) and HOME Investment Partnership Act (HOME) funds.

The City submitted its Consolidated Action Plan for 2009-2010 to HUD on May 15, 2009. Since that time, the City has received an allocation of and submitted required documentation for CDBG-R funding, freeing up 2009-2010 regular HUD funding. The City also learned after the submittal that its 2009-2010 allocation of HUD and HOME funding had increased. The Housing and Community Development Committee, and the Asheville Regional Housing Consortium have both met and are recommending the distribution of these additional funds. Both recommending bodies decided to fund applications that either had not been chosen for funding in the original round, or to enhance funding for applications that had been funded for less than their original request.

HUD requires that communities follow their Citizen Participation Plans when adjustments in the Action Plan are necessary. The adjustments recommended by the HCD and Consortium Board require a Substantial Amendment, which necessitates a 30 day public comment period, and a public hearing and City Council approval. A notice of public hearing was published in the Asheville Times-Citizen on June 12, 2009.

This action complies with the City Council Strategic Operating Plan in that the draft Action Plan Amendment directly relates to the Council's Strategic Goal of "Affordable." This plan directly supports the City's affordable housing plan, supports the city-owned land redevelopment process, and will increase the supply of workforce housing. It supports initiatives to end homelessness in Asheville.

Pros:

- The public hearing process gives citizens the opportunity to comment and affect public decision-making regarding the use of public funds.

Con:

- There are no cons to this public hearing process.

Through timely following of the public process, Asheville continues to be eligible for these CDBG and HOME entitlement funds, projected to be over $3.9 million for 2009-2010.

Staff recommends that Council set the public hearing for the Substantial Amendment to the 2009-2010 Consolidated Action Plan for July 14, 2009.

Councilman Mumpower could not support this action because these are borrowed federal dollars and this is basically a trust fund for non-profits.

Councilwoman Cape moved to set the public hearing for the Substantial Amendment to the 2009-2010 Consolidated Action Plan for July 14, 2009. This motion was seconded by Councilman Russell and carried on a 5-1 vote, with Councilman Mumpower voting "no."

G. RESOLUTION OF SUPPORT FOR THE UNC-ASHEVILLE MATH MENTORING PROGRAM

Summary: This resolution expresses Council's support for the UNC-A math mentorship program. This was prepared as directed by Mayor Bellamy at Council's June 9, 2009, meeting.

The resolution recognizes the value of the program, and notes that it was not recommended for funding through the outside agency appropriation in the FY 2009-10 budget. The resolution authorizes the City Manager to enter into an agreement with UNC-Asheville and to reallocate $5,000 in the 2009-10 Fiscal Year budget for this purpose.

Councilman Mumpower said that the Housing & Community Development Committee reviewed applications and this one did not make the cut. He felt this Council process has been side-stepped.

Vice-Mayor Davis explained why this resolution has been brought forward and why he felt Council should support the program.

Councilman Newman felt the entire outside agency funding program needs to be reviewed to get a sense of what criteria will be used to decide which partnerships make sense for Asheville to be involved with. There are many great organizations in the community that we could potentially partner with but we can't partner with all of them. He felt that once you fund an organization one time, the need will not go away, so he wondered if we are basically making a commitment to fund the program indefinitely. He felt that conversation should be held before funding a new organization that the City has not funded in the past.

Councilwoman Cape was concerned that we will only be supporting five students with the $5,000 allocation. She understands the value of the program, but she was not sure exactly what we would be getting for the $5,000. She appreciated the idea of the program and looked forward to having an opportunity to dive into the program deeper to see how we can lend our support.

Vice-Mayor Davis moved to adopt the resolution expresses Council's support for the UNC-A math mentorship program and to reallocate $5,000 in the 2009-10 Fiscal Year budget for this purpose. This motion failed to due a lack of a second.

H. RESOLUTION FAVORING AN INDEPENDENT ENERGY EFFICIENCY ADMINISTRATOR FOR THE STATE OF NORTH CAROLINA

Summary: Councilwoman Cape said that there is a bill in the legislature to create NC SAVES ENERGY, which legislation is to establish an independently administered statewide energy efficiency program to reduce energy usage and costs for low and moderate income households across the state. She felt this is an important tool, noting that the program will not be administered by the power companies. She explained that this would be a very low surcharge (approximately $1) on the power bill, which will go to reduce consumption.

She provided Council with the following resolution: "WHEREAS, the NC General Assembly has passed a very modest Renewable and Efficiency Portfolio Standard, which calls only for up to 5% efficiency by the state's electric utilities by 2021; and WHEREAS, electrical production is a major contributor to air pollution and greenhouse gases, and baseload power plants, less than 40% efficient themselves, constitute the single largest locus of inefficiency and wasted heat in NC's energy budget, as well as a significant contributor to drought vulnerability and degradation of aquatic ecosystems; and WHEREAS, studies by several energy experts have shown that efficiency gains of at least 19% are achievable cost-effectively, even before implementation of any taxation or cap and trade limits for greenhouse gas emissions; and WHEREAS, low- and moderate-income households with poor quality housing use a disproportionate amount of energy to heat and cool their homes and thus disproportionately pay 'per unit used' energy surcharges, our state's energy plan should include weatherization and other energy efficiency programs to assist these households, which will provide a meaningful improvement to the quality of life of these citizens as well as a significant environmental impact, and WHEREAS, legislation to establish an independently administered statewide energy efficiency program for electric and gas customers, NC SAVE$ ENERGY, House Bill 1050, has been introduced into the House of Representatives of the NC General Assembly, to reduce energy usage and costs for low and moderate income households and a small program for government buildings, schools and hospitals, create thousands of green jobs, prevent the building of any new baseload power plants, and reduce pollution and climate changing emission. NOW THEREFORE, BE IT RESOLVED BY ASHEVILLE CITY COUNCIL that: Section 1.The North Carolina legislature and especially our region's representatives, are urged to pass House Bill 1050 in 2009, in order to create NC SAVE$ ENERGY, a statewide energy efficiency independent administrator, and the Governor is urged to sign the legislation, to begin implementation of the programs at the earliest possible date. Section 2. That such a North Carolina energy efficiency program be required to save significant energy and reduce greenhouse gas emissions; be fairly funded by all electricity and gas customers in proportion to their energy use; and provide incentives to customers to both conserve energy and implement energy efficiency measures, and finances and efficiency accomplishments be independently evaluated annually. Section 3. That the priorities for the North Carolina energy efficiency plan include addressing the unmet needs of working families and those on fixed incomes for assistance in implementing energy efficiency measures, as well as the need to create new North Carolina-based public and private jobs in the growing efficiency and conservation markets. Section 4. That such a program be fairly funded by electric and gas customers in proportion to their energy use, with exemptions for participants in a range of federal and state subsidy programs for low and fixed income and disabled persons. Section 5. This resolution shall be effective on and after its passage."

Councilman Mumpower could not support the resolution in that he felt the first thing we need from the State of North Carolina is a functional court system.

Councilwoman Cape agreed that the court system is an important part of our community, but so is our climate and we are capable of giving simultaneously attention to more than one agenda at a time. This is an independent organization that focuses on taking money from a fund generated from power bills and utilizing it to fix people's homes - people who are often the victims of other social and economic challenges who need help meeting their expenses every month.

Councilwoman Cape moved for the adoption of a resolution favoring an independent energy efficiency administrator for the State of North Carolina. This motion was seconded by Councilman Newman.

Councilman Newman offered a friendly amendment to the resolution that it be clarified that this resolution is not meant to indicate a lack of support for the energy efficiency programs that are being implemented and developed by North Carolina's utility companies but that this is meant to compliment the initiatives by the State's utility companies with an independent energy efficiency organization. Councilwoman Cape accepted the friendly amendment.

Councilman Miller supported the resolution but noted there is a lot of open-ended dialogue in Section 2 of the resolution causing him some concern. He hoped that at the state level they would look closely at that language.

Vice-Mayor Davis felt he could not support the resolution in that it was too open-ended for his comfort.

The amended motion made by Councilwoman Cape and seconded by Councilman Newman failed on a 3-3 vote, with Vice-Mayor Davis, Councilman Mumpower and Councilman Russell voting "no."

O. RESOLUTION APPOINTING A MEMBER TO THE URTV INC. BOARD OF DIRECTORS

Summary: The term of Sandra Bradbury, as a member of the URTV Inc. Board of Directors, will expire on June 30, 2009.

On June 9, 2009, it was the consensus of Council to appoint Ms. Dale Joyner to serve a two-year term, term to expire June 30, 2010, or until her successor has been appointed.

Mr. Alan Rosenthal contested Ms. Joyner's appointment to the URTV Inc. Board of Directors. He presented Council with documents supporting his opinion why he didn't think she was fit to be on the Board.

Councilman Mumpower moved to postpone action on this item and refer it to the Boards & Commissions Committee. This motion was seconded by Councilwoman Cape and carried unanimously.

III. PRESENTATIONS & REPORTS:

A. RESOLUTION NO. 09-135 - RESOLUTION ADOPTING THE FINAL INTERNAL SUSTAINABILITY MANAGEMENT PLAN AS THE STRATEGIC PLAN FOR MUNICIPAL SUSTAINABILITY GOALS AND ACTIVITIES

Energy Coordinator Maggie Ullman said that this is the consideration of a resolution to approve the Internal Sustainability Management Plan (SMP) as the strategic document to guide internal sustainability initiatives.

In April 2007 City Council passed a resolution committing to reduce the municipal carbon footprint 80% by the year 2050 and requiring a strategic plan to lead this effort. The internal SMP brings together the organization's carbon footprint reduction policy and the sustainability initiatives of various departments in a coordinated and comprehensive plan. The outcome of this internal sustainability management plan is a consensus-based set of 23 sustainability goals, a comprehensive list of 107 prioritized action items, and an implementation plan for moving forward.

She summarized the plan reviewing the snapshot of carbon footprint, assessment of existing activities, and opportunities for improvement. The implementation strategy is (1)

determine annual priorities by department; (2) develop a staff green team; (3) use opportunity ranking tools; and (4) annual Council approval of resource allocations.

The full plan and the executive summary of the plan can be reviewed online at www.ashevillenc.gov/green.

This action complies with the following areas of the City Council Strategic Operating Plan: (1) Expand community education programs to attract volunteers to initiatives, including climate awareness, water conservation, recycling, storm water and sustainability; (2) Operate the City of Asheville's organization to the highest fiscal responsibility; (3) Achieve short term and long term goals to reduce city carbon emissions by 2% per year; (4) Receive and evaluate the Energy Management Plan for conservation, technology and retrofitting, and sustainability management; and (5) Develop a long-term plan to address the City's aging infrastructure including facilities and sidewalks.

The Sustainability Advisory Committee on Energy and the Environment (SACEE) reviewed the plan and recommends adoption of the plan by City Council.

Pros:

- Save taxpayer dollars through energy efficiency and transportation initiatives
- Demonstrate leadership through planning and implementing sustainability programs
- Improve air quality and public health through reduction of emissions associated with municipal actions

Con:

- Availability of resources will determine the rate at which the plan is implemented

There is no direct fiscal impact with adopting the internal Sustainability Management Plan. Any financial decision associated with implementing the plan will be brought forth to Council through the budgetary process.

City staff recommends City Council adopt a resolution approving the internal Sustainability Management Plan for use as the guiding document for staff to achieve carbon footprint reduction goals.

When Vice-Mayor Davis asked for public comments, none were received.

At this time, Mayor Bellamy arrived at the meeting and Vice-Mayor Davis turned the gavel over to her.

Councilman Newman moved for the adoption of Resolution No. 09-135. This motion was seconded by Councilwoman Cape.

Throughout discussion, Ms. Ullman responded to various questions/comments from Council, some being, but are not limited to: will you have measurable numbers in the goals and objectives for the plan and if not, why; what are the total utility costs for the City; and how much did the study cost and how much staff time was invested in the study.

In response to Councilman Mumpower, Ms. Ullman explained that while there are other models, our plan is different in that it provides tools for implementation. She also noted that our plan will be very helpful to other community organizations who will look to our plan for our leadership.

Councilman Mumpower was pleased that staff will pursue measured results. However, he does not find plans terribly productive. He felt they are expensive and sit on a shelf and collect dust. He felt that if the City wants to do better with conservation of energy, he suggested (1) incentivizing our employees and asking for their suggestions; and/or (2) look for ways to reduce the number of fire department calls for service, since Asheville has roughly twice the calls of a city of our size. He pointed out that Council adopted a Solid Waste Management Plan 10 years ago and the plan was not put to productive use since we have actually increased our solid waste by a significant number.

Upon inquiry of Councilwoman Cape, City Manager Jackson said that this Plan is extremely beneficial to the City. The process of getting to this product built an awareness and education that has brought significant tools to our process. We are a leader in this area but if we want to achieve Council's goal to be green, we need a top notch plan.

Mayor Bellamy looked forward to the Mountain Green Conference which will be held tomorrow. In Raleigh, she spoke with the Secretary of the Dept. of Environment and Natural Resources and he pointed out that his department did not have a plan for the Clean Smokestack Act but that plan would be developed. In addition, she spoke with the Deputy Secretary of Commerce and noted that the State Energy Office will be moving to the Department of Commerce. One of the things they will be tracking is energy dollars that are coming through the recovery program and how it will be spent. They also will develop a plan. She stressed that planning is important. With our Plan, it will track the dollars and results and provide that transparency to the community.

Mayor Bellamy asked for a friendly amendment to the motion that Council receive quarterly updates in their quarterly status reporting on how this Plan is being implemented. Councilman Newman and Councilwoman Cape accepted the friendly amendment.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Newman moved for the adoption of Resolution No. 09-135, with the amendment that Council receive quarterly updates in their quarterly reporting on how this Plan is being implemented. This motion was seconded by Councilwoman Cape and carried on a 6-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 32 – PAGE 105

B. ECONOMIC STIMULUS PACKAGE UPDATE

RESOLUTION NO. 09-136 - RESOLUTION TO APPROVE LOAN FROM THE CITY'S HOUSING TRUST FUND TO THE HOUSING AUTHORITY OF THE CITY OF ASHEVILLE

MOTION TO AUTHORIZE THE CITY TO SUBMIT AN APPLICATION TO THE DEPARTMENT OF HOMELAND SECURITY'S ASSISTANCE TO FIREFIGHTERS FIRE STATION CONSTRUCTION GRANTS FOR THE CONSTRUCTION OF ONE NEW FIRE STATION AND REHABILITATION OF AN EXISTING FIRE STATION

MOTION TO AUTHORIZE THE CITY TO SUBMIT AN ENERGY EFFICIENCY AND CONSERVATION STRATEGY TO RECEIVE ENERGY EFFICIENCY AND CONSERVATION BLOCK GRANT ENTITLEMENT FUNDING

Ms. Lauren Bradley, Assistant to the City Manager, updated Council on the following applications for the economic stimulus package.

She said that as part of city staff's recurring ARRA update to Asheville City Council, staff is seeking Council consideration of three items including:

- A resolution allocating $40,000 in Housing Trust Fund (HTF) financing to the Housing Authority of the City of Asheville in support of a federal grant opportunity available through the Public Housing Capital Fund Program (PHCFP) under ARRA to create 10 handicapped accessible units in the Aston Park Towers development;

- Authorization for the city to submit an application to the Department of Homeland Security's Assistance to Firefighters Fire Station Construction Grants (SCG) for the construction of one new fire station and rehabilitation of an existing fire station, and;

- Authorization for the city to submit an Energy Efficiency and Conservation Strategy to receive Energy Efficiency and Conservation Block Grant (EECBG) entitlement funding.

Housing Trust Fund Application - Housing Authority Aston Park Tower

Councilman Newman asked to be excused from participating in this action due to a conflict of interest. Therefore, Councilwoman Cape moved to excuse Councilman Newman from participating in this action due to a conflict of interest. This motion was seconded by Councilman Mumpower and carried unanimously.

The Housing Authority of the City of Asheville (HACA) is requesting a $40,000 loan from the Housing Trust Fund for the renovation of ten (10) units in Aston Park Tower at 165 S. French Broad Avenue to create handicap accessibility as required under the Uniform Federal Accessibility Standards (UFAS). The total project development cost is $678,500 of which $638,500 will be entirely funded by federal grant funds. The PHCFP guidelines require a minimum 5% match from non-public housing funds. HACA will be in the best position to receive funding if the commitment of HTF loan funds can be secured prior to submission of the application.

The terms of the loan as requested are $40,000 for 15 years at 2% interest. The per unit subsidy is extremely low at $4,000 and the HTF funding would be highly leveraged at $16 per dollar invested. The lack of ADA accessible units in Aston Park Tower was noted as a key deficiency in a recent study. The project will serve tenants earning less than 60% of the area median income. HACA has committed to retaining these rent standards throughout the term of the loan. Repayment will be made from the entire project revenue and will not be limited to the rents received on the ten (10) rehabilitated units. It should be noted that the proposed rehabilitation will result in the net loss of three (3) public housing units.

The Aston Park Tower has been part of the HOPE VI grant application discussion and the long term plans for the building have not yet been finalized. HACA has agreed to refrain from drawing HTF funds until the HOPE VI analysis has been completed. No funds will be spent if it is determined that the preservation of the Tower is not feasible.

The Housing and Community Development Committee reviewed the proposal at a special meeting on June 9, 2009 and is supportive of the request. There is a current available balance in the Housing Trust Fund of $72,275.

Pros:

- Allows the City to heavily leverage scarce housing resources.
- Provides ADA accessible units in a public housing project designated for the elderly and disabled.
- Provides 15 years guaranteed affordability on the subject units for tenants below 60% AMI.

- If grant application is not successful, funds can be reallocated to another eligible project.

Cons:

- The inability to mortgage public housing developments requires that another property be secured as collateral.
- The long term future of the Tower has not yet been decided so the benefit may be short lived.
- Construction cost estimates have not yet been documented.

This action complies with the Strategic Operating Plan in that the project is supportive of the City's goal of providing safe and decent affordable housing units to the citizens of Asheville. This action is also supportive of the City Council 2008-09 Strategic Plan in that the project will aid in offering a standard of living that is affordable and attainable for people of all income levels, life stages, and abilities.

Funding for the Housing Trust Fund has been previously appropriated. The current balance in the Trust Fund is $72,275.21. The remaining available balance if the project is funded at the terms requested will be $32,275.21.

As recommended by the HCD Committee, the Staff recommends adoption of a resolution authorizing the City Manager to approve a Housing Trust Fund loan in the amount of $40,000 to the Housing Authority of the City of Asheville at the terms requested.

When Mayor Bellamy asked for public comments, none were received.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Mumpower felt we will be using borrowed money that will need to be paid back by our children and grandchildren.

Councilwoman Cape spoke in support of the action.

Councilwoman Cape moved to adopt Resolution No. 09-136. This motion was seconded by Councilman Miller and carried on a 5-1 vote, with Councilman Mumpower voting "no". Councilman Newman was excused.

RESOLUTION BOOK NO. 32 – PAGE 107

Department of Homeland Security's Assistance to Firefighters Fire Station Construction Grants (SCG)

Staff is seeking City Council authorization to submit an application to the Department of Homeland Security's Assistance to Firefighters Fire Station Construction Grants (SCG). The grant will provide financial assistance directly to fire departments on a competitive basis to build new or modify existing fire stations in order for departments to enhance their response capability and protect the community they serve from fire and fire-related hazards. The authority for SCG is derived from the American Recovery and Reinvestment Act (ARRA) of 2009 (Public Law 111-5). Congress appropriated a total of $210 million for this Fiscal Year (FY) 2009 program. The proposals must not exceed $5 million per project and can not total more than $15 million per agency.

Asheville Fire and Rescue is seeking permission to submit applications through the grant for the construction of one new fire station and the rehabilitation of an existing fire station. The new fire station will be constructed on city owned land off of Sandhill Road. This fire station was approved in the FY 2008/2009 5-year CIP adopted budget for FY 2009/2010; however the project

is currently unfunded. The rehabilitated fire station located at 300 Merrimon Ave. will increase standard of cover service levels by allowing a fire company to operate out of this station. The CFAI Accreditation process has identified this area as needing improvement.

Applications are due by July 10, 2009. Funding is awarded to individual projects based on the merits of the proposal.

Pros:

- Access to DHS funds will allow the City of Asheville to complete two important projects that will increase levels of service.
- DHS will fund 100% of the construction projects, which are currently unfunded needs.
- Asheville Fire and Rescue's Standard of Cover will increase from 47% to 100% in the area that will be served by the rehabilitated fire station.
- The Sandhill Road project is a strong candidate for this grant due to the shovel ready site and plans that are already available. The 300 Merrimon Avenue project is a strong candidate for this grant due to the significant service level increases that it will provide.
- The projects will pursue LEED certification.
- No staff or apparatus will be immediately needed as existing fire companies could be re-deployed.

Con:

- Grant funding does not include furniture, so there will be a minimal so there will be a minimal cost associated to furnish the stations.

Submission of these projects meets City Council's strategic goal to proactively pursue funding through the federal economic recovery program. It also aligns with City Council's commitment in the 2008-09 Strategic Plan to be one of the safest and most secure communities when compared to other cities.

The City of Asheville will request $5 million for the Sandhill Road fire station project and $5 million for the rehabilitation of the Merrimon Avenue fire station project, for a total request of $10 Million. DHS will fund 100% of the construction projects, and existing fire companies will be re-distributed to staff these stations; therefore, there will be no direct financial impact to the City with the exception of purchasing furniture for each station. Furniture is not included in the grant, therefore there will be a minimal cost associated to furnish the stations.

City staff recommends that the Mayor and City Council authorize the staff to submit an application to the Department of Homeland Security's Assistance to Firefighters Fire Station Construction Grants (SCG) program.

When Mayor Bellamy asked for public comments, none were received.

Councilman Mumpower felt we will be using borrowed money that will need to be paid back by our children and grandchildren. Councilman Mumpower felt we should pay for this out of our own tax base.

Councilman Newman moved to authorize staff to submit an application to the Department of Homeland Security's Assistance to Firefighters Fire Station Construction Grants (SCG) program. This motion was seconded by Vice-Mayor Davis and carried on a 6-1 vote, with Councilman Mumpower voting "no."

Energy Efficiency and Conservation Block Grant (EECBG)

The EECBG program through the Federal Department of Energy (DOE) is funded for the first time through ARRA. The City of Asheville has been allocated $804,700 of entitlement funds

through this program. The funds must be committed within 18 months of receipt of award and expended within 36 months. The primary goals for use of this funding include: job creation, energy reduction, renewable energy production, carbon emissions reduction, and partnership creation. DOE requires cities to submit an Energy Efficiency and Conservation Strategy for their consideration before funds will be released. This strategy is due June 25, 2009.

As part of the Energy Efficiency and Conservation Strategy submitted to DOE, Asheville must identify how the funds will be used for specific projects and programs. Staff has evaluated several programs and projects that coincide with the goals established in the internal Sustainability Management Plan. After thorough analysis and a collaborative decision making process, staff selected the following programs to recommend for Council approval:

Funding Category	Program Description	Project Funding	% of total allocation
$224,700	**Internal Sustainability Programs**		
	Bike Sharing Program for City staff	$13,500	**2%**
	Solar thermal for Fire Station	$16,000	**2%**
	Building Inspector and Building Maintenance Energy Efficiency Training	$35,000	**4%**
	Sustainability Outreach Coordinator	$35,000	**4%**
	Civic Center Banquet Hall HVAC Replacement	$125,000	**16%**
$250,000	**Internal Energy Revolving Fund**		
	Fire Station 8 Windows and Insulation Retrofit	$50,000	**6%**
	IT Server Downsizing	$100,000	**12%**
	City Hall Lighting Retrofit	$100,000	**12%**
$250,000	**Competitive grants for community projects ***	$250,000	**31%**
$ 80,000	**Grant administration**	$80,000	**10%**
$804,700	**TOTALS**		**100%**

* Guidelines for these awards will be determined after necessary guidance is provided by the Federal Department of Energy.

At its May 5, 2009, meeting, the City Council Finance Committee reviewed preliminary details released about the EECBG program. At that point, the Finance Committee: (1) set the amount of funds available for a community sub grant process at $250,000, the maximum amount allowable under the program; (2) directed staff to come back to the full Council with recommendations for funding caps for awards made through the community sub grant process, and; (3) designated the Housing and Community Development Committee to serve as the oversight and review board for making awards through the community sub granting process.

It is staff's recommendation that the community sub grants be awarded through a competitive application process based on defined criteria and measurement requirements. Staff recommends that one award be made up to $100,000 to a model program that maximizes community collaboration with significant community impact. Staff further recommends that the remaining three to six grants range from a minimum award of $25,000 up to a maximum award of $50,000 for programs that meet selection criteria. These funding parameters are recommended

to maximize the impact of community projects while taking into consideration the staffing resources needed to track and monitor grant awards according to ARRA requirements.

Pros:

- Approval of the programs and projects for the Energy Efficiency and Conservation Strategy will ensure continuation of the EECBG application process. If awarded, the City of Asheville will receive funding to move forward programs and projects that support sustainability goals set forth by City Council, thereby realizing energy and cost savings.

Cons:

- If the programs and projects are not approved, the application process and funding potential for these projects will not move forward, and the City of Asheville will lose the opportunity to receive entitlement funding for Council's strategic initiative.

Approval of these projects meets City Council's strategic goal to proactively pursue funding through the federal economic recovery program. It also aligns with City Council's commitment in the 2008-09 Strategic Plan to be the southeastern leader in clean energy and environmental sustainability.

The City of Asheville will receive $804,700 in EECBG entitlement funds if the Energy Efficiency and Conservation Strategy is approved and submitted as described. Of this amount, $250,000 will be sub granted to community programs and projects, $474,700 will be invested in internal City of Asheville sustainability initiatives, and $80,000 will be used for grant and project administration. There are no local matching requirements for this funding.

City staff recommends that the Mayor and City Council: (1) authorize staff to submit the Energy Efficiency and Conservation based on the program breakdown provided and (2) determine that the Housing and Community Development Committee manage the community sub grants process such that awards are made through a competitive application process based on defined criteria with one award made up to $100,000 and three to six awards ranging from $25,000 and $50,000.

Mr. Mike Soule, representing Asheville on Bikes, encouraged Council to adopt the bike sharing program for City staff in order to advance our City's commitment to sustainability.

Upon inquiry of Mayor Bellamy, Ms. Bradley and Energy Coordinator Maggie Ullman explained how the bike sharing program for City employees was developed and what the $13,500 included.

Councilwoman Cape moved to (1) authorize staff to submit the Energy Efficiency and Conservation based on the program breakdown provided, but encourage staff to revisit the bike sharing program for enhanced efficiencies; and (2) determine that the Housing and Community Development Committee manage the community sub grants process such that awards are made through a competitive application process based on defined criteria with one award made up to $100,000 and three to six awards ranging from $25,000 and $50,000. This motion died for a lack of a second.

After a brief discussion, initiated by Mayor Bellamy, it was the consensus of Council to support Mayor Bellamy's suggestion that we look for transit dollars or another local source for the bike program and reprogram the $13,500 into the sustainability outreach coordinator position for education outreach of energy conservation, water, stormwater, recycling, sewer, etc. while partnering with the Metropolitan Sewerage District on the sewer education outreach.

Councilman Russell moved to (1) authorize staff to submit the Energy Efficiency and Conservation based on the program breakdown provided, except that we look for transit dollars or another local source for the bike program and reprogram the $13,500 into the sustainability

outreach coordinator position for education outreach of energy conservation, water, stormwater, recycling, sewer, etc. while partnering with the Metropolitan Sewerage District on the sewer education outreach; and (2) determine that the Housing and Community Development Committee manage the community sub grants process such that awards are made through a competitive application process based on defined criteria with one award made up to $100,000 and three to six awards ranging from $25,000 and $50,000. This motion was seconded by Councilman Miller and carried on a 6-1 vote, with Councilman Mumpower voting "no."

RESOLUTION NO. 09-142 – RESOLUTION TO AFFIRM REQUIRED ASSURANCES AND AGREEMENTS AND DESIGNATE AN AUTHORIZED REPRESENTATIVE TO FILE THE APPLICATION, TO MAKE NECESSARY CERTIFICATIONS, AND EXECUTE SUCH AFFIDAVITS AS ARE REQUIRED BY THE RULES AND REGULATIONS

Ms. Lauren Bradley, Assistant to the City Manager, said that to receive Economic Stimulus Funding from the State, the Water Resources Department must submit a Governing Board Resolution to the N.C. Treasurer's Office by June 26th, 2009, that contains exact wording outlining the City's responsibilities with respect to the Pumping System Installation Water Stimulus Project.

On February 27, 2009, Water Resources submitted four Council-approved applications for ARRA Funding for projects totaling $4,410,990. The department was notified that no funding would be awarded. However, on June 22nd, 2009, the department was notified that one project may be funded if more paperwork is submitted by June 26th, 2009. The additional paperwork must include a signed resolution with exact wording as dictated by the State.

The project selected by the state is the Pumping System Installations Project in the amount of $510,000. This project will include replacement of the North Fork Water Treatment Plant High Service Pump, replacement of the Black Mountain High Service Pumps, and installation of an automatic valve on a 24-inch water line to control water volume to the south end of the water distribution system. This project replaces large, inefficient pumps with smaller, more efficient pumps to reduce the energy needed to distribute water. The total amount requested, $510,000, includes materials, installation, engineering, a project contingency, and a departmental fee. The department will be expected to fund 50% of that amount, or $255,000.

This project is part of City Council's strategic plans to create jobs to aid in economic recovery, improve city infrastructure, and promote the green sustainable initiative.

Pro:

- Approval of this resolution should allow the department to receive reimbursement of 50% of the total cost, or $255,000, for the Pumping System Installations Project.

Con:

- If this resolution is not approved, Water Resources will not receive any outside funding for this project.

If this project is approved by the State, the Water Resources Department will be required to provide 50% of the funds, which would be approximately $255,000. These funds have already been requested in the Fiscal Year 2010 Capital Improvement Projects budget.

Water Resources staff recommends that the Mayor and City Council authorize the resolution outlining the City's responsibilities with respect to the Pumping System Installation Water Economic Stimulus Project.

When Mayor Bellamy asked for public comments, none were received.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Russell moved to adopt Resolution No. 09-142. This motion was seconded by Councilwoman Cape and carried on a 6-1 vote, with Councilman Mumpower voting "no".

RESOLUTION BOOK NO. 32 – PAGE 115

At 7:03 p.m., Mayor Bellamy announced a short recess.

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER REZONING PROPERTY LOCATED AT 128 BINGHAM ROAD FROM INDUSTRIAL DISTRICT TO COMMERCIAL INDUSTRIAL DISTRICT

ORDINANCE NO. 3747- ORDINANCE REZONING PROPERTY LOCATED AT 128 BINGHAM ROAD FROM INDUSTRIAL DISTRICT TO COMMERCIAL INDUSTRIAL DISTRICT

Mayor Bellamy opened the public hearing at 7:25 p.m.

Urban Planner Blake Esselstyn said that this is the consideration of an ordinance rezoning 128 Bingham Road from Industrial District to Commercial Industrial District. This public hearing was advertised on June 12 and 19, 2009.

Mr. Esselstyn said that this 23-acre site, though still referred to by many as the Square D Plant, has undergone a noteworthy change since the departure of that manufacturer. The property is now named the Blue Ridge Business Center, and while a manufacturing operation (Aprotech Powertrain, a maker of engine parts) continues to occupy a large portion of the building, there is increasing interest by non-industrial uses in areas of the facility. The area's current zoning classification, Industrial, does not lend itself easily to this mix of uses, and thus the owner is requesting a rezoning to Commercial Industrial.

According to the Unified Development Ordinance (UDO) Article 8, the purpose of the Industrial District is to "reserve land for existing and future industrial activities and for land uses that support industrial activities. Development standards are established to ensure that land uses located outside the Industrial District are not adversely affected by the negative impacts of industrial uses. Industrial Districts shall be located to capitalize on existing infrastructure where possible, such as transportation facilities and utilities. Supporting land uses are characterized as providing supplies, raw materials, transportation, or storage services to industries or providing services to industrial employees."

The stated purpose of the Commercial Industrial district (also known as CI) is "to provide areas for a wide range of commercial and industrial uses including: light manufacturing, wholesale, warehousing, services, retail sales, offices, and residential uses. The district is established where environmental conditions and urban infrastructure are adequate to support commercial and industrial development." Further, "assembly, packaging, processing, production and manufacturing" uses are permitted in CI, as in Industrial; the only industrial uses permitted in the Industrial district but not in CI are recycling plants and certain other types of recycling facilities. With regard to open space, however, the Commercial Industrial district is more restrictive than the Industrial; the IND district is exempt from the open space requirements applied to most other districts (including CI).

The site constitutes the majority of a block encircled by three roads: Bingham Road, Adams Hill Road, and Pearson Bridge Road, though there is no entrance to the property from

Pearson Bridge Road. (The other property on the block is Emma United Methodist Church.) The building contains almost 300,000 square feet of floor area, and the site provides almost 7 acres of vehicular use area. The site is situated just inside City Limits, and has been in the City's jurisdiction since 1981.

The applicant's request for Commercial Industrial zoning stems from a desire to be able to attract a wider range of possible tenants. The Industrial zoning district allows relatively few commercial uses, and does not include general retail sales, general office uses, medical clinics, or residential occupation by non-employees in the list of permitted uses. In recent years, the City has permitted some office uses on the site with the requirement that they remain subordinate to the principal manufacturing use of the property. However, the Business Center has attracted two employers providing new jobs in the area (a VA call center and a Census Bureau office), and would like to be able to expand the floor area available for such uses as well as for potential future retail options.

In May of 2008, a Level II site plan review was undertaken for this site, for the renovation of 52,449 square feet of the facility into offices subordinate to the primary manufacturing use, and an additional 451 square feet of new floor area. The improvements related to the original project are still in progress. It was noted at the time that for a larger scale conversion of the building for other uses, a rezoning would have to be pursued. A conditional zoning was discussed, but the applicant would prefer to have the adaptability of not being committed to a specific plan for future modification.

As is noted in the sections above, the Comprehensive Plan includes a policy stating that Industrially zoned land should be preserved for industrial uses. This is further emphasized in the Sustainable Economic Development Strategic Plan that identifies a shortage of industrial zoned properties as one of its top priority issues to be addressed in our area. However, there are recent precedents, most notably the BASF plant rezoning in January of this year, for City Council approval of similar zoning changes. Two other 30+ acre areas were recently rezoned from Industrial to Residential zoning districts.

After recent rezonings of industrially-zoned land were approved despite the City's adopted policy, City Council felt that stakeholders should be consulted about their perspective on the policy given changing views about the future of this region's economy. Director of the Office of Economic Development Sam Powers attended these discussions, and, applying the findings to the similar BASF rezoning, stated that "OED staff feels a case can be made for recommending approval." Mr. Powers has also attended discussions related to this rezoning petition and expressed the same position.

One further characteristic of this site which renders it less suitable to be fully occupied by a modern large-scale manufacturing operation is that it is served by relatively small roads and does not have convenient access to any nearby interstate for large trucks. The owner's inability to offer such a feature to a potential industrial tenant compounds their need to be able to recruit non-industrial tenants less dependent on large truck traffic.

At their June 3, 2009, the Planning and Zoning Commission voted unanimously to recommend approval of the proposed rezoning.

As of this writing, staff has received no communications from the public regarding this rezoning.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Pros:

- Proposed zoning district is compatible with the surrounding area.

- Rezoning could encourage development and further job growth.
- Site's road access makes it less than ideally suited for modern large Industrial tenants.
- CI zoning district would require open space preservation, unlike current zoning.

Con:

- The Comprehensive Plan, as well as the Sustainable Economic Development Strategic Plan, includes a stated policy to preserve Industrially zoned land for industrial uses.

Staff has concerns about rezoning Industrially-zoned land, due to the policies against such action stated in the Comprehensive Plan and other plans. Both the Planning and Zoning Commission and City Council have, however, supported similar rezoning in the recent past, and since 2006 stakeholders have not expressed significant concern about the rezoning of such land to Commercial Industrial. If the City Council wishes to consider this rezoning independent of the existing policies, staff feels a good case can be made for recommending approval.

Ms. Donna Logan, representative of the owner of Blue Ridge Business Center, urged Council to support the rezoning in that she was pleased to see the building being brought back to life and provide jobs and a tax base for the City.

Mr. Carroll Hughes, architect with Spaceplan Architects and project manager for the project, felt changing the complexion, the use and the visual characteristics of the industrial building will make it a much better neighbor. It will also recycle the building instead of demolishing it. With the Industrial zoning there is no requirement for open space, but with this requested rezoning they will have almost 4 acres of open space. He urged the Council to support the rezoning.

Mayor Bellamy closed the public hearing at 7:34 p.m.

When Councilman Mumpower noted that the Comprehensive Plan, as well as the Sustainable Economic Development Strategic Plan, policies state that we should preserve industrially zoned land for industrial uses, Mr. Esselstyn said that after staff discussion, it was staff's recommendation that these projects be reviewed on a case by case basis, recognizing the overall policy is a sensible one.

In response to Councilwoman Cape, Economic Development Director Sam Powers felt that this rezoning allows for greater flexibility since it does not preclude most of the uses in the industrial district.

There was a brief discussion, initiated by an observation by Councilman Newman, of a possible policy amendment for industrially zoned properties having greater flexibility. City Manager Jackson felt it would be appropriate for the Planning & Development Director meet with the Planning & Economic Development Committee to review a map of the industrially zoned areas along with a brief assessment of each property.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilwoman Cape moved for the adoption of Ordinance No. 3747. This motion was seconded by Councilman Russell and carried unanimously.

ORDINANCE BOOK NO. 25 – PAGE 316

B. PUBLIC HEARING TO CONSIDER A SIGNAGE PLAN AMENDMENT FOR THE INGLES DEVELOPMENT PROJECT LOCATED AT 85 TUNNEL ROAD

TO ALLOW FOR A 16 SQUARE FOOT, WALL-MOUNTED "STARBUCK'S" SIGN TO THE INGLES ON 1141 TUNNEL ROAD

ORDINANCE NO. 3748 - ORDINANCE AMENDING THE SIGNAGE PLAN AMENDMENT FOR THE INGLES DEVELOPMENT PROJECT LOCATED AT 85 TUNNEL ROAD TO ALLOW FOR A 16 SQUARE FOOT, WALL-MOUNTED "STARBUCK'S" SIGN TO THE INGLES ON 1141 TUNNEL ROAD

Mayor Bellamy opened the public hearing at 7:51 p.m.

Assistant Planning & Development Director Shannon Tuch said that this is the consideration of an ordinance amending the approved signage plan to apply a specific sign detail to the store located at 1141 Tunnel Road (Oteen). This public hearing was advertised on June 12 and 19, 2009.

On September 25, 2007, Asheville City Council approved the sign package presented for the two separate Ingles developments located on Hendersonville Road and Tunnel Road respectively. The plan included both attached and freestanding signage including:

- Multiple signs for the principal Ingles supermarket (Ingles, American Owned, Fresh Foods, Café, Video, Pharmacy Drive-thru)
- Attached signage for a convenience store (The i Market)
- Attached signage for the retail gasoline sales (Gas Express)
- Attached signage for the car wash (Laser Wash)
- Free-standing monument sign for Ingles
- Free-standing sign for Gas Express

Additionally, the plan included a Starbuck's franchise sign for only one of the two stores and was later amended to include the second store once the franchise was obtained. The applicant is now seeking to add the same Starbuck's franchise sign to the Oteen store. The applicant is not prepared to add other signs to this request at this time.

The "Starbuck's" franchise sign is identical to that approved with the original application and will be a 16 square-foot wall-mounted sign, located at one end of the store.

In context with the approved package, the additional request is in keeping with the stated intent and purpose for the signage.

Regarding the City Council Strategic Operating Plan, this proposal most closely supports the goal of ***sustainability*** through improved identity and advertisement supporting the economic viability of the overall project.

Pro:

- Provides identification of a franchise business located inside the larger grocery store.

Con:

- Contributes to the proliferation of signage along the city's corridors.

There is no direct fiscal impact to the City has been identified.

Staff recommends City Council approve the signage plan amendment for the Ingles development project located at 85 Tunnel Road to allow for a 16 square foot, wall-mounted "Starbuck's" sign at their 1141 Tunnel Road store.

A representative of Ingles Markets spoke in support of this amendment noting that this is an on-going program to enhance Ingles services.

Upon inquiry of Mr. Paul Van Heden, the Ingles representative said that this sign will be identical to the other Starbuck's signs on other Ingles.

Mayor Bellamy closed the public hearing at 7:57 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Russell moved for the adoption of Ordinance No. 3748. This motion was seconded by Councilman Mumpower and carried unanimously.

ORDINANCE BOOK NO. 25 – PAGE 318

V. UNFINISHED BUSINESS:

A. MOTION TO ACCEPT THE RECOMMENDATIONS OF THE REPORT ON CIVIL SERVICE LAW REVISIONS

Mayor Bellamy said that earlier in this legislative session, Senate Bill 556 (Civil Service Law) was introduced in Raleigh and subsequently passed through the Senate and is now being considered in the House of Representatives. She said that she, Vice-Mayor Davis and Councilman Mumpower met on June 5, 2009, with NC General Assembly members Senator Martin Nesbitt and Representative Susan Fisher, and representatives of the police/fire organizations to discuss proposed changes to Asheville's Civil Service Law (SB 556).

The Asheville City Council also assembled a Blue Ribbon Commission to review the Civil Service Law in February, 2009. This Commission provided suggested changes to the existing Law based on a Best Practices analysis on May 12, 2009, for City Council's consideration.

Suggested changes requiring outside legal counsel and clerk recording services impact the General Fund in Fiscal Year 2009-10 at $100,000.

The proposed changes and how those changes were incorporated into the City's proposed revision of the draft Senate Bill was provided to Council.

She said that she would be happy to outline the minutes resulting from the June 5, 2009, meeting, but due to the length and complexity of the issue, she said the only item that did not reach majority support was that police/fire representatives wanted the current law to remain trial de novo and City Council wanted to amend the language to have a review of the record. We are leaving that item up to Senator Nesbitt and our legislators to work out.

When Mayor Bellamy asked for comments from the public, none were received.

Vice-Mayor Davis moved to accept the recommends of the report made by Mayor Bellamy, Vice-Mayor Davis and Councilman Mumpower's revisions to the Civil Service Law. This motion was seconded by Councilman Mumpower and carried unanimously.

Mayor Bellamy said that these revisions will be provided to our State legislatures.

B. 2008-09 END OF THE YEAR BUDGET AMENDMENTS

ORDINANCE NO. 3749 - BUDGET AMENDMENT REGARDING AUTOMATED METER READERS

ORDINANCE NO. 3750 - BUDGET AMENDMENT REGARDING RANKIN AVENUE PARKING GARAGE RESTORATION

ORDINANCE NO. 3751 - BUDGET AMENDMENT REGARDING PURCHASE OF FIVE HYBRID BUSES

ORDINANCE NO. 3752 - BUDGET AMENDMENT REGARDING THE HEALTH INSURANCE PROGRAM

ORDINANCE NO. 3753 - BUDGET AMENDMENT REGARDING WORKERS COMPENSATION PROGRAM

ORDINANCE NO. 3754 - BUDGET AMENDMENT REGARDING CERTIFICATES OF PARTICIPATION BONDS, SERIES 1997C

Chief Financial Officer Ben Durant said that this is the consideration of the technical year-end budget amendments that are presented below.

Technical Amendment #1: Automated Meter Readers: $500,000

City Council approved funding in the Fiscal Year (FY) 2008-09 Water Resources Fund budget for the purchase of 2,500 automated meter readers (AMRs) to increase meter reading efficiency and reduce the department's carbon footprint from vehicle emissions. Staff anticipated that all of the funding for the AMRs would be spent in the 2008-09 fiscal year, so this expenditure was budgeted in the Water Resources operating budget instead of the capital budget. The purchase of the AMR's, however, was delayed while staff pursued Economic Stimulus Funding for this project. In the end, no stimulus funds were awarded for AMR purchase. Because the purchase of the AMRs was delayed, no purchase order was issued in the current year, and thus this funding will revert back to the Water Resources fund balance. Staff is requesting that Council amend the budget the Water Resources capital budget to allow for the carryover of $500,000 in AMR funding to FY 2009-10.

Technical Amendment #2: Rankin Garage Restoration: $500,000

The FY 2008-09 Parking Services adopted operating budget included $500,000 in debt service for the proposed parking garage at 51 Biltmore Avenue. Due to the timing of this project, no debt service payment will need to be made in FY 2008-09. At the April 14, 2009, City Council meeting, staff presented to Council a proposal to use this debt service savings to fund renovations to the Rankin Avenue Parking Garage. On April 14, Council approved staff moving ahead with procurement of engineering services for both the Rankin and Wall Street garage renovations. Staff is now requesting that Council amend the budget the Parking Service capital budget to allow for the carryover of $500,000 in AMR funding to FY 2009-10.

Technical Amendment #3: Hybrid Bus Purchase: $2,625,000

In 2008 City staff requested assistance from the N.C. Dept. of Transportation (NCDOT) to purchase five new hybrid buses. The City of Asheville was awarded $2.1 Million to acquire these buses in May 2008. The City requested 10% match contribution to the NCDOT and the funds were granted in the amount of $262,500. The City has allocated $262,500 as 10% match contribution from the transit capital fund. This technical amendment will allow for the establishment of the total $2,625,000 budget for this project.

Councilman Mumpower felt that since the technology for hybrid technology is in a high degree of influx and hybrid buses are dramatically more expensive, he could not support this budget amendment.

Upon inquiry of Mayor Bellamy, Director of Transportation and Engineering Cathy Ball explained the reasons why we are not purchasing compressed natural gas buses. She said that we don't have the infrastructure to gas the 150 gallon tanks, keeping parts for three types of buses would be expensive, and even though costs are higher for hybrids, the benefit of the carbon footprint associated with them is significantly different.

In response to Mayor Bellamy, Ms. Ball said that everything to date is just replacing existing buses.

Technical Amendment #4: Health Insurance Program: $1,400,000

As discussed with City Council during the Quarterly Financial Updates and Budget Presentations, the City has experienced a significant increase in health care costs over the last five years due to several factors, including an aging workforce, overall general inflation in health care costs, and the occurrence of a number of high dollar claims. In the current fiscal year, the total estimated costs for the health care program are expected to be $11.7 million, which is 10.7% higher than FY 2007-08 costs, and $1.4 million more than the original budget estimate of $10.3 million.

Staff is recommending that Council appropriate $1,400,000 million from the Health Care Program's fund balance to help cover the costs in the current fiscal year that have exceeded budget. As of June 30, 2008, the fund balance reserve for the Health Care Program was $2.6 million. The $1.4 million appropriation requested tonight will lower the estimated June 30, 2009, health care reserve to $1.2 million. The recommended level of reserves to protect against the volatility of the health care market and provide a sufficient "rainy day" is $4.5 million. Continued policy discussion is needed regarding the distribution of health care costs between the City and employees as well as the relative priority of the city's health care program compared to other programs.

When Councilman Mumpower asked about how the City will be planning to prevent this type of loss with the health care program in the future. Mr. Durant said it was his opinion that we have structural issues that need to be addressed and we need to engage in a rigorous prioritization process. With doing that rigorous prioritization process and making structural changes he felt we will continue to be in a situation where we are trying to catch up with health care. The prioritization process needs to occur throughout the year and as part of the budget process is a good starting point. There are some basic policy questions, e.g., how much of the health care program should be borne by employees vs. how much should be covered by the City, or how much should retirees be paying for health insurance in comparison to current employees, etc. He explained that staff will be looking at the health care program at the time of open enrollment and asking these type policy questions.

Councilman Mumpower expressed concern that problems might not be fixed if the City doesn't start looking at our health insurance fund until the January timeframe. He suggested a more timely deliberation on some of those policy matters raised and we need to begin looking for ways to save money.

In response to Councilman Russell, Mr. Durant said that it's only been recently (within the past 2-3 years) that the health care expenses began to outpace our budget. Prior to the past few years we have actually turned in money to the health care program. There is some volatility with health care that you can't predict. What we need to look at is our current trends going forward.

Mayor Bellamy asked that the health insurance program be placed on the agenda for the City Council's retreat.

City Manager Jackson said staff (1) needs to provide Council a white paper which outlines what we are currently doing, what policy issues we have with the health care plan and what our timeframe is for bringing those issues to Council, with recommendations; and (2) will update Council on the overall financial picture at Council's retreat and have recommendations for Council in the February-March timeframe which is before Council gives the information to staff to build a budget.

In response to Councilwoman Cape, Mayor Bellamy said that she has provided President Obama's Chief of Staff with a lot of data on the Asheville Project. When Council has their meeting with Mission Hospitals leadership next week, she will bring up the fact that the summit they held was highly attended by doctors and not a lot of other individuals at the table. She would recommend another summit be held to have a more inclusive agenda so that we can present a comprehensive white paper.

Technical Amendment #5: Workers Compensation Program: $95,000

The City's total FY 2008-09 budget for the Workers Compensation program, which includes funding for premiums, claims and administrative expenses, totals $1,134,000. In a typical year, this level of funding is adequate to cover all of the expenses in the program. In FY 2008-09, however, claims expenses have been slightly higher than anticipated. As a result, the budget needs to be increased by $95,000. Funding for this budget increase will be taken from the Workers Compensation fund balance reserves.

Technical Amendment #6: Certificates of Participation Bonds, Series 1997C: $166,140

In 1997, the City of Asheville issued COPs Series C in the amount of $2,612,367 to support the renovation of the Grove Arcade Public Market. Under an agreement with the Grove Arcade Public Market Foundation (GAPMF), GAPMF assumed responsibility for repayment of the debt service associated with the COPs. Based on the City's understanding of this agreement, the COPs debt was recorded in the City's financial reports as conduit debt. Conduit debt occurs when a governmental entity issues debt not for its own use but for the use of a third party, typically a not-for-profit, in this case the Grove Arcade. The governmental entity that issues the debt does not have any subsequent liability for repaying it; instead, the third party for whom the debt was issued is obligated to repay the debt directly to the bank trustee. Because the governmental entity is not the obligor, only limited disclosure of the debt is required in the governmental entity's financial statements.

The City has been making the annual debt service on the COPs since 1997, offset by payments from GAPMF to the City for reimbursement of the debt service, based on a separate agreement with City has with the GAPMF. Because the City interpreted this arrangement as conduit debt, our debt service payments were not included in the City's annual operating budget and only limited disclosure was provided in our financial statements. Recent research, however, has determined that this is not conduit debt but actually a direct obligation of the City. That is, the City is contractually obligated to make debt service payments directly to the bank trustee, and in case of default, bondholders would have recourse against the City not the Grove Arcade for fulfillment of the debt obligation. As such, the City will need to bring the debt on to its books in FY 2008-09. In addition to the reporting issue outlined above, there is also a funding gap that this amendment will address. In recent years, GAPMF has been unable to fully reimburse the City for the debt service payments, creating a net cost for the City.

At present, the outstanding balance for the COPs is $1,845,000. For FY 2008-09, the City will need to amend its operating budget to reflect an annual debt service payment on the COPs in the amount of $166,140. This additional budget expense will be partially offset with a $30,000 revenue payment that has been received from GAPMF. The City will have to

appropriate $136,140 in fund balance to cover the remaining amount of the payment for FY 2008-09. Prior to its adoption on June 23rd, staff will also adjust the Manager's Recommended FY 2009-10 Budget to include the debt service payments scheduled for next fiscal year.

The only amendment that will impact the City's General Fund fund balance is the appropriation for the COPs 1997 Series C. The City will appropriate $136,140 in fund balance to fund this amendment. This appropriation will lower the estimated year-end fund balance amount to $17,737,120 or 19.7%.

Mr. Durant responded to Councilman Newman when he asked how much has the GAPMF reimbursed the City over the past couple of years. He noted that City staff has had several discussions with the GAPMF about re-financing or helping in other ways to create opportunities for them to pay their debt payments.

In response to Councilwoman Cape, Ms. Ruth Summers, representing the GAPMF, explained that Progress Energy controls floors 2-5 in the Grove Arcade and they have a 99 year agreement with the City. The GAPMF has a 99 year lease to operate the ground floor. Her understanding of this loan was to basically be used for renovation costs when the building was originally renovated. Her records show that they have missed the full payment in 2007 and the remainder they owe for 2008 is $34,607. They have met with City staff and asked that the payment be restructured from a 20-year payment to a 40-year payment. It is her understanding that the payment has something to do with the City's bond rating, so they weren't able to accommodate them on that restructuring of the payment schedule.

Councilman Mumpower recalled that when the City undertook this partnership with other partners it was clear that the City would not acquire debt or responsibility for the Grove Arcade renovations. A plan was sold on the basis of visions of special success. He was concerned that City taxpayers are now being asked to pick up a significant tab for a nice project, but something we have been repeatedly assured would not come back to haunt City taxpayers.

In response to Councilman Newman, Mr. Durant briefly explained the way the payment was structured with the GAPMF. At the end of the 19-year term, there will be a balloon payment that they will make to catch up on the amount of principle and interest that the basic payment didn't cover. Any payment or partial payment they don't make will be added to that balloon payment that will be have to be caught up at the end of the amortization schedule. There is an expectation that the GAPMF, with the City's help, will continue to work towards fulfilling that obligation. The overall expectation is that the City of Asheville will be made whole by the end of this agreement, unless there is another policy decision made by City Council.

Councilwoman Cape felt that the City needs to invest in economic development. She supported the agreement moving forward and was proud that the City of Asheville made that investment in this wonderful asset for our community.

In response to Councilman Miller, Mr. Durant said that a standard procedure with balloon loans is that at the end of the term, you can re-finance the balloon payment.

Ms. Summers responded to Councilman Miller regarding the possibility of adding a special assessment to the tenants in the Grove Arcade. She noted that their occupancy is down and they must share in the 34% of the expenses for maintenance with Progress Energy.

Mayor Bellamy stressed that the City of Asheville is the owner of the Grove Arcade. It is our building and we worked with the GAPMF for them to renovate it and pay for it. To act as if we don't have any ownership is not true. She was on Council when the debt service was approved and she did not recall where the City of Asheville didn't expect to have ownership. She asked City Clerk Burleson to research the minutes on that point. She said it the taxpayers building and it is our responsibility to keep the building up. At the end of the day, if the GAPMF defaults, the

building is still our responsibility. The GAPMF went out and got Progress Energy to partner with them and fix up one of Asheville's assets.

Councilman Newman suggested the Planning & Economic Development Committee have a more detailed discussions on this issue.

City staff recommends City Council approve the technical year-end budget amendments.

When Mayor Bellamy asked if anyone from the public would like to speak on any of the year-end budget amendments, no one spoke.

Mayor Bellamy said that members of Council have been previously furnished with copies of the ordinances and they would not be read.

Vice-Mayor Davis moved for the adoption of Ordinance No. 3749. This motion was seconded by Councilman Russell and carried on a 6-1 vote, with Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 25 – PAGE 320

Councilman Miller moved for the adoption of Ordinance No. 3750. This motion was seconded by Councilman Russell and carried unanimously.

ORDINANCE BOOK NO. 25 – PAGE 322

Councilwoman Cape moved for the adoption of Ordinance No. 3751. This motion was seconded by Councilman Newman and carried on a 5-2 vote, with Vice-Mayor Davis and Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 25 – PAGE 324

Councilman Mumpower moved for the adoption of Ordinance No. 3752. This motion was seconded by Councilman Russell.

Councilman Mumpower withdrew his motion since there was no willingness on Council's part to address this issue on a more timely basis.

Councilman Russell then moved for the adoption of Ordinance No. 3752. This motion was seconded by Councilman Miller and carried on a 6-1 vote, with Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 25 – PAGE 326

Councilman Mumpower moved for the adoption of Ordinance No. 3753. This motion was seconded by Vice-Mayor Davis and carried unanimously.

ORDINANCE BOOK NO. 25 – PAGE 328

Councilman Miller moved for the adoption of Ordinance No. 3754. This motion was seconded by Councilman Russell and carried on a 6-1 vote, with Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 25 – PAGE 330

ORDINANCE NO. 3755 - BUDGET AMENDMENT TO ESTABLISH A BUDGET FOR THE RENOVATION COSTS ASSOCIATED WITH CONVERTING EXISTING SPACE IN

THE PUBLIC WORKS BUILDING INTO A ONE STOP SHOP FOR DEVELOPMENT SERVICES

Assistant City Manger Jeff Richardson said that this is the consideration of a budget amendment, in the amount of $390,000, to establish a budget for the renovation costs associated with converting existing space in the Public Works Building into a one stop shop for development services.

The Asheville City Council, through its annual strategic planning process, previously identified under the Focus Area of "Sustainable", as one key goal, the need to reform and streamline the development review process to improve the ease and efficiency of the customer's experience without compromising the quality of standards or other strategic goals. City staff have guided this process forward and is in the process of executing physical renovation efforts to the first floor of the Public Works Building, which when completed, will serve as the city's Development Services One Stop Shop.

Mr. Richardson then used a drawing to explain in detail the Development Services One Stop Shop.

In order to save costs, some of the demolition and renovation work will be completed by Building Safety staff. Estimated timeline to complete this project and open for services is August 31, 2009.

The anticipated cost for completing the necessary renovations in the Public Works Building is not to exceed $390,000. Funding for this project will come from a variety of City funds and departments as outlined below:

- **$100,000:** In FY 2007-08, funding was set aside in the Water Resources Capital Fund to pay for costs associated with the establishment of a one stop shop at Innsbruck Mall.

- **$40,000:** In FY 2008-09, City Council established a 4% technology fee surcharge that was added on to all development permits to create funding for technology projects that would enhance the development review process. To date approximately, $150,000 has been collected from this fee. $40,000 of this will be used for technology related items associated with establishing the one stop shop.

- **$50,000**: Stormwater Fund, staff has identified $50,000 in savings in the Stormwater Fund's FY 2008-09 professional services budget. This savings occurred due to a delay in the watershed study for Lower Ross Creek.

- **$200,000**: The City currently has approximately $220,000 available in its capital reserve fund from projects that were previously completed under budgeted.

Pros:

- Improves the customer experience by one physical location to provide for better coordination of the development review services currently provided by Building Safety, Planning, Engineering, Water Resources, and Fire & Rescue Departments.
- Utilizes existing city space through space redesign, thus significantly lowering initial cost estimates for this consolidated space design.
- Eliminates the city's need for leased space, thus further lowering budgetary impact.
- Provides opportunities for consideration for additional city space needs in city hall as certain development services are relocated to this facility.

Cons:

- Will reduce the amount of capital reserve funding available to fund other projects.

- Current space allocation at Public Works, due to size of building and services provided, will not allow for future expansion/growth.

The funding from the Water Resources Capital Fund, the technology fee, and the Stormwater Fund was previously budgeted and therefore there will be no impact on those funds. The $200,000 appropriation from the capital reserve fund will lower the amount left in that fund to approximately $20,000.

City staff recommends City Council approve the budget amendment in the amount of $390,000 to establish a budget for the renovation costs associated with converting existing first floor space in the Public Works Building into a Development Services One Stop Shop.

When Mayor Bellamy asked for public comments, none were received.

Mr. Richardson responded to various questions/comments from Council, some being, but are not limited to: are there any concerns about timing due to our economy; will there be additional staffing costs associated with this reorganization; and what happened to the fichus trees that were located in the lobby of the Public Works Facility.

In response to Councilman Mumpower, City Manager Jackson said that the point of urgency on this is we are here for no other reason than to serve the community. The community demands efficiency and customer friendly. For developers and people who want to invest in our community, they need this now more than ever, as it will save them time and money.

Councilwoman Cape noted that the timing on this going on line is perfect because she couldn't imagine putting City staff under this kind of pressure in full blown development mode.

In response to Councilwoman Cape, Mr. Richardson said that the Public Works Facility does not have any room for future expansion; however, an option could be relocation of the 2nd Floor activities.

City Manager Jackson recognized Mr. Richardson, Assistant Director of Building Safety Mark Case (project manager), and others for their work on this project and their leadership to relocate 70 people.

In response to Mayor Bellamy about staff in the Purchasing Division on Hunt Hill, Mr. Richardson said that with the relocation of 45 staff out of City Hall to Public Works, it does open up opportunities for other reorganizations and relocation of services. No decision has been reached short-range, but in our long-range plans along the South Charlotte Street corridor we have looked at Water Maintenance and hunt hill Purchasing with some redevelopment opportunities.

Mayor Bellamy felt that long-range plans should include how we can better utilize the Hunt Hill property, in that she felt there are great opportunities for some shared parking for the tourists and the development pattern over there. She also felt that the relocating of people from City Hall is an opportunity for Council to have offices in the City Hall building.

Mayor Bellamy wanted to make sure that all Unified Development Ordinance requirements, e.g., landscaping, signage, additional parking, etc., are covered in this budget amendment. If additional parking is required, she suggested contacting Mt. Zion Church. Mr. Case responded that this project will not trigger any additional needs.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the ordinance and it would not be read.

Councilwoman Cape moved for the adoption of Ordinance No. 3755. This motion was seconded by Councilman Russell and carried unanimously.

ORDINANCE BOOK NO. 25 – PAGE 332

C. ORDINANCE NO. 3756 - ADOPTION OF THE FISCAL YEAR 2009-10 ANNUAL OPERATING BUDGET

Chief Financial Officer Ben Durant said that this is the consideration of adoption of the Fiscal Year 2009-10 annual operating budget. Mayor Bellamy announced that the public hearing on the budget was held on June 9, 2009.

The Fiscal Year 2009/2010 Annual Operating Budget was formally presented to City Council on May 12, 2009. In accordance with the North Carolina Local Government Budget and Fiscal Control Act, a summary of the Budget along with a notice of the public hearing was published on May 29, 2009, and June 5, 2009. City Council conducted a public hearing on the budget on June 9, 2009.

Operating Budget Adjustments

The net proposed operating budget presented to City Council on May 12th was set at **$135,700,029**, including a General Fund appropriation of **$92,156,972**. Since the proposed budget was presented to City Council, there have been four adjustments that have altered the total of the budget that is presented to you tonight for your adoption.

1) **Increase in the Cost of Recycling Contract**: As discussed with Council at the June 9th meeting, the final cost for the FY 2009/2010 recycling contract exceeded initial budget estimates by **$132,957.** At that meeting, Council approved the contract and also approved increasing the monthly household recycling fee from $2.65 to $2.95 to cover the increased cost of the recycling program.

2) **Funding for Sidewalk Crew Re-Instated** - During the budget process, Public Works staff agreed to hold vacant the positions on one concrete crew in FY 2009-10 and only fill those positions if funding for projects is obtained from the American Recovery and Reinvestment Act (ARRA). This budget balancing strategy produced $140,000 in savings. Staff recently received information that two of the projects that staff had hoped to fund with ARRA funding, the Patton Avenue Sidewalk and the Clingman Avenue Streetscape, do not qualify for ARRA funding. ARRA funding for other traffic safety projects is still pending, but staff feels that given the uncertainty associated with the level of ARRA funding that may eventually be received, it is prudent to restore funding for the concrete crew in the adopted budget by appropriating **$140,000** from fund balance. If ARRA funding is eventually received for any traffic safety projects, then a portion of that funding can be used to restore fund balance. Either way, it should be noted that the disadvantage of this funding strategy is that we are using a one-time funding source (i.e. fund balance or ARRA funds) to fund the ongoing costs of staffing the concrete crew.

3) **Inclusion of COPs 97c (Grove Arcade) Debt:** In a separate agenda item at tonight's meeting, Council was asked to amend the FY 2008/2009 budget to bring on to the City's books the debt service payment for the COPs 97c debt issuance. Historically, this COPs 97c debt was reported as conduit debt, and as such, these payments were not included in the City's annual operating budget. Recent research, however, has determined that

appropriating fund balance to cover this additional debt service payment which was not included in the Manager's Recommended FY 2009/2010 Budget.

4) **Buncombe County tipping fees:** The City of Asheville received a letter from Buncombe County on June 18, 2009, advising that tip fees at the Transfer Station are increasing from $42/per ton to $47/per ton effective September 1, 2009. Based on 2007-08 annual tonnage of 25,621 this represents an increase of **$106,764** for the 2009-10 budget year. This amount was not originally budgeted in the Public Works budget request as this information was just recently received. As a note on an annual basis the increase is $128,105. Staff recommends appropriating fund balance to cover the additional tipping fees.

The net result of these changes increases the operating budget by **$531,321** to **$136,231,350**, and the General Fund appropriation to **$92,688,293**.

Budget Ordinance Additions

RENCI/Grove Arcade Lease: As previously presented to Council, the City has entered into a partnership with RENCI for the rental of office space at the Grove Arcade. The total annual lease cost with the Grove Arcade will be $34,902.12 (paid monthly at $2,908.51 beginning late August 1, 2009). RENCI will contribute $9,902.12 toward the annual lease obligation and the remaining $25,000 will be funded with proceeds from Senate Bill 7 funds that were previously budgeted in the City's grant budget. The City has also agreed to perform improvements to the rental space at a cost of up to $20,000. RENCI will reimburse the City for the full cost of these improvements. A summary of the budget for this project is presented below and included in the FY 2009-10 budget ordinance for Council's adoption.

Revenue:	
Senate Bill 7 Funds	$25,000
RENCI	$29,903
Total	$54,903
Expenditures:	
Annual Lease	$34,903
Improvements	$20,000
Total	$54,903

ARRA CDBG Grant Entitlements: The City has been awarded two entitlement grants from HUD as a part of the ARRA funding, and the budgets for these two grants are included in the ordinance that Council is adopting tonight. The Community Development Block Grant Recovery Act Funding (CDBG-R), which totals $332,942, will be distributed to three non-profit subrecipients and to the City. The Homeless Prevention and Rapid Rehousing Program Grant (HPRP), which totals $509,460, will be distributed to non-profit and faith-based subrecipients this fall. The award amounts for these two entitlements have been approved by HUD, and the City is simply awaiting HUD approval of the City's documentation of its spending plans for the grants. Because these are entitlement grants and funding has been assured through HUD, staff is recommending that Council proceed with adoption of these budgets. Staff will return to Council with budget amendments as other ARRA grant fund awards are received during FY 2009-10.

Staff requests that Council review the FY 2009/2010 Annual Operating Budget, including the changes noted above, and make necessary recommendations or adjustments followed by adoption of the Budget Ordinance.

Councilman Mumpower anticipated a decline in our economy and that means revenue and cost hits will be dramatic. He felt there are extravagances in this budget that are less than responsible under the current economic realities.

Mayor Bellamy said that this was not an easy budget and Council has not raised the tax rate. There are several things in the budget she did not support, but it is part of the bigger picture and since we have strategic updates on a quarterly basis we can continue to monitor and make changes through budget amendments. She did look forward to the audit of the Fiscal Year 2008-09 budget. She felt this budget is a good foundation. We tried not to hurt basic city services, gave public safety and public works what they need to perform basic City services and at the same time we are making technological advances.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Russell moved for the adoption of Ordinance No. 3765. This motion was seconded by Vice-Mayor Davis and carried on a 6-1 vote, with Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 25 – PAGE 334

D. RESOLUTION NO. 09-137 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXTEND THE 51 BILTMORE AVENUE PARKING GARAGE DOWNTOWN DEVELOPMENT AGREEMENT TO INCLUDE AN EXTENSION OF THE OPTION TO PURCHASE 51 BILTMORE AVENUE

Director of Transportation & Engineering Cathy Ball said that this is the consideration of a resolution authorizing the City Manager to extend the Downtown Development Agreement decision making period for the proposed parking garage at 51 Biltmore Avenue to include an extension of the option to purchase the property located at 51 Biltmore Avenue for six months.

In October 2008, City Council approved a Downtown Development Agreement with McKibbon Hotel Group, Public Interest Projects and the City of Asheville for the purpose of constructing a parking garage. The design of the parking garage is complete. The architect is in the process of applying for all applicable permits.

As designed, the project consists of the following:

- four hundred ten (410) parking spaces;
- public restrooms;
- four (4) parking spaces for electric vehicles;
- ten (10) bike lockers; and,
- public art component.

Due to economic conditions, McKibbon Hotel Group has not received confirmation of their funding. They are hopeful they will have this component of the project completed in three to five weeks.

The Downtown Development Agreement is structured to expire on July 1, 2009. The agreement allows two additional six month extensions. Staff is requesting that Council authorize the City Manager to execute the extension of the agreement which includes extensions of the option to purchase the property at 51 Biltmore Avenue and the "Decision Period" for evaluating the continued feasibility of the project.

This project is in alignment with the Strategic Plan by promoting sustainable, high-density, in-fill growth that makes efficient use of resources and by making environmentally efficient capital improvements. In addition, this action complies with the Parking Action Plan adopted by City Council.

Pro:

- The extension of the development agreement will position the City to continue to pursue the economic development benefits of an expanded tax base, additional jobs, needed public parking and other benefits, including the potential for workforce housing, associated with this project.

Con:

- The original development agreement called for a total of 439 parking spaces, with 239 reserved for public use. Based on current engineering design requirements, approximately 29 spaces have been removed from the deck design, leaving 210 spaces available for public use.

The cost to extend the option for the property at 51 Biltmore Avenue for an additional six months is $5,000. Other costs for extending this agreement are not measurable at this time.

City staff recommends City Council authorizing the City Manager to extend the Downtown Development Agreement for the proposed parking garage at 51 Biltmore Avenue to include an extension of the option to purchase the property located at 51 Biltmore Avenue.

When Mayor Bellamy asked for public comments, none were received.

Ms. Ball explained to Councilman Mumpower the loss of 29 public parking spaces.

Upon inquiry of Councilman Mumpower, Ms. Ball explained that we have gotten very favorable preliminary budget numbers in – about 20-25% less than what we anticipated.

Upon inquiry of Councilman Mumpower, Mr. Wes Townsend, with McKibbon Hotel Group, explained that the debt capital market is very cold, but not frozen. It is challenging to find lenders who are willing to make a loan on commercial projects in many sectors; however, they have in hand a turn sheet from a large regional bank and they are negotiating with them now. Their projection is that the hotel will open in March of 2011 including deck construction.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Russell moved for the adoption of Resolution No. 09-137. This motion was seconded by Councilwoman Cape and carried on a 6-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 32 – PAGE 108

E. RESOLUTION NO. 09-141 - RESOLUTION EXPRESSING THE CONTINUED INTEREST IN DEVELOPMENT OF AN ANNEXATION AGREEMENT WITH THE TOWN OF WOODFIN

Mayor Bellamy said that last week some members of Council met with some members of the Town of Woodfin Board to discuss annexation plans and to discuss some of the concerns we had with their annexation going west. This resolution expresses the continued conversations with Woodfin to look at the opportunities for us to come together and develop an annexation

agreement going west and possibly north. At the next meeting, representatives from the Leicester community will be invited. She said that Asheville staff took some maps with them to the meeting – map of what Leicester representatives proposed for incorporation, Asheville's map of our extraterritorial jurisdiction, Asheville's Resolution of Consideration annexation map adopted in 2007, and maps including Woodfin's annexation area. Woodfin Mayor VeHaun has said that the door is not closed on this conversation and they look forward to continued discussions on what Asheville would like as a Council, and hearing from representatives from Leicester.

Mayor Bellamy read the following resolution: "WHEREAS, the City of Asheville and the Town of Woodfin began discussions regarding their mutual boundaries prior to 2005; and WHEREAS, the City of Asheville and the Town of Woodfin began discussions regarding an annexation agreement in 2006 but did not reach a mutually acceptable agreement; and WHEREAS, the Leicester community proposed to incorporate in 2008, and the Town of Woodfin proposed an annexation in 2009 that included parts of the area that was to be in the Town of Leicester and some areas in Asheville's designated extra-territorial jurisdiction; and WHEREAS, mutually agreed upon annexation agreements are a best practice of incorporated governments as a growth management tool for mutual infrastructure planning; and WHEREAS, most recently on Friday, June 12 the Town of Woodfin hosted a meeting with representatives of the City of Asheville to reestablish dialogue between these two municipalities; NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF ASHEVILLE THAT: The City of Asheville is committed to continuing dialogue with the Town of Woodfin on the topic of determining a mutually acceptable annexation agreement for the future."

Councilman Newman noted that when Leicester representatives talked with the Asheville City Council about incorporation, City Council was not aware that Leicester representatives were not required by law to consult with the Town of Woodfin in the same way they were required to consult with Asheville. He felt Woodfin raised legitimate concerns about the extent of Leicester's incorporation into areas that they think logically might fit better in the Town of Woodfin in the future. Woodfin said that they were pursuing a fairly aggressive annexation was in response to Leicester's incorporation plans. Asheville also have some legitimate concerns about Woodfin's very extensive annexation plans.

Councilman Newman moved for the adoption of Resolution No. 09-141. This motion was seconded by Councilman Russell.

Councilman Newman asked for a friendly amendment to the resolution that we request that Leicester incorporation representatives meet with the Town of Woodfin and take the Town of Woodfin's concerns into consideration as they work their incorporation efforts in relation to the boundary between those two areas. Councilman Russell accepted the friendly amendment.

Vice-Mayor Davis agreed with Councilman Newman in that he believed that the Town of Woodfin felt left out of the conversations with Leicester representatives. He thanked Mayor VeHaun and Woodfin's staff for meeting with City Council. It was a good opportunity to exchange some viewpoints and exchange dialogue on future expansion plans.

Mayor Bellamy noted that when Asheville adopts their Resolution of Consideration map for annexation areas every two years, it is just making it clear that the areas are just under consideration. The fact is, a lot has not changed over the years and Asheville has not aggressively annexed compared to other cities our size across the state.

When Mayor Bellamy asked for public comments, none were received.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Newman moved for the adoption of Resolution No. 09-141, as amended. This motion was seconded by Councilman Russell and carried unanimously.

When Mayor Bellamy asked that the resolution be transmitted to the representatives of the Leicester incorporation, City Attorney Oast noted that he was taking notes to that affect.

RESOLUTION BOOK NO. 32 – PAGE 114

VI. NEW BUSINESS:

A. RESOLUTION NO. 09-138 - RESOLUTION AUTHORIZING THE CITY TO ENTER INTO AN INTERLOCAL AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION FOR THE 10% STATE MATCH TO PURCHASE FIVE HYBRID BUSES TO REPLACE FIVE OF THE EXISTING 1996 DIESEL BUSES

Director of Transportation & Engineering Cathy Ball said that this is the consideration of a resolution authorizing the City Manager to enter into an Interlocal Agreement with the North Carolina Department of Transportation (NCDOT) in the amount of $262,500 as State match to purchase five hybrid buses to replace five of the existing 1996 diesel buses.

City staff is in the process of acquiring five new hybrid buses for the transit fleet. Part of the effort was to pursue 10% State match for the capital expenditure. Staff applied with the NCDOT and the funds were granted.

The new hybrid buses will replace five of the 1996 diesel buses that have already reached their useful life. This is part of the City staff's effort to replace sixteen 1996 buses. The aging fleet is still operative; however the 1996 buses have begun presenting the problems attributable to age, engine repairs and other parts increasing the maintenance costs.

The City will use an existing contract to purchase the buses, preferable from the State of North Carolina. The estimated delivery date is 18 months from the moment the order is placed.

The estimated cost of this project is $2,625,000. The City is funding this project using section 5309 of the Federal Transit Administration which provides eighty percent (80%) for capital projects or $2,100,000. The City will provide 10% or $262,500 and with this Interlocal Agreement the State will contribute the additional 10%.

The acquisition of hybrid buses is in alignment with the Strategic Plan to reduce carbon emissions by 2% per year and in the acquisition of new technology that will support the area of environmental sustainability.

Pro:

- Entering into an Interlocal Agreement with the NCDOT reduces the City's contribution to 10% of the cost of the project.

Con:

- None at this time.

The project cost will be $2,625,000, with 80% of this total to be paid by federal funds - FTA section 5309; 10% or $262,500 by the City and 10% or $262,500 by the State.

City staff recommends City Council authorizing the City Manager to enter into an Interlocal Agreement with the NCDOT in the amount of $262,500 as State match to purchase five new hybrid buses to replace five 1996 diesel buses.

When Mayor Bellamy asked for public comments, none were received.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Newman moved for the adoption of Resolution No. 09-138. This motion was seconded by Councilman Russell and carried on a 5-2 vote, with Vice-Mayor Davis and Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 32 – PAGE 109

B. RESOLUTION NO. 09-139 - RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN A TEMPORARY SERVICES AGREEMENT WITH FORSYTH INITIATIVE FOR RESIDENTIAL SELF-HELP TREATMENT INC. FOR TEMPORARY WORKERS

Assistant Human Resources Director Robin Nix said that this is the consideration of a resolution authorizing the City Manager to sign a Temporary Services Agreement between the City of Asheville and Forsyth Initiative For Residential Self-Help Treatment, Inc. (F.I.R.S.T.) for temporary workers.

The City of Asheville requires temporary workers throughout the budget year for seasonal workloads in the Public Works Department (Sanitation and Street Divisions), and the Civic Center. This agreement is a collective contract for all City Departments.

F.I.R.S.T. is a non-profit organization that provides counseling to individuals and provides these individuals with opportunities to learn new skills through job placements with various organizations. F.I.R.S.T. is a local organization operating from 32 Knox Rd. in Ridgecrest, NC. The City of Asheville has utilized F.I.R.S.T staff for the past six years with excellent results.

Although the City has contracted with F.I.R.S.T. in the past, a Request for Proposals for temporary workers was released for bid in April 2009. Nine companies' submitted proposals and seven of the nine were considered responsive bidders. Of the seven responsive bidders, F.I.R.S.T. was the only agency with local offices currently in the Asheville area; however, several vendors offered to open local offices if awarded a contract. A bid analysis was performed by the City's Minority Business office and a spreadsheet used as a screening tool for proposals requested and received. Based on analysis of the proposals, F.I.R.S.T, Inc. was chosen as the successful bidder.

Benefits to contracting with F.I.R.S.T., Inc. include reduced costs in recruiting, hiring, and benefits for full-time workers. There is also a savings realized in management costs. The City is guaranteed all F.I.R.S.T. personnel requested enabling operations to be fully productive at all times.

This action complies with the City Council Strategic Operating Plan in that City infrastructure can be maintained and improved in a timely, consistent manner without the need of additional full-time staff.

Pros:

- Reduced costs in recruiting, hiring and benefits for full-time workers
- Management savings
- Utilizing personnel only on days when you need them and in various departments; therefore, eliminating the duplication of work crews

Con:

- None

The fiscal impact would be the contract amount for Streets, Sanitation and Civic Center - $228,000

City staff recommends City Council adopt a resolution authorizing the City Manager to sign a Temporary Services Agreement with the City of Asheville and Forsyth Initiative For Residential Self-Help Treatment, Inc. for temporary workers.

When Mayor Bellamy asked for public comments, none were received.

Councilman Mumpower moved for the adoption of Resolution No. 09-139. This motion was seconded by Councilman Russell.

Councilman Mumpower asked for a friendly amendment to the contract that within the ability of the law that F.I.R.S.T provide any City workers be legally able to work.

In response to Mayor Bellamy, City Attorney Oast said that Forsyth Initiative For Residential Self-Help Treatment Inc. is located in Ridgecrest, North Carolina, and has nothing to do with Forsyth County.

In response to Mayor Bellamy, Human Resources Director Lisa Roth said that the City of Asheville does not pay these workers directly in that they are not our employees. She explained it's a community service type program.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Mumpower moved for the adoption of Resolution No. 09-139. This motion was seconded by Councilman Russell and carried unanimously.

RESOLUTION BOOK NO. 32 – PAGE 110

C. RESOLUTION NO. 09-140 - RESOLUTION AUTHORIZING THE CITY MANAGER TO MAKE PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT MARKET CONNECTIONS/KELLY FOR COUNCIL ON THE GRASS LAWN IN THE PACK SQUARE AREA OF PACK SQUARE PARK ON JUNE 30, 2009

Councilman Miller asked to be excused from this action due to a conflict of interest. Therefore, Councilman Russell moved to excuse Councilman Miller from participation in this action due to a conflict of interest. This motion was seconded by Vice-Mayor Davis and carried unanimously.

Summary: This is the consideration of a resolution making provisions for the possession and consumption of malt beverages and/or unfortified wine at Market Connections/Kelly for Council on the grass lawn in the Pack Square Area of Pack Square Park on June 30, 2009, from 6:00 p.m. – 8:00 p.m.

Market Connections/Kelly for Council has requested through the Asheville Parks, Recreation and Cultural Arts Department that City Council permit them to serve beer and/or unfortified wine at a private event on the grass area of the Pack Square area in Pack Square Park. The malt beverages and unfortified wine will be served in glass containers and bottles.

Market Connections/Kelly for Council has applied for a one-time use permit with the North Carolina Alcoholic Beverage Control Commission (ABC) for the date of the event. Event organizers will follow all City policies outlined in the Outdoor Special Event Guide and ordinances regarding alcohol on City property.

This resolution is pending the receipt of the ABC permit and approved Outdoor Special Event application. This action does not comply with the City Council Strategic Operating Plan. This action does not comply with the Parks, Recreation and Cultural Arts Master Plan.

Pro:

- None

Cons:

- Potential for public safety issues;
- The event is not open to the public.

City staff recommends City Council adopt a resolution authorizing the City Manager to make provision for the possession and consumption of malt beverages and/or unfortified wine on grass lawn in the Pack Square area of Pack Square Park on June 30, 2009, for Market Connections/Kelly for Council.

When Mayor Bellamy asked for public comments, none were received.

Councilman Mumpower moved to recues himself from participating in this action since he is City Council candidate running against Councilman Miller for a seat on City Council. City Attorney Oast said that this is not a disqualifying conflict of interest and that Councilman Mumpower should vote as a Council Member and not as a candidate. Said motion died for a lack of a second.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Newman moved for the adoption of Resolution No. 09-140. This motion was seconded by Councilman Russell and carried on a 4-2 vote, with Mayor Bellamy and Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 32 – PAGE 111

VII. OTHER BUSINESS:

Vice-Mayor Davis said that due to the vacancy left on the Personnel Committee by former Councilwoman Holly Jones, it was the consensus of Council to appoint Councilman Newman to the Personnel Committee.

Mayor Bellamy briefly updated Council on her recent meeting at the N.C. League of Municipalities. She spoke with the Mr. Freeman, Secretary of the N.C. Dept. of Environment and Natural Resources, about CTS Facility issue and said they are trying to get the Environmental Protection Agency to do a re-assessment of the site to see if it triggers another level of investment as well as what is happening in the General Assembly where they are working to increase the threshold from $3 Million to $5 Million. Mr. Freeman did tour the site and he has been in contact with people in the area on that issue. He did thank City Council for installing water lines in that area. She also spoke with Mr. Carroll, Deputy Secretary of the Dept. of Commerce. The state energy office will be coming under his department and he will look to see if there are opportunities for Asheville to receive any additional funding from the Dept. of Energy. He stressed the importance of Asheville working with A-B Tech's program for workforce development. He was also in our area to talk to a local business about working with another employer in North Carolina to get more emphasis on our economy and making sure that there is economic development occurring in North Carolina. She then updated Council on some legislation from the N.C. League of Municipalities. The annexation legislation does impact the City of Asheville and there are 3 different bills being proposed, with a couple of compromises

being developed. She highlighted that in most situations outlined, Asheville is already doing what they are calling compromises. She noted there was no discussion of Powell Bill funds or sales tax funds being withheld. She lastly highlighted the Intermodal Bill which allows governments to vote on if they want to levy a sales tax for transit related programs.

Vice-Mayor Davis and Councilman Newman spoke about the French Broad Metropolitan Planning Organization and how Asheville has been successful in getting 13 projects on the list for funding for transportation projects.

Councilman Mumpower introduced his summer intern and encouraged students from Asheville High School who have a conservative lean who might be interested in an intern position with him to contact him.

The following claims were received by the City of Asheville during the period of May 22 – June 18, 2009: R&W Inc. (Streets), Caroline Foreman (Streets), Tim Bradley (Water), Gloria Leader (Streets), Ann Morgan (Water), Robbie Clark (Parks & Recreation), Neil A. Dubois (Fire), Benny Lake (Water) and Kerri Smith (Civic Center). These claims have been referred to Asheville Claims Corporation for investigation.

VIII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Dwight Buckner, representing the Asheville Downtown Association, read a resolution from the Asheville Downtown Association supporting the establishment of a special nuisance court in conjunction with the local justice system. They believe the establishment of such a court will have a positive impact on our whole community. They believe that enforcing regulations which lead to mutual respect throughout the community can only have a positive affect on our City, County, State and Nation. They believe this is tax money well spent.

IX. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 10:04 p.m.

Magdalen Bowleson
CITY CLERK

MAYOR

Tuesday – July 14, 2009 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Jan B. Davis; Councilwoman Robin L. Cape; Councilman Kelly M. Miller (left meeting excused at 5:57 p.m.); Councilman R. Carl Mumpower; Councilman Brownie W. Newman; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: Councilman William A. Russell Jr.

PLEDGE OF ALLEGIANCE

Mayor Bellamy led City Council in the Pledge of Allegiance.

INVOCATION

Councilman Newman gave the invocation.

ADDITION TO AGENDA

Mayor Bellamy said that a resolution authorizing the City Manager to make provisions for the possession of malt beverages and/or unfortified wine at the RiverLink event on August 1, 2009, will be added under New Business.

I. PROCLAMATIONS:

A. PROCLAMATION PROCLAIMING JULY 2009 AS "SKYVIEW GOLF ASSOCIATION MONTH"

Mayor Bellamy read the proclamation proclaiming July, 2009, as "Skyview Golf Association Month" in the City of Asheville. She presented the proclamation to Mr. Lee Shepherd, President of Skyview Golf Association, who briefed City Council on some activities taking place during the month. Vice-Mayor Davis also wanted to recognize the late Mr. Chillie Young for his efforts during the 50 years of the Skyview Golf Association.

II. CONSENT AGENDA:

At the request of Councilman Mumpower, Consent Agenda Items "D", "E", "H", "I" and "J" were removed from the Consent Agenda for discussion and/or individual votes.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON JUNE 23, 2009

B. RESOLUTION NO. 09-143 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH INTEGRATED TECHNOLOGY SYSTEMS FOR THE PURCHASE OF IN-CAR VIDEO CAMERAS AND INFRASTRUCTURE TO UPLOAD THE EVIDENCE WIRELESSLY INTO A SECURE STORAGE DEVICE

Summary: The consideration of a resolution authorizing the City Manager to enter into an agreement with Integrated Technology Systems for $82,950.64 for the purchase of ten (10) in-car video cameras and infrastructure and retrofit equipment in six (6) existing police cars that currently have in-car video capability, for a total of 16 in-car video installations

Each year the Finance Department, through its Risk Management Division, budgets money specifically for liability claims management and settlements. This year, staff proposes to use a portion of the risk management/liability claims fund for a one-time risk avoidance investment. The City of Asheville Risk Management staff, in coordination with Asheville Claims Corporation and Police Department, has identified as a high priority the purchase of in-car video cameras to place into police patrol cars for the purpose of recording the activities of the officer operating the patrol car. These recordings would generally serve as evidence to be utilized in court for the prosecution of criminal cases. However, these recordings could also be used to aid in resolving allegations of wrongdoing by officers. This would allow for an even greater level of protection of officers and citizens.

The cameras to be purchased are digital in nature and provide high quality and high resolution video/audio recording of events in and around the patrol car. Recordings such as this help protect the interests of citizens as well as the interests of police officers. Recordings captured with these cameras could potentially aid in mitigating potential civil liability for the City of Asheville by illustrating in detail the actual events that transpired. The secure storage device and wireless upload capabilities of the system creates a user friendly video storage system that is extremely secure and versatile.

This action conforms to the City Council's Strategic Plan under Safe to make Asheville the safest city in America based on approved metrics for similarly sized cities and by strengthening the enforcement of existing laws and regulations as opposed to adding new ordinances.

This action was reviewed by the Public Safety Committee at its May 19, 2009, which recommended approval.

Pros:

- More video/audio recorded evidence is available to review when critical incidents occur.
- The City has one-time funding available through Risk Management to purchase this equipment.
- The Police Department will receive 10 new in-car video units, be able to upgrade the six existing units for wireless upload capabilities, and will receive a wireless infrastructure and Evidence and Video storage network dedicated solely to evidentiary video storage.

Cons:

- The Asheville Police Department will need to bear the cost for future maintenance of this equipment as necessary.

There will be an expense of $82,950.64 posted to the Risk Management Budget. The Asheville Police Department will be responsible for the on-going maintenance of the equipment purchased, any expenses are anticipated to be absorbed through current operating budget allocations.

City staff requests City Council to adopt a resolution authorizing the City Manager to enter into an agreement with Integrated Technology Systems for the purchase of in-car video cameras and infrastructure to upload the evidence wirelessly into a secure storage device.

RESOLUTION BOOK NO. 32 – PAGE 117

C. RESOLUTION NO. 09-144 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH MOTOROLA INC. TO PROVIDE MAINTENANCE COVERAGE FOR THE CITY'S RADIO SYSTEM

Summary: The consideration of a resolution authorizing the City Manager to sign an agreement with Motorola, Inc. to provide maintenance coverage for the City's radio system.

Motorola, Inc. has provided maintenance services for the City's radio communications system since installation of the system in 1992. The service agreements are renewed annually. The maintenance cost per unit of equipment for the renewal period of August 1, 2009, through July 31, 2010, has increased by approximately three percent. Funding for this contract was appropriated in the FY10 budget process.

The renewal agreement reflects an annual charge of $130,086.24 and covers additional equipment purchased by the City to equip new vehicles and replace broken equipment. The agreement also covers infrastructure that has come out of the installer's warranty during the past year.

This action ties into the City Council Strategic Operating Plan regarding partnerships to improve critical services / infrastructure. These partnerships also help the City recoup some of their investment in the system infrastructure through fees collected for use of the system.

Pros:

- The primary benefit of this contract is to keep the City's radio system reliable and operational for public safety officers.
- By keeping the radio system in optimal condition the City is also able to provide communication services to several outside agencies, thereby improving interagency communications.

Cons:

- None noted.

City staff recommends the adoption of the resolution for radio maintenance coverage for the term of August 1, 2009, through July 31, 2010.

RESOLUTION BOOK NO. 32 – PAGE 118

D. RESOLUTION AUTHORIZING THE CITY MANAGER ENTER INTO A CONTRACT WITH H&M CONSTRUCTORS INC. FOR THE RENOVATION OF FIRE STATION 6

This item was removed from the Consent Agenda for discussion and/or an individual vote.

E. MOTION APPROVING THE EXTENDED TERMS FOR SALE OF THE PROPERTY ON BROTHERTON AVENUE TO ASHEVILLE AREA HABITAT FOR HUMANITY

This item was removed from the Consent Agenda for discussion and/or an individual vote.

F. RESOLUTION NO. 09-146 - RESOLUTION APPROVING THE MUNICIPAL RECORDS RETENTION AND DISPOSITION SCHEDULE ISSUED MAY 19, 2009

Summary: The consideration of a resolution approving the N.C. Dept. of Cultural Resource's updated Municipal Records Retention and Disposition schedule issued May 19, 2009.

N.C. Gen. Stat. sec. 121-5 mandates that records defined under Chapter 132 may be disposed of only in accordance with an official records retention schedule. The N.C. Dept. of Cultural Resources, Division of Archives and History, has updated the 1997 Municipal Records Retention and Disposition Schedule.

This updated Schedule provides that records listed may be destroyed after the specified retention periods without further approval from the City or the N.C. Dept. of Cultural Resources provided, the governing body has authorized the records listed for destruction to be destroyed through its blanket approval of the Retention and Disposition Schedule.

Pros:

- Will allow records listed to be destroyed after specified retention period
- Will free up storage space

Con:

- None noted.

City staff recommends City Council adopt the resolution approving the N.C. Dept. of Cultural Resource's updated Municipal Records Retention and Disposition schedule issued May 19, 2009.

RESOLUTION BOOK NO. 32 – PAGE 120

G. MOTION AUTHORIZING THE ASHEVILLE FIRE & RESCUE DEPARTMENT TO PARTICIPATE IN THE MANNA FOOD BANK'S FESTIVAL NEIGHBORHOOD DRIVE JULY 11-28, 2009

Summary: The consideration of a motion authorizing Asheville Fire and Rescue to participate in MANNA Food Bank's Festival Neighborhood Drive between July 11th and July 28, 2009.

Asheville Fire and Rescue has been approached by MANNA Food bank to become a partner in the MANNA Food Bank Festival Neighborhood Drive. All of the fire stations within Buncombe County have been asked to participate as drop off locations for the community to bring food items in coordination with the drive. MANNA will provide the food receptacles and will pick the items up during the food drive. Community fire stations serve as good collection points for this drive due to their neighborhood locations.

This action supports City Council's Strategic Operating Plan to offer a standard of living that is affordable and attainable for people of all income levels, life stages, and abilities.

Pro:

- By partnering with MANNA Food Bank, the City of Asheville supports a strong effort to assist citizens with basic food needs.

Con:

- None

City staff recommends City Council approves a motion authorizing Asheville Fire and Rescue to participate in MANNA Food Bank's Festival neighborhood Drive.

H. RESOLUTION NO. 09-147 - RESOLUTION TO AFFIRM REQUIRED ASSURANCES AND AGREEMENTS AND DESIGNATE AN AUTHORIZED REPRESENTATIVE TO FILE THE APPLICATION TO THE N.C. DEPT. OF ENVIRONMENT AND NATURAL RESOURCES , TO MAKE NECESSARY

CERTIFICATIONS, AND EXECUTE SUCH AFFIDAVITS AS ARE REQUIRED BY THE RULES AND REGULATIONS FOR THE VIEWMONT ACRES AND REYNOLDS MOBILE HOME PARK WATER SYSTEM IMPROVEMENTS

This item was removed from the Consent Agenda for discussion and/or an individual vote.

I. RESOLUTION NO. 09-148 - RESOLUTION MODIFYING THE SCHEDULED CITY COUNCIL MEETINGS TO CANCEL THE TUESDAY, JULY 28, 2009, FORMAL MEETING

This item was removed from the Consent Agenda for discussion and/or an individual vote.

RESOLUTION BOOK NO. 32 – PAGE 124

J. RESOLUTION NO. 09-158 – RESOLUTION APPROVING NAMING OF NATIONAL GUARD FACILITY IN HONOR OF LT. COLONEL WILLIAM GARWOOD

This item was removed from the Consent Agenda for discussion and/or an individual vote.

Mayor Bellamy asked for public comments on any item on the Consent Agenda, but received none.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Miller moved for the adoption of the Consent Agenda. This motion was seconded by Councilwoman Cape and carried unanimously.

ITEMS REMOVED FROM THE CONSENT AGENDA FOR INDIVIDUAL VOTES

D. RESOLUTION NO. 09-145 - RESOLUTION AUTHORIZING THE CITY MANAGER ENTER INTO A CONTRACT WITH H&M CONSTRUCTORS INC. FOR THE RENOVATION OF FIRE STATION 6

Summary: The consideration of a resolution authorizing the City Manager to sign a contract with H & M Constructors, Inc. for the renovation of Fire Station 6.

The need for the renovation of Fire Station 6 on Haywood Road was identified as a capital improvement project and Council allocated funds for this project in Fiscal Year 2008/09. Architectural and Engineering plans were completed for this project in early 2009 and an informal request for bids was properly advertised. A preliminary meeting was held with interested contractors in reference to the renovation of Fire Station 6. The request for bids was specific for the renovation with the potential for two alternates. Written bids were received by City staff and were evaluated for compliance with City of Asheville contract guidelines. A team of staff from Fire and Rescue, Finance, and the Minority Business Office reviewed all of the submittals. One contractor was clearly selected as the recommended vendor to complete the renovation. The committee selected H & M Constructors, Inc., 187 Deaverview Rd., Asheville, NC 28806, as the recommended contractor for this project. H & M Constructors, Inc. was the lowest responsive bidder for the project. The base bid amount is for $256,400. The two alternates will not be pursued at this time as they exceed the project's budget.

This action complies with the City Council Strategic Operating Plan in that this project provides leadership in buying local products and services. H & M Constructors, Inc. is an Asheville based contractor. This action also complies with the City Council Strategic Operating Plan by achieving short term and long term energy goals. This renovation includes important energy efficiency upgrades. This action also complies with the City Council Strategic Operating Plan by addressing the City's aging infrastructure including facilities. Fire Station 6 was built in 1958.

Pro:

- Energy efficiency improvements and station renovations are provided for with this contract

Con:

- None identified

City Council has previously allocated $256,400 for this project.

City staff recommends City Council adopt a resolution authorizing the City Manager to sign a contract with H & M Constructors, Inc. for the renovation of Fire Station 6.

Councilman Mumpower was concerned about the City's continued use in what is likely a large percentage of illegal laborers on contracted City projects. He questioned if we are in a position to address the use of a verified legal labor pool for this project. City Attorney Oast responded that we still do not have any more authority under state law and we are still awaiting for some resolution under federal law to allow more involvement in that kind of activity than we currently have. He continues to keep track of these bills.

Councilman Mumpower moved for the adoption of Resolution No. 09-145. This motion was seconded by Councilman Newman and carried unanimously.

RESOLUTION BOOK NO. 32 – PAGE 119

E. MOTION APPROVING THE EXTENDED TERMS FOR SALE OF THE PROPERTY ON BROTHERTON AVENUE TO ASHEVILLE AREA HABITAT FOR HUMANITY

Summary: At their regular meeting of June 18, 2009, the Housing and Community Development (H&CD) Committee approved a change in the terms of the City's financial assistance to Asheville Area Habitat for Humanity for their purchase of the City-owned real property located at Brotherton and Virginia Avenues.

In 1999, the City acquired 7.19 acres at Brotherton Avenue, for the purpose of creating affordable housing. The City invested a total of $527,000 in Community Development Block Grant (CDBG) funds to acquire and improve the site. The City, through RFP processes, twice selected developers to create that affordable housing. In each case, the developer withdrew for financial reasons before constructing any housing.

In November of 2007, Council passed a resolution to sell this property to the Asheville Area Habitat for Humanity to develop 22 single family homes on this site, all to be sold to low-income families. The purchase price of $467,500 was established via an appraisal dated June 10, 2007. Habitat proposed to pay a $5,000 deposit and the balance of $462,500 in one lump sum ten (10) years from the closing date, at zero percent interest.

As Habitat's vision for the project matured, and more information about project costs were developed, Habitat became concerned that the financing terms offered by the City could affect Habitat's fulfillment of the project mission. Much of the earlier constructed infrastructure,

paid for with CDBG funds, has no value for the proposed Habitat development and would need to be removed at significant costs. In ten years Habitat would need to pass the balloon repayment onto its purchasers thus reducing by as much as 60% the pool of Habitat clients who could afford the house.

Habitat presented the above information to the H&CD Committee at the Committee's June 18, 2009, meeting. Habitat asked for assistance in revising the terms of its original proposal to enable it to meet its mission and develop the property as affordable housing, meeting both Habitat's and the City's goals. Habitat proposed the removal of the 10-year balloon provision, substituting instead a provision to pass the purchase price on a pro-rata basis to individual buyers as an assumable loan, carrying zero percent interest, in a secured third mortgage held by the City. Each loan would be due and payable only upon sale or transfer of the house to a household earning more than 80% of median income. The loan would be assumable at 0% interest for any transfer to a household with income of 80% of median income or less.

Through this mechanism, Habitat would create a development that was 100% affordable to low-income families; provide for the sustainability of that affordability for subsequent families; and enable recapture of the appraised value of the land and reuse of the funds by the City upon sale to non-lower-income households.

Pros:

- Development of 22 affordable homes for purchase by low-income families supports the City's Strategic Plan goals for addressing housing needs.
- The provision of third mortgage financing helps ensure the sustainability of the affordable housing created through this project while not prohibiting free-market sales of the homes;
- In-fill development matching established density for the area supports Smart-Growth land policies.
- Habitat has an excellent track record of building high quality, Energy Star homes, and creating and supporting well-functioning neighborhoods;
- Habitat offers 0% interest mortgages, making its homes the most affordable new homes available;
- Agency has sufficient financial and volunteer resources to complete the project;
- Returns the property to the tax rolls with tax base Increase of at least $3,500,000.

Cons:

- The CDBG Program Income the City will receive for selling the property to Habitat will be received over an extended period of time.

Approval of the extended terms for sale of the property on Brotherton Avenue to Asheville Area Habitat for Humanity.

Councilman Mumpower could not support the motion and explained why he felt the City should have stayed out of this venture.

Councilman Newman and Councilwoman Cape spoke in strong support for Habitat for Humanity as they are a good partner and have an excellent record on their projects. What Habitat is proposing is very much supported by the neighborhood and is a good proposal.

Mayor Bellamy explained the financing, and said that even though the property was purchased by the 1999 this Council needs to address any concerns associated with the property.

When Mayor Bellamy called the question, Councilman Mumpower raised a point of order. City Attorney Oast said that the Mayor has some control to control the debate and in her role as presiding officer, if the debate is not proceeding, it is within her power to move the meeting along.

Councilwoman Cape moved for the adoption of a motion approving the extended terms for sale of the property on Brotherton Avenue to Asheville Area Habitat for Humanity. This motion was seconded by Councilman Newman and carried on a 5-1 vote, with Councilman Mumpower voting "no."

H. RESOLUTION NO. 09-147 - RESOLUTION TO AFFIRM REQUIRED ASSURANCES AND AGREEMENTS AND DESIGNATE AN AUTHORIZED REPRESENTATIVE TO FILE THE APPLICATION TO THE N.C. DEPT. OF ENVIRONMENT AND NATURAL RESOURCES , TO MAKE NECESSARY CERTIFICATIONS, AND EXECUTE SUCH AFFIDAVITS AS ARE REQUIRED BY THE RULES AND REGULATIONS FOR THE VIEWMONT ACRES AND REYNOLDS MOBILE HOME PARK WATER SYSTEM IMPROVEMENTS

Summary: The consideration of a resolution authorizing the City Manager to be named an Authorized Official with approval to accept grants from the North Carolina Department of Environment & Natural Resources (NCDENR) for the Viewmont Acres and Reynolds Mobile Home Park water system improvement projects at an estimated cost of $1,084,421, along with authorizing the City Manager to execute contracts for engineering services, construction contracts, and other incidental work related to the projects so long as the projects' budget is not exceeded.

For the past couple of years, NCDENR has been in discussion with the City of Asheville Water Resources Department regarding the status of two (2) failing private water systems in Buncombe County. These systems serve the Viewmont Acres Subdivision, located off Cedar Hill Road, and the Reynolds Mobile Home Park, located off Charlotte Highway. These private water systems, serving a combined sixty (60) residences, are failing and have been assigned emergency operators by the North Carolina Utility Commission.

Through its "Disadvantaged Community Program", NCDENR has offered the City of Asheville Water Resources Department grants for these projects at an estimated cost of $1,084,421, in accordance with Section II.S.3 of the NC DWSRF, to design, construct, own and maintain replacement water systems for Viewmont Acres and Reynolds Mobile Home Park.

The accompanying resolution authorizes the City Manager to execute forms of acceptance for this grant offer and authorizes the City Manager to execute multiple contracts for consulting engineering services and multiple construction contracts, all secured in accordance with City and State bidding requirements, and other miscellaneous contracts required by the projects so long as said contracts do not exceed budgeted grant funds.

This project is part of City Council's strategic plans to improve city infrastructure.

Pros:

- Sixty (60) homes in Buncombe County are being served by failing public water systems and without this intervention by the NCDENR and the City of Asheville, some of these homes may have to be vacated.
- The provision of safe, reliable water supply can be provided to these sixty (60) homes without any initial capital contribution from the City of Asheville.

Con:

- The terrain in Viewmont Acres will make future maintenance operations more difficult than our typical work. This can be mitigated to a great extent by special design requirements in the waterline replacement project design.

Since this is a "Disadvantaged Community Program" project, these funds can be provided in advance so the City will not have to front the project expenses.

City staff recommends City Council adopt a resolution authorizing the City Manager to be named an Authorized Official with approval to accept grants from the North Carolina Department of Environment & Natural Resources (NCDENR) for the Viewmont Acres and Reynolds Mobile Home Park water system improvement projects at an estimated cost of $1,084,421, also with authorizing the City Manager to execute contracts for engineering services, construction contracts, and other incidental work related to the projects so long as the projects' budget is not exceeded.

Councilman Mumpower was concerned about the City's continued use in what is likely a large percentage of illegal laborers on contracted City projects. He questioned if we are in a position to address the use of a verified legal labor pool for this project. City Attorney Oast responded that we still do not have any more authority under state law and we are still awaiting for some resolution under federal law to allow more involvement in that kind of activity than we currently have. He continues to keep track of these bills.

Councilman Mumpower moved for the adoption of Resolution No. 09-147. This motion was seconded by Councilman Miller and carried unanimously.

RESOLUTION BOOK NO. 32 – PAGE 12

I. RESOLUTION NO. 09-148 - RESOLUTION MODIFYING THE SCHEDULED CITY COUNCIL MEETINGS TO CANCEL THE TUESDAY, JULY 28, 2009, FORMAL MEETING

Councilman Mumpower felt that one meeting a month does not allow ample opportunity to effectively address the volume of issues before City Council.

Vice-Mayor Davis moved for the adoption of Resolution No. 09-148. This motion was seconded by Councilman Newman and carried on a 5-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 32 – PAGE 124

J. RESOLUTION NO. 09-158 – RESOLUTION APPROVING NAMING OF NATIONAL GUARD FACILITY IN HONOR OF LT. COLONEL WILLIAM GARWOOD

Summary: The consideration of a resolution approving the naming of the National Guard Facility at Richmond Hill.

The North Carolina National Guard recently completed its new training facility on Richmond Hill. This was done in conjunction with the City's development of a park facility adjacent to the new training facility.

The Guard wishes to name the facility after Lt. Colonel William Garwood, now deceased, who had a long career of service with the Guard, including serving in the Gulf War and commanding the National Guard in Western North Carolina. When naming its facilities, the Guard requests the approval of the local government with jurisdiction over the site of the facility.

Accordingly, this request has come to the Asheville City Council. A synopsis of Lt. Colonel Garwood's career will be attached to the resolution.

If Council approves of the resolution, adoption of it is recommended.

Mayor Bellamy was pleased to support this resolution and that this is the first step in the process of getting the facility named.

Councilman Mumpower moved for the adoption of Resolution No. 09-158. This motion was seconded by Vice-Mayor Davis and carried unanimously.

RESOLUTION BOOK NO. 32 – PAGE 142

III. PRESENTATIONS & REPORTS:

A. ASHEVILLE AREA ARTS COUNCIL

Ms. Angela Martinez, Executive Director of the Asheville Arts Council, said that the Asheville Area Arts Council has a long history as one of the oldest arts councils in the country. It was formed from a working committee of the Junior League, the Civic Arts Council (CAC) was incorporated in 1952.

The mission of the Asheville Area Arts Council is: (1) Enrich our community by educating all people in the Asheville area about the arts; (2) Advocate integration of the arts in all aspects of community life; and (3) Support artists and arts organizations.

Major programs include (1) Arts-in-Education (a) Teachers Grants; (b) WORD – Poetry Slams; and (c) Professional Development; (2) Artist Support Services (a) Regional Artists Program Grants; and (b) Gallery Space; (3) Organizational Support Services (a) Grassroots Arts Program Grants; and (4) Community Services (a) KidsTix; and (b) Urban Trail.

She explained Arts-in-Education program as (1) Teacher Grants provide funding for Artists' workshops and residencies that bring arts integration programs into area schools; (2) The Arts Council runs a county- wide WORD Poetry Slam for middle and high school aged students; (3) The Council, in partnership with Asheville City Schools & Buncombe County Schools, was chosen as one of 12 teams, nationwide, to participate in the Kennedy Center Partners & Education program; and (4) Every two years, the Kennedy Center for the Performing Arts selects arts organizations throughout the nation who partner with their local school systems to develop arts-in-education Professional Development opportunities.

She explained the Artist Support program as (1) The arts council has also received state funds for disbursement through the Regional Artists Project program; (2) Since 1997, close to One Hundred Thousand Dollars ($92,320) has been sub-granted to individual artists in support of their professional development, promotion, and to facilitate the production of new works; and (3) Gallery space to showcase the work of emerging or non-commercial artists. It is the mission of the AAAC gallery is to promote our local emerging artists.

She then explained the Organizational Support as (1) AAAC's service to the community is defined by its role as the Designated County Partner (DCP) for administering state-allocated grants throughout Buncombe County and surrounding areas; (2) Since 1983 the AAAC has participated in the Grassroots Arts program providing funding to help support organizational arts projects and cultural events within Western North Carolina; and (3) The AAAC has sub-granted over a half million dollars ($565,933) in this program alone.

Regarding Community Services (1) KidsTix program provides tickets to cultural events for underserved students with mentors; and (2) The City of Asheville and the Arts Council are

partners in the Urban Trail, which has become the unique signature piece of Asheville's history. The Arts Council is responsible for marketing, tour scheduling, and guide training.

New initiatives include (1) The Arts Council hopes to help support the needs of Asheville's creative community by developing a Resource Center for the Arts (RCA) in partnership with other arts and community organizations; and (2) The Arts Council will be creating and maintaining an online Arts and Culture Calendar to promote regional events to residents and visitors.

She said the Arts Council looks forward to many more decades of service to Asheville's creative community and arts audiences, residents and visitors.

She said that Asheville has been featured in the O Magazine as an arts destination. She felt as we look at our own natural resources we need to pay attention to and allocate funding to the arts in this area which might be endangered of going away to other communities who will support them.

On behalf of the City Council, Mayor Bellamy thanked Ms. Martinez for the hard work they have done on behalf of the City of Asheville, in particular their assistance with the Urban Trail.

B. MAYOR'S COMMITTEE ON VETERANS AFFAIRS

Mr. Josh O'Conner, Chair of the Mayor's Committee on Veterans Affairs, explained the mission of the Committee, which is to recognize the role played by veterans in the defense of this country, and to promote equal and inclusive opportunities for veterans and their families in all aspects of society, including employment, transportation, housing, health and education, and to identify and support all individuals and organizations that contribute to this mission.

2009 annual goals include (1) Increase collaboration with other local Veterans (and family) organizations; (2) Host/co-host patriotic events to honor veterans and increase awareness of veterans resource organizations; (3) Review/update Mission Statement and By-Laws; and (4) Implement a recognition program for service to veterans (with a city-wide focus on awareness).

Regarding the membership and meetings, they have 14 members, a diverse membership, they hold monthly meetings, they work to connect with other organizations, and that meetings are open to input from the public.

The following are events and activities that the Committee has participated in: Memorial Day, Bele Chere, Veterans Day, and Committee members have collectively and individually supported various veterans-related events.

The Honor and Remember request is to create, establish and promote a nationally recognized flag that would fly continuously as a visible reminder to all Americans of the lives lost in defense of our national freedoms. All Military lives lost not only in action but also in service, from our nation's inception. In our over 200 year history there has never been an official national symbol that recognizes in gratitude and respect the ultimate sacrifice made by members of the United States military in service to our nation. The Honor and Remember Flag was created for that purpose.

He then explained the symbols (1) The Red Field represents the blood spilled by brave men and women in America's military throughout our history, who willingly gave their lives so that we all would remain free; (2) The Blue Star represents active service in military conflict. This symbol originated with World War I, but on this flag it signifies service in all wars from the American Revolution to present day; (3) The White Border surrounding the gold star recognizes the purity of sacrifice. There is no greater price an American can pay than to give his or her life in

service to our country; (4) The Gold Star signifies the ultimate sacrifice of a warrior in active service who will not return home. Gold reflects the value of the life that was given; (5) The Folded Flag signifies the final tribute to an individual life that a family sacrificed and gave to the nation; and (6) The Flame is an eternal reminder of the spirit that has departed this life yet burns on in the memory of all who knew and loved the fallen hero.

The Committee has adopted the Honor and Remember resolution as well as other localities. To be able to fly alongside the American Flag, this would require an amendment to Title 36 of US Code.

In summary, he showed what the flag will look like and (1) urged Council to support the Honor and Remember Campaign by adopting the resolution; (2) requested City Staff support; (3) "Sounding Board" for veteran's issues; and (4) asked the Committee be allowed to serve veterans in a more comprehensive manner.

Mayor Bellamy thanked Mr. O'Conner for his leadership on this committee. She commended him for the Committee's work on the Memorial Day ceremony, noting that attendance has continued to grow as well as the diversity of the crowd. She thanked him for doing a good job of reaching out to our community.

Councilman Mumpower supported adopting a resolution in support of the "Honor and Remembrance" Flag as the official symbol to recognize and honor members of the armed forces who have died in the line of duty and urged the United States Congress to adopt this flag as a national symbol. He said that Memorial Stadium has donated three flagpoles and suggested one of the flagpoles be used to fly this flag, possibly along with the POW Flag.

Councilman Mumpower moved to adopt a resolution in support of the "Honor and Remembrance" Flag as the official symbol to recognize and honor members of the armed forces who have died in the line of duty and urged the United States Congress to adopt this flag as a national symbol, with appropriate modifications to the form of the resolution. This motion was seconded by Vice-Mayor Davis.

Mr. Walt Plaue spoke in support of the Mayor's Committee for Veterans Affairs and thanked City staff for their assistance to that Committee. The Committee has moved tremendous mountains to solidify the relationship of veterans and the community and help mutual understanding the needs of veterans and what the veterans can accomplish within the community.

Councilman Newman was supportive of the resolution, however, he felt it might be more appropriate to place this item on the August 11, 2009, meeting consent agenda to see if there are any other perspectives due to the powerful symbolic issue.

In response to Councilwoman Cape, Mr. O'Conner said that typically the flag would be flown next to the US flag, similar to the POW flag. City Attorney Oast said that the resolution is urging Congress to adopt the flag as a national symbol and it does not require any particular manner of display.

Councilman Mumpower amended his original motion to place this resolution (with appropriate form modifications) on the August 11, 2009, agenda, along with deliberation of utilizing this flag, effective at that time, at the Memorial Stadium facility. This motion was seconded by Vice-Mayor Davis and carried unanimously (Councilman Miller excused).

C. ECONOMIC STIMULUS PACKAGE UPDATE

American Recovery & Reinvestment Project Manager Brenda Mills updated Council on the American Recovery & Reinvestment Act (ARRA) funding announcements and opportunities.

Homeless Prevention Funds - The City of Asheville will receive $509,460 in funding from the Department of Housing and Urban Development (HUD). A press release and notification to participating agencies was sent out the week of June 29th regarding the beginning of the pre-application period was opened on July 6, 2009. A public meeting was held to on July 8th to discuss the pre-application process with pre-application due no later than July 17, 2009.

Energy Efficiency & Conservation Block Grant ($804,700) - The City of Asheville will receive $804,700 in funding from the Department of Energy and has successfully submitted our application for this funding on June 25th. We received confirmation of receipt through FedConnect the following day. We should expect a response in 120 days or on or about October 2009. Staff is currently working on a timeline for award in mid-August.

Department of Transportation:

Enhancement Projects - Staff is still awaiting notice of funding decisions from N.C. Dept. of Transportation (NCDOT) Division 13.

MPO Urbanized Area Funding - The Metropolitan Planning Organization (MPO) announced awards of MPO Surface Transportation Program – Directly Attributable funding. The city received funding for Fairview Road Pedestrian Enhancements, Coxe Avenue Bike Lanes (including resurfacing), Downtown and Gateway Streetscapes, and South Slope Bike Network. The remaining projects for sidewalks and resurfacing Kimberly Avenue were selected for funding if money becomes available. Since all projects that will be funded must be ready to put to bid by September 1, staff is moving forward with these projects as though they will be funded.

After reviewing the sidewalk gap projects in light of the other awards and meeting with NCDOT representatives who expressed concern from Raleigh at the large number of individual projects, City staff has requested the MPO allow revision of the list pedestrian facilities funded under the three sidewalk projects. The revision removed several very small projects, added Piney Mountain Road to the Chunns Cove project, and added a greenway connection along Choctaw that will serve as a link between McDowell Avenue and the Riverway. The total value of the projects requested is $1,779,500, just under the $1,784,750 the MPO originally allotted for these projects. Since this project was selected based on funding availability, it, like the Kimberly Avenue resurfacing project, will only be constructed if and to the extent that the MPO has funds available. Here is the revised proposal:

Street		Approximate linear feet	Cost Estimate
Chunns Cove Road/ Piney Mountain Road		2,560	$512,000
Depot Street		600	$90,000
Hilliard Street		1,200	$360,000
Short Michigan Avenue		1,350	$270,000
Choctaw		1,400	$350,000
Linden Street		1,100	$165,000
Evelyn Place		130	$32,500
	Total	8,340	$1,779,500

To ease management of the project, staff asked to consolidate the projects into one list and one municipal agreement for gaps 1, gaps 2, and Hilliard Avenue sidewalk.

Transit Capital Projects - The City of Asheville received $2,004,598 transit capital funding from the Department of Transportation for five (5) buses and ten (10) shelters. Announcement of the award was issued June 10, 2009 through the Governor's Office.

Regarding transparency and accountability, Ms. Mills attended a meeting in Raleigh, North Carolina, sponsored by the School of Government on July 7, 2009, along with representatives from the North Carolina Economic Recovery Office, North Carolina Treasurer's Office, the League of Municipalities, State Office of Purchase and Contracts, and others to discuss ARRA requirements for purchasing and contracting. The meeting will result in procedures that will be shared across the state to support in these efforts.

With regard to community stakeholders, staff met with the Asheville Regional Airport on linking with their website to post information on their contracting efforts through there ARRA funding.

Contact has been made with Asheville City Schools, Community Action Opportunities and Buncombe County to provide more information to the public on what ARRA opportunities will be available in our region.

Director of Transportation and Engineering Cathy Ball explained the process used of selecting the sidewalk for this proposal (by September 1) – in-fill projects, with the City's rights-of-way, owning the property, not having any significant environmental issues, and accessing the Pedestrian Thoroughfare Plan. She said that this allocation went through the Transportation Advisory Committee (TAC) process. Once they approved it, staff went back and asked for a revision. Staff is asking for Council to endorse the changes made in order to move ahead on these projects.

Councilman Newman, member of the Metropolitan Planning Organization (MPO) explained that there was a block of funding for transportation improvements for our MPO area (including Haywood County, Henderson County, Transylvania County and Buncombe County) and it was a very healthy discussion about different projects. Ultimately the MPO reached consensus on all of the funding goals throughout the area.

Mayor Bellamy voiced concern on the Chunns Cove Road/Piney Mountain Road sidewalk. She felt that project was not necessary as (1) bus services is now being provided for people to the Social Security Office; and (2) Council approved a conditional use permit for construction of a church (which property is now for sale) and Council waived them constructing a sidewalk for their project in that area – now we are using tax dollars. She did not support spending money on the Chunns Cove Road/Piney Mountain Road sidewalk as she sees other areas that have a higher need. She did, however, support funding for Patton Avenue sidewalks since we know that is a high pedestrian traffic area.

Ms. Ball said that staff is moving ahead with the Patton Avenue sidewalks, agreeing that there is a high pedestrian need on Patton Avenue rather than on Chunns Cove Road. Ms. Ball explained how staff got to the point of recommending the Chunns Cove Road/Piney Mountain Road sidewalk. Their goal was to create opportunities where we already had right-of-way, the sidewalk was fairly constructible and not a lot of environmental impact.

In response to Mayor Bellamy, Ms. Ball said that we cannot use City forces to spend this money – it has to be contracted out, which means we have to be able to put together construction and bid documents by August 15 because we have to have State approval by September 1. Some of the challenges were our ability to be able to develop the engineering documents and the permitting requirements and getting all of the easements to be able to meet that deadline. We focused on areas where we felt confident we could get engineering drawings as well as all the permitting we needed.

When Mayor Bellamy asked about Haw Creek sidewalks, Ms. Ball said that the biggest problem with Haw Creek sidewalks is we don't have any easements and couldn't obtain them prior to meeting this deadline.

Councilman Mumpower spoke strongly against our participation in the economy recovery stimulus package. The potential for waste is phenomenal due to the rushing. We should be putting sidewalks on roads where we already see pedestrian paths.

In response to Councilman Newman about projects moving forward, Ms. Ball explained that the Patton Avenue project from Regent Park Boulevard to Leicester Highway is funded and we are moving forward with that project. We cannot use economic stimulus money for portion as we previously received an allocation from the State. We also have quite a bit of funding for the sidewalk project Louisiana Avenue which will make a connection to the Emma community. Additionally, we have received funding for Clingman Avenue sidewalks.

In response to Councilman Newman, Ms. Ball said that staff has recently looked at possibly spending the Chunns Cove Road/Piney Mountain Road funds for a sidewalk project on Hendersonville Road or Tunnel Road, not necessarily making one connection to another. Unfortunately the MPO put this before the N.C. Dept. of Transportation (NCDOT) Board last week but she could call and ask how they can make changes at this point. She feels the NCDOT wants to be flexible in working with the City. The message they got is they like the concept of doing in-fill gap projects opposed to a Hendersonville Road project where a lot of development still needed to occur. She felt there is an expressed desire to fill in the places that don't have sidewalks that are closer into the City.

In response to Councilwoman Cape, Ms. Ball gave a brief overview how staff got to the point of making the recommendation of the Choctaw sidewalks.

Mr. Alan Rosenthal supported sidewalks on Patton Avenue.

Mr. Fred English felt Council should be using the economic stimulus money to fund education and construction of sidewalks.

Mr. Mack Cox supported sidewalks and shelters in South Asheville on Hendersonville Road.

Mr. Marc Hunt, Chair of the Greenway Commission, hoped that as staff fine tunes the project on Choctaw that the route remains open for this important section of greenway along the stream, while still being able to implement some of the modifications to Choctaw which are critical to the community.

Mayor Bellamy explained that these funds are designated for these uses only. She stressed that City Council would not choose to install sidewalks over hiring teachers.

It was the consensus of Council to re-appropriate the funds for the Chunns Cove Road/Piney Mountain Road sidewalk project to an adequate place on Hendersonville Road where staff feels it is constructible and we have right-of-way, with the priority of starting downtown and trying to find gaps. Ms. Ball said that she will take that directive back to the MPO, with concurrence from the Chair of the TAC, and then work with the people in NCDOT for approval.

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER AMENDMENTS TO THE UNIFIED DEVELOPMENT ORDINANCE FOR THE PURPOSE OF CORRECTING ERRORS, CODIFYING PRACTICES AND PROCEDURES, AND CLARIFYING THE ORDINANCE

ORDINANCE NO. 3757 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE FOR THE PURPOSE OF CORRECTING ERRORS, CODIFYING PRACTICES AND PROCEDURES, AND CLARIFYING THE ORDINANCE

Mayor Bellamy opened the public hearing at 5:24 p.m.

City Manager Jackson said that this is the consideration of an ordinance amending the Unified Development Ordinance (UDO) for the purpose of correcting errors, codifying practices and procedures, and clarifying the ordinance. This public hearing was advertised on July 3 and 10, 2009.

Working with the Unified Development Ordinance (UDO) on a daily basis, the Planning and Development staff has noted a number of instances where the ordinance contains errors, is incomplete, or needs clarification. Staff compiles these issues as they are noted and regularly proposes amendments to correct these situations and to make the UDO a clearer document for staff and public use without altering the intent of the standard. This set of proposed amendments addresses eleven of those discovered issues.

He provided Council with a list of amendments in detail as follows:

a. This amendment is a correction of a reference (from "chapter" to "article").

b. & k. These amendments add clarifying language concerning the ability of City Council to modify requirements as part of the conditional use approval process and that these are not seen as use variances.

c. & e. These amendments add a clarifying reference to the North Carolina General Statutes concerning appeals from the Board of Adjustment to Superior Court.

d. This amendment brings the ordinance in line with recently adopted Board of Adjustment procedures extending the time for appeal of an administrative decision from 30 days to 60 days. The new wording refers individuals to the rules and procedures to avoid similar problems in the future.

f. This amendment deletes a reference to a buffer standard ('C') that no longer exists in the ordinance.

g. This amendment deletes incorrect procedures for granting alternative compliance for landscaping from the Neighborhood Commercial District standards.

h. This amendment codifies an interpretation/practice that temporary uses need not be on a parcel on which there is another use or structure. The current wording implies that the use must be accessory to a principal use or structure.

i. This amendment clarifies the interpretation that a home occupation must be run by an occupant of the dwelling. The current wording lacks clarity.

j. This amendment corrects a listing error in the conditional use section of the ordinance. Group homes are not showing in the initial listing of conditional uses but are conditional uses in three districts.

This action complies with the Strategic Operating Plan in that it supports the Council goal of completing UDO amendments to improve clarity and address community goals.

The Planning & Zoning Commission, at their June 3, 2009, meeting, approved the amendments unanimously.

Pros:

- Codifies interpretations, procedures and practices.
- Corrects incomplete or improper listings and citations.
- Adds or amends language for greater clarity.

Con:

- None Noted.

The Planning and Development Commission and the Planning & Development Department staff recommend approval of these wording amendments.

Mayor Bellamy closed the public hearing at 5:24 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Newman moved for the adoption of Ordinance No. 3757. This motion was seconded by Vice-Mayor Davis and carried unanimously.

ORDINANCE BOOK NO. 25 – PAGE 343

B. PUBLIC HEARING TO SOLICIT COMMENTS ON A SUBSTANTIAL AMENDMENT TO THE CITY'S 2009-10 CONSOLIDATED ACTION PLAN DETAILING THE CITY'S PLAN TO DISTRIBUTE $1,503,557 OF COMMUNITY DEVELOPMENT BLOCK GRANT FUNDS AND $1,542,387 OF HOME INVESTMENT PARTNERSHIP ACT FUNDS ALLOCATED TO THE CITY OF ASHEVILLE

RESOLUTION NO. 09-149 - RESOLUTION AMENDING THE CITY'S 2009-10 CONSOLIDATED ACTION PLAN DETAILING THE CITY'S PLAN TO DISTRIBUTE $1,503,557 OF COMMUNITY DEVELOPMENT BLOCK GRANT FUNDS AND $1,542,387 OF HOME INVESTMENT PARTNERSHIP ACT FUNDS ALLOCATED TO THE CITY OF ASHEVILLE

Mayor Bellamy opened the public hearing at 5:25 p.m.

Mr. Jeff Staudinger, Community Development Director, said that this is the consideration of a resolution amending the City's 2009-10 Consolidated Action Plan detailing the City's plan to distribute $1,503,557 of Community Development Block Grant funds and $1,542,387 of HOME Investment Partnership Act fund allocated to the City of Asheville. This public hearing was advertised on July 3 and 10, 2009.

The City submitted its Consolidated Action Plan for 2009-2010 to the U.S. Dept. of Housing & Urban Development (HUD) on May 15, 2009. Since that time, the City has received an allocation of and submitted required documentation for CDBG-R funding, freeing up 2009-2010 regular HUD funding. The City also learned after the submittal that its 2009-2010 allocation of HUD and HOME funding had increased. The Housing and Community Development Committee, and the Asheville Regional Housing Consortium both met and recommended the distribution of these additional funds. Both recommending bodies decided to fund applications that either had not been chosen for funding in the original round, or to enhance funding for applications that had been funded for less than their original request. He then reviewed the summary of the total revised funding recommendations.

HUD requires that communities follow their Citizen Participation Plans when adjustments in the Action Plan are necessary. The adjustments recommended by the HCD and Consortium Board require a Substantial Amendment, which necessitates a 30 day public comment period, and a public hearing and City Council approval. A notice of public hearing was published in the Asheville Times-Citizen on June 12, 2009.

This action complies with the City Council Strategic Operating Plan in that the draft Action Plan Amendment directly relates to the Council's Strategic Goal of "Affordable." This plan directly supports the City's affordable housing plan, supports the city-owned land redevelopment process, and will increase the supply of workforce housing. It supports initiatives to end homelessness in Asheville.

Pro:

- The public hearing process gives citizens the opportunity to comment and affect public decision-making regarding the use of public funds.

Con:

- None noted.

Through timely following of the public process, Asheville continues to be eligible for these CDBG and HOME entitlement funds, projected to be over $3.9 million for 2009-2010.

Staff recommends that Council adopt a resolution authorizing a Substantial Amendment to the Consolidated Action Plan for Fiscal Year (FY) 2009-10, which sets out the proposed use of federal Community Development Block Grant (CDBG) and HOME Investment Partnership Act (HOME) funds.

Mayor Bellamy closed the public hearing at 5:28 p.m.

Councilman Newman noted that the distribution of these funds were unanimously recommended by the Asheville Regional Housing Consortium.

Councilman Mumpower could not support the action in that (1) they are borrowed dollars, (2) he didn't believe you can spend your way out of an economic crisis, and (3) these dollars are indulgences to special interests, some of which are non-profits which already enjoy tax-free status.

Mayor Bellamy said that members of Council have previously received a copy of the resolution and it would not be read.

Councilman Newman moved for the adoption of Resolution No. 09-149. This motion was seconded by Councilman Miller and carried on a 5-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 32 – PAGE 125

V. UNFINISHED BUSINESS:

A. NEGOTIATIONS WITH HENDERSON COUNTY ON REGIONAL WATER SUPPLY AND WATER SERVICE AGREEMENT

City Attorney Oast said that this update will summarize recent negotiations between officials of Henderson County and the City of Asheville on various issues regarding water lines, water supply, the Mills River Treatment Plant, and the 1995 Agreement that covers these issues.

Beginning in late 2008, elected officials and staff for the City of Asheville and Henderson County held meetings to discuss the Regional Water Supply and Water Service Agreement between Henderson County and the Asheville Buncombe Water Authority (and its participating members) to supply water to parts of Henderson County (herein "1995 Agreement"). This 1995 Agreement is not the same agreement as the Water Agreement between Asheville and Buncombe County that established the Water Authority; it should also not be confused with the Sullivan Acts. Rather, this 1995 Agreement was part of the series of transactions that resulted in the construction of the Mills River Water Treatment Plant in Henderson County (although it was clearly influenced by both the Water Agreement and the Sullivan Act).

Pursuant to the 1995 Agreement, Asheville agreed to supply Henderson County with water, and to build water lines in Henderson County. As with all agreements of this nature, there are detailed requirements and arrangements regarding the construction and manner of financing of those lines that cannot adequately be covered in this update. The practical application of some of those details has been the source of considerable disagreement between the City and Henderson County.

Also included in the 1995 Agreement was a provision for the City to transfer to Henderson County a piece of property approximately 137 acres in size. The property is located near Brevard Road on the west side of the French Broad River, across from the entrance to the Arboretum. This transfer was to enable Henderson County to negotiate with the Metropolitan Sewerage District (MSD) for sewer services, and required Henderson County to (1) transfer the property to MSD to build a wastewater treatment plant within 10 years, or (2) convey the property to a regional water and sewer authority that includes Asheville and Henderson County as members. If neither of these things occurs within 10 years, Henderson County is to deed the property back to Asheville.

After several unsuccessful attempts to negotiate the language of a deed for this transfer, Henderson County sued the City, and the matter was settled by a consent judgment, which required that the language in the 1995 agreement be incorporated into the deed. This was done, and the property was conveyed to Henderson County and the deed was recorded on July 15, 2002. Unless the conditions in the deed can be satisfied, the terms of the deed and the consent judgment require that the property be returned to Asheville within the times specified therein.

Regarding renegotiation efforts, several years ago, not long after the Brevard Road site was transferred, there was some interest expressed in renegotiating the agreement. There was some preliminary discussion among elected officials at the time, but no significant progress was made. Late in 2008, interest was revived and the two elected bodies met together with the objective of establishing a framework for renegotiating the agreement. At this initial meeting, Henderson County expressed dissatisfaction with several aspects of the 1995 Agreement, and made a proposal to renegotiate it. The City also has identified some issues with respect to which clarification is needed, and places where operations could be improved, and agreed to pursue renegotiation. A joint committee, consisting of some Henderson County Commissioners and some City Council members, was established for this purpose, and met on two more occasions. At these meetings, the issues with the 1995 Agreement were further identified and clarified.

Not surprisingly, a major issue is the Brevard Road site. Henderson County has proposed to sell its interest in the property back to Asheville for monetary consideration. Alternatively, Henderson County would agree to convey the property back to Asheville for marketing and sale, with the proceeds from the sale to be divided, with Henderson County being guaranteed a minimum.

Regarding renegotiation issues, after the meetings of this joint committee, the matter was referred to the respective staffs to address as many issues as possible. He reviewed the following list he complied of some of the issues of importance to the City: (1) define service area – Should be the same as under current agreement, which is the Cane Creek Water & Sewer

District. Additions are possible by amendment, but Asheville should be able to approve; (2) no sales or quantity transfers outside of the service area or to wholesale customers such as local governments, water districts, or private utilities without City consent (not unreasonably withheld); (3) recognize applicability of Sullivan Acts, and that Henderson County customers cannot be treated differently; (4) recognize that "without regard to quantity" refers only to water from facilities in Henderson County (MRTP). This is actually in the current agreement, but is somewhat obliquely worded; (5) Henderson County should (and under Sullivan Acts is required to) be subject to same policies regarding use as in Buncombe County/Asheville; (6) Henderson County should develop a water facilities Master Plan, to become part of the system-wide plan, to be used in capital facilities and land use planning; (7) Henderson County lines should receive same priority as Buncombe/Asheville lines as to installation and water allocation (Sullivan Act may require this); Henderson County should not go to the front of the line, without justification. If Henderson is willing to pay for installation, this may be waived; and (8) if Asheville installs lines at its expense, must be clear demonstration of need, and of payback in defined time (currently 9 years, consistent with MSD). Other issues were identified by Henderson County, and there was considerable overlap. He met several times with our water resources staff and with the Henderson County attorney. Those meetings and discussions resulted in agreement as to most of the identified issues, at least conceptually.

The one major issue on which we were not able to agree was the Brevard Road site. As noted above, the City's position is that the property will come back to the City, pursuant to the terms of the conveyance and consent judgment. We are not aware of any interest by MSD in using the property (recently confirmed), and there is no qualifying regional water and sewer authority to which it could be transferred. With respect to this issue, several possibilities were discussed:

(a) Consideration initially centered on whether the City wished to acquire Henderson County's interest, or whether Henderson County should share in the proceeds of its sale as proposed. Henderson County's interest in the property is extremely limited, however, and we remain fairly far apart on the amount of consideration.

(b) Another possibility that was discussed was that the City would retain the property for some public purpose. A recent water system engineering study has identified the potential need for another water source by about 2025 – 16 years from now – so the City is reconsidering whether to dispose of the property at all. With this in mind various alternatives were proposed regarding continued public use of the property and Henderson County's participation in such use. Such uses include a regional public park, or a future water treatment facility, both of which would benefit Henderson County. Henderson County has made no substantive response to these proposals.

There may be other possibilities for dealing with the Brevard Road property, but these have not been discussed. He felt that that, if the disposition of the Brevard Road site could be resolved to the satisfaction of the City and Henderson County, agreement on the other issues regarding the agreement could be fairly reached fairly easily.

Although there are some lingering uncertainties regarding the implementation of the 1995 Agreement, City staff confirms that we are not in default as to any of its terms, and can continue to implement it as we currently do. At this time, Asheville serves over 500 customers in Henderson County pursuant to the 1995 Agreement.

The next steps include continuing discussions with Henderson County regarding the Brevard Road site. The possibility of holding the property for governmental use was a fairly new factor in our consideration. This may present opportunities for cooperation that have not been considered, and that both parties may find acceptable.

Councilman Newman was pleased with the positive clarifications made to the agreement. He said that Mayor Bellamy, Vice-Mayor Davis and he have further discussed the Brevard property looking for a possible resolution of that issue. Henderson County would like to receive some compensation for returning the property to Asheville now rather than later. In these budget times, we don't have a lot of money to pay and don't necessarily feel like there is a lot of significant residual financial value to Henderson County. Furthermore, as we look at the Brevard Road property, several years ago there was an idea that if we could get the property back in Asheville's jurisdiction sooner that there would be a lot of value there. We could sell it and plug the money into a lot of priorities in the City. But, we now realize that there are a lot of important public values with the property, including greenways along the River. In terms of putting a proposal to Henderson County, Mayor Bellamy, Vice-Mayor Davis and he recommend (1) Council accept the clarifications to the agreement that the attorneys have worked out; and (2) if Henderson County is willing to return the property to Asheville now, that while we cannot commit to any particular use of the property now (because we need to go through a thoughtful process about what might be the future needs on the property) if the City does decide in the future that all or part of the property is not needed for public purposes and is simply sold to capture the economic value of the property, that the revenues from that sale of the land would be 80% to the City of Asheville and 20% to Henderson County. This idea has not been broached yet with Henderson County.

Mayor Bellamy pointed out that the Water Fund would have to be reimbursed prior to any spit of the proceeds. She also mentioned that a letter has been received from MSD saying that they do not want to use the land for a water treatment facility.

Councilman Mumpower moved (1) for City Council accept the clarifications to the agreement that the attorneys have worked out; and (2) if Henderson County is willing to return the property to Asheville now, that while we cannot commit to any particular use of the property now (because we need to go through a thoughtful process about what might be the future needs on the property) if the City does decide in the future that all or part of the property is not needed for public purposes and is simply sold to capture the economic value of the property, that the revenues from that sale of the land would be 80% to the City of Asheville and 20% to Henderson County. This motion was seconded by Vice-Mayor Davis and carried unanimously (Councilman Miller excused).

VI. NEW BUSINESS:

A. RESOLUTION NO. 09-150 - RESOLUTION FOR CONSENT TO BANKRUPTCY RESTRUCTURING OF CHARTER COMMUNICATIONS

City Attorney Oast said that this is the consideration of a resolution for consenting to proposed bankruptcy restructuring by Charter Communications Inc.

In April we received a notice from Charter Communications, the owner/operator of our cable television service, that Charter has voluntarily entered into a corporate reorganization under Chapter 11 of the U.S. Bankruptcy laws. As Council was advised at that time, this is part of a restructuring intended to reduce some of Charter's debt, and provide it with new capital. Charter will continue to operate its franchise in this area, and there should be no termination or interruption in service. This bankruptcy proceeding involves a number of agreements with the "key bondholders" regarding continuance of operations. He provided details of the proposed reorganization.

The notice states that it is not clear under the bankruptcy law that the City's consent is legally required for this transaction, but they are nevertheless providing us with the opportunity to consent. As explained below, it does not appear that our consent is required pursuant to the terms of the franchise, either. If we take no action, it is assumed that we have consented to the

transaction. Charter is requesting that we take action (adopt a resolution), or provide some affirmative indication that we do not intend to take action on or before July 20.

On review, it appears that this bankruptcy/reorganization proceeding affects Charter's (and its stockholders') financial situation more than its operations. The Chapter 11 proceeding is designed so that a corporation may continue operations (and generate income) while its debt is restructured. As part of the assurances provided by Charter in its agreements, Charter's CEO and its current local management and employees will remain in place. Further, all cable franchises held by Charter will continue to be operated by the local subsidiary. For Asheville, this local subsidiary is Robin Media Group (herein "RMG"). Also as part of the agreement, Charter (and its subsidiaries) will continue to pay franchise fees. This commitment to continue servicing the franchise and pay franchise fees is confirmed by other industry sources who are familiar with the Charter bankruptcy, and does not appear to be cause for concern.

Under our Cable Services Ordinance (which governs our franchise with RMG), we have the ability to terminate our franchise if the franchisee declares bankruptcy "and thereby becomes unable to pay its debts as they mature." As noted, however, the franchisee is RMG, and the information provided by Charter, which includes an order authorizing certain payments, specifically authorizes Charter and subsidiaries to pay franchise fees and other operational obligations as they become due. Our ordinance also provides that our consent is required whenever there is a change in control of the franchise. A corporate restructuring of the parent company does not appear to trigger this requirement, and the local franchisee will continue to be RMG. However, any transfer or disposition of assets (franchise) coming out of the bankruptcy certainly could trigger this requirement, so it is important for the City to continue to monitor the process. In any event, our current franchise with Charter has slightly over a year left to run; it expires on July 31, 2010. After that date (assuming no prior termination), the State of North Carolina becomes the franchising authority, pursuant to G.S. 66-350 et seq., adopted in 2006, which establishes a State franchise for Cable Television Service.

Back in April, we had a limited opportunity to object to Charter's bankruptcy if, in our opinion, they had failed to make "adequate assurance" for payment of utility costs (i.e., water). Our internal review indicated no reason at that time to make such an objection and we did not. The issue now under consideration is whether there is any reason to object to the proposed confirmation of the restructuring plan. Reasons for objecting would include chiefly that Charter/RMG is in default as to any provisions of its franchise with us, whether financial or performance based. I have checked with appropriate City offices, and Charter is not in default. If default does occur, Charter has agreed that the "cure bar date" (the deadline for asserting claims of default) does not apply to franchises with a State or local government.

One issue that has been identified is the City's "I-Net," or the system of fiber optic connections between City facilities that enables secure digital communications. Pursuant to our franchise, Charter is responsible for installing and maintaining this system. This is part of Charter's obligation under the franchise and continues during any extension of the franchise, subject to certain terms and conditions regarding maintenance being renegotiated. Since the franchise will soon be ending, we are using this bankruptcy as an opportunity to begin discussions with Charter about the I-Net. They have expressed a desire to continue working with us on this and issues related to their non-video services (internet, telephone).

As drafted by Charter, the form resolution provided to the City is deemed to have the force of an agreement, and committed Council not to amend the resolution without Charter's consent. He was reluctant to commit Council's legislative discretion in this way. Moreover, although it appears to be unlikely, the conditions supporting the City's consent could change such that a commitment of this nature would be inadvisable, so this language was removed from the supplied draft.

City Attorney Oast asked that the proposed resolution before Council be amended to revise (5) to read as follows: "This resolution is conditioned upon Robin Media Group performing its obligations under the Franchise until the closing of the Transaction. The City does not waive any rights it may have to require Robin Media Group to comply with the Franchise after the closing of the Transaction."

Pros:

- Continues current level of service
- Provides a basis for opening discussions with Charter on future of other services

Cons:

- None noted

There is no fiscal impact, except for maintenance of current cable and related services. This resolution is essentially neutral.

Unless Council has objections to the proposed financial restructuring of Charter, adoption of the resolution is recommended.

Upon inquiry of Mayor Bellamy, City Attorney Oast information received is that Charter has pledged to maintain all their current franchise obligations and our PEG fees is one of their franchise obligations, thus they will not be affected.

When Mayor Bellamy asked for public comments, none were received.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Mumpower moved for the adoption of Resolution No. 09-150, with the revised language read by City Attorney Oast. This motion was seconded by Councilwoman Cape and carried unanimously (Councilman Miller excused).

RESOLUTION BOOK NO. 32 – PAGE 129

B. RESOLUTION NO. 09-151 - RESOLUTION AUTHORIZING THE MAYOR TO EXECUTE A MEMORANDUM OF UNDERSTANDING WITH THE UNIVERSITY OF NORTH CAROLINA – ASHEVILLE

Assistant to the City Manager Lauren Bradley said that this is the consideration of a resolution authorizing the Mayor to sign a Memorandum of Agreement with UNC-Asheville that establishes a framework by which UNC-Asheville and the City of Asheville will work to exchange information, conduct cooperative research, and jointly explore projects for the sustainability of the Asheville community.

Through its annual strategic planning process, the city council identified *Sustainability* as one of five key focus areas for the current fiscal year. One action item specific to Sustainability is "expand partnerships with UNC-Asheville, AB-Tech and other institutions to achieve common goals, including health and wellness, workforce development, and sustainable economic development." Staffs from both organizations met this past January and have been meeting bi-monthly since in an effort identify areas of opportunity for collaboration and partnership. From those initial meetings, five (5) collaboration areas were identified to include:

1. Economic Development and Technology
2. Health and Wellness
3. Cultural and Recreation
4. Environmental Sustainability

5. Public Safety

Many of these focus areas overlap with a number of areas identified in City Council's Strategic Plan, to include public safety, economic development, and health and wellness. City staff will briefly provide operational updates on progress made in each focus area.

The Memorandum of Understanding encourages both organizations to (1) engage in dialogue about activities in the five collaborative areas; (2) identify and undertake collaborative activity and joint research; (3) organize joint activities, such as courses, conferences, seminars and similar events, in the five collaboration areas; (4) exchange relevant materials and information; and (5) identify new areas for collaboration.

Pros:

- Formalizes a partnership between the City of Asheville and UNCA to work collaboratively on initiatives that benefit the community.
- Recognizes the historic relationship the two organizations have had since 1927.

Con:

- None noted.

Staff recommends City Council authorize the Mayor to sign a Memorandum of Understanding with UNC-Asheville for further collaborative efforts in the focus areas identified above.

When Mayor Bellamy asked for public comments, none were received.

Mayor Bellamy said that members of Council have been previously furnished with copies of the resolutions and they would not be read.

Councilman Mumpower moved for the adoption of Resolution No. 09-151. This motion was seconded by Vice-Mayor Davis and carried unanimously (Councilman Miller excused).

RESOLUTION BOOK NO. 32 – PAGE 130

C. ORDINANCE NO. 3758 - BUDGET AMENDMENT FOR A SERIES OF DONATIONS AND DRAW DOWN FROM THE ASHEVILLE PARKS & GREENWAYS FOUNDATION TO SUPPORT RECREATION PROGRAMS

Superintendent of Recreation Danny Hopkins said that this is the consideration of the following budget amendments to increase the budgets for contributions to support programming and special projects: (1) Park Maintenance by $1,800; (2) the W.C. Reid Center by $1,475; (3) Senior Programs by $2,494; (4) the Burton Street Center by $81; (5) the Stephens-Lee Center by $100; (6) the Murphy-Oakley Center by $210; and (7) Special Projects budget by $13,790.

The City of Asheville in the Parks, Recreation & Cultural Arts Department has received contributions to support programming and special projects within the department operations. Description of each is listed below.

- $1,800 from the Asheville Parks and Greenways Foundation to increase the operational budget in the Parks Maintenance Division to support the Hanging Baskets program.

- $13,790 from the Asheville Parks and Greenways Foundation to increase the special projects budget to support arts programming at the W.C. Reid Center for Creative Arts.

- $1,475 from fundraising activities to increase the operating budget to support programming at the W.C. Reid Center.

- $2,494 from fundraising activities and a sponsorship by Humana to increase the operating budget to support programming and operation of athletics and arts programs for senior citizens in the Recreation Division.

- $391 from community donations to increase the operating budget to support youth recreation programming at area community centers in the Recreation Division.

This action complies with the Parks, Recreation, Cultural Arts & Greenway Master Plan in that it makes use of diverse funding sources for successful implementation in the delivery of parks, recreation and cultural art services.

Pro:
- Provide funds to support parks, recreation and cultural arts programming enhancements

Con:
- None

The fiscal impact would be to increase the City's Fiscal Year 2009/10 operational budget by $6,160, and special projects budget by $13,790.

Staff recommends City Council to adopt budget amendments authorizing the City Manager to increase the budgets for 1) Park Maintenance by $1,800, 2) the W.C. Reid Center by $1,475, 3) Senior Programs by $2,494, 4) the Burton Street Center by $81, 5) the Stephens-Lee Center by $100, 6) the Murphy-Oakley Center by $210, and 7) Special Projects budget by $13,790.

When Mayor Bellamy asked for public comments, none were received.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the ordinance and it would not be read.

Councilwoman Cape moved for the adoption of Ordinance No. 3758. This motion was seconded by Councilman Mumpower and carried unanimously (Councilman Miller excused).

ORDINANCE BOOK NO. 25 – PAGE 346

D. RESOLUTION NO. 09-152 - RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN AN AGREEMENT WITH THE N.C. DEPT. OF ENVIRONMENT & NATURAL RESOURCES, DIVISION OF POLLUTION PREVENTION AND ENVIRONMENTAL ASSISTANCE, TO ACCEPT A GRANT FOR A RESIDENTIAL BACKYARD COMPOSTING PROGRAM

ORDINANCE NO. 3759 - BUDGET AMENDMENT TO ACCEPT A GRANT AWARD FOR A RESIDENTIAL BACKYARD COMPOSTING PROGRAM

Public Works Director Mark Combs said that this is the consideration of (1) a resolution authorizing the City Manager to accept a grant award from the N.C. Dept. of Environment and Natural Resources (NC DENR), Division of Pollution Prevention and Environmental Assistance, for a residential backyard composting program; and (2) the accompanying budget amendment, in the amount of $6,000.

The City has been awarded a grant of $5,000 from the NC DENR to purchase compost bins with a cash match from the City of $1,000 to be spent on outreach and promotional materials

to encourage residential backyard composting. The grant award from NC DENR will be used to sell compost bins at a subsidized rate for purchase by City residents. Compost bins on average retail from $90.00 to $200.00. It is expected that the City will be able to sell compost bins for approximately $35.00 to $40.00 which is a substantial value for residents.

Backyard composting will enhance the City's waste reduction and recycling program efforts. By placing backyard composting bins in the homes of residents, the City will be able to target the diversion of kitchen and garden organics from the landfill.

This action promotes the City's strategic priorities to be green and environmentally sustainable by reducing waste and encouraging recycling.

Pros:

- Promotes waste diversion from the landfill, decreasing tipping fees
- $5,000 grant to City
- Increases residential awareness of a sustainable environmental practice

Con:

- $1,000 cost to City

The total cost of this project will be $6,000. The NC DENR will grant the City $5,000, and the City will be required to provide a $1,000 cash match. The City's $1,000 cash match will come from the Public Works Department's approved Fiscal Year 2009-10 budget (solid waste disposal tax).

City staff recommends City Council adopt (1) a resolution authorizing the City Manager to accept a grant award from NC DENR, for a residential backyard composting program; and (2) a budget amendment to accept the residential backyard composting grant from the NC DPPEA.

When Mayor Bellamy asked for public comments, none were received.

Councilman Mumpower could not support this action in that we need the state to fix the underfunded court system. He felt that if the City needs a compost program, we should take that on as a City function.

There was a brief discussion, initiated by Councilwoman Cape, about a for-profit business trying to get started which is looking at food waste as an organic composting provider (residential and commercial). She felt the City needs to look at composting on a larger scale and encouraged City staff be open to conversations with them and any other provider that is known for that service. Mr. Combs explained this is a small grassroots program which far more efficient from a carbon and efficiency standpoint. It uses zero staff, equipment and fuel.

Mayor Bellamy said that this program is a portion of the solution, not the complete solution to reduce solid waste.

Mayor Bellamy said that members of Council have been previously furnished with copies of the resolution and ordinance and they would not be read.

Vice-Mayor Davis moved for the adoption of Resolution No. 09-152. This motion was seconded by Councilman Miller and carried on a 5-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 32 – PAGE 131

Councilwoman Cape moved for the adoption of Ordinance No. 3759. This motion was seconded by Councilman Miller and carried on a 5-1 vote, with Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 25 – PAGE 348

E. RESOLUTION NO. 09-153 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE A CONTRACT WITH OWENS ROOFING INC. TO REPLACE THE ROOF AT THE CIVIC CENTER ARENA AND CONCOURSE

ORDINANCE NO. 3760 - BUDGET AMENDMENT FOR ADDITIONAL COSTS RELATED TO REPLACEMENT OF THE ROOF AT THE CIVIC CENTER ARENA AND CONCOURSE

Director of Transportation and Engineering Cathy Ball said that this is the consideration of (1) a resolution authorizing the City Manager to execute a contract with Owens Roofing Inc. in the amount of $1,497,982 plus a contingency of $10% ($150,000) to replace the roof at the Civic Center arena and concourse; and (2) a budget amendment, in the amount of $300,000 for additional costs that exceed the original budget amount of $1,500,000.

Three years ago, City Council adopted a budget of $1,500,000 to replace the roof at the Civic Center concourse and arena. Cort Architectural Group was hired to provide a feasibility analysis and then later to complete the construction documents for the project. On July 1, 2009, the City received seven bids for the roof replacement.

The low bidder was Owens Roofing Inc., located in Raleigh, North Carolina, with a base bid of $1,350,159 and a bid of $147,823 for alternate number 1. Owens Roofing's total bid was $1,497,982. The next bidder was H&M Construction with a total bid of $1,673,200.

The total cost of the project will be approximately $1,800,000 which includes $18,000 for the feasibility analysis, $132,000 for design and construction documents and a maximum of $1,650,000 for construction. As stated earlier, the original budget for the project was $1,500,000. The additional cost of $300,000 is attributed to the several factors which include the following:

- The estimate was completed three years ago. We had hoped that this would be offset by the current economic conditions but the bids did not reflect this.
- The designer did not anticipate the need to seal all the concrete (alternate number 1) following the repair work. The concrete needs to be sealed to extend the life of the project and potential for water infiltration and to prevent the exterior of the building from looking like patch work.

The Civic Center Commission members have been polled and overwhelming agree with staff recommendations.

This recommendation complies with City Council's 2008-09 Strategic Plan by providing a green alternative roof option and sustainability of addressing capital needs of the Civic Center.

Staff is requesting a budget amendment in the amount of $300,000 to supplement the $1,500,000 previously budgeted for the project. $240,000 of this amount will come from the reprogramming of capital funding that was previously approved for other Civic Center capital projects. A list of the projects in which funding will be diverted from is included below:

Project	Amount Diverted	Notes
Marquee	$20,000	Left $5k for replacement of stationary

		side
TW Fire Exits	25,000	Left $90k, which should complete project
Cooling Tower	13,573	Closes old project
Minor Cap Equip.	12,045	Left small balance for future purchases
CC Capital Reserve	5,000	Use all CC reserve
Arena Seating	150,000	Left $25k for emergency replacements
Air Handler Repair	2,756	Closes old project
General Improvements	11,626	Left small balance for future improvements
Total	$240,000	

In addition, staff recommends appropriating $60,000 from the General Fund capital reserves. As staff reported to Council in June, the balance in the General Fund capital reserve was down to $20,000. Since that time, staff has identified approximately $85,000 in savings to transfer into the reserves from the Haw Creek/Avon Road sidewalk project. As a result, as of July 6, 2009, there was approximately $105,000 available in the General Fund capital reserves. Appropriating $60,000 for the arena roof replacement will leave $45,000 available for future use. It should also be noted that once the City receives the final reimbursement from the State for the Haw Creek/Avon Road project, there will likely be additional funding available in that project that can be transferred to the capital reserve. Staff will report on that to Council during the Fiscal Year 2009-10 first quarter Financial Report.

Pro:

- This project will replace the roof on the Civic Center arena and concourse which is in desperate need of replacement.

Con:

- The project will cost an additional $300,000.

Staff recommends City Council authorize the City Manager to execute a contract with Owens Roofing Inc. in the amount of $1,497,982 plus a contingency of $10% ($150,000) to replace the roof at the Civic Center arena and concourse, and adopt the associated budget amendment.

When Mayor Bellamy asked for public comments, none were received.

Mr. John Cort, Cort Architectural Group, responded to various questions/comments from Councilman Mumpower, some being, but are not limited to: are there any concerns about the close low bids; why has it taken three years to get to this point; how much money did the exploration to see if the roof could handle a living roof with additional load carrying capacity cost; how long did that exploring take; did time delays result in additional costs; and what is the additional cost to seal all the concrete following the repair work.

In response to Councilwoman Cape, Mr. Cort described the roof as a white PVC roof that has reflectants of .78 and will quality for LEED standards. He felt sealing the concrete was a good thing to discover before the project started.

Councilwoman Cape encouraged anyone who is interested in a green roof look at what the weight specifications need to be.

Mayor Bellamy publicly recognized Civic Center Director Sherman Bass who will be leaving his position to accept another in his hometown in Texas. Vice-Mayor Davis said that his tenure was short, but significant as he has made significant positive changes during his time as Civic Center Director. The building continues to be active and thanked him for his service.

Mayor Bellamy said that members of Council have been previously furnished with copies of the resolution and ordinance and they would not be read.

Councilman Newman moved for the adoption of Resolution No. 09-153. This motion was seconded by Vice-Mayor Davis and carried unanimously.

RESOLUTION BOOK NO. 32 – PAGE 132

Councilwoman Cape moved for the adoption of Ordinance No. 3760. This motion was seconded by Councilman Miller and carried unanimously.

ORDINANCE BOOK NO. 25 – PAGE 350

F. RESOLUTION NO. 09-154 - RESOLUTION ACCEPTING ELLA STREET AS A CITY-MAINTAINED STREET

ORDINANCE NO. 3761 - BUDGET AMENDMENT FROM ASHEVILLE CITY SCHOOLS FOR THE COST OF MATERIALS TO REPAIR A FAILED STORM DRAINAGE PIPE ON ELLA STREET

City Manager Jackson said that this is the consideration of a resolution to accept Ella Street for public maintenance, and the associated budget amendment, in the amount not to exceed $5,000, for the cost of materials to repair a failed storm drainage pipe on the street.

Code of Ordinances sec. 7-15-1(f)(4)a requires that streets dedicated for public use be accepted by resolution of the City Council. Ella Street is located within a public right-of-way.

This street is a primary route for school buses to service Asheville Middle School. The road currently has a failing storm drain pipe. Asheville City Schools has requested that the City partner with them to repair the storm drainage pipe and take over maintenance of the street. Aside from the failing storm drainage pipe, the street is in good condition. The City has proposed that the Asheville City School System pay the cost of materials and the City will provide the labor and equipment.

Ella Street has an average width of 18 feet, a length of 0.05 mile, and a right-of-way width of 40 feet. The typical two-year warranty period for major failures will be waived because the City of Asheville will be repairing the storm drainage pipe.

Following City Council's approval of this resolution, the subject street will be added to the official Powell Bill List.

This action complies with the City Council 2008-09 Strategic Operating Plan within the Sustainable Focus Area by accepting street infra-structure to help support the healthy growth of the City.

Pros:

- The City of Asheville will receive Powell Bill Funds from the North Carolina Department of Transportation (NCDOT) to help maintain the streets.
- The streets provide access to Asheville Middle School particularly for school buses.

Cons:

- Powell Bill Funds will not cover 100% of the total cost to maintain the streets.
- The City will provide labor and equipment to make repairs to the storm drainage system.

The financial impact to the City will be in the cost of the labor and equipment which is paid from the Stormwater Enterprise Fund. The Asheville City School System will cover the cost of the materials which is not expected to exceed $5,000.

The responsibility of maintenance will belong to the Public Works Department. The City will receive Powell Bill Funds in the future to help maintain the streets. Currently, the Powell Bill Funds equate to $6,326 per mile compared to the City's maintenance cost of $18,189 per mile.

Staff recommends that City Council accept Ella Street as a city-maintained street and adopt the budget amendment to cover the cost of the materials to repair the storm drainage pipe.

When Mayor Bellamy asked for public comments, none were received.

Mayor Bellamy said that members of Council have been previously furnished with copies of the resolution and ordinance and they would not be read.

Councilman Mumpower moved for the adoption of Resolution No. 09-154. This motion was seconded by Councilwoman Cape and carried unanimously.

RESOLUTION BOOK NO. 32 – PAGE 133

Councilman Mumpower moved for the adoption of Ordinance No. 3761. This motion was seconded by Councilwoman Cape and carried unanimously.

ORDINANCE BOOK NO. 25 – PAGE 353

G. RESOLUTION NO. 09-155 - RESOLUTION AUTHORIZING THE CONVEYANCE OF AIR SPACE FOR THE PURPOSE OF CONSTRUCTING PERMANENT ARCHITECTURAL FEATURES AT 51 BILTMORE AVENUE TO MCKIBBON HOTEL GROUP INC.

Real Estate Manager Nikki Reid said that this is the consideration of a resolution authorizing the conveyance of air space for the purpose of constructing permanent architectural features at 51 Biltmore Avenue to McKibbon Hotel Group, Inc.

On June 1, 2009, a qualifying bid was received from McKibbon Hotel Group, Inc. in the amount of $889 for the purchase of 187 square feet of air space for the purpose of constructing permanent architectural features to a proposed building at 51 Biltmore Avenue. Pursuant to N. C. General Statute sec. 160-269, the City Council of the City of Asheville adopted Resolution No. 09-113 directing the City Clerk to advertise for upset bids in regard to airspace at 51 Biltmore Avenue. The notice ran in the Asheville Citizen Times on June 12, 2009. No qualifying upset bids were received in response to said advertisement.

This air rights request is specific to the proposed hotel, the Aloft by Starwood, via McKibbon Hotel Group, Inc. According to the plans, the hotel building will be sited at the corner of Biltmore Avenue and Aston Street. At 90' above the sidewalk level on the Aston Street side, a decorative seam metal roof element, known as a "swoof", is designed that will extend 5'6" over the right-of-way boundary (sidewalk), with a corresponding length of 34'. The total area of this architectural feature that encroaches into the public right-of-way equals 187 square feet.

Approval of the resolution will authorize the sale of the property to McKibbon Hotel Group, Inc. for the amount of $889.00.

This action complies with the City Council Strategic Operating Plan in that this development proposal supports the strategic goal of sustainability by providing infill growth where infrastructure currently exists and encourages economic development in the downtown.

This action conforms to current policy regarding air rights disposition. The City Council Planning and Economic Development Committee is scheduled to review the air rights disposition policy in the August meeting.

Pros:

- The sale will be at fair market value.
- The architectural details will provide a more visually interesting façade on the building.

Con:

- There is no negative impact.

Additional revenue in the amount of $889.00 that will be directed to the City's bottom line.

Economic Development staff recommends adoption of the resolution.

When Mayor Bellamy asked for public comments, none were received.

In response to Councilman Mumpower, Ms. Reid said that the City Council Planning and Economic Development Committee is scheduled to review the air rights disposition policy in their August meeting.

Mayor Bellamy said that members of Council have been previously furnished with copies of the resolutions and they would not be read.

Councilman Newman moved for the adoption of Resolution No. 09-155. This motion was seconded by Councilwoman Cape and carried unanimously.

RESOLUTION BOOK NO. 32 – PAGE 134

At 5:57 p.m., Councilman Mumpower moved to excuse Councilman Miller from the meeting due to an unexpected family emergency. This motion was seconded by Councilwoman Cape and carried unanimously.

H. RESOLUTION NO. 09-156 - RESOLUTION AUTHORIZING THE CITY MANAGER TO MAKE PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE CITY OF ASHEVILLE OPEN TENNIS CHAMPIONSHIPS ON JULY 16 AND 17, 2009

RESOLUTION NO. 09-157- RESOLUTION AUTHORIZING THE CITY MANAGER TO MAKE PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE FOR A PRIVATE EVENT AT WINDOWS ON THE PARK EVENT ON AUGUST 1, 2009

Ms. Diane Ruggiero, Superintendent of Cultural Arts, said that this is the consideration of resolutions authorizing the City Manager to make provision for the possession and consumption of malt beverages and/or unfortified wine at 1) City of Asheville Open Tennis Championships on July 16 and July 17, 2009, and 2) private event at Windows on the Park on August 1, 2009, from 4:30 p.m. to 8:30 p.m.

City of Asheville Open Tennis Championships

The Western North Carolina Tennis Association has requested through the Asheville Parks, Recreation and Cultural Arts Department that City Council permit them to serve beer and/or unfortified wine at the City of Asheville Open Tennis Championships coordinated by the City of Asheville and allow for consumption at this event.

The City of Asheville Open Tennis Championships will be held on Thursday, July 16, 2009 from 5:00 p.m. to 10:00 p.m. and Friday, July 17, 2009 from 5:00 p.m. to 10:00 p.m. within the boundaries of the Aston Park Tennis Complex and will be free and open to the public.

Windows on the Park Private Event

Those Girl, LLC has requested through the Asheville Parks, Recreation and Cultural Arts Department that City Council permit them to serve beer and/or unfortified wine at a private event on the grass area of the Pack Square area in Pack Square Park adjacent to their business, Windows on the Park, located in the Biltmore Building (Area A). The malt beverages and unfortified wine will be served in glass containers and bottles.

Those Girls, LLC have requested a temporary extension of their ABC permit (premise 0016753AJ) from the North Carolina Alcoholic Beverage Control Commission (ABC) for the date of the event. Event organizers will follow all City policies outlined in the Outdoor Special Event Guide and ordinances regarding alcohol on City property.

This action does not comply with the City Council Strategic Operating Plan, nor does it comply with the Parks, Recreation and Cultural Arts Master Plan.

Pros:

- City of Asheville Open Tennis Championships: Allows fundraising opportunity for the Western North Carolina Tennis Association
- Windows on the Park Private Event: None

Cons:

- City of Asheville Open Tennis Championships: Potential for public safety issues
- Windows on the Park Private Event: Potential for public safety issues, the event is not open to the public

The fiscal impact for these events are as follows: (1) City of Asheville Open Tennis Championships: Overtime pay for Asheville Police officers; (2) Windows on the Park Private Event: None.

City staff recommends City Council adopt a resolution authorizing the City Manager to make provision for the possession and consumption of malt beverages and/or unfortified wine at 1) City of Asheville Open Tennis Championships on July 16 & July 17, 2009 at the Aston Park Tennis Complex, and 2) Those Girls, LLC for a Windows on the Park private event on August 1, 2009, on grass area in the Pack Square area of Pack Square Park.

When Mayor Bellamy asked for public comments, none were received.

Mayor Bellamy said that members of Council have been previously furnished with copies of the resolutions and they would not be read.

Councilwoman Cape moved for the adoption of Resolution No. 09-156. This motion was seconded by Councilman Newman and carried on a 3-2 vote, with Mayor Bellamy and Councilman Mumpower voting "no" (Councilman Miller excused).

Councilwoman Cape moved for the adoption of Resolution No. 09-157. This motion was seconded by Councilman Newman and carried on a 3-2 vote, with Mayor Bellamy and Councilman Mumpower voting "no" (Councilman Miller excused)

RESOLUTION BOOK NO. 32 – PAGE 138

I. RESOLUTION NO. 09-159- RESOLUTION AUTHORIZING THE CITY MANAGER TO MAKE PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT ROCKIN' RIVERFEST ON AUGUST 1, 2009

Ms. Diane Ruggiero, Superintendent of Cultural Arts, said that this is the consideration of resolutions authorizing the City Manager to make provision for the possession and consumption of malt beverages and/or unfortified wine Rockin' RiverFest on August 1, 2009.

RiverLink has requested through the Asheville Parks, Recreation and Cultural Arts Department that City Council permit them to serve beer and/or unfortified wine at Rockin' RiverFest and allow for consumption at this event.

Rockin' RiverFest will be held on Saturday, August 1, 2009 from 11:00 a.m. to 5:00 p.m. within the boundaries of French Broad River Park, as per the event area limits referenced on the accompanying site map.

This action does not comply with the City Council Strategic Operating Plan, nor does it comply with the Parks, Recreation and Cultural Arts Master Plan.

Pro:

- Allows fundraising opportunity for the Asheville Downtown Association

Con:

- Potential for public safety issues

City staff recommends City Council adopt a resolution authorizing the City Manager to make provision for the possession and consumption of malt beverages and/or unfortified wine at Rockin' RiverFest on August 1, 2009.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilwoman Cape moved for the adoption of Resolution No. 09-159. This motion was seconded by Councilman Newman and carried on a 3-2 vote, with Mayor Bellamy and Councilman Mumpower voting "no" (Councilman Miller excused).

RESOLUTION BOOK NO. 32 – PAGE 143

J. BOARDS & COMMISSIONS

Recreation Board

It was the consensus of Council to re-advertise for vacancies on the Recreation Board.

URTV Inc. Board of Directors

Vice-Mayor Davis, Chair of the Boards & Commissions Committee, said that the Committee met with the Executive Director and some members of the URTV Inc. Board to discuss some concerns that have been brought to the attention of City Council. Even though City

Council has limited authority over the URTV (2 appointments and City allocation of funding from PEG fees collected by Charter cable subscribers), public dollars are being spent and they need to be good stewards of those dollars. At that meeting, Ms. Lauren Bradley, Assistant to the City Manager, offered some options to City Council, those being (1) conducting an independent performance review of URTV at an estimated cost of $5-15,000 which the City would be responsible for; or (2) delay agreement renewal for a period of six months to provide an opportunity for the URTV board to resolve community concerns and demonstrate board, operational and financial stability to the City Council; move forward with making its appointment to the Board and task Councilman Russell (liaison to the URTV Inc. Board of Directors) to provide updates to the Boards & Commissions Committee; and delay further funding allocations during the six month period until the agreement can be renegotiated. The Committee felt there was an absence of effective problem-solving at some level. As the Committee discussed specifically some concerns, they felt it was appropriate that they consult with the City Attorney and if we are operating within reasonable parameters, that we provide the URTV Board with an informal list of those concerns to be further fleshed out and allow them 60 days to come back with an action plan addressing those concerns in a way that their Board and staff feels best. They were receptive to this. Therefore, was the recommendation of the Boards & Commissions Committee that a letter be sent from the Boards & Commissions Committee to the URTV Inc. Board of Directors outlining concerns expressed and that those concerns be addressed and provided to City Council by the end of September, 2009 in the form of an action plan to mediate or problem-solve those concerns. Some concerns included, but are not limited to, the dissention amongst board members; dissention amongst the board members and the public; and consideration of changing the membership from 13 back to 11 as the original agreement was written (which they expressed a willingness to do). He noted that Council will continue moving forward with making their appointment on the URTV Inc. Board.

He said that Councilman Russell is liaison to the URTV Inc. Board and unfortunately due to illness he was unable to attend the meeting. He said that we did invite URTV Inc. Board members to this meeting so they would have the opportunity to be heard.

Councilman Mumpower, member of the Boards & Commissions Committee) said that since the City of Asheville's management agreement with URTV, Inc. is set to expire November 23, 2009, he felt that after the action plan is received there would be a reasonable period of time for contract negotiation.

Councilman Mumpower encouraged City Council to note any specific concerns they have and that those concerns would be included in the informal letter to the URTV Board. It is not Council's intent to oversee the Board, but just want to raise our concerns and collaborate with them in a partner-like fashion. One specific item is that we would like for them to engage further with the vocal minority that have expressed a number of concerns in some direct fashion, with an effort on problem-solving that conflict.

Throughout discussion, the following concerns were raised by Council: concern about a concealed gun and the safety of children; need to clearly state their concealed weapons policy; was to communicate with the community about the type of programming being aired at certain times of the day (not suitable for children, etc.); clarity and transparency of roles of producers, staff, board and volunteers; if there is a disagreement with someone, there is a decorum and way to carry out those concerns; some mechanism for Board development to arrive at some core values for URTV Inc.; and clarification of the relationship role of the City Council liaison; adherence to the Open Meetings Law.

The following individuals raised concerns over URTV. These individuals were invited to e-mail City Council with their concerns and those would be given fair consideration. Some concerns raised include: interested people be included in future meetings with URTV Inc. Board and staff; problems are criminal (temporary restraining orders, assault charges, stalkers, larceny, sexual assault on children); there is harassment; allegations of brandishing a weapon; people

with criminal records on URTV; vital members of the community summarily kicked off the station for no reason; and failings of the current Executive Director; and need for reinstatement of the show "Citizen Speak"; and some people get suspended for violations and some people do not.

Mr. Alan J. Rosenthal (presented Council with a document titled "Public's Authority To Make Demands)
Mr. Fred English
Mr. Harry Maroni (presented Council with a letter on his suspension dated 7-8-09)

The following individuals spoke in support of URTV. These individuals were also invited to e-mail City Council with their concerns and those would also be given fair consideration. Some concerns raised include: defamation of character; problem that management is not being heard; group of people who want to run URTV for their own personal use; safety of children when someone has a gun on the property; need for City Council to come down to the station; the vocal minority are not producers and URTV is for producers; the vocal minority has broken several basic rules; the vocal minority are thieves and liars and they should not be invited to URTV, but investigated and prosecuted; and there is a group of vocal people who do not like the Executive Director because she does her job.

Ms. Dale Joyner
Mr. John Robinson
Rev. Christopher Chiaronmonte

It was the consensus of Council to accept the Boards & Commissions Committee recommendation regarding a letter being sent to the URTV Inc. Board.

VII. OTHER BUSINESS:

A. CLAIMS

The following claims were received by the City of Asheville during the period of June 19-July 9, 2009: Latisha Twitty (Parks & Recreation), Jill Prescott (Police), Thrifty Muffler (Water), Anthony Cerrato (Water), Larry Nix (Water), James Mease (Police), Sheila Jones (Police), Linda Simpson (Streets), Edward Burden (Transit), Samuel C. Wright (Police) and Louise Reed (Water).

These claims have been referred to Asheville Claims Corporation for investigation.

B. LAWSUITS

The City of Asheville filed a complain on June 26, 2009, on the following: (1) City vs. DVL Pennco, Inc., d/b/a 1-800-GOT-JUNK – This lawsuit involves collection of civil penalties for violation of the City's sign ordinance; and (2) City vs. Capel Enterprises, LLC, All Junk LLC, Joseph G. Capel Jr., and Robin M. Capel, d/b/a 77-Junk – This lawsuit involves collection of civil penalties for violation of the City's sign ordinance. Both lawsuits will be handled in-house.

The City received a Complaint in Federal Court on July 8, 2009, in the matter of Darrell Gaines v. L. Tomasetti, David Nash, J. Clinard and John Doe. This lawsuit involves false arrest and abuse. This matter will be handed in-house.

The City received a Complaint on July 8, 2009, in the matter of Robert Allen Sartori v. Buncombe County, et al.; City of Asheville, et al.; Genesis Insurance Co./Jonathan Nelson Insurance, et al.; Genesis Insurance Co./Rodney Lynch Insurance Co., et al. This lawsuit involves lack of jurisdiction for imprisonment. This matter will be handled in-house.

VIII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Closed Session

At 8:17 p.m., Councilman Newman moved to go into closed session for the following reasons: (1) To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including litigation involving the following parties: City of Asheville; County of Henderson; Cane Creek Water and Sewer District; Asheville-Buncombe-Henderson Water Authority; Buncombe County; Spicewood Development, LLC; Villas at Cedar Hill, LLC; and Raintree Realty and Construction, Inc., Substitute Trustee. The statutory authorization is N.C. Gen. Stat. sec. 143-318.11(a)(6); (2) To establish or to instruct the City's staff or negotiating agents concerning the position to be taken by or on behalf of the City in negotiating the terms of contracts for the acquisition of real property by purchase, option, exchange or lease. The property is Villas at Cedar Hill. The statutory authorization is contained in G.S. 143-318.11(a)(5); and (3) To prevent disclosure of information that is privileged and confidential, pursuant to the laws of North Carolina, or not considered a public record within the meaning of Chapter 132 of the General Statutes. The law that makes the information privileged and confidential is N.C.G.S. 143-318.10(e). The statutory authorization is contained in N.C.G.S. 143-318.11(a)(1). This motion was seconded by Vice-Mayor Davis and carried unanimously.

At 8:38 p.m., Councilman Mumpower moved to come out of closed session. This motion was seconded by Councilwoman Cape and carried unanimously.

IX. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 8:38 p.m.

Magdalen Burleson
CITY CLERK

MAYOR

Tuesday – August 11, 2009 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Jan B. Davis; Councilwoman Robin L. Cape; Councilman Kelly M. Miller; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; Councilman William A. Russell Jr.; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Bellamy led City Council in the Pledge of Allegiance.

INVOCATION

Mayor Bellamy gave the invocation.

I. PROCLAMATIONS:

A. EMPLOYEE RECOGNITIONS

City Manager Jackson recognized (1) Stephanie Monson, Scott Burnette, Stacy Merten, Sandy Ryland, Brad Davis, Ken Putnam, Jonathan Feldman, Marlene Frisbee, Richard Grant, Sarah Benson, Seth Hendler, and Dave Michelson for their work on the City of Asheville receiving the G. Herb Stout Award for Visionary Use of Geographic Information Systems by local government (mapAsheville); (2) Officer Michelle Spinda, Officer Ryan Justus, Officer Darrell, McCurry, Officer Alan Presnell, Officer Sean Brooks, Sgt. Chuck Sams, and Detective Mike Downing for their involvement in capturing an escapee from the Georgia Department of Corrections; (3) Mark Case for leading the term for the Building Safety ISO rating of Class 2 for both commercial and residential inspections; (4) Brenda Mills for being recognized in the NC Magazine's Exceptional Women Leaders; (5) - Eric Weigel, Lifeguard, Laurel Manion, Lifeguard, Elliot Wells, Lifeguard, Capt. Shane Valliere, Sr. – Engine 7 Crew, Firefighter Mike Stageman, Sr. – Engine 7 Crew, Firefighter Chad Brooks – Engine 7 Crew, Firefighter Mike Riley – Engine 7 Crew, Paramedic Robbie Stanton – Buncombe County Emergency Medical Services, and Intermediate Jason Hamlin – Buncombe County Emergency Medical Services for their quick action in saving a little girl's from drowning; (6) Captain Joy Ponder for her professional designation of "Chief Fire Officer"; (7) Mr. Monte Clampett for his designation of the 2008 American Public Works Association Certified Public Infrastructure Inspector; and (8) Officer Josh Burleson and Officer Jordan Abrams for their service in recovering a stolen vehicle.

On behalf of City Council, Mayor Bellamy thanked the employees on what they do on behalf of the City of Asheville and City Council. She was proud of City staff and looked forward to highlighting more accomplishments.

B. PROCLAMATION PROCLAIMING AUGUST 2009 AS "MDA FIREFIGHTER APPRECIATION MONTH"

Mayor Bellamy read the proclamation proclaiming August 2009, as "MDA Firefighter Appreciation Month" in the City of Asheville. She presented the proclamation to Fire Captain Shane Valliere Sr. who thanked the City Council for providing them the support they need to help those who need help.

ADDITION TO THE CONSENT AGENDA

Mayor Bellamy has been asked by the local Association of Postmasters for consideration of a resolution requesting that the Oteen post office remain open. She asked that the resolution be added to the Consent Agenda. She noted that the Oteen post office serves citizens on Tunnel Road to the very east and is located across from the Veterans Administration Hospital.

II. CONSENT AGENDA:

At the request of Councilman Mumpower, Consent Agenda Items "C", "I", "P" and "Q" were removed from the Consent Agenda for discussion and/or individual votes.

At the request of Mayor Bellamy, Consent Agenda Item "R" was removed from the Consent Agenda for an individual vote.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON JULY 14, 2009

B. RESOLUTION NO. 09-160 - RESOLUTION ACCEPTING MCCAULEY DRIVE, FLORENCE STREET AND VERONICA LANE AS CITY-MAINTAINED STREETS

Summary: The consideration of a resolution to accept McCauley Drive, Florence Street, and Veronica Lane as city-maintained streets.

Code of Ordinances sec. 7-15-1(f)(4)a requires that streets dedicated for public use be accepted by resolution of the City Council. The developer's representative submitted a written request on April 30, 2009 asking the City to accept the three subject streets as city-maintained streets.

McCauley Drive from Reservoir Road to its dead-end is a developer-constructed street that has an average width of 18 feet with 18-inch curb and gutter, a length of 0.15 mile, and a right-of-way width of 50 to 150 feet. The typical two-year warranty period for major failures will be waived because the City of Asheville through a private contractor recently installed a new 24-inch water line along the center of McCauley Drive. The City of Asheville Water Department is responsible to mill and resurface the entire length of McCauley Drive as a part of the water line project. Prior to the water line construction, McCauley Drive had been completed including the final surface course during August 2007.

Florence Street from the end of existing city maintenance to White Fawn Drive is a developer-constructed street that has an average width of 23 feet with 18-inch curb and gutter, a length of 0.15 mile, and a right-of-way width of 28 to 56 feet.

Veronica Lane from Florence Street to a point 0.13 mile south of Florence Street is a developer-constructed street that has an average width of 19 feet 18-inch curb and gutter, a length of 0.13 mile, and a right-of-way width of 30 feet.

Transportation and Engineering Department staff and Public Works Department staff inspected these streets and determined that they were constructed according to current standards as indicated in the City of Asheville's Standard Specifications and Details Manual. The developer has completed repairing a punch list of items that were identified by Public Works Staff.

Following City Council's approval of this resolution, the subject streets will be added to the official Powell Bill List.

This action complies with the City Council 2008-09 Strategic Operating Plan within the Sustainable Focus Area by accepting street infra-structure to help support the healthy growth of the City.

Pros:

- The City of Asheville will receive Powell Bill Funds from the North Carolina Department of Transportation (NCDOT) to help maintain the streets.
- The streets provide access and connectivity in a residential community and a professional business park.

Con:

- Powell Bill Funds will not cover 100% of the total cost to maintain the streets.

There will be no initial financial impact to the City, although the responsibility of maintenance will belong to the Public Works Department. The City will receive Powell Bill Funds in the future to help maintain the streets. Currently, the Powell Bill Funds equate to $6,326 per mile compared to the City's maintenance cost of $18,189 per mile.

Staff recommends that City Council accept the subject streets as city-maintained streets.

RESOLUTION BOOK NO. 32 – PAGE 146

C. RESOLUTION SUPPORTING THE "HONOR AND REMEMBER" FLAG AS AN OFFICIAL SYMBOL TO RECOGNIZE AND HONOR MEMBERS OF THE ARMED FORCES WHO HAVE DIED IN THE LINE OF DUTY, AND URGING THE UNITED STATES CONGRESS TO ADOPT THIS FLAG AS A NATIONAL SYMBOL

This item was removed from the Consent Agenda for discussion and/or an individual vote.

D. RESOLUTION NO. 09-162 - RESOLUTION AUTHORIZING THE CITY OF ASHEVILLE TO LEASE GROUND AND TOWER SPACE AT THE UPPER TOWER TO NORTH CAROLINA RSA #4 (D/B/A US CELLULAR) AT 166 RESERVOIR ROAD

Summary: The consideration of a resolution authorizing the Mayor to execute a Lease Agreement with North Carolina RSA #4, Inc. (d/b/a US Cellular) for ground and tower space at 166 Reservoir Road.

The property at 166 Reservoir Road known as White Fawn Reservoir is on a knoll at the western end of the Beaucatcher Mountain ridge. It has exceptional range for telecommunication with approximately 300° coverage from northeast to west to southeast. Two telecommunication towers are located on the property and the City of Asheville leases antenna space on the towers and ground space for related equipment.

North Carolina RSA #4, Inc. (d/b/a US Cellular) is an existing tenant at 166 Reservoir Road and operates a main telephone switching office at the eastern tower, currently housed in a 2476 square foot brick building, with several antenna and dishes on the tower. The proposal to enter into a new lease accompanies the request to expand the current ground lease footprint to accommodate a proposed building expansion to a total size of 4,953 square feet, with no additional telecom equipment to be added to the tower. In order to compensate the City for the increased ground lease area, the payment schedule is based on $34,200 per annum with 4% annual escalations and the following in-kind services: a turn-key climate controlled telco room built to the City's specifications (240 square feet) to house the City's public safety equipment, a back up generator for the telco room, and North Carolina RSA #4, Inc. to pay the associated

electric costs and generator maintenance costs. The proposed term for this lease is for a period of ten years.

The payment schedule was determined by gathering and comparing telecom rate structures used by other municipalities across the state, including the Cary, Hickory, Charlotte and others. Formal findings were presented to the Planning and Economic Development Commission on August 20, 2008. Results indicate that base fee of $30,000 per annum represents fair market value for a basic type of telecommunications installation. North Carolina RSA #4, Inc. will be paying a higher rate plus additional in-kind due to the size and scope of their proposed use.

Please note that City staff invited North Carolina RSA #4, Inc. to perform outreach to the neighboring property owners regarding the building expansion. To date, outreach has been completed and North Carolina RSA #4, Inc. has adequately addressed feedback. Along with the expansion, other site improvements include burying overhead electric transmission lines, relocation of power generators to reduce noise, and additional plantings in landscaped buffer area.

The Notice of Intent to enter into a Lease Agreement with North Carolina RSA #4, Inc. was published on July 31, 2009, in the Asheville Citizen-Times. Ten days have passed since the publication and authorization to execute the Lease Agreement is being requested.

Regarding the City Council Strategic Operating Plan, strategic tower asset management, through proper management of tenant agreements, presents the City with revenue enhancements. These revenue enhancements can help the City's telecommunications operations become more sustainable, while promoting fiscal responsibility.

Several new tenant leases were executed in Fiscal Year 2009. A portion of this additional revenue has been planned to underwrite a cost savings plan for the City's own telecommunication operations. Specifically, the City is planning on utilizing an estimated $80,000 of these new revenue enhancements to re-locate equipment from the Spivey Mountain site (where the City pays $29,000 per year with a 7% escalation each year) to the White Fawn site (owned by the City). This re-engineering was proposed in the FY09 budget, and once implemented, will promote significant cost savings to the City over time. This proposal from North Carolina RSA #4, Inc. includes an additional component essential to this effort: the telco room. This telco room will house the public safety equipment that will be relocated from Spivey.

This item has been reviewed by the Council's Planning and Economic Development Committee on July 15, 2009, and has received the Committee's endorsement.

Pros:

- Enhanced revenue through the lease income
- Telco room for the City's needs is built turn-key; with no additional capital outlay required from the City
- Underwrites long term cost savings plan for telecommunications

Con:

- None

The fiscal impact is as follows: (1) Fiscal Year 2010: $34,200 revenue; (2) Beyond Fiscal Year 2010: Additional revenue stream based on initial rate of $34,200 per year with 4% escalation per year; and (3) Beyond Fiscal Year 2010: Resulting savings of initial rate of $29,000 per year with 7% rent escalations.

City staff recommends City Council adopt a resolution authorizing the Mayor to execute the lease agreement with North Carolina RSA #4, Inc. on behalf of the City of Asheville.

RESOLUTION BOOK NO. 32 – PAGE 149

E. RESOLUTION NO. 09-163 - RESOLUTION AUTHORIZING THE MAYOR TO EXECUTE EASEMENT CALLING FOR THE INSTALLATION AND UPGRADE OF ELECTRIC POWER UTILITY LINES ACROSS PROPERTY AT THE AIRPORT

Summary: The consideration of a resolution authorizing the Mayor to execute an easement for the installation and upgrade of electric power utility lines across property at the Airport.

The land on which the Asheville Regional Airport is located is owned by the City of Asheville. It is leased to the Airport Authority. The facilities on the north side of the airport – primarily general aviation – are being upgraded, and new facilities are being constructed. This activity requires the upgrading of electric utility service, including the installation of some new facilities.

According to the "Project Layout and Safety Plan," the lines and facilities will be installed primarily along Wright Brothers Way and Aviation Drive, and to facilities that use these roads for access. The installation is substantially underground, with a few junction cabinets and pad-mounted transformers above ground. The plan has been approved by the Authority's project manager and general manager.

This action complies with the City's Strategic Operating Plan in that it contributes to the development of a multimodal transportation program, supports sustainable economic development, and contributes to Asheville's role as a regional economic and service center.

The requested action is consistent with the Airport's Master Plan.

Pros:
- Facilitates development of Airport
- Lines will be mostly underground

Con:
- None noted

The fiscal impact is indirect; increases potential for revenue at Airport.

Adoption of the resolution is recommended.

RESOLUTION BOOK NO. 32 – PAGE 150

F. RESOLUTION NO. 09-164 - RESOLUTION AUTHORIZING THE EXECUTION OF AN EASEMENT ON FAIRWAY DRIVE TO PERMIT CONSTRUCTION OF SEWER LINE IMPROVEMENTS BY METROPOLITAN SEWERAGE DISTRICT

Summary: The consideration of a resolution authorizing the execution of an easement to permit construction of sewer line improvements by Metropolitan Sewerage District (MSD).

MSD is proposing to replace a sewer line in the Beverly Hills area; specifically along Fairway Drive and Gladstone Road. In addition to constructing / replacing the line in the travelled portion of Fairway Drive, some of the work will occur on City property (golf course) adjacent to the right-of-way, and this is the area for which the easement is sought. The requested easement is actually for two separate areas, and involves permanent easements 20 feet wide centered on the

sewer line, together with construction easements of 20 feet (easement #1) and 15 feet (easement #2) on either side of the permanent easement.

As noted, sewer lines and manholes already exist in these areas, installed many years ago, but as is frequently the case, there are no recorded easements for them. The requested easements would be recorded.

Construction of this project is scheduled for 2012, and MSD has indicated that it will work with the City to minimize disruption to City operations at the golf course during the process.

This action complies with the "Sustainable" element of the City's Strategic Plan in that it addresses the City's aging infrastructure.

Pro:
- Will improve sewer service in the area, including a City facility

Con:
- Potential minimal disruption of golf course activity

The fiscal impact would be neutral.

Adoption of the resolution is recommended.

RESOLUTION BOOK NO. 32 – PAGE 152

G. RESOLUTION NO. 09-165 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT AMENDMENT WITH CARL WALKER PARKING INC. FOR CIVIC CENTER PARKING GARAGE RESTORATION

Summary: The consideration of a resolution authorizing the City Manager to sign a contract amendment with Carl Walker Parking Inc. in the amount of $4,537.57 to cover additional costs for engineering services for Civic Center Parking Garage restorations.

The City of Asheville owns and operates three parking garages; Civic Center, Rankin Avenue, and Wall Street. The Civic Center deck was built in 1976 and the others in 1988. Like any structure, these parking decks deteriorate over time and require restorative maintenance. This normally consists of waterproofing, concrete repairs, and re-caulking of joints between concrete slabs but a detailed assessment is required to be sure. The City of Asheville commenced a multi-year program to accomplish restoration of the garages in 2007.

During fall of 2006 Parking Services sent out a Request for Proposal to interested firms to provide engineering services for the restoration of Civic Center Parking Garage. The scope of work included a detailed assessment of the condition of the facility, preparation of working drawings, preparation of bid package for general contractors, and supervision of the restoration work. Carl Walker Parking, Inc., of Detroit, Michigan, was selected as the most qualified and responsive of the firms responding. On April 24, 2007, Council authorized the City Manager to sign a contract with Carl Walker Parking, Inc., for $75,000.00, for engineering services and associated expenses with the project. A contract was signed between the parties in May 2007.

The project was completed in November 2008. However, the increase in air fares plus additional trips to Asheville from the Midwest resulted in increased cost in the amount of $4,537.57 in engineering fees and expenses. The extra trips were caused primarily from additional inspections as a result in delays in completing the project.

This action complies with the City Council Strategic Operating Plan in that it addresses a plan to maintain the City's aging facilities.

Pro:

- This action will complete the project of restoration of the Civic Center parking garage.

Con:

- None noted.

Funds are available in the Parking Fund to pay for this amendment.

City staff recommends City Council adopt a resolution authorizing the City Manager to sign a contract amendment with Carl Walker Parking, Inc in the amount of $4,537.57 for engineering services to complete Civic Center Parking Garage restoration.

RESOLUTION BOOK NO. 32 – PAGE 154

H. ORDINANCE NO. 3762 - BUDGET AMENDMENT TO REPROGRAM EXISTING CAPITAL FUNDING TO COVER COSTS OF A NEW TRANSFORMER AND REPAIRS TO THE BASKETBALL FLOOR

Summary: This is the consideration of a budget amendment, in the amount of $45,000, to cover costs of a new transformer and repairs to the basketball floor.

The transformer has already been budgeted in the CIP. Additional research on the size and scope of the project warrants an additional $20,000 to complete. Additionally, the basketball floor is in need of repairs and refinishing at an estimated cost of $25,000. This was not realized until the 2009-10 Capital Improvement Plan (CIP) had been approved. All funds for these two projects will be pulled from other current Civic Center CIP projects. This is a request for reprogramming of capital funding that was previously approved for other Civic Center capital projects and not a request for new funds.

This action complies with the City Council Strategic Operating Plan in that it addresses the city's aging infrastructure and improves the customer experience at the Civic Center.

The Civic Center Commission met August 4, 2009, and overwhelmingly supports staff's recommendation.

Pros:

- Improvement in infrastructure
- Improvement of customer experience at the Civic Center

Con:

- None noted

This is a request for reprogramming of existing capital funding, not a request for new funds.

City staff recommends City Council adopt a budget amendment in the amount of $45,000, to cover costs of a new transformer and repairs to the basketball floor.

ORDINANCE BOOK NO. 25 – PAGE 355

I. BUDGET AMENDMENT FROM BUNCOMBE COUNTY TO SUPPORT THE CAPACITY FOR THE HOMELESS INITIATIVE PROJECT

This item was removed from the Consent Agenda for discussion and/or an individual vote.

J. ORDINANCE NO. 3764 - BUDGET AMENDMENT TO ACCEPT DONATED FUNDS FOR PROCUREMENT OF SUPPLIES FOR FIREFIGHTER RECOGNITION

Summary: This is the consideration of a budget amendment, in the amount of $3,000, to receive donated money from citizens for procurement of supplies for the purpose of firefighter recognition.

The Asheville Fire and Rescue Department has received donations from private citizens for the purpose of firefighter recognition. These donations have been received throughout Fiscal Year 2008-09. The department would like to use these funds to purchase supplies for the annual September 11th recognition program as well as to purchase holiday meals for on-duty firefighters during the months of November and December.

This action complies with the City Council Strategic Operating Plan in that it helps to attract and retain quality employees and to ensure operational effectiveness by paying sound wages and benefits.

Pros:

- This action allows for recognition of firefighters without utilizing city tax funds.
- This action also provides for utilization of these funds as the donating citizens intended.

Con:

- None identified

These funds have been obtained through donations from private citizens.

City staff recommends City Council approve the budget amendment to receive donated money from citizens.

ORDINANCE BOOK NO. 25 – PAGE 359

K. ORDINANCE NO. 3765 - BUDGET AMENDMENT TO ACCEPT CONTRIBUTION FROM BUNCOMBE COUNTY FOR THE OPERATION OF THE ASHEVILLE-BUNCOMBE HISTORIC RESOURCES COMMISSION

Summary: This is the consideration of a budget amendment, in the amount of $5,000, to accept a contribution from Buncombe County for the operation of the Historic Resources Commission.

The Historic Resources Commission operates both within the corporate limits of the City of Asheville and the unincorporated areas of Buncombe County with responsibility to protect the historic resources of both jurisdictions. The funding from Buncombe County will help to support the work of the Commission in carrying out its mission.

This action complies with the City Council 2009-2010 Strategic Operating Plan Fiscal Responsibility Focus Area in that the City and County share in the services provided by the HRC and with the Sustainable Focus Area in that the funding will help support implementation of the Downtown Master Plan.

Pro:

- Will provide funding to match a grant application to update the downtown National Register District and augment funding for training and educational programs.

Con:

- None noted.

This action will allow the Buncombe County to participate in the fiscal responsibility of operating the joint City/County Commission.

City staff recommends that City Council approve a budget amendment, in the amount of $5,000, to accept the contribution from Buncombe County to support the work of the Historic Resources Commission.

ORDINANCE BOOK NO. 25 – PAGE 361

L. ORDINANCE NO. 3766 - BUDGET AMENDMENT TO USE FEDERAL DRUG SEIZURE FUNDS TO PURCHASE EQUIPMENT AND FUND IMPROVEMENTS AND TRAINING FOR THE ASHEVILLE POLICE DEPARTMENT

Summary: This is the consideration of a budget amendment, in the amount of $152,167, to authorize the use of Federal Drug Seizure Funds to purchase equipment and fund improvements and training for the Asheville Police Department.

The federal drug seizure program is an equitable sharing program which divides the illegal proceeds from drug dealing between the federal government and local law enforcement agencies. It is designed to help off-set the considerable cost of drug enforcement, by allowing local law enforcement agencies to use seized monies for equipment, training, and improvements that might not necessarily be budgeted for by the agency. The illegal proceeds are divided with 20% going to the federal agency adopting the seizure and 80% going to the local law enforcement agency initiating the seizure. The City of Asheville Police Department has received $152,167 in federal drug seizure funding. This proposed budget amendment would authorize the use of this funding for critical improvements, training, and equipment purchases for the Asheville Police Department.

Among the items slated for purchase with this funding include: 1) Central Records unit security upgrades ; 2) Purchase of Radar and Lidar Units for patrol units; 3) Training and travel for law enforcement training related to OCEAN video enhancement, 4) Upgrades to the Briefing Room to allow for a fixed audio/video system, 5) ERT/EOD transport vehicle; 6) covert camera system for undercover operations; 7) TASERs to enhance officer safety; 8) computers for Forensic Unit; 9) other training equipment not covered by the APD operating budget.

This action conforms to the City Council's Strategic Operating Plan under 1) Fiscal Responsibility in that we are using drug seizure monies to enhance the APD's equipment and training needs that would otherwise not be funded, and 2) Safe City in that providing the various equipment and training allows our employees to be more professional and more effective in proactively enforcing and preventing criminal activity.

Pro:

- Federal seizure revenues to cover the cost of equipment and training related to street level drug enforcement and community policing activities

Con:

- None noted

The fiscal impact is the increase of $152,167 for training and equipment. Accepting

these funds is a significant financial benefit to the APD allowing us to better train and equip our employees. There is no impact to the General Fund budget.

City staff recommends City Council adopt the budget amendment in the amount of $152,167, to authorize the use of Federal Drug Seizure Funds to purchase equipment and training for the Asheville Police Department.

ORDINANCE BOOK NO. 25 – PAGE 363

M. ORDINANCE NO. 3767 - BUDGET AMENDMENT TO USE NORTH CAROLINA STATE DRUG SEIZURE FUNDS TO PURCHASE EQUIPMENT AND FUND IMPROVEMENTS AND TRAINING FOR THE ASHEVILLE POLICE DEPARTMENT

Summary: This is the consideration of a budget amendment, in the amount of $128,121, to authorize the use of North Carolina State Drug Seizure Funds to purchase equipment and fund improvements and training for the Asheville Police Department.

The North Carolina State drug seizure program is an equitable sharing program which divides the illegal proceeds from drug dealing between the North Carolina State government and local law enforcement agencies. It is designed to help off-set the considerable cost of drug enforcement, by allowing local law enforcement agencies to use seized monies for equipment, training, and improvements that might not necessarily be budgeted for by the agency. The illegal proceeds are divided with 25% going to the North Carolina Department of Revenue and 75% going to the local law enforcement agency initiating the seizure.

The City of Asheville Police Department has received $128,121 in North Carolina State drug seizure funding. This amendment will authorize the use of that funding to purchase drug enforcement equipment, training, and improvements not covered by the APD operating budget. Items to purchase include: 1) MCT upgrades; 2) Police Bicycles; 3) Policy Management Software; 4) Handgun Upgrades; and 5) Training related to Crowd Control and Crash Data Retrieval or other training for employees.

This action conforms to the City Council's Strategic Operating Plan under 1) Fiscal Responsibility in that we are using drug seizure monies to enhance the APD's equipment and training needs that would otherwise not be funded, and 2) Safe City in that providing the various equipment and training allows our employees to be more professional and more effective in proactively enforcing and preventing criminal activity.

Pro:

- North Carolina State drug seizure revenue used to fund drug enforcement equipment, training, and improvements at no cost to city taxpayers.

Con:

- None noted

The fiscal impact is the increase of $128,121 for training and equipment. Accepting these funds is a significant financial benefit to the APD allowing us to better train and equip our employees. There is no impact to the General Fund budget.

City staff recommends City Council adopt a resolution authorizing the City Manager to adopt a budget amendment, in the amount of $128,121, authorizing the use of North Carolina State Drug Seizure Funds to fund drug enforcement equipment, training and other improvements for the Asheville Police Department.

ORDINANCE BOOK NO. 25 – PAGE 365

N. RESOLUTION NO. 09-166 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH MICHAEL BAKER ENGINEERING INC. FOR THE REYNOLDS MOBILE HOME PARK WATER SYSTEM IMPROVEMENTS PROJECT

Summary: This is the consideration of a resolution authorizing the City Manager to sign a contract with Michael Baker Engineering, Inc. for engineering services in the amount of $72,184.00 for the Reynolds Mobile Home Park Water System Improvements Project.

Grant Funds from the North Carolina Department of Environment and Natural Resources (NCDENR) North Carolina Water Infrastructure Act of 2005 (N.C.G.S. 150G) are available for this project and were approved by City Council on July 14, 2009, by Resolution No. 09-147.

The City of Asheville has received a grant from NCDENR to replace the existing, private, failing water system at the Reynolds Mobile Home Park. Upon completion of the water system improvements project, the City of Asheville will own and maintain this new water system. The Water Resources Department (WRD) issued a Request for Qualifications (RFQ) for Engineering Services related to the design and contract administration of the Reynolds Mobile Home Park Water System Improvements Project. In response to that RFQ, the WRD received thirteen (13) proposals.

Companies responding were:

1. Land Design, Asheville, NC
2. TGS Engineers, Morganton, NC
3. Gavel & Dorn Engineering, Denver, NC
4. William G. Lapsley & Associates, Asheville, NC
5. Brooks Engineering Associates, Asheville, NC
6. Civil Design Concepts, Asheville, NC
7. Davis Civil Solutions, Asheville, NC
8. Crain Atlantis Engineering, Charlotte, NC
9. Vaughn & Melton Consulting Engineers, Asheville, NC
10. Ocmulgee Site & Environmental Services, Perry, Georgia
11. R. Joe Harris & Associates, Fort Mill, SC
12. McGill Associates, Asheville, NC
13. Michael Baker Engineering, Asheville, NC

A review team, comprised of staff from multiple City Departments including James Lee, the City of Asheville Minority Business Coordinator, reviewed these proposals and selected the firm of Michael Baker Engineering, Inc. Subsequent to this selection, Water Resources staff have met with Michael Baker Engineering representatives and have negotiated an Engineering Services Contract in the amount of $72,184.00. This amount is fully reimbursable by the committed grant money.

This project is part of City Council's strategic plans to improve city infrastructure.

Pros:

- Michael Baker Engineering's proposal impressed the review staff with their experience, technical expertise and knowledge about the Reynolds Mobile Home Park situation.
- The project engineer for Michael Baker has worked with the City of Asheville on multiple water system improvements and is familiar with the City of Asheville Design Standards. This experience and familiarity will minimize staff support and input during the design process.
- Expenditure of this grant-reimbursable expense is necessary in the preparation of Contract Documents for the Reynolds Mobile Home Park Water System Improvements Project.
- This project will provide 37 existing homes with a safe reliable drinking water source and much improved fire protection.

Con:

- Failure to award an engineering services contract would lead to forfeiture of the NCDENR grant and the existing failing private water system would not be upgraded.

The Water Resources Department will initially fund the Engineering costs until reimbursement is received from the State. Funds for these upfront costs are allocated in this fiscal year's Capital Improvement Projects budget.

City staff recommends City Council approval of the City Manager signing a contract agreement with Michael Baker Engineering, Inc. for the Reynolds Mobile Home Park Acres Water System Improvements Project.

RESOLUTION BOOK NO. 32 – PAGE 155

O. RESOLUTION NO. 09-167- RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH MCGILL ASSOCIATES PA, FOR THE VIEWMONT ACRES SUBDIVISION WATER SYSTEM IMPROVEMENTS PROJECT

Summary: This is the consideration of a resolution authorizing the City Manager to sign a contract with McGill Associates, PA for engineering services in the amount of $68,450.00 for the Viewmont Acres Water System Improvements Project.

Grant Funds from the North Carolina Department of Environment and Natural Resources (NCDENR) North Carolina Water Infrastructure Act of 2005 (N.C.G.S. 150G) are available for this project and were approved by City Council on July 14, 2009, by Resolution No. 09-147.

The City of Asheville has received a grant from NCDENR to replace the existing, private, failing water system at the Viewmont Acres Subdivision. Upon completion of the water system improvements project, the City of Asheville will own and maintain this new water system. The Water Resources Department (WRD) issued a Request for Qualifications (RFQ) for Engineering Services related to the design and contract administration of the Viewmont Acres Water System Improvements Project. In response to that RFQ, the WRD received thirteen (13) proposals.

Companies responding were:

1. Land Design, Asheville, NC
2. TGS Engineers, Morganton, NC
3. Gavel & Dorn Engineering, Denver, NC
4. William G. Lapsley & Associates, Asheville, NC
5. Brooks Engineering Associates, Asheville, NC
6. Civil Design Concepts, Asheville, NC
7. Davis Civil Solutions, Asheville, NC
8. Crain Atlantis Engineering, Charlotte, NC
9. Vaughn & Melton Consulting Engineers, Asheville, NC
10. Ocmulgee Site & Environmental Services, Perry, Georgia
11. R. Joe Harris & Associates, Fort Mill, SC
12. McGill Associates, Asheville, NC
13. Michael Baker Engineering, Asheville, NC

A review team, comprised of staff from multiple City Departments including James Lee, the City of Asheville Minority Business Coordinator, reviewed these proposals and selected the firm of McGill Associates, PA. Subsequent to this selection, Water Resources staff have met with McGill Associates and have negotiated an Engineering Services Contract in the amount of $68,450.00. This amount is fully reimbursable by the committed grant money.

This project is part of City Council's strategic plans to improve city infrastructure.

Pros:
- McGill Associates has provided Engineering Services on numerous water system improvement projects for the City of Asheville.
- McGill's experience and knowledge of our water system will minimize staff support and input during the design process.
- Expenditure of this grant-reimbursable expense is necessary in the preparation of Contract Documents for the Viewmont Acres Water System Improvements Project.
- This project will provide 23 existing homes with a safe reliable drinking water source and much improved fire protection.

Con:
- Failure to award an engineering services contract would lead to forfeiture of the NCDENR grant and the existing failing private water system would not be upgraded.

The Water Resources Department will initially fund the Engineering costs until reimbursement is received from the State. Funds for these upfront costs are allocated in this fiscal year's Capital Improvement Projects budget.

City staff recommends City Council approval of the City Manager signing contract agreement with McGill Associates, PA for the Viewmont Acres Water System Improvements Project.

S. RESOLUTION NO. 09-180 – RESOLUTION REQUESTING THAT THE OTEEN POST OFFICE REMAIN OPEN

RESOLUTION BOOK NO. 32 – PAGE 186

Mayor Bellamy asked for public comments on any item on the Consent Agenda, but received none.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilwoman Cape moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Miller and carried unanimously.

ITEMS REMOVED FROM THE CONSENT AGENDA FOR INDIVIDUAL VOTES

C. RESOLUTION NO. 09-161 - RESOLUTION SUPPORTING THE "HONOR AND REMEMBER" FLAG AS AN OFFICIAL SYMBOL TO RECOGNIZE AND HONOR MEMBERS OF THE ARMED FORCES WHO HAVE DIED IN THE LINE OF DUTY, AND URGING THE UNITED STATES CONGRESS TO ADOPT THIS FLAG AS A NATIONAL SYMBOL

Summary: Asheville City Council is considering a resolution supporting the "Honor and Remember" flag as an official symbol to recognize and honor members of the armed forces who have died in the line of duty, and urging the United States Congress to adopt this flag as a national symbol. The purpose of this memorandum is to provide information on appropriate flag protocol according to the United States Code Title 1 Chapter 4, and Honor and Remember, Inc.

- When flying multiple flags from one staff:
  - the flag of the United States of America should be flown at the highest point,
  - the state flag of North Carolina should be flown next
  - local or honor flags should be flown third
- When flying multiple flags from two staffs:

- the flag of the United States of America should be flown at the highest point
- the state flag of North Carolina should be flown to the US flag's left (viewers right)
- local or honor flags should be flown under the NC flag

- When flying multiple flags from three staffs:
  - the flag of the United States of America should be flown at the highest point and in the front, center staff
  - the state flag of North Carolina should be flown to the US flag's left (viewers right)
  - local or honor flags should be flown to the US flag's right (viewer's left)
- The "Honor and Remember" flag should be smaller than the flag of the Unites States of America with which it flies.

Mr. Josh O'Conner thanked City Council for their support of this resolution.

Councilman Mumpower suggested that this flag fly at Memorial Stadium.

Councilman Newman moved for the adoption of Resolution No. 09-161 and directed City staff to fly the flag at Memorial Stadium. This motion was seconded by Vice-Mayor Davis and carried unanimously.

RESOLUTION BOOK NO. 32 – PAGE 148

I. ORDINANCE NO. 3763 - BUDGET AMENDMENT FROM BUNCOMBE COUNTY TO SUPPORT THE CAPACITY FOR THE HOMELESS INITIATIVE PROJECT

Summary: This is the consideration of a budget amendment, in the amount of $12,000, authorizing the Community Development Division of the Planning Department to accept additional funds from Buncombe County to support the capacity of Homeless Initiative project.

In order to accommodate for the growing needs of the Homeless Initiative, Buncombe County has offered the project $12,000 to pay for AmeriCorps*VISTA and Work-study positions. The positions would be dedicated to increasing the capacity of the Homeless Initiative and strengthening projects of the Homeless Coalition and Homeless Initiative Advisory Group.

The following outcomes would need to be met if funding is accepted:

Retain 2 AmeriCorps workers (or other workers) for up to 1,200 hours to support the Asheville-Buncombe Homeless Initiative, providing services for projects such as the SOAR disability project, Homeless Coalition, etc.

This action complies with the Strategic Operating Plan in that it meets the affordability goal objective to support initiatives to end homelessness. Accepting this funding will help the Homeless Initiative support the 10-Year Plan to End Homelessness process and collect data that can be used by the City Council when evaluating initiatives designed to end homelessness.

Pro:

- In tight budget times, funds to further the work of the Homeless Initiative can enhance the services it offers to the community.

Con:

- No apparent cons.

This will add $12,000 to the Homeless Initiative budget. These additional funds will fully support the costs of the AmeriCorps or work-study personnel.

City staff recommends City Council adopt a budget amendment accepting the $12,000 awarded to the Homeless Initiative by Buncombe County for capacity building.

Councilman Mumpower was concerned that we are using research to chase policy and could not support this investment.

Councilwoman Cape moved for the adoption of Ordinance No. 3763. This motion was seconded by Councilman Miller and carried on a 5-2 vote, with Councilman Mumpower and Councilman Russell voting "no."

ORDINANCE BOOK NO. 25 – PAGE 357

P. RESOLUTION NO. 09-168 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH BUNCOMBE COUNTY TO ACCEPT SUB-GRANTEE FUNDS FROM THE N.C. GOVERNOR'S CRIME COMMISSION FOR A JOINT GANG VIOLENCE PREVENTION PROJECT

ORDINANCE NO. 3768 - BUDGET AMENDMENT FROM THE N.C. GOVERNOR'S CRIME COMMISSION FOR THE GANG VIOLENCE PREVENTION PROJECT

Summary: This is the consideration of (1) a resolution authorizing the City Manager to enter into an agreement with Buncombe County to accept sub-grantee funds from the NC Governor's Crime Commission for a joint Gang Violence Prevention Project; and (2) a budget amendment, in the amount of $57,300, accepting the funds.

The Asheville Police Department (APD) has entered into an agreement with Buncombe County Gang Violence Prevention Project (BCGVPP) to receive funds for overtime and equipment to address gangs within Buncombe County. The BCGVPP consists of the Buncombe County Sherriff's Department, The Mediation Center, YWCA-Support Our Students, YWCA-Future Vision Program, Up Front Sports Agency, Partners Unlimited – New Day Program, Asheville Green Opportunity Corps (GO), Western Carolinian's for Criminal Justice – Men's Program, River of Life Church – Impact Tutoring, Asheville High School – ASPIRE program, and Horse Sense of the Carolinas.

This grant will be administered by Buncombe County.

The APD plans to purchase 2 video cameras, 2 digital cameras, 2 window tint meters, 2 alco-sensors, 2 X-26 Tasers, 20 Taser Cartridges, In-car digital video camera, a cellular equipment, and rental for a copier/scanner/Fax for 24 months. The equipment costs are a total of $20,900.

The APD will also provide 2 gang Detectives and 3 Officers to work overtime toward this project over a 104 week period for a total cost of $36,400.

The total grant funds total $57,300.

This is an 25% matching grant (cumulative of all partners) that will enable the APD to greatly improve the mentoring, education and enforcement efforts related to gang activities in partnership with multiple agencies focused improve our community and children's lives. Due to other partners contributing more, APD is only matching at about 18.3% ($14,325).

This action complies with City Council's Strategic Operating Plan in the Focus Area - Safe - Asheville will be one of the safest and most secure communities when compared to similar cities.

Pros:

- Partnerships formed with multiple agencies aimed to mentor youth and improve our communities.
- Providing alternative to judicial system / incarceration for youth.
- Enhanced community supervision for at risk youth.
- Reduce gun crime / violent crime associated with gang activity.

Con:

- Matching funds of $14,325; however, funds can be absorbed in the overtime budget.

There is a fiscal impact of $14,325 for matching funds. These funds can be absorbed in the overtime budget which will ultimately be increased as a result of these partnership funds.

City staff recommends City Council (1) adopt a resolution authorizing the City Manager to enter an agreement with Buncombe County for NC Governor's Crime Commission funds; and (2) adopt the budget amendment in the amount of $57,300.

Councilman Mumpower was troubled with the dysfunctional court system and felt that the state should use those funds for that purpose and let the City use it's own funds on the gang violence prevention project.

Councilwoman Cape explained that there must be a multi-prong approach in solving these issues and supported the actions.

Councilman Newman moved for the adoption of Resolution No. 09-168. This motion was seconded by Councilwoman Cape and carried on a 6-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 32 – PAGE 157

Councilwoman Cape moved for the adoption of Ordinance No. 3768. This motion was seconded by Councilman Miller and carried on a 6-1 vote, with Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 25 – PAGE 367

Q. RESOLUTION NO. 09-169 - RESOLUTION APPROVING THE PRIORITY OF UNFUNDED IMPROVEMENTS AT MEMORIAL STADIUM AND UNFUNDED ENHANCEMENTS AT THE VETERANS MEMORIAL

Summary: This report provides a summary of project-to-date expenditures related to the Memorial Stadium and Veterans Memorial capital improvement plan, and includes a resolution asking Council to establish funding priorities for future project expenditures related to this plan.

Improvements to Memorial Stadium and the Veterans Memorial (located at the stadium) have been made in phases as funding has become available.

Memorial Stadium

Specific improvements that have been completed to date include installation of synthetic turf and field lights on the sports field and construction of a playground. A total of $493,980 has been spent on these improvements, with funding coming primarily from donations and general fund.

Additional improvements and renovations planned for Memorial Stadium are currently

unfunded. They include concrete bleachers, press box, practice field, basketball court, fitness trail, picnic pavilion, ticket booth, entrance wall and sign, entrance columns and fencing, gates and fencing, sidewalks, landscaping and parking lots. These improvements are shown in priority order in the table below and are based on the following criteria: 1) health, safety and welfare of customers when using the park, 2) highest and best function of park features for majority of park customers, and 3) enhances the customers experience when using the park. The cost for Memorial Stadium improvements is based on the cost estimate produced by Aiken Cost Consultants in September 2007.

Memorial Stadium Improvements Complete: Synthetic turf on sports field, field lights, playground

Priority of Memorial Stadium Unfunded Improvements:

Priority 1	
Concrete Bleachers Restoration	$ 185,700
Press Box	251,000
South Parking Lot	95,600
North Parking Lot	120,300
Sidewalks	22,100
Gates and Fencing	51,200
Priority 2	
Basketball Court	8,500
Fitness Trail	42,900
Picnic Pavilion	28,300
Landscaping	50,000
Priority 3	
Practice Field	18,100
Ticket Booth	108,000
Entrance Wall and Sign	17,800
Entrance Columns and Fencing	94,400
TOTAL	**$ 1,093,900**

Cost based on the cost estimate produced by Aiken Cost Consultants in September 2007

Veterans Memorial

The improvements completed to date at the Veterans Memorial include brick arch restoration, court yard, seating area, World War I and II wall, brick columns and scatter garden, flag poles, fencing and landscaping. Enhancements in the Veterans Memorial design that remain unfunded include scatter garden bronze plaques, war bronze plaques, brick walls, western North Carolina counties bronze plaques, benches, electric conduit, lights and irrigation. A total of $247,500 has been spent on these improvements, with funding coming from a U.S. Department of Housing and Urban Development special projects grant.

The Veterans Memorial table below represents the unfunded enhancements. No priority order has been established for designated to these enhancements; as such, they can occur in any order as full funding becomes available. Staff estimates for the cost for the Veterans Memorial enhancements were completed in June 2009.

Veterans Memorial Features Complete: Brick arch restoration, court yard, seating area, World War I and II wall, brick columns and scatter garden, flag poles, fencing and landscaping

Veterans Memorial Unfunded Enhancements:

2 War Bronze Plaques	$ 5,500
17 Western NC County Bronze Plaques	29,000
5 War Bronze Plaques and Brick Walls	22,500
Garden Irrigation	2,500
3 Scatter Garden Bronze Plaques	8,250
Electric Conduit and Lights	2,500
2 Benches	4,000
TOTAL	**$ 74,250**

Cost based on general cost observation by City staff in June 2009

The estimated cost for both Memorial Stadium and the Veterans Memorial does not include general contractor overhead. Cost is subject to change due to the actual final design of certain features, contingency, inflation and the economy at the time the work actually occurs.

At its regular meeting on July 13, 2009, the Recreation Board reviewed the priority of unfunded improvements at Memorial Stadium, and the unfunded enhancements at the Veterans Memorial and unanimously approved establishment of this list as a guide for future capital expenditures. The following motions were approved by the Recreation Board: (1) To support to the prioritization of the Memorial Stadium unfunded feature; and (2) To support the unfunded non-prioritized Veterans Memorial enhancements given that the monies are raised outside of city funds and that Councilman Mumpower continue his fundraising leadership.

Staff seeks City Council endorsement of the resolution establishing the list of unfunded priorities.

Pros:

- Provides a prioritized list of improvements for Memorial Stadium, and enhancements for the Veterans Memorial as full funding becomes available
- Serve as a guide and reference list for future funding and fundraising activities

Cons:

- None

No funding is currently allocated in the Parks, Recreation & Cultural Arts FY 2009-2010 capital improvement budget to fund improvements as outlined in staff report.

Staff recommends City Council to adopt a resolution authorizing the City Manager to approve 1) priority of unfunded improvements at Memorial Stadium, and 2) the unfunded enhancements at the Veterans Memorial.

Mayor Bellamy, member of the Finance Committee, noted that in the past we have had committees say they would raise money but that did not happen. She felt that if we are going to partner with any entity to raise money for this or any other park, that we should have a formalized agreement/process.

Councilman Mumpower noted that the improvements at the Veterans Memorial were not built primarily with a federal grant, but with private dollars. He said that he met with the Recreation Board and discussed a willingness to continue trying to raise private dollars. He has met with someone earlier this week who is willing to fund the scatter garden. He felt it was extremely important to move forward on these improvements and asked for Council's endorsement of support for his personal efforts to (1) raise money for improvements at the memorial part of Memorial Stadium; and (2) get the stories from every county in western North Carolina to be portrayed there.

Mayor Bellamy had no concern of Councilman Mumpower raising funds, but it should be through a partnership similar to other committees.

Councilman Mumpower said that 90% of the money raised for Memorial Stadium either directly or indirectly came from the specific actions of the Memorial Stadium Restoration Committee under his leadership. They honored their promise not to use City tax dollars. He would be happy to meet with the Boards & Commissions Committee to discuss a framework for a small committee. He would be happy to chair that small committee and move it forward.

Vice-Mayor Davis, Chair of the Boards & Commissions Committee, said that referring this to the Boards & Commissions Committee is not consistent with what that Committee does. He felt this would be more of a Task Force, through the Parks & Recreation Department, whose service would be concluded fairly quickly.

Mayor Bellamy said that the Parks & Recreation Director is in the process of developing a partnership agreement with different entities. The Finance Committee received a report on co-sponsorships and we are asking our departments to be in line with the process that is clear and transparent. She felt that Councilman Mumpower's commitment to raise funds should fall under this formalized process so all expectations are clear and that staff is aware of the parameters which the relationship is developed.

Councilman Mumpower noted that he did receive unanimous endorsement from the Recreation Board to continue his fundraising. He suggested a committee of four people, most of those being former members of the Memorial Stadium Restoration Committee, meet with City staff and discuss some parameters of working with the Parks & Recreation Department. After meeting, City staff can then report back to Council. Mayor Bellamy asked that City Manager Jackson or his designee be a part of that meeting.

Councilman Russell moved for the adoption of Resolution No. 09-169 approving the priority of unfunded improvements at Memorial Stadium and unfunded enhancements at the Veterans Memorial. This motion was seconded by Councilman Newman.

City Manager Jackson felt this is a two-step process - (1) approval of the priority of unfunded improvements; and (2) Mayor's desire to get clarity on the Task Force for their role and responsibilities, work plan, etc. He or his designee was asked to work with Councilman Mumpower and that Task Force to review the work plan. Once that is accomplished, it will be brought back to either the Boards & Commissions Committee or to the full Council at a later date.

Councilman Mumpower felt that we create that intentional process for fundraising and would not act on that fundraising until he has Council's support.

Vice-Mayor Davis asked for a friendly amendment to endorse Councilman Mumpower's fundraising effort with him developing and leading a Task Force which efforts will be reported to the Boards & Commissions Committee on a timely basis.

Councilman Russell and Councilman Newman both accepted the friendly amendment.

Councilman Newman asked for a breakdown the $493,980 of private and public monies for Memorial Stadium. City Manager Jackson did not have that information, but would provide Council a detailed report, including the identification of funding sources.

When Mayor Bellamy asked for a vote on the amended motion, it carried unanimously.

R. **RESOLUTION NO. 09-170 - RESOLUTION AUTHORIZING THE CITY MANAGER TO MAKE PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE GOOMBAY FESTIVAL**

RESOLUTION NO. 09-177 - RESOLUTION AUTHORIZING THE CITY MANAGER TO MAKE PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT JUST BECAUSE YOU'RE ASHEVILLE

Summary: This is the consideration of resolutions authorizing the City Manager to make provision for the possession and consumption of malt beverages and/or unfortified wine at the 1) Goombay Festival on August 28-29, 2009, 2) Lexington Avenue Arts & Fun Festival on September 6, 2009, 3) OrganicFest on Sunday, September 13, 2009, 4) Brewgrass Festival on September 19, 2009, 5) Asheville Greek Festival on September 25-27, 2009, 6) Oktoberfest on October 10, 2009, 7) Blue Ridge Pride on October 10, 2009, and 8) Just Because You're Asheville on October 24, 2009.

Goombay Festival

The YMI Cultural Center has requested through the Asheville Parks, Recreation and Cultural Arts Department that City Council permit them to serve beer and/or unfortified wine at the Goombay Festival and allow for consumption at this event.

The Goombay Festival will be held on Friday, August 28, 2009, from 10:00 a.m. to 10:00 p.m., and Saturday, August 29, 2009 from 10:00 a.m. to 10:00 p.m. within the boundaries of

Eagle Street, South Market Street and Wilson Alley, as per the event area limits referenced on the accompanying site map and will be free and open to the public.

Pro:
- Allows fundraising opportunity for the YMI Cultural Center

Con:
- Potential for public safety issues

The fiscal impact will be overtime pay for police officers

Lexington Avenue Arts & Fun Festival (LAAFF)

Arts2People has requested through the Asheville Parks, Recreation & Cultural Arts Department that City Council permit them to serve beer and/or unfortified wine at the Lexington Avenue Arts & Fun Festival and allow for consumption at this event.

The Lexington Avenue Arts & Fun Festival will be held on Sunday, September 6, 2009, from 11:00 a.m.– 9:00 p.m. within the boundaries of Lexington Avenue, as per the event area limits referenced on the accompanying site map.

This action does not comply with the City Council Strategic Operating Plan, nor does it comply with the Parks, Recreation and Cultural Arts Master Plan.

Pro:
- Allows fundraising opportunities for Arts2People

Con:
- Potential for public safety issues

There is no fiscal impact to the City.

OrganicFest

Wild South in conjunction with Imagine Center, Inc. has requested through the Asheville Parks, Recreation & Cultural Arts Department that City Council permit them to serve beer and/or unfortified wine at OrganicFest and allow for consumption at this event.

OrganicFest will be held on Sunday, September 13, 2009, from 10:00 a.m.– 6:00 p.m. within the boundaries of Battery Park Avenue and Otis Streets, as per the event area limits referenced on the accompanying site map.

This action does not comply with the City Council Strategic Operating Plan, nor does it comply with the Parks, Recreation and Cultural Arts Master Plan.

Pro:
- Allows fundraising opportunities for charity

Con:
- Potential for public safety issues

There is no fiscal impact to the City.

Brewgrass Festival

Big Brothers Big Sisters has requested through the Asheville Parks, Recreation & Cultural Arts Department that City Council permit them to serve beer and/or unfortified wine at the Brewgrass Festival and allow for consumption at this event.

The Brewgrass Festival will be held on Saturday, September 19, 2009, from 12:00 p.m. – 7:00 p.m. within the boundaries of Martin Luther King Jr. Park, as per the event area limits referenced on the accompanying site map.

This action does not comply with the City Council Strategic Operating Plan, nor does it comply with the Parks, Recreation and Cultural Arts Master Plan.

Pro:
- Allows fundraising opportunities for charity

Con:
- Potential for public safety issues

There is no fiscal impact to the City.

Asheville Greek Festival

The Holy Trinity Greek Church has requested through the Asheville Parks, Recreation & Cultural Arts Department that City Council permit them to serve beer and/or unfortified wine at the Asheville Greek Festival and allow for consumption at this event.

The Asheville Greek Festival will be held on Friday and Saturday, September 25 and 26, 2009, from 11:00 a.m.– 9:00 p.m.; and Sunday, September 27, 2009, from 11:00 a.m.– 4:00 p.m. within the boundaries of Martin Luther King Jr. Park, as per the event area limits referenced on the accompanying site map.

This action does not comply with the City Council Strategic Operating Plan, nor does it comply with the Parks, Recreation and Cultural Arts Master Plan.

Pro:
- Allows fundraising opportunities for charity

Con:
- Potential for public safety issues

There is no fiscal impact to the City.

Oktoberfest

The Asheville Downtown Association has requested through the Asheville Parks, Recreation and Cultural Arts Department that City Council permit them to serve beer and/or unfortified wine at Oktoberfest and allow for consumption at this event.

Oktoberfest will be held on Saturday, October 10, 2009, from 1:00 p.m. to 5:00 p.m. within the boundaries of Wall Street, as per the event area limits referenced on the accompanying site map.

This action does not comply with the City Council Strategic Operating Plan, nor does it comply with the Parks, Recreation and Cultural Arts Master Plan.

Pro:
- Allows fundraising opportunity for the Asheville Downtown Association

Con:
- Potential for public safety issues

There is no fiscal impact to the City.

Blue Ridge Pride

Parents, Families, and Friends of Lesbians and Gays (PFLAG) – Asheville in conjunction with Blue Ridge Pride has requested through the Asheville Parks, Recreation & Cultural Arts Department that City Council permit them to serve beer and/or unfortified wine at Blue Ridge Pride and allow for consumption at this event.

Blue Ridge Pride will be held on Saturday, October 10, 2009, from 12:00 p.m.– 8:00 p.m. within the boundaries of Martin Luther King Jr. Park, as per the event area limits referenced on the accompanying site map.

This action does not comply with the City Council Strategic Operating Plan, nor does it comply with the Parks, Recreation and Cultural Arts Master Plan.

Pro:
- Allows fundraising opportunities for charity

Con:
- Potential for public safety issues

There is no fiscal impact to the City.

Just Because You're Asheville

Lake Eden Arts Festival (LEAF) in Schools and Streets in conjunction with Mountain Roots Management has requested through the Asheville Parks, Recreation & Cultural Arts Department that City Council permit them to serve beer and/or unfortified wine at Just Because You're Asheville and allow for consumption at this event.

Just Because You're Asheville will be held on Saturday, October 24, 2009, from 1:00 p.m.– 9:00 p.m. within the boundaries of the 100 block of Lexington Avenue, as per the event area limits referenced on the accompanying site map.

This action does not comply with the City Council Strategic Operating Plan, nor does it comply with the Parks, Recreation and Cultural Arts Master Plan.

Pro:
- Allows fundraising opportunities for charity

Con:
- Potential for public safety issues

There is no fiscal impact to the City.

City staff recommends City Council consider resolutions authorizing the City Manager to make provision for the possession and consumption of malt beverages and/or unfortified wine at the 1) Goombay Festival on August 28-29, 2009, 2) Lexington Avenue Arts & Fun Festival on September 6, 2009, 3) OrganicFest on September 13, 2009, 4) Brewgrass Festival on September 19, 2009, 5) Asheville Greek Festival on September 25-27, 2009, 6) Oktoberfest on October 10, 2009, 7) Blue Ridge Pride on October 10, 2009, and 8) Just Because You're Asheville on October 24, 2009.

Councilwoman Cape moved for the adoption of Resolution No. 09-170. This motion was seconded by Councilman Russell and carried on a 5-2 vote, with Mayor Bellamy and Councilman Mumpower voting "no"."

III. PRESENTATIONS & REPORTS:

A. ECONOMIC STIMULUS PACKAGE UPDATE

ORDINANCE NO. 3769 - BUDGET AMENDMENT FOR THE BYRNE JUSTICE ASSISTANCE GRANT PROGRAM

RESOLUTION NO. 09-178 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION FOR THE IMPLEMENTATION OF FOUR TRANSPORTATION PROJECTS – COXE AVENUE BICYCLE IMPROVEMENTS; DOWNTOWN AND GATEWAY STREETSCAPES;

FAIRVIEW ROAD PEDESTRIAN ENHANCEMENTS; AND SOUTH SLOPE BICYCLE LANES

American Recovery & Reinvestment Project Manager Brenda Mills said that as part of City staff's recurring ARRA update to Asheville City Council, staff is seeking Council consideration of two items for approval: (1) staff is seeking City Council approval of a budget amendment, in the amount of $372,630, authorizing the City to accept funds for the ARRA - 2009 Byrne Justice Assistance Grant – Local Solicitation; and (2) a resolution to approve a municipal agreement to contract between the City of Asheville and the North Carolina Department of Transportation (NCDOT) for four Metropolitan Planning Organization (MPO)-selected projects. In addition, staff is providing information on funding announcements and approvals for the N.C. Dept. of Environment and Natural Resources (NCDENR) and the Homeless Prevention and Rapid Re-Housing Program (HPRP) Substantial Amendment.

Budget Amendment - Edward Byrne Justice Assistance Grant (JAG) – Local Solicitation

The Asheville Police Department (APD) has been awarded ARRA Byrne JAG – Local Solicitation Award. This is a predetermined amount of funds based on the Part 1 Uniform Crime Reporting Crimes. Asheville Police and Buncombe County Sheriff's Department have been allocated $372,630 with Asheville receiving $265,466 and Buncombe receiving $107,164. Distribution of funds has been approved through a signed Memorandum of Understanding (MOU).

The APD plans to purchase security enhancement equipment for the Municipal Building which will replace funding that was eliminated from the 2009-2010 Budget. The improvements will update the video security system within the Municipal Building, update and add key card access to doors as needed, and integrate an alarm system that makes internal notification of unauthorized entries to secure areas. It is estimated that this will cost approximated $225,956.

Additionally APD plans to purchase a SPEX AFIS system that will enable APD to scan and enter fingerprints and palm prints into a local system that will analyze the prints and compare with previous sets. This will be a great improvement to the current system as it will use the increasing data compiled local for comparison. It will also be able to use palm prints which we currently do not process.

At its May 5, 2009, meeting, the City Council Finance Committee reviewed the proposed projects and authorized staff to submit the application and Memorandum of Understanding (MOU) for approval by City Council which is a requirement for funding. Resolution 09-89 authorizing APD to apply and enter into an MOU was approved May 12, 2009.

Municipal Building Security:	
Upgrade to camera system (32 cameras), key card access to critical office areas (50) and integrated alarm system to include associated computer hardware	$225,956
SPEX AFIS/APIS:	
Computer, monitor, modem, scanner, etc.	$30,500
Interface with SPEX central server	$995
Yearly software support	$1,895
Interface with CCID (Buncombe Detention)	$995
Shipping, packing and handling	$625
INDENTIX service contract *	$4,500
Total to City:	$265,466

Total to Buncombe County: $107,164

Total Funds Awarded: $372,630

This is a 100% non-matching grant that will enable the APD to greatly improve the Municipal Building Security and improve the processing of fingerprints and palm prints to compare to those compiled locally.

There will be maintenance and replacement costs for the equipment that will need to be included in future fiscal year budgets.

Pros:

- Security enhancement equipment for the Municipal Building which will replace funding that was eliminated from the 2009-2010 Budget.
- Update to the video security system, add key card access to doors as needed, and integrate an alarm system that makes internal notification of unauthorized entries to secure areas.
- Added technology to scan and enter fingerprints and palm prints into a local system which is great improvement to the current system.

Con:

- None

Staff recommends approval of a budget amendment to accept funds in the amount of $372,630 for the ARRA - 2009 Byrne Justice Assistance Grant – Local Solicitation for the City of Asheville and Buncombe County.

Department of Transportation: Division 13 Enhancement Project Update

NCDOT Division 13 notified the city that they will be constructing the ARRA funded enhancement projects rather than passing the funding through to individual local governments. Projects in Asheville are completing the Beaverdam Road sidewalk from Merrimon Avenue to Kimberly, installing a bio-retention basin near exit 6 of I-240 to treat runoff entering Ross Creek, refurbishing plantings at the intersection of I-240 exit 7 and Tunnel Road, constructing sidewalks along Pinchot Drive from Overlook Road to Estes Elementary School, and installing pedestrian signals at Pinchot Drive and Overlook Road. City-requested pedestrian signal and crosswalk to cross Patton Avenue at Louisiana Avenue will be funded with other than ARRA funds, and should be installed as the city's Patton Avenue sidewalk project is complete.

MPO-selected Transportation Projects

The resolution authorizes the City Manager to execute the municipal agreements for three MPO surface transportation programs - directly attributable (STP-DA) projects. This is the next step in the process. We expect the projects will be put out to bid in September or October.

The projects are Fairview Road pedestrian enhancements, Coxe Avenue bike lanes (including full-width resurfacing of Coxe Avenue), Downtown and Gateway streetscapes, and the South Slope bike lane network (Ashland Avenue, Hilliard Avenue, and Martin Luther King, Jr., Boulevard).

These grants provide 100% of the construction costs up to the grant amount; no local match is required.

TIP No.	*Description*	*Grant Amount*
U-5173	*Coxe Avenue Bicycle Improvements*	*$ 309,760*
U-5174	*Downtown and Gateway Streetscapes*	*$ 121,000*

U-5175	*Fairview Road Pedestrian Enhancements*	*$ 105,600*
U-5177	*South Slope Bicycle Lanes*	*$ 235,950*
	Total Potential Funding	*$ 772,310*

Pros:

- Improves Asheville's transportation facilities
- Implements projects in the City's adopted pedestrian and bicycle plans
- Provides up to $770,000 dollars in long term investment in the City's infrastructure

Con:

- The City will be responsible for future maintenance of the projects

Staff recommends approval of the resolution authorizing the City Manager to execute municipal agreements between the NCDOT and the City of Asheville for projects identified in the Transportation Improvement Program.

NCDENR ARRA Funding Announcements

The City of Asheville will receive $964,500 from the North Carolina Department of Environment and Natural Resources (NCDENR) for water and storm water infrastructure projects. The funding comes from various NCDENR sources including economic stimulus funds allocated through the Drinking Water and Clean Water State Revolving Funds.

Awards include:

- $510,000 in stimulus funds from the North Carolina Drinking Water State Revolving Fund will be used to replace pumps and valves at the North Folk and Mills River Water Treatment Plants. Replacement pumps will increase production efficiency, save energy and improve water service for fire coverage.

- $454,500 in stimulus funds from the North Carolina Clean Water State Revolving Fund will pay for storm water improvements to the Dingle Creek watershed. The project is expected to reduce storm water pollution from eroding stream banks and address flood risks.

The City expects to begin bidding these projects this fall.

Homeless Prevention and Rapid Re-Housing Program (HPRP)

The City of Asheville will receive $509,460 in funding from the Department of Housing and Urban Development (HUD) and, as a part of that funding; we submitted a substantial amendment to our Consolidated Plan 2008 Action Plan. The plan has been approved by notification of the U.S. Department of Housing and Urban Development.

Currently, applications for funding are due to the City Community Development Department by 5 p.m. on August 13, 2009.

When Mayor Bellamy asked for public comments, none were received.

In response to Mayor Bellamy, Ms. Mills explained how the City is using its tools (website, City channel, etc.) to make sure that local vendors understand the process.

When Councilman Mumpower expressed concern over spending almost $310,000 on bicycle improvements on Coxe Avenue, Councilman Newman explained that this is basically resurfacing Coxe Avenue and bicycle improvements is only a part of the project.

Councilman Miller said that the Coxe Avenue bicycle improvements project aligns with the Downtown Master Plan and Bike Plan which were adopted by City Council. He felt that once the infrastructure is built, other development will follow.

Mayor Bellamy said that members of Council have been previously furnished with copies of the resolutions and ordinance and they would not be read.

Vice-Mayor Davis moved for the adoption of Ordinance No. 3769. This motion was seconded by Councilwoman Cape and carried on a 6-1 vote, with Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 25 – PAGE 369

Councilman Miller moved for the adoption of Resolution No. 09-178. This motion was seconded by Councilwoman Cape and carried on a 6-1 vote, with Councilman Mumpower voting "no".

RESOLUTION BOOK NO. 32 – PAGE 183

Vice-President Biden's Conference Call with Mayors

Mayor Bellamy updated Council on a conference call that she participated in with Vice-President Biden and other mayors on July 17, 2009, regarding the American Recovery and Reinvestment Act (ARRA) feedback. They talked about what's going well and where we need improvement. They then discussed various areas (including transportation and infrastructure; community development; and Housing Authority of the City of Asheville), focusing on the Recovery Act monies. They also discussed what is working well and what needs to be improved in the following areas: the Supplemental Revolving Loan Fund Cleanup Grant, State Energy Program and Energy Efficiency, Renewable Energy & Alternative Fuels; Broadband funding; Transportation; and Housing/Infrastructure. She noted there will be a follow-up conversation on August 20.

Mayor Bellamy responded to various Council questions, some being, but were not limited to: what was the sense from Vice-President Biden on the narrow focus of some of the stimulus funding dollars and will there be more local flexibility on those dollars; are all ARRA funds going through cities and counties specifically; and what kind of relationship do we have with businesses.

Mayor Bellamy explained how the City of Asheville is supporting a grant with MAIN, Land-of-Sky Regional Council and our school systems. She stressed how this ARRA funding is a community collaboration.

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE APPROVED PLANS AND TO REQUEST A ONE-YEAR EXTENSION OF THE CONDITIONAL ZONING APPROVAL FOR THE PROJECT IDENTIFIED AS EAGLES LANDING, LOCATED AT 179 JOHNSTON BOULEVARD

ORDINANCE NO. 3770 - ORDINANCE AMENDMENT THE APPROVED PLANS AND TO REQUEST A ONE-YEAR EXTENSION OF THE CONDITIONAL ZONING APPROVAL FOR THE PROJECT IDENTIFIED AS EAGLES LANDING, LOCATED AT 179 JOHNSTON BOULEVARD

Mayor Bellamy opened the public hearing at 6:12 p.m.

Urban Planner Nathan. Pennington said that this is the consideration of an ordinance amending the approved plans and to request a one-year extension for the project identified as Eagles Landing, located at 179 Johnston Boulevard. This public hearing was advertised on July 31 and August 7, 2009.

On April 10, 2007, City Council approved a conditional zoning request, for property located at 179 Johnston Boulevard, from RM-6 to RS-8 as part of a master plan for the subdivision of two parcels into 25 individual parcels to create a cottage-style development. Five of the units were to be sold at prices meeting the City's definition of affordability. As part of the development proposal, the applicant requested modifications to allow for smaller lots, reduced side setbacks and open space. These modifications were subsequently approved by City Council. Since the time of the zoning change and conceptual site plan approval, the owner has been in negotiations to sell the property to Habitat for Humanity. Habitat for Humanity is requesting to develop the property utilizing the existing approved site plan with some small modifications:

- A request to extend the permit validity for one additional year to October 11, 2010. The original City Council approval expired on April 11, 2009. However, the applicant requested and was approved for a six-month extension by the Planning Director which will expire on October 11, 2009.

  City Attorney Oast explained that the extension request is moot due to recent adoption of the Development Approval Extension Act. He said that law was adopted to essentially suspend the running of expiration period for land use approvals from January 1, 2008 – January 1, 2010.

- A reduction to the right-of-way for the proposed internal road width from 50 feet to 45 feet. This request has been approved by the Assistant Engineering Director and was noted on the original site plan.

- The original development approval included a mix of one and two story smaller cottage-style homes. The applicant is requesting to build a mix of one story larger, more contemporary arts and crafts style homes.

The changes noted above are not expected to have a negative impact on the seven conditional use standards that were presented with the original application. Staff's greatest concern was the ability for the larger footprint homes to be effectively placed within the reduced buildable area; however, the applicant has demonstrated that, with careful planning and the utilization of a number of smaller prototypes, the new home models will fit within the allotted area. Staff therefore, recommends approval of the proposed modifications pursuant to the site plans and supporting documentation.

Mr. Dennis Rathbone, adjacent property owner, felt there were too many homes proposed to be built on Daystar Lane. His street, Larue Street, is a street the same size and it only has 11 houses on it. He felt the proposed development should fit in with the neighborhood.

At 6:18 p.m., Mayor Bellamy closed the public hearing.

Councilman Mumpower was concerned that the cottages shown at the original time of approval are smaller that what is proposed now by Habitat.

Mr. Keith Levi, representing Habitat for Humanity, explained the footprints of the homes, noting that Habitat traditionally builds houses from 700 to 1400 square feet. He was confident they can meet the requirements of the City in the existing setback. He felt that the original drawings of the homes are somewhat deceptive. He felt part of the reason they were able to get smaller footprints, particularly on the 4-bedrooms, is because they didn't meet some of the City's

standards for ADA compatibility. Habitat has embarked on a project to make sure that all of their homes are accessible for people with disabilities.

Councilman Russell was also concerned about the density, however, he felt this plan was already approved and their request is now for only a reduction to the right-of-way and a mix of homes.

Mr. Pennington responded to Councilman Mumpower regarding the originally requested conditional zoning designation.

Vice-Mayor Davis was supportive of Habitat for Humanity, but expressed concern with the density in the subdivision, along with the limited amount of open space.

Councilman Russell moved for the adoption of Ordinance No. 3770. This motion was seconded by Councilwoman Cape and carried on a 5-2 vote, with Vice-Mayor Davis and Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 25 – PAGE 371

B. PUBLIC HEARING TO CONSIDER REZONING PROPERTIES LOCATED AT 14 MOUNT CLARE AVENUE FROM RS-8 RESIDENTIAL SINGLE FAMILY HIGH DENSITY DISTRICT TO NCD NEIGHBORHOOD COMMERCIAL DISTRICT

ORDINANCE NO. 3771 - ORDINANCE TO REZONE PROPERTIES LOCATED AT 14 MOUNT CLARE AVENUE FROM RS-8 RESIDENTIAL SINGLE FAMILY HIGH DENSITY DISTRICT TO NCD NEIGHBORHOOD COMMERCIAL DISTRICT

Mayor Bellamy opened the public hearing at 6:33 p.m.

Urban Planner Blake Esselstyn said that this is the consideration of an ordinance rezoning properties located at 14 Mount Clare Avenue from RS-8 Residential Single Family High Density District to NCD Neighborhood Commercial District. This public hearing was advertised on July 31 and August 7, 2009.

The applicant, Marketplace Developments, LLC, is requesting the rezoning of a narrow portion of a parcel from RS-8 to Neighborhood Corridor District (NCD). This rezoning petition is prompted by several actions, which will be described below, but the most recent driver of the request is the subdivision and recombination of two properties both owned by the applicant, resulting in a shifted property line. The relocation of the property line means that the zoning district is no longer aligned with the property boundary. A rezoning of this sliver (roughly 500 square feet in area) would eliminate a situation where the parcel is split-zoned.

The strip proposed to be rezoned includes a sizeable retaining wall and a significant grade change between the residential property to its north and the parking lot to its south. The proposed rezoning would also more accurately reflect the division between the two different land uses, as that division has evolved since the line was originally drawn.

The owner purchased the properties in 1999, and the commercial (south) portion was rezoned from Community Business II to NCD in 2003. The owner alleges that in 2005 retaining walls to the north and east of the parking lot were failing and in urgent need of repair. Modifications were made in an expeditious fashion with the claim that any delay of the stabilization of the slopes could have resulted in major damage. These swift changes were pursued without going through the standard permitting process. Subsequent to the completion of

the changes, the applicant had discussions with staff about obtaining such permits, but the process was never completed.

The applicant is now seeking a new occupant for the corner building, and wishes to have all the permits in order, as well as to be able to provide enough parking to meet the minimum requirements for a variety of uses. (To provide one example, a 3,650 square foot building used as an office would require a minimum of 10 spaces, but if used for a health and fitness facility, it would require 18.) Taking full advantage of the flat space available for parking would require that parking be located in the area currently zoned RS-8.

This rezoning is one of a series of steps the applicant is undertaking in an effort to bring the property fully into compliance. In addition to the redrawing of the property line mentioned above (already approved and recorded), the applicant has obtained approval for a flexible development standard for the side setback and area of the residential lot to the north. The applicant has also received authorization from the Tree Commission for alternative compliance in providing the landscape buffering required between the commercial zoning and residential zoning. Finally, the improvements will be subject to a Level I staff review.

The RS-8 district was created to establish a high density per acre for single-family dwellings where public infrastructure is sufficient to support such development and to stabilize and protect the district's residential character in areas of existing high density single-family development while promoting a suitable environment for single-family living. The Neighborhood Corridor District was established to foster medium density, mixed-use development that is economically viable, pedestrian oriented and contributing to the place making character of the built environment.

Staff has received multiple communications from neighbors seeking more information about the rezoning, but no indications of opposition.

At their July 23, 2009, meeting, the Planning and Zoning Commission voted unanimously to recommend approval of the rezoning request.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Pros:

- Would help the property owner achieve compliance.
- Would remove presence of split zoning.

Con:

- Permission should have been sought at the time of original modifications.

Though the original property modifications prompting this rezoning were completed without proper permits, staff feels that the proposed changes are similar to what would have been required had the project been fully reviewed at the outset. Additionally, the area proposed to be rezoned is small enough in size that effects on the adjacent residential zoning district will be minimal, and the rezoning would result in a net benefit for the area.

Mayor Bellamy closed the public hearing at 6:37 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 3771. This motion was seconded by Vice-Mayor Davis and carried unanimously.

ORDINANCE BOOK NO. 25 – PAGE 378

C. PUBLIC HEARING TO CONSIDER AMENDMENTS TO THE UNIFIED DEVELOPMENT ORDINANCE TO RESPOND TO THE CURRENT ECONOMIC CLIMATE

ORDINANCE NO. 3772 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO RESPOND TO THE CURRENT ECONOMIC CLIMATE (SETBACK REDUCTION ALLOWANCES FOR RS-2 AND RS-4 LOTS LOCATED IN STEEP SLOPE AREAS)

ORDINANCE NO. 3773 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO RESPOND TO THE CURRENT ECONOMIC CLIMATE (A-FRAME SIGN AMENDMENT FOR SPECIFIC DISTRICTS)

ORDINANCE NO. 3774 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO RESPOND TO THE CURRENT ECONOMIC CLIMATE (BUSINESS AND CIVIC ASSOCIATION SPECIAL EVENT SIGNAGE)

Mayor Bellamy opened the public hearing at 6:37 p.m.

Mr. Alan Glines, Urban Planner, said that this is the consideration of ordinances amending the Unified Development Ordinance (UDO) to respond to the current economic climate. This public hearing was advertised on July 31 and August 7, 2009.

This is the third set of amendments to the UDO for the purposes of responding to the current economic climate. These amendments are designed to enhance opportunities for economic growth and relax some non-life safety standards that affect businesses and smaller economic endeavors while still addressing public welfare and supporting city adopted goals.

Since the beginning of the year staff have been reviewing the UDO to identify changes that could either simplify normal review processes or encourage economic development opportunities during this economic downturn. Two sets of wording amendments focusing on economic relief have been presented to the Planning and Zoning Commission and City Council this year. City Council has approved these economic relief amendments and encouraged staff to continue the initiative.

The current proposal is based on a review of past requests from the development / business community for specific relief from some development standards. Each issue has been carefully studied to understand the purpose and intent of the ordinance and seek ways to enhance its effectiveness while maintaining life and safety standards. The three amendments come from two different areas of the UDO and are distinct in their directives and are described separately below. Each item will also require a separate vote. Although the economic opportunities are the focus of the proposals, impacts and consequences have also been considered and are identified in a 'pros' and 'cons' section following each item.

The proposed wording amendments are focused on two areas of the UDO:

- Setback reductions in steep slope areas (Article XII)
- Two sign regulation amendments (Article XIII)

Staff continues to meet with neighborhood representatives, property owners, members of the business community and other stakeholders to obtain their thoughts on these and further changes being evaluated.

1. **Issue: In steep slope areas that are zoned RS-2 and RS-4 the required front setbacks (35 feet and 25 feet respectively) can pose a particular challenge for sites that are required to minimize grading and vegetation clearing in accordance with environmental protection standards. This amendment would allow staff to approve reasonable setback reductions to decrease grading and enhance protection of existing vegetation.**

   Current: The steep slope ordinance limits the amount of grading allowed depending on the natural slope and elevation of a parcel. Many steep slope areas are zoned RS-2 and RS-4 which have larger front setbacks that define part of the character of these zoning districts. The steep slope protection standards seek to limit the disturbance of these sensitive areas and large front setbacks may be inconsistent with those goals. Property owners who seek to reduce setbacks to reduce site grading must apply to the Board of Adjustments for a variance.

   Proposal: Allow the Planning and Development Director to approve front setback reductions from 35 feet to 20 feet in RS-2 Zones and from 25' to 15' in RS-4 Zones such that the setback reduction results in reducing site grading and enhances protection of existing trees and other vegetation. As a point of clarification, grading allowances would not be expanded as the result of a setback reduction.

   Relevant Code Sections: 7-12-4(h) Tree and other specified vegetation preservation

   Pros:
   - Proposal is consistent with goals of environmental protection
   - Enhances the protection of existing trees and other vegetation
   - Saves time delays and additional expense for homeowners and builders

   Con:
   - Could result in an irregular pattern of development (varying setbacks) in a neighborhood

2. **Issue: Simplify the requirements for A-frame signs to provide for permit renewal once a year and to allow A-frames signs in the Urban Place District and the Biltmore Village Historic District.**

   Current Procedure: A-frame signs permits are valid for six months with renewals thereafter valid for one year. The code also specifies the zoning districts where A-frame signs are allowed and Urban Place District (UP) is not on the list although the pedestrian focus of A-frame signs fits the purpose of the UP district. Allowing A-frame signs in Biltmore Village will complement the pedestrian character and goals of that special area.

   Proposal: The proposed change would make the A-frame sign permit valid from time of issuance until the annual renewal for these signs occurring on July 1st of each year. The second part of the amendment adds Urban Place District as a zoning district and Biltmore Village Historic District to the list of areas where A-frame signs are allowed.

   Relevant Code Sections: 7-13-4(8)c. and 7-13-4(8.)c.13.

   Pros:
   - Simplifies the permit process for signage useful in pedestrian oriented areas
   - Corrects an oversight by adding Urban Place to the list of zoning districts

- Supports the pedestrian character and goals of the Biltmore Village Historic District
- Merchants in Biltmore Village and members of the Historic Resources Commission are supportive of the proposal

Con:

- Some business areas will still not be able to meet accessibility standards to allow A-frame signs

3. **Issue: Business associations and civic groups need a way to coordinate temporary signage for a special event or sale**

Current Procedure: Although temporary signs are allowed on a business by business basis in the sign ordinance there are few options for business associations or civic groups to come together and coordinate signage for a single event or special sale.

Proposal: The code amendment would allow a temporary sign for individual members of an organized association, to place a single on-premise sign or banner for a specific event with the following requirements:

- The event is limited to three days
- The sign is placed on-premise
- The size of the sign or wind sign is limited to a maximum of twelve (12) square feet per face
- The permit may cover a single event date or a recurring series of events not to exceed 30 days on a yearly basis
- Clearance over right-of-way areas and driveways will be consistent with requirements for wind signs.

Relevant Code Sections: 7-13-4(a.)

Pros:

- Helps to identify a special event
- Creates a process for special signage for organized events

Con:

- Signs have sometimes been an item of controversy in the community

These proposals were shared with the Coalition of Asheville Neighborhoods at their meeting on June 8, 2009, and with other business associations and groups. No specific concerns were noted. The Asheville-Buncombe Historic Resources Commission is supportive of the change to allow A-frame signs in Biltmore Village and is preparing to amend the guidelines for the district.

Collectively, these amendments may encourage some additional or small scale development or re-development without increasing a need for service. Fiscal benefits include those typically associated with new development or re-development but are difficult to predict.

The Planning and Zoning Commission recommended approval of the three UDO amendments as presented by a vote of 6-0 at their June 18, 2009, meeting. City staff also recommends approval of the code amendments.

Mr. Jake Quinn, resident on Sunset Drive, explained why he was against changing the setback reduction in the steep slope areas. He urged Council to oppose this ordinance and continue to safeguard our hillsides.

Mayor Bellamy closed the public hearing at 6:43 p.m.

Councilwoman Cape noted this would allow the Planning & Development Director to approve front setback reductions if it would minimize site grading and enhance and protect vegetation. Looking at our topography challenges, she felt allowing flexibility is reasonable if it fits with all of the other aspects of the steep slope ordinance.

Mayor Bellamy said that members of Council have been previously furnished with copies of the ordinances and they would not be read.

Councilwoman Cape moved for the adoption of Ordinance No. 3772 (Setback reduction allowances for RS-2 and RS-4 lots located in steep slope areas). This motion was seconded by Councilman Russell and carried unanimously.

ORDINANCE BOOK NO. 25 – PAGE 380

Councilwoman Cape moved for the adoption of Ordinance No. 3773 (A-Frame signs amendment for specific districts). This motion was seconded by Councilman Miller and carried unanimously.

ORDINANCE BOOK NO. 25 – PAGE 382

Councilwoman Cape moved for the adoption of Ordinance No. 3774 (Business and civic association special event signage). This motion was seconded by Vice-Mayor Davis and carried unanimously.

ORDINANCE BOOK NO. 25 – PAGE 384

D. PUBLIC HEARING TO CONSIDER AMENDING THE UNIFIED DEVELOPMENT ORDINANCE FOR THE PURPOSE OF ENSURING COMPATIBLE DEVELOPMENT AND PUBLIC INPUT FOR THOSE PROPOSALS ADJACENT TO PACK SQUARE PARK

Mayor Bellamy opened the public hearing at 6:46 p.m.

Urban Planner Jessica Bernstein said that this is the consideration of an ordinance amending the Unified Development Ordinance for the purpose of ensuring compatible development and public input for those proposals adjacent to Pack Square Park. This public hearing was advertised on July 31 and August 7, 2009.

During the March 10, 2009, City Council hearing, Council considered a request to grant a construction easement to allow for the development of a road along the edge of Pack Square Park that would accommodate a specific development proposal. Several members of Council expressed a concern that additional consideration should be required for projects adjacent to this highly visible civic area where adjacent development has a greater potential to negatively impact the user experience and community image. At the conclusion of the discussion, Council directed staff to propose a change to the UDO that would require Council review and opportunity for public consideration of all projects adjacent to Pack Square Park.

Currently, projects adjacent to Pack Square Park require review by Council only if they are larger than 100,000 square feet (either new construction or for additions/expansions) or include over 50 residential units. All other reviews seek to ensure compliance with the minimum technical standards only or, in some cases, offer design recommendations that may be accommodated by the developer on a voluntary basis.

There are potentially several methods to ensure a more comprehensive review with public input; however, in an effort to ensure simplicity, easy administration, and to avoid

unintended consequences, one option presents itself as a clear choice and is detailed below. Staff has also offered an alternative for consideration and will be prepared to discuss other options should the Commission desire more information. Both alternatives proposed would exempt renovations that do not propose changes to the exterior of the structure.

Proposal 1: Require Level 3 review for all projects within 100 linear feet of the Pack Square Renaissance Area boundaries, if the new project is one or more of the following project types:

- New construction
- Additions or expansions to existing structures when the expansion is over 1000 square feet
- Renovations that expand outdoor gathering areas (including rooftop areas) or parking areas

While the Downtown Master Plan does propose various design requirements and a number of restrictions guiding project activity adjacent to the Park, it is difficult to determine how effectively development surrounding the park will be regulated until the UDO changes necessary to implement the plan are adopted. Until this is accomplished, the potential for incompatible development around the park remains a possibility. The proposal above secures the greatest level of security until other controls are put in place.

Alternative Proposal: Require Level 3 review for all projects within 100 linear feet of the Pack Square Renaissance Area boundaries, if the new project is one or more of the following project types:

- New construction over 20,000 square feet or more than two stories
- Additions or expansions to existing structures when the expansion is over 5,000 square feet
- Additions or expansions that increase the height of an existing structure by more than five feet
- Renovations that expand outdoor gathering areas (including rooftop areas) or parking areas by more than 1000 square feet

This second option seeks to eliminate smaller scale projects from undergoing a Level 3 review process since such small projects are not anticipated to create an undue impact on the Pack Square Park, regardless of form.

Pros:

- Assures City Council review of projects in direct proximity to an extremely sensitive public space.
- Assures the opportunity for public review and comment of projects with the greatest potential for impact on the Park.
- Exempts renovations to existing buildings where no expansions or changes to the exterior are proposed.
- Provides an option (alternative) to allow small scale projects to avoid the Level 3 process.
- Can easily be revised (redone) when more specific UDO changes are recommended as part of the implementation of the Downtown Master Plan.

Cons:

- Somewhat contradicts the stated intention in the Downtown Master Plan to eliminate the need for this additional level of review with the adoption of restrictions on height, massing, shadow, etc. that will prescribe appropriate parkside development.
- May discourage smaller scale redevelopment around the Park.
- May only be used temporarily.

The Downtown Commission reviewed this proposal at their meeting on July 10, 2009. The Commissioners expressed concern over several aspects of the ordinance change, primarily regarding discord with the Downtown Master Plan recommendations to eliminate Conditional Use Permits and minimize City Council's review of smaller-scale projects. They were not opposed to the idea of placing greater scrutiny on projects surrounding the park, but did not feel that a Level 3 review was an appropriate method for gaining public input and additional oversight. Commissioners were also concerned about making changes to the review processes while significant ordinance revisions in accordance with the Master Plan recommendations are currently underway. They recommended unanimously (10-0) that the idea of interim control makes sense but they do not support this specific proposal and feel that a better strategy is to pursue the Downtown Master Plan recommendations for UDO changes as a highest priority. Some support was also expressed for the concept of considering this change as a temporary UDO change, with a clear intention for removing this level of scrutiny in conjunction with the adoption of the UDO changes to implement the Downtown Master Plan recommendations.

This proposal was reviewed by the Planning & Zoning Commission on July 23, 2009. The Commission expressed respect for the Downtown Commission and agreed that the implementation of Downtown Master Plan recommendations will likely preclude any negative impacts on the park from development, however, there was concern for the unknown timeframe between present day and the adoption of those wording amendments. Some Commissioners felt that the concept of interim protection would be beneficial. The Commission voted 3-2 for the Council to adopt the stricter proposal (Proposal 1) with the understanding that these provisions will be eliminated upon adoption of the Downtown Master Plan UDO changes. Also, it was recommended that this item be returned to the Commission and to Council for re-evaluation within six months. At that time, the reviewing bodies may decide to continue the protection or to eliminate or revise the restrictions.

This proposal was also discussed with the Pack Square Conservancy on August 5, 2009, and they voted similarly with the Planning & Zoning Commission – in favor of the more restrictive proposal with the sunset clause.

One member of the public spoke in support of this proposal at the Planning & Zoning Commission meeting. Staff has received comments from several of the affected property owners within the 100 linear foot boundary, primarily in opposition of this additional level of review and one additional comment of support. Those in opposition, primarily property owners in the 100 foot linear boundary and Buncombe County's Planning Department, were concerned about the additional burden of cost and review time placed on smaller development proposals in the area.

This action complies with the City Council Strategic Operating Plan in that it continues the focused attention on development in the downtown that was spurred by the Downtown Master Plan and highlights Council's commitment to the protection and enhancement of Pack Square Park.

This action complies with the *City Development Plan 2025* in that it seeks to assure new development is of the highest quality, "complementing and adding to the character of the City of Asheville" by identifying areas for development focus, " identifying and establishing standards for the type of development appropriate for the areas" as indicated in the Land Use Goals (Goal XII, Strategy 5). However, this proposal does <u>not</u> comply with the *Downtown Master Plan,* which was adopted in concept by City Council on May 26, 2009. That document recommends eliminating the Conditional Use Permit as automatically required for Level 3 projects and suggests shadow and massing restrictions to mitigate impacts on the park rather than additional review by Council.

The proposal and alternative would both require a more extensive review process for various projects proposed within the boundary area. A project that may currently be reviewed under a 10-day administrative-level process would be required to undergo four additional public

hearing processes (Technical Review Committee - TRC, Planning & Zoning Commission, City Council, Final TRC). There is additional staff time associated with analysis, research and report writing.

Staff recommends that City Council support one of the proposals described above and seeks input on changes that would improve or clarify the stated intention of the Council.

The following individuals spoke in opposition of this amendment for various reasons, some being, but are not limited to: amendment does not comply with the Downtown Master Plan; pursue the Downtown Master Plan recommendations for UDO changes as a highest priority; and additional burden of cost and review time:

Mr. Albert Sneed
Mr. Jesse Plaster, representing the Asheville Downtown Commission
Mr. Tom Israel, representing S.B. Coleman Construction Company
Mr. Glen W. Wilcox Sr.
Mr. Mike Fryar

The following individuals spoke in support of Proposal 1 (the strictest proposal) for various reasons, some being, but are not limited to: what happens around our town square should be discussed by City Council under a Level 3 review; and this sensitive area requires careful consideration:

Mr. Steve Rasmussen
Lady Passion
Mr. Jake Quinn

Mr. Chuck Pickering, Executive Vice-President of the Biltmore Company, said that they did not receive notice about this matter and requested an additional 30 days within which to review the full implications to their building.

Mayor Bellamy closed the public hearing at 7:14 p.m.

Councilman Newman spoke in support of the Downtown Master Plan, but the standards are not yet in place. Due to the significance of our town square, the public investment, public concern, and Council's responsibility to exercise responsible oversight, he moved to (1) direct City staff to expedite the development of implementing ordinances to enact the Downtown Master Plan; (2) adopt the Alternative Proposal (require Level 3 review for all projects within 100 linear feet of the Pack Square Renaissance Area boundaries) with the only trigger being new construction over 20,000 square fee or more than two stores; and (3) express the clear intent of City Council that this ordinance will be temporary and will sunset upon enactment of the Downtown Master Plan ordinances relative to this part of downtown. This motion was seconded by Councilwoman Cape.

In response to Councilwoman Cape, Planning & Development Director Judy Daniel said that staff has begun drafting some UDO changes associated with the Downtown Master Plan. They will meet with the Downtown Commission oversight implementation committee in September. She felt that the first proposals will come before City Council in November, after the Downtown Commission and Planning & Zoning Commission reviews. The first amendments would be process changes and then more technical changes related to the design.

Vice-Mayor Davis felt Council should listen to the advisory boards and people who have property in the affected area. He felt Council should move expeditiously with UDO changes for implementation of the Downtown Master Plan.

Councilman Miller said that after countless input meetings with the community, the Downtown Master Plan was clear in that they wanted more increased predictability in the project approval process and reduction of projects that come before City Council. He would have to support the Downtown Commission's recommendation, taking into account the discussion of the Planning & Zoning Commission.

In response to Councilman Miller, Ms. Bernstein explained the oversight of the notice to the Biltmore Company.

Councilman Russell could not support the motion in that he felt this issue arose from one project on one parcel.

Councilman Mumpower also felt Council is responding to an isolated incident and could not support the motion.

Councilwoman Cape was not willing to take the risk of an unacceptable project being built adjacent to our town square until the total implementation of the Downtown Master Plan.

Ms. Bernstein responded to Councilman Miller when he asked how much time it takes to get a Level I, Level II or Level III project approved.

When Mayor Bellamy questioned where the 100 linear feet boundary around Pack Square Park came from, Ms. Bernstein said that the original proposal asked staff to include all projects adjacent to the Park. After staff mapped out all the adjacent parcels, they felt there were larger parcels where like development on the opposite side would not have any impact. The development that had the greatest ability to impact the Park was close into that boundary line.

Mayor Bellamy noted that her original intent and support was for properties directly adjacent to Pack Square Park, not across the street or rights-of-way. Assistant Planning & Development Director Shannon Tuch said there are only a few parcels directly adjacent to the Park – Stewart Coleman's property; and the Biltmore Company Building. Mayor Bellamy noted that even is this proposed amendment is adopted by Council at this meeting, Mr. Coleman's project nor the Art Museum project would be reviewed by City Council since they are already undergoing review in their respective processes.

Due to the amount of money that has to be spent up front for Level 3 projects, Mayor Bellamy requested staff investigate to see if there is a way for City Council to review the concept of Level 3 projects first and if Council approves it, then it moves forward for the significant detailed reviews.

Mayor Bellamy asked for the following friendly amendment to the second stipulation of the original motion - adopt the Alternative Proposal requiring Level 3 review for all projects directly adjacent to Pack Square Park with the only trigger being new construction over 20,000 square fee or more than two stores.

Councilman Newman supported the amendment; however, Councilwoman Cape explained why she did not accept the amendment.

Councilman Russell moved to call the question. This motion (to call the question) was seconded by Councilwoman Cape and carried on a 5-2 vote, with Councilman Miller and Councilman Newman voting "no."

The original motion made by Councilman Newman and seconded by Councilwoman Cape failed on a 3-4 vote, with Councilwoman Cape, Councilman Miller and Councilman Newman voting "yes" and Mayor Bellamy, Vice-Mayor Davis, Councilman Mumpower and Councilman Russell voting "no."

Councilman Newman moved to (1) direct City staff to expedite the development of implementing ordinances to enact the Downtown Master Plan; (2) adopt the Alternative Proposal requiring Level 3 review for all projects directly adjacent to Pack Square Park with the only trigger being new construction over 20,000 square fee or more than two stores; and (3) express the clear intent of City Council that this ordinance will be temporary and will sunset upon enactment of the Downtown Master Plan ordinances relative to this part of downtown. This motion was seconded by Mayor Bellamy.

The following individuals spoke against the motion made by Councilman Newman and seconded by Mayor Bellamy:

Mr. Jake Quinn
Mr. Albert Sneed
Mr. Ross Franklin

Mr. Pickering, representing the Biltmore Company, reiterated their request to have time to study how this would impact their building.

Councilman Newman then withdrew his motion.

Councilman Miller then moved to instruct City staff to hold an input session with all property owners within the 100 linear foot area and report back to City Council their findings. This motion was seconded by Councilman Newman. After a short discussion about staff time spent on this input session (which was received during the Downtown Master Plan process) vs. implementing UDO changes to implement the Downtown Master Plan, Councilman Miller withdrew his motion.

E. PUBLIC HEARING TO CONSIDER AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO PROVIDE A SEPARATION REQUIREMENT FOR FAMILY CARE HOMES

Assistant Planning & Development Director Shannon Tuch said that staff has been working on some revisions to the standards regulating Family Care Homes and Group Homes. The most significant change involves a proposed separation requirement between new and established homes that is allowed by the State but has not been exercised by Asheville. If this standard were to be adopted, it would require the locations of all existing facilities to be identified. Additionally, while not statutorily required, staff felt that a notification of the change to affected providers would be appropriate. Producing a list of providers has proven challenging and additional time is being requested to complete a more thorough and comprehensive outreach effort.

Therefore, Councilman Mumpower moved to continue this public hearing until August 25, 2009, in order for City staff to notify interested parties. This motion was seconded by Councilman Miller and carried unanimously.

Closed Session

At 8:13 p.m., Councilman Miller moved to go into closed session for the following reason: (1) To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including litigation involving the following parties: City of Asheville; DVL Pennco, Inc., d/b/a 1-800-Got-Junk; Holly Oxner, Jr.; Forrest Eugene Weaver; and similarly affected police officers of the City of Asheville. The statutory authorization is N. C. Gen. Stat. 143-318.11(a)(6); and (2) To prevent disclosure of information that is privileged and confidential, pursuant to the laws of North Carolina, or not considered a public record within the meaning of Chapter 132 of the General Statutes. The law

that makes the information privileged and confidential is N.C.G.S. 143-318.10(e). The statutory authorization is contained in N.C.G.S. 143-318.11(a)(1). This motion was seconded by Councilman Russell and carried unanimously.

At 8:35 p.m., Councilwoman Cape moved to come out of closed session. This motion was seconded by Vice-Mayor Davis and carried unanimously.

V. UNFINISHED BUSINESS:

A. CONTINUATION OF THE WATERLINE INCENTIVE PROGRAM TO ENCOURAGE AFFORDABLE HOUSING AND INFILL DEVELOPMENT AND EXTEND THE REVIEW FOR AN ADDITIONAL 12 MONTHS

RESOLUTION NO. 09-179 - RESOLUTION AUTHORIZING THE CHANGE IN WATER POLICIES TO CLARIFY THE AFFORDABLE HOUSING AND INFILL DEVELOPMENT WATERLINE INCENTIVE PROGRAM

Water Resources Director Steve Shoaf said that this is the consideration of (1) one-year review of the City of Asheville Waterline Incentive Program to encourage Affordable Housing and Infill Development with activity assessment and clarifications; and (2) resolution authorizing changes to the Water Polices to reflect the clarifying language.

On November 27, 2007, the City Council adopted a change in Water Policies to reflect the addition of funding incentives to encourage Affordable Housing and Infill Development throughout the water system service area.

The Water Policies currently read as follows:

Sec. IV.D.12. Affordable Housing and Infill Development Incentives.

a. The water fund will budget $500,000 annually to be allocated to affordable housing and infill development water line upgrade and extensions throughout the water system. Funds will be available annually on a first-come, first served basis upon project participation criteria.

b. Budget line item will be established to transfer funds annually from the water capital improvement program funds with $500,000 to be used on a first-come, first served basis for infill development and affordable housing water line upgrades or water line extensions.

c. Single project incentive amount shall not exceed $100,000 per project with a minimum 20-year return on investment payback. Water projects meeting affordable housing and infill development criteria in Buncombe County and Northern Henderson County are eligible to apply.

d. Funds not expended annually will be rolled over to the next Fiscal Year. Funds will be allocated to ensure $500,000 balance is maintained annually.

e. Approval will be based upon applicant receiving minimum score of 80 points per established criteria form.

f. Developers must provide the City with any necessary right-of-way or easements.

g. Approved projects with four or fewer units that do not require water line extension may use funds to pay for water line taps and meters. These fully funded projects would not be

eligible for any water fee rebates through the City of Asheville affordable housing rebate program."

Since adoption of this amendment to the Water Policies, there have been three inquiries about the procedures to obtain funding. There has only been one reimbursement request in the amount of $44,268 on August 1, 2008, for Crowell Park Apartments.

Staff thinks that the lack of participation in this program may be attributed to the weak economy and its effects on local development. Due to limited participation, there was discussion about adjusting the policy language to require a smaller dollar amount as a set-aside. Considering the state of the economy, it was decided to track this program for an additional year before making a recommendation.

The following policy interpretations by staff are used for implementation but are not expressly stated in the policy.

a. On the application form, it is stated that the funds are available for 50% of the costs of water line infrastructure up to $100,000 whichever is less. This is not written into the policy.

b. Staff has informed applicants that the request for reimbursement must occur in the same fiscal year as the completion of the work. This is to avoid retroactive claims for past work. This is not written into the policy.

Continuation of this program is part of City Council's strategic plans to improve city infrastructure and encourage affordable housing and infill development.

Pros:
- Continuation of the program will allocate funds for affordable housing and infill development.
- This program, in combination with other City of Asheville programs, can substantially offset the burden of developing affordable housing.

Cons:
- The program allocation of $500,000 annually reduces the amount of funds available for other projects such as small water line replacement, automated meters, and the N.C. Dept. of Transportation projects.
- Since there has been a lack of participation in this program, the allocation has not been used to support affordable housing (with one exception).

The annual allocation is maintained at $500,000 per year. These funds are not available for other uses.

City staff recommends (1) continuation of the Affordable Housing and Infill Development Waterline Incentive Program, including the interpretations presented above; (2) adoption of a resolution updating the Water Polices to reflect the clarifying language; and (3) over the next 12 months, Council direct City staff to track participation and return to the Council with further recommendations

When Mayor Bellamy asked for public comments, none were received.

Councilman Mumpower could not support the motion as he felt this was a special deal taking money out of one person's pocket and giving it to another.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilwoman Cape moved for the adoption of Resolution No. 09-179. This motion was seconded by Vice-Mayor Davis and carried on a 5-2 vote, with Councilman Mumpower and Councilman Russell voting "no."

RESOLUTION BOOK NO. 32 – PAGE 184

B. NUISANCE COURT

Assistant to the City Manager Lauren Bradley said that this is the consideration of an implementation plan and budget for creation of a nuisance court.

At its May, 19, 2009, meeting, the City Council endorsed the recommendation to create a nuisance court that holds offenders who commit nuisance crimes (such as panhandling, public intoxication, trespassing, solicitation, etc.) accountable by requiring community service that restores the damage caused by crime as a part of sentencing. In addition to holding offenders accountable, City Council stated its goal to limit the cycle of repeat offenses by reducing the number of instances in which an offender receives "time served" as punishment for the crime. One component emphasized by the City Council for achieving these goals was developing a model that ensures expedient case processing and expedient community service, so that justice and accountability are swift. Based on these goals, City Council directed staff to meet with intergovernmental partners and develop an implementation plan and detailed budget for a nuisance court.

Since the May 19 meeting, staff has researched various models and reached out to numerous intergovernmental and community stakeholders including representatives of the Buncombe County Judicial District 28, the District Attorney's Office, the Public Defender's Office, the Clerk of Court, the Buncombe County Sheriff's Office, Buncombe County government (including the Human Services Support Team, Pre-Trial Services, and the Jail Diversion program), Western North Carolinians for Criminal Justice, the Asheville Downtown Association, the Downtown Asheville Residents Network (DARN), and several community agencies and treatment providers (Western Highlands Network, Pisgah Legal Services, RHA, Parkway Behavioral Health, Our Voice).

At the City Council Public Safety Committee on June 21, 2009, District Attorney Ron Moore presented a framework in which appropriate cases would be directed to the nuisance court. Under this model, if an individual pleads or is found guilty, community service could be presented as an alternative to an active jail sentence for the offense. If the offender opts to complete community service, he or she would be assigned to a City of Asheville project through the Judicial District 28 Probation Office. These community service projects would support City Council's goals for promoting cleanliness, beautification, and maintenance in the downtown area and throughout city properties and facilities. City staff would supervise the completion of community service and submit the necessary documentation to the probation office for court monitoring for compliance.

District Attorney Ron Moore discussed having the same judge and assistant district attorney assigned to this court in order to ensure consistency in case processing. In addition, under this model, the District Attorney's Office has offered to track and report on offenders who come through the court to evaluate performance measurements like repeat offenses. The District Attorney's Office has suggested holding the court once a month during its initial launch to evaluate progress and determine if additional court dates are needed.

This action achieves a goal included in the City Council's annual strategic plan. Under the focus area "safe," the strategic plan states, "Partner to launch a nuisance court to achieve more efficient and effective prosecution of offenses that impact quality of life; continue to encourage adequate funding of the District Court system."

The City Council Public Safety Committee unanimously supported the nuisance court plan as outlined in this staff report. The committee also voted to send a letter to Chief District Court Judge Cash requesting that Judge Calvin Hill be assigned to the nuisance court.

Pros:

- Dedicates resources to processing cases that may not otherwise receive the time and attention they require in an underfunded and overwhelmed State Court system.
- Supports intergovernmental partnerships with the Buncombe County Judicial District 28 and the District Attorney's Office to address quality of life issues.

Cons:

- Launched as a pilot initiative that may require adjustment over time to achieve stated goals.
- This may include a budgetary adjustment to accommodate additional court dates if requested by the District Attorney.

The costs for the nuisance court implementation are outlined below. Court administration costs will be paid to the North Carolina Administrative Office of Courts. Community service supplies will be purchased and managed by City staff.

• Court Administration (Courtroom, Judge, Clerk)	$10,000
• Community Service Supplies (Vests, Tools, Mulch)	$15,000
	$25,000

Staff recommends allocating the $25,000 from the $100,000 included in the Fiscal Year 2009-10 budget for downtown cleanliness and beautification. Because these funds are already included in the budget, a budget amendment is not required. To date, City Council has designated from these funds:

• Spare Change for Real Change	$2,500
• Crimestoppers Graffiti Rewards	$5,000
• Nuisance Court (as proposed)	$25,000
SUBTOTAL	$32,500
• Graffiti Removal (separate item)	$45,500 *(pending approval)*
TOTAL	$78,000

If the nuisance court and graffiti removal program are approved as proposed, a $22,000 balance would remain in these funds.

City staff recommends City Council approve the implementation plan for a nuisance court.

In response to Councilman Russell, Ms. Bradley said that staff is developing a list of community service assignments, e.g., weeding, picking up litter, cleaning under garbage cans, cleaning off graffiti, landscaping, spreading mulch, picking up cigarette butts, etc.

Regarding vests for the violators, Councilwoman Cape suggested staff look for a creative way to let the community know that when you violate our laws, that this community service is your consequence.

When Mayor Bellamy asked for public comment, no one spoke.

Vice-Mayor Davis moved to direct City staff with the implementation plan and budget for creation of a nuisance court as outlined above. This motion was seconded by Councilman Mumpower and carried unanimously.

C. GRAFFITI REMOVAL

Assistant to the City Manager Lauren Bradley said that this is the consideration of staff recommendations for implementing graffiti removal services on private property.

At the City Council meeting on May 19, 2009, City Council directed staff to explore the potential for contracting or partnering with a non-profit agency or agencies for graffiti removal.

After reviewing research on best practices, legal and liability considerations, and speaking with to local non-profit agencies about potential partnerships for graffiti removal, staff presented options and further policy questions to the City Council Public Safety Committee at its meeting on July 21, 2009. At that meeting, the Public Safety Committee directed staff to:

- Develop for City Council consideration a graffiti removal ordinance that requires property owners to remove graffiti within seven days of notification, and to include a six month grace period on enforcement of the ordinance to allow for adequate public outreach and an opportunity for voluntary compliance, and;

- Develop an option for voluntary graffiti removal services for private property owners that utilizes a partnership with an outside agency so that rates for removal offer a competitive value for property owners and also produce enough revenue to cover public costs associated with the service.

The City Attorney's Office is working on the graffiti removal ordinance and will be prepared to bring it back for City Council consideration this fall.

Based on the City Council's stated goals and Public Safety Committee direction, City staff has determined that the most efficient and cost effective option would be for the City to administer and oversee graffiti removal services utilizing labor under the terms of the organization's existing contract with FIRST at Blue Ridge, Inc.

This action supports a focus area in the City Council's annual strategic plan to make Asheville one of the safest and most secure communities when compared to cities of similar size.

Pros:

- Contract labor can be scaled up or down to meet the demand for the program.
- Contract with FIRST at Blue Ridge, Inc. could be extended immediately, allowing the program to be launched within 30 days.
- Considerations such as workers compensation and liability insurance are addressed under a city-managed program.
- When the crew is not providing graffiti removal services, it can be assigned to other downtown and main corridor cleanliness projects including sidewalk cleaning, litter remediation, landscaping and weed removal, and other similar tasks.
- Crew can be supplemented by community service assignments made through the nuisance court.
- Cost recovery efforts can offset public investment in the program while providing property owners a valuable and consistent service for graffiti removal.

Cons:

- Existing resources will be reallocated to absorb administrative requirements and to assign a labor crew supervisor to launch the program. It is anticipated but not guaranteed that a portion of these costs will be recovered through charges for services.
- Launched as a pilot initiative that may require adjustment over time to achieve stated goals.

Staff recommends extending the existing contract with FIRST at Blue Ridge, Inc. to allow for two additional labor crew personnel at a cost of $36,000 per year. In addition, $9,500 will be needed for materials and supplies, bringing the total for the program to $45,500.

Based on the staff recommendation, graffiti removal services would be billed to the property owner at $80 per hour, which is the full cost recovery rate for supervision, labor, materials and equipment. A crew of one labor crew supervisor (allocated using existing resources) and two laborers would remove graffiti for this rate.

Staff recommends allocating the $45,500 from the $100,000 included in the Fiscal Year 2009-10 budget for downtown cleanliness and beautification. Because these funds are already included in the budget, a budget amendment is not required. To date, City Council has designated from these funds:

• Spare Change for Real Change	$2,500
• Crimestoppers Graffiti Rewards	$5,000
• Nuisance Court	$25,000
SUBTOTAL	$32,500
• Graffiti Removal (as proposed)	$45,500 *(pending approval)*
TOTAL	$78,000

If the nuisance court and graffiti removal program are approved as proposed, a $22,000 balance would remain in these funds.

City staff recommends City Council approve the implementation plan for the graffiti removal program, and to instruct staff to provide Council with quarterly reports on its progress. City staff also recommends that City Council schedule consideration of a graffiti removal ordinance this fall.

Councilman Mumpower felt this action is penalizing the victim by forcing property owners to participate in a system before we have a strong, clear graffiti vandalism intervention effort in place, e.g., the reward program.

Vice-Mayor Davis supported this action in that the ordinance require property owners to remove graffiti within seven days of notification, and to include a six month grace period on enforcement of the ordinance to allow for adequate public outreach and an opportunity for voluntary compliance.

Councilwoman Cape noted that the graffiti removal ordinance will be reviewed by Council in a later date.

When Mayor asked for public comment, no one spoke.

Councilman Miller moved to (1) approve the implementation plan for the graffiti removal program; (2) instruct staff to provide Council with quarterly reports on its progress; and (3) schedule consideration of a graffiti removal ordinance this fall. This motion was seconded by Councilwoman Cape and carried on a 6-1 vote, with Councilman Mumpower voting "no."

VI. NEW BUSINESS:

A. TOWN OF MILLS RIVER FIRE HYDRANT REQUEST

Mayor Bellamy said that Town of Mills River Mayor Roger Snyder has requested the City of Asheville to install a fire hydrant on the City's waterline, at Mill's River's expense, on Hooper Lane. After investigation by City staff and after consulting with multiple independent engineers, City staff recommended the request for the hydrant by denied, with the alternative option for them to draw domestic waterline service from the City of Asheville instead of the Hendersonville trunk line. Since Mayor Snyder has asked for a formal letter signed by herself, as Mayor, she felt it would be appropriate to notify City Council of the request as it is outside of the normal operating process.

As City Council felt this is a staff operational issue, it was the consensus of Council that an appropriate notice of the decision of the City of Asheville be written to Mayor Snyder.

B. SMOKING ON PUBLIC PROPERTY

City Attorney Oast said that as City Council has probably heard, the N.C. General Assembly has enacted a law giving local governments increased authority to regulate smoking. The ratified law, Session Law 2009-27, makes changes to several provisions of the N. C. General Statutes. It was signed by Governor Perdue on May 19.

Previously, local governments could regulate smoking in government buildings, but this authority did not extend to parks or other public spaces. The new law extends the local government authority to regulate smoking to "grounds," encompassing unenclosed areas owned or leased by the government, and "public places," meaning places to which the public is invited.

For counties, a prerequisite to local government action is that a rule or policy must be adopted by the local board of health after July 1, 2009. Pursuant to this provision, the Buncombe County Board of Health has adopted a resolution recommending that smoking be prohibited in all County facilities and on all County property.

He has been in touch with the County Attorney's office, and we think that consideration should be given to making the ordinance as consistent as possible across political jurisdictions within the County. He has also spoken with the town attorneys for Weaverville and Black Mountain about this, and will speak to the attorneys for the other towns to determine their level of interest.

The new law is not effective until January 2, 2010, but Council should begin consideration of how and where it wishes to apply this regulatory authority.

Issues that Council may wish to consider and provide direction on include:

- Whether to apply a prohibition to all City facilities and grounds
- Whether to apply a prohibition to other public places
- How the regulations will be enforced.

Since many of the facilities to which the regulations might be newly applied are public parks, or are operated by the City's Parks Department, a suggestion has been made to refer the matter to the Recreation Advisory Board for initial recommendations on facilities to be included. A reference to the Public Safety Committee is recommended as to issues of enforcement.

We expect to receive information on this new law in the coming weeks.

Councilman Mumpower supported a smoking ban in public parks; however, personally he encouraged staff to look for opportunities to create outdoor smoking areas for people who want to exercise their right to smoke.

Councilwoman Cape felt it was a good idea for the smoking ordinance to be consistent with across political jurisdictions within the County. She also supported carving out areas in parks that can be smoking areas.

In response to Councilman Newman, City Attorney Oast said that we cannot regulate smoking on streets or sidewalks.

Councilman Newman felt it was important to balance the concerns of municipal employees who are on City property every day with the concerns of the general community.

A recent graduate of Asheville High School felt that people make the choice to smoke, but when they smoke in public areas, their right is compromised. She urged Council to adopt a strict policy that does not allow any smoking areas.

It was the consensus of Council to (1) instruct City Attorney Oast to continue conversations with Buncombe County and other attorneys in Buncombe County to determine their level of interest; and (2) refer this matter to the Public Safety Committee and Recreation Board.

C. BOARDS & COMMISSIONS

It was the consensus of Council to re-advertise for the vacancies on the Americans with Disabilities Act Compliance Committee.

It was the consensus of Council to instruct the City Clerk to prepare the proper paperwork to reappoint Mr. Steve Cochran, Ms. Cheryl McMurry, Ms. Kim MacQueen and Mr. Scott Dedman to each serve an additional three-year term on the HUB Community Economic Development Alliance Board.

It was the consensus of Council to re-advertise for the vacancies on the Planning & Zoning Commission.

It was the consensus of Council to interview David Mosrie, Wayne Wheeler, Mary Ann West and Nelson Sobel for vacancies on the Recreation Board.

It was the consensus of Council to re-advertise for the vacancy on the Tourism Development Authority.

It was the consensus of Council to interview Tom Tomlin, Georgia M. Shannon and Rachel Bliss for a vacancy on the Transit Commission.

It was the consensus of Council to re-advertise for the vacancy on the URTV Inc. Board of Directors. The Board & Commissions Committee suggested an appointment be someone with a financial background. Mayor Bellamy suggested someone who has mediation skills.

Ms. Dale Joyner was concerned that her appointment by City Council to the URTV Inc. Board of Directors was not carried out. She also expressed concern of some type of conspiracy against her by a private citizen and a Council member. Mayor Bellamy suggested Ms. Joyner discuss her concerns with City Attorney Oast and instructed City Clerk Burleson to review the Council minutes regarding Ms. Joyner's understanding of the appointment process.

Councilwoman Cape felt Council should not appoint anyone who has contributed to the turmoil at URTV Inc. Therefore, she made a motion to remove Ms. Joyner and any other people who have been involved in these altercations from the ability to apply for appointment to the URTV Inc. Board of Directions. This motion died due to lack of a second.

The following individuals supported the work of URTV Inc. and its Board of Directors:

Mr. Matt Howard, City Council representative on the URTV Inc. Board of Directors
A URTV producer
Ms. Lisa Landis, URTV producer
Mr. N. Nelson Staley, URTV co-producer
Ms. Connie Nappy, URTV producer

Mr. John Blackwell explained why he did not support the current executive director of URTV.

VII. OTHER BUSINESS:

When Councilman Mumpower asked to raise several issues, Mayor Bellamy said that City Clerk Burleson has already responded to him in writing per her instructions, according to the protocol used for requesting items on the agenda.

When Councilman Mumpower felt he should have the opportunity to bring issues to Council's attention, Mayor Bellamy said that she has responded to the items requested as is protocol.

Councilman Newman suggested Councilman Mumpower contact the Chairs of the appropriate City Council committees to include his items on their agendas, prior to coming to the full Council. Councilman Mumpower preferred to discuss these items with the full Council and then have Council refer them to the appropriate Council committee.

When Councilman Mumpower began raising his issues, Mayor Bellamy announced he was out of order.

VIII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

IX. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 10:10 p.m.

Magdalen Burleson
CITY CLERK

MAYOR

Tuesday – August 25, 2009 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Jan B. Davis; Councilwoman Robin L. Cape; Councilman Kelly M. Miller; Councilman R. Carl Mumpower; Councilman Brownie W. Newman (arrived at 5:20 p.m.); Councilman William A. Russell Jr.; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Bellamy led City Council in the Pledge of Allegiance.

INVOCATION

Vice-Mayor Davis gave the invocation.

I. PROCLAMATIONS:

A. PROCLAMATION PROCLAIMING AUGUST 30, 2009, AS "PEDIATRIC BRAIN TUMOR FOUNDATION'S RIDE FOR KIDS DAY"

Mayor Bellamy read the proclamation proclaiming August 30, 2009, as "Pediatric Brain Tumor Foundation's Ride for Kids Day" in the City of Asheville. She presented the proclamation to Mr. Mike Burk, who briefed City Council on some activities taking place during the day and thanked City Council for their support.

B. PROCLAMATION PROCLAIMING SEPTEMBER 2009, AS "ADULT LITERACY AWARENESS MONTH"

Vice-Mayor Davis read the proclamation proclaiming September 2009, as "Adult Literacy Awareness Month" in the City of Asheville. He presented the proclamation to Ms. Amanda Edwards, Executive Director of the Literacy Council of Buncombe County, who briefed City Council on some activities taking place during the month.

C. PROCLAMATION PROCLAIMING SEPTEMBER 1, 2009, AS "ASHEVILLE-BUNCOMBE TECHNICAL COMMUNITY COLLEGE DAY"

Mayor Bellamy read the proclamation proclaiming September 1, 2009, as "Asheville-Buncombe Technical Community College Day" in the City of Asheville. She presented the proclamation to Mr. Richard Mauney, Interim President of A-B Technical Community College, who briefed City Council on some activities taking place during the day and the partnership with the City of Asheville.

II. CONSENT AGENDA:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON AUGUST 11, 2009

B. MOTION SETTING A PUBLIC HEARING ON SEPTEMBER 8, 2009, FOR SPECIFIC RECOMMENDATIONS FOR THE DISTRIBUTION OF HOMELESSNESS PREVENTION AND RAPID REHOUSING PROGRAM GRANT FUNDS

Summary: The consideration of a motion setting a public hearing on September 8, 2009, for specific recommendations for the distribution of Homelessness Prevention and Rapid Re-Housing Program (HPRP) grant funds.

The City of Asheville was approved by the US Dept. of HUD to receive $509,460 in Homelessness Prevention and Rapid Re-Housing Program (HPRP) funds. The Action Plan approved by HUD detailed the process by which the City would distribute those funds. The process described below, and the public hearing requested, are included in the approved Action Plan.

On August 13, 2009, the City received applications for the use of those funds. Staff will review the applications, and provide their review to the Homeless Initiative Advisory Committee on August 25, and to the Housing and Community Development Committee on August 26. The HCD will consider the Advisory Committee recommendation and staff review, and make their recommendation to City Council for the specific distribution of those funds for program implementation.

Funds must be committed before September 30, 2009. HPRP guidelines require that all funds be used within a thirty-six month period, or by September 30, 2012.

This action complies with the City Council Strategic Operating Plan in that this hearing is part of the process that will enable funds to be directed to prevention and rapid re-housing, strategies that have been proven nationally to reduce homelessness.

Pros:

- The public hearing is a necessary element of the HPRP plan and program.
- The public hearing contributes to the public transparency of Asheville City government.

Con:

- None noted.

By preventing homelessness and rapidly re-housing households that are in a housing crisis, we limit the probability that individuals will become chronically homeless. The 10-Year Plan estimates that it can cost up to $12,000 annually in public funds to pay for someone who is experiencing chronic homelessness. The project increases the likelihood that households will obtain or maintain housing as well as employment, education, and community relationships.

Staff recommends setting the public hearing for September 8, 2009, for specific recommendations for the distribution of Homelessness Prevention and Rapid Re-Housing Program (HPRP) grant funds.

C. RESOLUTION NO. 09-181 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH C AND C BUSINESS INC. TO PROVIDE CUSTODIAL SERVICES AND SUPPLIES FOR NINE MUNICIPAL BUILDINGS

Summary: The consideration of a resolution authorizing the City Manager to enter into a contract with C and C Business, Inc. to provide custodial services and supplies for nine municipal buildings.

This service contract with C and C Business, located in Sherrills Ford, North Carolina, is in the second year of a three year renewal period that began in 2008. The service contract is for custodial cleaning and supplies for nine municipal buildings (Public Works, Fleet, Hunt Hill Purchasing and Central Stores, Economic Development, Municipal Building and four Asheville Police Department Resource Centers: West, North, East and Skyland). The total contract amount is $68,805.90 and it is renewable annually with a CPI adjustment.

This action complies with the City Council Strategic Operating Plan in that it supports and enhances basic city services and is part of the public facilities maintenance program to make facility improvements. It is also a green focus area by utilizing green cleaning supplies and equipment which meets Green Seal Standard's and paper products as well as garbage bags that meet the U.S. Environmental Protection Agency's guidelines for post consumer recycled products.

Pros:

- Provide custodial services and cleaning supplies for nine municipal buildings.
- Utilize environmentally friendly cleaning supplies and equipment.

Con:

- None

The fiscal impact is $68,805.90 for contracted custodial services is budgeted in the City's Fiscal Year 2009-10 operating budget for public facilities.

City staff recommends City Council to adopt a resolution authorizing the City Manager to enter into a contract with C and C Business, Inc. to provide custodial services and supplies for nine municipal buildings in the amount of $68,805.90.

RESOLUTION BOOK NO. 32 – PAGE 187

D. RESOLUTION NO. 09-182 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH OTIS ELEVATOR TO PROVIDE ELEVATOR MAINTENANCE AND REPAIR FOR THREE MUNICIPAL BUILDINGS

Summary: The consideration of a resolution authorizing the City Manager to enter into a contract with Otis Elevator to provide elevator maintenance and repair services for three municipal buildings.

The service contract with Otis Elevator, located at 203 Elk Park Drive in Asheville, is in the second year of a five year renewal period that began in 2007. The service contract is a predictive, preventative maintenance system for the elevators at City Hall, Municipal Building and Stephens Lee Recreation Center. The total contract amount is $68,683.56 and it is renewable annually with a CPI adjustment.

This action complies with the City Council Strategic Operating Plan in that it supports and enhances basic city services and is part of the public facilities maintenance program to make facility improvements.

Pros:

- Provide a contract to maintain elevators at City Hall, Municipal Building and Stephens Lee Recreation Center.
- Fulfill commitment to maintain existing infrastructure to prevent failure through preventive maintenance and avoid costly repairs.

Cons:

- Maintenance cost to the elevators in City Hall will continue to increase due to the age of the elevators thereby increase the cost of the annual service contract.
- Some repair costs may still be incurred that are not covered by the service contract.

The fiscal impact is $68,683.56 for contracted elevator services is budgeted in the City's Fiscal Year 2009-10 operating budget for facilities maintenance.

City staff recommends City Council to adopt a resolution authorizing the City Manager to enter into a contract with Otis Elevator to provide elevator maintenance and repair services for three municipal buildings in the amount of $68,683.56.

RESOLUTION BOOK NO. 32 – PAGE 188

E. RESOLUTION NO. 09-183 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH THE NATIONAL TRANSPORTATION COMMUNITY AWARENESS AND EMERGENCY RESPONSE FOR A GRANT FOR A HAZARDOUS MATERIAL COMMODITY FLOW STUDY

ORDINANCE NO. 3775 - BUDGET AMENDMENT TO ACCEPT A NON-MATCHING GRANT FROM THE NATIONAL TRANSPORTATION COMMUNITY AWARENESS AND EMERGENCY RESPONSE FOR A HAZARDOUS MATERIAL COMMODITY FLOW STUDY

Summary: The consideration of a resolution authorizing the City Manager to accept a non-matching grant in the amount of $500 from the National Transportation Community Awareness and Emergency Response (TRANSCAER) Task Group for a Hazardous Material Commodity Flow Study to be conducted in the Fall of 2009; and the associated budget amendment, in the amount of $500.

The National TRANSCAER has made funds available to help offset operational expenses when conducting flow studies that determine the amount of hazardous materials traveling through a community.

The Asheville Fire Department has an obvious interest in knowing what commodities are being transported to, and through, our area. At the completion of the commodity flow study, we will receive detailed analysis of what these commodities are. This will allow us to plan and prepare for more specific hazard responses through training and education based on known hazards being transported on our highway systems.

The grant is a non-matching grant.

This action complies with the Strategic Operating Plan by better preparing the Hazardous Materials Team to assist in making Asheville a safer city, based on appropriate metrics for similarly sized cities.

Pros:

- The National TRANSCAER will provide $500.00 in non-matching funds for the purpose of a Commodity Flow Study for Asheville and Western North Carolina to provide actual data on what hazards are transported through our city and region.
- Firefighter and citizen safety will be enhanced.

Con:

- There are no con's identified for this grant.

There is no fiscal impact associated with this grant, as it is non-matching.

City staff recommends that City Council accept the non-matching grant from the National TRANSCAER, to enhance the fire department's capabilities to protect Asheville and Western North Carolina, and the associated budget amendment.

RESOLUTION BOOK NO. 32 – PAGE 189

ORDINANCE BOOK NO. 25 – PAGE 386

F. RESOLUTION NO. 09-184 - RESOLUTION AUTHORIZING THE MAYOR TO SIGN AN AUTOMATIC AID SERVICE CONTRACT WITH REEMS CREEK FIRE DEPARTMENT

Summary: The consideration of a resolution authorizing the Mayor to sign an automatic aid service agreement in the amount of $75,700 with the Reems Creek Fire Department for response

City Council approved in the Fiscal Year 2009-10 adopted budget funding to continue an automatic aid service agreement with the Reems Creek Fire and Rescue Department. This agreement has been in place since 2007 and provides for automatic response by the Reems Creek Fire and Rescue Department to emergency incidents to locations in the Beaverdam Valley that benefit the City of Asheville. This service agreement provides for a stronger standard of cover in this area.

Reems Creek receives funds through our automatic mutual aid agreement to fund two firefighter positions at their Beaverdam station. With our standard of cover in the Beaverdam Valley at 20%, this is a less expensive option than building and manning a new station in that area.

This action complies with the Strategic Operating Plan by allowing for a stronger standard of cover in the Beaverdam Valley; and will assist in making Asheville a safer city, based on appropriate metrics for similarly sized cities.

Pro:

- A strong fire and rescue presence will be maintained in North Asheville through automatic aid response.

Con:

- There is a financial impact of $75,700.

The fiscal impact is $75,700 which has been budgeted in the Fiscal Year 2009-10 adopted budget.

Staff recommends that City Council adopt a resolution authorizing the Mayor to sign an automatic aid agreement in the amount of $75,700 with the Reems Creek Fire Department.

RESOLUTION BOOK NO. 32 – PAGE 190

G. RESOLUTION NO. 09-185 - RESOLUTION AUTHORIZING THE MAYOR TO SIGN AN AUTOMATIC AID SERVICE AGREEMENT WITH THE SKYLAND FIRE AND RESCUE DEPARTMENT

Summary: The consideration of a resolution authorizing the Mayor to sign an automatic aid service agreement in the amount of $53,045 with the Skyland Fire and Rescue Department.

City Council approved in the Fiscal Year 2009-10 adopted budget funding to continue an automatic aid service agreement with the Skyland Fire and Rescue Department. This agreement has been in place since 2007 and provides for automatic response by the Skyland Fire and Rescue Department to emergency incidents to locations that benefit the City of Asheville. The

Asheville and Skyland Fire and Rescue Department's co-locate at a facility on Miller Road. This service agreement places all of the responsibility for the maintenance of the Miller Road facility for normal and routine maintenance operations with the Skyland Fire and Rescue Department.

Asheville Fire Department is co-located with Skyland Fire and Rescue at 9 Miller Road. In 2007 a contract was developed to compensate them for our share of maintaining the actual facility, including electricity, maintenance etc. That amount was set at $50,000 annually with increases based on the annual CIP. Previous to this contract we were obligated to pay half of these costs as they occurred. We had no real oversight as to what these expenses would be from year to year so the amount was annualized based on historical costs. There is a small portion of the automatic aid agreement that is to compensate Skyland Fire and Rescue for them to cover the south end of the airport which is outside of our 5 mile maximum allowed by the Department of Insurance.

This action complies with the Strategic Operating Plan by allowing for a co-located emergency services facility in South Asheville; and will assist in making Asheville a safer city, based on appropriate metrics for similarly sized cities.

Pros:

- A strong fire and rescue presence will be maintained in South Asheville through automatic aid response.
- Maintenance operations of the Miller Rd. facility will be the responsibility of the Skyland Fire and Rescue Department, allowing for continuity of operations out of that station.

Con:

- There is a financial impact of $53,045.

The fiscal impact is $53,045 which has been budgeted in the Fiscal Year 2009-10 adopted budget.

Staff recommends that City Council adopt a resolution authorizing the Mayor to sign an automatic aid agreement in the amount of $53,045 with the Skyland Fire and Rescue Department.

RESOLUTION BOOK NO. 32 – PAGE 191

H. RESOLUTION NO. 09-186 - RESOLUTION APPOINTING MEMBERS TO THE HUB COMMUNITY ECONOMIC DEVELOPMENT ALLIANCE

Summary: The terms of Steve Cochran, Cheryl McMurry, Kim MacQueen and Scott Dedman expired on August 22, 2009.

On August 11, 2009, it was the consensus of Council to reappoint Mr. Cochran, Ms. McMurry, Ms. MacQueen and Mr. Dedman to each serve an additional three-year term respectively, terms to expire August 22, 2012, or until their successors have been appointed.

RESOLUTION BOOK NO. 32 – PAGE 192

I. RESOLUTION NO. 09-187 - RESOLUTION AUTHORIZING THE CITY TO REIMBURSE ITSELF FROM LEASE PURCHASE PROCEEDS FOR CAPITAL EXPENDITURES INCURRED RELATED TO THE ACQUISITION OF VEHICLES AND EQUIPMENT

Summary: The consideration of a resolution authorizing the City to reimburse itself from lease purchase proceeds for capital expenditures incurred related to the acquisition of vehicles and equipment.

The current capital improvement program (CIP) includes $1,790,400 previously appropriated by City Council to finance the acquisition of emergency response vehicles (i.e. fire trucks). The vehicles and equipment were budgeted to be funded with proceeds from a lease-purchase financing contract.

Based on varying delivery dates, the City will receive some of the vehicles and equipment prior to the actual execution of the lease-purchase financing contract. As such, expenditures for these vehicles and equipment will initially be paid for with general fund cash. The attached resolution allows the City to reimburse itself for initial vehicle and equipment expenditures incurred and paid 60 days prior to the adoption of this resolution.

With approval of this resolution, the City intends to reimburse its initial vehicle expenditures from a portion of the proceeds to be received from a fully executed lease-purchase contract.

City staff recommends City Council adopt a resolution authorizing the City to reimburse itself from lease purchase proceeds for capital expenditures incurred related to the acquisition of vehicles and equipment.

RESOLUTION BOOK NO. 32 – PAGE 193

Mayor Bellamy asked for public comments on any item on the Consent Agenda, but received none.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilwoman Cape moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Miller and carried unanimously.

III. PRESENTATIONS & REPORTS:

A. ECONOMIC STIMULUS PACKAGE UPDATE

RESOLUTION NO. 09-188 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AGREEMENTS WITH THE N.C. DEPT. OF TRANSPORTATION FOR THE IMPLEMENTATION OF TWO TRANSPORTATION PROJECTS KNOWN AS ASHEVILLE SIDEWALK GAP PROJECT AND THE KIMBERLY AVENUE RESURFACING PROJECT

ORDINANCE NO. 3776 – BUDGET AMENDMENT FOR SIX TRANSPORTATION PROJECTS KNOWN AS COXE AVENUE BICYCLE IMPROVEMENTS, DOWNTOWN AND GATEWAY STREETSCAPES, FAIRVIEW ROAD PEDESTRIAN ENHANCEMENTS, SOUTH SLOPE BICYCLE LANES, ASHEVILLE SIDEWALK GAPS AND KIMBERLY AVENUE RESURFACING

ORDINANCE NO. 3777 – BUDGET AMENDMENT TO RECEIVE TRANSIT CAPITAL FUNDS FOR FIVE DIESEL BUSES AND SHELTERS, AND PASS THROUGH FUNDS FOR TWO CNG BUSES AND ONE CNG VAN FOR HENDERSON COUNTY

RESOLUTION NO. 09-189 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH MCGILL ASSOCIATES

TO PROVIDE CONTRACT MANAGEMENT FOR DINGLE CREEK WATERSHED IMPROVEMENTS

American Recovery & Reinvestment Project Manager Brenda Mills updated Council on the following applications for the economic stimulus package.

As part of City staff's recurring ARRA update to Asheville City Council, staff is seeking Council consideration of four (4) items for approval:

- Resolution authorizing the City Manager to enter into agreements with the N.C. Dept. of Transportation for the implementation of two transportation projects known as Asheville Sidewalk Gap project and the Kimberly Avenue Resurfacing Project.
- Budget amendment, in the amount of $3,095,235, in the Grant Fund and an amendment of $366,812 in the General Fund, for six transportation projects known as Coxe Avenue bicycle improvements; downtown and gateway streetscapes; Fairview Road pedestrian enhancements; south slope bicycle lanes; Asheville sidewalk gaps; and Kimberly Avenue resurfacing.
- Budget amendment, in the amount of $2,590,439, to receive Transit Capital funds for five diesel buses and shelters; and pass through funds for two CNG buses and one CNG van for Henderson County.
- Resolution authorizing the City Manager to enter into an agreement with McGill Associates to provide contract management for Dingle Creek Watershed Improvements.

MPO Urbanized Area Transportation Funding Resolution

The resolution authorizes the City Manager to execute the municipal agreements for the remaining two projects selected by the Metropolitan Planning Organization (MPO) for potential ARRA surface transportation program - directly attributable (STP-DA) funding. These projects are known as TIP No. U-5186, Asheville Sidewalk Gaps, which includes gaps I and II and Hilliard Avenue sidewalk; and TIP No. U-5187, Kimberly Avenue resurfacing.

When the MPO selected projects for the ARRA STP-DA funds, they added a 20% contingency to each project funded, and selected about $2 million more in projects than they had funding for, in case any projects dropped out or came in under budget. The sidewalk gaps and Kimberly Avenue projects fell into the category of selected but not fully funded. There is approximately $530,000 in ARRA funding programmed to the sidewalk projects at this time, leaving an unfunded balance of $1.8 million. There is a reasonable expectation that projects funded with the ARRA STP-DA funds will not use all of the funds programmed to each project, and so those unspent ARRA funds will be available to fund a larger percentage of these projects.

In order to complete the municipal agreements for these projects in time to be eligible for the available ARRA funding, another funding source for the currently unfunded balance of the projects must be identified. With City Council and MPO approval, the opportunity is available to use STP-DA funding funds scheduled to come to the city from the MPO for sidewalk construction in Asheville in fiscal years 2014 through 2016 to cover any unfunded balance on these projects so that they can be constructed now. Any regular STP-DA funds used will require a 20% city match.

This matter went before the Finance Committee on August 11th, and the committee directed staff to proceed with seeking full council approval to move forward on the sidewalk gaps and Kimberly Avenue using STP-DA funds. The committee was aware that if ARRA funding is not available then the City will be required to have a 20% match for the portion of the project that is funded with the regular STP-DA funds.

Pros:

- Improves Asheville's transportation facilities for all users

- Implements projects in the City's adopted pedestrian and bicycle plans
- Provides approximately $2.4 million dollars in long term investment in the City's infrastructure

Cons:
- The city will be responsible for future maintenance of the projects
- The city may be responsible for up to $366,812 in local match
- Any regular STP-DA funds spent on these projects will reduce the $6.2 million allocated to the Hendersonville Road and New Leicester Highway projects in FYs 2014-2016

Budget Amendment

The budget amendments for six projects reflect the revenue and expenditures associated with the four ARRA STP-DA agreements authorized at the August 11th council meeting, and the two agreements presented tonight.

Pro:
- Provides authority to receive and spend the grant funds.

Con:
- The city may be responsible for up to $366,812 in local match.

Update on Sidewalk Gaps Project

At Council direction, staff worked with the MPO to remove the Chunns Cove Road and Piney Mountain Road sidewalks from the project list, and replaced it with a segment of Hendersonville Road from West Chapel Road to Forest Street. With this revision, the sidewalk proposal contains the following projects.

Street	Approximate linear feet	Cost Estimate
Hendersonville Road	2,600	$200,000
Depot Street	600	$90,000
Hilliard Street	1,200	$360,000
Short Michigan Avenue	1,350	$270,000
Choctaw	1,400	$350,000
Linden Street	1,100	$165,000
Evelyn Place	130	$32,500
Total	8,380	$1,467,500.00

Staff recommends City Council adopt the resolution authorizing the City Manager to execute municipal agreements between the N.C. Dept. of Transportation and the City of Asheville for the following projects: Asheville Sidewalk Gaps and Kimberly Avenue Resurfacing; and the associated budget amendment for the four ARRA STP-DA agreements authorized at the August 11th Council meeting, and the two projects presented tonight.

At this time, 5:20 p.m., Councilman Newman arrived at the meeting.

Transit Capital

The budget amendment, in the amount of $2,590,439, is to purchase five diesel buses and 10 shelters for the City of Asheville; and two CNG buses and one CNG van for Henderson County.

The City of Asheville was awarded $2,590,439 under the economic stimulus funding, as published in the Federal Register Volume 74, No. 42, page 9675 on March 5, 2009.

The city is intending to use these funds to purchase five (5) 35 foot diesel buses through State contract No. 556a that expires in October 2011. Production is estimated to take 12 months after the buses are ordered. In addition ten (10) shelters will be installed along the main transit corridors; completion of this project is expected by July 2010.

The City was reclassified as Urbanized Area, as part of the 2000 Census; due to the reclassification Henderson County's Apple Country became part of the transit systems in the Metropolitan Area. As such the City and the County share the federal allocation. The County will receive $585,841 of the total allocation. The City and the County have signed a Sub-recipient Agreement in which it is specified how the funds are disbursed as well as the oversight of these funds. The City is responsible to Federal Transit Authority (FTA) for use of these funds and owns all the capital items Henderson County will purchase with this allocation. As part of the sub-recipient agreement, the City will acquire two small CNG buses and one CNG van and will lease the vehicles to Henderson County.

This action complies with a goal included in City Council's Strategic Operating Plan, which states that the city will proactively leveraging funding from the Federal Government and other funding sources for transportation improvements.

No fiscal impact has been identified for this project. The Federal Transit Administration will fund 100% of the project.

Pros:

- Access to FTA funds will allow replacement of five buses, which will result in savings in maintenance costs and fuel consumption, as well as reduction in carbon footprint emissions.
- FTA will fund 100% of the project.

Con:

- None.

Staff recommends approval of a budget amendment, in the amount of $2,590,439, to accept funds for Transit Capital funds awarded through ARRA.

Dingle Creek Stormwater Improvements

The City of Asheville, through a previous grant with the Clean Water Management Trust Fund, developed a stormwater master plan for the Dingle Creek Watershed. This master plan indicated that stormwater runoff has increased due to the largely developed urban watershed. In addition, the study showed an increase in pollutant concentrations in this area. Dingle Creek is not currently listed on the N.C. Dept. of Water Quality (NCDWQ) Draft 303 (d) Listing of Impaired Waters like its receiving water, the French Broad River, but impairments are eminent if the urban runoff is not properly managed.

On August 1, 2006, the City of Asheville entered into an agreement with the Clean Water Management Trust Fund (CWMTF) to perform the work necessary for the design of this specific stormwater restoration project. McGill Associates performed the work necessary to complete the initial design of this project.

On September 15, 2008, the CWMTF approved the City of Asheville's grant application for the construction of the Dingle Creek stormwater wetland and stream enhancement project for a total project amount of $442,000. This grant included funding from the CWMTF in the amount of $335,000 and a cash match from the City of Asheville in the amount of $66,000, along with a property value match for the stormwater wetland in the amount of $30,000 and in-kind services match by the City of Asheville in the amount of $11,000. The City of Asheville later received notice that this funding was being held.

The City had the opportunity to apply for and was granted funding through the American Recovery and Reinvestment Act (ARRA) for the implementation of this project. This would be a 50% grant with a 50% loan requirement, in which the CWMTF has agreed to cover the cost of the loan through their grant funding.

On July 17, 2009, NCDENR approved the American Recovery and Reinvestment Act application for the Dingle Creek project in the amount of $454,500. This awarded grant included funding in the amount of $336,000 for construction, $33,600 for contingencies, $80,400 for project administration and $4,500 for the loan closing fee.

Under this contract, McGill Associates will perform the project administration which will include completing a no rise analysis, contract administration for this project and McGill Associates will complete the necessary documentation required for this project. The actual construction contract will follow at a later date.

The primary goals of the project are to (1) reduce the pollutants through the installation of a stormwater wetland and (2) provide additional storage in the area of the wetland for water quality storm event. This project will also provide a much needed stream bank restoration along this reach of Dingle Creek.

Successful implementation of this project will accomplish the following objectives:

1. Protect and enhance water quality of the French Broad River Basin by reducing typical urban runoff pollutants that are released into Dingle Creek and provided flood prevention by implementing the stormwater wetland.
2. Protect and enhance water quality of the French Broad River Basin by reducing erosion of Dingle Creek by implementing stream bank restoration/stabilization along this reach of Dingle Creek.
3. Protect and enhance wildlife habitat of the French Broad River Basin by implementing habitat enhancement through the installation of the stormwater wetland and stream enhancement measures.
4. Protect and enhance water quality of the French Broad River Basin by implementing one step of a focused watershed approach.

Pros:

- Approval of this action will allow the City to move forward with a portion of the Dingle Creek Master Plan
- The project is funded totally, from both ARRA and the CWMTF
- This project will provide both water quality and flood reduction benefits.

Con:

- Coordinating both of these funding sources will be time consuming.

The funds to be expended have been provided by the State through both ARRA and the CWMTF. City staff will provide project management oversight. The contract administration portion of this project will be funded through ARRA.

City staff recommends City Council adopt a resolution authorizing the City Manager to negotiate and then execute a contract with McGill Associates for the Services described in a contractual Scope of Work for an amount of $80,400. Services will include the preparation of a no impact flood study and also for the contract administration of the above subject project.

Assistant Director of Transportation & Engineering Ken Putnam responded to Councilwoman Cape's question regarding the process the City uses to prioritize items for street resurfacing.

When Councilwoman Cape questioned the 12 month waiting period for a new bus, Director of Transportation & Engineering Cathy Ball explained that buses are not pre-made and they don't start the production line until after the order is received. She said that we will order the fareboxes separately and have them installed when the new buses come in.

In response to Councilman Mumpower, Ms. Ball said that these buses are the new diesel buses that are least expensive.

Councilman Mumpower felt that most of this money is for routine surface maintenance rather than significant infrastructure improvements. He was concerned (1) that we are using borrowed money that our children and grandchildren will have to pay back; and (2) that these jobs create very few jobs, but create additional debt.

When Mayor Bellamy asked for public comments, none were received.

Mayor Bellamy said that members of Council have been previously furnished with copies of the resolutions and ordinances and they would not be read.

Councilman Miller moved for the adoption of Resolution No. 09-188. This motion was seconded by Vice-Mayor Davis and carried on a 6-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 32 – PAGE 194

Councilwoman Cape moved for the adoption of Ordinance No.3776. This motion was seconded by Councilman Miller and carried on a 6-1 vote, with Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 25 – PAGE 388

Councilman Newman for the adoption of Ordinance No. 3777. This motion was seconded by Councilwoman Cape and carried unanimously.

ORDINANCE BOOK NO 25 – PAGE 391

Councilwoman Cape moved for the adoption of Resolution No. 09-189. This motion was seconded by Councilman Miller and carried on a 6-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 32 – PAGE 195

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER ADOPTION OF AN ORDINANCE DESIGNATING THE PROPERTY KNOWN AS THE SPINNING WHEEL ON 1096 HENDERSONVILLE ROAD AS A LOCAL HISTORIC LANDMARK

ORDINANCE NO. 3778 - ORDINANCE TO DESIGNATE THE PROPERTY KNOWN AS THE SPINNING WHEEL ON 1096 HENDERSONVILLE ROAD AS A LOCAL HISTORIC LANDMARK

Mayor Bellamy opened the public hearing at 5:36 p.m.

Ms. Cristin Moody, Development Review Specialist, said that this is the consideration of an ordinance to designate the property known as the Spinning Wheel, located at 1096

Hendersonville Road, as a local historic landmark. This public hearing was advertised on August 14 and 21, 2009.

The Spinning Wheel, with a period of significance from 1939-1948 is significant for its association with two people important to Asheville's development in the early 20th century. First, Clementine Douglas, the original owner, was a leading figure in the Handicraft Revival Movement during that time. Ms. Douglas was not only instrumental in preserving the traditions of mountain handicrafts, but she also brought national recognition and prominence to Asheville as one of the principal centers for the movement. At the Spinning Wheel, she taught crafts and provided workspace as well as a venue for local artisans to sell their wares. In addition, she was a founding member of the Southern Highland Craft Guild, which continues to flourish today.

The Spinning Wheel is significant also due to its association with prominent Asheville architect William Waldo Dodge, Jr. Built in 1939, his original design is a one-story T-shaped retail building that incorporated a 19th century, side-gabled log dwelling that was salvaged from North Buncombe County and rebuilt at the site. Attached to the log structure on the north side is a "dog-trot" connector leading to a board-and-batten sided wing with a front gable, known as the "loom room."

The reclaimed 19th century log structure is architecturally significant as a rare, well-preserved example of a vernacular style prevalent in the region during the early years of settlement. Its significant features include hand hewn logs, half-dovetail corner joints, a massive exterior fieldstone chimney and vertical plank doors with wrought iron strap hinges. The original Spinning Wheel building as a whole has not been significantly altered in nearly 70 years and retains a very high degree of integrity.

The only modification to the original 1939 design was the addition of a concrete block room on the east end of the "loom room" in the early 1940s. Although not part of the original Dodge design, this room falls within the period of significance and represents a phase of the Spinning Wheel's development. During World War II, when the business depended heavily on mail orders, this room was built and used to process the orders for shipping. It is a small, inconspicuous addition that did not alter the integrity of the original design.

The ordinance designates the Spinning Wheel as a local historic landmark. The designation includes .95 acres, which is all of the property originally associated with the structure, and the entire exterior and interior of the building.

The applicant has indicated that increasing development along Hendersonville Road threatens the preservation of this historic structure. Furthermore, recent appraisals suggest that the highest and best use of the property would be to raze the building.

When a property is designated as a local historic landmark, restrictions are placed on the property, and any modification to the land or structure must receive a Certificate of Appropriateness from the Historic Resources Commission of Asheville and Buncombe County. All improvements must follow the Secretary of the Interior's Standards for Rehabilitation and Illustrated Guidelines for Rehabilitating Historic Buildings. It is important that properties of local significance are preserved and protected for cultural, historic, and economic reasons and for the benefit of future generations.

Designation of this site as a local historic landmark makes the property owner eligible for a 50% reduction in local property taxes. Currently the tax appraisal for the property included in the proposed designation is $421,200. If the property is designated as a local landmark the potential tax savings for the property owner, including city, county and school taxes, would be $2,306.07 per year.

Pros:

- A significant property will be recognized for its contribution both architecturally and culturally to the history of the area and will be protected from inappropriate alterations.
- The property is surrounded by residential parcels to the North, East and South. Designating it would provide a stable buffer for these properties from commercial development along Hendersonville Road.
- The tax deferral will assist the landowner with maintenance of the historic property.

Con:

- The tax deferral will reduce revenue to the city and county.

Based upon the foregoing, the Historic Resources Commission recommends that the Asheville City Council adopt an ordinance designating Spinning Wheel, as a local historic landmark. Staff concurs with the recommendation of the HRC for this designation.

Ms. Clementine Douglas explained why she support the local historic designation and asked for Council's support of adoption of the ordinance. He felt this special tax break and that there is no guarantee of permanent preservation, but only guarantee of a permanent tax break.

Mayor Bellamy closed the public hearing at 5:41 p.m.

Councilman Mumpower did not feel that historic buildings are vulnerable as prior years and could not be supportive of this proposal.

Councilwoman Cape was supportive of helping to maintain some of our jewels in the community.

In response to Councilman Newman, Historic Resources Director Stacy Merten said that landmarking the property does not prevent it from demolition, but it does give the HRC a period of 365 days to delay the demolition. That give staff time to work with the property owner to relocate or sell the property to someone else. She said that once this designation is given and a future property owner wants to do something different with the property, the HRC must approve that change first. If approved by the HRC, the property would lose the designation and the property owner would have to pay the taxes back for up to 3 years, per the state regulation.

Councilman Newman would felt the incentive for designation would "stick better" if it was a pay-back period of 5-10 years.

Mayor Bellamy said that members of Council have been previously furnished with copies of the ordinance and it would not be read.

Councilman Newman moved for the adoption of Ordinance No. 3778. This motion was seconded by Councilwoman Cape and carried on a 6-1 vote, with Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 25 – PAGE 393

B. PUBLIC HEARING TO CONSIDER AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO PROVIDE A SEPARATION REQUIREMENT FOR FAMILY CARE HOMES

Mayor Bellamy said that this matter was originally placed on the August 11, 2009, City Council agenda; however, it was continued to this date in order for City staff to notify interested parties. Since that time, however, City staff asked this item be removed from Council consideration entirely. Staff will revise the ordinance further and take back to Planning & Zoning Commission, prior to City Council.

V. UNFINISHED BUSINESS:

A. RESOLUTION NO. 09-190 - RESOLUTION AUTHORIZING THE CITY MANAGER TO TERMINATE A N.C. PARKS & RECREATION TRUST FUND GRANT AGREEMENT WITH THE N.C. DEPT. OF ENVIRONMENT AND NATURAL RESOURCES FOR THE REID CENTER RENOVATION PROJECT AND TO REAPPLY FOR PROJECT FUNDING IN JANUARY OF 2010

Parks & Recreation Director Roderick Simmons said that this is the consideration of a resolution authorizing the City Manager to terminate a N.C. Parks & Recreation Trust Fund (PARTF) grant agreement with the N.C. Dept. of Environment and Natural Resources (DENR) for the Reid Center Renovation project, PARTF # 2006-476/DENR # P07033, and to reapply for project funding in January of 2010.

The City applied for and received a $500,000 PARTF grant in 2006 to support the renovation of the Reid Center. The grant period ends September 30, 2009. The City recently requested an extension to the grant period.

DENR has reviewed the City's request, the timeline for the project and the City's progress to date. While DENR understands that the City has encountered unexpected cost increases and delays with the project, DENR feels that there has not been sufficient progress on the project to allow a time extension and amendment. In addition, the proposed change in scope, from a renovation to new construction at a new location, differs significantly from the project approved by the PARTF Authority in 2006.

The requests for PARTF funds from across the state are far greater than the funds available to meet those requests. In 2006, local governments submitted requests for more than $9 million in PARTF funding that could not be addressed due to lack of funds. In 2009, the local governments in North Carolina have requested more that $25 million in PARTF funding. Therefore, DENR encourages the City of Asheville to consider withdrawing this project and reapply for the January 2010 funding cycle.

Project History Timeline

For the past several years, the City of Asheville has been planning the redevelopment of the WC Reid Community Center which was initially funded in part via a PARTF grant. The current municipal community center is located on the site that fronts Livingston Street which is southwest from downtown Asheville. The existing facility has served the community first as an elementary school and then as a community center for over 80 years with modest improvements to enhance its basic services. For the facility to evolve into a more focused multi-disciplinary program, the building and grounds require substantial building code, functional and aesthetic improvements.

The Parks, Recreation and Cultural Arts staff began to develop a renovation plan for the Reid Center in January 2006 that included extensive community input and focus group sessions with various users of the facility. The final plan was estimated to cost approximately $8,000,000 to construct. This proved to be too costly as fundraising limitations were reassessed.

Thereafter the staff and the consultant explored the possibility to either renovate only a portion of the existing building or demolish the existing facility and construct a new center on the existing site. The costs for either scenario still proved to be costly at an estimated $4,000,000 especially in light of the challenge to raise additional funds in the recent nationwide, economic downturn. In addition the potential programming and effective impact of the new center was not being realized in this location.

Staff decided to pursue another option. The project budget was reduced to approximately $2,000,000 which is the funds that are currently available. Also a nearby site which is just one block west of the current WC Reid Community Center, Livingston Street Park, was considered as the optimum location for the center.

The budget available now for construction of a first phase is $1,500,000. The Parks, Recreation and Cultural Arts staff will work with the architect on design modifications to bring phase one within the available funds.

Pro:

- Withdrawing from the agreement allows the City to reapply for the next PARTF funding cycle for the project.

Con:

- The three-year PARTF contract is scheduled to end on September 30, 2009. If the City does not withdraw from the agreement it may negatively impact the City's ability to secure a future PARTF grant with DENR in the near term.

If the City withdraws from the grant agreement, there will be no fiscal impact to the City's budget.

City staff recommends City Council to authorize the City Manager to withdraw from the North Carolina Parks and Recreation Trust Fund grant for Reid Center Renovation Project (#2006-476, DENR PO7033) for $500,000, and give authorization to reapply for a PARTF grant funding in January 2010 for construction of the Community Center.

Councilman Newman moved for the adoption of Resolution No. 09-190. This motion was seconded by Vice-Mayor Davis.

Councilman Mumpower felt that in today's economic climate and the loss of $500,000 of the existing budget, he felt City Council should re-consider the project. He understood the importance of the Reid Center, but felt a dramatic restoration is not realistic, but supported cosmetic efforts.

Mayor Bellamy was disappointed that the City is in this position. She said that out of the $1.5 Million of the existing budget, approximately $1 Million came from the community through partnerships and foundations. Her concern is a new Council might not see this as a priority. She supported the Reid Center being redeveloped on their existing site. She felt there was a lot of opportunities of partnerships, e.g., UNC-Asheville, A-B Technical Community College. She could not support the motion because she felt we have enough documentation to begin to get recovery dollars as it create jobs, will be energy efficient, and the capability of hiring local people. This is a City facility and we need to take care of it. She felt strongly that the Reid Center is a safe haven for our children. She's fearful this project will not get completed.

Mayor Bellamy was supportive of the project when we had $2 Million in hand to move forward with the project. However, she felt Council should have been made aware of the timing of this grant when they approved moving forward with the contract for construction drawings a couple of months ago. If this project is re-considered, she wanted to make sure that staff checks with the other funders to make sure they are on board with the new direction.

In response to Councilman Russell, Mr. Simmons said that we will put the project out for bid and come back to Council with a project. If our budget is $1.5 Million, we would award a contract for $1.5 Million to construct the new center. We are looking at the design now to bring the project into the scope of funding that we have. In January, 2010, we will look at anything we could not complete in Phase I (with the $1.5 Million) and include them in Phase II (to be included in the new grant application in January 2010).

Councilman Newman felt that if the majority of Council is not fundamentally supportive of this project, Council should schedule discussion about re-considering the project soon. Once that decision is made, Council needs to be committed to it.

When Mayor Bellamy asked for public comments, none were received.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Newman moved for the adoption of Resolution No. 09-190. This motion was seconded by Vice-Mayor Davis and carried on a 6-1 vote, with Mayor Bellamy voting "no."

RESOLUTION BOOK NO. 32 – PAGE 196

Councilman Mumpower moved that Mayor Bellamy schedule, as soon as possible, the issue of reconsideration of the current Reid Center project and that staff be instructed to provide information on options to include the recommendation today and other opportunities including the incrementally and cosmetic restoration of the existing Reid Center. This motion was seconded by Councilman Newman.

In response to Vice-Mayor Davis, City Manager Jackson said that the policy objective at this point is to construct an approximately $2 Million Phase I project. The City has an architect engaged to develop those construction drawings. If Council's commitment is to the policy decision and they would like to see that through, he suggested the architect be called upon to (1) give Council an estimate on what is feasibility to see that Phase I project; (2) what they anticipate in terms of bid responses; and (3) their recommendation on whether or not this Phase I concept is feasible with a $1.5 Million budget or if additional funds are needed at this time or the project should be deferred to a later date. The architect could also advise Council on whether or not it would be reasonable to proceed in this market place to have a base bid and options, so Council could consider the scope of Phase I, depending upon those responses to those bids. He felt that would benefit from that kind of professional advice if Council's policy goal has not changed.

Vice-Mayor Davis said there are some very special things (e.g., greenhouses) planned for the Reid Center, but if the people who have donated dollars do not support those things we should know it now. He felt it was important to hear from our architect and see realistically where we need to go. He would like to see the conceptual drawings of the gym and see the programming for a $2 Million building.

Mayor Bellamy asked staff to check with all our major funders to make sure they support the new location. She wanted to be committed to completing the project because the funds were raised several years ago and there is not a lot of belief in the community that the project will be completed.

Councilwoman Cape said that a lot of work has been done on this project over the years and Council made an educated choice on this project. She did not support opening this up and starting all over again. We might have to modify the plans and/or policy direction in place, but didn't want to see the Reid Center turning into another Civic Center that doesn't ever get finished.

Councilman Newman withdrew his second. He felt we are committed now to doing this project. The only thing that will stop us if we fall into indecision.

In response to Councilwoman Cape, Mr. Simmons said that the $500,000 PARTF is a competitive grant process and the City will reapply in January 2010. DENR didn't' say that this wasn't a worthwhile project, but the timing for the grant was running out. He previously told Council he would come back to them with a project with the money they had in hand designed for

that $2 Million. Until we put it out for bid, we don't know the ultimate project amount. His goal was to design a project with the money that we had because that was our budget. The goal of this project was to get it done by December because that is when the other grantors said that we need to have construction started. That is the reason staff came to get Council approval a couple of months ago to get approval for the construction drawings.

In response to Councilwoman Cape, Mr. Simmons said that a couple of private grantors are working with the City, but December is our cut-off date and if we don't show significant progress on the project by then we are in jeopardy of losing other funding. She supported bringing this forward to Council with the architect.

Mr. Simmons said that staff has stayed in contact with the funders and have been giving them periodic updates. He said that he would be happy to get some statement from the funders about where they are in relationship to this project.

Councilman Russell seconded the motion made by Councilman Mumpower.

In response to Councilman Mumpower, City Attorney Oast said that in almost every contract there are provisions to withdraw or terminate, but he could not be specific unless he looked at the particular contract.

Councilman Miller seems it would be customary for staff to come back to Council with what a plan looks like with 25% less funding and for staff to get the donor's affirmations of that plan.

City Manager Jackson said that staff will provide Council with the status of the design work and the architect's impression given the status of the overall budget.

Mr. George McDowell questioned how much we have paid the architect in billable hours and felt the architect for this project should have been present at this meeting.

City Manager Jackson said that he felt the original motion of reconsideration is laying out to Council options for aborting and taking a different policy direction. If that is the motion then the staff presentation would be to review the terms for termination with the architect. He felt the direction of Council is to reconsider policy direction by updating Council on how the project is proceeding on schedule and laying out a plan with the pros and cons of staying on that course.

Councilman Russell withdrew his second as he preferred to reconsider policy direction by updating Council on how the project is proceeding on schedule and laying out a plan with the pros and cons of staying on that course.

As there was no second to Councilman Mumpower's motion, the motion died.

It was the consensus of Council to ask Mayor Bellamy to place the W.C. Reid Center project on an upcoming agenda. Mayor Bellamy noted that she would place this on the September 8, 2009, City Council agenda.

B. DISCUSSION OF OPEN AIR DRUG MARKETS

Councilman Mumpower said that the City of Asheville in its commitment to eliminate our open air drug markets in public housing and other vulnerable neighborhoods.

He said it's important because (1) Hard drugs account for much of our crime; (2) Drug thugs/users bring violence and corruption; (3) None of us deserve to live more safely than others; (4) Too many children and elderly struggle in harms way; (5) He agrees with those who suggest our success rate in treating hard drug addicts is under 10%; (6) Active open air drug markets

become recruiting centers for new generations of dealers, users, and enablers; and (7) It is his belief that allowing open air drug markets in public housing is a form of institutional child abuse.

We are failing because (1) Everyone is blaming everyone else – *"I can't do my job because so-in-so is not doing theirs,"* (2) As long as the problem stays mostly in our poor and black neighborhoods, most people seem willing to accept the reality. I believe this is the worst form of racism – the hidden kind; and (3) We do not match the enthusiasm, persistency, and creativity of the drug dealers and users.

He felt City Council deserves a C Grade for Our Performance: (1) Over time the majority has committed to eliminating our open air drug market, a strong drug intervention program, and public safety as a major priority; and (2) We are passive and politically correct with our state legislators regarding our under funded, staffed, and supported state criminal justice system – that dysfunction creates career criminals and places our police at risk with those who mock this system.

He felt the City and Police Administration deserve a C+ grade for their performance: (1) Our police do not match the creativity, persistency, and enthusiasm of our open air drug dealers – fireman offer a model - they stay on a fire until the coals are extinguished and a restart is unlikely; (2) Drug and prostitution enforcement are primarily directed to suppliers (dealers and prostitutes) over users – we will not win without addressing demand; (3) Our patrol officers are rarely on foot in public housing and have limited relationships with residents - both are keys to success in these environments; (4) Our police are persistently placed in harm's way by repeat offenders who are overlooked, coddled, etc. by an underfunded, overwhelmed, and dysfunctional court system; and (5) Our police are marginally supported - more often demonized - by the black community.

Community leaders deserve a D grade: (1) Very few are involved in fighting drug crime; (2) We have ministers and community activists who habitually disparage the police, but avoid the responsibility of holding officers accountable in responsible fashion or supporting their efforts; and (3) We have black leaders who publically discourage "snitching" and feed a "us against them" cultural mindset that enables drug crime to thrive at the primary expense of the black community.

The Court System deserves an F grade: (1) Our state judicial system is underfunded, understaffed, and under resourced at every level; (2) Timely justice is nonexistent – cultivates career criminals; (3) 98% of cases are plea bargained; (4) Jail space and alternative sentencing options do not remotely meet the needs; and (5) The only real beneficiaries of the NC judicial system are the attorney's making $200+ an hour on the inefficiency.

The Public Housing Administration deserves a B- grade: (1) Rule enforcement is improving but inconsistent; (2) Open air drug markets exist is almost all of our 10 developments but managers are fighting back; (3) Management is not backing down to pressures from those who enable or rationalize misbehaviors; and (4) Public housing continues to perpetuate a culture of multi-generational dependency – people make poor pets.

The Faith Based Community deserves a D grade: (1) Few churches are involved in public housing beyond a Sunday morning bus service; (2) The power of the church is evident – their voice in confronting the drug culture is silent; and (3) We have ministers in black churches who routinely attack the police and "snitching" while drug activity occurs in proximity to their church.

The Public at Large deserves a D grade: (1) Most do not care unless things affect them directly; (2) Most accept that crime is a routine part of life in public housing and ignore harms to children and elderly; (3) People who receive direct or indirect pay-offs from drug trade continue to support and enable that trade; and (4) The black community (greatest victims of crime) remain largely passive to the cultural destruction that occurs from drug trade – especially to young black men and women routinely recruited/funded as dealers for Mexican distributors and white users.

So What Do We Do? (1) Treatment, education, and social change are of limited value without good courts and enthusiastic enforcement; (2) We cannot rely on treatment to salvage people – we must fight to keep them from being recruited by unimpaired open air drug markets; and (3) Above all – we must address the weakest link of the chain – our dysfunctional court system.

He recommended a pilot program "Asheville Safe" by (1) A NC pilot program that creates a model of state judicial reform in Asheville and Buncombe County - bring us into the 21st century and return to our historical place as one of the best judicial systems in the country; and (2) Work with the Governor, our state representatives, the NC Department of Crime Control and Criminal Justice, and other vested organized bodies to establish Asheville and Buncombe County as the sites for judicial reform trials.

Emphasis to be on the following and more (1) Timely action on all drug cases (60 days?); (2) Emphasis on alternative sentencing options over jail time; (3) Generation of resources at all levels (admin, space, probation, staffing, technology, etc) adequate to timely judicial action; (4) Increase bench flexibility on consequence and sentencing; (5) Strengthen interagency cooperation on judicial continuum - borrow from prior state level studies pointing the way to success; (6) Expand drug court capacities to a level that provides full access for all drug crime related defendants; (7) Fix broken parts wherever they may be (an example would be how long it takes to get drug testing results back from SBI lab); (8) Expand our efforts to educate the public on the importance of funding and supporting solid judicial reform immediately; (9) Devote $1,000,000 per year from the city budget/reserve fund for the next 3 years in cooperative partnership with the county and state as a part of this pilot initiative; and (10) Develop a local judicial reform action committee.

The mission of **Asheville Safe!** will be to explore, model, and perfect judicial reform in a manner that will lead the way toward making **North Carolina Safe!** Asheville can lead the way.

We start by (1) Persistently and publically acknowledge the harms of our open air drug markets; (2) Illuminate and confront the causes; (3) Actively reach out to those responsible at every level – track our success or failure; and (4) Refuse to back away or pretend it's OK.

He said that when you look at the parade of death, crime, and corruption that continue to occur from hard drug activity in Asheville, it is clear that this is a highly destructive form of ***urban terrorism*** that continues to our collective shame.

He said that he would work with any to achieve the goal but not be passive to continue the open air drug market in Asheville.

In response to Councilwoman Cape, Councilman Mumpower said felt that we should form a committee that is devoted to holding all the pieces of the chain accountable and measuring our progress (City Council; City and Police Administration; community leaders; court system; public housing administration; faith based community; and the public at large). The weakest link is the judicial system as they are underfunded and under resourced. He proposed we form a committee and approach the court system and others to create a pilot project in Buncombe County as we are chasing the symptoms instead of the core issue. He would be willing to see the City invest money upfront to tackle the foundation issues instead of investing more money chasing the symptoms. He suggested we partner with others to illuminate the court system problems and find solutions.

Councilwoman Cape was concerned about the City's ability to step into the realm of the court system. The City just created a nuisance court and maybe this is just another step in that direction. She was also concerned over the $1 Million for 3 years

In response to Councilwoman Cape, City Attorney Oast said he felt the focus of our efforts should be on what the Council can control, like increase police patrols and enforcement efforts on drug enforcement. Council can lobby the legislators (and they do that on a yearly basis) to increase funding for the general court system. He felt Council could step up those lobbying efforts.

Councilwoman Cape would be supportive of looking at a community discussion around this issue, as we've looked into other issues.

Councilman Mumpower said that he would be happy to have Council refer this issue back to the Public Safety Committee for further review.

Councilman Newman noted that even though we don't have direct control over the judicial system, we did put together a nuisance court and that is a significant step. If the nuisance court effort is successful, perhaps we could scale it up. He supported this going back to the Public Safety Committee to see how we can build on the ideas.

Councilman Russell liked a judicial reform action committee maybe created at the Public Safety Committee level. He felt many more details needed to be worked out before the City puts money into it.

Councilman Miller supported this going back to the Public Safety Committee with perhaps the Housing Authority Executive Director and the Police Chief providing their input.

When he asked if Councilman Mumpower would be willing to accept stimulus dollars for the effort, Councilman Mumpower replied that he would not.

Vice-Mayor Davis noted that 37% of our payroll budget is for the Police Department, showing that Council is committed to public safety. We have made a step with the nuisance court and would support looking at a direction to gain some attention with the court system. He supported referring this back to the Public Safety Committee.

Mayor Bellamy felt Councilman Mumpower should have focused on factual information and not conjecture in some of the statements made about the black community as a whole. She apologized to members of the community who heard the presentation who were offended, as she was. She felt an apology was in order. She said that if we want to focus on issues and partnership, we need to look at the fact that during the last few years Council has steadily increased funding for public safety in our community, not only for police. With her lobbying and the help of Senator Nesbitt, the State has been responsive in that our community has received additional District Attorneys and an additional judicial judge. There is a N.C. Metropolitan Mayor's Coalition retreat at the end of August at which time they will discuss this issue on a state-wide basis. They will then provide input to the already established committee formed by the Governor to look at our judicial system and how it can be re-vamped. She felt it was important to have factual data while working with other elected officials to create a committee of not just Council, but community members and personnel from the District Attorney's Office. She supported referring this to the Public Safety Committee.

Councilwoman Cape said that while she supported Councilman Mumpower's passion, she did not support the spirit of judging of the community.

Councilman Mumpower felt that the nuisance court is a model of success and he felt we can pull this off as it's just on a larger scale. In terms of facts, he is rarely careless, never intentionally so, and he tries to learn from experience. He felt that it appears that he has offended some people, but his goal was to offend everyone who listened because we all have something to be ashamed of and he makes no apologies. He was pleased this will be put in the hands of the Public Safety Committee and would be happy to participate with the Committee if they wish.

VI. NEW BUSINESS:

A. RESOLUTION NO. 09-191- RESOLUTION AUTHORIZING THE MAYOR TO SIGN AMENDMENT 1 TO THE BLACK MOUNTAIN WHOLESALE WATER PURCHASE AGREEMENT

Water Resources Director Steve Shoaf said that this is the consideration of a resolution authorizing the Mayor to sign Amendment I to the Wholesale Water Purchase Agreement between the City of Asheville and the Town of Black Mountain.

The Town of Black Mountain is one of four City of Asheville wholesale water customers. They are charged a capacity commitment fee of $184.00 per 10,000 gallons. The current wholesale water agreement specifies a capacity commitment of 200,000 gallons for Black Mountain. Due to leaks and drought, their capacity needs escalated to 232,000 gallons for a period of time. Since that time, Black Mountain has fixed the leaks thereby reducing their water consumption to within the originally agreed upon 200,000 gallons per day as specified in the Agreement dated February 14, 2006.

In the agreement, there are provisions to increase Black Mountain's capacity commitment, but not to reduce it. Therefore, after inquiry from the Town of Black Mountain, the Water Resources Director has proposed Amendment I that will add a paragraph to allow them to reduce their capacity commitment via formal request. The charge of $184.00 per 10,000 gallons will remain the same.

In addition, another paragraph has been added in the Amendment to update the contact information for the City and the Town.

This project is part of City Council's strategic plans to work cooperatively with a local government agency to implement practical water system management.

Pro:

- Allowing Black Mountain to reduce their capacity commitment will encourage water conservation.

Con:

- None noted.

The adoption of Amendment I will result in an approximate $600 reduction in revenue from Black Mountain. This revenue reduction will not require any budget transfers.

City staff recommends that City Council authorize the Mayor to sign Amendment I to the Wholesale Water Purchase Agreement between the City of Asheville and the Town of Black Mountain.

There was a brief discussion, initiated by Councilman Newman, about if the City can adjust the rates of wholesale customers like we do others.

When Mayor Bellamy asked for public comments, none were received.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Mumpower moved for the adoption of Resolution No. 09-191. This motion was seconded by Councilman Russell and carried unanimously.

RESOLUTION BOOK NO. 32 – PAGE 197

B. DISCUSSION OF EARLY VOTING LOCATIONS

Mayor Bellamy said that there has been a request from several members of the community to consider additional locations for early voting. She provided Council with the following information: (1) Citizens always have the opportunity to vote 2.5 weeks early at the College Street office; (2) There are 37 normal polling places for City Council elections – during the primary and general elections; (3) The City must notify the Board of Elections 30-45 before the election they would like to have more remote sites, in order for them to submit a plan of implementation to the State Board of Elections for approval; (4) City can tell the Board of Elections what location they would like to have a remote site and the Board of Elections will then have to find a suitable site in that area; and (5) Remote sites can be open anywhere from 1 week early to 2.5 weeks early. For 1 week early, the remote site is $11-15,000, per site per election. For 2.5 weeks early, the remote site is $17-20,000, per site per election.

For instance: (1) If you have 1 additional remote site (2.5 weeks early), for both the primary and general election, the price would be approximately $34-40,000; If you have 1 additional remote site (1 week early), for both the primary and general election, the price would be approximately $22-30,000; If you have 1 additional remote site (2.5 weeks early) for only the primary, the price would be $17-20,000; or If you have 1 additional remote site (1 week early) for only the general election, the price would be approximately $11-15,000; and (2) If you have 2 additional remote sites (2.5 weeks early), for both the primary and general election, the price would be approximately $68-80,000; If you have 2 additional remote sites (1 week early), for both the primary and general election, the price would be approximately $44-60,000; If you have 2 additional remote sites (2.5 weeks early) for only the primary, the price would be $34-40,000; or If you have 2 additional remote sites (1 week early) for only the general election, the price would be approximately $22-30,000.

In response to Councilwoman Cape, City Manager Jackson said that the City has budgeted $160,000 for the current system of elections. If Council chooses to add additional early voting locations, those funds would come out of Fund Balance.

Councilman Mumpower felt there was a conflict of interest for an announced candidate to vote on an issue that has potential to affect their election one way or another. He therefore moved to recuse himself from participating in this matter.

City Attorney Oast said that voting on this issue is not a disqualifying conflict.

The motion made by Councilman Mumpower died for lack of a second.

Vice-Mayor Davis supported early voting, but due to the difficult economy, the City's budget, and the fairly small turnouts for municipal elections, he could not support adding early voting locations at this time.

Councilman Russell questioned how locations would be chosen. He felt it was a good idea, but not at this time.

Councilman Miller supported this idea and suggested as much promotion as possible be done to let people know of the early voting locations.

Councilwoman Cape was very supportive of getting voting in the hands of the people, but felt we should have a citizen engagement process first and then in two years budget for the additional costs and begin making people aware of the additional sites.

The following individuals spoke in support of additional voting locations:

Mr. Charles Carter
Ms. Michelle Pace Wood
Mr. Isaac Coleman
Mr. Fred English
Mr. George McDowell

Councilman Newman moved that the City of Asheville give instructions to the Buncombe County Board of Elections to provide 4 additional early voting sites (North, South, East and West, preferably at the libraries) for one week early for the general election on November 3, 2009. This motion was seconded by Councilman Miller.

Councilwoman Cape noted the 4 additional early voting locations would be approximately $60,000.

In response to Councilman Miller, Mr. Carter said that the Board of Elections is charged with promoting the locations.

Councilman Newman was persuaded that early voting has become the norm in terms of voting. He would love to have more early voting locations, but it's financially prohibitive.

Councilman Mumpower felt it is a moral conflict of interest for him to participate in this matter and would not support the motion.

After 20 minutes of debate, Councilman Newman moved to call the question. This motion was seconded by Councilman Miller and carried on a 5-2 vote, with Councilwoman Cape and Councilman Mumpower voting "no."

The motion made by Councilman Newman and seconded by Councilman Miller carried on a 4-3 vote, with Vice-Mayor Davis, Councilman Mumpower and Councilman Russell voting "no."

At Mayor Bellamy's suggestion, it was the consensus of Council to have Mayor Bellamy write a letter to other municipalities in Buncombe County who have an election this year and ask them for a small contribution to the early voting locations. Even though their constituents would have to drive into Asheville, they would have the opportunity to vote early.

Mayor Bellamy instructed City staff to place a budget amendment on the September 8, 2009, Consent agenda for this issue.

C. DISCUSSION OF "ADOPT AN ISLAND" PROPOSAL

Councilman Mumpower said that we have traffic islands throughout the city (especially in neighborhoods) that are neglected and otherwise poorly maintained. We have limited staff resources to address the maintenance needs in a consistent manner.

His proposal would be to establish a program using engaged volunteers who agree to maintain a respective island for a one to three year period.

His suggested methods include (1) Recruit individuals, clubs, neighborhoods, or organizations; (2) Provide loose guidelines for appropriate landscaping and/or maintenance; (3) Provide an annual "Fantasy Island" award for the best kept/most attractive traffic island; (4) Provide small signage to identify those who adopt an island; and (5) Freed up staff time to be devoted to those islands without a volunteer caretaker.

Models include: (1) The "Adopt a Highway" program offers us a local model; (2) We have volunteer groups who provide more random forms of beautification and maintenance services to public areas throughout the city – including traffic islands; (3) Salem, Massachusetts, offers a more specific model; and (4) Cincinnati provides still another.

Councilman Mumpower read a letter from Robert and Patricia Dockery, Co-Chairs of Island Committee Upper Malvern Hills Neighborhood Coalition, who "would like to be the first to request an island. Specifically the island on the corner of Patton, Haywood and Ormond Avenues. We have been looking for a way to improve the appearance of that entrance into West Asheville. Concerning safety concerns, it was suggested we gardeners do our work in off heavy traffic times, wear orange traffic vests, and work only ON the island. This we can comply with."

Councilman Mumpower moved to request staff review potentials for an adopt an island program and initiate action to that affect. This motion was seconded by Councilwoman Cape.

When Mayor Bellamy asked for public comment, she received none.

Councilwoman Cape liked engaging the community and recognizing the City needs their participation. She suggested an adopt a sidewalk program downtown.

Councilman Mumpower moved to amend his motion to include staff also look at potentials for an adopt a sidewalk program. Councilwoman Cape accepted that amendment.

The amended motion made by Councilman Mumpower and seconded by Councilwoman Cape carried unanimously.

Mayor Bellamy noted that since this has been directed to City staff, it will be coming back to City Council.

D. RESOLUTION NO. 09-192 - RESOLUTION APPOINTING MEMBERS TO THE RECREATION BOARD

Vice-Mayor Davis said that the terms of Wind Peter Motika and Adam Pittman, as members on the Recreation Board, expired on June 30, 2009. They were not interested in reappointment.

On July 14, 2009, it was the consensus of Council to interview David Mosrie, Wayne Wheeler, Mary Ann West and Nelson Sobel. Mr. Wheeler was unable to attend the interview.

After Council spoke highly of the candidates, David Mosrie received no votes, Wayne Wheeler received 4 votes, Mary Ann West received 7 votes and Nelson Sobel received 3 votes. Therefore, Mary Ann West and Wayne Wheeler were appointed as members of the Recreation Board to each serve three-year terms respectively, terms to expire June 30, 2012, or until their successors have been appointed.

RESOLUTION BOOK NO. 32 – PAGE 199

E. RESOLUTION NO. 09-193 - RESOLUTION APPOINTING A MEMBER TO THE TRANSIT COMMISSION

Vice-Mayor Davis said that the term of Ryan Pickens expires on December 31, 2009.

On August 11, 2009, it was the consensus of Council to interview Tom Tomlin, Georgia M. Shannon and Rachael Bliss.

After Council spoke highly of the candidates, Tom Tomlin received 5 votes, Georgia M. Shannon received no votes and Rachael Bliss received 1 vote. Therefore, Mr. Tomlin was appointed as a member of the Transit Commission to serve an unexpired term until December 31, 2009, and then a full three-year term, term to expire December, 31, 2012, or until his successor has been appointed.

RESOLUTION BOOK NO. 32 – PAGE 200

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mayor Bellamy noted that Council has had the topic of "Other Business" on the agendas, however, that has been deleted as that is not listed in Council's rules as an official agenda topic. The topic of informal discussion and public comment is on the agenda for light items. Any weighted or policy recommendations are to be scheduled.

Councilwoman Cape and Councilman Russell reminded the public that school started and to please obey the school zone rules, in addition to encouraging carpooling, walking and riding bikes where safe.

In response to Mayor Bellamy, City Manager Jackson said that he would provide Council with details on what the Police Department has in place for enforcement of laws regarding bus stops.

Mayor Bellamy encouraged the public to attend the Goombay Festival.

When Mr. Fred English expressed concern over the lack of enforcement of bicycle laws, Mayor Bellamy suggested the Public Safety Committee review that issue.

Councilman Mumpower discussed with Council the issue of agenda protocols. He felt this is a body of elected officials and not a game of Mother May I. In the past few months he has had repeated difficulty raising agenda issues. Going forward, unless the Mayor would like to talk with him about an alternative method, he will present the issues, but if they go into that black hole, or laid aside, he will reserve the right to come to Council and raise the issues before the full Council. The majority of Council can decide to deal or not deal with the issues as they wish. His job is to raise issues as enthusiastically and as passionately as he can. With that in mind, he has a list of the following things he would like to see addressed: a graffiti vandal "cloud of shame" proposal; action to address excessive late charges for stormwater runoff fees; availability of on-line sexual services in Asheville and enforcement potentials; exploring the 24/7 climate control system potentials and energy saving performance contracting potentials for the City of Asheville; and City government following our flag protocol. He then provided Council with information on the proper protocols for the flag. He would like to see the City of Asheville model what we are asking other people to do.

In Mayor Bellamy's defense, she provided Council with a timeline on actions requested by Councilman Mumpower.

Claims

The following claims were received by the City of Asheville during the period of July 2, 2009 – August 6, 2009: PSNC (Water), Brittany Bedgood (Parks & Recreation), Barb Hoski (Sanitation), Brandon Phillips (Police), Ruth Pitts (Streets), Ann Forbes (Water) and Charter Communications (Water).

The following claims were received by the City of Asheville during the period of August 7, 2009 – August 13, 2009: David Hirschman (Water), Dominik Downs (Transit), Celeste Adams

(Water), Stella Longshore (Transit), Progress Energy (Water), Progress Energy (Water), and AT&T (Water).

These claims have been referred to Asheville Claims Corporation for investigation.

Closed Session

At 8:09 p.m., Councilman Miller moved to go into closed session for the following reasons: (1) To establish or to instruct the City's staff or negotiating agents concerning the position to be taken by or on behalf of the City in negotiating the terms of contracts for the acquisition of real property by purchase, option, exchange or lease. The location of the property is on the northwest corner of Riverside Drive and Lyman Street, and the City-owned parking lot on Brick Street. The statutory authorization is contained in G.S. 143-318.11(a)(5); (2) to consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved. The statutory authorization is contained in G.S. 143-318.11(a)(3); and (3) To prevent disclosure of information that is privileged and confidential, pursuant to the laws of North Carolina, or not considered a public record within the meaning of Chapter 132 of the General Statutes. The law that makes the information privileged and confidential is N.C.G.S. 143-318.10(e). The statutory authorization is contained in N.C.G.S. 143-318.11(a)(1). This motion was seconded by Councilman Newman and carried unanimously.

At 8:22 p.m., Councilman Newman moved to come out of closed session. This motion was seconded by Councilman Russell and carried unanimously.

VIII. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 8:22 p.m.

Magdalen Burleson
CITY CLERK

MAYOR

Tuesday – September 8, 2009 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Jan B. Davis; Councilwoman Robin L. Cape; Councilman Kelly M. Miller; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; Councilman William A. Russell Jr.; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Bellamy led City Council in the Pledge of Allegiance.

INVOCATION

Councilwoman Cape gave the invocation.

I. PROCLAMATIONS:

A. PROCLAMATION PROCLAIMING SEPTEMBER 2009 AS "LIFE INSURANCE AWARENESS MONTH"

Councilman Russell read the proclamation proclaiming September 2009 as "Life Insurance Awareness Month". He presented the proclamation to Mr. Chris Clark, Financial Representative from Northwestern Mutual, who briefed Council on some activities taking place during the month.

B. PROCLAMATION PROCLAIMING SEPTEMBER 2009 AS "PREPAREDNESS MONTH"

Councilman Newman Bellamy read the proclamation proclaiming September 2009 as "Preparedness Month". He presented the proclamation to Interim Fire Chief Scott Burnette, who briefed Council on some activities taking place during the month.

C. PROCLAMATION PROCLAIMING SEPTEMBER 8, 2009, AS "NOAH RATNER DAY"

Mayor Bellamy read the proclamation proclaiming September 8, 2009, as "Noah Ratner Day" in the City of Asheville. As Noah has started college, she presented the proclamation to Noah's parents Bob and Susan Ratner. She said that Noah, a recent graduate of Asheville High, grew up playing golf at Asheville Municipal Golf Course. He just returned from the Maccbiah Games in Israel as part of the USA team. He took 2 gold medals and named the Junior Champion in golf at these world games. The Maccabiah Games are held every four years and attract Jewish athletes from around the world. Noah will be attending Guilford College in the fall where he will play golf.

D. PROCLAMATION PROCLAIMING SEPTEMBER 9, 2009 AS "FETAL ALCOHOL SPECTRUM DISORDERS AWARENESS DAY"

Vice-Mayor Davis read the proclamation proclaiming September 9, 2009 as "Fetal Alcohol Spectrum Disorders Awareness Day". He presented the proclamation to Ms. Leslie McCrory with Fullerton Genetics Mission Hospitals, who briefed Council on some activities taking place during the day.

E. PROCLAMATION PROCLAIMING SEPTEMBER 15 – OCTOBER 15, 2009 AS "HISPANIC HERITAGE MONTH"

Councilman Miller read the proclamation proclaiming September 15 – October 15, 2009 as "Hispanic Heritage Month". He presented the proclamation to Pastors Raul and Lidia Gonzalez who briefed Council on work they have accomplished and what they will continue to work on to accomplish.

F. PROCLAMATION PROCLAIMING SEPTEMBER 21-25, 2009 AS "MINORITY ENTERPRISE DEVELOPMENT WEEK"

Councilwoman Cape Bellamy read the proclamation proclaiming September 21-25, 2009 as "Minority Enterprise Development (MED) Week". She presented the proclamation to Ms. Brenda Mills, 2009 MED Week Chair, Mr. James Lee, Minority Business Coordinator, Ms. Sharon Oxendine and Ms. Joyce Harrison, who briefed Council on some activities taking place during the week.

II. CONSENT AGENDA:

At the request of Councilman Mumpower, Consent Agenda Items "B", "E", "G", "H" and "K" were removed from the Consent Agenda for discussion and/or individual votes.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON AUGUST 25, 2009

B. RESOLUTION AUTHORIZING THE CITY MANGER TO WAIVE THE FORMAL BID REQUIREMENTS AND AWARD THE BID FOR FIVE HYBRID BUSES USING THE "PIGGY BACK" PROVISION FROM THE AWARD OF BID FROM THE KANAWHA VALLEY REGIONAL TRANSPORTATION AUTHORITY TO GILLIG LLC

This item was removed from the Consent Agenda for discussion and/or an individual vote.

C. RESOLUTION NO. 09-195 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A N.C. DEPT. OF TRANSPORTATION TRAFFIC CONSTRUCTION AGREEMENT FOR ROAD IMPROVEMENTS TO US 70, COLLEGE STREET FROM BEAUCATCHER TUNNEL TO CHARLOTTE STREET

Summary: The consideration of a resolution authorizing the Mayor to enter into a N.C. Dept. of Transportation (NCDOT) traffic construction agreement for road improvements to US 70, College Street between the Beaucatcher Tunnel and Charlotte Street.

The NCDOT is making roadway improvements on US 70, College Street between Beaucatcher Tunnel and Charlotte Street. The Water Resources Department installed a new 24-inch water line in this section of College Street as part of the Revenue Bond Projects, which replaced the three water lines on top of the tunnel.

The Water Resources Department has negotiated a participation rate of $50,000 of the total project cost to replace aging infrastructure with the minimum repaving cost of $50,000. This is a local NCDOT project and was not on the State NCDOT project lists for capital improvement funding, so funding was not specifically set aside for this project. Due to cost savings on some of the bond projects, the funds are available for this project within the Central Business District

Revenue Bond Project. Approximately 1,900 feet of road will be repaved, which will improve roadway conditions for local motorists.

This project is part of City Council's strategic plans to improve city infrastructure.

Pros:
- This project will improve local roadway conditions by the milling and resurfacing of US 70, College Street between Beaucatcher Tunnel and Charlotte Street.
- Water infrastructure over 90 years old has been upgraded.
- This partnership between agencies allows both parties to cost share and experience savings on the overall project.

Con:
- There are no cons to this project. The Water Resources Department would have to resurface Tunnel Road as part of the infrastructure improvements, which would cost more than partnering with NCDOT.

The cost share on this project is $50,000, which is currently available in the Central Business District Revenue Bond Project.

Staff recommends approval for the Mayor to execute the Traffic - DOT Construction Agreement with NCDOT for the US 70, College Street improvements in the amount of $50,000.

RESOLUTION BOOK NO. 32 – PAGE 202

D. RESOLUTION NO. 09-196 - RESOLUTION AMENDING THE POLICY GOVERNING CITY COUNCIL BOARDS AND COMMISSIONS

Summary: The consideration of a resolution amending the policy governing City Council appointments.

On August 11, 2009, the City Council Boards & Commissions Committee reviewed proposed amendments to their policy governing City Council appointments.

Although there are some minor policy changes regarding clarification, the following represent the major changes added to the policy:

- An oath of office (or affirmation) is required for some boards and commissions. Where applicable, newly appointed board members will take and sign an oath of office or affirmation following their appointment.

  If a board member enters on the duties of his or her office before taking, subscribing and filing the oath of office, he or she may be removed from office.

- The board will comply with open meeting laws, including notice of meetings.

- The board is to provide the City Clerk with their schedule of regular meetings with the predetermined time and place. The schedule will be revised only in accordance with legal requirements for notice.

- In order to conduct official business at a regular or special meeting, a quorum of the board must be present. In the absence of a rule, by-law, or statute providing otherwise, a quorum is more than half of the members of the board, not counting vacant seats. If a quorum is not present at any meeting, the chairperson will postpone the meeting until such time as a quorum can be present, provided adequate notice is given pursuant to the open meetings law.

Staff recommends City Council adopt a resolution amending the policy governing City Council appointments.

RESOLUTION BOOK NO. 32 – PAGE 203

E. BUDGET AMENDMENT TO ESTABLISH A BUDGET FOR THE ASTON PARK FIT COMMUNITY COLLABORATIVE

This item was removed from the Consent Agenda for discussion and/or an individual vote.

F. ORDINANCE NO. 3780 - BUDGET AMENDMENT TO ACCEPT A DONATION FROM BB&T TO COVER COST OF MATERIALS AND NEW EQUIPMENT TO SUPPORT A VOLUNTEER PROJECT AT THE SHILOH COMMUNITY CENTER

Summary: The consideration of a budget amendment for acceptance of a donation of $10,600 from BB&T to cover cost of materials and new equipment to support a volunteer project at the Shiloh Community Center.

Nationally, BB&T has created a corporate volunteer program to encourage local branches to give back to the community. In addition to making a provision for paid time off for staff to volunteer, BB&T has created a pool of funds to be used to support projects identified by local BB&T branches. Asheville Area BB&T branches have chosen the Shiloh Community Center as the site for their 2009 project and, in addition to providing approximately 100 volunteers, will be donating $10,600 to cover the costs of materials and improvements for the Center. A representative from BB&T has been working with Parks, Recreation and Cultural Arts staff to develop a scope of work and indentify materials and equipment necessary to complete the project. The project will include painting the entrance hall and community room, refinishing the floor of the stage, installing new seating on outside bleachers and purchase of a recycling center and new chairs and tables for the community room. The project is slated to occur in late September 2009.

This action complies with the City Council Strategic Operating Plan in that it addresses the city's aging infrastructure and improves the customer experience at the Shiloh Center. This action also reflects the City of Asheville's efforts to improve and extend services by identifying volunteer opportunities and working with community groups to accomplish improvement projects on public property and in public facilities.

The project has the support and approval of the Shiloh Community Association.

Pros:

- Improvement in infrastructure and customer experience at the Shiloh Center
- Demonstration of community support for the Shiloh Community
- Incorporates citizen volunteers in providing essential services to the community

Con:

- None noted

The project has been budgeted so that the donation will cover all costs for the project.

City staff recommends City Council adopt a budget amendment to accept the donation from BB&T in the amount of $10,600.

ORDINANCE BOOK NO. 25 – PAGE 399

G. BUDGET AMENDMENT FOR YEAR 2 FUNDING FROM THE N.C. DEPT. OF PUBLIC INSTRUCTION FOR THE 21ST CENTURY COMMUNITY LEARNING CENTER IN ASHEVILLE'S WEED & SEED TARGETED AREA AND AMENDMENT TO THE GENERAL FUND TO REFLECT A TRANSFER FROM THE GRANT FUND TO SUPPORT PERSONNEL COSTS ASSOCIATED WITH THE GRANT

This item was removed from the Consent Agenda for discussion and/or an individual vote.

H. BUDGET AMENDMENT FOR FOUR ADDITIONAL EARLY VOTING LOCATIONS ONE WEEK BEFORE THE GENERAL ELECTION

This item was removed from the Consent Agenda for discussion and/or an individual vote.

I. RESOLUTION NO. 09-197 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION FOR INSTALLATION OF A PROTECTIVE/PERMISSIVE PHASE FOR SOUTHBOUND TRAFFIC AT THE INTERSECTION OF US 25 (BROADWAY) AND COLLEGE STREET

Summary: The consideration of a resolution to enter into an agreement with the N.C. Dept. of Transportation (NCDOT) regarding the installation of a protective/permissive phase for southbound traffic at the intersection of US 25 (Broadway) and College Street.

In an effort to minimize "cut-through" traffic through the Pack Square Park, College Street from US 25 (Broadway) to Market Street will be converted to two-way traffic flow. Once this conversion is accomplished, eastbound traffic along Patton Avenue would be able to turn left onto US 25 (Broadway) and then make a right turn onto College Street. Please note that the current movements onto South Pack Square will ***not*** change. The proposed conversion of College Street will simply provide drivers an alternative. Asheville Transit will be required to use the new route.

Since the proposed conversion will directly impact the Biltmore Building, staff met with representatives of the Biltmore Company during May 2007 to share the idea with them. Staff has continually been in contact with representatives of the Biltmore Company in order to give them as much lead time as possible before the conversion is made.

This action complies with the City Council 2009-10 Strategic Operating Plan within the Sustainable Focus Area by maintaining and managing street infra-structure to improve traffic flow and efficiency to help support the healthy growth of the City.

Pros:

- Minimizes "cut-through" traffic through Pack Square Park.
- Improves traffic flow and efficiency.
- Enables direct right turns into the Biltmore Company parking structure.

Cons:

- Cost to the City is estimated to be $5,000.
- Requires left turns into the Biltmore Company parking structure to yield for on oncoming traffic.

The City is responsible to pay 100% of the actual cost of all work performed by the NCDOT, including administrative costs. The cost of the work is estimated to be $5,000. The necessary funds will come from the current Traffic Engineering operating budget.

Staff recommends that City Council enter into an agreement with the NCDOT for the installation of a protective/permissive phase for southbound traffic at the intersection of US 25 (Broadway) and College Street.

RESOLUTION BOOK NO. 32 – PAGE 209

J. RESOLUTION NO. 09-198 - RESOLUTION AUTHORIZING THE MAYOR TO EXECUTE AN AMENDMENT TO THE CURRENT CONTRACT WITH DIXON HUGHES, PLLC, CERTIFIED PUBLIC ACCOUNTANTS AND ADVISORS, FOR AUDITING SERVICES FOR FISCAL YEAR 2008-09AMENDING THE CAFR CONTRACT

Summary: The consideration of a resolution authorizing the mayor to execute an amendment to the current contract with Dixon Hughes, PLLC, Certified Public Accountants and Advisors, for auditing services for Fiscal Year 2008-09.

NC General Statute sec. 159-34 requires that local governments of North Carolina have their accounts audited each fiscal year and submit a copy of the audit to the Local Government Commission. On June 23, 2009, City Council approved a contract for $110,000 to retain the services of Dixon Hughes to conduct the basic audit of the city's accounts for the fiscal year ending June 30, 2009.

In addition the basic audit, various auxiliary financial services must be performed in order to ensure a complete and transparent representation of the City's financial condition. These services include preparation of various city financial statements and production of the Comprehensive Annual Financial Report and are traditionally performed in-house by various accounting staff.

Due to Finance staff's current involvement in converting to a new citywide core financial system (i.e. BTIP), which has a scheduled "go-live" date of January 1, 2010, staff currently does not have the capacity to simultaneously produce the Comprehensive Annual Financial Report (CAFR) and complete the BTIP conversion process without additional contracted support. As such, staff is requesting an amendment to the existing basic audit contract to allow for production of the CAFR to be outsourced to Dixon-Hughes. Staff feels that this is prudent use of resources in order to ensure that timely and successful completion of the CAFR and BTIP conversion processes.

Pro:

- Will help ensure the timely and successful completion of two high-priority, critical projects

Con:

- Requires a $43,450 increase to the contract.

The cost to amend the contract and provide for outsourcing of the CAFR is $43,450. This cost is currently provided in the Finance Department's professional services line item budget.

City staff recommends adoption of the resolution authorizing the Mayor to execute an amendment to the contract with Dixon Hughes PLLC, Certified Public Accountants and Advisors, for production of the CAFR in the amount of $43,450.

RESOLUTION BOOK NO. 32 – PAGE 211

K. RESOLUTION AUTHORIZING THE CITY MANAGER TO MAKE PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE TO PACK SQUARE CONSERVANCY FOR A

PRIVATE EVENT IN ROGER MCGUIRE GREEN IN PACK SQUARE PARK ON SEPTEMBER 21, 2009

This item was removed from the Consent Agenda for discussion and/or an individual vote.

Mayor Bellamy asked for public comments on any item on the Consent Agenda, but received none.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilwoman Cape moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Miller and carried unanimously.

ITEMS REMOVED FROM THE CONSENT AGENDA FOR INDIVIDUAL VOTES

B. RESOLUTION NO. 09-194 - RESOLUTION AUTHORIZING THE CITY MANGER TO WAIVE THE FORMAL BID REQUIREMENTS AND AWARD THE BID FOR FIVE HYBRID BUSES USING THE "PIGGY BACK" PROVISION FROM THE AWARD OF BID FROM THE KANAWHA VALLEY REGIONAL TRANSPORTATION AUTHORITY TO GILLIG LLC

Summary: The consideration of a resolution authorizing the City Manager to waive the formal bid requirements and award the bid for five (5) 30 foot Low Floor hybrid buses in accordance with the N.C. Gen. Statutes using the "piggy back" provision from the award of bid from the Kanawha Valley Regional Transportation Authority, Charleston, West Virginia, Contract KRT 2008 – 4, issued on September 25, 2008.

In 2008, the City of Asheville received a grant from the State for the purchase of five hybrid buses. At that time, Council approved a budget amendment for the entire purchase allocating $300,000 of City funds for the City's match of 10%.

The City has the opportunity to acquire these buses through a "piggy backing" process. Staff recommends that we utilize a contract from the Kanawha Valley Regional Transportation Authority, Charleston, West Virginia, Contract KRT 2008, issued on September 25, 2008. Kanawha Valley Regional Transportation Authority bid buses that will meet our operational needs. State statutes allow us to "piggy back" that bid. By doing so, the City avoids the cost increases and expedites the bidding process which can take between six months to one year.

The new hybrid buses will replace five of the 1996 diesel buses that have already reached their useful life. This is part of the City staff's effort to replace sixteen 1996 buses. The aging fleet is still operative; however, the 1996 buses have begun presenting the problems attributable to age, engine repairs and other parts increasing the maintenance costs.

The contract has been reviewed by the N.C. Dept. of Transportation and the Federal Transit Administration and complies with local, State and Federal regulations. Following the N.C. Gen. Statutes, an advertisement informing the Council's intent to utilize the "piggy back" option and waive the formal bidding process was posted on August 26, 2009.

The estimated cost of this project is $2,625,000. The City is funding this project using section 5309 of the Federal Transit Administration which provides 80% for capital projects or $2,100,000. The City will provide 10% or $262,500 and the State will contribute the additional 10%. According to the manufacturer, the buses will be delivered in approximately fourteen months after the buses are ordered.

The acquisition of hybrid buses is in alignment with the 2009-10 Strategic Plan to reduce carbon emissions by 2% per year and in the acquisition of new technology that will support the area of environmental sustainability, as well as operating the organization to the highest responsibility.

Pros:

- Using an existing bid will allow us to make a better use of City's resources, specifically related to staff time and funds, since we can obtain a better price.
- The units will be delivered in approximately fourteen months, and put in service immediately, compared with twenty four to thirty six months if we follow the bidding process.
- These new vehicles will reduce emissions, improve fuel efficiency and will increase reliability by replacing the 13 year old buses.

Con:

- None at this time.

The project cost will be $2,625,000, with 80% of this total to be paid by federal funds - FTA section 5309; 10% or $262,500 by the City and 10% or $262,500 by the State. In 2008, the City of Asheville received a grant from the State for the purchase of five hybrid buses. At that time, Council approved a budget amendment for the entire purchase allocating $300,000 of City funds for the City's match of 10%.

City staff recommends City Council adopt a resolution authorizing the City Manager to waive the formal bid requirements and award the bid for five 30 foot Low Floor Hybrid buses in accordance with North Carolina General Statutes using the "piggy back" provision from the award of bid from the Kanawha Valley Regional Transportation Authority, Charleston, West Virginia, Contract KRT 2008 – 4, issued on September 25, 2008.

Councilman Mumpower questioned the utilization of borrowed federal dollars for a local effort.

Mayor Bellamy noted that we have a local company (Eaton) that produces engines for hybrid buses and wondered if there was a way to promote the cycle of keeping jobs in our community by assisting our local companies. At the Mayor's request, City Manager Jackson said that he would follow-up with Eaton to see who they sell their products to and report back to Council.

Councilman Newman moved for the adoption of Resolution No. 09-194. This motion was seconded by Councilwoman Cape and carried on a 6-1 vote, with Councilman Mumpower voting "no".

RESOLUTION BOOK NO. 32 – PAGE 201

E. ORDINANCE NO. 3779 - BUDGET AMENDMENT TO ESTABLISH A BUDGET FOR THE ASTON PARK FIT COMMUNITY COLLABORATIVE

Summary: The consideration of a budget amendment, in the amount of $60,000, establish a budget for the Aston Park Fit Community Collaborative, reflecting a reimbursement grant from the North Carolina Health & Wellness Trust Fund, *Fit Community* initiative for costs up to $60,000.

City Council authorized the application and acceptance of a North Carolina Health & Wellness Trust Fund *Fit Community* grant in January 2009. The City submitted the grant to act as the fiscal agent for the project, which is a community-led collaboration with multiple community groups. The City received an executed grant agreement in June 2009 and the City Manager has

authorized the grant contract. The budget amendment is needed to establish the grant project budget.

The awarded reimbursement grant is for $60,000 for two years to support the Aston Park Fit Community Collaborative project. The primary goal of the project is to promote physical activity by increasing the use of Aston Park. Funds will be used to purchase additional playground equipment as well as promote activities in Aston Park. A community collaborative will manage the programming aspects and program reporting of the grant.

This action complies with the Parks, Recreation, Cultural Arts & Greenway Master Plan in that it makes use of diverse funding sources for successful implementation in the delivery of parks, recreation and cultural art services.

Pro:
- Provide funds to support parks, recreation and cultural arts programming enhancements

Con:
- None

This $60,000 amendment to the Special Revenue Fund is fully funded with grant proceeds. There is no impact to the General Fund budget.

Staff recommends City Council adopt a budget amendment, in the amount of $60,000, to establish a budget for the Aston Park Fit Community Collaborative, for a reimbursement grant from the North Carolina Health & Wellness Trust Fund, *Fit Community* initiative for costs up to $60,000.

Councilman Mumpower felt this is a nice program, but not necessary. He felt what Aston Park needs from the State is a court system that does not have a revolving door that keeps putting criminals back on the streets that help corrupt the neighborhood.

Councilwoman Cape moved for the adoption of Ordinance No. 3779. This motion was seconded by Councilman Miller and carried on a 6-1 vote, with Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 25 – PAGE 397

G. ORDINANCE NO. 3781 - BUDGET AMENDMENT FOR YEAR 2 FUNDING FROM THE N.C. DEPT. OF PUBLIC INSTRUCTION FOR THE 21ST CENTURY COMMUNITY LEARNING CENTER IN ASHEVILLE'S WEED & SEED TARGETED AREA AND AMENDMENT TO THE GENERAL FUND TO REFLECT A TRANSFER FROM THE GRANT FUND TO SUPPORT PERSONNEL COSTS ASSOCIATED WITH THE GRANT

Summary: The consideration of 1) a budget amendment in the Grant Fund, in the amount of $130,000, for Year 2 funding from the N.C. Dept. of Public Instruction for the 21st Century Community Learning Center in Asheville's Weed & Seed targeted area; and 2) a budget amendment in the General Fund of $61,566 to reflect a transfer from the Grant Fund to support personnel costs associated with the grant.

In October 2004, elected officials, city staff and Asheville citizens mobilized to develop comprehensive strategies to address issues of law enforcement, neighborhood restoration, and prevention/intervention/treatment programs and activities in the West Riverside area of Asheville as part of a Weed and Seed initiative. The program was introduced to the community via a series of public meetings to determine the concerns of target area residents and was received favorably with the understanding that residents would be integrally involved in the planning and

implementation of the initiative. In July 2006, the U.S. Department of Justice announced the designation of Asheville as an "Officially Recognized" site for the federal Weed and Seed initiative aimed at reducing crime and improving quality of life.

Weed & Seed sites are required to leverage additional funds to carry out their respective goals and objectives. The 21st Century Community Learning Center grants provide funds for academic based afterschool programs serving youth who are not performing at grade level. Asheville's model will serve any middle and high school student attending Asheville City Schools. Programs will take place at the Pisgah View Community Center and the Burton Street Recreation Center, both of which are designated Weed & Seed Safe Havens. This grant represents the first time these highly competitive funds have been awarded in Buncombe County.

This action complies with the City Council Strategic Operating Plan in that it expands community policing initiatives and supports recreation and employment alternatives for youth at risk of gang exposure.

This action also complies with the community driven Weed & Seed goals of 1) reducing crime and improving public safety, 2) enhancing the relationship between the community and law enforcement, 3) providing accessible programs for youth, 4) increasing parent involvement in education and afterschool activities and 5) increasing job readiness among youth and adults. The program also meets needs identified in other citywide collaborative efforts such as the Mayor's RICH Taskforce and Asheville City Schools' School Success Council.

Pros:

- Program will bring much needed academic assistance to middle and high school students who are struggling in school.
- Program works with community resources to affect change.
- Program will enhance the Weed & Seed strategy of providing a comprehensive crime prevention plan to address law enforcement, neighborhood restoration and prevention/intervention/treatment programs for residents of the targeted area.

Con:

- Additional funds will need to be leveraged during the 2010-2011 school year to sustain the program since funding decreases by 20% in that year and 40% the following year.

Grant revenue in the amount of $130,000 will cover all personnel and operating expenses related to the afterschool program at no additional cost to the City. Expenses include, but are not limited to: salary for a full time program director, part-time assistants, contracted teachers and resource providers, and supplies and transportation costs. Additional funds are expected to be raised through grant applications and other funding opportunities in Year 3 and Year 4.

City staff recommends City Council adopt a budget amendment in the Grant Fund in the amount of $130,000, to establish a budget for the 21st Century Community Learning Centers which will occur in Asheville's Weed & Seed target area; and adopt a budget amendment in the General Fund of $61,566 to reflect a transfer from the Grant Fund to support personnel costs associated with the grant.

Councilman Mumpower felt what we need from the State is a court system that does not have a revolving door that keeps putting criminals back on the streets.

Councilwoman Cape moved for the adoption of Ordinance No. 3781. This motion was seconded by Councilman Miller and carried on a 6-1 vote, with Councilman Mumpower voting "no."

H. ORDINANCE NO. 3782 - BUDGET AMENDMENT FOR FOUR ADDITIONAL EARLY VOTING LOCATIONS ONE WEEK BEFORE THE GENERAL ELECTION

Summary: The consideration of a budget amendment, in the amount of $60,000, for four additional early voting locations one week early for the general election on November 3, 2009.

On August 25, 2009, City Council approved a motion giving instructions to the Buncombe County Board of Elections to provide four additional early voting locations (one each in the north, south, east and west sections of Asheville, preferably a library or community center) for one week early for the general election on November 3, 2009.

Pro:

- Potential for increase of voter turn-out

Con:

- Additional costs

The funding will reduce estimated available Fund Balance from $15.43 million to $15.37 million, leaving a Fund Balance equivalent to 16.5% of the General Fund.

Staff recommends City Council adopt the budget amendment, in the amount of $60,000, for four additional early voting locations one week early for the general election on November 3, 2009.

Councilman Mumpower had no problem with the early voting concept, but was concerned with changing the voting procedures after Council candidates have been announced. He is an announced Council candidate and feels it's morally and legally wrong for any Council member who is a candidate to vote on this. As Council refused to recues him from voting at the last meeting when this was discussed, he will vote against this action.

Councilwoman Cape said that if there was any way at all this was hindering voting or being a barrier to voting in our community she could understand why there would be objections. All this does is add more opportunities for the community to participate.

Vice-Mayor Davis liked the early voting concept; however, he felt the cost of $60,000 for one week in four locations, when there is already one early voting location already now, is a high price to pay in a lean economy. He suggested we monitor the results to see the percentage difference from the primary and the general elections and compare it to times past.

Councilman Newman agreed and explained why we should monitor the results over a series of election cycles because a lot of different factors influence how many people vote in any given year.

Councilman Miller heard that 70% of those who ride our transit system ride out of necessity and he felt it would be a mistake not to offer that opportunity for many of those people who are working two jobs and take transit to and from work.

Councilwoman Cape moved for the adoption of Ordinance No. 3782. This motion was seconded by Councilman Newman and carried on a 4-3 vote, with Vice-Mayor Davis, Councilman Mumpower and Councilman Russell voting "no."

ORDINANCE BOOK NO. 25 – PAGE 403

K. RESOLUTION NO. 09-199 - RESOLUTION AUTHORIZING THE CITY MANAGER TO MAKE PROVISIONS FOR THE POSSESSION AND

CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE TO PACK SQUARE CONSERVANCY FOR A PRIVATE EVENT IN ROGER MCGUIRE GREEN IN PACK SQUARE PARK ON SEPTEMBER 21, 2009

Summary: The consideration of a resolution authorizing the City Manager to make provision for the possession and consumption of malt beverages and/or unfortified wine to Pack Square Conservancy for a private event in Roger McGuire Green in Pack Square Park on September 21, 2009, from 6:00 p.m. to 8:00 p.m.

Pack Square Conservancy has requested through the Asheville Parks, Recreation and Cultural Arts Department that City Council permit them to serve beer and/or unfortified wine at a private event in Roger McGuire Green area in Pack Square Park for a private event.

Event organizers will follow all City policies outlined in the Outdoor Special Event Guide and ordinances regarding alcohol on City property.

This resolution is pending the issuance of an Outdoor Special Event permit to the Pack Square Conservancy for the Roger McGuire Green in Pack Square Park and the event organizers receipt of the one-time use permit from NCABC.

This action does not comply with the City Council Strategic Operating Plan, nor does it comply with the Parks, Recreation and Cultural Arts Master Plan.

Pro:

- None.

Cons:

- Potential for public safety issues;
- The event is not open to the public.

City staff recommends City Council adopt a resolution authorizing the City Manager to make provision for the possession and consumption of malt beverages and/or unfortified wine for a private event on the Roger McGuire Green in Pack Square Park on September 21, 2009, from 6:00 p.m. to 8:00 p.m. for Pack Square Conservancy.

Councilman Newman moved for the adoption of Resolution No. 09-199. This motion was seconded by Councilman Russell and carried on a 5-2 vote, with Mayor Bellamy and Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 32 – PAGE 212

Mr. Gary Giniat, Executive Director of the Pack Square Conservancy, asked City Council to waive the building/fire/safety permit fee ($150) and the parking meter closing permit fee (8 meters at $15 each = $120) for a total fee waiver request of $270 for their event.

Councilman Mumpower felt the Conservancy has known about the opening for at least a couple of months and had the time to go through the proper channels for a requested fee waiver. He felt this is a special deal and it's not fair to others who have had similar requests.

In response to Councilman Mumpower, Mr. Giniat said that this is a private event for donors that have supported the Park over the years.

As there was not time to go through the normal process of waiving fees and since the City is a partner with the Pack Square Conservancy in the Pack Square Park, Vice-Mayor Davis moved to waive the $270 fee for building/fire/safety permit fee ($150) and the parking meter closing permit fee (8 meters at $15 each = $120) for a total fee waiver request of $270 for their

event. This motion was seconded by Councilwoman Cape and carried on a 4-3 vote, with Councilmen Mumpower, Newman and Russell voting "no."

III. PRESENTATIONS & REPORTS:

A. ECONOMIC STIMULUS PACKAGE UPDATE

ORDINANCE NO. 3783 - BUDGET AMENDMENT TO ACCEPT FUNDS FOR THE DINGLE CREEK STORMWATER IMPROVEMENT PROJECT

American Recovery & Reinvestment Project Manager Brenda Mills said that as part of City staff's recurring American Recovery & Reinvestment (ARRA) update to Asheville City Council, staff is seeking Council consideration and review of the following:

- A budget amendment, in the amount of $454,500, to accept funds for the Dingle Creek Stormwater Improvement project awarded through ARRA; and
- Providing City Council with an update on the ARRA funding announcements and opportunities.

Budget Amendment Dingle Creek Stormwater Improvement

The budget amendment, in the amount of $454,500, includes funding in the amount of $336,000 for construction, $33,600 for contingencies, $80,400 for project administration and $4,500 for the loan closing fee. This project includes installing a one acre wetland and provide approximately 400 feet of stream stabilization and stream enhancement.

The City had the opportunity to apply for and was granted funding through the American Recovery and Reinvestment Act (ARRA) for the implementation of this project. The City of Asheville was awarded $454,500 under the ARRA of 2009. This would be a 50% grant with a 50% loan requirement. The loan must be paid over a 20 year period. The Clean Water Management Trust Fund (CWMTF) has agreed to cover a portion of the loan ($165,000) up to half of what was originally approved for this project through the CWMTF in 2008 ($335,000). The remaining portion of the loan ($62,250) will be paid over the 20 year period out of the Stormwater Enterprise Fund.

This action complies with a goal included in City Council's Strategic Operating Plan by developing a green project that will provide environmental sustainability for our City.

Pros:

- Approval of this action will allow the City to move forward with a portion of the Dingle Creek Master Plan
- The project is funded from both ARRA and the CWMTF
- This project will provide both water quality and flood reduction benefits.

Cons:

- Coordinating both of these funding sources will be time consuming.
- There will be a cost to be covered by the City of $62,250 over a 20 year period. This cost will be paid for out of the Stormwater Enterprise Fund.

The City will be responsible to pay the loan amount not covered by the CWMTF which is $62,250 over a 20 year period paid out of the Stormwater Enterprise Fund.

Staff recommends approval of a budget amendment, in the amount of $454,500, to accept funds for the Dingle Creek Stormwater Improvement project awarded through ARRA.

Updates and Funding Announcements

Community Development Block Grant-R ($332,942) - Funding for CDBG-R is currently in the contract stage with sub-recipient agencies.

Homeless Prevention and Rapid Re-Housing ($509,460) - Public hearing on September 8, 2009, to review the proposed grant funding distribution as a collaborative application approved by staff and the Council Housing and Community Development Committee.

NCDEER Mobile Emission Grant ($30,000) - The City of Asheville has been awarded a $30,000 grant to reinstate the "Clean and Green Local Fuel" program for the municipal fleet. This grant will support the use of biodiesel fuel for all 450 city diesel vehicles over the course of next year. The North Carolina Department of Natural Resources awarded Asheville this grant with stimulus funding so that the City can reduce its carbon footprint. The $30,000 will supplement the additional cost to purchase half a million gallons of a 5% biodiesel blended fuel. This program expects to reduce the municipal carbon footprint by 223 tons which is equal to planting 6,600 trees. Per NCDENR, funding for this grant is expected on or around September 11th.

NCDENR Drinking Revolving Fund ($510,000) - Water Resources held a pre-bid meeting August 25, 2009, for the North Fork WTP Pumping System Improvement Project. There were six interested construction companies who attended the meeting. Outreach for this project was accomplished by posting on the City of Asheville website including the Economic Recovery area, Minority Business Development Agency, Small Business Administration vendors and the State of North Carolina's Interactive Purchasing System as of August 10, 2009. The bid opening is still expected on September 9, 2009, with recommendation for bid award to City Council on September 22, 2009.

Transparency and Accountability - NC Recovery providing outreach historically underutilized businesses on September 23, 2009, from 9:30-12:30 p.m. at the Morning Star First Baptist Church, 126 4th Avenue, SW in Hickory, NC. All vendors welcome to attend.

Locally, outreach session planned for all local vendors on ARRA update funding areas and doing business and funding along with a session on capital access options. The session is scheduled for October 15, 2009, from 9:30 a.m. to 3:30 p.m. at the A-B Tech Enka Campus Haynes Room. No RSVP required. Presenters include the City of Asheville, Buncombe County, regional business service providers and local financial institutions.

When Mayor Bellamy asked for public comments, none were received.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the ordinance and it would not be read.

When Councilman Mumpower asked if there is a provision to ensure contractors have to hire legal workers, City Attorney Oast said that these are contracts administered by the City of Asheville and we use our usual safeguards and will do what the law allows.

Councilman Mumpower felt that the law is making no provision for E-Verify and other things that improve our changes of making sure that the people that are hired are legal workers. He felt this is borrowed dollars that our children will have to repay and felt we should take care of the things we have control over because the federal and state governments have their own responsibilities.

Director of Public Works Cathy Ball responded to Vice-Mayor Davis when he asked if this will resolve the problems of the Dingle Creek stormwater or if it is another step along the way to

resolve the issue. She responded that this is a big piece of the puzzle but there is still flooding upstream issues that need to be addressed.

Vice-Mayor Davis suggested the next time a drainage project comes before Council, it would be helpful to have staff provide a report on what are we doing with stormwater revenues.

Councilman Miller moved for the adoption of Ordinance No. 3783. This motion was seconded by Vice-Mayor Davis and carried on a 6-1 vote, with Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 25 – PAGE 405

Public Contracting and Local Preference Determination

Ms. Mills said that the following information is to provide Council with an overview of public contracting guidelines according to the North Carolina General Statutes and as a part of this, discuss local preference and the City's options in support of local vendors. The information will hopefully assist you in your efforts to support local vendors while maintaining the proper procedures for contracting and purchasing.

There are recommendations for outreach efforts that City staff can undertake to help support vendors in our area. These options can be done in the short run and can provide support to our vendors in time to help them get prepared for ARRA funding which is expected to start more significantly in the next 30-45 days through the City of Asheville and the region.

Statutes Governing Purchasing and Contracting $30,000 and Above

General statues for the State of North Carolina govern award of contracts $30,000 and above to the lowest responsible, responsive bidder. There is a reference page on the School of Government's webpage that references these statutes for construction, purchasing and service contracting per the North Carolina General Statutes.

Here is the breakdown as it pertains to this level of contacting:

G.S. 143-129 – formal bidding required for
- Purchases costing $90,000 or more, and for
- Construction and repair contracts costing $500,000 or more

G.S. 143-131 – informal bidding required for
- Purchases costing $30,000 up to the formal limit ($90,000), and for
- Construction and repair contracts costing $30,000 up to the formal limit ($500,000)

G.S. 143-64.31 – architectural, engineering, surveying, and construction management at risk services
- Must use a qualifications based (not cost based) selection process, unless local government exempts itself under G.S. 143-64.32;
- No other services are addressed in the statutes, so it is up to the local government to determine how best to procure those services

Statutes Governing Purchasing and Contracting Below $30,000

Bidding requirements are not required until the $30,000 threshold. The statutes do not specify award under this amount and for service contacting beyond G.S. 143-64.31 above. Local governments have options for award of contracts at this level.

In obtaining information in this area, it should be noted that there has been no precedence in North Carolina for local preference and the impact to contracting and contracting dollars. Consideration will be needed to think about the following:

a. How will local be defined?
b. What exemptions will be made, if any? These would include costs above a certain amount budgeted for projects in the below $30,000 threshold.
c. What impact will this have on our Minority Business Program policy currently in affect?
d. What impact will this make for outside vendors seeking to do business with the City of Asheville?

N.C. General Statutes and Local Preference

As for local preferences, here's an excerpt from "A Legal Guide To Purchasing and Contracting for North Carolina Local Governments," by Frayda S. Bluestein, Professor of Public Law and Government (p. 73):

Section 121. Can a local government establish a preference for local bidders?

Local governments have no statutory authority to establish preferences of any kind and are bound by the "lowest responsible bidder" standard when awarding contracts that are subject to the bidding requirements. (See Question 117.) The fact that a bidder is local cannot, by itself, be a basis for awarding a contract to a higher bidder. Some argue that doing business with local companies will help build and maintain the local government's tax base. (This of course depends on how "local" is defined and whether such a policy stirs other jurisdictions to adopt similar policies, which might ultimately cause losses for local companies.) Local governments do have authority to engage in local economic development, but this authorization does not include the use of the contracting function to provide what amounts to a subsidy to a local company that is not otherwise the lowest responsible bid.

In some cases, local companies may provide better, more cost-effective, or more timely service. These factors can legally be considered under the lowest responsible bidder standard, which explicitly allows consideration of quality, performance, and time. Local governments are not, however, entitled to assume that a local company will be superior in these areas and should be careful to document the basis for a decision based on these factors.

Local governments can promote local businesses by making sure they are given notice of opportunities to bid and can use local businesses for convenience when purchasing small items or obtaining quotes for informal bids. The governing board could legally adopt a policy of sending individual notice of bidding opportunities only to local bidders, since the statute does not require such notice in the first place and local governments may have authority to establish a local preference for contracts that are not subject to the competitive bidding requirements. (See Question 33.) Boards considering this option should evaluate whether the loss of competition and potential cost savings is outweighed by the benefit to be gained from promoting local businesses in this way.

Options to Support Local Businesses

There is encouragement for local governments to help support their businesses with additional and targeted outreach which will keep them apprised of bidding opportunities. This has been widely accomplished through the Minority Business Program over the years to register minority and women businesses and to show them how to access bidding opportunities in our region and beyond.

City staff can hold a series of sessions at convenient locations to help local companies understand how to register, find bidding opportunities and how to follow the ARRA funding. We

could advertise this on the ARRA site, email online vendors, send through the ARRA newsletter, use the VendorLink System to notify all those in the local (City Council will need to define this for staff) on these sessions and use our current vendor database to contact vendors.

In addition, an ARRA Business Update and Information Session in planned in conjunction with the region's business service providers such as Mountain BizWorks, Self Help Credit Union, our local SBA office and the financial institutions to support local vendors with obtaining business assistance, understanding ARRA and doing business with government and access to capital in the current economic market.

These options will go a long way to supporting businesses with having immediate knowledge of the city's contracting opportunities and how to submit bids.

Conclusion

Staff will rely on City Council's direction on this matter. The support of businesses in our region has been a priority for City staff and even more with the ARRA funding with the current economic issues we are facing.

The next 30-45 days will see more contracting opportunities and we will continue to provide outreach education to the public on all opportunities that are available to them.

In response to Councilman Russell, Ms. Mills said that going forward we will have the ability to track local vendors for contracts under $30,000.

Councilman Mumpower suggested we direct staff to make every effort to pursue whatever exemptions we can to magnify our capacity within the limits of state law, e.g. contacting the State Contracting Construction Office to find out how Asheville can exempt itself under G.S. 143-64-32.

Councilman Newman supported doing everything we can within our power to know about jobs and have our local businesses compete for them, but we also need to be aware of the pros and cons of these kinds of policies to make sure it is a good deal for the taxpayers and local businesses.

In response to Councilman Miller, City Attorney Oast said that it is illegal to split a project to evade the purpose of the article on formal bidding requirements.

Councilman Miller felt it was important to let people know how they can get on an approved vendor list.

When Councilman Mumpower asked if we give preference to minority businesses, Ms. Mills replied that only the federal government gives preference to minorities. However, we do reach out to them to make sure they know the process, just like local vendors.

Mayor Bellamy suggested on our agendas that we identify companies who are being awarded contracts with the City so people can see their money is staying within our community. She did note, however, that times there are no local companies that provide the service, e.g., bulletproof vests.

B. QUARTERLY REPORTS

Planning & Economic Development Committee Chair Report

Councilwoman Cape, Chair of the City Council Planning & Economic Development Committee, provided Council with an update of their activities during the last quarter. She

thanked her other Committee members of Vice-Mayor Davis and Councilman Russell for their hard work on this Committee.

End of Year Strategic Operating Plan Update

Assistant City Manager Jeff Richardson reviewed with Council the End of the Year Strategic Operating Plan.

In the affordable focus area (1) Housing (a) 95 New Affordable Housing Units; (b) 24 First Time Homeowners Used the City's Down Payment Assistance; and (c) 4,500 Households Received Housing Counseling Services or Homelessness Prevention and Housing Services; (2) Asheville as an Employer of Choice (a) CAYLA; (i) 100% of Graduates Currently in College; (ii) Over 400 Hours of Community Service Per Year; and (iii) Over $100,000 in Scholarships awarded annually; (3) Homelessness; (a) 5% up From January 2008; (b) Chronic Homelessness: down by 25% from January 2008; (c) 231 People in Permanent, Supportive Housing; and (d) 36% increase in People Using Homeless Management Information System; and (4) City Owned Land - Five City Properties (a) Armory Update; and (b) 4 City Sites/Developer Request for Qualifications Process Still Underway.

In the green focus area (1) Sustainability Office (a) Completed Sustainability Master Plan; (b) Municipal Electricity Usage down by 6.3%, Totaling 867,380 kWh; (c) 20% of Employees working 4/10 schedules; (d) 90% of Computers on Shutdown Program; and (e) 75% of All Municipal Buildings Displayed Energy Reduction; (2) Pack Square Park Key Dates (a) Phase One: Vance Monument Now Open; (b) Phase Two: McGuire Green (Fall 09/Open Spring 2010); (c) Veterans Monument Dedication: Nov 11; and (d) Urban Trail Reinstallation: Late Sept; and (3) Pack Square Park Still Left to Fundraise (a) $1.2 Million: Complete Park; (b) $2.1 Million: Pavilion; and (c) $1.5 Million: Endowment; (3) Received ARRA Funds for 5 Replacement Buses ($2 M); (4) Received Funds for Hybrid Bus; (5) FTA Grant for Development of ISO 14001 Training Program; and (6) Completed the Avon Road and New Haw Creek Sidewalk Projects.

In the safe area (1) Asheville Police Department (a) Nuisance Court; (b) 8-Member Downtown Patrol Unit Formed; and (c) Increase Dedicated Resources to Address Internet Child Pornography; (2) Asheville Police Department in Fiscal Year 2008-09: (a) Answered 113,104 calls for service; (b) Proactively contacted more than 4,600 businesses and responded to 4,200+ calls for service in CBD; (c) 1,130 charged in drug cases (i) 332 charged classified as dealers; (3) Asheville Police Department from Fiscal Year 2007-08 to Fiscal Year 2008-09: (a) 6.6% down in violent crime; and (b) 12.6% down in property crime; (4) Asheville Fire and Rescue (a) Activation of 300 Merrimon Ave Fire Station: Response Time Coverage Up 31%; (b) Haw Creek Partnership; and (c) Capital Fleet Replacement.

In the sustainable area (1) UNC-Asheville Partnership; (a) Memorandum of Understanding; (b) Emergency Planning Surveys; (c) UNC-A NEMAC to Develop Powerful Tools; (d) RENCI for an Engagement Site Downtown; and (e) Civic Center/Campus Event Coordination; (2) ARRA Grant Success (a) Entitlements - $7,597,242; (b) Grant Funding Applied for to Date - $12,800,149; and (c) Grant Funding Awarded to Date: - $994,500; (3) WayFinding Update; (4) 6.09 miles of sidewalk; (5) Neighborhood Partnerships Plans (a) - South French Broad Neighborhood Plan; (6) Civic Center (a) Capital Improvement Plan Project Finished; (b) Arena Roof Starts in Sept 2009; and (c) Customer Service Survey Fiscal Year 2009: 92% Satisfaction Level; and (7) Development Review – One Stop Shop (a) All Effected Departments Moved by August 28; (b) Cooperation from Asheville Fire & Rescue, Dept. of Public Works, Parks & Recreation, and Building Safety saved in Excess of $220,000 in Labor Costs; (c) Energy Efficient Lighting will save $5,000 Per Year; (d) "Green" Carpet Project; and (e) Improved Efficiency and Customer Service.

Mr. Richardson said that Council has been provided with an economy report for Fiscal Year 2008-09 (4th Quarter); the Asheville Police Department's outreaches/actions for the month of

July, as well as a wrap-up of Fiscal Year 2008-09; and an update on the South French Broad Neighborhood Visioning project.

Throughout discussion, Mr. Richardson and Police Chief Bill Hogan answered various questions/comments from Council, some being, but are not limited to: was the City successful in the grant for 12 additional police officers; was the City successful in the security grant to upgrade the Municipal Building and if so, is that included in this report; why is the discrepancy in the crime statistics reported in the Asheville Citizen-Times vs. the information presented to Council; has the Police Department identified patterns in the downtown area for calls of service with the new 8-person downtown unit; what type of crimes are not included in this report; has our efforts to more enthusiastically go after hard drug crime in public housing have any impact of these statistics; and homelessness and crime statistics are interconnected.

Mayor Bellamy noted that from January 2009 to the present, we are seeing a double digit decrease in violent and property crimes.

Mayor Bellamy recalled that Council mandated anyone who received Community Development Block Grant funding from the City to utilize the HMIS system. She was pleased that there is a 36% increase of people using that system. We are now able to track who is receiving services and what type of services they are receiving to avoid abuse of the system. Regarding accountability, she said that the service providers are committed in holding themselves accountable with the services they provide as well as the users. She felt that we are addressing the chronic homelessness in our community.

Councilman Mumpower questioned why we create new housing stock for the homeless when there are vacancies in our own public housing developments. He questioned if it is success to create publicly subsidized housing that doesn't reform people, but basically provides a temporary escape from reality. He felt there are better models for helping people than this one.

Vice-Mayor Davis was concerned about the number of homeless on the west end of our downtown gateway and expressed his, and other property owners in that area, frustration with the use of drugs and intimidation. He hoped that the nuisance court and more police patrol will eliminate some of the problems.

Mayor Bellamy said that since Council makes policy direction, we need to direct the Police Chief to look at more coverage in that area, particularly on Ann Street, and the possibility of placing a police substation in that area.

At 7:16 p.m., Mayor Bellamy announced a short recess.

Planning & Development Director Judy Daniel briefed Council on the Downtown Master Plan. She said that Council adopted the Downtown Master Plan in May of this year, with instructions to the staff that the details of implementation would be critical in their support for the required changes to the Unified Development Ordinance (UDO) necessary for full implementation. The Council directed the staff to strongly take into consideration the concerns over certain recommendations of the Master Plan expressed by those who testified at the public hearing.

Since that time, the staff has been working on both a framework for implementation and drafting the UDO changes that will implement the Master Plan recommendations. She provided Council with the action timeframe matrix. Implementation Matrix highlights include (1) Arts and Culture Subcommittee to track Strategy One (A-H) - primarily private sector led actions; (2) Historic Preservation Subcommittee to track Strategy One (I-N) – most recommended actions already in process by HRC; (3) Transportation and Parking Subcommittee to track Strategy Two – many actions already in process by public and private sectors; (4) Urban Design and Development (UDO changes) Subcommittee to track Strategies Three to Six – staff already

working on drafts; and (5) Downtown Management Subcommittee to track Strategy Seven – fully private sector led actions. A major part of that effort has been to coordinate these efforts with the Downtown Commission, and gain their support for methodologies to begin the implementation process. In August, the Downtown Commission gave its support to both an overall matrix for implementation and the formation of committees that will work to push for implementation of the seven major strategies recommended.

She said the activity since Council adoption is as follows: (1) Spring 2009 - Downtown Master Plan Adopted in Concept by City Council; (2) Summer 2009 (a) June – Planning staff begins work on UDO changes; (b) July - Staff works with Downtown Commission on implementation plans; (c) August - Downtown Commission supports Implementation Matrix and Implementation Pursuit Committees, and begin to discuss revisions to Downtown Design Guidelines. Proposal for five sub-committees to pursue implementation strategies for: Arts and Culture; Historic Preservation; Transportation and Parking; Downtown Management; and Urban Design and Development (UDO Changes) (d) September – (a) DMP Subcommittees to begin meeting; (b) Urban Design & Development (UDD) Sub-committee begins evaluating first set of UDO changes (*project review processes*); and (c) Dates set for other Sub-Committees to begin meeting; (e) October – (a) Downtown Commission (DC) considers UDD recommendations for first set UDO changes; (b) Planning and Zoning Commission reviews first set of UDO changes; and (c) UDD Sub-Committee begins review of second set of UDO Changes; and (f) November – (a) City Council reviews first set of UDO changes; (b) Downtown Commission, then Planning and Zoning review second set UDO changes.

The Downtown Commission is working to assure balanced membership on the "Implementation Pursuit Committees", so that the energy that worked to create the Master Plan will continue. As noted in the Implementation Matrix, a large portion of the recommendations will require action on the part of the private sector; and it has been exciting to see those groups start to coalesce and move toward action without staff participation. With all the committees, the standard for their work will be to advise and push for implementation of the Plan recommendations not to change or modify those recommendations; unless significant problems are seen in the technical aspects of the recommendations.

The current timeline for the Downtown Master Plan during this fall will include the formation of the committees, and the review of the first set of UDO changes by the "Urban Design and Development" Committee, then the Downtown Commission and Planning and Zoning Commission – and then presentation to the Council sometime in November. The first set of changes will be the modifications to the development review process. The staff has already drafted these changes, and has begun drafting the second set pertaining to the actual design related standards (which will be more complicated). The planning staff has been working with the Downtown Commission's Design Review Committee on these changes, which has been a very helpful process.

Implementation staffing includes (1) Planning and Development staff working with Urban Design and Development Subcommittee – primarily UDO changes; and (2) Sasha Vrtunski – contract employment to provide staff support for implementation for (a) Arts and Culture Subcommittee; (b) Historic Preservation Subcommittee; (c) Transportation and Parking Subcommittee; and (d) Downtown Management Subcommittee.

Finally, the implementation work by the Planning and Development staff (primarily the UDO changes for the Urban Design elements and the Historic Preservation aspects) is now being augmented by the addition of Sasha Vrtunski, who is working on a short term contract to provide staff support for the other aspects of implementation related to the Arts and Culture, Transportation and Park, and Downtown Management elements. Finally, it is important to convey that many aspects of implementation are already underway from both the public and private sectors.

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER SPECIFIC RECOMMENDATIONS FOR THE DISTRIBUTION OF HOMELESSNESS PREVENTION AND RAPID REHOUSING PROGRAM GRANT FUNDS

RESOLUTION NO. 09-200 - RESOLUTION AUTHORIZING AGENCY FUNDING USING HOMELESSNESS PREVENTION AND RAPID REHOUSING PROGRAM GRANT FUNDS

Mayor Bellamy opened the public hearing at 7:41 p.m.

Mr. Jeff Staudinger, Community Development Director, said that this is the consideration of a resolution authorizing agency funding using Homelessness Prevention and Rapid Rehousing Program grant funds. This public hearing was advertised on August 28 and September 4, 2009.

The City of Asheville was approved to receive $509,460 in Homelessness Prevention and Rapid Re-Housing Program (HPRP) funds. In May, City Council approved the Action Plan amendment for the use of funding, which was subsequently approved by U.S. Dept. of Housing & Urban Development (HUD). The Action Plan approved by HUD detailed the process by which the City would distribute those funds.

In June, the City initiated a pre-application process to assess whether interested parties qualified to apply for HPRP funds, using thresholds set by HUD's HPRP guidelines. The pre-application process resulted in five agencies qualifying to submit full applications. Those agencies are:

- Asheville Buncombe Christian Community Ministry (ABCCM)
- Eblen Kimmell Charities (Eblen)
- United Way 2-1-1 (2-1-1)
- Pisgah Legal Services (PLS)
- Western North Carolina Aids Project (WNCAP)

As the application process unfolded, it became clear that rather than a competitive process, each of the qualified agencies felt they had a clear role to play in meeting a portion of the HPRP priorities. A collaborative application was proposed, and the concept accepted by staff.

Collaboratively, the agencies agreed to the following:

- Participate in joint City-County HPRP Oversight Team—The oversight team will meet to ensure that the HPRP is efficiently and effectively implemented since it is an entirely new source of funding from HUD;
- Case managers will participate in the HPRP Case Review—these reviews will be a collaborative team of HPRP staff and other relevant staff from community partner agencies. This team will meet monthly to review assessments and scan the environment for additional resources available to all applicants;
- Based on national and state best practices, WNCAP, ABCCM and Eblen-Kimmel will establish uniform assessment, screening tools, and evaluation processes tailored for our community.
- Make interagency referrals designed to best meet particular households' needs beyond the scope of HPRP;
- Enter data into HMIS consistently;
- Provide reports as necessary;
- Send all payments to third party vendors directly.

2-1-1 will provide community wide outreach. When potential HPRP participants call, 2-1-1 will perform a short assessment and, if the household seems eligible, refer callers to an HPRP lead agency for a full assessment. 2-1-1 will perform follow-up calls on a sample of people referred to evaluate the process.

ABCCM, Eblen-Kimmel Charities, and WNCAP are lead agencies. They will accept referrals from 2-1-1, community agencies, and individuals. Agencies will evaluate to ensure households would remain or become homeless but for HPRP assistance, and verify that there are no other resources available to the household. If a household qualifies, lead agencies will provide housing stabilization, case management, and housing search and placement services. If clients need specialized supports, referrals will be made to Pisgah Legal, On Track, or other community support agencies.

Pisgah Legal will offer legal services to clients so that they can maintain or obtain housing.

OnTrack will subcontract with HPRP agencies to provide Credit Counseling and credit repair as needed.

Community Partner Agencies are not funded, but are an essential support to HPRP. Agencies providing services such as mental health, public health and human services, employment training and education, family reunification, and domestic violence counseling will accept referrals from HPRP funded agencies and make referrals as appropriate.

On August 26, 2009, the Housing & Community Development Committee (HCD) met, reviewed the application requests, staff report for the distribution of HPRP grant funds, and heard presentations from the agencies.

Funds must be committed before September 30, 2009. HPRP guidelines require that all funds be used within a thirty-six month period, or by September 30, 2012.

Regarding the City Council Strategic Operating Plan, this hearing is part of the process that will enable funds to be directed to prevention and rapid re-housing, strategies that have been proven nationally to reduce homelessness.

Pros:

- The collaborative HPRP proposal advances our homeless service delivery system to one designed to prevent homelessness and reduce the effect of homelessness on households.
- It directly supports the goals of the Asheville-Buncombe 10-Year Plan to End Homelessness.
- It advances a System of Cares model in which agencies collaborate to provide client services based upon the agency's strengths, avoiding service duplication and ensuring that clients access housing and supportive services, achieving the most cost-effective and responsive results.
- The collaborative commitment to use HMIS will enable the City to better understand the scope and nature of homelessness in our community.
- The lead agencies bring other funding resources to the table. By skillfully combining a variety of funding sources to meet people's housing crisis needs, agencies ensure that HPRP funds will be maximized to the best possible extent. Along with additional funds, lead agencies also offer experienced and caring human resources as part of their service models. .

Con:

- There is very little administrative funding in this program given the proposed outcomes and scopes of work. The City and agencies will be sharing only 5% of the

total grant (or about $26,000) for administration, which (according to the terms of the grant) is supposed to cover all administrative activities over 3 years.

By preventing homelessness and rapidly re-housing households that are in a housing crisis, we limit the probability that individuals will become chronically homeless. The 10-Year Plan estimates that it can cost up to $12,000 annually in public funds to pay for someone who is experiencing chronic homelessness. The project increases the likelihood that households will obtain or maintain housing as well as employment, education, and community relationships.

The HCD recommends approving the collaborative proposal and budget as presented. The proposal was also reviewed and endorsed by the Homeless Coalition Advisory Committee.

Mayor Bellamy closed the public hearing at 7:46 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the resolution and it would not be read.

When Councilman Russell asked what the City's administrative costs would be over the 3-year period, Mr. Staudinger said that he didn't think there would be any costs that would be attributed to the City's General Fund.

Councilman Mumpower explained why he felt this is will be a failed effort of well attended social engineering but it does not address the core issues.

Councilwoman Cape spoke in support of the action and said that we have looked at duplication of services for years and these agencies have stepped up to the plate and found a way to collaborate together.

Councilman Newman was pleased with the collaboration of these agencies. He said there will always be a need for strategies to address people, due to whatever circumstances, might be homeless, but during this recession, this need is unique and at a level that a response is necessary. The response put together by these agencies is the right one.

Councilman Miller spoke in support of this action and suggested in one year the agencies report to Council the impact of this collaboration.

Councilman Newman moved for the adoption of Resolution No. 09-200. This motion was seconded by Councilman Miller and carried on a 5-2 vote, with Councilman Mumpower and Councilman Russell voting "no."

RESOLUTION BOOK NO. 32 – PAGE 215

B. PUBLIC HEARING TO CONSIDER CONDITIONAL ZONING OF PROPERTY IDENTIFIED AS IRENE WORTHAM ADULT DAYCARE CENTER LOCATED AT 16 AND 18 AZALEA STREET FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT/CONDITIONAL ZONING TO ALLOW FOR THE CONSTRUCTION OF A NEW 7,169 SQUARE FOOT ADULT DAYCARE CENTER TO REPLACE THE EXISTING STRUCTURE AT 18 AZALEA STREET

ORDINANCE NO. 3784 - ORDINANCE TO CONDITIONALLY ZONE PROPERTY IDENTIFIED AS IRENE WORTHAM ADULT DAYCARE CENTER LOCATED AT 16 AND 18 AZALEA STREET FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO RM-16 RESIDENTIAL MULTI-

FAMILY HIGH DENSITY DISTRICT/CONDITIONAL ZONING TO ALLOW FOR THE CONSTRUCTION OF A NEW 7,169 SQUARE FOOT ADULT DAYCARE CENTER TO REPLACE THE EXISTING STRUCTURE AT 18 AZALEA STREET

Mayor Bellamy opened the public hearing at 7:59 p.m.

Urban Planner Jessica Bernstein said that this is the consideration of an ordinance to conditionally zone property identified as Irene Wortham Adult Daycare Center located at 16 and 18 Azalea Street from 16 and 18 Azalea Street from RS-8 Residential Single-Family High Density District to RM-16 Residential Multi-Family High Density District/Conditional Zoning to allow for the construction of a new 7,169 square foot adult daycare center to replace the existing structure at 18 Azalea Street. This public hearing was advertised on August 28 and September 4, 2009.

Ms. Bernstein said that the applicant is requesting a Conditional Zoning for two parcels located at the end of Azalea Street from RS-8 (Residential Single-Family High Density District) to RM-16 (Residential Multi-family High Density District) 16 in accordance with Section 7-7-8 of the UDO.

The site consists of two separate parcels located at 16 and 18 Azalea Street with a combined area of approximately 1.49 acres. The lots are currently zoned RS-8, as are adjacent parcels.

Both parcels are owned by the Irene Wortham Center for their adult day care facility, which has been operating at this site since the early 1980s. There is a one-story brick structure on the westernmost parcel, which will remain. The one-story modular structures on the easternmost parcel will be removed and although both parcels will be conditionally-zoned, all construction activity (and staging) will occur on this eastern parcel only.

The applicant is proposing to construct a new building on the eastern parcel for their "Adult Day Activities Program," currently operating in the existing structures. The building will be sited towards the rear of the parcel, with parking in the front, accessed from Azalea Street. The single-story structure is proposed at 7,169 square feet and approximately 17 feet in height. Twenty-two parking spaces (including 2 accessible spaces and 2 bike spaces) are included in the vehicular use area.

Landscaping and open space are required on this site due to both the rezoning and the new construction, and includes a Type A (20') property line buffer around the entire project area, street buffer in front of the parking area, street trees, parking lot landscaping and building impact landscaping. Although not technically required on the parcel where no development activity will occur, staff is recommending that street trees and sidewalks be extended across the entire road frontage of the project area to enhance walkability in the neighborhood and to maintain a consistent streetscape.

The applicant is requesting a conditional zoning to RM-16 to expand their facility and rectify what appears to be a legal (grandfathered) non-conforming situation. The use was established prior to the Unified Development Ordinance (UDO) and would have been allowed under its previous zoning designation (R3), however this use is not allowed in the current (RS-8) zoning district.

Adult Day Care Centers are considered as a Use By Right Subject to Special Requirements (USSR) in the RM-16 zoning district. In these situations, the special requirements are that the maximum building size allowed is 20,000 square feet and there must be a courtyard space facing the street. Both of these conditions have been met and the RM-16 CZ designation would allow the Center to rebuild a more modern and capable facility.

The project was approved with conditions by the Technical Review Committee (TRC) on Monday, July 20, 2009. No members of the public were present and no comments have been received as of the writing of this report. Discussion at the TRC meeting was centered on two issues – the applicant's opposition to staff's recommendation to extend street trees and sidewalks across the entire property frontage and the extent of the water line improvements required by the water allocation process and associated costs. Further study by the applicant revealed that the original waterline improvements indicated in the Letter of Commitment will not be required and the existing waterline provides adequate capacity.

The Planning & Zoning Commission unanimously recommended approval (6-0) of this proposal at their August 20, 2009, meeting. A representative from the Shiloh Community Association voiced support of the project.

Representatives from Irene Wortham Center and the architect met with members of the Shiloh Community Association on Wednesday, July 1st and Monday, July 6th to share the details of this project and answer questions.

Section 7-7-8(d)(2) of the UDO states that planning staff shall evaluate conditional zoning applications on the basis of the criteria for conditional use permits set out in Section 7-16-2. Reviewing boards may consider these criteria; however, they are not bound to act based on whether a request meets all seven standards.

1. **That the proposed use or development of the land will not materially endanger the public health or safety.**
   The proposed project has been reviewed by City staff and appears to meet all public health and safety related requirements. The project must meet the technical standards set forth in the *UDO*, the *Standards and Specifications Manual*, the *North Carolina Building Code* and other applicable laws and standards that protect the public health and safety.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.**
   The proposed use and development of the land is compatible with the natural features and topography of the site as well as the surrounding area. Significant landscaping and open space will be provided that will mitigate any incompatibility with the residential neighborhood surrounding this location. There are no significant topographic features on the site.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.**
   The proposal is not expected to injure the value of adjoining or abutting properties. The use has been in operation on the same site for more than 20 years and neither the use nor the existing boundary limits are changing.

4. **That the proposed use or development on the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.**
   The proposed development includes a structure that is larger than the average single-family home and a parking lot which is somewhat inconsistent with single-family residential development; however, the proposed project complies with planning and zoning requirements for non-residential uses allowed in residential districts and will be buffered from the adjacent homes by a 20' wide landscape strip of trees and shrubs that should mitigate any negative visual impact.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.**
   This proposal meets several goals and objectives of the *Asheville City Development Plan 2025*, including infill development and locating an employment center along a transit route. Additionally, the Sustainable Economic Development Strategic Plan lists the health-care sector as a locational advantage for the City of Asheville. This proposal is to support the continued operations of a local, existing health-care related facility that serves primarily low to moderate-income Asheville residents and improves their quality of life.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.**
   This proposed development is located near major road facilities within walking distance to two City bus routes (# 6 & 8). In addition, basic infrastructure appears adequate and preliminary review by other service providers has not revealed any problems for future service to the development.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.**
   The proposed project has been reviewed by the City Traffic Engineer and it should not cause undue traffic congestion along the existing street infrastructure. The anticipated traffic at full build-out conditions is expected to be less than one hundred (100) vehicles per hour during the morning and afternoon peak hours during a typical weekday.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Pros:

- Remedies a non-conforming zoning situation.
- Allows an existing community support organization to upgrade their facility to improve the client experience.
- Significant landscaping will be installed onsite to provide a buffer to adjacent homes.

Con:

- Will result in a larger parking area than currently onsite, which is not typical in residential areas.

Based on the above findings, staff recommends approval of the conditional zoning as requested by the applicant.

The Executive Director of the Irene Wortham Center explained the mission of Irene Wortham Center and noted they have been in the Shiloh community for over 45 years. They are currently licensed for 47 but they would like to provide services to 77 people. Their current building is not large enough nor does it have the quality their clients deserve. She urged the Council to vote in support of this action.

Mayor Bellamy closed the public hearing at 8:05 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 3784, to conditionally zone property identified as Irene Wortham Adult Daycare Center located at 16 and 18 Azalea

Street from 16 and 18 Azalea Street from RS-8 Residential Single-Family High Density District to RM-16 Residential Multi-Family High Density District/Conditional Zoning to allow for the construction of a new 7,169 square foot adult daycare center to replace the existing structure at 18 Azalea Street, subject to the following conditions: (1) The project shall comply with all conditions outlined in the TRC staff report; (2) All site lighting must comply with the City's Lighting Ordinance and be equipped with cut-off fixtures and directed away from adjoining properties and streets. A detailed lighting plan will be required upon submittal of detailed plans to be reviewed by the Technical Review Committee; (3) All existing vegetation that is to be preserved must be clearly indicated and dimensioned on the site, landscape and grading plans; (4) The building design, construction materials and orientation on site must comply with the conceptual site plan and building elevations presented with this application. Any deviation from these plans may result in reconsideration of the project by the reviewing boards; (5) This project will undergo final review by the TRC prior to issuance of any required permits; and (6) Staff recommends that street trees and sidewalks be installed across the entire frontage of the site (both parcels) to enhance walkability in the neighborhood and to maintain a consistent streetscape. This motion was seconded by Vice-Mayor Davis and carried unanimously.

ORDINANCE BOOK NO. 25 – PAGE 407

V. UNFINISHED BUSINESS:

A. W.C. REID CENTER CAPITAL PLAN

Project Update and Reid Center Funding and Project Design Status

Parks, Recreation and Cultural Arts Director Roderick Simmons said that this report is to provide City Council an update on the status of funding for the development of a new community center and the progress on completion of the construction documents.

On January 13, 2009, City Council reviewed and approved the new construction plan for the WC Reid Center for the Creative Arts. This action was recommended by the WC Reid Center Advisory Board and the Parks and Recreation Advisory Board.

On May 12, 2009, City Council approved authorizing the City Manager to enter into a contract with Mathews Architecture to develop Master Plan for site development and construction documents for the construction of the WC Reid Center for Creative Arts for an amount not to exceed $278,600.

On August 25, 2009, City Council was notified that a North Carolina Parks and Recreation Trust Fund grant extension and site change for the project was not granted. City Council approved authorization for the City Manager to withdraw from the North Carolina Parks and Recreation Trust Fund grant for Reid Center Renovation Project (#2006-476, DENR PO7033) for $500,000, and gave authorization to reapply for a PARTF grant funding in January 2010 for construction of a new W.C. Reid Community Center. City Council requested an update on project funding and facility design.

Funding Update

Assistant Parks, Recreation and Cultural Arts Director Debbie Ivester said that staff has managed relationships and regular communication with all major funders since the inception of the project. All funds committed to the first phase of construction are designated for theater, classrooms, office, restrooms, storage and parking. The City allocated $500,000 as part of the Fiscal Year 2006-07 capital improvement budget for the project. A portion of the funds have been used for project design and minor improvements at the Reid Center.

Most recent update to funders includes (1) December 2008 regarding change from renovation to construction, and (2) May 2009 regarding phase I and II of project. Below is information pertaining to the major funders.

Funder: Junior League of Asheville Amount: $45,000
Award Date: 2004 Expire Date: NA Purpose: Theater, classrooms, office, foyer, design
Comment: Agrees to the use of funds for construction rather than renovation, expects construction to begin by end of 2009. Funds are committed to project.

Funder: Janirve Foundation Amount: $600,000
Award Date: 2006 Expire Date: 2010 Purpose: General construction
Comment: Agrees to the use of funds for construction rather than renovation, expects construction to begin by end of 2009. Currently in discussion regarding commitment of funds in relation to withdrawal of PARTF grant and feasibility of project.

Funder: Eaton Charitable Fund Amount: $25,000
Award Date: 2007 Expire Date: NA Purpose: General construction
Comment: Agrees to the use of funds for construction rather than renovation, expects construction to begin by end of 2009. Funds are committed to project.

Funder: Glass Foundation Amount: $50,000
Award Date: 2007 Expire Date: NA Purpose: General construction
Comment: Agrees to the use of funds for construction rather than renovation, expects construction to begin by end of 2009. Funds are committed to project.

Funder: U.S. Dept. Housing & Urban Development Amount: $137,200
Award Date: TBA Expire Date: 5 years Purpose: General construction
Comment: Currently conducting technical change in award from renovation to new construction.

Funder: Eckerd Family Foundation Amount: TBA
Award Date: TBA Expire Date: NA Purpose: General construction
Comment: Will reconsider its commitment once the final construction plan is complete that ensures timely completion of the project.

Facility Design Update

Mr. Simmons said that Mathews Architecture began work when the contract was approved in June 2009.

Mathews Architecture is responsible for fulfilling two stages of project development that would enable the project to be bid out: (1) Master Plan for site development and (2) Construction documents for the construction.

(1) Master Site Plan for the building and site.

The master plan stage has been completed and entailed a site survey, researching and designing the facility for every phase of development to meet UDO requirements, preparation for LEED requirements, and addressing utility easement considerations.

(2) Construction documents for the construction

The second stage of design development/construction documents is well under way and is expected to be competed by October. This includes the next level of refinement design and engineering that addresses the layout of the facility, basic

structural components and foundations, finishes and preliminary observation of costs. The fundamental plans will be laid out in this stage along with specifications and finalized by the architect and engineers prior to going to bid.

The timeline we are currently working on is the bids will go out on November 4, the bid opening is set for December 4, depending on Council's schedule they hope to bring it back in December, with construction starting in late December or early January.

This project complies with the Parks, Recreation, Cultural Arts and Greenway Master Plan in that it supports strategically increasing recreational programming level of service, ensures a continued high level of service in parks, and increases connectivity to parks and greenways. In the Master Plan neighborhood input indicates a strong desire to continue a variety of programs for youth at this site and highlights the need for the continuation of neighborhood services in this part of the city. The Master Plan prioritizes this project as the highest ranking new facility in the park system.

With the lost of PARTF funding in the amount of $500,000 the budget available now for construction of a first phase is $1,500,000. After paying architect fees in the amount of $278,600, we will have $1,221,400 remaining for building the new community center.

Final cost estimations from the architect will not be available until November, but the preliminary review suggests the project scope will be in the range of $2,000,000 or more.

Staff met with the Chief Financial Officer Ben Durant to discuss possible funding options if the bid price for the project comes in higher than expected.

There is approximately $650,000 of un-programmed funds in the City's capital reserve accounts that could be appropriated as needed to fund higher than expected bids for the Reid Center project:

General Capital Reserve Account	$180,000
Donations from Jake Rusher Estate	$470,000
Total	$650,000

Alternatively, there may be an opportunity to combine any additional Reid Center costs with a larger financing package that is planned for Fiscal Year 2009-10 that currently includes the acquisition of fire trucks, two sewer projects, installation of an irrigation system at the golf course, and pool improvements.

If the financing option is chosen, debt service costs would increase depending on the additional amount that is financed.

Pros:

- By proceeding with the final design and appropriating funds keeps the project on track with key components of the master plan
- Leverages the private funding already in place to support the project

Cons:

- Construction at the Livingston Street Park site removes one adult size ball field from the City's inventory
- Appropriating additional funds from the City's capital reserve accounts would deplete the capital reserve

Staff is recommending proceeding with the final designs for the project and asks City Council to provided policy direction on appropriating funds to replace the loss of the PARTF grant for project construction or placing project construction on hold for future development.

He provided Council with a cost breakdown for renovations of the current W.C. Reid Center (total probable cost is $5.4 Million), along with a list of minor improvements that have been made to the existing facility.

In response to Councilwoman Cape, Mr. Simmons said that after we apply for the PARTF grant in January, we would know be notified in July, would enter the contract in August, and expend funds in September. Any funds awarded would have to be for construction that hasn't occurred up to that point. We would be looking at elements that were left out of Phase I.

In response to Councilwoman Cape, Ms. Jane Mathews, with Mathews Architecture, said that they have not discussed a staging aspect that would adhere to the ¼ reduction of PARTF funds. They won't know an exact more defined budget until they complete the design development which is scheduled to be completed in a few weeks. That will be the first point they will have detailed independent cost estimates. They only now have a conceptual budget that doesn't take into account the bidding climate, which is now very favorable.

Upon inquiry of Councilwoman Cape, Ms. Ivester said that the Junior League of Asheville, Eaton Charitable Fund and Glass Foundation funders have been flexible. The Janirve Foundation is also flexible; however, the only thing binding them now is their close-down process. When we met with them in May to talk more specifically, they focused on the close-down process. They felt that if construction could start by the end of the year and then see some good progress into the first couple of month of 2010, they could continue to commit the funds. If the breaking ground occurs in January vs. December, staff would be happy to have that conversation with the funders.

In response to Councilwoman Cape about possible funding options, City Manager Jackson said that (1) the applicable Energy Block Grant funds have been committed, but the ARRA Project Manager will look for other sources of funds; and (2) the Jake Rusher funds are held by the Trust for Public Lands and there is $470,000 available for land acquisition and possibly park development; however, Council shouldn't bank on that entire amount but may need to supplement it with a combination of funds. He would need Council direction if they want staff to follow-up with the Trust for Public Land as well as with other funding sources.

After hearing from Mr. Simmons and Ms. Mathews about the schematic designs and the current bidding climate, Vice-Mayor Davis said that he would really like to see a good facility at the Reid Center and this is a worthwhile project, but we need to be realistic about how much it will cost.

Councilwoman Cape noted that when Council compared the cost of a new building vs. renovation, the new building would be cheaper to construct. We have a community in that area that relies heavily on an active engaged center for our children. We need a safe, healthy and warm place for children to keep them off the streets. We have had a commitment to that area community for a long time to do something. She wanted to see some innovative funding options to fill this gap. She said there are some new funding mechanisms that are available to cities to get good infrastructure loans. She didn't want to walk away from fulfilling some project in this area.

Councilman Mumpower felt that we had an unreliable budget from the beginning and Council can't make good decisions without a reliable budget.

Councilman Mumpower presented the following proposal to reconsider the new Reid Center. He said that the problem is that last year the Council majority committed a half million of City tax dollars to the renovation of the Reid Center. This past winter the Council majority passed a resolution supporting the construction of a new Reid Center on the site of the current ballpark on the corner of Depot and Reid. In May, the majority followed-up with a vote to commit

$250,000 of the roughly $2 Million existing budget for architectural fees. Two weeks ago, the majority voted to return a jeopardized half million grant – reducing the current funds to $1.5 Million. There are several problems associated with these actions (1) $1,250,000 is an inadequate budget for the first (and largest) phase of the proposed project; (2) We are losing a ballpark and will still need action on the existing facility; and (3) The need for a functional facility in this community remains, but the project continues to struggle under unrealistic proposals, budget limitations, and procedural missteps.

Councilman Mumpower's proposal is (1) that the Council majority instruct the City administration to stop action on the new Reid Center site; (2) That the administration be instructed to fast track (90 day) a *plan* for the incremental repair and cosmetic upgrade of the existing Reid Center in a manner that limits code considerations but increases the utility and attractiveness of the facility; (3) That a budget be developed to assure a 3+/- year plan to enhance the existing Reid Center; (4) That the City sponsor a aesthetic design competition for key rooms of the facility and thus borrow from the creative energies of local designers/artists/ citizens who can assist in making cosmetic changes to the facility that assure a long-term, special, affordable, and functional role for the existing Reid Center facility; and (5) That an informal design contest be held to develop visions for the cosmetic improvements of the outside of the building and landscaping of the facility.

He said that incremental repair that does not trigger primary code considerations, and we can use local talent to maximize our limited dollars and make the best of what we have. The Civic Center renovations are one model of incremental improvements without triggering code considerations and the City Hall is another.

In response to Councilman Newman, Mr. Simmons said that for renovations we must meet the Minimum Building Code, but he did not know what triggers that code. One problem with renovation incrementally is that if we do electrical or plumbing work, it has to be the entire building, not one section. The building is in compliance with the Fire Code.

In response to Councilman Newman, Mr. Simmons said that staff's decision came after they looked at the life of the building – an 80 year old structure – and how much money they would have to put in it to make it functionable. We could put a lot of money in it to make it a presentable community center, but it still won't function in the best way to deliver programs and services because it wasn't designed as a community center – it was designed as a school. Even though the square footage is 37,000, there is a lot of square footage that is lost because it's not programming area, just dead space within the building. Even if we renovated the building we still wouldn't be able to take advantage of that square footage and space.

Mayor Bellamy felt the process was flawed. When staff met with the community to refurbish the Reid Center there were some things that should have been in place at that time, but we don't need to go back and rehash that process. But, we can learn from it. She felt that Council needs to understand that we have to stop asking other people to take care of our assets, whether it's the Grove Arcade or the Pack Square Park, or our facilities that are in disrepair. The City should have taken the leadership in repairing the Reid Center, but the community responded with grants. Regarding renovation, the Stephens-Lee Center is an example of a facility that has been in existence for many years, or the Municipal Building. We must take the leadership and say we are going to invest the money to fix up our facilities, in this instance the Reid Center. She said that 7,000 square feet vs. 37,000 square feet is not apples to apples, but it doesn't meet the needs of the community either. If you go to the Reid Center any time of the week you will see the number of children and adults that use that facility. The number of independent uses in that building is significant. She felt it's important not only to complete Phase I, but the entire Master Site Plan and we need a complete timeline for the different phases too. Council needs all information to make an informed decision. She would love to have a new building but the LEED certification by Council is an additional 15% of the cost. That's an example of what needs to be laid out so it's transparent. We need to be committed to start the project and finish it. She felt it

was realistic to say that we will finish the project and find the money, whether through a creative green grant financing or using our bond capacity. We do not want that community to be let down as they say we have done with the Eagle-Market Street area in that nothing has moved forward. She asked Council to stand firm on a commitment to finish what we start. We cannot turn our backs on another project and allow the community to step forward and say we'll do it. The City must take care of their assets in the community. We could have a new Council come in and this might not be their priority. She could not support 7,000 square feet when we have lost ¼ of the funding. She disagreed with the amount of dead space in the 37,000 square foot building. When we looked at refurbishing the building, there was a commitment to utilize every square foot in the building. She felt what's dead is the desirability to complete the project.

Throughout discussion, Mr. Roderick and Ms. Ivester responded to various questions/ comments from Council, some being, but are not limited to: is there a programming enhancement piece associated with the 7,000 square foot new building; what do we get with the new building that may not be offered in the new building; will the gymnasium be added in Phase II; has there been a priority list put for the renovation piece; what risk do we have if we deplete the City's capital reserve fund; when staff spoke with the Eckerd Family Foundation did they get a sense of whether they will contribute to the project or not; was there a problem with the U.S. Dept. of Housing and Urban Development's technical change in the award; what is the status of the effort with the Chamber of Commerce to look at a greenhouse; and what is the status of conversations with UNC-Asheville using the facility, in what phases and at what cost.

Ms. Meg White, former fundraising specialist for the City of Asheville, said that with the work of a committee of 16 people they raised $1 Million, all of the money outlined above except for the Junior League of Asheville money and the U.S. Dept. of Housing and Urban Development money. That $1 Million was to be matched with $500,000 by the City and $500,000 from PARTF. The Eckerd Family Foundation grant was $300,000 but she was not sure if that is still accurate. She noted that $25,000 was also raised by the community – a dinner they hosted, individuals writing $5-50 checks, and pennies collected from the children. She urged Council not to let the community down and build a new Reid Center.

In response to Mayor Bellamy, Mr. Simmons said that his goal is to get Phase I completed and then they can start identifying how much it will cost with the gym since we have the footprint. Then when we do apply for grants we can break ground and start the project right away, instead of using the grant dollars to design the gym. With UNC-Asheville, there are a couple of grants they have identified for an initiative to do some interaction with students coming into the Reid Center to do program space, the greenhouse component, etc. They have been meeting with UNC-Asheville representatives to see what that program would look like. Also, after we reapply for the PARTF grant and, if we are successful with that grant, we will use it for the gym, along with matching money in our Capital Improvement Plan (CIP) process.

Mayor Bellamy felt that staff has not given Council the entire picture of the scope and process of this initiative. Council must have details about funding at every level. Council should be provided information on all the funding partners and what grants they are pursuing. She asked the City Manager to provide Council a clear picture of what is in the architect's purview, what staff is working on in terms of funding sources, what is lacking, and how those funds will be raised. We need to look at where we are with our debt capacity and go after the funding to complete this project.

Councilman Mumpower moved to cease all operations on the development of a new Reid Center, to adjust our contractual arrangements within whatever parameters are set up in those contracts, and to re-direct our efforts to developing a 30-day plan for a 3-year incremental repair and cosmetic upgrade of the existing Reid Center facility using old and current information.

Councilman Russell offered a friendly amendment that we not cease progress, but pause it for 30 days while we look into options of this other proposal.

Councilman Mumpower accepted Councilman Russell's friendly amendment. Councilman Russell then seconded Councilman Mumpower's amended motion.

Upon inquiry of Vice-Mayor Bellamy, Mayor Bellamy said there is no plan in place to pay for Phase II. She wanted Council's commitment to complete the entire project, not just phasing the project on paper.

Vice-Mayor Davis agreed with Mayor Bellamy in that we need a clear direction from staff in how we are going to fund the entire project. The new building makes sense if we can pay for it. If necessary, we can rehabilitate the old facility in increments.

Councilman Russell withdrew his second to Councilman Mumpower's amended motion in that he felt Council should move forward with this project.

In response to Councilwoman Cape, Ms. Mathews said they have prepared a detailed Master Site Plan that shows all phases. They are taking the Phase I component of the Master Site Plan and expanding that into complete detailed drawings and documentation for bidding. She did note that architects do not work alone and what the City is paying is a lot of people working on this project between her office and other consultant offices who are participating in the project.

Councilwoman Cape moved to move forward with Phase I of the Master Plan, with the understanding that we are under-funded at this point, and direct staff to continue to look for other funding options. This motion was seconded by Vice-Mayor Davis.

When Mayor Bellamy asked what happens to Phase II, Mr. Simmons explained that their goal is to finish the Master Site Plan. As we move into the CIP process we will be able to present to Council with Phase II of the project, along with possible funding sources and the amount of money they need in their CIP so we know what the City commitment is even before starting fundraising for the project. We contracted with Mathews Architecture to do a Master Site Plan for the entire site knowing that we will need future elements. We are now doing construction drawings for Phase I because we need to get it out to bid and build it. After we get that moving forward we start to look at Phase II, with staff time identifying the funding sources. Again, his goal is to meet the Phase I deadline and get bids out for construction and then look at how we design Phase II and how much it will cost and build that cost into the CIP budget.

When Mayor Bellamy asked City Attorney Oast what she could do to make that commitment happen, City Attorney Oast said that City Council, in their planning processes, sets the CIP. If Council moves ahead with Phase I, they can give direction that Phase II be brought to Council as appropriate with the funding sources and the other aspects of the project identified.

Mayor Bellamy asked for a friendly amendment to Councilwoman Cape's motion to make sure that there is a commitment that Phase II be brought back to Council with funding sources identified. She wants a commitment to complete the entire Master Site Plan.

Councilwoman Cape accepted the friendly amendment, noting that we have a goal to complete the Master Plan for the whole project and we are going to phase it as opportunities arise and funding options become available.

City Attorney Oast re-stated the motion that staff is directed to move forward with Phase I and that at the appropriate time (whether through the budget process or the CIP process) that Mr. Simmons will come back to Council with more details about Phase II to include funding and implementation.

Councilman Miller suggested the following friendly amendment language "and provide Council with a detailed staging plan complete with estimate costs and funding options as available."

Councilman Mumpower felt that with our 10% unemployment rate, undertaking new capital construction is ill advised. And, we will continue to own 37,000 square feet that we will have to renovate. He suggested that if we drop down our vision and start thinking incrementally, cosmetically and creatively we are not talking about an $8-10 Million proposal. He felt you can take a 37,000 square foot facility and work on it a piece at a time.

The following amended motion made by Councilwoman Cape and seconded by Vice-Mayor Davis carried on a 6-1 vote, with Councilman Mumpower voting "no": Staff is directed to move forward with Phase I (with staff directed to continue to look for other funding options) and that at the appropriate time (whether through the budget process or the CIP process) staff is directed to provide Council with a detailed staging plan, complete with estimate costs and funding options as available.

VI. NEW BUSINESS:

A. BOARDS & COMMISSIONS

At the recommendation of the Boards & Commissions Committee, Councilwoman Cape moved to instruct the City Clerk to prepare the proper paperwork to appoint Ms. Julie Fulwood (representing the business or non-profit sector) and Ms. Teresa Foster-Moorehead (representing the education and the health/medical profession) to the Americans with Disabilities Act Compliance Committee, to each serve a three-year term respectively, terms to expire August 22, 2012, or until their successors have been appointed. This motion was seconded by Councilman Russell and carried unanimously.

At the recommendation of the Boards & Commissions Committee, Councilman Mumpower moved to instruct the City Clerk to prepare the proper paperwork to extend the terms of Mr. Steve Sizemore and Mr. Tom Byers for an additional six months, term to expire February 14, 2010, or until the stormwater and erosion control ordinance has been adopted by City Council, whichever occurs earlier. This motion was seconded by Councilman Russell and carried unanimously.

It was the consensus of Council to interview Bob Patel for a vacancy on the Buncombe County Tourism Development Authority.

It was the consensus of Council to interview Stephanie Weil for a vacancy on the URTV Inc. Board of Directors.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Ms. Angela Smith spoke to Council about a failed stormwater adversely affecting 96 S. French Broad Avenue. Mayor Bellamy referred Ms. Smith to City Manager Jackson, who in turn said that he would investigate the concern and would update Council and Ms. Smith.

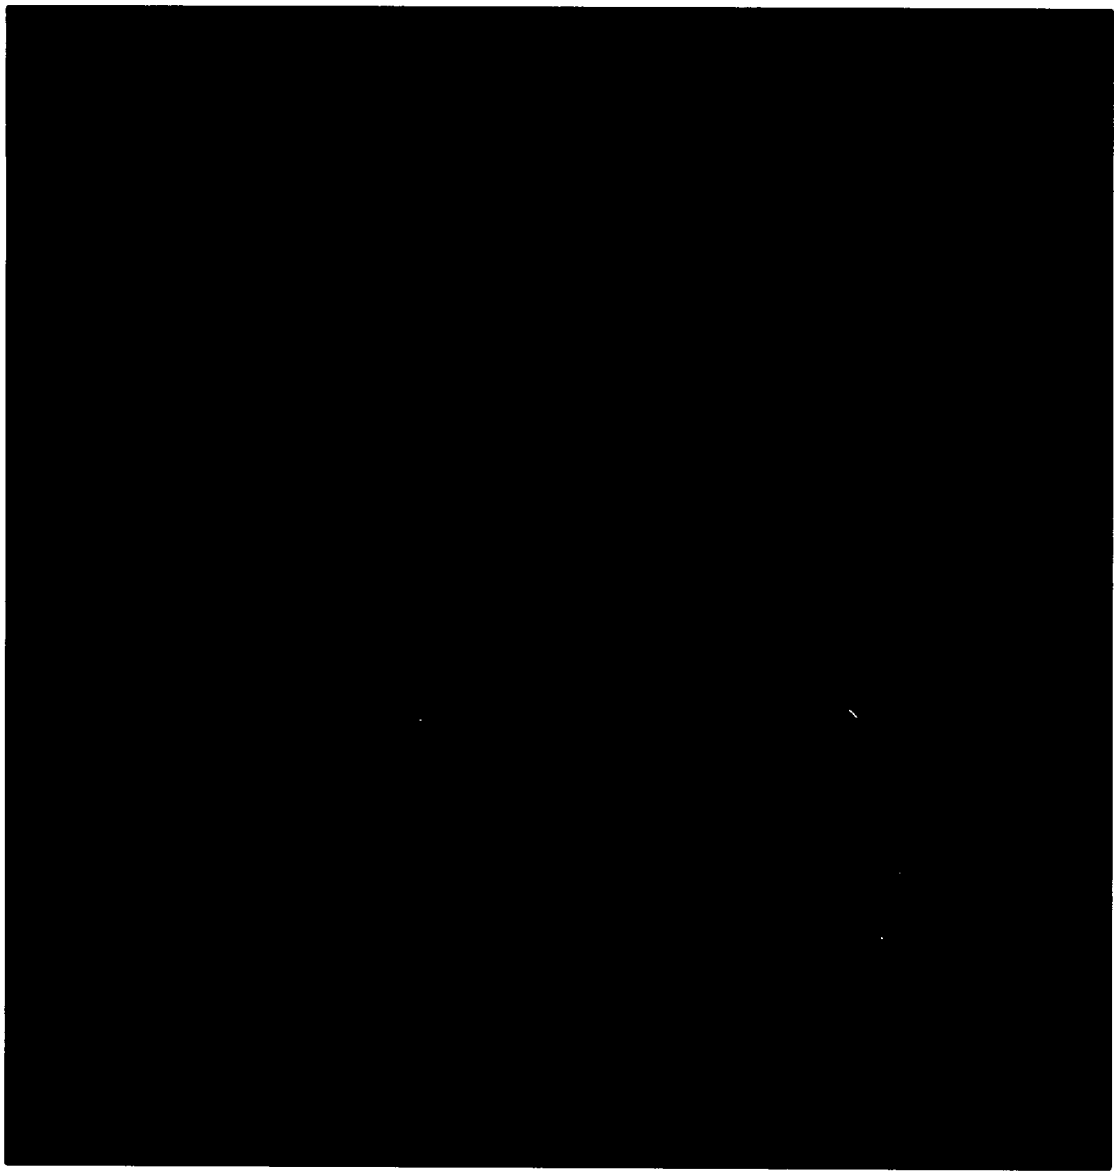
The following claims were received by the City of Asheville during the period of August 14-27, 2009: Doug Chrisawn (Police), Greg Lewis (Water), Stewart Coleman (Streets), AT&T (Water), Lula Mays (Water), AT&T (Water), Ray Quate (Fire) and Donald Taylor (Streets). These claims have been referred to Asheville Claims Corporation for investigation.

VIII. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 9:37 p.m.

Magdalen Burdison
CITY CLERK

MAYOR



BUNCOMBE COUNTY

CITY OF ASHEVILLE

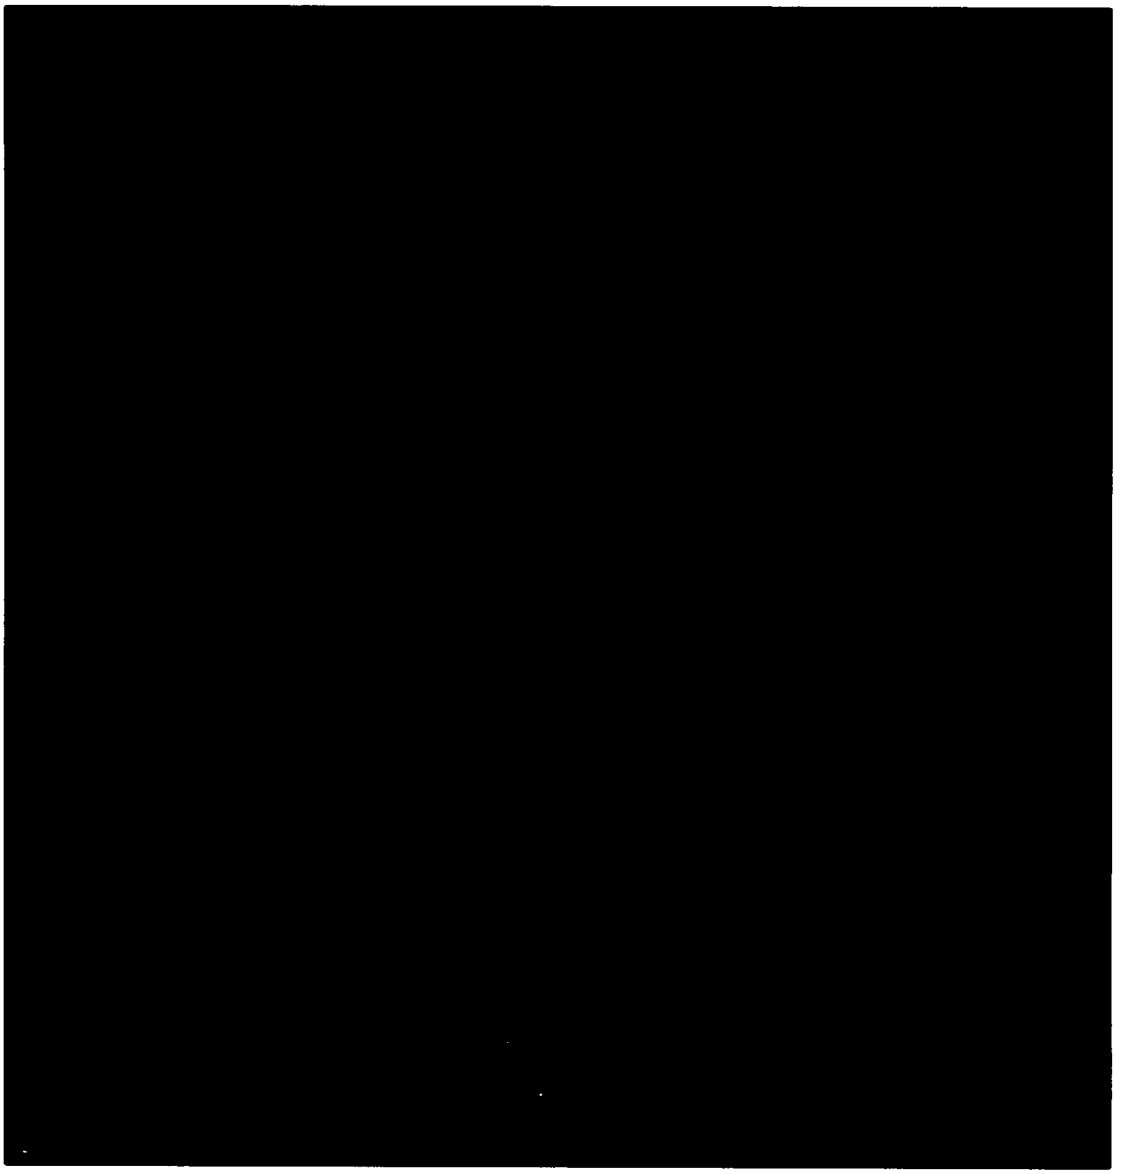
CITY COUNCIL

MINUTES

VOLUME: 86

(SEPTEMBER 22, 2009 – MAY 25, 2010)

(PAGES: INDEX – 525)



2025 Plan - Update on Plan implementation, 244

A-B Community Relations Council - Appted Mike Hahn, 319
A-B Historic Resources Commission - Delayed making appointments till report on membership size, 320

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Jan B. Davis; Councilwoman Robin L. Cape; Councilman Kelly M. Miller; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; Councilman William A. Russell Jr.; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Bellamy led City Council in the Pledge of Allegiance.

INVOCATION

Councilman Miller gave the invocation.

FLOOD UPDATE

Interim Fire Chief Scott Burnette updated City Council on the recent rains. He provided them with information on the impact of the heavy rains and the City's actions. Using graphs, he explained the flooding situation of the French Broad River and the Swannanoa River.

I. PROCLAMATIONS:

A. RESOLUTION NO. 09-201 - RESOLUTION NAMING THE BASEBALL/SOFTBALL COMPLEX AT VALLEY SPRINGS MIDDLE SCHOOL FOR IRBY BRINSON, FORMER DIRECTOR OF ASHEVILLE PARKS, RECREATION & CULTURAL ARTS DEPARTMENT

Mayor Bellamy was pleased to recognize Mr. Irby Brinson, former director of the Asheville Parks, Recreation & Cultural Arts Department. Mayor Bellamy then read the resolution naming the baseball/softball complex at Valley Springs Middle School for Irby Brinson, former director of Asheville Parks, Recreation & Cultural Arts Department, in agreement with the Buncombe County's School Board's approval in January of 2007 naming the baseball/softball complex "The Irby Brinson Athletic Complex".

The baseball/softball complex is located at Valley Springs Middle School which is owned by the Buncombe County Board of Education. In June of 1992, the City and the Buncombe County School Board entered into a 30 year agreement with the Buncombe County School Board wherein the Buncombe County School Board would provide land at Valley Springs Middle School for the purpose of providing athletic fields that the City would fund, install and maintain.

Irby served in several positions in the City of Asheville Parks, Recreation & Cultural Arts Department, most recently as the director for 15 years and until his retirement in 2006. During his tenure, Irby provided leadership and dedication to the operation and delivery of parks and recreation services. He oversaw significant improvements and additions to the park, greenway and facility system; and expansion of a comprehensive recreation, cultural art and fundraising program. His most notable achievement was leading the Department to become the first municipal recreation department in the nation to be accredited under the American Academy for Park and Recreation Administration in 1994, followed by the Gold Medal Award as a department of excellence by the National Recreation and Parks Association in 2002.

The Recreation Board unanimously approved the naming of the baseball/softball complex at Valley Springs Middle School in honor of Irby Brinson at its regular meeting in November 2006. The Buncombe County School Board approved the naming of the baseball/softball complex "The Irby Brinson Athletic Complex" at its regular meeting in January 2007.

Pros:

- Recognize a long-time public servant for his considerable contributions to Asheville in providing parks, facilities and recreation services for all citizens and visitors of Asheville.

Con:

- None

The Recreation Board recommends City Council approve the naming of the baseball/softball complex at Valley Springs Middle School for Irby Brinson, in agreement with the Buncombe County's School Board's approval in January of 2007 naming the baseball/softball complex "The Irby Brinson Athletic Complex".

Mr. Brinson thanked City Council for their support, his family for their understanding, and the thousands of volunteers who worked with him during his service with the City.

When Mayor Bellamy asked for public comment, none were received.

With a standing ovation, Councilman Mumpower moved to adopt Resolution No. 09-201. This motion was seconded by Vice-Mayor Davis and carried unanimously.

RESOLUTION BOOK NO. 32 – PAGE 216

B. RECOGNITION OF GROVE PARK INN SPONSORSHIP DONATION FOR THE 2009 SEASONAL SIZZLE AT SEVEN

ORDINANCE NO. 3785 - BUDGET AMENDMENT FROM THE GROVE PARK INN FOR THE 2009 SEASONAL SIZZLE AT SEVEN

On behalf of the City of Asheville, Mayor Bellamy thanked the Grove Park Inn and Spa for their support again this year for the Seasonal Sizzle at Seven. The City is pleased to have the support of an organization like the Grove Park Inn and Spa and all of us look forward to working with them again this year.

Mr. Ron Morin, Grove Park Inn and Spa Executive Director of Operations, presented the City with a check for $40,000 to fully fund the event. The Sizzle was started last year by the Grove Park Inn and Spa with support from the City to bring people to Downtown Asheville to eat in our great restaurants, to shop in the wonderful stores, and in the end help to support the local economy during the holiday season. This year, Downtown Asheville will be filled with fireworks on during the first three Saturday's in December (December 5, 12, and 19) at 7:00 pm.

Summary: The consideration of a budget amendment, in the amount of $40,000, for a sponsorship donation from the Grove Park Inn Resort and Spa for the 2009 Seasonal Sizzle at Seven.

The Grove Park Inn is donating $40,000 to the City of Asheville to fund the 2009 Seasonal Sizzle at Seven. The 2009 Seasonal Sizzle at Seven is a fireworks show that will take place on Saturday, December 5, 12, and 19 at 7:00 pm in downtown Asheville.

The Seasonal Sizzle at Seven was started in December 2008 as a way to bring people to downtown Asheville to eat in the restaurants and shop in the stores. Local area restaurants and shops will be offering discounts and specials on the evenings of the event.

The funding will fully support the cost of the fireworks and related administrative costs, permit fees, police support, public works support, program enhancements, and marketing.

The City of Asheville will create a stronger, more prosperous community with smart investments that accomplish real, lasting, tangible returns.

Pros:

- Provide full funding for the cost of the event.
- Managed by the City of Asheville Parks, Recreation and Cultural Arts Department.

Con:

- None

The budget amendment will increase the operating budget in the Parks, Recreation and Cultural Arts Department in the Cultural Arts Division for contracted services by $40,000 to fund the Seasonal Sizzle at Seven in December 2009.

City staff recommends City Council to authorize the City Manager to increase the budget for funds received from the Grove Park Inn in the amount of $40,000 to fund the 2009 Seasonal Sizzle at Seven in downtown Asheville.

When Mayor Bellamy asked for public comment, none were received.

Mayor Bellamy said that members of Council have previously been furnished a copy of the ordinance and it would not be read.

Councilman Mumpower moved to adopt Ordinance No. 3785. This motion was seconded by Councilman Miller and carried unanimously.

ORDINANCE BOOK NO. 25 - PAGE 414

C. PROCLAMATION PROCLAIMING SEPTEMBER 28, 2009, AS "FAMILY DAY – A DAY TO EAT DINNER WITH YOUR CHILDREN"

Mayor Bellamy proclaimed September 28, 2009, as "Family Day – A Day to Eat Dinner with your Children" in the City of Asheville.

D. PROCLAMATION PROCLAIMING OCTOBER, 2009, AS "FIRE PREVENTION MONTH"

Vic-Mayor Davis read the proclamation proclaiming October, 2009, as "Fire Prevention Month" in the City of Asheville. He presented the proclamation to Interim Fire Chief Scott Burnett, who briefed City Council on some activities taking place during the month.

E. PROCLAMATION PROCLAIMING OCTOBER, 2009, AS "CRIME PREVENTION MONTH"

Councilman Newman read the proclamation proclaiming October, 2009, as "Crime Prevention Month" in the City of Asheville. He presented the proclamation to Master Police Officer Allen Dunlap, who briefed City Council on some activities taking place during the month.

F. PROCLAMATION PROCLAIMING OCTOBER 4-11, 2009, AS "MENTAL ILLNESS AWARENESS WEEK"

Mayor Bellamy read the proclamation proclaiming October 4-11, 2009, as "Mental Illness Awareness Week" in the City of Asheville. She presented the proclamation to Mr. Jim Pitts, President of the National Alliance on Mental Illness North Carolina, and Ms. Christine Smith, Co-President, who briefed City Council on some activities taking place during the week.

II. CONSENT AGENDA:

At the request of Councilman Mumpower, Consent Agenda Items "C", "F", "G" and "K" were removed from the Consent Agenda for discussion and/or an individual vote.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON SEPTEMBER 8, 2009

B. RESOLUTION NO. 09-202 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ACCEPT GRANT FUNDS UNDER TARGET COMMUNITY RELATIONS PROGRAM

ORDINANCE NO. 3786 - BUDGET AMENDMENT TO ACCEPT GRANT FUNDS UNDER TARGET COMMUNITY RELATIONS PROGRAM

Summary: The consideration of (1) a resolution authorizing the City to accept funds for a TARGET Grant, and (2) the accompanying budget amendment, in the amount of $1,000.

The Asheville Police Department (APD) has been awarded a TARGET grant for 2009, in the amount of $1,000. These funds are to be used for the enhancement of the APD Explorer post through the purchase of uniforms and equipment.

In 2008 APD re-instituted our youth Explorer Program. This program is geared toward involving youth in a hands-on interactive learning about the APD. This program not only educates youth but also instills responsibility by challenging youth to earn supervisory promotions within the unit. Part of this program involves practical training in Law Enforcement skills such as radio communications, traffic stops, traffic directions, etc. Additionally our Explorers are able to compete in Explorer competitions to display the skills they have learned – which includes best dress uniform.

This non-match 100% TARGET grant will aid the APD in furthering our program in the purchase of dress uniforms for our Explorer Post.

This action complies with City Council's Strategic Operating Plan in the Focus Area - Safe - Asheville will be one of the safest and most secure communities when compared to similar cities.

Pros:

- Increasing youth awareness and involvement with APD
- Expanding our positive reach into the communities we serve through youth and their families/friends
- Utilize Explorers to assist APD in special events for traffic control/direction or similar activities

Con:

- None.

There will be maintenance and replacement costs for the equipment that will need to be included in future fiscal year budgets.

City staff recommends City Council adopt (1) the resolution authorizing the City Manager to accept grant funds from TARGET; and (2) the associated budget amendment, in the amount of $1,000.

RESOLUTION BOOK NO. 32 – PAGE 217

ORDINANCE BOOK NO. 25 – PAGE 416

C. RESOLUTION AUTHORIZING THE CITY MANAGER TO ACCEPT GRANT FUNDS UNDER THE N.C. OFFICE OF JUSTICE PROGRAMS OF THE U.S. DEPT. OF JUSTICE FOR THE 2009 EDWARD BYRNE ASSISTANCE GRANT

BUDGET AMENDMENT TO ACCEPT GRANT FUNDS UNDER THE N.C. OFFICE OF JUSTICE PROGRAMS OF THE U.S. DEPT. OF JUSTICE FOR THE 2009 EDWARD BYRNE ASSISTANCE GRANT

These items were removed from the Consent Agenda for discussion and/or an individual vote.

D. RESOLUTION NO. 09-204 - RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN THE RECEIPT, RELEASE AND REFUNDING AGREEMENT TO ACCEPT FUNDS ACCORDING TO THE WILL OF NELL G. BADGETT

ORDINANCE NO. 3788 - BUDGET AMENDMENT FROM THE BADGETT ESTATE FOR THE ASHEVILLE POLICE DEPARTMENT

Summary: The consideration of (1) a resolution authorizing the City Manager to sign the Receipt, Release and Refunding Agreement with the Badgett Estate to accept funds according to the will of Nell G. Badgett; and (2) the associated budget amendment, in the amount of $5,000.

The Asheville Police Department (APD) has received funds according to the will of Nell G. Badgett in the amount of $5,000. These funds are to be used by the APD as needed. The APD has requested that these funds be applied to the APD Community Policing line for the Annual Awards Banquet as a means to honor our employees, citizens and the generosity of Nell Badgett. As condition upon receiving the funds the estate has requested that the agreement be signed indicating that the funds will be transferred to the APD.

This action complies with City Council's Strategic Operating Plan in the Focus Areas – Fiscal Responsibility and Safe.

Pros:

- Acceptance of gift from the Estate of Nell Badgett
- Furtherance of APD Annual Awards Program to recognize employees and citizens in enhancing our community

Con:

- None.

There is no fiscal impact at this time for City Council to approve the resolution accepting funds.

City staff recommends City Council authorize the City Manager to sign the Receipt, Release and Refunding Agreement with the Badgett Estate; and to adopt the associated budget amendment, in the amount of $5,000.

RESOLUTION BOOK NO. 32 – PAGE 219

ORDINANCE BOOK NO. 25 – PAGE 420

E. ORDINANCE NO. 3789 - BUDGET AMENDMENT TO TRANSFER FUNDS FROM THE CAPITAL RESERVE FUND TO COVER CLOSING COSTS INCURRED DURING THE PURCHASE OF LAND FOR A FIRE STATION OFF OF SAND HILL ROAD

Summary: The consideration of a budget amendment transferring $3,566 from the capital reserve fund to cover closing costs incurred during the purchase of land for a fire station off of Sand Hill Road.

Asheville City Council budgeted $250,000 in the Fiscal Year 2006-07 capital improvement budget for the purchase of land off of Sand Hill Road for the purpose of locating a future fire station. During the land purchase closing, additional expense was incurred to conduct an environmental site survey as well as attorney's closing costs. This additional expense will require transferring $3,566 from the capital reserve fund to this project.

This action complies with the Strategic Operating Plan by ensuring financial accountability by matching resources with strategic initiatives.

Pros:

- This budget amendment allows for financial accountability in moving the total funds needed for this project into the project account to reflect the total amount spent for this purchase.

Con:

- Reduces the capital reserve fund by $3,566.

There is currently $180,000 available in the City's capital reserve fund. This amendment will reduce that amount to $176,434.

City staff recommends that City Council approve this budget amendment to transfer $3,566 into this project.

Ordinance Book 25 - Page 422

F. RESOLUTION AUTHORIZING THE CITY CLERK TO ADVERTISE AN OFFER TO PURCHASE PROPERTY OFF MARTIN LUTHER KING JR. DRIVE

This item was removed from the Consent Agenda for discussion and/or an individual vote.

G. RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN A CONTRACT WITH PERRY BARTSCH JR. CONSTRUCTION TO PROVIDE RESTORATION AND REPAIR SERVICES FOR THE WALL STREET AND RANKIN AVENUE PARKING GARAGES

This item was removed from the Consent Agenda for discussion and/or an individual vote.

H. RESOLUTION NO. 09-207 - RESOLUTION APPOINTING MEMBERS TO THE AMERICANS WITH DISABILITIES ACT COMPLIANCE COMMITTEE

Summary: The terms of Bonnie Love (representative from the business or non-profit sector) and Carol Ann Pothier (representative from the education and the health/medical profession) expired on August 22, 2009.

On September 8, 2009, it was the consensus of Council to appoint Julie Fulwood (representative from business or non-profit sector) and Teresa Foster-Moorefield (representative from the education and the health/medical profession) to each serve a three-year term respectively, terms to expire August 22, 2012, or until their successors have been appointed.

RESOLUTION BOOK NO. 32 – PAGE 223

I. RESOLUTION NO. 09-208 - RESOLUTION EXTENDING THE TERMS OF MEMBERS TO THE PLANNING & ZONING COMMISSION

Summary: The terms of Tom Byers and Steve Sizemore expired on August 14, 2009.

At the Planning & Zoning Commission meeting on August 20, 2009, the Commission unanimously recommended that City Council consider extending the terms of Mr. Byers and Mr. Sizemore until the final review of the Stormwater & Erosion Control Ordinance has been adopted.

On September 8, 2009, it was the consensus of Council to extend the terms of Steve Sizemore and Tom Byers for an additional six months, term to expire February 14, 2010, or until the stormwater and erosion control ordinance has been adopted by City Council, whichever occurs earlier.

RESOLUTION BOOK NO. 32 – PAGE 224

J. RESOLUTION NO. 09-209 - RESOLUTION AUTHORIZING THE MAYOR TO EXECUTE A LEASE AGREEMENT WITH WILLIAM S. HARRISON JR. AND CHARLOTTE DE. HARRISON LIVING TRUST FOR REAL PROPERTY LOCATED OFF OF EAGLE STREET

Summary: The consideration of a resolution authorizing the Mayor to execute a Lease Agreement between the William S. Harrison, Jr. and Charlotte D. Harrison Living Trust and the City of Asheville for real property located off of Eagle Street.

The subject property off of Eagle Street, identified as PIN # 9649-50-1164-00000, is owned by the William S. Harrison, Jr. and Charlotte D. Harrison Living Trust and has been utilized by the City for several years as secured parking for police vehicles and outdoor storage. This surface parking lot has a total of 35 parking spaces and is secured by a chain link fence.

The proposed term for this lease is five years, at a rental rate beginning at $1707.00 with annual increases of 3.5%. The City will also be responsible for paying related tenant expenses, including property tax, storm water bills and upkeep. Staff has performed analysis of monthly parking rates in downtown, and found this price point to be consistent with those numbers.

The opportunity to obtain secured parking that is directly adjacent to the City Municipal Building allows the Police Department to park vehicles and utilize outdoor storage that, in turn, supports efforts to improve public safety in downtown.

Pros:

- Optimum location for downtown city vehicle and police parking
- Secured area with fencing

Con:

- None

The fiscal impact will be as follows: (1) Fiscal Year 2010: $20,484 expenditure each year, plus $7,829.25 for property taxes and stormwater; and (2) Beyond Fiscal Year 2010: Additional expenditure to include the base rate of $20,484 per year plus 3.5% escalation per year.

City staff recommends City Council adopt a resolution authorizing the Mayor to execute the lease agreement with the William S. Harrison, Jr. and Charlotte D. Harrison Living Trust on behalf of the City of Asheville.

Mayor Bellamy recognized Mr. Tim Harrison and thanked him for leasing the parking lot property to the City of Asheville for many years.

RESOLUTION BOOK NO. 32 – PAGE 225

K. RESOLUTION AUTHORIZING THE CITY MANAGER TO MAKE PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT A PRIVATE EVENT IN THE PACK SQUARE AREA OF PACK SQUARE PARK FOR WINDOWS ON THE PARK ON OCTOBER 9, 2009

This item was removed from the Consent Agenda for discussion and/or an individual vote.

Mayor Bellamy asked for public comments on any item on the Consent Agenda, but received none.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Vice-Mayor Davis moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Russell and carried unanimously.

ITEMS REMOVED FROM THE CONSENT AGENDA FOR INDIVIDUAL VOTES

C. RESOLUTION NO. 09-203 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ACCEPT GRANT FUNDS UNDER THE N.C. OFFICE OF JUSTICE PROGRAMS OF THE U.S. DEPT. OF JUSTICE FOR THE 2009 EDWARD BYRNE ASSISTANCE GRANT

ORDINANCE NO. 3787 - BUDGET AMENDMENT TO ACCEPT GRANT FUNDS UNDER THE N.C. OFFICE OF JUSTICE PROGRAMS OF THE U.S. DEPT. OF JUSTICE FOR THE 2009 EDWARD BYRNE ASSISTANCE GRANT

Summary: The consideration of (1) a resolution authorizing the City to accept funds for the 2009 Byrne Justice Assistance Grant – Local Solicitation and (2) the accompanying budget amendment, in the amount of $90,560.

The Asheville Police Department has been awarded the Edward Byrne Justice Assistance Grant (JAG) – Local Solicitation. This is a predetermined amount of funds based on the Part 1 Uniform Crime Reporting Crimes. The Asheville Police Department (APD) and Buncombe County Sheriff's Department have been allocated $90,560 with Asheville receiving $64,516 and Buncombe County receiving $26,044. The distribution of funds has been approved through a signed Memorandum of Understanding.

The APD plans to purchase in-car video systems to place in patrol cars. These recordings would generally serve as evidence to be utilized in court for the prosecution of criminal cases. However, these recordings could also be used to aid in resolving allegations of wrongdoing by officers. This would allow for an even greater level of protection of officers and citizens. The digital cameras provide high quality and high resolution video/audio recording of events in and around the patrol car. Recordings such as this help protect the interests of citizens

as well as the interests of police officers. Recordings captured with these cameras could potentially aid in mitigating potential civil liability for the City of Asheville by illustrating in detail the actual events that transpired. The secure evidentiary storage and wireless upload capabilities of the system create a user friendly system that is extremely secure and versatile.

The Buncombe County Sheriff's Department plans to purchase enhanced laser rifle sights and rifle simulator training equipment. Through the purchase of these items the department seeks to improve the confidence, skills and abilities of deputies responding to active shooter situations. These items will serve to enhance a program which already issues rifles to deputies who perform enforcement actions.

There will be an expense of $64,516 by the APD for the in-car video system. The Buncombe County Sheriff's Department will expend $26,044 for the purchase of enhanced rifles sights (laser) and rifle simunition training equipment. This accounts for the total allocation of $90,560 for this Grant.

This is a 100% non-matching grant that will enable the APD to greatly improve the Municipal Building Security and improve the processing of fingerprints and palm prints to compare to those compiled locally.

This action complies with City Council's Strategic Operating Plan in the Focus Area - Safe - Asheville will be one of the safest and most secure communities when compared to similar cities.

Pros:

- Increasing In-Car video will allow for better documentation of police related incidents.
- Increases officer and citizen accountability through recorded interactions.

Con:

- None.

There will be maintenance and replacement costs for the equipment that will need to be included in future fiscal year budgets.

City staff recommends City Council adopt (1) the resolution authorizing the City Manager to accept grant funds through US Office of Justice Programs; and (2) the associated budget amendment, in the amount of $90,560.

Councilman Mumpower was troubled with the dysfunctional court system and felt that the state should use those funds for that purpose and let the City use it's own funds to fund the equipment.

Vice-Mayor Davis moved for the adoption of Resolution No. 09-203. This motion was seconded by Councilman Miller and carried on a 6-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 32 – PAGE 218

Vice-Mayor Davis moved for the adoption of Ordinance No. 3787. This motion was seconded by Councilwoman Cape and carried on a 6-1 vote, with Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 25 - PAGE 418

F. RESOLUTION NO. 09-205 - RESOLUTION AUTHORIZING THE CITY CLERK TO ADVERTISE AN OFFER TO PURCHASE PROPERTY OFF MARTIN LUTHER KING JR. DRIVE

Summary: The consideration of a resolution authorizing the City Clerk to advertise an offer to purchase property off of Martin Luther King Jr. Drive.

A bid has been received from Simon Western Properties, LLC in the amount of $115,000 for the purchase of land off of Martin Luther King Jr. Drive (PIN # 9648-58-8911-00000).

The land off of Martin Luther King Jr. Drive was acquired by the City as part of the East End/Valley Street Community Improvement Program. It is a sloping to steep parcel measuring approximately 0.67 acre±. The parcel has frontage on Martin Luther King Jr. Drive and is appropriate for sale as a residential lot with current zoning RM8. The bid from Simon Western Properties LLC is in the amount of $115,000. We have an appraisal on file prepared by Dry Ridge Appraisal Service, LLC dated August 28, 2009 that estimates the fair market value of the property to be at $115,000. The current bid is equal to the appraised fair market value.

This action complies with the strategic operating plan in that income from the sale of this property will directly benefit the CDBG Program, thus providing funding towards affordable housing.

Pros:

- The sale will be at fair market value as established by the upset bid process.
- It will return property not needed for public use to the tax rolls.
- It will transfer responsibility for maintenance to the private sector.

Con:

- There is no negative impact.

The proceeds from the sale of this parcel will be CDBG Program Income.

Economic Development staff recommends City Council approve a resolution authorizing the City Clerk to advertise an offer to purchase property off of Martin Luther King Jr. Drive.

Upon inquiry of Councilman Mumpower, Real Estate Manager Nikki Reid said that this property was transferred to the City via the Housing Authority and therefore those funds must be circulated back into CDBG fund.

In response to Councilwoman Cape, Economic Development Director Sam Powers said that any possible linkages associated with this property will be reviewed by the Greenway Commission prior to it being brought back for Council final consideration.

Councilman Newman moved for the adoption of Resolution No. 09-205. This motion was seconded by Councilman Russell and carried unanimously.

RESOLUTION BOOK NO. 32 – PAGE 220

G. RESOLUTION NO. 09-206 - RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN A CONTRACT WITH PERRY BARTSCH JR. CONSTRUCTION TO PROVIDE RESTORATION AND REPAIR SERVICES FOR THE WALL STREET AND RANKIN AVENUE PARKING GARAGES

Summary: The consideration of a resolution authorizing the City Manager to sign a contract with Perry Bartsch Jr., Construction to provide restoration and repair services for the Wall Street and Rankin Avenue parking garages.

The City of Asheville owns and operates three parking garages; Civic Center, Rankin Avenue, and Wall Street. The Civic Center garage was built in 1976 and the others were built in 1988. Like any structure, these parking garages deteriorate over time and require restorative maintenance and repairs. This type of work normally consists of waterproofing, concrete repairs, and re-caulking of joints between concrete slabs. The City of Asheville began a multi-year program to accomplish restoration of all three garages in 2007. The restoration work was completed in the Civic Center garage in 2008. City staff recommended, and Council approved, including restoration work on the Wall Street and Rankin Avenue garages in the Capital Improvement Plan for Fiscal Year 2008-09.

During spring of 2009 an engineering firm retained by the City did an assessment of the condition of the Wall Street and Rankin Avenue garages. While they are generally in good repair some moderate restoration and repair work is required in both garages. Requests for bids were sent out and twelve firms responded. The bids were publicly opened on August 18, 2009. The bids ranged from $907,048.64 to $342,921.49. Perry Bartsch Jr. Construction, Asheville, N.C., was the apparent low bidder at $342,921.49. In coordination with an engineering firm retained by the City and an internal review committee consisting of the Interim Transportation Director, Minority Business Outreach Coordinator, and the Parking Services Manager, Perry Bartsch Jr. Construction was determined to be the lowest responsive bidder. Staff is requesting authorization for the City Manager to sign a contract with Perry Bartsch Jr. Construction for an amount not to exceed $377,000.00; $342,921.49 for the contract and $34,078.51 for contingencies. These funds are currently budgeted and do not require further budget action.

This action complies with the City Council Strategic Operating Plan in that it addresses a plan to maintain the City's aging facilities.

Pros:

- Combining the restoration and repair services for both the Rankin Avenue and Wall Street garages significantly reduces the overall cost of the project compared to being accomplished as separate projects.
- Making moderate restoration and repairs now will minimize and/or prevent more costly repairs later and will extend the useful life of the parking garages.

Cons:

- Accomplishing the work on both garages at the same time can be administratively cumbersome but it is not insurmountable.
- Minor customer disruptions may be encountered but should be minimized by performing the work during the slowest part of the year.

Funding was previously approved in the Fiscal Year 2008-09 Capital Improvement Plan.

City staff recommends that City Council adopt a resolution authorizing the City Manager to sign a contract with Perry Bartsch Jr. Construction in an amount not to exceed $377,000.00 for repair and restoration services to the Wall Street and Rankin Avenue parking garages.

Councilman Mumpower was concerned about the City's continued use in what is likely a large percentage of illegal laborers on contracted City projects.

Councilwoman Cape suggested concrete staining in parking garage stairways to make them more inviting.

In response to Councilman Miller, Interim Transportation Director Ken Putnam said that working on both garages at the same time will save the City money on the overall work, but they will still look at options to minimize customer disruptions.

Councilman Newman moved for the adoption of Resolution No. 09-203. This motion was seconded by Councilman Miller and carried on a 6-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 32 – PAGE 221

K. RESOLUTION NO. 09-210 - RESOLUTION AUTHORIZING THE CITY MANAGER TO MAKE PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT A PRIVATE EVENT IN THE PACK SQUARE AREA OF PACK SQUARE PARK FOR WINDOWS ON THE PARK ON OCTOBER 9, 2009

Summary: The consideration of a resolution authorizing the City Manager to make provision for the possession and consumption of malt beverages and/or unfortified wine at a private event on the grass area in the Pack Square area of Pack Square Park on October 9, 2009.

Those Girl, LLC has requested through the Asheville Parks, Recreation and Cultural Arts Department that City Council permit them to serve beer and/or unfortified wine at a private event on the grass area of the Pack Square area in Pack Square Park adjacent to their business, Windows on the Park, located in the Biltmore Building.

Those Girls, LLC have requested a temporary extension of their ABC permit (premise 0016753AJ) from the North Carolina Alcoholic Beverage Control Commission (NCABC) for the date of the event. Event organizers will follow all City policies outlined in the Outdoor Special Event Guide and ordinances regarding alcohol on City property.

This resolution is pending the event organizers receipt of the temporary extension from NCABC and an Outdoor Special Event permit from the City of Asheville.

This action does not comply with the City Council Strategic Operating Plan, nor does it comply with the Parks, Recreation and Cultural Arts Master Plan.

Pro:

- None.

Cons:

- Potential for public safety issues;
- The event is not open to the public.

City staff recommends City Council adopt a resolution authorizing the City Manager to make provision for the possession and consumption of malt beverages and/or unfortified wine for a private event on the grass area in the Pack Square area of Pack Square Park on October 9, 2009, for Those Girls, LLC.

Councilwoman Cape moved for the adoption of Resolution No. 09-210. This motion was seconded by Councilman Newman and carried on a 5-2 vote, with Mayor Bellamy and Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 32 – PAGE 226

III. PRESENTATIONS & REPORTS:

A. ECONOMIC STIMULUS PACKAGE UPDATE

RESOLUTION NO. 09-211 - RESOLUTION AUTHORIZING THE CITY TO APPLY FOR THE LOCAL ENERGY ASSURANCE INITIATIVE GRANT

13

APPLICATION AND AUTHORIZATION TO ACCEPT AND EXECUTE SAID GRANT WITH THE LAND-OF-SKY REGIONAL COUNCIL TO DEVELOP A REGIONAL STRATEGIC FUEL PLAN

American Recovery & Reinvestment Project Manager Brenda Mills said that staff is seeking City Council authorization to apply as the fiscal agent for a grant opportunity through the Local Energy Assurance (LEAP) Initiative for a project that will be implemented by the Land-of-Sky Regional Council to create a Regional Strategic Fuel Plan.

The communities of Western North Carolina share a reliance on outside sources of fuel. In the last five years, the region has experienced fuel shortages, nearly running out of fuel on two occasions. These crises have occurred due to limitations in the fuel infrastructure provided to the region through the Colonial Pipeline. Tropical storms hitting the gulf coast have exposed our vulnerability. While these variables cannot be controlled locally, the region can work together to plan and implement strategies that limit future exposure to fuel shortages.

After the fuel shortage in 2008, Land-of-Sky Regional Council was asked to take advantage of its position as an intergovernmental agency with established partnerships with the region's five county governments and 17 municipal governments to aid in the fuel planning process. Preliminary work occurred in January. In response to NC League of Municipalities Emergency Fuel Use Survey conducted in the fall of 2008, the Land-of-Sky Regional Council hosted a meeting to address the most recent regional fuel shortage. The survey showed that over two thirds of the local governments expressed interest in a regional collaboration to mitigate the effect of future fuel shortages.

The governments all wanted to ensure that emergency services would be able to continue to offer fire protection, ambulance service, and police protection. They hoped a plan could be developed for better communication between municipalities to ensure continuation of services, and they were willing to work together as a region to establish conservation in times of crisis, levels of fuel alters, and other specific details.

A goal of the American Recovery and Reinvestment Act, in part, is to "facilitate recovery from disruptions to the energy supply" and "enhance reliability and quicker repair of outages." The "Local Energy Assurance Planning" (LEAP Initiative) focuses on developing new, or refining existing, plans to integrate new energy portfolios (renewables, biofuels, etc.) and new applications, such as SMART Grid technology, into energy assurance and emergency preparedness plans. The initiative will focus on building local energy assurance capability to allow cities to better coordinate and communicate state-wide, regionally and with one another, on energy security and reliability and related emergency response issues.

Land-of-Sky Regional Council has developed partnerships with municipal and county governments to apply for $210,000 through the LEAP Initiative. The grant will fund the creation of the Regional Strategic Fuel Plan including a regional emergency energy plan, a long-range alternative fuel plan, and local government training curricula focused on fuel emergencies and alternative technologies. The planning initiative will also involve local fuel suppliers, the bio-diesel industry, and representatives from the propane and compressed natural gas industries. The scope of work required to develop the plan will include:

- Analyzing the current fuel infrastructure and assess fuel use;
- Creating a regional emergency fuel plan to unify the energy plans in the five county region;
- Assisting governments without emergency fuel plans in developing a plan;
- Developing a plan to mitigate energy supply disruptions, and
- Establishing a long range plan that incorporated local bio-fuels, electric vehicles, propane, and compressed natural gas to reduce the reliance upon traditional vehicle fuels.

LEAP encourages regional participation and requires a city to be the grant applicant. For this reason, as the largest city in the region, the Land-of-Sky Regional Council has requested that the City of Asheville be the grant applicant and fiscal agent for the grant. The Land-of-Sky Regional Council would manage implementation of the project.

The grant request will be used directly to fund staff to: collect data on fuel storage and use, to analyze and review existing emergency fuel plans, to conduct training on developing emergency fuel plans, to develop a regional emergency fuel plan which unify the emergency fuel plans in the region, and to create a long range plan to assist in the development of a fuel plan that focuses on non-traditional vehicle fuels.

Pros:

- The Regional Strategic Fuel plan will enable the region to better endure a fuel shortage without breaks in vital services such as law enforcement, volunteer and municipal fire protection, and other emergency services.
- The LEAP grant if funded, will give the region the tools to better manage future fuel crisis and mitigate the reliance on fuel from a single source for a more energy independent future.
- Creation of more current or up-to-date energy assurance plans.

Con:

- The City of Asheville will be bear responsibilities as the fiscal agent of the grant for a regional project. This will include ARRA reporting requirements.

This is a 100% non-matching grant.

Staff recommends the adoption of a resolution to apply for the Local Energy Assurance (LEAP) Initiative grant and to allow for the management and implementation of the grant through the Land of Sky Regional Council. Staff also recommends that Council direct staff to develop a Memorandum of Agreement with Land-of-Sky Regional Council to outline role and responsibilities for implementing the project.

In response to Councilwoman Cape, Mr. Keith Bamberger, from the Land of Sky Regional Council, said that they are allowed to use a certain amount of those funds to address programming, specifically for ARRA reporting, and in their detailed budget they do have the City receiving funds to do part of that reporting.

Councilman Mumpower spoke against the City's participation in the economy recovery stimulus package in that the program is based on borrowed dollars that will have to be repaid by our children and grandchildren. He felt there are other creative ways, like an action committee, to achieve the same conclusion.

Vice-Mayor Davis said this item was thoroughly discussed at the Metropolitan Planning Organization meeting and they concluded that there are many small communities who do not have the staff or resources to participate in the committee that Mayor Bellamy arranged last year during the fuel crisis.

Mayor Bellamy said that when there was no gas for our community last year there was an outcry from our community for this not to happen again in the future. She felt this is a step in the right direction to get us in the planning mode and to take care of our citizens in case of an emergency.

When Mayor Bellamy asked for public comments, none were received.

15

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilwoman Cape moved for the adoption of Resolution No. 09-211. This motion was seconded by Vice-Mayor Davis and carried on a 6-1 vote, with Councilman Mumpower voting "no".

RESOLUTION BOOK NO. 32 – PAGE 229

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE CONDITIONAL USE PERMIT FOR THE PROJECT IDENTIFIED AS FLYNN CHRISTIAN HOME LOCATED AT 141 COURTLAND AVENUE TO SUBDIVIDE THE PARCEL CREATING A SMALLER PARCEL FOR THE EXISTING USE

ORDINANCE NO. 3790 - ORDINANCE GRANTING AN AMENDMENT TO THE CONDITIONAL USE PERMIT FOR THE PROJECT IDENTIFIED AS FLYNN CHRISTIAN HOME LOCATED AT 141 COURTLAND AVENUE TO SUBDIVIDE THE PARCEL CREATING A SMALLER PARCEL FOR THE EXISTING USE

City Clerk Burleson administered the oath to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process. This process is the issuance of a conditional use permit, which is a quasi-judicial site specific act. At this public hearing, all the testimony needs to be sworn.

After hearing no questions about the procedure, Mayor Bellamy opened the public hearing at 5:58 p.m.

Mayor Bellamy, Vice-Mayor Davis and Councilman Newman disclosed that they were on Council when the Conditional Use Permit was approved and Vice-Mayor Davis also spoke to neighbors after that that approval. They would, however, consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

City Attorney Oast said that the Authorized Practice Committee of the North Carolina State Bar has issued an advisory opinion that appearing in a representative capacity for a party before a local governmental body in a quasi-judicial proceeding is the practice of law, especially with respect to such aspects of the hearing as examining or cross-examining witnesses, or advocating for legal conclusions or results. This does not prevent persons, including land use professionals, from presenting information or expressing opinions within their knowledge or area of expertise.

Assistant Planning & Development Director Shannon Tuch entered into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Ms. Tuch said that this is the consideration of an amendment to a conditional use permit for the project identified as Flynn Christian Home located at 141 Courtland Avenue in order to subdivide the parcel, creating a small parcel for the existing use.

She said that the original Conditional Use Permit was issued in March 2004. Not too long after the group home was constructed and occupied, the original owners, the Flynn Christian Home, sold the property and all assets to ABCCM who, in turn, leased the group home to Next Steps for Recovery who maintained the approved group home use for the last several years.

The current owners, ABCCM, wish to subdivide the 3.69 acre tract and sell the larger 2.63 acre tract to Next Steps while retaining the smaller tract, which would be a little over 1 acre. The property line would follow the approximate center line of the existing natural drainage (Aerial Map – Attachment to City Exhibit 3). Tract A is proposed to contain the entirety of the existing group home development along Courtland Avenue and would consist of 2.63 acres that supports the three separate structures. Tract B, facing Houston Street, would consist of 1.06 acres and is proposed to remain vacant (Site Plan – Attachment to City Exhibit 3).

The current owners, Asheville-Buncombe Community Christian Ministry (ABCCM), wish to subdivide the existing 3.69 acre tract to allow for the sale of the majority of the tract to their current tenants Next Steps to Recovery who intend to continue the operation of the existing group home facility. No immediate plans for development are proposed for the remaining tract of land although the proposed subdivision, if approved, would create a conforming lot that would support a variety of uses allowed in the RS-8 zoning district. This request does include the removal of the newly created lot from the Conditional Use Permit Master Plan to allow future development to proceed without public review. All residents within 200 feet of the property boundary were notified for both the Technical Review Committee (TRC) meeting and the City Council hearing. Approximately six individuals called to inquire about the notification prior to the TRC meeting but generally seemed satisfied upon learning the extent of the proposal – there were no members of the public in attendance at the TRC meeting.

In 2004, the Conditional Use Permit Master Plan included the entire lot and specifically identified the natural drainage area as an effective buffer between any activity on the subject property and the adjacent single family neighborhood on Houston Street. Consequently, any changes to the site plan including a simple subdivision, would necessitate an amendment to the existing Conditional Use Permit (CUP) and site plan.

Although no new development is proposed at this time, because a subdivision is a type of land division for the purpose of sale or development, it was necessary to bring this before Council for consideration.

If approved, the resulting lot would be a conforming lot and could be further subdivided for a variety of purposes, the most common of which is single family development since the property is zoned RS-8.

The proposal is to remove the new smaller tract from the Master Plan; however, if there is concern over potential future development on the new tract (which can include other non-residential uses normally allowed in a residential district), the approval could be conditioned to allow the subdivision but retain the two lots within the approved Master Plan which would require additional notification and Council consideration if or when new development is proposed. It could also be conditioned to require that anything other than single family development be required to return for new consideration.

This project was approved with conditions by the TRC on August 17, 2009. No members of the community expressed opposition to the proposed subdivision.

City Council must take formal action as set forth in Section 7-5-5(e)(3) of the Unified Development Ordinance (UDO), and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise

17

appearing in the record of this case pursuant to Section 7-16-2(c). Staff's review indicates that all seven standards are met as proposed in the site plan.

1. **That the proposed use or development of the land will not materially endanger the public health or safety.**
   The project will meet State building code requirements and has been reviewed by the Technical Review Committee to ensure compliance with technical and safety requirements. No new development is being proposed at this time; however, any subsequent development proposals on the group home property would require a detailed review by both the TRC and City Council while any new development proposals for the subdivided tract would require compliance with basic technical standards.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.**
   At this time, no development is being proposed; however, the proposed subdivision would create a conforming lot that could support up to eight separate single family home lots or other uses allowed in the RS-8 zoning district with adequate access. It is worth noting that the existing topography and other site constraints may limit density to a number lower than what can theoretically be supported by the acreage and existing frontage. Single family development would be reasonably compatible with natural features of the site and typical of much development in the Montford neighborhood.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.**
   As previously noted, no development is proposed at this time; however, development typically found in the RS-8 zoning districts would not be expected to adversely impact the value of adjacent property.

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.**
   As previously noted, no development is proposed at this time; however, development typically found in the RS-8 zoning districts should be harmonious with the scale, bulk, coverage, density and character of the neighborhood in which it is located.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.**
   *This proposal supports the **Asheville City Development Plan 2025** smart growth goal of infill development by allowing a subdivision of a large urban parcel for the purpose of sale or development. Additionally, this proposal will provide an opportunity for compatible residential development in an underdeveloped portion of an established neighborhood which supports one of the City Council's Strategic Operating Plan priorities of sustainability.*

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.**
   The proposed development is located near transportation facilities and other utilities appear adequate. The project area is located within walking distance of downtown, near major road facilities, interstate connections and very near the bus line that serves Montford with bus stops nearby. Preliminary review by other utility providers has not revealed any problems for serving future development in this area.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.**
   No development is proposed at this time that would affect traffic congestion. Nevertheless, preliminary review of potential future development has not identified any potential problems with traffic congestion or hazards.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Pros:

- Provides the opportunity for future infill development in an underdeveloped part of the neighborhood.
- Removing the newly created lot from the CUP Master Plan would facilitate future development.

Cons:

- Would remove the newly created lot from the Conditional Use Permit Master Plan – future development would not be required to gain approval from the City Council and adjacent property owners would not be notified or provided opportunity for public input.
- Maximizing development opportunities on the property where extreme topography and other site constraints exist could result in heavy impacts to the site.

Staff recommends approval of the proposed subdivision.

All residents within 200 feet of the property boundary were notified for both the TRC meeting and the City Council hearing. Approximately six individuals called to inquire about the proposal but generally seemed satisfied upon learning the extent of the proposal.

Should the community express concern over potential future development, Council may modify the proposal to retain the inclusion of the newly created lot in the original CUP Master Plan so that the compatibility of any future development could be insured through a public notification and review process.

When no one from the public spoke, Mayor Bellamy closed the public hearing at 6:05 p.m.

Councilman Mumpower spoke against this action in that he recalled when the matter originally came before Council they struggled to create a plan that protected the neighborhood. He now felt Council is stepping away from that assurance.

Ms. Tuch briefed Councilwoman Cape in the original CUP approval and why the original Master Plan was not completed.

Councilwoman Cape was interested in what other uses were allowed in the RS-8 District, other than residential, and read the uses from the Code of Ordinances.

There was a brief discussion, initiated by Vice-Mayor Davis, about the distinction of a group home vs. a family care home. She said that all group homes in residential districts are required a CUP and those are not too difficult to monitor. We do have a number of group homes; however, that are grandfathered and it is much more difficult to monitor those because we don't have the same information available. Regarding family care homes, staff is trying to better monitor those and to make sure they comply with all applicable standards.

In response to Mayor Bellamy, Ms. Tuch said that should the amendment for changes to the family care home standards be adopted by Council later during the meeting, then a family

care home would not be possible anywhere on that property because part of that amendment includes a 600 feet separation requirement between family care homes and group homes. Because we have the presence of both a family care home and a group home within that 600 feet separation that is being proposed, it would not be possible to add another one.

Mayor Bellamy said that in the past there have been illegal activities in this area because there are no people there to keep an eye on that part of the community. Allowing single-family development homes will help alleviate that concern and will also help to slow traffic down.

Councilman Newman moved for the adoption of Ordinance No. 3790, granting an amendment to a conditional use permit to the allow for the subdivision of land into two parcels (subject to the conditions recommend by City staff), with the condition that the two lots remain within the approved Master Plan and anything other than single family development on the smaller 1.06 acre RS-8 parcel be required to return to Council for new consideration. This motion was seconded by Councilman Miller and carried on a 6-1 vote, with Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 25 - PAGE 424

B. PUBLIC HEARING TO CONSIDER AMENDMENTS TO THE UNIFIED DEVELOPMENT ORDINANCE TO RESPOND TO THE CURRENT ECONOMIC CLIMATE

ORDINANCE NO. 3791 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO RESPOND TO THE CURRENT ECONOMIC CLIMATE (SITE COMPLIANCE REQUIREMENTS: BUILDING RENOVATION COSTS AND PARTIAL PARKING LOT IMPROVEMENTS)

ORDINANCE NO. 3792 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO RESPOND TO THE CURRENT ECONOMIC CLIMATE (TEMPORARY USES AND STRUCTURES)

Ms. Kim Hamel, Technical Review Manager, said that this is the consideration of ordinances amending the Unified Development Ordinance (UDO) to respond to the current economic climate. This public hearing was advertised on September 11 and 18, 2009.

Mayor Bellamy opened the public hearing at 6:24 p.m.

This proposed set of amendments is designed to promote economic growth for businesses and smaller economic endeavors while ensuring that city adopted goals and policies are maintained and preserved.

At the beginning of the year staff began evaluating the UDO to identify development processes, standards and compliance issues that could be amended to encourage and foster economic development opportunities. To date, the Planning and Zoning Commission and City Council have supported and approved more than 15 amendments to the UDO. In addition, staff was encouraged to continue identifying potential code amendments that would further assist in providing economic relief without sacrificing standards of quality development that are important to the citizens of Asheville. Prior to each formal recommendation, the staff has held meetings with neighborhood representatives, members of the business community and other stakeholders to ensure that each party's concerns are taken into consideration in drafting the proposals.

The current proposals are based upon comments received at the Developers Forum Meeting in May and from various community members and business owners wishing to pursue or expand upon a variety of permanent and temporary business ventures. Each amendment has

been evaluated to ensure that the goals and objectives of the City Council, the UDO, and other technical requirements necessary to satisfy life safety standards have not been compromised.

1. ***50% Cost of Renovation Standard*** - A number of business owners have expressed concern over a UDO requirement that relates to building renovation projects. Currently the ordinance requires a site to come into compliance with the development standards of article XI (parking, loading, landscaping, buffering, open space, traffic management and sidewalks) when the proposed cost of a renovation to an existing structure exceeds 50% of the tax accessed value of the building. Some developers/property owners feel that this requirement discourages renovation and improvement to existing structures, particularly for those improvements that may be considered necessary for maintenance and that would not contribute significantly to the value of the structure over time.

   Intent: The intent of this requirement is to provide a standard threshold for requiring non-conforming sites to be brought into compliance with the design and technical standards of the UDO.

   Proposal: Raise the threshold for the cost of renovation amount from 50% to 75% of the tax assessed value of the building; and add a definition for *Renovation Costs* to provide clarification as to the type of construction improvements that are to be included when determining when a project must comply with this standard.

   Relevant Code Sections: 7-11-1(3) - General; 7-11-3(1)d. – Landscape Buffering Standards,7-11-8(b)(4) – Sidewalks, 7-11-9(b)(2) – Emergency Wireless Communications, 7-5-9(c)(1)e. – Level One Site Plan Review Process, 7-17-2(b) – Dimensional Nonconformities, 7-2-5 – Definitions

   Pros:
   - Supports a number of City adopted goals and objectives including: smart growth policies, adaptive reuse, and sustainable development ;
   - Brings noncompliant structures into compliance with current building codes which often incorporate enhanced sustainable and green features;
   - Responds to the increased costs of construction and materials by reducing some of the financial burden (site improvements) to business owners.

   Cons:
   - Existing nonconforming properties will remain noncompliant until a cumulative threshold of improvements (over a 3 year period) reaches 75 percent;
   - May result in a reduction of new public sidewalks and sidewalk connections between existing developments; and
   - May delay landscape improvements including: buffers between dissimilar zoning designations, street tree enhancements, and parking lot landscaping.

   Note: The proposed 75% threshold only applies to article XI (Development and Design Standards) and not to article XII (Environmental Protection Standards). The 50% substantial improvement threshold will remain for properties located in flood hazard areas. This number cannot be adjusted without violating the City's qualification for participation in the federal flood insurance program, which is a FEMA program.

   In order for the City of Asheville to qualify for the FEMA program, it must maintain an ordinance that is at least as restrictive as the State's model ordinance. Both the State's model ordinance and the City of Asheville's local ordinance specify a minimum 50% threshold.

2. ***Parking Lot Improvements*** - Currently the ordinance is unclear and could be interpreted to mean that whenever any existing unpaved parking lot is repaved, or whenever any existing paved lot is demolished and repaved, the entire site must be brought into

21

compliance with article XI (parking, loading, landscaping, buffering, open space, traffic management and sidewalks if applicable).

Intent: The intent of this requirement is to provide a standard threshold for requiring non-conforming sites to be brought into compliance with the design and technical standards of the UDO.

Proposal: Create a new subsection that addresses partial parking lot improvements for projects that disturb less than 50% of an existing parking field. The new requirement creates standards that allows for an incremental improvement of the parking field that is determined by the location and amount of land disturbance occurring on site.

Pros:

- Provides clarity to existing standards by creating a separate set of standards that address partial parking lot improvements;
- Allows for incremental improvements to parking fields versus full site compliance, ultimately reducing the financial burden to businesses wishing to improve and enhance existing noncompliant parking lots; and
- Encourages redevelopment of unimproved parking areas that would otherwise not be improved due to the cost of exterior site enhancements.

Cons:

- Will allow extended delay in compliance with applicable UDO standards for sites that are currently deemed nonconforming.

Relevant Code Sections: Section 7-11-1- General and Section 7-11-3(b)(1) – Landscape and Buffering Standards, Applicability

Note: As part of this amendment staff has proposed to eliminate duplicate references regarding the types of development projects that require full site compliance. The ordinance places all the applicable standards into one location at the beginning of article XI. Additionally, while evaluating sections of the UDO to be amended in order to reflect the above proposals (items 1 and 2) staff discovered that several sections in article XI referencing sections in article XVII had been omitted in error as part of a prior code amendment. As a result staff has restored those sections to their appropriate location (referenced below).

Relevant Code Sections: 7-17-2(c) and 7-17-3(c) concerning "overcoming presumption of cessation of use."

3. ***Temporary Uses*** – The current ordinance provisions addressing temporary uses and structures are difficult to administer due to provisions that are incomplete and/or unclear. Additionally, the current regulations are often limiting to those wanting to set up temporary uses as a means of generating income. The Planning and Development Department is seeing increased interest in the establishment of temporary uses in recent months, which are likely related to current economic conditions. The proposed ordinance revision will provide a means of allowing for more temporary uses while clarifying the requirements for such uses.

Intent: The intent of this ordinance revision is to allow more temporary uses and clarify requirements for such uses.

Proposal: The ordinance completely revises the section of the UDO addressing temporary uses and structures. It divides temporary uses into those that require obtaining a permit and those that must meet standards but do not have to go through the process of obtaining a permit. The draft provides for a more comprehensive listing of

temporary use situations and allows temporary uses to be located on vacant lots as appropriate. The ordinance provides regulations for signs for temporary uses and allows factory fabricated buildings to be used for institutional uses other than schools.

Pros:

- Provides clarity to standards for temporary uses;
- Allows more temporary uses to be established without a permit;
- Expands opportunities and time allowances for temporary uses; and
- Simplifies the regulation of temporary uses.

Cons:

- May delay permanent development of vacant parcels that are revenue generating.

These proposals were shared with the Coalition of Asheville Neighborhoods (CAN) at their meeting on July 13, 2009. Some expressed concerns with item #1 (*50% Cost of Renovation Standard*) and asked for clarification as to how the cost of a renovation project (provided by the applicant) is verified. The Building Safety Department evaluates construction costs using generally accepted construction cost estimating practices that includes a staff verification that the application cost provided by the application meets or exceeds the International Code Council's square foot construction costs.

On Wednesday, September 2, 2009, the Planning and Zoning Commission reviewed the proposals and recommended approval of all three amendments by a unanimous vote (6-0).

Collectively, these amendments may encourage some additional or small scale development or redevelopment without increasing a need for service. Fiscal benefits include those typically associated with new development or redevelopment but actual benefits cannot be predicted.

City staff recommends approval of the code amendments as proposed.

Mayor Bellamy closed the public hearing at 6:29 p.m.

At the request of Vice-Mayor Davis, and with the consensus of Council, City Manager Jackson was directed to revisit landscaping requirements in parking lots.

Mayor Bellamy said that members of Council have been previously furnished with copies of the ordinances and they would not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 3791 (site compliance requirements: building renovation costs and partial parking lot improvements). This motion was seconded by Councilman Russell and carried unanimously.

ORDINANCE BOOK NO. 25 – PAGE 430

Councilman Mumpower moved for the adoption of Ordinance No. 3792 (temporary uses and structures). This motion was seconded by Councilman Russell and carried unanimously.

ORDINANCE BOOK NO. 25 – PAGE 435

C. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE TO PROVIDE A SEPARATION REQUIREMENT FOR FAMILY CARE HOMES

ORDINANCE NO. 3793 – ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO PROVIDE A SEPARATION REQUIREMENT FOR FAMILY CARE HOMES

Mayor Bellamy opened the public hearing at 6:36 p.m.

Assistant Planning & Development Director Shannon Tuch said that this is the consideration of an amendment to the Unified Development Ordinance to refine the City's existing standards for family care homes, along with the consideration of a new requirement that would require a minimum distance between family care homes and between group homes and family care homes. This public hearing was advertised on September 11 and 18, 2009.

While this amendment is simple in its form it required a fair amount of research. Particularly challenging was understanding the relationship, or more often, the lack of relationship between the State's social services system and State statutes and our local ordinances. Contributing to this confusion is the Federal laws that address discriminatory practices against special populations. She then summarized what we have come to understand:

- The Federal Fair Housing Act defines "disability" as any physical or mental impairment that substantially limits one or more major life activities. This ends up including a host of impairments including those recovering from substance abuse.

- The NC State statutes also defines "person with disabilities" as someone who suffers from a temporary physical, emotional, or mental disability including but not limited to .... This definition does not specifically identify persons recovering from substance abuse as does the Federal definition; however, it does not exclude it either.

- The State and the City of Asheville include definitions of family care homes defined as a home with support and supervisory personnel that provides room and board, personal care and habilitation services in a family environment resident persons with disabilities. The state allows a cap on the number of residents but Asheville has not included a cap in the past.

- The Federal Fair Housing Act and our State Statutes establishes that family care homes are considered a residential use and they shall be a permissible use in all residential districts of all political subdivisions and that it is illegal to discriminate against them or prohibit them in residential districts. This includes homes designed to support those individuals who are in recovery programs, provided they meet all the other requirements.

What the State statute does allow is for local ordinances to require a separation between family care homes. Asheville has not previously taken advantage of this option; however, we are beginning to experience some community issues in association with the clustering of these homes that we feel it is worth considering.

- The state statute allows up to a ½ mile separation (which is 2,640 feet) which we felt was quite large and would likely render a number of the existing homes as being non-conforming. As an alternative, we are proposing a 600 foot separation which is what is currently required between group homes. It seemed to serve us well for Group Homes so we thought it appropriate for family care homes as well where the intensity of activity is usually not as significant. As a point of reference, in an average urban neighborhood, 600 feet is about 10-12 lots away from the subject property.

- Also included in this amendment is a revised definition of family care homes which is proposed to be broader and include homes in Asheville that had previously escaped classification as family care homes.

24

- The easiest way to separate family care homes from other residential applications is to identify them as a Use by Right, subject to special requirements. However, all Use by Right applications are limited in respect to being able to obtain variances. They simply are not eligible for variances, so we are also including an exception that would allow family care homes to receive a variance similar to any other residential structure; however, variances to the separation requirements may not be considered unless there is significant land forms that separate the homes.

- We've also added a standard to require a separation between family care homes and group homes since they have similar impacts.

- We have taken this opportunity to clarify a parking standard that had been addressed through a long-standing interpretation. They clarified that they are not allowing parking in any setbacks and they expect the parking to be typical of what occurs in a normal residential district.

This action complies with the City Council Strategic Operating Plan in that it provides for the long-term stability and *sustainability* of a neighborhood by maintaining a controlled amount of housing for a select population while preserving (often *affordable*) housing opportunities for working families. Lastly, maintaining the integrity of a residential neighborhood has been commonly linked to providing a stable and *safe* family environment.

Identifying either a need for an increase in the supply or, the need for controlling the proliferation of family care homes in residential neighborhoods, is not specifically identified in other adopted plans; however, the Asheville City Development Plan 2025 places value on the preservation of the character of our existing neighborhoods.

The Planning & Zoning Commission initially reviewed this amendment at their July 23, 2009, meeting where the amendment received support by a vote of 4-1. Additional information was received by the staff after the meeting, and rather than proceeding directly to City Council for consideration, staff felt it valuable to further refine the proposal, which returned to the Commission's September 2, 2009, meeting. The revised proposal, with certain modifications, was approved 6-0.

Pros:

- Limits destabilization of neighborhoods that are typically more vulnerable – may help control resident turnover.
- Maintains housing stock for working families.
- Provides more flexibility and options than what can be exercised under state statute.

Cons:

- Reduces the flexibility and opportunity for establishing new housing for a protected class of citizens.

City staff recommends that City Council adopt the ordinance adding a separation requirement along with the other adjustments to the existing standards.

The following individuals spoke in support of the ordinance amendment, particularly the separation requirement, primarily due to the saturation of group homes in the area of Broad Street and Madison and parking:

Ms. Lisa Lore
Mr. Heath Moody
Ms. Jennifer Lapidus
Mr. James Fisher

25

Mr. Alan Ditmore

Mayor Bellamy closed the public hearing at 6:57 p.m.

There was a brief discussion, initiated by Councilman Mumpower, regarding whether a 600 feet separation is adequate.

City Attorney Oast pointed out that one of the responsibilities that we have as a community is to ensure the availability of housing for people who don't have the same options as everyone else does. Although there are separation requirements as far as ½ mile, one of the things that 600 feet separation does is to ensure they are not adjacent uses, but yet the houses do remain relatively available for accommodations for people with disabilities.

In response to Councilwoman Cape regarding parking, Ms. Tuch explained that for family care homes we can only require what we would normally require for a single-family home or any other residential unit.

Ms. Tuch explained to Councilwoman Cape what would happen if a group home is sold.

In response to Councilman Miller, Ms. Tuch said that any sale or pending sale would fall under this new ordinance, if adopted.

Mayor Bellamy asked that staff provide Council with a memorandum or e-mail, not on the agenda, on this issue in six months to see the number of applications or violations.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Russell moved for the adoption of Ordinance No. 3793. This motion was seconded by Councilman Mumpower and carried unanimously.

ORDINANCE BOOK NO. 25 – PAGE 443

At 7:07 p.m., Mayor Bellamy announced a short recess.

D. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE TO ADD ADDITIONAL USES TO THE INDUSTRIAL AND LIGHT INDUSTRIAL ZONING DISTRICTS

ORDINANCE NO. 3794 – ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO ADD ADDITIONAL USES TO THE INDUSTRIAL AND LIGHT INDUSTRIAL ZONING DISTRICTS

Mayor Bellamy opened the public hearing at 7:28 p.m.

Assistant Planning & Development Director Shannon Tuch said that this is the consideration of an amendment to the Unified Development Ordinance to add additional uses to the Industrial and Light Industrial Zoning Districts. This public hearing was advertised on September 11 and 18, 2009.

Since 2005 there have been five separate rezonings of industrially zoned land in the City's zoning jurisdiction. These rezonings led to conversations with the Council, and the Council's Planning and Economic Development (PED) Committee regarding the status of the City's industrially zoned land. The PED members asked the staff to evaluate these rezoning and make recommendations regarding these zones if warranted. An evaluation of these rezonings

revealed that the circumstances of the requests were distinct and unique. The following is a brief summary of the five separate rezonings:

- On October 12, 2005, City Council voted to approve a rezoning of roughly 31 acres off of Dogwood Road in Candler from Industrial to RS4 requested by the property owner in order to sell the property to a prospective residential developer. In this instance, staff didn't see a compelling case for the rezoning and had recommended denial.

- On May 23, 2006, City Council voted to approve a rezoning of approximately 1.5 acres of land at 1301 Sand Hill Road from Industrial to Community Business II. This small rezoning was to allow a credit union that had existed at the American Enka/BASF/Colbond plant for many years to upgraded and be brought into compliance.

- On July 10, 2007, City Council approved a rezoning of approximately 37 acres from Industrial to RM16 for an area on the eastern edge of the Biltmore Lake community. Analysis of this area showed that the challenging terrain, presence of streams, power lines, and limited access made it poorly suited for an industrial tenant.

- On January 13, 2009, City Council approved a rezoning of approximately 178 acres on the American Enka/BASF/Colbond site from Industrial to Commercial Industrial (a zone with a broader mix of uses allowed). The collective decision was that this large former industrial site stood a better chance at rehabilitation and reuse if a mix of industrial, office, retail, and medical uses was made available to developers.

- On June 23, 2009, City Council approved a rezoning of approximately 23 acres from Industrial to Commercial Industrial at the former Square D site to accommodate a series of new tenants. In this case, an adjustment of the Industrial zoning district to allow larger fractions of a site to be used for office or retail, or adding call centers as a permitted use might have prevented the request for a rezoning, although this site is no longer ideally located for heavy industry given its location removed from a major highway.

In all of these instances, the staff report noted that the City's Comprehensive plan and the Lockewood-Green economic report recommend preserving industrially zoned property for industrial uses and to resist rezoning (downzoning) efforts; however, all five requests were ultimately granted for the rational reasons noted. But the zoning changes have raised questions about the land use goal of preserving industrially zoned properties. These concerns were discussed by the Council during the hearing on June 23rd and were examined in more detail at the meeting of the Planning & Economic Development Committee (PED) on August 12, 2009.

In answer to the expressed concerns, both during the hearing and again during the PED Committee meeting, the staff recommended preserving the land use goal of retaining industrially zoned land but adding some additional flexibility to the uses allowed in the Industrial and Commercial Industrial zoning districts. The staff believes that adding this flexibility will reduce the need for similar requests in the future.

In summary, this amendment proposes to add a limited amount of office and retail uses to both Industrial and Light Industrial Districts. The proposal, if adopted, would allow up to 20% of a building in the Industrial zoning district to be used for office and up to 10% of the building for retail. The allowances are higher in the Light Industrial zoning districts with up to 20% to be used for retail and up to 50% for office.

The staff recommends adding some office and service uses (to support the employees of the industrial sites) along with other limited office uses; limited retail; call centers and concrete plants. She then explained in detail the thought process that staff used to recommend the additional of concrete plants.

27

This action complies with the City Council Strategic Operating Plan in that it supports the goal of *sustainability* by preserving opportunities (land inventory) for new industrial uses while encouraging some adaptive re-use by offering additional flexibility in uses not formerly available. In addition, this action complies with the Asheville City Development Plan 2025 (Comprehensive Plan) by retaining the land use goal of preserving industrially zoned properties.

This proposal was reviewed by the Planning & Zoning Commission at their September 2, 2009, meeting where the item was supported unanimously by a vote of 6-0.
Pros:

- Preserves the opportunity for new (cleaner, green) industrial uses
- Allows for more flexibility within the current zoning classifications to encourage adaptive re-use and a range or mix of uses

Con:

- --Does not address all the circumstances and trends identified in the five recent rezonings

There is no direct fiscal impact, however, preserving manufacturing and other industrial opportunities supports a sound local economy.

City staff recommends City Council adopt the amendment to the UDO to add uses to the Industrial and Light Industrial zoning classifications.

The following individuals spoke in support of adding concrete plants to the proposed ordinance:

Mr. Tony Hauser, Civil Engineer
Mr. Dan March, representing Environmental Services Inc. (presented Council with information developed by the WNC Alliance with responses by American Concrete)

Mr. Alan Ditmore suggested there be no limit on the percentages for retail and office uses.

At 7:43 p.m., Mayor Bellamy closed the public hearing.

Vice-Mayor Davis said that Buncombe County has a local responsible agency of the WNC Regional Air Quality Agency that permits and monitors facilities such as this.

Ms. Tuch responded to Councilwoman Cape regarding the locations of the Industrial and Light Industrial districts are located in the City.

Councilwoman Cape said that we need a balance of property and opportunities for people in the community.

Councilman Miller supported products like concrete plants being more accessible within the City of Asheville for economic reasons.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 3794. This motion was seconded by Vice-Mayor Davis and carried unanimously.

28

V. UNFINISHED BUSINESS:

A. ORDINANCE NO. 3795 - ORDINANCE PROHIBITING THE TETHERING OF DOGS WITHIN THE CITY LIMITS

Assistant City Attorney Curt Euler said that this is the consideration of an ordinance prohibiting the tethering of dogs within the City limits.

On Tuesday April 28, 2009, the City Council adopted a revised animal control ordinance. On May 26, 2009, the City Council held further hearing regarding the prohibition of tethering dogs within the City Limits. At the May 26, 2009, hearing, Council directed staff to work with ChainFree Asheville develop an ordinance for consideration.

Tethering is the practice of securing a dog by chain, rope or other material to a tree, house, stake, garage or other structure. Tethering by definition does not include walking a dog on a leash. Many communities in North Carolina have recently adopted ordinances which limit or prohibit a person from leaving a dog unattended and tethered on private property. Many experts have stated that the practice of tethering dogs create dogs with behavioral problems which in turn generate public safety issues for the local government. None of the recognized animal welfare organizations recommend the practice of tethering.

Based on Council's direction from the May 26, 2009, meeting, staff met with Chain Free Asheville, as well as researched ordinances from other jurisdictions within North Carolina, and developed a proposed ordinance which prohibits the tethering of dogs within the City limits. The current animal control ordinance prohibits the tethering of dogs on public property. The proposed ordinance prohibits unattended tethering of dogs on private property within the City limits. The ordinance does allow an owner to tether their dog if the owner is within visual range of the dog.

ChainFree Asheville, a local non-profit, has a program in place whereby Asheville residents with chained dogs can apply to have a fence built for them. This program provides fencing materials and/or labor to persons based on need. Currently, ChainFree Asheville has financial resources of $30,000 to be used to help build fences and educate citizens during the educational period.

This action complies with the City Council Strategic Operating Plan in the focus area of "Safe."

Pros:

- Eliminates the risk of a dog being injured by getting tangled in its tether.
- The City will be promoting a preferred practice in animal care.
- The prohibition may discourage persons from getting a dog when the persons are not prepared for the responsibilities associated with securing the dog on one's property.
- Improved quality of life for the dog.
- Improved public safety.

Cons:

- Adopting a tethering ban would increase calls for service and need for additional staffing.
- The prohibition of tethering may adversely effect low income citizens and place financial burden on citizens to erect fences to confine their dogs.
- A person may allow his or her dog to roam freely on the person's property as opposed to building a fence thereby creating more at large dog calls for service.

29

- Persons may surrender their dogs to the animal shelter because of the increase costs of securing one's dog on his or her property through fencing or purchasing an invisible fence system.

If City Council decides to adopt an ordinance prohibiting the tethering of dogs on private property, from an operational standpoint, staff recommends the following: (1) Do not begin issuing citations for violations until January 1, 2011, in order to properly educate the public and give persons an opportunity to prepare for the new restrictions; (2) Adopt a total prohibition on unattended tethering at all times on private property. Allowing a dog to be tethered unattended for a certain number of hours per twenty-four hours period would be virtually impossible to enforce in that staff has no adequate way to determine when a dog was first placed on a tether; and (3) Allow "attending tethering" within the City (i.e. the owner or person responsible for the dog must be present at all times when the dog is tethered on private property).

Ms. Peggy Irwin, Founder of ChainFree Asheville, recapped the reasons for law in that the chained dog in any city represents (1) A threat to the public safety, esp. children; (2) A public nuisance – diminishing property values and tourism; (3) Visual evidence of irresponsible pet ownership; and (4) Tolerance of inhumane treatment.

Advantages of the new ordinance include (1) The ordinance addresses all the reasons for the law; (2) The ordinance represents the combined input of Staff and concerned citizens; (3) Logic based on experiences of tethering laws in 26 jurisdictions in the South; (4) Attended tethering is allowed and defined as "a responsible party outside with the dog."' And (5) Allows for a 15 month educational period.

She addressed Councilman Newman's motion on May 26: (1) "To move forward with a policy of the prohibition of 24/7 unattended tethering (with perhaps a secondary motion on the other period of time when the person responsible for the dog is present)" - The ordinance before you moves Asheville forward with a policy of prohibiting 24/7 tethering; (2) . . ."That there is a Phase One of the policy that during the time that the policy is adopted until September 1, 2010, we work on an educational component." - We have been working with Atlanta's anti-chaining program administrator. Elements of their plan would work here. We would be assisting in whatever way possible to effect this education; (3) ". . .To support creating a fund using private dollars raised by people in the community who care about this issue to be used once we move into Phase Two (enforcement phase) to assist people to comply with the law achieve compliance with the ordinance." - The fund already exists and is being used, and will continue to be used, to assist low-income individuals and families with removing their dog from the chain and fence building; (4) ". . .To make execution entering into Phase Two contingent upon the creation of this community fund. - We are actively fundraising in a variety of ways including obtaining grants, online donations, special events, and have an experienced fund-raising team in place; and (5) ". . .To direct staff to work with ChainFree Asheville and others in the community on what level of funding there will likely need to be in the community fund. " - In a meeting with Councilman Newman over the summer, we agreed that we need to build about 100 fences at $300 each. So a fund of $30,000 is the goal. We are giving you every assurance that this is achievable.

Mr. Alan Ditmore expressed concern over people who visit with their dog and can't allow them to be tethered while the owner is visiting. He also was concerned about when the ChainFree Asheville fence money runs out the law will still be in effect.

The Director of Operations for the Asheville Humane Society supported prohibiting unattended tethering.

When Councilwoman Cape questioned if the ChainFree fences are allowed in all zoning districts, City Attorney Oast felt there were no restrictions on fences other than barbed wire fences, but there may be some neighborhoods that have restrictive covenants. Councilman Russell noted that chain link fences are not allowed in several subdivisions, particularly in North

Asheville, and there are several other neighborhoods that have very strict fencing requirements, not only size, but how far they have to set, etc.

Councilman Mumpower understood the concern but we keep adding more and more rules to regulate behavior. He felt that this ordinance represents a distraction of efforts to eliminate the open air drug market. He also felt this is an incremental intrusion on the civil liberties of our people.

Councilman Newman struggled with the total prohibition of unattended tethering as we don't want to allow animal cruelty; however, he didn't feel that tethering a dog for a short period of time was unacceptable, understanding the unenforceability of the short tethering.

Upon inquiry of Mayor Bellamy, Mr. Euler said that we do not have anyway to mandate that the non-profit be able to fund and build fences. We struggled with how to make the ordinance contingent on a non-profit's ability to pay for fences. We basically concluded that they have raised enough money to get through the period where people need help. We are basically recommending passage of this ordinance but not based on ChainFree Asheville's ability to pay and build the fences.

After Mayor Bellamy stressed that the City must be the leader in education, she asked about funds for the educational component. Mr. Euler explained that during the grace period animal control officers will be talking with residents one on one to let them know they will need an alternate way to secure their dogs. Staff, along with ChainFree Asheville, will do public service announcements on the City's channel, along with distribution of educational brochures. Police Chief Hogan explained how the Police Department will gear up for a complete education process. Mayor Bellamy suggested placing information on the City's website. Councilwoman Cape suggested putting a flyer with the information sent out for renewal of dog licenses.

It was the consensus of Council to have staff develop an educational program and present it to the Public Safety Committee for review.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Miller moved for the adoption of Ordinance No. 3795, an ordinance prohibiting the tethering of dogs on private property, with the following conditions: (1) Do not begin issuing citations for violations until January 1, 2011, in order to properly educate the public and give persons an opportunity to prepare for the new restrictions; (2) Adopt a total prohibition on unattended tethering at all times on private property; and (3) Allow "attending tethering" within the City (i.e. the owner or person responsible for the dog must be present at all times when the dog is tethered on private property). This motion was seconded by Councilwoman Cape and carried on a 5-2 vote, with Councilman Mumpower and Councilman Russell voting "no".

ORDINANCE BOOK NO. 25 - PAGE 447

VI. NEW BUSINESS:

A. RESOLUTION NO. 09-212 - RESOLUTION AUTHORIZING THE MAYOR TO ENTER INTO AN INTERLOCAL AGREEMENT WITH BUNCOMBE COUNTY FOR THE OPERATION OF A CONSOLIDATED 911 COMMUNICATIONS CENTER

Assistant City Attorney Curt Euler said that this is the consideration of a resolution authorizing the Mayor to enter into an interlocal agreement with Buncombe County for the operation of a Consolidated 911 Communications Center.

31

On September 2, 2003, the City and County entered into an interlocal agreement regarding the construction of a consolidated 911 communication center (herein "Communication Center"). The purpose of the Communication Center was to have all public safety agencies in Buncombe County under one roof in order to improve response times for calls for service. In exchange for the City forgoing its ability to become a Public Safety Answering Point (herein "PSAP"), the County was to construct a Communications Center for the City, County and Sheriff's Department to receive calls and dispatch public safety services within Buncombe County and pay for all associated equipment necessary for receiving and dispatching calls for service. Buncombe County has completed the construction of the Communications Center and purchased the necessary equipment. Prior to the City moving into the Communication Center, pursuant to Section II.M and Section III.E of the 2003 Agreement, both the City and County are to execute a joint agreement for the operation of the Communications Center.

Mr. Euler provided Council with the following historical timeline regarding this agreement: 2001 – APD investigates becoming its own Public Safety Answering Point ("PSAP"); 2003 – (1) APD presents recommendation/plan to City Council at Annual Retreat; (2) Buncombe County proposes an Interlocal Agreement to co-locate a joint communications center at the County's expense; and (3) City/County Interlocal Agreement executed September 2, 2003; 2005 - City Council extends completion date of joint center to January, 2007 to avoid breach of contract; 2007 - June: NC General Assembly revises Public Safety Telephone Service & Wireless Telephone Service Act; 2008 - City & County continue negotiations regarding joint operating agreement; 2008 (July) - Center construction completed; county functions brought on-line 2009 – (1) City/County Operational Agreement negotiations continue; (2) June 2, 2009 - County Commissioners disapprove joint operational agreement: Ask to reconsider Termination Clause; (3) July 7, 2009 – City Council members and County Commissions plus staff meet to discuss the proposed agreement; (4) August 2009 - The Staff of both parties reach a tentative agreement subject to approval by both governing bodies; (5) September, 2009 – Buncombe County submits an application for City to become the backup PSAP for Buncombe County; (6) September 15, 2009 – Buncombe County approves the execution of the operational agreement; and (7) September 22, 2009 – Issue before Council.

Highlights of the agreement consist of (1) Establishing the City as the backup PSAP for Buncombe County; (2) The creation of an advisory board to develop procedures and practices for the Communication Center, make capital expenditure recommendations and to handle disputes; and (3) A termination clause which insures the City a revenue stream to fund the costs associated with the receiving of 911 calls for service should the arrangement with Buncombe County end.

Highlights of the Agreement include:

- The creation of an advisory board consisting of the Sheriff, Emergency Management Director, Fire Chief and Police Chief of the City of Asheville and the President of the Buncombe County Fire Chief's Association to develop procedures and practices for the operation, make capital expenditure recommendations and to handle disputes.

- Establishing the City of Asheville's call center located in the Municipal Building and the Backup PSAP for Buncombe County.

- A termination clause which insures the City a revenue stream to fund the costs associated with the receiving of 911 calls for service should the arrangement with Buncombe County end.

On September 15, 2009, the Buncombe County Board of Commissioners approved the execution of the proposed operating agreement for the Communication Center and Buncombe

County has submitted its application to make the City's call center in the Municipal Building the backup PSAP for Buncombe County.

This action complies with the City Council Strategic Operating Plan in the focus area of "Safe."

Pros:

- Having all the Asheville Police Department, Asheville Fire and Rescue, the Buncombe County Emergency Medical Service, and the Buncombe County Sheriff's Department under one roof to receive and dispatch calls for service.
- Having an advisor body consisting of all stakeholders to meet and discuss issues facing the Consolidated Call Center.
- The ability to have an orderly termination of the agreement in the event that either party determines that the agreement is not meeting the needs of the citizens that it serves.
- A continued revenue source for the funding of receiving 911 calls for service by the Police and Fire Departments should the agreement be terminated.

Cons:

- None noted.

Starting July 1, 2009, the City will reimburse the County for the salaries of three (3) telecommunicator positions for the County's continued dispatching of Asheville Fire and Rescue. The City will not have to pay for infrastructure and equipment used for dispatching public safety, except for radio systems outside the Communications Center.

City staff recommends City Council adopt this resolution giving the Mayor authority to enter into an agreement for the operation of the Consolidated 911 Communications Center with Buncombe County.

On behalf of Council, Mayor Bellamy thanked former Councilman Joe Dunn, Councilman Mumpower, City Attorney Curt Euler, City Manager Gary Jackson, Assistant City Manager Jeff Richardson, Police Chief Hogan, former Fire Chief Greg Grayson, Interim Fire Chief Scott Burnette, Information Technologies Director Jonathan Feldman, Police Capt. Darryl Fisher, Woodfin Mayor Jerry Vehaun, and Buncombe County personnel of Wanda Greene, the County's technical staff, the County Attorney's Office, and former County Commissioner Nathan Ramsey for their work on this real success story of intergovernmental collaboration.

Mr. Euler responded to Councilwoman Cape and Councilman Miller in how the existing call center is the back-up.

When Mayor Bellamy asked for public comments, none were received.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Mumpower moved for the adoption of Resolution No. 09-212. This motion was seconded by Vice-Mayor Davis and carried unanimously.

RESOLUTION BOOK NO. 32 – PAGE 230

B. DISCUSSION OF CITY STANDARDS REGULATING SIGNS ON VEHICLES

33

Assistant Planning & Development Director Shannon Tuch said that City Council was recently contacted by business owners expressing concern over the City's application and enforcement of standards regulating signs on vehicles. This occurred while the City Attorney's office was in the process of seeking resolution to an on-going enforcement matter involving signs on vehicles and was asked to suspend any further action until Council had the opportunity to publicly review and discuss those standards.

On September 9, 2009, staff reviewed the current ordinance and enforcement program with the Planning & Economic Development Committee. The Planning Department is charged with enforcing these standards and generally takes a conservative approach to their application to allow for an appropriate level of business identification. Enforcement of egregious violations is taken when other businesses are adversely impacted or other city goals are compromised. The presentation and accompanying staff commentary will attempt to:

- Demonstrate when and under what circumstances enforcement actions are necessary,
- Explain the relationship between signs on vehicles and other sign standards, and
- Identify options available to businesses requiring additional identification

Ms. Tuch then provided background on the existing regulations and how they are enforced. She said that the Sign Code has 4 categories for signage: (1) Signs exempt from regulation; (2) Signs exempt from permit requirements; (3) Prohibited signs; and (4) Signs requiring permits (on –premise, off-premise).

Signs on vehicles use to be listed as "prohibited" but provided an exception for signs used to identify businesses. Staff moved this standard to being "exempt from permit requirements" during a housekeeping amendment in 2008.

She said that the application of the standard can be challenging. Staff had asked to qualify the time period during which a vehicle could remain stationary but Council expressed concern so the language remained unchanged.

Section 7-13-2(d)(12) reads: *Business signs on vehicles.* Signs displaying a business name, trademark, or other identifier shall be allowed provided they are moved periodically during the normal course of business and maintain a current and valid registration and inspection. When not in use, said vehicles are to be parked in such manner so as to minimize their visibility from the street and other public properties.

There are areas of subjectivity: (1) "provided they are moved periodically during the normal course of business", and (2) "vehicles are to be parked in such manner so as to minimize their visibility from the street and other public properties"

How To Address the Subjectivity – develop basic guidelines: (1) Check to see that business is being conducted on the property. Monitor to see that vehicle moves within a reasonable time frame; (2) Check to see whether the vehicle is located on the business property itself; (3) Verify that vehicle is operable and has a valid license and registration; and (4) Speak to business owner to understand whether there are opportunities to move the vehicle to an appropriate, yet convenient location.

What this generally means is: (1) Signs on vehicles are not a high priority enforcement matter and enforcement is generally reserved for the most egregious violations or chronic problem areas; (2) Most notices issued are the result of complaints and most complaints are from competing businesses; (3) Most matters are resolved with a basic contact without notices being issued; and (4) Some violations include numerous violations and signs on vehicles may be listed as one.

34

This has resulted in some general guidelines: (1) Signs on vehicles are not a high priority enforcement matter and enforcement is generally reserved for the most egregious violations or chronic problem areas; (2) Most notices issued are the result of complaints and most complaints are from competing businesses; (3) Most matters are resolved with a basic contact without notices being issued; and (4) Some violations include numerous violations and signs on vehicles may be listed as one.

She then showed a variety of photos showing signs that are permitted and those that are prohibited.

Ms. Tuch responded to various questions/comments from Council, some being, but are not limited to: why would there be a violation if the truck has authority to park on the property by the property owner; how are promotional events handled; need to be clear (no subjectivity) on "vehicles are to be parked in such manner so as to minimize their visibility from the street and other public properties"; and suggestion for language that trucks don't obstruct other signs.

Mr. Tuch said that she would look at all the points raised by Council.

C. RESOLUTION NO. 09-213 – RESOLUTION AUTHORIZING THE CITY MANAGER TO CONVEY A UTILITY EASEMENT TO PROGRESS ENERGY FOR THE RELOCATION OF THE OAKVIEW BRIDGE PROJECT

Mr. Greg Shuler, Engineering Services Manager said that this is the consideration of a resolution authorizing the City Manager to convey a utility easement to Progress Energy to facilitate the construction and replacement of the East Oakview Bridge.

Several years ago, the East Oakview Bridge located in West Asheville on E. Oakview Road collapsed. The City requested and the N.C. Dept. of Transportation (NCDOT) agreed to loan to the City a temporary replacement bridge until the City could replace the bridge. Since that time, the City has secured the needed funding, approximately $1.18 Million, to replace the bridge. The Federal Highway Administration will fund 80% of the replacement and the City is responsible for the remaining 20%.

The temporary bridge is one of only two within the State of North Carolina and NCDOT has requested that the City expedite its replacement project and return the temporary bridge. The City has acquired most of the needed right of way to replace the bridge. In order to replace the bridge, Progress Energy will first need to relocate and install certain utility lines across the City's right of way.

This action complies with the City Council 2009-10 Strategic Operating Plan within the Sustainable Focus Area by addressing the City's aging infrastructure.

Pros:

- Allows for the relocation of utility poles and lines that are required to construct the new bridge.
- Expedites the return of the temporary bridge to the NCDOT.

Con:

- A utility easement will now be on City-owned property.

There is no direct fiscal impact for the utility easement; however, the City will be responsible for 20% of the amount to actually relocate the utility pole and lines. The total estimated amount is $10,200.16. The City will pay this amount initially, then request reimbursement from the NCDOT for 80%. The total amount that the City will be responsible for is estimated to be $2,040.03.

35

City staff recommends City Council adopt a resolution authorizing the City Manager to convey an easement across public right-of-way to Progress Energy.

In response to Mayor Bellamy, Mr. Shuler said that we have executed a municipal agreement with NCDOT and feel confident they will reimburse the City the 80%.

In response to Mayor Bellamy, Director of Public Works Cathy Ball said that we have a project budget for this project which has been approved.

When Mayor Bellamy asked for public comments, none were received.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Russell moved for the adoption of Resolution No. 09-213. This motion was seconded by Councilman Mumpower and carried unanimously.

RESOLUTION BOOK NO. 32 – PAGE 231

D. PEOPLE FRIENDLY DRUG DOG PROGRAM IN PUBLIC PARKS AND DOWNTOWN AREAS

Councilman Mumpower said that his proposal was considered by the Public Safety Committee and wanted to make sure that Council was aware of his proposal. He proposed the use of people friendly drug dogs in our parks, parking garages, and other downtown areas where drugs are sold and abused in public spaces. The proposal could be titled "Bennie the Beagle" Drug Dog Program.

The problem is that our downtown is a concentrated area for drug distribution and use in public spaces – including our parks and garages. There is a new Pack Square public park coming that has the potential to be an additional large scale incubator for drug activity and related crimes.

His proposal is instruct our Police Department to intensify enforcement/education efforts in our downtown through the routine use of a people friendly drug intervention dog in public spaces.

Methods include (1) High visibility routine patrol utilizing an officer and canine with good people skills; (2) Use a seasonal sign on "Bennie the Beagle" with an anti-drug message – i.e. "Asheville is a Drug Free Zone" or "There's a New Dog in Town"; and (3) Deterrence and public education will be the priorities of this effort.

He provided links for additional information on the how and why of using people friendly drug intervention dogs. He was sure our police officers have the necessary know how and creativity.

Vice-Mayor Davis, Chair of the Public Safety Committee, said that the Public Safety Committee reviewed this proposal and determined that this program is not feasible because of the possibility of violating the 4th Amendment. Therefore, the Committee did not recommend moving the idea forward.

It was the consensus of Council to instruct the City Clerk to attach the minutes of the particular City Council committee meeting when a Council member brings the action forward to the full Council.

36

In response to Councilman Miller, a Police Department Officer said that he believed the City has five drug dogs.

E. CALENDARS

Remainder of the Year City Council Meeting Schedule

Mayor Bellamy instituted discussion of the remainder of the year calendar of City Council. After that discussion, it was the consensus of Council to (1) hold the City Council's organizational only on December 8, 2009; (2) hold a regular formal meeting on December 15, 2009; and (3) hold the City Council annual retreat on January 8-9, 2010. The City Clerk was instructed to prepare the proper paperwork and place this item on the October 13, 2009, agenda.

Upon inquiry of Councilman Mumpower, Mayor Bellamy said that there will be a facilitator at the Council retreat and we will do it as economically as possible.

Business Calendar for Fiscal Year 2009-10

City Manager Jackson asked for Council's consideration of adoption of the Business Calendar for Fiscal Year 2009-10. Because there will be an amendment to the calendar due to City Council's retreat, the City Clerk was instructed to place this item on the October 13, 2009, agenda for action.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

VIII. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 9:32 p.m.

Magdalen Bouleson
CITY CLERK

MAYOR

Tuesday – October 13, 2009 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Jan B. Davis; Councilman Kelly M. Miller; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; Councilman William A. Russell Jr.; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: Councilwoman Robin L. Cape

PLEDGE OF ALLEGIANCE

Mayor Bellamy led City Council in the Pledge of Allegiance.

INVOCATION

Councilman Mumpower gave the invocation.

I. PROCLAMATIONS:

A. PROCLAMATION PROCLAIMING OCTOBER 2009 AS "SISTER CITIES MONTH"

PROCLAMATION PROCLAIMING OCTOBER 13, 2009, AS "ASHEVILLE-SAUMUR ROTARY FRIENDSHIP EXCHANGE DAY"

Mayor Bellamy read the proclamation proclaiming October, 2009, as "Sister Cities Month" in the City of Asheville. She presented the proclamation to Dr. Andrew Craig, President of Asheville Sister Cities Inc., and other Asheville Sister Cities members, who briefed City Council on some activities taking place during the month.

She also read the proclamation proclaiming October 13, 2009, as "Asheville-Saumur Rotary Friendship Exchange Day" in the City of Asheville. She explained that this is a Friendship Exchange visit from the Rotary Club of Saumur, France to the Rotary Club of Asheville. The Rotary Friendship Exchange Program advances international understanding and peace through personal contact across the borders while developing inter-club relationships that lead to fellowship and service projects. The Friendship Exchange Team consisted of Christian and Genevieve Cambo; Guy and Maguy Morand; Richard and Isabelle Devy; Helene Reynouard; Sylviane and Jacques Cailleux; and Alain and Bernadette Le Quellec. She presented this proclamation also to Dr. Craig.

B. PROCLAMATION PROCLAIMING OCTOBER 2009 AS "NATIONAL ARTS & HUMANITIES MONTH"

Councilman Newman read the proclamation proclaiming October, 2009, as "National Arts & Humanities Month" in the City of Asheville. He presented the proclamation to Mr. Charlie Flynn-McIver, Artistic Director at NC State Company, and Mr. Jim Julian, Board member for Arts 2 People and local artist/performer, who briefed City Council on some activities taking place during the month.

C. PROCLAMATION PROCLAIMING OCTOBER 12-16, 2009, AS "INDUSTRY APPRECIATION WEEK"

Vice-Mayor Davis read the proclamation proclaiming October 12-16, 2009, as "Industry Appreciation Week" in the City of Asheville. He presented the proclamation to Mr. Clark Duncan and Mr. Ben Teague who briefed City Council on some activities taking place during the week.

II. CONSENT AGENDA:

At the request of Councilman Mumpower, Consent Agenda Item "E" was removed from the Consent Agenda for discussion and/or an individual vote.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON SEPTEMBER 22, 2009

B. RESOLUTION NO. 09-214 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH SUNGARD HTE FOR ONGOING MAINTENANCE OF SOFTWARE SYSTEMS

Summary: The consideration of a resolution authorizing the City Manager to sign an agreement with SUNGARD, Inc. formally HTE, to provide maintenance coverage for the City's HTE Software.

SunGard/HTE, located in Lake Mary, Florida, has provided maintenance services for the City's HTE Software since installation of the system in 1997. Since this company received the bid for this software in 1997 and its proprietary software, we must contract our maintenance though this company and they have no subsidiaries in North Carolina. The service agreements are renewed annually. This maintenance covers currently used critical applications such as payroll, banking, and other core financial services during the transition to the BTIP project. The maintenance cost of this software for the renewal period of July 1, 2009, through June 3, 2010, has increased by approximately three percent.

Pros:

- By keeping the HTE Software in optimal condition, the City is able to provide service that is more efficient to our city employee users, giving them the ability to do their jobs in a timely manner.
- This allows the City to provide excellent service to the customer of the City of Asheville and to the vendors who conduct business with the City of Asheville.

Con:

- None noted.

The renewal agreement reflects an annual charge of $129,548. Funds have been appropriated in the Information Technology Services Contracted Service and the Parking Services Interfund accounts.

City staff recommends City Council adopt the resolution for HTE software maintenance coverage for the term of July 1, 2009, through June 30, 2010.

RESOLUTION BOOK NO. 32 – PAGE 232

C. RESOLUTION NO. 09-215 - RESOLUTION AMENDING THE 2009 CITY COUNCIL MEETING SCHEDULE TO CHANGE THE DECEMBER 8, 2009, MEETING TO AN ORGANIZATIONAL MEETING ONLY; AND ADDING A FORMAL MEETING ON DECEMBER 15, 2009

RESOLUTION BOOK NO. 32 – PAGE 233

D. MOTION APPROVING THE BUSINESS CALENDAR FOR FISCAL YEAR 2009-10

E. BUDGET AMENDMENT IN THE GRANT FUND FROM THE U.S. DEPT. OF JUSTICE FOR YEAR 4 WEED & SEED FUNDING, AND AMENDMENT IN THE GENERAL FUND TO REFLECT A TRANSFER FROM THE GRANT FUND TO SUPPORT PERSONNEL COSTS ASSOCIATED WITH THE GRANT

This item was removed from the Consent Agenda for discussion and/or an individual vote.

F. RESOLUTION NO. 09-216 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION FOR THE INSTALLATION OF HIGHWAY/RAILWAY GRADE CROSSING CANTILEVER SIGNALS AT THE INTERSECTION OF RIVERSIDE DRIVE AND NORFOLK SOUTHERN RAILWAY TRACKS

Summary: The consideration of a resolution to enter into an agreement with the N.C. Dept. of Transportation (NCDOT) regarding the installation of highway/railway grade crossing cantilever signals at the intersection of Riverside Drive and Norfolk Southern railway tracks (Crossing # 720-409S) in Asheville.

The "Transportation Equity Act for the 21st Century" provides funding for correcting safety hazards that are located on streets *not* on the Federal-Aid Highway System as selected by the North Carolina Department of Transportation (NCDOT) and approved by the Federal Highway Administration (FHWA). The subject railway crossing has been selected for this funding. Typically, these types of projects are funded at a 90%/10% ratio but in this specific case, the construction is completely funded with Federal monies. The total estimated cost for the subject project is $200,000 and it would take about six months to complete the project. The project will be released for construction about one month after the municipal agreement is approved.

The City is responsible for all improvements to the approaches of the subject railway crossing including pavement markings, signs, drainage, sidewalk relocation and/or repair, fill materials, and pipe extensions. And, the NCDOT will reimburse the City 100% of the approved allowable project costs incurred by the City for the approach work. At this time, we anticipate the only approach work needed will include pavement markings and signs at an estimated cost of $1,500.

The City is responsible for one-half of the annual maintenance cost and that cost is estimated to be about $1,500 per year. The City currently pays one-half of the annual maintenance cost through the Traffic Engineering operating budget for 10 railway crossings within the City at an annual cost of about $12,000.

This action complies with the City Council 2009-10 Strategic Operating Plan within the Sustainable Focus Area by maintaining and managing street infra-structure to improve traffic flow and efficiency to help support the healthy growth of the City.

Pros:

- Improves overall safety at an existing railway crossing.
- Minimizes the crash potential.
- Improves traffic flow and efficiency.

Con:

- Cost to the City is estimated to be $1,500 per year.

There is no fiscal impact to the City for the construction of the subject project. The project is 100% funded with Federal monies. The City is responsible to pay one-half of the annual maintenance cost, which is estimated to be about $1,500. The necessary funds will come from the current Traffic Engineering operating budget.

Staff recommends that City Council enter into an agreement with the NCDOT for installing highway/railway grade crossing cantilever signals at the intersection of Riverside Drive and Norfolk Southern railway tracks (Crossing # 720-409S) in Asheville.

RESOLUTION BOOK NO. 32 – PAGE 234

G. RESULTS OF THE SEPTEMBER 24, 2009, CIVIL SERVICE BOARD EMPLOYEE ELECTION

Summary: One copy of the results of the Civil Service Board employee election held on September 24, 2009, is to be filed with the City Manager and one with the City Clerk, who shall present such certification to the City Council at its next regular meeting. Secretary to the Civil Service Board Jessica Dunlap and City Clerk Burleson provided the following certified certificate on September 24, 2009: We do hereby certify, having opened, canvassed, and determined the original returns of the Civil Service Board employee election, the results of the Civil Service Board Employee Election held on September 24, 2009, noting the name of each person voted for and the number of votes cast for each person as follows: Sidney M. Bach - 192; Jacquelyn Hallum – 196; Virginia Robinson – 227; and Charlotte Tell – 216.

Mayor Bellamy asked for public comments on any item on the Consent Agenda, but received none.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Vice-Mayor Davis moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Russell and carried unanimously.

ITEMS REMOVED FROM THE CONSENT AGENDA FOR INDIVIDUAL VOTES

E. ORDINANCE NO. 3796 - BUDGET AMENDMENT IN THE GRANT FUND FROM THE U.S. DEPT. OF JUSTICE FOR YEAR 4 WEED & SEED FUNDING, AND AMENDMENT IN THE GENERAL FUND TO REFLECT A TRANSFER FROM THE GRANT FUND TO SUPPORT PERSONNEL COSTS ASSOCIATED WITH THE GRANT

Summary: The consideration of a budget amendment in the Grant Fund, in the amount of $142,000, from the U.S. Department of Justice for Year 4 Weed & Seed funding; and an amendment in the General Fund of $84,068 to reflect a transfer from the Grant Fund to support personnel costs associated with the grant.

In October 2004, elected officials, City staff and Asheville citizens mobilized to develop comprehensive strategies to address issues of law enforcement, neighborhood restoration, and prevention/intervention/treatment programs and activities in the West Riverside area of Asheville as part of a Weed and Seed initiative. The strategy was introduced to the community, via a series of public meetings, to determine the concerns of residents of the targeted area. The strategy was favorably received with the understanding that residents would be integrally involved in the planning and implementation of the initiative.

In July 2006, the U.S. Department of Justice announced the designation of Asheville as an "Officially Recognized" site for the federal Weed and Seed initiative aimed at reducing crime and improving quality of life. Official recognition made the City of Asheville eligible to apply for Weed and Seed funds once a year over a five year period. The first funding application was approved and awarded in August 2006.

On August 27, 2009, Acting Assistant Attorney General, Laurie Robinson, announced the City of Asheville's application for fourth year continuation funding was approved in the amount of $142,000. 50% of the funds will be used to support law enforcement and community police programs and 50% will be used to support neighborhood initiatives such as youth services, parenting programs, health and nutrition programs, vocational programs, neighborhood clean-ups, housing services, and the salary of the Weed & Seed site coordinator. No additional City funding will be required to support this fourth-year grant.

The West Riverside Operation Weed and Seed steering committee, residents and several agencies such as the Housing Authority of the City of Asheville, Asheville City Schools, Children First/ Communities in Schools of Buncombe County, OnTrack Financial Education and Counseling, Asheville Greenworks, GO Asheville, LEAF in Schools and Streets and others continue to collaborate to improve quality of life for the residents of the West Riverside area of Asheville.

Data collected over the last 2.5 years suggests the initiative is having an impact in the targeted area. When comparing the averages from 2 years before strategy implementation to the 2.5 years since implementation, the following changes have been recorded: a 44% decrease in drug calls for service, a 12% decrease in violent crime and a 28% decrease in weapons offenses. An independent evaluator completed a survey of residents in 2009 and made the following assessment, "data shows that the areas where the Weed and Seed program have dedicated resources are improving, but that there is justification for the continued dedication of resources. Efforts should be continued, as many residents see gains being made in public safety and community appearance in the past two years. However, the respondents [residents of the Weed and Seed area] also provide evidence that there is more room for improvement."

This action complies with the City Council Strategic Operating Plan in that it supports small business development (Affordable Focus Area). It also complies with the following goals in the "Safe Focus Area": continue community policing initiatives, reaffirm commitment to eliminate open air drug market in Asheville, partner with intergovernmental agencies including the judicial system to comprehensively address drug-related crime, support recreation and employment alternatives for youth at risk of gang exposure. Finally, it complies with the "Sustainable Focus Area" in that it expands partnerships with UNCA, AB Tech and other institutions to achieve goals in health and wellness, workforce development, and economic development.

Pros:

- Significantly reduce violent crime and drug activity in a high crime area
- Provide a comprehensive crime prevention plan to address law enforcement, neighborhood restoration and prevention/intervention/treatment programs with the residents of the targeted area
- Mobilize community residents to collectively improve the conditions in the targeted area
- Provide resources for residents as a means of personal growth and development
- Address the social, educational, economic and cultural issues in the targeted area through multi-agency collaborations
- Leverage resources to sustain the program and replicate the strategies in other challenged areas in the city

Con:

- Some resistance to change by the residents who live in the target area.

The fiscal impact is grant revenue of $142,000 in Fiscal Year 2010 to implement the comprehensive Weed and Seed strategy which funds police overtime, police equipment, a coordinator position, and community-based resource provider contracts among other things at no additional cost to the city. The City anticipates that the U.S. Dept of Justice will fund the Weed and Seed initiative through June 2012.

City staff recommends City Council adopt a budget amendment in the Grant Fund, in the amount of $142,000, from the U.S. Department of Justice for Year 4 Weed & Seed funding; and an amendment in the General Fund of $84,068 to reflect a transfer from the Grant Fund to support personnel costs associated with the grant.

Councilman Mumpower was concerned that the City is further aggravating the existing trillion dollar deficit. He felt we need help from the federal government, but not in this area and not with borrowed dollars that our children will have to pay back.

Councilman Miller moved for the adoption of Ordinance No. 3796. This motion was seconded by Vice-Mayor Davis and carried on a 5-1 vote, with Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 25 – PAGE 449

III. PRESENTATIONS & REPORTS:

A. ECONOMIC STIMULUS PACKAGE UPDATE

American Recovery & Reinvestment Project Manager Brenda Mills updated Council on the City's American Recovery & Reinvestment Act (ARRA) reporting, funding and upcoming event announcements for vendors.

Federal Reporting

Reporting for ARRA began on October 1, 2009, through the FederalReporting.gov website. City staff were trained and assisted in completing reports that were submitted via this web portal on Monday, October 5, 2009, for grants in which the City of Asheville was a prime recipient. The reporting cycle will be quarterly so the next cycle will be January 1-10, 2010, to submit reports with progress on funding expenditures. Funding for grants from the State of North Carolina are reported as sub-recipient reports to the corresponding state agencies for reporting to the federal government.

Reporting will be reviewed by federal agencies, comments on revisions made for local and state agencies to update and then the public will have access to all data on Recovery.gov thirty (30) days following initial submission to FederalReporting.gov.

Prime Recipient Awards	Sub-recipient Awards
CDBG-R	NCDOT Surface Transportation
Homeless Prevention	NCDENR SRF Drinking Water
Energy Efficiency & Conservation Block Grant	NCDENR SRF Clean Water
Edward J. Byrne JAG Solicitation Grant	NCDAQ Mobile Emissions Reduction
Transit Capital	Clean Cities Grant

Clean Cities Grant: Carolina Blue Skies Green Jobs (Department of Energy)

The City of Asheville will be receiving ARRA funds as part of a state-wide Department of Energy (DOE) Clean Cities grant application that we participated in through Land-of-Sky Regional Council.

Through this application, DOE has awarded $300 million to 23 groups. The Triangle J Council of Governments in Raleigh is one of the prime recipients, and Asheville will be a sub-recipient under their contract. The total award to the Triangle J COG is just under $13 Million. This total is $1.7 million less than requested in the grant application, and so in the next month the sub-recipients (about 10) will shave off dollars from the original proposals.

The City of Asheville's original request was for $749,015, which would fund the incremental cost of purchasing 11 new CNG pick up trucks, the retrofit cost to convert 11 existing pickups in our fleet to CNG, and a CNG station upgrade to be able to support the increased demand. As we are asked to trim our request, we plan to do so by pursuing less retrofits.

We will share the final amount with once we work through this process, but we are hoping it will be approximately $500,000+. This would be a significant investment in our fleet and CNG station.

Upcoming Events & Information Sessions

Locally, an outreach session is planned for all local vendors on ARRA update funding areas and doing business along with a session on capital access options. The session is scheduled for October 15, 2009, from 9:30 a.m. to 3:30 p.m. at the A-B Tech Enka Campus Haynes Room. No RSVP required. Presenters include the City of Asheville, Buncombe County, regional business service providers and local financial institutions.

The City of Asheville will host another session open to all vendors on November 18, 2009, from 9:30 a.m. to 12:30 p.m. at the City's Municipal Building Training Room. We will review the City's ARRA status and contracting opportunities and continue in our efforts to get vendors registered for notification of contracting opportunities.

Councilman Mumpower voiced his concern about the City's participation in the ARRA program.

When Councilman Mumpower asked if we have information about how many jobs the ARRA funding has created in Asheville, Ms. Mills said that we are still receiving approvals for the funding and we will be tracking those statistics for reporting purposes.

Councilman Newman was pleased to see that we will be retrofitting vehicles to CNG in that we are trying to manage our utility costs and reduce our environmental impact as well.

IV. PUBLIC HEARINGS: None

V. UNFINISHED BUSINESS:

A. W.C. REID CENTER

Livingston Park/W.C. Reid Center Master Site Plan

Ms. Jane Mathews, Principal of Mathews Architecture, P.A., updated Council on the Master Site Plan and what is currently proposed for Phase I of that Plan. Using illustrations, she said that the site is planned to have up to 3-4 phases, depending on funding. It is also planned to create a new site that still allows for connectivity to a greenway, to outdoor fields and play areas for children, a secure outdoor splash park, community garden, outdoor market and the adjacent needs of parking. She then described in detailed the entire building. One component is the community cultural arts component – Phase I. Phase I currently includes an auditorium, theatre, three classrooms, adjacent restrooms, office space, storage and mechanical, splash park area, including all of the parking on-site. The center component is the physical activity component. That would be the replacement for the existing gym facility at the W.C. Reid Center, adjacent locker rooms, showers, a therapy pool, wellness rooms for training and consultation, adjacent offices and restrooms. The third component is the community education component which includes community kitchen and teaching areas, other outreach class areas for community services, as well as a greenhouse (which is a separate component).

Phase I Project Timeline and Funding Recommendations for W.C. Reid Center Phase I

Chief Financial Officer Ben Durant said that this is the consideration of a financing plan the Reid Center Capital Project.

The WC Reid Center Capital Project currently has an authorized budget of $600,000. Approximately $448,000 of this budget has already been spent or committed to be spent for design-related services, including the development of a site master plan and associated construction documents. A balance of approximately $152,000 remains in the project budget that can be used for construction, upon approval of an updated WC Reid Center capital improvement and financing plan.

Plans for constructing a new WC Reid Center have been divided into two phases. Phase I involves construction of the community center building, which will accommodate a community theatre,

classrooms, office space, restrooms and storage facilities. Phase I also includes plans for parking, landscaping and other amenities. Based on current cost estimates, an additional $1.8 million will need to be added to the remaining balance of the existing project budget, which will provide approximately $2.0 in construction and contingency funds to complete Phase I of the project.

Phase II of the WC Reid Center project calls for construction of a new gymnasium. Based on current estimates, an additional $2.9 million would be needed for completion of this phase.

Funding Plan

Per City Council direction, staff has been asked to develop a funding plan for the completion of Phase I and Phase II construction of the WC Reid Center project. Staff's recommended plan is outlined below.

Phase I. The recommended funding plan for Phase I is as follows a) amend the project budget to add a total of $732,400 in secured and confirmed donations from various donor sources b) add the balance of approximately $152,000 from the project budget; and c) secure private bank financing in the amount of $1.07 million to cover the balance of funds needed for Phase I. The total of donations and bank proceeds is equivalent to approximately $2 million needed for Phase I.

The following is a list of donations totaling 732,400 that have been secured and confirmed to date:

Funder:	Raise the Roof at the Reid Community Campaign	Amount: $57,400
Funder:	Janirve Foundation	Amount: $600,000
Funder:	Eaton Charitable Fund	Amount: $25,000
Funder:	Glass Foundation	Amount: $50,000
	Total	$732,400

Also in the current budget there is $45,000 that was pledged by the Junior League and that is already included in the $600,000 budget. There is also the potential for additional funding in the amount of $300,000 from the Eckerd Foundation. Although a firm commitment is not in place for that yet, if that comes through that could be used for subsequent phases of the project.

Phase II. As previously stated, Phase II involves constructing a new gymnasium and other amenities at an estimated cost of $2.9 million. Given the significant amount of funding required to complete Phase II, staff recommends developing a funding plan for this phase as part of the of Fiscal Year 2010-11 Annual Budget and Capital Improvement Planning (CIP) process, which will be underway beginning in January. Staff feels that this phase of the project should be reviewed comprehensively and weighed against other capital improvement priorities that will have to compete for limited CIP resources.

Pros:

- Interest rates are currently favorable, making this a good time to finance capital projects. Based on favorable interest rates, the City is likely to secure an interest rate lower than the estimated 6%.
- The City's debt service costs will decline in the next two years, enabling the city to absorb this new debt service cost in year two without increasing the base budget for debt service expenses

Cons:

- The City will be committing its resources for capital planning and debt service in advance of a full and comprehensive review of departmental capital improvement requests.
- Additional debt service expenses for any new capital project will add stress to a budget that is already "tight" due to current economic conditions.

The financial impact of moving forward with a financing plan for Phase I construction of the community center is to increase in the city's annual debt service cost by approximately $110,000. This is based on a financing term of 15 years and a conservative interest rate of 6%. Due to timing issues related to issuing the debt, the City is only likely to incur a half a year's debt service payment in the current year, which would reduce the Fiscal Year 2009-10 financial impact to $55,000. Funding for this half-year payment can be covered by un-programmed funds currently available in the City's capital reserve account.

Staff is recommending proceeding with the financing plan for Phase I and reviewing Phase II as part of the annual budget review process.

Councilman Newman moved to proceed with the financing plan for Phase as follows a) amend the project budget to add a total of $732,400 in secured and confirmed donations from various donor sources b) add the balance of approximately $152,000 from the project budget; and c) secure private bank financing in the amount of $1.07 million to cover the balance of funds needed for Phase I. This motion was seconded by Councilman Miller.

In response to Councilman Mumpower about the sewer line through the middle of the property, Ms. Mathews said that Metropolitan Sewerage District has a proposal to abandon that line and replace it, at their expense, to a different location on the site adjacent to the stream. We do have a commitment from Metropolitan Sewerage District that we can build a connector over the existing line, which is very deep.

When Councilman Mumpower asked about staffing requirements, Parks, Recreation and Cultural Arts Director Roderick Simmons said that the new facility will be operated with our existing staff of 2 full-time employees and 2 part-time employees.

In response to Councilman Mumpower, Ms. Mathews said that she was unable to provide the square footage numbers for all the phases at this time; however, a ballpark for the entire new facility would be approximately 21-22,000 square feet.

Councilman Mumpower was concerned (1) that we have facilities all over town that need upgrade and this is for one neighborhood; (2) about staffing for that kind of a facility; (3) about swapping the existing 37,000 sq. ft. facility for one roughly half that size; and (4) that we will end up with two facilities (existing and new) that we will have to staff at a significant debt load in a time our economy is in major jeopardy. He felt we should renovate the existing center.

In response to Councilman Mumpower, Mr. Simmons said that they will have community dialogue for what to do with the existing facility as they have no current plan.

Councilman Russell noted that he originally supported this plan. However, after all phases are completed this will put it back at the original $8 Million Plan and he could not support it at this time. He hoped that in the future, staff would include in the fiscal impact statements what the borrowed amounts are, not what the annual debt service would be.

In response to Vice-Mayor Davis, Mr. Simmons said that the Phase I development can stand alone and we do have funding in place for Phase I.

Vice-Mayor Davis was excited about the other phases, but he didn't want to raise the expectation of the community that the future phases will happen, especially in this economy. He was particularly excited about the greenhouse, especially since it has a great opportunity of partnership. He felt the sale of the property that the existing Reid Center sits on go should go towards the purchase of these later phases. He felt comfortable in guaranteeing the community a $2 Million state of the art community cultural arts component – Phase I. And, the existing facility can serve as the gym until future phases are built out.

Councilman Miller noted that kids that are affected the most in making right choices are during the after school hours and those after-school programs are full. Putting kids in a gym isn't the sort of program that will affect change. He is personally excited about Phase I and in the near future kids will have an alternative to not being home alone but to go to a facility like this and being in an environment that changes how they make choices in their life.

Mayor Bellamy said that the existing Reid Center is the City's property and we have to improve all our facilities sooner or later. The price tag for the overall project is approximately $8 Million and as she makes this decision, she is thinking about the entire project. She felt we need to look at the next funding for the entire project immediately. Council adopted the Parks & Recreation Master Plan and one of the highest priorities was the W.C. Reid Center – not Phase I, but the entire center. She finds it difficult to make investments in other parks and greenways without completing this as we need to finish what we start. She supported Phase I and looked forward to continuing discussion in January about Phases 2 and 3. She also supported looking at selling the existing facility and using those funds to go toward the existing phases. We must look at the safety of our children and this facility is a safe haven for a lot of children in that neighborhood. We need to complete the entire project and not rely on the community – we already know the Housing Authority would like to have office space there. She also supported looking at federal funds that could assist us.

Ms. Sophie Dixon, resident on Brooklyn Road, supported completing the project in its entirety.

Rev. Christopher Chiaronmonte supported using the community centers for more than just children. He suggested posting a police officer in the facility in the evenings and opening the doors for the homeless to sleep, especially since the centers will have heat.

Mr. Alan Ditmore, Leicester resident, explained why he felt Asheville wouldn't have a problem with child care on such a high proportion if Asheville had a more gay friendly image and was able to attract a higher proportion of gay residents.

Mr. Christopher Sean Hollifield suggested the project be completed in one entire phase which would cost less and would be done at a quicker pace.

In response to Mayor Bellamy, Ms. Mathews said that the project is designed as a one level accessible facility, explaining how the gym should be on grade. The project is not designed to be multi-floors and they have not designed elevators, stairs or towers. However, if they had the design time, they could look at a multi-story building; however, they were asked by City Council to do a master plan and asked to accommodate a lot of things. The configuration addresses a lot of elements, in addition to architecture. This is a well thought out plan by the entire team, but that doesn't mean that they can't, if given direction from Council, to look at consolidating it into a two-story building. But, they were also directed to look at ways that it could be broken into construction phases.

When Mayor Bellamy asked if it would be helpful to let Ms. Mathews a number up-front for the future phases, Ms. Mathews said that different elements have different costs per square foot and if they were given a funding amount they could tell Council what they can build.

When Mayor Bellamy asked if it would help staff with financing options if Council said how much they wanted to budget for Phases 2 and 3, Mr. Durant didn't believe there are estimates or construction documents for Phases 2 or 3. He felt the first step would be knowing what we want to build, put some estimates together, and then let that be the beginning process. Then we would look at what funding options are available. Staff would be happy to proceed in any path Council chooses, but he did explain what typically happens with the Capital Improvement Plan process, which he would recommend.

Councilman Miller did not advocating going back and re-designing the facility as it would be very expensive. He noted that the completion date of Phase I is anticipated to be December of 2010. He felt it

would be appropriate to look at Phases 2 and 3 and see if they rise to the top of the Capital Improvement Plan.

Councilman Newman agreed that as we move on in the project we should use the proceeds from the sale of the existing facility for Phases 2 and 3. If he thought we were only voting on Phase I only and then not moving forward, he would not vote in support of this. But when we pull all of our resources together, there will be opportunities to make a great community facility happen on this site. We are moving the first piece forward and then making future phases of this build-out happen too. He was confident we can find a financially responsible way to do that.

Mayor Bellamy asked for a friendly amendment that staff provide Council a status report on the Reid Center on a quarterly basis at a Council meeting, which can be part of the Quarterly Strategic Operating Plan update. Councilman Newman and Councilman Miller accepted the friendly amendment.

The following amended motion made by Councilman Newman and seconded by Councilman Miller carried on a 4-2 vote, with Councilman Mumpower and Councilman Russell voting "no" – Motion to proceed with the financing plan for Phase as follows a) amend the project budget to add a total of $732,400 in secured and confirmed donations from various donor sources b) add the balance of approximately $152,000 from the project budget; and c) secure private bank financing in the amount of $1.07 million to cover the balance of funds needed for Phase I; and to have staff provide Council a status report on the Reid Center on a quarterly basis at a Council meeting, which can be part of the Quarterly Strategic Operating Plan update.

B. RESOLUTION NO. 09-217 - RESOLUTION AMENDING THE FEES & CHARGES MANUAL TO ALLOW FOR DISCOUNTS FOR PARKING FEES FOR INDIVIDUALS OR AGENCIES THAT HOLD FIVE OR MORE MONTHLY PARKING SPACES IN THE CIVIC CENTER GARAGE OR PURCHASE 300 OR MORE HOURLY PARKING PASSES FOR ANY GARAGE

Director of Public Works Cathy Ball said that this is the consideration of a resolution modifying the City of Asheville Fees and Charges Manual to include the following: (1) Fifteen percent (15%) discount for ten or more monthly parking spaces owned by one individual or agency in Civic Center Garage; (2) Ten percent (10%) discount for five to nine monthly parking spaces owned by one individual or agency in the Civic Center Garage; and (3) Fifteen percent (15%) discount for 300 or more bulk vouchers purchased at one time by the same individual or agency for hourly parking in any City operated parking garage.

In May 2009, the Downtown Commission requested that the City evaluate the potential for allowing discounts for volume purchases of monthly parking spaces as well as hourly vouchers. The purpose of the request was to provide incentives for employers to buy monthly parking passes for employees thus freeing up on-street parking spaces.

Staff developed a recommended discount based on these guiding principles:

- providing a meaningful discount;
- minimizing the impact to future financial stability of the parking enterprise fund; and,
- balancing proposed volume discounts with other parking rates such as surface parking lot rates.

Based on these principles staff recommends the following parking rate changes:

(1) Fifteen percent (15%) discount for ten or more monthly parking spaces owned by one individual or agency in Civic Center Garage; and

(2) Ten percent (10%) discount for five to nine monthly parking spaces owned by one individual or agency in the Civic Center Garage; and

(3) Fifteen percent (15%) discount for 300 or more bulk vouchers purchased at one time by the same individual or agency for hourly parking in any City operated parking garage.

This action complies with Council's Strategic Goals by supporting diversified job growth and small business development. The City Council Finance Committee has reviewed and support this recommendation unanimously.

Pros:

- Provides incentives for employers to purchase multiply monthly parking spaces in the Civic Center Garage where the greatest availability for monthly parking exists.
- Provides incentive for businesses to purchase bulk hourly vouchers for customers.
- Increase availability of hourly on-street parking.

Con:

- The proposal will have a financial impact on the parking fund as described below.

The estimated fiscal impacts for each of the discounts are outlined in the table below. The total negative impact to the Parking Enterprise Fund is estimated to be no more than $35,000.

	Type of Discount	Current Number of Customers that Qualify	Annual Discount (based on current use)
(1)	15% - for more than 10 monthly parking spaces in the Civic Center Garage	8 @ 187 spaces	$23,562
(2)	10% - for more than 10 monthly parking spaces in the Civic Center Garage	5 @ 27 spaces	$2,268
(3)	15% - 300 or more bulk hourly vouchers	Unknown	$5,000 estimated
	TOTAL		$30,830

The consideration of a resolution modifying the City of Asheville Fees and Charges Manual to include the following: (1) Fifteen percent (15%) discount for ten or more monthly parking spaces owned by one individual or agency in Civic Center Garage; (2) Ten percent (10%) discount for five to nine monthly parking spaces owned by one individual or agency in the Civic Center Garage; and (3) Fifteen percent (15%) discount for 300 or more bulk vouchers purchased at one time by the same individual or agency for hourly parking in any City operated parking garage.

When Mayor Bellamy asked for public comments, none were received.

When Vice-Mayor Davis said that the Downtown Commission felt this may not been enough of an offset, Ms. Ball said the way they set the 15% threshold is that they wanted it to be significant but they didn't want to undercut some of the other parking, since we have some surface parking lots at $55.00. We didn't want the covered parking to be less than the surface parking unless we reduced that also because the value of the covered parking is higher. To her knowledge there has not been any test from the downtown merchants to see if that is enough of a discount that would cause them to purchase them in bulk.

At the suggestion of Vice-Mayor Davis, Mayor Bellamy asked for a 6-month update on how these discount rates are working; the meter services; how the new parking garage equipment is working; gathering of data on how much on-street parking is being affected by people coming out of the garages and parking on-street; staff look at the difficultly of getting out of the automated parking garage

equipment, especially on special event evenings; and, that we monitor if the discounted price is working and if not we might need to lower the price even further to make it successful.

Councilman Mumpower spoke against giving some people a discount, but not everyone.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Russell moved for the adoption of Resolution No. 09-217. This motion was seconded by Councilman Miller and carried on a 5-1 vote with Councilman Mumpower voting "no".

RESOLUTION BOOK NO. 32 – PAGE 235

C. RESOLUTION NO. 09-218 - RESOLUTION AMENDING THE FEES & CHARGES MANUAL FOR A NEW FARE STRUCTURE FOR THE BLACK MOUNTAIN INTERCITY SERVICE – ROUTE 28

Transportation Director Ken Putnam said that this is the consideration of a resolution amending the Fees and Charges Manual for a new fare structure for the Black Mountain Intercity Service - Route 28.

The North Carolina Department of Transportation (NCDOT) informed the City in December 2008 that the Intercity funding for Routes 28 and 54 (Black Mountain and Weaverville, respectively) would be discontinued effective November 1, 2009 because a recent assessment of the routes determined that they were not compliant with the requirements of Circular 5311 (f).

This assessment was prepared by the Institute for Transportation Research and Education (ITRE) at the request of the NCDOT and included all of the intercity routes throughout the state.

The main concerns included publishing the scheduled stops at the Greyhound station, partnering with Greyhound, and making meaningful temporal connections to the Greyhound routes arriving and departing from the Asheville Greyhound bus terminal.

These routes are currently fully funded with state funds approved by the NCDOT Board of Transportation until October 31, 2009. Total current funding for Route 28 (Black Mountain) including the funding for Mountain Mobility's Black Mountain Trailblazer is $287,398 plus a local match of $37,500 for a total of $324,898. The City's contribution is only the farebox revenue.

The City worked closely with ITRE to develop service options and presented a proposal to NCDOT on July 10, 2009. NCDOT decided to only fund Route 28 (Black Mountain) because of the regional significance of the route. The proposal is pending NCDOT Board of Transportation approval. If approved, the route would be funded through June 30, 2010.

The proposed route would start and end at the Asheville Transit Center and turn into the Greyhound Bus station, inbound and outbound on Tunnel Road. The route would begin by using Tunnel Rd, to I-240 to I-40 and then use Exit 55/Porter Cove Road to US-70 to serve Warren Wilson College. Then the route would continue out US-70 to the towns of Swannanoa and then Black Mountain. The route would return inbound using the same route as it did on the outbound trip. This route would serve a total of six stops and provide a strong intercity connection between limited points east of Asheville and the Asheville Greyhound station. Six trips will be offered to and from Black Mountain. The headway will be 1 hour 45 minutes.

As part of the requirements to consider funding for this route, NCDOT requested the City to reevaluate and increase the revenues. Three options were considered: increase partnerships, increase current partner's participation, and increase fares. Staff approached the Town of Black Mountain, Warren Wilson College, and Ingles. At this time only Black Mountain has committed to increase its participation;

staff continues negotiations with Warren Wilson College and Ingles. Route 28 proposed budget is as follows:

Proposed Eight Month Operating Budget		
Cost	Revenue	
$281,661		Route #28 (Intercity) Operations
$55,000		Trailblazer (Feeder) Operations
$16,833		Marketing (Intercity & Feeder)
	$10,000	Warren Wilson College contribution
	$18,500	Town of Black Mountain contribution
	$5,500	Buncombe County contribution (including fare revenue from the Black Mountain Trailblazer $2,513)
	$13,348	Fare box revenue (Route #28, using TMP demand elasticity)
$353,494		Total Cost
	$47,348	Total Revenue
$306,146		**Operations Request**

The farebox revenue was calculated based on ridership the route will lose as a result of the fare increase (approximately 24%). The Transit Master Plan assumes that 0.43% of ridership will be lost for any 1% of fare increase. The contributions are based on what the partners expressed they will be willing to contribute, though Warren Wilson is still pending approval.

Please note that there would ***not*** be a direct fiscal impact to the City of Asheville for the anticipated operations budget. The City would ***not*** be responsible for any of the anticipated funds and the contribution will be limited to the farebox revenue.

The new fare structure is based on industry standards for Intercity routes and compares with Greyhound fares. The fare proposed for Route 28 is based on $.10 per mile, which determines two different tiers according to the destination. In addition, City staff is aware of the impact this fare increase will have on commuters and has developed an Intercity monthly pass to offset some of these costs; this source of revenue has to be approved by the North Carolina Board of Transportation:

Recommended Fare Changes in Red			
CASH FARE	**Adult**	Intercity from Asheville to Swannanoa	$1.50
		Intercity from Asheville to Black Mountain	$1.75
		Within City	$1.00
	Discount Pass**	Intercity from Asheville to Swannanoa	$0.75
		Intercity from Asheville to Black Mountain	$1.00
		Within City	$0.50
Monthly	**Adult**	Intercity	$55.00
		Within City	$15.00
	Discount Pass**	Intercity	$27.50
		Within City	$7.50

** Discount Passes apply to all seniors 65+, individuals with disabilities, Medicare recipients and students in elementary, middle and high school, ages 6-19

The growth in ridership observed on Route 28 (64% 2006-2009), as well as on the Black Mountain Trailblazer (27% 2006-2009) since their inception, is a clear indication of the invaluable service these routes are providing to the community. The routes, now in their eighth year of operation, are carrying over 60,000 passengers a year.

Year	Total Ridership	Percent increase
Route 28		
FY2009	**55038**	31%
FY2008	**38216**	8%
FY2007	**35140**	44%
FY2006	**19727**	
Trailblazer		
FY2009	**7815**	-1%
FY2008	**7892**	6%
FY2007	**7392**	23%
FY2006	**5688**	

Although there is not now and there would not be a future direct fiscal impact to the City of Asheville, if the NCDOT chose not to fund the subject route, one position would be eliminated.

This action complies with the City Council Strategic Operating Plan in the green and sustainable focus areas by seeking ways to fully leverage funding from the State and other funding sources for regional transportation improvements and to establish a multi-modal transportation plan including sidewalks, bike paths, signal preemption, transit and other system improvements.

City Council passed a resolution on June 23, 2009, affirming the importance of Intercity Transit Service. The Transit Commission has also supported the continuation of the intercity routes.

The subject item was reviewed by the City Council's Finance Committee on September 29, 2009, and it was agreed that the item should move forward to City Council.

Pros:

- This action is a step toward retaining the service and funding for the subject route.
- This action does not commit the City of Asheville to disburse any funds for the operation of the subject route.

Con:

- None

City staff recommends that City Council approve a resolution amending the Fees & Charges Manual for the fare structure in order to keep the Black Mountain Intercity Service - Route 28 in operation.

Councilman Mumpower said that he was approached by a person who explained the necessity of continuing the Asheville - Weaverville route. He asked for Council to re-consider the route which will end on October 31. He provided Council with copies of a petition containing 30 names of individuals which use the bus for mainly work and school. The petitioners also suggest a revised plan for bus service just in the morning and in the evening, leaving out three middle trips, which will save money.

Mayor Bellamy said that the adoption of the Transit Master Plan will be coming to Council on October 27 at which time all routes will be evaluated. Staff was instructed to evaluate that particular route

to see what options would be available, along with the budget figures. A suggestion was made to see what type of transportation Buncombe County has started in that direction as well.

Mr. Christopher Sean Hollifield stressed to Council the need to re-consider a revised Weaverville route with one in the morning and one in the evening. People need the bus for transportation to work and to school.

Councilman Newman suggested Mr. Hollifield and those who signed the petition talk with the Buncombe County Commissioners as well as the Weaverville Town Council, especially since the Town of Weaverville said they didn't want that service. He felt the City taxpayers shouldn't be financially responsible carry a transit service outside the City limits and we need some partners to make that happen. He hoped we can provide some assistance, but others need to step forward.

Councilman Mumpower felt that transportation is one of our best social services and what might be a small increase to us is dramatic to others.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Russell moved for the adoption of Resolution No. 09-218. This motion was seconded by Councilman Miller and carried on a 5-1 vote, with Councilman Newman voting "no".

RESOLUTION BOOK NO. 32 – PAGE 236

D. RESOLUTION NO. 09-219 - RESOLUTION AMENDING THE FEES & CHARGES MANUAL TO ALLOW ADJUSTING OF GOLF COURSE RATES TO MEET MARKET CONDITIONS

Parks, Recreation and Public Facilities Director Roderick Simmons said that this is the consideration of a resolution amending the Fees & Charges Manual to allow for a fee adjustment policy for the Municipal Golf Course.

In the fall 2008, the Recreation Board recommended to City Council the full slate of proposed Fiscal Year 2009-10 fees charged for services of the Asheville Parks, Recreation and Cultural Arts Department. The fees included fees charged at the Asheville Municipal Golf Course. The fees were then approved by City Council. Since then, change in the local golf market, economy and changes to the structure and expectations of the golf course budget has occurred.

The golf course is an enterprise fund and is expected to operate within a balanced budget with no subsidy from the City of Asheville general fund. To accomplish that, the golf course revenue and expenses must balance, and managers need the tools to make adjustments to both during the course of the fiscal year as changes in the local golf market, economy and golf conditions vary. This has been increasingly apparent in the last fiscal year as local golf courses have adjusted golf fees down and offered golf incentives during a particularly difficult economic period.

Staff is recommending the following fee adjustment policy

Proposed Fee Adjustment Policy

- The setting of the seasonal fees within the fee ranges would be proposed by staff and then reviewed by the Director of the Parks, Recreation and Cultural Arts Department and The Finance Director prior to implementation.

- If it is deemed necessary to change fees during a season there would be a minimum two week public posting at the golf course prior to fees being changed.

- Golf Course fees will be set with sensitivity to the surrounding market. Prior to fee being adjusted, staff will produce a competitive analysis of specific fees in the market, and fees will be set to optimize total revenues and balance the budget.

- Golf Course fees will never be adjusted higher than fees adopted by City Council during the annual fees & charges process.

In July 2009 the Recreation Advisory Board reviewed and approved the fee adjustment proposal which included (1) establishing green fees within a fee range that will allow managers to make adjustments as needed but stay within the approved fee range, (2) adjust the fixed fee for the senior weekday pass and the 30-day pass, and (3) adjust fixed golf cart fees. The fee adjustments are projected to generate additional revenue in Fiscal Year 2009-10.

This action complies with the City's Council Strategic Operating Plan in that it to offers a standard of living that is affordable and attainable for people of all income levels. This action also complies with the Parks, Recreation, Cultural Arts and Greenways Master Plan in that it provides a pricing philosophy conveying the value of the experience through an equitable fee structure that encourages participation.

Pros:
- Respond to year-round weather conditions and still attract a sustainable volume of customers
- Remain competitive with other area golf courses
- Assist in making the golf course an appealing golf destination

Con:
- We do not have experience with a flexible fee schedule.

The exact impact that this flexible pricing strategy will have on total golf course revenue is unknown at this time; however, the proposed fee adjustment policy is expected to contribute to a balanced golf course enterprise fund. Staff will measure at regular intervals the impact of seasonal adjustments on total revenues and will ensure that appropriate price points are established accordingly.

Staff is recommending City Council approve a resolution amending the Fees & Charges Manual allowing a fee adjustment policy for implementation at the Municipal Golf Course.

After a brief discussion initiated by Mayor Bellamy about the feasibility of privatizing the golf course, it was the consensus of Council to instruct Mr. Simmons to send a question to his List Serve of all his counterparts in the county to see what percentage of their golf courses are privatized, if they have saved money, what were the cost savings were and what were the antidotals. After that is reported back to Council, then Council can determine if they want staff to spend the time for a true analysis of privatization.

When Mayor Bellamy asked for public comments, none were received.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Russell moved for the adoption of Resolution No. 09-219. This motion was seconded by Councilman Mumpower and carried unanimously.

RESOLUTION BOOK NO. 32 – PAGE 237

At 7:05 p.m., Mayor Bellamy announced a short recess.

E. URTV INC. ACTION PLAN

City Attorney Oast said that Council has heard a number of issues regarding URTV Inc. and has asked for more information from the URTV Board. We have received some additional information on September 30 amplifying the information we had received previously, along with a request from URTV requesting renewal of the management agreement with the City. The current management agreement with URTV expires on November 23, 2009. Pursuant to the terms of the agreement, the city is obligated to respond to URTV's request to renew the agreement within 60 days of receiving the request.

Staff recommends a 90-day delay in renewing the management agreement with URTV to allow for staff time to review the package of information submitted by URTV with its request to renew the agreement and to research and develop terms for a new agreement for City Council consideration. During the 90-day extension, staff would develop proposed terms for a new management agreement, including clauses that (1) address compliance with open meetings and public records law and (2) specify the funding amount and payment terms for the duration of the agreement. The additional time would also allow staff to determine what impact, if any, the expiration of the local franchise agreement with Charter Communications will have on public access. The additional time could also be used by the Boards and Commissions Committee and the URTV board to work through any unresolved concerns expressed in the July 20 letter. Per the current management agreement, the terms of the existing agreement would continue until a new agreement is reached.

Staff met with the Boards & Commissions Committee earlier in the day and their consensus was to recommend to City Council that staff draft a new management agreement covering a period of 90 days, including clauses that address compliance with open meetings and public records laws. The Committee also specified prorating URTV's payment by granting them one quarter of the total annual amount until a longer term agreement could be executed. In addition, the Committee reaffirmed their request of the original Board structure.

Vice-Mayor Davis, Chair of the Boards & Commissions Committee, noted that Council is still receiving letters indicating transparency problems with URTV. The City has the ability to appoint two Board members and to fund it and this 90 day delay is our sincere way to say that we want URTV to be a success, but we want to make sure the initial intent is being accomplished.

Rev. Christopher Chiaronmonte spoke in support of URTV and felt that they had no problems except for those who are not part of URTV.

Mr. John Blackwell suggested Council entertain proposals from other individuals or groups to manage URTV and that Council retain the right to reject any and all proposals.

Ms. Davyne Dial also suggested Council entertain proposals from others in the community to manage URTV Inc. She said that there are five or six completely built out television stations in the County and given the economy, she suggested combining some of those facilities.

Mr. Alan Ditmore felt the URTV membership dues should be cut, along with the expense of the facility fee.

Mayor Bellamy said that staff will be bringing back a revised management agreement in the near future.

VI. NEW BUSINESS:

A. DISCUSSION OF 24/7 ENERGY CONSERVATION IN CITY BUILDINGS AND THE POTENTIALS OF ENERGY SAVINGS PERFORMANCE CONTRACTING

Exploring the Potentials of 24-7 Climate Control Systems for All City Buildings

Councilman Mumpower said that the problem, from observation, is that city buildings have wide fluctuations in temperature at differing times of day – with an assumption that our HVAC and other energy

use systems such as lighting are not programmed or managed on a consistent basis. In view of the number of city government buildings, there seem to be strong potentials for savings and environmental impact through more intentional energy management practices.

His proposal is that the Council majority instruct the city administration to assess potentials for incrementally establishing 24/7 energy management programs for all city buildings.

Suggested methods include (1) We can use our own staff, knowledgeable community resources, and city funding resources to act; (2) We can explore the Energy Savings Performance Contracting (ESPC) approach that provides consultation, facility upgrades, and funding without impact on city resources; see paragraph below; (3) Staff can initiate immediate common sense policies and audit compliance on an informal basis; and (4) We can establish an "Energy Conservation Award" for employees who flag opportunities for success.

Potentials of Energy Savings Performance Contracting

Councilman Mumpower said that the following is Information on ESPC (Energy Savings Performance Contracting): (1) Guaranteed Energy Savings Performance Contracting (ESPC) is an innovative method for purchasing energy-saving improvements in buildings. Many State agencies face increasing energy costs and the need to replace worn-out equipment, but lack the funds to make building improvements. Energy performance contracting has four distinguishing features that address this and other common problems: (a) A *single procurement* is used to purchase a complete package of services in which one contractor is accountable for design, purchase, installation, maintenance, and operation of the equipment to ensure optimum performance; (b) The package of services includes financing of all the project costs, so *no up-front money is needed;* (c) An energy performance contract is structured so that payments to the performance contractor are contingent on the actual level of savings achieved (or energy produced). The savings produced by the project are greater than its cost; thus, a performance contract pays for itself. Since payments to the contractor are contingent on the savings achieved, it is in the contractor's interest to maximize the energy savings. This translates into increased dollar savings for State agencies. In other words, the program is supported by *utility bill savings which are used to pay for the improvements;* and (d) All utility savings are *guaranteed* by the performance contractor; (2) NC General Statute G.S. 143-64.17b encourages any public agency, municipality, county, state college or university and school districts to improve energy efficiency and technology infrastructure through a guaranteed Energy Savings Performance Contract; (3) Benefits include: (a) Replace aging equipment with new equipment; (b) Access to 3rd party financing for needed capital energy improvements; (c) Improved facility energy efficiency and reduced energy costs; (d) Reliable and persistent long-term energy saving project performance; (e) Enhanced local economies through the ESCO's use of local subcontractors; (f) Decreased equipment repairs and lower maintenance costs; (g) Freed-up budget dollars to fund other activities; and (h) Reduced Greenhouse Gas (GHG) Emissions; and (4) Increasing use in Southeast; UNC-Asheville, City of Knoxville, Mecklenburg County.

Models include (1) The Federal Government has noted from audits that they waste dramatic revenue through poor energy management in a majority of Federal facilities. They are in the process of addressing this issue; and (2) Additional models and information for consideration can be found at the several sites.

Councilman Mumpower moved to instruct City staff to explore in greater detail the near and long term potential for energy savings performance contracting for reducing energy costs for city buildings, equipment and other aspects of local government. This motion was seconded by Councilman Russell.

City Manager Jackson said that this is covered in the Sustainability Management Plan and we have considerable experience with energy audits for our buildings.

Councilman Mumpower said that two instances have been brought to his attention that the City is not as intentional about this as we could be, nor are we moving on a timely basis.

Councilman Newman said that we have established a citizens committee of Sustainable Advisory Committee on Energy & the Environment (SACEE) and have dedicated very talented staff to these specific goals. The idea of using a company to work with us on our organizational goals to reduce energy use is not an original idea. There are some advantages for that approach and some disadvantages. If you believe you have good people in-house to do these things, then oftentimes it makes sense to do them yourself than letting another company capture that economic value. He encouraged Councilman Mumpower to take these ideas to SACEE and talk to them because many of these things are already underway.

When Councilman Russell withdrew his second, Councilman Mumpower's motion died for lack of a second.

B. EVALUATION OF MONTFORD COMMONS GAP FINANCING REQUEST

Chief Financial Officer Ben Durant said that this is the consideration of policy direction for a proposed Montford Commons Public/Private Partnership.

In September 2007, City Council adopted a Conceptual Master Plan for the Montford Commons Urban Village. City Council approved an amendment to the plan in June of 2009 which increased the plan's development density and changed the proposed mix of uses by increasing the plan's residential space and decreasing the commercial space.

The $60.6 million development project, located near the historic Montford neighborhood, will be built out in three phases and will combine multi-family and single-family housing, commercial business, and traffic and pedestrian improvements. A key aspect of this project is its potential for addressing urban blight.

Proposed Partnership

Frontier Syndicate, the developer of this project, has subsequently requested establishment of a public/private partnership with the City that would involve public financing of approximately $9 million of public infrastructure improvements through Project Development Financing (or project development financing, based on North Carolina General Statute nomenclature). A public investment of $9 million will bring the total value of the project to approximately $70 million. Frontier Syndicate's request for a partnership is based on the assumption that the additional property taxes and public purpose benefits generated by the project will offset the cost of any city and county public investment.

Policy Questions

Frontier Syndicates' proposed public-private partnership involves two policy questions:

1. Should staff proceed with exploring a public-private partnership that uses Project Development Financing to support the public infrastructure improvements?

It is staff's recommendation not to pursue Project Development Financing (also known as Tax Increment Financing) as a means of supporting the public infrastructure improvements associated with the Montford Commons project. Based on preliminary analysis, this project does not appear to be suitable for Project Development Financing (PDF). Discussions with underwriters, as well as the Local Government Commission reveal that there is currently no market for PDF's at a reasonable interest rate. Additionally, staff believes the level of complexity and cost of issuance expenses associated with PDF's cannot be justified based on the size and scope of the requested public investment. Further, based on information we have received to date from Frontier Syndicate, the estimated city and county property tax revenue ($575,000) that will be produced by the development is insufficient to cover the projected debt service costs ($900k) associated with a PDF for $9 million in public infrastructure improvements.

2. *Does the Montford Commons Urban Village project have sufficient merits to justify further due diligence and negotiations with the developer regarding the exploration of a public private partnership and other means of support?*

Staff believes that the answer to this question is yes and that it has been previously answered through the normal planning and zoning process. The Montford Commons project appears to be consistent with the City's 2025 Plan, Smart Growth Policies, Strategic Operating plan and other official plans of the City, offering the following merits:

- The project encourages infill redevelopment.
- The Urban Village projects proposes a mixture of housing types and an efficient use of land through their promotion of density;
- The project provides a walkable community within the development, into the adjacent neighborhood and to downtown;
- The project is located on an existing bus line which supports and encourages alternative transportation options and preserves the capacity of area roadways

Though this project does not appear to be suitable for PDF, there may be other financing mechanisms by which the City and County can provide financial support for the related public infrastructure improvements. This support would have to be provided at a level that is affordable and makes economic sense for the size and scope of the project. In order to determine what level of public financial support, if any, should be provided, staff recommends that additional due diligence is provided. Specifically, Frontier Associates should produce a financial feasibility analysis of their project at the developer's expense, using an independent financial advisor to be selected by the City and County.

The central question in the financial feasibility analysis is "what is the true financial gap associated with this project, and is the request for public financial support reasonable based on anticipated costs, revenues, acceptable rates of return for the developer, and the projected value of the public purpose benefits". Such an analysis would be similar to processes we've used with other major development projects in which public financial investment was requested.

On September 29, 2009, the Finance Committee reviewed this report and recommended forwarding it to City Council for full review and consideration.

There is no financial impact to the City and County. The cost of the financial feasibility analysis will be borne by Frontier Syndicate.

City staff recommends proceeding with a financial feasibility analysis, the results of which will be presented to City Council for further policy consideration.

Councilman Russell, Chair of the Finance Committee, supported this action and approved it moving onto the full Council for consideration.

A representative of Frontier Associates explained how their project has become fairly complex from a financial standpoint. He said they need the money for the infrastructure piece (roads, waterline, sewer lines, etc.), noting that the project will not succeed without City or County assistance.

Rev. Christopher Chiaronmonte spoke in support of the study since the developer will be paying for it.

Mr. Durant responded to Councilman Mumpower in that the City has not done any Product Development Financing and explained the public/private partnership with Biltmore Park. With this project, after the analysis is done staff will review it and then look at what options might be available.

Councilman Mumpower felt the City should not be giving anyone special deals, but if we are giving special deals to some people we should give consideration to others.

In response to Mayor Bellamy, Mr. Durant said that the analysis will determine the gap and then staff will make a recommendation as to whether it's reasonable for the City to offer some kind of options.

In response to Mayor Bellamy, Mr. Durant said that the Local Government Commission (LGC) will require a lot more information than what we are attempting to provide in this first phase of analysis. The first phase of the analysis is broadly looking at the pro formas and determining the gap. But if we decide to move forward with a development agreement and do Product Development Financing, there is a lot more information the LGC would require before they would approve a project of this type. The analysis would be a lot more complex and rigorous at that point. Part of the LGC's responsibility would be help us minimize our risk and there would be provisions in any type of agreement that would help us minimize that risk and give us assurances that the tax value that is projected would actually come to fruition.

Mayor Bellamy noted that the City and others will be looking at this issue on a regular basis, as the LGC has experience with projects across the state.

Councilman Russell moved to produce a financial feasibility analysis of Montford Commons project, at the developer's expense, using an independent financial advisor to be selected by the City and County. This motion was seconded by Councilman Miller and carried unanimously.

C. MAYOR UPDATE ON N.C. METROPOLITAN MAYORS COALITION

Mayor Bellamy briefly updated Council on some of the activities of the N.C. Metropolitan Mayors Coalition. They recently had a conference which addressed the issues of transportation needs in North Carolina and solutions to urban crime. They will be additional follow-up and she will keep Council updated.

Mayor Bellamy also noted that she is serving on the September 23-24, 2010, Fall Retreat of the N.C. Metropolitan Mayors Coalition Planning Committee. The Coalition has asked for a point of contact from City staff. It was the consensus of Council to have a representative of the City Manager's Office serve on the Planning Committee with Mayor Bellamy to assist in necessary tasks associated with this retreat.

D. APPOINTMENT OF A MEMBER TO THE TOURISM DEVELOPMENT AUTHORITY

Vice-Mayor Davis said that the term of Herman Turk (owner or operator of a hotel, motel or other taxable tourist accommodation with more than 100 rental units) expired on August 30, 2009.

On September 8, 2009, it was the consensus of Council to interview Bob Patel. That interview occurred on October 13, 2009.

It was the consensus of Council to instruct the City Clerk to prepare the proper paperwork to appoint Mr. Bob Patel as a member of the Buncombe County Tourism Development Authority (representing the owner or operator of a hotel, motel or other taxable tourist accommodation with more than 100 rental units) to serve a three-year term, term to expire August 30, 2012, or until his successor has been appointed. The formal action will be placed on the October 27, 2009, agenda.

E. APPOINTMENT OF A MEMBER TO THE URTV INC. BOARD OF DIRECTORS

Vice-Mayor Davis said that the term of Sandra Bradbury, as a member of the URTV Inc. Board of Directors, expired on June 30, 2009.

On September 8, 2009, it was the consensus of Council to interview Stephanie Weil. That interview occurred on October 13, 2009.

It was the consensus of Council to instruct the City Clerk to prepare the proper paperwork to appoint Ms. Stephanie Weil as a member of the URTV Inc. Board of Directors to serve a two-year term, term to expire June 30, 2011, or until her successor has been appointed. The formal action will be placed on the October 27, 2009, agenda.

F. BOARDS & COMMISSIONS

It was the consensus of Council to interview the following people for a vacancy on the Asheville-Buncombe Historic Resources Commission: Susan Eggerton, Susan West and John King Dean.

It was the consensus of Council postpone interviews for the vacancy on the Recreation Board until it was determined if there is a recommendation from the Board.

It was the consensus of Council to interview the following people for a vacancy on the Sustainable Advisory Committee on Energy & the Environment: Duncan McPherson, David Brown and Claude Chandler.

It was the consensus of Council to interview the following people for a vacancy on the Tree Commission: Josh O'Conner, Kathleen Zeren and Amy Kemp.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Alan Ditmore urged Council to consider domestic partner benefits.

Rev. Christopher Chiaronmonte asked for clarification if people are prohibited from sitting on sidewalks. He also expressed his disappointment in prohibiting smoking on public property when people in downtown Asheville must breath the fumes from cars, buses, motorcycles, etc. Mayor Bellamy asked that Rev. Chiaronmonte work with the City Manager Jackson regarding his concerns.

The following claims were received by the City of Asheville during the period of September 1-24, 2009: Paul E. Vliek (Police), Robert Earwood (Water), Christopher Wallin (Police), Jeffrey Harwood (Water), Progress Energy (Water), Diana Harmon (Police), Diana Harmon (Police), AT&T (Water), Charter Communications (Water), Davon Embler (Water), Christie Abeling (Water), Mary D. McQuaide (Streets), AT&T (Water) and AT&T (Water). These claims have been referred to Asheville Claims Corporation for investigation.

The following claims were received by the City of Asheville during the period of September 25 – October 8, 2009: Brandon G. Wienkle (Fire), David Masrie (Parks & Recreation), Mike Budd (Water), Guy Caserta (Water), Kathy Watson (Streets), Kathleen Eiselt (Water) and Randy Rogers (Streets). These claims have been referred to Asheville Claims Corporation for investigation.

The City has received a Petition on September 28, 2009, from Quality Properties, L.P. vs. the Board of Adjustment of the City of Asheville. This lawsuit involves the Board of Adjustment denying a sign permit to change the sign panels on a billboard sign. This will be handled in-house.

VIII. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 8:19 p.m.

Magdalen Burleson
CITY CLERK

MAYOR

Tuesday – October 27, 2009 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Jan B. Davis; Councilwoman Robin L. Cape; Councilman Kelly M. Miller; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; Councilman William A. Russell Jr.; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Bellamy led City Council in the Pledge of Allegiance.

INVOCATION

Councilman Newman gave the invocation.

I. PROCLAMATIONS:

A. INTERNATIONAL CITY MANAGER ASSOCIATION

Mayor Bellamy was pleased to present City Manager Jackson with a plaque from the International City Manager Association recognizing Mr. Jackson for 30 years of local government service. She then recognized City Manager Jackson's wife Kathy and their son Mark.

All Council members thanked him for his leadership.

B. RECOGNITION OF BB&T FOR THEIR DONATION TO SUPPORT A VOLUNTEER PROJECT AT THE SHILOH COMMUNITY CENTER

Mayor Bellamy said that we have invited representatives of BB&T to join us today so we can show our appreciation for their recent partnership with the City of Asheville on a volunteer project at the Shiloh Community Center. For 3 days, BB&T staff donated their time, energy, and expertise to making our Shiloh Community Center a more attractive place for citizens to gather. Fifty volunteers painted the community room and halls of the Center and the out buildings near the ball field, refurbished the stage floor, replaced outdoor bleacher seating and installed plants to make the front and entrance of the building more inviting. The materials for the improvements were paid for with a donation of $10,600 that the local BB&T branches designated for this project. In addition to the work completed during the workday, the donation will allow the Center to purchase new tables and chairs for the community room and a new recycling center for the facility. We also want to take this opportunity to thank Kathy Connor and her Parks and Public Facilities crew members for their outstanding support for this project and the BB&T volunteers.

This project is a great example of the community partnerships we are in the process of building through the creation of a comprehensive City of Asheville volunteer program. By facilitating a greater level of coordination among staff on these projects, we make it easier for members of our community to identify volunteer opportunities and take part with a high level of success.

She then introduced Mr. Mike Willet, BB&T's Regional President, who then introduced members of his team, explained the BB&T Lighthouse initiative and shared a brief slide show on the project.

C. PROCLAMATION PROCLAIMING OCTOBER 2009 AS "BREAST CANCER AWARENESS MONTH"

Councilwoman Cape read the proclamation proclaiming October 2009 as "Breast Cancer Awareness Month" in the City of Asheville. She presented the proclamation to Ms. Earleen Bennett, representing Beauty Through Cancer, who thanked City Council for their support.

D. PROCLAMATION PROCLAIMING NOVEMBER 2009 AS "ADOPTION AWARENESS MONTH"

Vice-Mayor Davis read the proclamation proclaiming November 2009 as "Adoption Awareness Month" in the City of Asheville. He presented the proclamation to Ms. Alisha Davis, from the Buncombe County Department of Social Services, who briefed City Council on some activities taking place during the month and thanked City Council for their support.

E. PROCLAMATION PROCLAIMING NOVEMBER 2009 AS "NATIVE AMERICAN INDIAN HERITAGE MONTH"

Mayor Bellamy read the proclamation proclaiming November 2009 as "Native American Indian Heritage Month" in the City of Asheville. She presented the proclamation to Ms. Renissa Walker, Manager Kituwah Preservation & Education Program for the Eastern Band of Cherokee Indians, and her mother Ms. Myrtle Driver. Ms. Driver is a tribal elder and a fluent speaker. She was named Beloved Woman in 2007 – the highest honor a female member of the tribe can hold. She also worked with Charles Frasier to translate his novel 13 Moons. The only occurrence in history that a contemporary novel was translated into an indigenous language. Ms. Walter thanked City Council for their support.

II. CONSENT AGENDA:

At the request of Councilman Mumpower, Consent Agenda Items "B", "C" and "J" were removed from the Consent Agenda for discussion and/or individual votes.

At the request of Councilman Miller, Consent Agenda Item "H" was removed from the Consent Agenda due to a conflict of interest.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON OCTOBER 13, 2009

B. RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH THE N.C. DEPT. OF CRIME CONTROL AND PUBLIC SAFETY IN ORDER TO RECEIVE A GRANT FOR A MEDICAL AMBULANCE BUS

BUDGET AMENDMENT TO RECEIVE A GRANT FROM THE N.C. DEPT. OF CRIME CONTROL AND PUBLIC SAFETY FOR A MEDICAL AMBULANCE BUS

These items were removed from the Consent Agenda for discussion and/or individual votes.

C. RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH THE N.C. DEPT. OF CRIME CONTROL AND PUBLIC SAFETY IN ORDER TO RECEIVE A GRANT TO CONTINUE THE BUILD OUT OF THE STATEWIDE VIPER INTEROPERABLE COMMUNICATION SYSTEM

BUDGET AMENDMENT TO RECEIVE A GRANT FROM THE N.C. DEPT. OF CRIME CONTROL AND PUBLIC SAFETY IN ORDER TO RECEIVE A GRANT TO CONTINUE THE BUILD OUT OF THE STATEWIDE VIPER INTEROPERABLE COMMUNICATION SYSTEM

These items were removed from the Consent Agenda for discussion and/or individual votes.

D. RESOLUTION NO. 09-222 - RESOLUTION ADOPTING THE FIRE DEPARTMENT'S STANDARDS OF RESPONSE COVERAGE

Summary: The consideration of a resolution adopting improved standards of response coverage for the City of Asheville for fire and rescue emergencies.

The Commission on Fire Accreditation International (CFAI) has established minimum emergency response performance objectives for accredited fire departments. CFAI requires these minimum response standards to be adopted by City Council. These requirements are:

Service Level Objectives for Distribution

For all incidents in the coverage area with a population density classification of Metropolitan or Urban, the first due unit shall arrive with 5 minutes and 12 seconds travel time, 90 percent of the time.

For all incidents in the coverage area with a population density classification of Suburban, the first due unit shall arrive within 6 minutes and 30 seconds travel time, 90 percent of the time.

For all incidents in the coverage area with a population density classification of Rural, the first due unit shall arrive within 13 minutes travel time, 90 percent of the time.

Service Level Objectives for Concentration

For all incidents in the coverage area with a population density classification of Metropolitan or Urban, the second due unit shall arrive within 10 minutes and 24 seconds travel time, and the remaining total effective response force shall arrive within 10 minutes and 24 seconds travel time, 90 percent of the time.

For all incidents in the coverage area with a population density classification of Suburban, the second due unit shall arrive within 10 minutes and 24 seconds travel time, and the remaining total effective response force shall arrive within 13 minutes travel time, 90 percent of the time.

For all incidents in fire management zones with a population density classification of Rural, the second due unit shall arrive within 18 minutes and 12 seconds travel time, and the remaining total effective response force shall arrive within 18 minutes and 12 seconds travel time, 90 percent of the time.

This was reviewed by the Public Safety Committee on October 20, 2009, and was recommended for approval.

This action complies with the Strategic Operating Plan by making Asheville a safer city, based on approved metrics for similarly sized cities.

Pros:

- Adoption of these standards of response coverage will allow the fire department to be in compliance of the minimum requirements to be an accredited agency.
- Firefighter and citizen safety will be enhanced by ensuring quick response and

operational effectiveness during emergencies.
- The fire department is currently meeting these minimum standards.

Con:
- None identified.

There is no fiscal impact associated with the adoption of these minimum standards.

City staff recommends that City Council adopt the standards of response coverage described in this report.

RESOLUTION BOOK NO. 32 – PAGE 240

E. RESOLUTION NO. 09-223 - RESOLUTION AUTHORIZING THE MAYOR TO CONVEY PROPERTY ON DR. MARTIN LUTHER KING JR. DRIVE TO SIMON WESTERN PROPERTIES LLC

Summary: The consideration of a resolution authorizing the sale of property off of Martin Luther King Jr. Drive to Simon Western Properties, LLC.

This vacant tract of land off of Martin Luther King Jr. Drive (PIN # 9648-58-8911-00000) was acquired by the City as part of the East End/Valley Street Community Improvement Program. It is a sloping to steep parcel measuring approximately 0.67 acre±. The parcel has frontage on Martin Luther King Jr. Drive and is appropriate for sale as a residential lot with current zoning RM8.

An appraisal prepared by Dry Ridge Appraisal Service, LLC dated August 28, 2009 estimates the fair market value of the property to be at $115,000. Simon Western Properties LLC submitted a bid to purchase the parcel in the amount of $115,000. This bid was advertised in the Asheville Citizen-Times on September 25, 2009. No upset bids have been received.

The Parks, Recreation and Cultural Arts Department has verified that this parcel does not lie within an existing or proposed greenway trail according to the Greenway Master Plan and therefore is not an advantageous property to be held for use by the City of Asheville. The Streets Division of the Public Works Department has indicated that the parcel is not needed for street/right-of-way purposes at Martin Luther King Jr. Drive or Dundee Street. Staff has determined that the highest and best use of the parcel is infill development.

The sale of this parcel complies with the Strategic Operating Plan in that income from the sale of this property will directly benefit the Community Development Block Grant Program (CDBG), thus providing funding towards affordable housing.

Pros:
- The sale will be at fair market value as established by the upset bid process.
- It will return property not needed for public use to the tax rolls.
- It will transfer responsibility for maintenance to the private sector.

Con:
- There is no negative impact.

The proceeds from the sale of this parcel will be CDBG Program Income in the amount of $115,000.

Economic Development staff recommends adoption of the resolution which will authorize conveyance of the property in conclusion of the sale by upset bid.

RESOLUTION BOOK NO. 32 – PAGE 241

F. RESOLUTION NO. 09-224 - AUTHORIZING THE CITY MANAGER TO APPROVE THE PURCHASE OF AN AREARAE RAPID DEPLOYMENT KIT SYSTEM PACKAGE FOR HAZARDOUS ENVIRONMENT DETECTION FOR THE IDENTIFICATION OF UNKNOWN CHEMICAL GAS AND RADIATION FOR HAZARDOUS MATERIAL RESPONSE UTILIZING STATE HOMELAND SECURITY GRANT MONEY THAT HAS ALREADY BEEN RECEIVED

Summary: The consideration of a resolution authorizing the City Manager to approve the purchase of an AreaRAE Rapid Deployment Kit System Package in the amount of $116,092.00 for Hazardous Environment Detection for the identification of unknown chemical gas and radiation for hazardous material response utilizing State Homeland Security Grant Money that has already been received.

This item will be procured through a previously Council approved grant (Resolution 08-92) through the U.S. Dept. of Homeland Security and the Office of Domestic Preparedness State Homeland Security Grant Number: Fiscal Year (FY) 2007-GE-T7-0048-1016 to implement the State Homeland Security Strategy. This grant approved the NC Hazardous Materials Response Team Asheville (RRT-6) to procure equipment to be better prepared and respond to manmade and natural emergencies and disasters. The equipment to be procured through this grant will be used in the field to detect and identify unknown and potentially hazardous chemical gases and radiation during a hazardous material response.

Five other RRT's have procured this specific piece of equipment from RAE or a distributor of RAE for the purchase of the AreaRAE. Due to compatibility of existing equipment on RRT-6, there are no other comparable pieces of equipment that will be able to identify specific hazardous gases and radiation.

The equipment consist of a one-to five sensor gas detector equipped with a wireless radio frequency modem which allows the unit to communicate and transmit readings and other information on a real-time basis with a remote located base controller. This will enable the Asheville Fire Department Personnel to establish an emergency perimeter by setting out multiple monitors at strategic locations, then backing off to a position of safety to monitor readings over the wireless link.

This equipment will become the property of the City of Asheville.

This was reviewed by the Public Safety Committee on October 20, 2009, and was recommended for approval.

This action complies with the Strategic Operating Plan by better equipping the Hazardous Materials Team with upgraded equipment; and will assist in making Asheville a safer city, based on appropriate metrics for similarly sized cities.

Pros:

- The Department of Crime Control and Public Safety, Division of Emergency Management, provided the funds for the purpose of upgrading Asheville and Western North Carolina's terrorism response capabilities.
- The equipment is state of the art and will better address the risk of hazardous materials incidents.
- All statewide regional response teams will be comparably equipped and interoperability will be realized should an event require the resources of additional teams.
- This equipment is immediately available to Asheville residents and businesses. This level of equipment would most likely not be able to be obtained through the city's general budget process.

- Firefighter and citizen safety will be enhanced.

Con:

- The City of Asheville will be responsible for maintenance and upkeep of the equipment.

This equipment allows the City to enhance services without an increase in capital expenditures.

City staff recommends that City Council approves the resolution for the purchase of the AreaRAE through funds made available from State Homeland Security Grant Number: Fiscal Year (FY) 2007-GE-T7-0048-1016 to protect Asheville and Western North Carolina.

RESOLUTION BOOK NO. 32 – PAGE 242

G. RESOLUTION NO. 09-225 - RESOLUTION AUTHORIZING THE MAYOR TO ENTER INTO AN AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION FOR INSPECTION OF BRIDGES ON THE MUNICIPAL STREET SYSTEM

Summary: The consideration of a resolution authorizing the Mayor to enter into a municipal agreement with the N.C. Dept. of Transportation (NCDOT) on a bi-annual basis for the re-inspection of bridges on the Municipal Street System.

In 1983 the Federal Highway Administration developed the Federal Off-System Bridge Replacement Program. The program is funded 80% through federal funds and 20% through City funds and administered by the NCDOT. To remain eligible for replacement funds and avoid penalties, it is required that all public bridges are inspected every two years. The NCDOT offers three options for meeting the bi-annual inspection requirements – (1) do the inspection with City forces; (2) the City to hire a consultant to do the inspections; (3) the City to allow NCDOT to do the inspections through a qualified private engineering firm.

Since 1983 the City has elected to execute an agreement with NCDOT to accomplish the required inspection thorough their personnel or engineering consultants. This process allows high numbers of bridges to be inspected under one contract or operation, and therefore, results in minimum inspection cost per bridge. It is anticipated the inspections cost to be $2,600 per bridge for the upcoming inspections. The City has 31 bridges requiring inspection this year, which brings the cost to $80,600. The City's share of 20% is $16,120. Funds for the City's share are budgeted in the Public Work's Contracted Services budget line.

This action complies with City Council's Strategic Operating Plan in the Focus Areas – Fiscal Responsibility and Safe

Pros:

- Lower cost of bridge inspection due to high volume.
- Use of qualified engineering firms through NCDOT.
- Fulfills requirement for bi-yearly bridge inspections.
- Indicates areas for repair for Public Works staff.

Cons:

- None identified

The fiscal impact is that the expenditure of $16,120 is budgeted in Public Work's Contracted Services.

City staff recommends adoption of the resolution authorizing the Mayor to execute a

municipal agreement with the NCDOT for inspection of bridges.

RESOLUTION BOOK NO. 32 – PAGE 252

H. RESOLUTION APPOINTING A MEMBER TO THE TOURISM DEVELOPMENT AUTHORITY

This item was removed from the Consent Agenda due to a conflict of interest.

I. RESOLUTION NO. 09-227 - RESOLUTION APPOINTING A MEMBER TO THE URTV INC. BOARD OF DIRECTORS

Summary: The term of Sandra Bradbury, as a member of the URTV Inc. Board of Directors, expired on June 30, 2009.

On September 8, 2009, it was the consensus of Council to interview Stephanie Weil.

On October 13, 2009, it was the consensus of Council to appoint Ms. Stephanie Weil as a member of the URTV Inc. Board of Directors to serve a two-year term, term to expire June 30, 2011, or until her successor has been appointed.

RESOLUTION BOOK NO. 32 – PAGE 254

J. RESOLUTION AUTHORIZING THE CITY MANAGER TO ACCEPT GRANT FUNDS THROUGH THE BULLETPROOF VEST PARTNERSHIP PROGRAM THROUGH THE U.S. DEPT. OF JUSTICE

BUDGET AMENDMENT TO ACCEPT GRANT FUNDS THROUGH THE BULLETPROOF VEST PARTNERSHIP PROGRAM THROUGH THE U.S. DEPT. OF JUSTICE

These items were removed from the Consent Agenda for discussion and/or individual votes.

Mayor Bellamy asked for public comments on any item on the Consent Agenda, but received none.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilwoman Cape moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Miller and carried unanimously.

ITEMS REMOVED FROM THE CONSENT AGENDA FOR INDIVIDUAL VOTES

B. RESOLUTION NO. 09-220 RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH THE U.S. DEPT. OF HOMELAND SECURITY FOR A NON-MATCHING GRANT FOR A MEDICAL AMBULANCE BUS

ORDINANCE NO. 3797 - BUDGET AMENDMENT TO RECEIVE A NON-MATCHING GRANT FROM THE U.S. DEPT. OF HOMELAND SECURITY FOR A NON-MATCHING GRANT FOR A MEDICAL AMBULANCE BUS

Summary: The consideration of a resolution authorizing the City Manager to accept a non-matching grant in the amount of $357,000 from the U.S. Dept. of Homeland Security Fiscal

Year 2009 Homeland Security Grant Program; and the associated budget amendment in the amount of $357,000.

The U.S. Dept. of Homeland Security (DHS) has made funds available to increase emergency preparedness and response through the Fiscal year 2009 Homeland Security Grant Program. The N.C. Dept. of Crime Control and Public Safety, Division of Emergency Preparedness, has been charged with distributing these funds through Disaster Preparedness Regions (DPR) throughout North Carolina. The City of Asheville was a member of DPR 6 when these funds were applied for. Geographically located Medical Ambulance Buses which have the capability of transporting large numbers of patients in major incidents has been identified as a prevailing need in which the Fiscal Year 2009 Grant Funds should be expended. This need was identified utilizing NC Emergency Management's Annual Capabilities Assessment Program. The City of Asheville has been identified as the prime location to locate this Medical Ambulance Bus within our DPR. This grant provides for the City of Asheville to receive this Medical Ambulance Bus.

The grant is a non-matching grant.

This was reviewed by the Public Safety Committee on October 20, 2009, and was recommended for approval.

This action complies with the Strategic Operating Plan by better preparing the Hazardous Materials Team to assist in making Asheville a safer city, based on approved metrics for similarly sized cities.

Pros:

- DHS will provide $357,000 in non-matching funds for the purpose of purchasing a Medical Ambulance Bus for Asheville and Western North Carolina to improve major incident emergency response capability.
- Firefighter and citizen safety will be enhanced.
- The City of Asheville will have an excellent resource to shelter displaced citizens during inclement weather or emergency incidents.

Con:

- The City of Asheville will be responsible for operation and maintenance of this vehicle.

There is no fiscal impact associated with this grant, as it is non-matching.

City staff recommends that City Council accept the non-matching grant from DHS, to enhance the fire department's capabilities to serve Asheville and Western North Carolina, and the associated budget amendment.

Interim Fire Chief Scott Burnett responded to various questions from Councilman Mumpower regarding the critical nature of this investment.

Councilman Mumpower felt we will be using borrowed money that will need to be paid back by our children and grandchildren.

Vice-Mayor Davis moved for the adoption of Resolution No. 09-220. This motion was seconded by Councilman Miller and carried on a 6-1 vote, with Councilman Mumpower voting "no."

Vice-Mayor Davis moved for the adoption of Ordinance No. 3797. This motion was seconded by Councilwoman Cape and carried on a 6-1 vote, with Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 25 - PAGE 451

C. RESOLUTION NO. 09-221 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH THE U.S. DEPT. OF HOMELAND SECURITY FOR A NON-MATCHING GRANT TO CONTINUE THE BUILD OUT OF THE STATEWIDE VIPER INTEROPERABLE COMMUNICATION SYSTEM

ORDINANCE NO. 3798 - BUDGET AMENDMENT FROM THE U.S. DEPT. OF HOMELAND SECURITY GRANT FOR A NON-MATCHING GRANT TO CONTINUE THE BUILD OUT OF THE STATEWIDE VIPER INTEROPERABLE COMMUNICATION SYSTEM

Summary: The consideration of a resolution authorizing the City Manager to accept a non-matching grant in the amount of $250,000 from the US Department of Homeland Security FY 2009 State Homeland Security Grant Program, and the associated budget amendment in the amount of $250,000.

The U.S. Dept. of Homeland Security (DHS) has made funds available to increase emergency preparedness and response through the Fiscal Year 2009 State Homeland Security Grant Program. The N.C. Dept. of Crime Control and Public Safety, Division of Emergency Preparedness, has been charged with distributing these funds through Disaster Preparedness Regions (DPR) throughout North Carolina. The City of Asheville was a member of DPR 6 when these funds were applied for. Communication interoperability equipment has been identified as a prevailing need in which the Fiscal Year 2009 Grant Funds should be expended. This need was identified utilizing NC Emergency Management's Annual Capabilities Assessment Program. The City of Asheville has been identified as the prime location to locate this equipment within our DPR. This grant provides for the City of Asheville to receive this interoperability communications equipment. The equipment that will be purchased will be communications gateways that allow the statewide VIPER system functionality for responding jurisdictions on differing radio frequencies to communicate in emergencies.

The grant is a non-matching grant.

This was reviewed by the Public Safety Committee on October 20, 2009, and was recommended for approval.

This action complies with the Strategic Operating Plan by better preparing the Hazardous Materials Team to assist in making Asheville a safer city, based on approved metrics for similarly sized cities.

Pros:

- DHS will provide $250,000 in non-matching funds for the purpose of purchasing VIPER Interoperable Communications Gateways for Asheville and Western North Carolina to improve major incident emergency response capability.
- Firefighter and citizen safety will be enhanced.

Con:

- None identified.

There is no fiscal impact associated with this grant, as it is non-matching.

City staff recommends that City Council accept the non-matching grant from DHS, to enhance the fire department's capabilities to serve Asheville and Western North Carolina, and the associated budget amendment.

Councilman Mumpower supported improving our communications, but could not support the motion as it is using borrowed federal dollars.

Vice-Mayor Davis moved for the adoption of Resolution No. 09-221. This motion was seconded by Councilman Miller and carried on a 6-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 32 – PAGE 239

Councilman Newman moved for the adoption of Ordinance No. 3798. This motion was seconded by Councilwoman Cape and carried on a 6-1 vote, with Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 25 - PAGE 453

H. RESOLUTION NO. 09-226 - RESOLUTION APPOINTING A MEMBER TO THE TOURISM DEVELOPMENT AUTHORITY

Summary: The term of Herman Turk (owner or operator of a hotel, motel or other taxable tourist accommodation with more than 100 rental units) expired on August 30, 2009.

On September 8, 2009, it was the consensus of Council to interview Bob Patel.

On October 13, 2009, it was the consensus of Council to appoint Mr. Bob Patel as a member of the Buncombe County Tourism Development Authority (representing the owner or operator of a hotel, motel or other taxable tourist accommodation with more than 100 rental units) to serve a three-year term, term to expire August 30, 2012, or until his successor has been appointed.

Councilman Mumpower moved to excuse Councilman Miller from participating in this vote due to a conflict of interest. This motion was seconded by Councilman Russell and carried unanimously.

Councilman Russell moved for the adoption of Resolution No. 09-226. This motion was seconded by Councilman Newman and carried unanimously (Councilman Miller excused).

RESOLUTION BOOK NO. 32 – PAGE 253

J. RESOLUTION NO. 09-228 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ACCEPT GRANT FUNDS THROUGH THE BULLETPROOF VEST PARTNERSHIP PROGRAM THROUGH THE U.S. DEPT. OF JUSTICE

ORDINANCE NO. 3799 - BUDGET AMENDMENT TO ACCEPT GRANT FUNDS THROUGH THE BULLETPROOF VEST PARTNERSHIP PROGRAM THROUGH THE U.S. DEPT. OF JUSTICE

Summary: The consideration of (1) a resolution authorizing the City Manager to accept grant funds through the Bulletproof Vest Partnership (BVP) Program; and (2) the associated budget amendment, in the amount of $6,453, to cover partial costs of bulletproof vest for officers.

The City of Asheville Police Department currently participates in the U.S. Dept. of Justice BPV program. The funds allocated through this program are designed to offset departmental cost

associated with purchasing bulletproof vests. The City of Asheville is allocated $6,453. The acceptance of these funds and allocating to Patrol's safety equipment line will enable the purchase of 25 plus bulletproof vests.

This action complies with City Council's Strategic Operating Plan in the Focus Area - Safe - Asheville will be one of the safest and most secure communities when compared to similar cities.

Pros:

- Reduction in cost to the City of Asheville for the purchase of bulletproof vest
- Increase in officer safety by providing crucial safety equipment

Con:

- None

There is no fiscal impact to the City of Asheville by accepting these funds.

City staff recommends City Council adopt (1) the resolution authorizing the City Manager accept funds through U.S. Dept. of Justice for grant monies; and (2) the associated budget amendment, in the amount of $6,453.

Councilman Mumpower believed that we should be taking care of our own officers and not contributing to the extraordinary federal debt picture with our intra-city needs.

Vice-Mayor Davis moved for the adoption of Resolution No. 09-228. This motion was seconded by Councilman Newman and carried on a 6-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 32 – PAGE 255

Councilman Miller moved for the adoption of Ordinance No. 3799. This motion was seconded by Councilman Newman and carried on a 6-1 vote, with Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 25 – PAGE 456

III. PRESENTATIONS & REPORTS:

A. ECONOMIC STIMULUS PACKAGE UPDATE

American Recovery & Reinvestment Project Manager Brenda Mills updated Council on the City's American Recovery & Reinvestment Act (ARRA) contracting opportunities and upcoming event announcements for vendors.

STP-DA (North Carolina Department of Transportation)

We were notified through N.C. Dept. of Transportation that we could proceed with advertisements for two improvement projects funded by economic stimulus allocations. The projects include landscaping services for gateways and corridors in the downtown area and traffic signal upgrades.

The landscaping project includes the installation of decorative plant material and irrigation systems in the median islands, round about, and parking bulb outs along College Street from Spruce Street to Charlotte Street which was funded as an enhancement to the downtown transportation network. The project was originally developed as part of City Council's efforts to address the cleanliness and beautification of downtown Asheville.

The traffic signal upgrade project includes the replacement of signal lights and control panel boxes with the installation of pedestrian crossing signals on Fairview Road at the intersections of Onteora Boulevard and Cedar Street. This work will takes place next to Oakley Elementary School which will provide pedestrian safety, especially for school children.

Information about these projects and other ARRA bidding opportunities can be found at www.ashevillenc.gov/economicrecovery and/or the department's webpage.

Dingle Creek Watershed Improvements (NCDENR)

Plans are awaiting final approval from the N.C. Dept. of Environmental and National Resources to begin advertisement for ARRA funding under the State Revolving Loan fund for Dingle Creek Watershed improvements. We expect to begin advertisement by the end of October. These improvements will continue to work on the watershed by way of the Stormwater Master Plan by stopping impairments to the watershed via the urban runoff and reduction of the increased pollutant concentration in the area.

Pumping Station Improvements (NCDENR)

Water Resources has prepared and provided a compliance package to submit to NCDENR's Public Water Supply (PWS) Section on DBE outreach on the project and awaiting review of that documentation to proceed. Hickory Construction Company, the lowest bidder, will be recommended to PWS for the award of the construction contract in the amount of $328,474. Water Resources must receive written PWS approval prior to City Council awarding the contract to Hickory which we hope to bring for approval at your regular meeting on November 10th. This project will replace pumps that will increase production efficiency, save energy and improve water service for fire coverage.

Edward J. Byrne JAG Local Solicitation Grant (Department of Justice)

Request for proposals for this funding went out on Monday, October 19, 2009, to online vendors and posted on the State's Interactive Purchasing System (IPS). Asheville Police and Buncombe County Sheriff were allocated $372,630 with Asheville receiving $265,466 and Buncombe receiving $107,164. This is a predetermined amount of funds based on the Part 1 Uniform Crime Reporting Crimes.

The improvements will update the video security system within the Municipal Building, update and add key card access to doors as needed, and integrate an alarm system that makes internal notification of unauthorized entries to secure areas. Additionally, APD plans to purchase a SPEX AFIS system that will enable APD to scan and enter fingerprints and palm prints into a local system that will analyze the prints and compare with previous sets.

Upcoming Events & Information Sessions

Over 65 local vendors, non profits and citizens attended the October 15, 2009, local outreach seminar on ARRA update funding and doing business.

The next session will be hosted by the City of Asheville on November 18th from 9:30 a.m. to 12:30 p.m. at the City's Municipal Building Training Room. Notification has been provided to online vendors, community and minority businesses.

Councilman Mumpower was concerned that these are borrowed dollars that our children and grandchildren will have to repay which will have a significant impact on their future.

In response to Councilwoman Cape, City Manager Jackson said that the International City Manager Association is developing a model on the economic impacts of the stimulus dollars. We would also want to partner with the Chamber of Commerce on the tracking of job creation, the amount of money going to local contractors and the total economic impact on our local community.

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER THE MASTER PLAN AND REZONING FOR THE PROJECT IDENTIFIED AS HORIZONS, LOCATED AT 136, 176 AND 180 MERRIMON AVENUE AND 17 AND 23 ELOISE STREET FROM HIGHWAY BUSINESS DISTRICT, COMMUNITY BUSINESS I DISTRICT AND RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO URBAN VILLAGE DISTRICT FOR A MIXED USE DEVELOPMENT

Mayor Bellamy said that this public hearing was continued from January 15, 2008, at the applicant's request in order to work with the neighborhood, especially since a valid protest petition was submitted, which remains in effect. Then again on July 15, 2008, the public hearing was continued to October 28, 2008, at the applicant's request in that it became necessary, due to the recent economic conditions, the ownership group is currently exhausting opportunities and trying to secure financing and/or additional partners to help with the project economics. On October 28, 2008, at the applicant's request, this motion was continued to this date.

Mayor Bellamy said that on September 1, 2009, Mr. Chris Peterson requested this matter be removed from City Council consideration.

On October 23, 2009, the following letter was received from Mr. Marty Kocot, PE, from LandDesign Inc.: "The ownership group (Mr. Foster Shriner, Mr. Chris Peterson and Mr. Cam Pace) of the proposed "Horizons" Urban Village project have asked me to formally request an additional twelve (12) month extension on the Urban Village Rezoning currently in progress. We realize this request to extend this project again is a bit unusual but the economic conditions we are all experiencing are bit unusual as well. It is and has always been the desire of the partnership group to create a wonderful project on the Merrimon Avenue site as a gateway point to the City and an extension of time on the Urban Village Rezoning request for this project gives us the best chance to succeed. To date thousands of dollars have been spent crafting and guiding the project through TRC and P&Z only to have the economy delay us from obtaining the needed financing. We are hopeful that this additional time will allow the economic market to improve and the project to move forward for consideration by City Council. This project has the ability to create local jobs and help with the economic recovery."

After Mayor Bellamy asked for a two week extension to provide residents additional information, Councilman Mumpower moved to reschedule the consideration of this matter until November 10, 2009. This motion was seconded by Councilman Russell and carried unanimously.

B. PUBLIC HEARING TO CONSIDER THE ISSUANCE OF A CONDITIONAL USE PERMIT FOR THE PROJECT IDENTIFIED AS THE BUNCOMBE INTERMEDIATE SCHOOL SOUTH, LOCATED AT 305 OVERLOOK ROAD

ORDINANCE NO. 3800 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR THE PROJECT IDENTIFIED AS THE BUNCOMBE INTERMEDIATE SCHOOL SOUTH, LOCATED AT 305 OVERLOOK ROAD

City Attorney Oast reviewed with Council the conditional use district zoning process. This process is the issuance of a conditional use permit, which is a quasi-judicial site specific act. At this public hearing, all the testimony needs to be sworn.

City Clerk Burleson administered the oath to anyone who anticipated speaking on this matter.

After hearing no questions about the procedure, Mayor Bellamy opened the public hearing at 5:50 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

City Attorney Oast said that the Authorized Practice Committee of the North Carolina State Bar has issued an advisory opinion that appearing in a representative capacity for a party before a local governmental body in a quasi-judicial proceeding is the practice of law, especially with respect to such aspects of the hearing as examining or cross-examining witnesses, or advocating for legal conclusions or results. This does not prevent persons, including land use professionals, from presenting information or expressing opinions within their knowledge or area of expertise.

Urban Planner Jessica Bernstein submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Ms. Bernstein said that this is the consideration of the issuance of a conditional use permit for the project identified as Buncombe Intermediate School South, located at 305 Overlook Road, for a new 106,646 sq. ft. school building (Location and Aerial Maps – Attachments to City Exhibit 3).

The applicant is requesting review of site plans for the construction of a new intermediate school building and associated site improvements. This project is considered a Level III review pursuant to Section 7-5-9(a) of the UDO which designates review for institutional developments with a gross floor area of more than 100,000 square feet. The existing school campus on the parcel contains approximately 247,000 square feet and the total new construction is proposed at 106,646 square feet. Level III projects are reviewed as Conditional Use Permits in the Institutional District.

The project site consists of a 58.11 acre parcel located at Long Shoals and Overlook Roads in South Asheville. The parcel is zoned Institutional and surrounding properties are zoned RS-2, RS-4, RS-8, RM-6, RM16 and CBII. This site is currently the location of the Buncombe County – Roberson District campus which includes Valley Springs Middle School and Estes Elementary School.

The applicant is proposing to construct a new building on the southeastern corner of the parcel for an Intermediate School which will accommodate 5th and 6th grades in 47 classrooms. The structure is 106,646 square feet and two-stories in height (26'2" to the ceiling – 44'4" to the top of the highest architectural element) (Master Plan – Attachment to City Exhibit 3).

An existing access point from Long Shoals Road will be closed as a part of this proposal and all vehicular traffic will be routed to an entry and exit on Overlook Road. These new driveways provide access to the student drop-off area as well as a number of small vehicular use areas. This project review also includes improvements to an existing driveway from Long Shoals Road up to the Valley Springs Middle School building, as well as reconfiguration of the existing

vehicular use area and the construction of a new bus parking area. In total, there are 138 vehicular parking spaces as a part of this proposal (47 adjacent to Valley Springs Middle School and 91 for the new Intermediate School). There are also 20 bus parking spaces, located in between the existing middle school and the new facility.

Landscaping is required on this site and includes street trees, building impact landscaping, street buffer, parking lot landscaping and a Type A (20') property line buffer along a portion of the western property line that is adjacent to residential zoning districts. The plans include 18.56 acres of open space, which significantly exceeds the required amount (15% of lot area – 8.72). Some of this area includes playing fields.

Sidewalks will be extended along the project area, including Overlook Road and the existing driveway from Long Shoals Road to Valley Springs Middle School. There is already an existing sidewalk along Long Shoals Road (Internal Pathway – Attachment to City Exhibit 3). The plans include an accessible pathway located internal to the site, linking the three school buildings and playing fields. The applicant is hoping that school children walking from adjacent neighborhoods will enter the site for access on this pathway to the school buildings rather than walking along Overlook Road. There is also an internal pedestrian connector between the new Intermediate School parking area and the church's parking area along Living Savior Way. The school lot will be made available to church patrons for overflow parking needs.

There are several retaining walls proposed (located on the northern and southern ends of the new building). The maximum height of the walls is indicated at 16 feet. Any retaining walls over eight feet in height shall be faced with natural or artificial stone, brick, form-liner art or patterns or vegetation in order to avoid a stark appearance.

This project was approved with conditions by the Technical Review Committee (TRC) on September 21, 2009. Several members of the community were present and expressed concerns over the current heavy volume of traffic on Overlook Road and the potential danger for schoolchildren walking along Pinchot and Overlook Roads where there are presently no sidewalks. Several emails have been received expressing similar concerns, requesting that sidewalks be installed along the entire length of Overlook Road on both the west and east sides to accommodate pedestrian activity not only from the adjacent neighborhoods to the three schools and back but also to and from the Skyland Library, located on the east side of Overlook Road. The applicant expressed that they have designed an accessible pathway throughout the interior of the site, linking all three schools as well as the ball fields and open space areas. Concern was expressed by the community members in attendance that students may still attempt to walk along the roadway, regardless of the interior pathway, and that sidewalks are needed. Staff explained the potential difficulty in requiring installation of sidewalks on property under private control, not owned by the Buncombe County School Board, and that any requirement to pursue this option would have to be a condition placed upon the project City Council.

A representative from the Lutheran Church attended the meeting to speak in favor of the project and expressed some concerns about site work that will affect their property. The applicant addressed the concerns and will continue to work closely with the church. The church will be able to use school parking for overflow on Sundays and an accessible walkway from the school's parking lot to the church has been included in the plans.

The Planning & Zoning Commission voted unanimously (4-0) to recommend approval of this project at their meeting on October 7, 2009. A representative from the Biltmore Park Neighborhood Association's board was present to offer similar concerns as were expressed at the TRC meeting regarding the need for sidewalks along both sides of Overlook Road and the potential hazard towards pedestrians because of heavy and fast traffic volumes. Ken Putnam, Interim Transportation Director, presented information about the insufficiency of the existing right-of-way along the portions of the west side of Overlook Road where a cemetery currently exists. He explained that there may be the ability to install sidewalk there but it could involve significant

engineering, possible moving of plots and cooperation from the church. Planning & Zoning Commissioners expressed understanding of the community representative's comments and agreed that sidewalks would be best, but felt that the school is doing a more than adequate job addressing this issue by including the internal walkway. They included a condition of their approval that the applicant will continue to explore the feasibility of sidewalk installation along the west side of Overlook Road.

Ms. Bernstein noted that a letter has been received from Pastor Cecil Robinson, Mt. Zion Baptist Church, stating that a sidewalk on the west side of Overlook Road would conflict with their cemetery.

City Council must take formal action as set forth in Section 7-5-5(e)(3) of the Unified Development Ordinance (UDO), and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case pursuant to Section 7-16-2(c). Staff's review indicates that all seven standards are met as proposed in the site plan.

1. **That the proposed use or development of the land will not materially endanger the public health or safety.**
   The project will meet State building code requirements and will be reviewed in detail by the Technical Review Committee to ensure compliance with safety requirements.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.**
   The proposed use and development of the land is compatible with the natural and topographic features on the site in that the area intended for construction of the Intermediate School is where playing fields were previously located. This area is reasonably flat and any areas of topographic challenge will be appropriately managed through retaining walls.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.**
   The parcel containing the Buncombe County Roberson District schools is quite large (over 58 acres) and already contains two other school buildings (Valley Springs Middle School and Estes Elementary) so the use as a school campus has been established in this location. Schools are a complementary use to have in proximity to residential neighborhoods (located to the west and north) and should enhance the value of these abutting properties. The church, library and other various uses to the east and south are also compatible with this type of development and are not expected to see a decline in value (especially given that the other school buildings have been occupying this site for some time.

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.**
   The new Intermediate School will be located in the southeastern corner of this large parcel, which already contains two school buildings and associated open space and playing fields. As mentioned in #3, this is an appropriate location for an educational use and this use has been established on the site for some time.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.**

The Asheville City Development Plan 2025 proposes a Smart Growth development pattern by encouraging infill development, promoting walkability and furthering sustainability and green building through LEED certification). This project meets these objectives by locating the new school building on an existing school campus with significant infrastructure; installing an accessible pedestrian pathway internal to the site, linking all three school buildings, open space and ball fields to the surrounding neighborhood sidewalks; and seeking LEED certification. The Plan also recommends facilitating the effective functioning of public schools and to support the construction of new schools in areas that lend themselves to good neighborhood and community access. Multiple locations throughout the Buncombe County School system are integrating this Intermediate school concept, placing 5th and 6th grades in a separate facility.

This proposal works to achieve City Council's goals on being green by seeking LEED certification on the facility and safe by incorporating an accessible pedestrian pathway internal to the site, linking all three school buildings and playing fields while seeking to remove pedestrian activity from the roadway where infrastructure may not be adequate.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.**
   This proposed development is located near major road facilities and interstate connections. In addition, the project has been reviewed by the Technical Review Committee who found that existing infrastructure appears adequate and preliminary review has not revealed any problems for future service to the development.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.**
   The traffic impact study has been received and reviewed by staff. The two roadways that border this project (Overlook Road and Long Shoals Road) are maintained by NCDOT. Therefore, any proposed recommendations will ultimately need the approval of NCDOT. The review by City staff indicates that there will not be an adverse impact that is atypical to normal school ingress/egress scenarios assuming that the recommended mitigation factors are incorporated.

   The need for sidewalk installation along both sides of Overlook Road from Long Shoals Road up to Pinchot Drive has been raised by neighbors and members of the public due to a potential hazard between pedestrians and vehicles along Overlook. This project proposes an internal pathway to remove pedestrians from the street and safely accommodate travel between the three schools on this parcel, as well as new sidewalk along the west side of Overlook Road from Long Shoals Road up to Living Savior Way. Following the recommendation from the Planning & Zoning Commission, the applicant will continue evaluating the existing right-of-way along Overlook Road to determine feasibility of future sidewalk installation with existing uses on parcels under separate ownership.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Pros:

- The proposal satisfies a need to provide a new facility for 5th and 6th grade students on an existing school campus site.
- The applicant will be seeking LEED certification, meeting key "green building" goals of the City.
- The accessible pathway internal to the site links all three school buildings and playing fields, allowing for safe connectivity while removing pedestrians from the roadways where there may be conflict with inadequate sidewalk infrastructure on adjacent parcels.

- The parking area proposed with this project will be shared with the Living Savior Lutheran Church (adjacent to the north) for overflow parking on Sundays and there is an accessible walkway from the school property to the Church.

Con:

- Neighbors have expressed concern over existing traffic congestion and hazardous speeds along Overlook Road, where the primary ingress/egress to the Intermediate School is proposed.

Staff recommends approval of the Level 3 development proposal for a new Buncombe County Intermediate School - South.

Mr. Dean Shatley, representing the Buncombe County Board of Education, gave Council background information on the project. He explained the internal sidewalk route through the campus from Pinchot to Long Shoals Road which will eliminate any pedestrian conflict with vehicular activity on Overlook Road. They did make contact with the Mt. Zion Baptist Church and received a letter stating that a sidewalk on the west side of Overlook Road would disturb the graves. Lastly, any delay in approval will delay school opening for one entire school year due to their financing and construction schedules.

Mr. Chris Day, with Civil Design Concepts representing the applicant, briefed the Commission on how this innovative and green project began. After looking at the site, they felt they could eliminate one of the access points along Long Shoals Road which would help them create a route that would start at Long Shoals, come through the site and go to Estes Elementary, with an accessible pedestrian route that has no conflict with vehicles. The City, the N.C. Dept. of Transportation and the Buncombe County School Board have been working to install pedestrian heads at the crossing of Pinchot, across Overlook, over to Springside. They feel like with the internal connection and the new crosswalk they have provided the safest route they can to get students through the area and off Overlook Road. This will be a LEED certified project with many learning opportunities for the students. He urged the Commission to support this project.

Rev. Christopher Chiaronmonte felt that we should not segregate the children by age in that they not only learn from teachers, but fellow students. He also suggested the schools be used to house the homeless after hours.

After rebuttal, Mayor Bellamy closed the public hearing at 6:06 p.m.

When Councilman Mumpower suggested a smaller sidewalk through the church's property on the west side of Overlook Road, Mr. Day showed a picture of the area in question (Applicant Exhibit 1) and said they have evaluated a sidewalk on that property and explained that the most appropriate place to safely cross the road is at the intersection of Springside and Pinchot. When you bring the students on campus, we are able to keep an eye on them.

In response to Councilman Mumpower, Transportation Director Ken Putnam felt the County Schools have a good alternative of moving the sidewalks in internally. However, long term, we still need to actively pursue sidewalks along Overlook Road as they are identified on the Pedestrian Plan as one of the main areas to do this. He explained there has been some headway made on the east side of Overlook Road in terms of sidewalks.

When Mayor Bellamy voiced concern of the students who park in Mt. Zion Baptist Church's parking lot and cross the street to the high school and those who come from the Biltmore Park area and cross Overlook Road to the high school, Mr. Putnam said that they are working with the N.C. Dept. of Transportation (NCDOT) and the County Schools to identify a problem to solve that concern. Using a map (City Exhibit 4), he showed where the NCDOT is going to build 400 feet of sidewalk at the intersection of Pinchot Drive and Overlook Road, add

pedestrian signals and a cross-walk, and then the City will extend the sidewalk to the first entrance of the High School.

Mayor Bellamy asked that City staff update the Biltmore Park Homeowners Association with the NCDOT intersection project.

When Mayor Bellamy asked if there are any improvements planned for the entrance to the library, Mr. Putnam said there was not. He did say another project might be to bring the sidewalk from Pinchot Drive down to that area, but we still need to work with the Church. He said the City will contact the Church and see what can be worked out.

In response to Councilwoman Cape about signs, Mr. Putnam said that traffic counts were taken on Overlook Road in two locations. He noted that in both cases, the speed limit is 35 mph with an 85 percentile around 40 mph.

Councilman Mumpower moved for the adoption of Ordinance No. 3800, granting a conditional use permit adopting the proposed plan for the Buncombe County Intermediate School – South, subject to the following conditions: (1) The project shall comply with all conditions outlined in the TRC staff report; (2) All site lighting must comply with the City's Lighting Ordinance and be equipped with cut-off fixtures and directed away from adjoining properties and streets. A detailed lighting plan will be required upon submittal of detailed plans to be reviewed by the Technical Review Committee; (3) All existing vegetation that is to be preserved must be clearly indicated and dimensioned on the site, landscape and grading plans; (4) The building design, construction materials and orientation on site must comply with the conceptual site plan and building elevations presented with this application. Any deviation from these plans may result in reconsideration of the project by the reviewing boards; and (5) This project will undergo final review by the TRC prior to issuance of any required permits. This motion was seconded by Councilwoman Cape and carried unanimously.

ORDINANCE BOOK NO. 25 - PAGE 457

C. PUBLIC HEARING TO CONSIDER THE ISSUANCE OF A CONDITIONAL USE PERMIT FOR THE PROJECT IDENTIFIED AS THE DAVIS ARENA RENOVATION AND ADDITION, LOCATED AT THE WNC AGRICULTURAL CENTER FOR THE RENOVATION AND ADDITION TO THE EXISTING BUILDING AND THE RECONFIGURATION OF VEHICULAR USE AREAS AND UPGRADES TO SITE LANDSCAPING

ORDINANCE NO. 3801 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR THE PROJECT IDENTIFIED AS THE DAVIS ARENA RENOVATION AND ADDITION, LOCATED AT THE WNC AGRICULTURAL CENTER FOR THE RENOVATION AND ADDITION TO THE EXISTING BUILDING AND THE RECONFIGURATION OF VEHICULAR USE AREAS AND UPGRADES TO SITE LANDSCAPING

City Attorney Oast reviewed with Council the conditional use district zoning process. This process is the issuance of a conditional use permit, which is a quasi-judicial site specific act. At this public hearing, all the testimony needs to be sworn.

City Clerk Burleson administered the oath to anyone who anticipated speaking on this matter.

After hearing no questions about the procedure, Mayor Bellamy opened the public hearing at 6:22 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

City Attorney Oast said that the Authorized Practice Committee of the North Carolina State Bar has issued an advisory opinion that appearing in a representative capacity for a party before a local governmental body in a quasi-judicial proceeding is the practice of law, especially with respect to such aspects of the hearing as examining or cross-examining witnesses, or advocating for legal conclusions or results. This does not prevent persons, including land use professionals, from presenting information or expressing opinions within their knowledge or area of expertise.

Urban Planner Jessica Bernstein submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Ms. Bernstein said that this is the consideration of the issuance of a conditional use permit for the project identified as the Davis Arena Renovation and Addition, located at the WNC Agricultural Center for the renovation and a 14,706 sq. ft. addition to the existing 54,461 sq. ft. building; and the reconfiguration of vehicular use areas and upgrades to site landscaping (Aerial Map – Attachment to City Exhibit 3).

The applicant is seeking a Level III site plan review for the renovation and addition of the existing Davis Arena located on the grounds of the Western North Carolina Agriculture Center. The property is zoned Commercial Industrial (CI) and is located at 765 New Airport Road across from the Asheville Regional Airport and within the City's corporate limits.

The project proposes to renovate and expand the existing Davis Arena located on the western perimeter of the main midway. The facility is currently 54,461 square feet and the proposed renovation and addition will add another 14,706 square feet for a total of 69,167 square feet (Site Plan – Attachment to City Exhibit 3). The cumulative square footage of the previous Level I and II reviews coupled with the square footage of the proposed addition met the threshold for a Level III site plan review.

The addition to the existing building will include new bathrooms, offices, meeting rooms and a main lobby. Other improvements to the site include the reconfiguration of vehicular use areas along the midway and upgrades to site landscaping. There is an existing outdoor rink used for livestock shows and similar events that is currently located to the south of the Davis arena but is proposed to be relocated to the northeast of the arena (Landscaping Plan – Attachment to City Exhibit 3).

The majority of the site is currently developed with numerous buildings, outdoor rinks, accessory structures and parking lots. The site is host to the yearly Mountain State Fair and numerous other indoor and outdoor events. Open space is interspersed throughout the site as well as existing parking areas and stormwater detention facilities. The UDO requires that the site surrounding the area proposed for expansion be brought into compliance with landscaping standards. In this case, the majority of the main midway which runs the length of the property in a north to south configuration and terminates in a central round about is affected. The midway is home to the majority of rides and other attractions for the Mountain State Fair. Other events held onsite utilize the midway for parking. For these reasons, the applicant has requested and received approval of an alternative compliance request from the Tree Commission to the parking lot landscaping standards for the area surrounding the arena. The majority of required

landscaping will be shifted from the parking areas in the midway to the south and east of the arena. Access to the site is provided via multiple existing entrances along New Airport Road.

The subject site is bounded to the north by property owned by the State used in conjunction with the WNC Agriculture Center and located outside of the City's jurisdiction, to the east by I-26 and associated ROW, to the south by property located in the Town of Fletcher, and to the west by the Asheville Regional Airport Road and zoned Industrial.

The Commercial Industrial District is established to provide areas for a wide range of commercial and industrial uses including: light manufacturing, wholesale, warehousing, services, retail sales, offices, and residential uses. The district is established where environmental conditions and urban infrastructure are adequate to support commercial and industrial development.

At their September 21, 2009, and October 7, 2009, meetings the Technical Review Committee (TRC) and Planning and Zoning Commission (P&Z) approved this project subject to the conditions outlined in the staff report.

At the time of this writing, staff has received no communications from adjacent property owners or citizens regarding this project. There was no public comment regarding this project at the TRC and P&Z meetings.

City Council must take formal action as set forth in Section 7-5-5(e)(3) of the Unified Development Ordinance (UDO), and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case pursuant to Section 7-16-2(c). Staff's review indicates that all seven standards are met as proposed in the site plan.

1. **That the proposed use or development of the land will not materially endanger the public health or safety.**
   This has been reviewed by City staff and appears to meet all public health and safety related requirements. The project must meet the technical standards set forth in the UDO, the Standards and Specifications Manual, the North Carolina Building Code and all other applicable laws and standards that protect the public health and safety.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.**
   The proposed use and development of the land is compatible with the natural and topographic features on the site. The entirety of the subject parcel is relatively flat with only about a 20 foot change in topography distributed across the site.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.**
   The few surrounding properties are being utilized for high intensity uses similar to the Agriculture Center, and the proposed development is not expected to have any negative impacts on adjacent properties.

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.**
   The Agriculture Center is located between the heavily traveled corridors of I-26 and New Airport Road. The proposed addition to the arena is located in the center of the largely developed Agriculture Center site. The scale and coverage of this site is consistent with the pattern of development evident on surrounding parcels like the airport.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.**
The application of compatible infill growth supports several goals and objectives as described in both ***The Asheville City Development Plan 2025*** *and the* ***Strategic Operating Plan.***

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.**
This proposed development is located near major road facilities and interstate connections. In addition, the project has been reviewed by the Technical Review Committee who found that existing infrastructure appears adequate and preliminary review has not revealed any problems for future service to the development.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.**
The proposed project has been reviewed by the City's traffic engineer and is not expected to cause undue traffic congestion or create a traffic hazard. The proposed development did not trigger the need for a traffic impact study.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Pros:
- The renovation and addition provides for upgrades to an aging facility that hosts a number of local and regional events.
- The project is consistent with several City goals and strategies related to economic and infill development.
- The property will be further improved by additional plantings on a site that is largely devoid of landscaping.

Con:
- None noted

Staff recommends approval of the Level III development proposal for the renovation and addition to the Davis Arena at the Western North Carolina Agricultural Center.

Mr. Christopher Sean Hollifield spoke in support of improving the Agricultural Center.

After rebuttal, Mayor Bellamy closed the public hearing at 6:27 p.m.

In response to Councilwoman Cape, Mr. Brian Moffitt, representing the applicant, said that Asheville is the lease holder of this property and the improvements will be funded by the N.C. Dept. of Agriculture state appropriations.

Councilman Mumpower spoke in support of the City negotiating the lease in favor of keeping this gem alive and making it more special.

Councilman Mumpower moved for the adoption of Ordinance No. 3801, granting a conditional use permit adopting the proposed plan for the Davis Arena Renovation and Addition, and the reconfiguration of vehicular use areas and upgrades to site landscaping, subject to the following conditions: (1) The project shall comply with all conditions outlined in the TRC staff report; (2) All site lighting must comply with the City's Lighting Ordinance and be equipped with

cut-off fixtures and directed away from adjoining properties and streets. A detailed lighting plan will be required upon submittal of detailed plans to be reviewed by the Technical Review Committee; (3) All existing vegetation that is to be preserved must be clearly indicated and dimensioned on the site, landscape and grading plans; (4) The building design, construction materials and orientation on site must comply with the conceptual site plan and building elevations presented with this application. Any deviation from these plans may result in reconsideration of the project by the reviewing boards; and (5) This project will undergo final review by the TRC prior to issuance of any required permits. This motion was seconded by Vice-Mayor Davis and carried unanimously.

ORDINANCE BOOK NO. 25 - PAGE 463

V. UNFINISHED BUSINESS:

A. RESOLUTION NO. 09-229 - RESOLUTION ACCEPTING THE TRANSIT MASTER PLAN REPORT FOR THE CITY OF ASHEVILLE PREPARED BY HDR INC.

Mr. Robert E. Bush, AICP, Transit Principal of HDR Engineering, reviewed the agenda as follows: (1) Major study findings; (2) Public input; (3) Service design & scheduling guidelines; (4) Short-term service concept; (5) Longer term additions; and (6) Cost impacts

He explained the major findings: (1) 5,371 average daily riders; (2) Most active routes – 1 Haywood & 11 Montford; (3) Least active daytime routes – 54 Weaverville & 5 Charlotte; and (4) Most active locations – Transit Center, Central Business District, Pisgah View Apartments, Hillcrest Apartments, Walmart.

Service attributes include (1) Riders are satisfied or very satisfied with all service aspects except hours of operation; (2) Best attributes: (a) Safety; and (b) Fare; and (3) Worst attributes: (a) Hours of operation; (b) Frequency; and (c) On-time.

When asked to name one improvement, the most needed improvements include: (1) Sunday service; (2) More frequent service; (3) More sidewalks; (4) Evening service; and (5) Service to more areas.

Most requested new services include: (1) Long Shoals area; (2) Haw Creek area; (3) New Leicester Highway; (4) Enka/Candler area; (5) Asheville Airport; and (6) Fairview.

Master Plan goals: (1) More frequent service on main corridors; (2) Marketing to choice riders; (3) Improve service for captive riders; (4) More environmental consciousness; (5) Target tourism market; (6) Emphasize health and wellness aspects; and (7) Make transit part of the community lifestyle.

Service design principles include: (1) Cost effective service; (2) More frequent service; (3) Establish focal points outside of Central Business District; (4) Minimize Route Deviations – (a) Reduce travel time penalty for through riders; (b) Exceptions made for major destinations; and (c) Sidewalk connections preferable to deviations; and (5) Dial-a-ride zones converted to fixed route or eliminated.

Scheduling improvements include (1) Weekdays (a) All routes should offer at least 12-hour service from 6 a.m. to 6 p.m.; (b) All routes offer 60-minute; and (c) headways, except for express/intercity; and (c) Evening service combined with daytime; (2) Saturdays (a) Same schedule as weekdays; and (b) No service offered on lower ridership routes; and (3) Sundays (a) Sunday service added, with at least 1 route on all trunk corridors; and (b) Initial span from 10 a.m. to 7 p.m..

He showed a picture of ATS recommended concept routes and the overall route map.

Short-term capital (Year 1) improvements include: (1) Replacement vehicles for buses past their useful life; (2) Automatic Vehicle Locators (AVL); (3) ADA-compliant shelters, signage, other amenities; (4) Additional sidewalks; and (5) Maintenance facility repairs and expansion.

Short-term cost considerations are (1) ATS Annual Operations costs $6.1 million, ~$700,000 increase; (2) Route rationalization ~$500,000; (3) Sunday service ~$200,000; (4) Marketing ~$300,000; and (5) Decrease in intercity ~$300,000.

City share increase (Year 1) is (1) Increase in City Share ~$1.2 million; and (2) Without any service changes, City Share increases ~$400,000.

Causes of Cost increase are (1) Network Redesign - $500,000; (2) Sunday Service - $200,000; (3) Marketing - $300,000 – Less Additional Fare Revenue - $200,000 – Plus Loss of FTA Funds - $400,000 Equals City Increase of $1.2 Million.

Potential issues include (1) Coordination with Housing Authority of the City of Asheville; (2) Discontinuation of some Saturday service; (3) Ticket and pass increase; and (4) Local funding increase

Near-term (Years 2-5) enhancements for operating changes (1) More crosstown frequency (30 minutes); (2) Increase frequency on one trunk corridor; (3) Two shuttle routes; (4) More Sunday service; and (5) New Long Shoals Express.

Near-term capital improvements are (1) Two new neighborhood transit centers; (2) Improvements/expansion of operating facility; (3) More shelters, sidewalks, amenities; (4) Expansion & replacement buses; and (5) AVL enhancements.

Long-term (Years 6-10) enhancements are (1) Improved frequency on two trunk routes; (2) More Sunday service; (3) Four additional shuttles; and (4) Two additional express routes.

Long-term capital improvements would be (1) Replace maintenance facility; (2) Replace downtown transit center; (3) Two neighborhood transit centers; (4) Expansion and replacement buses; and (5) Continued ITS expansion.

Transit Master Plan Detailed Information from Staff Report

"The City of Asheville, in an effort to make the service provided by the transit system more efficient, hired HDR Engineering, Inc. of the Carolinas (HDR) and its partners in August 2008 to develop the Transit Master Plan (TMP) for public transportation in Asheville and neighboring areas of Buncombe County.

As part of the process a steering committee was established to review the process and provide stakeholder guidance.

The purpose of the plan is to evaluate the current operations of Asheville Transit, collect input from stakeholders and make recommendations to improve the efficiency of the system.

The overall goals for the Transit Master Plan, as established with the Steering Committee included the following items:

- More frequent service on the main travel corridors
- Marketing to choice riders
- Improving service for captive riders
- More environmental consciousness

- Target tourism market
- Emphasize the health and welfare aspects
- Make transit part of the community lifestyle

To accomplish this purpose, several tasks are included in a three-phased approach:

- Evaluation of existing demographic and transit conditions
- Development of an overall vision for transit services in Asheville and surrounding communities
- Creation of a five-year implementation plan and 10-year vision plan

The results of the Transit Master Plan will chart the course for ATS for the next 10 years and beyond.

The public involvement portion of the Transit Master Plan was extensive and well attended. The consultants applied an on-board rider survey to determine service attributes and improvements the riders would like to see. This survey was to target mostly transit riders.

A second survey was applied targeting the non-rider population to determine what is needed to bring them to ride the system.

Two public meetings were held (January and April); the first one was to collect information among the population, riders and non-riders, about the most important attributes for the transit system and their requests. This meeting was attended for almost 200 persons.

The second meeting was to present the recommendations and receive feedback from the citizens (about 120 persons attended this meeting). Additionally the final draft report was published to receive public comment. About 200 comments were received during the period.

As mentioned earlier, this process was overseen by the Steering Committee which was composed by the all the stakeholders that represent transit riders, including residents. Among them were City Departments, Buncombe County, N.C. Dept. of Transportation, Land of Sky Metropolitan Planning Organization, Transit Commission, Chamber of Commerce, Housing Authority, etc.

The major requests made by the citizens that participated in the public involvement process are:

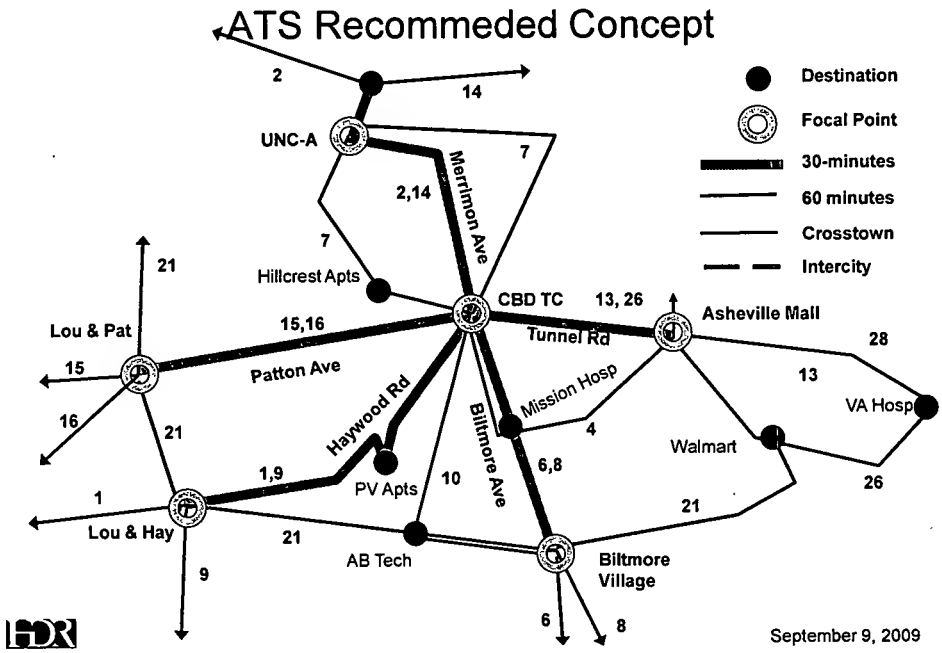
- Sunday service (most requested)
- More frequent service (second most requested) [major reason for non-riding]
- Sidewalks and shelters [also issue for non-riders]
- More evening service until midnight
- Additional transfer points without having to come downtown
- New routes, including express [also issue for non-riders]

Based on the analysis of the data and public input, HDR developed a concept that will restructure the whole system. The principle is to concentrate service on the main trunk corridors and to create additional routes to intersect with the trunk routes. The routes are connected through hubs to facilitate transfers. The whole concept seeks to increase mobility options for transit riders through and interconnected network. The recommended service changes are summarized below.

<u>Short-term recommendations:</u>

For routing changes, the principals are:

- More frequent service on heaviest corridors
- Additional transfer locations outside of downtown
- Improve on-time performance
- Reduce the number of deviations on a route; build sidewalks instead
- Eliminate dial-a-ride or convert to a fixed route
- Speed up longer routes
- Keep it simple for new users



For schedules, the guiding principals are:

- All routes should offer 12-hour service from 6 AM to 6 PM
- Additional trips added based upon demand
- Every route should have at least hourly service
- Evening route should be combined with its daytime route
- Sunday service added for 8 hours on the most productive routes
- Saturday service eliminated on less productive routes

Capital improvements

- Replacement vehicles for buses past their useful life
- Automatic Vehicle Locators (AVL)
- Shelters, signage, other amenities
- Additional sidewalks

<u>Short-term cost considerations (2011 - 1st year)</u>

- ATS Annual Operations costs $5.4 million
  - ✓ Route rationalization ~$500,000
  - ✓ Sunday service ~$200,000
  - ✓ Marketing ~$300,000
  - ✓ Loss of FTA funds ~$480,000

- Increase in fare revenue from smaller discounts (~$200,000)

- City share increase $1.2 million
- Capital costs
  - ✓ ~$5.1 million – 80% Federal, 10% State

Near-term recommendations (2012 – 2015).

Near-term enhancements:

- Operating Changes
  - ✓ More crosstown frequency (30 minutes)
  - ✓ Increase frequency on one trunk corridor
  - ✓ Two shuttle routes
  - ✓ More Sunday service
  - ✓ New Long Shoals Express

Capital Improvements

- Two new transit centers
- Improvements/expansion of operating facility
- More shelters, sidewalks, amenities
- Expansion & replacement buses
- ITS enhancements

Near-term cost considerations (2nd - 5th year)

- ATS Annual Operations costs $6.5 to $9.5 million
  - ✓ Route rationalization ~$500,000 - $550,000
  - ✓ Marketing ~$250,000 - $275,000
- Increase in fare revenue from smaller discounts
- City share increase $700,000 to $2.3 million (based on first year)
- Capital costs
  - ✓ ~$4.7 to $7.7million – 80% Federal, 10% State

Long-term recommendations (2016 – 2020)

Long-term enhancements

- Improved frequency on two trunk routes
- More Sunday service
- Four additional shuttles
- Two additional express routes

Capital Improvements

- Replace maintenance facility
- Replace downtown transit center
- Two neighborhood transit centers
- Expansion and replacement buses
- Continued ITS expansion

Long-term cost considerations (6th - 10th year)

- ATS Annual Operations costs $6.5 to $9.5 million
  - ✓ Route rationalization ~$560,000 - $620,000
  - ✓ Marketing ~$300,000 - $450,000

- Increase in fare revenue from smaller discounts
- City share increase $2.7 to $3.5 million (based on fifth year)
- Capital costs
  - ✓ ~$16.5 to $2 million – 80% Federal, 10% State

This project is in alignment with the Strategic Plan adopted by City Council in that the TMP supports the areas of environmental sustainability, promoting emission reductions through transit and identifying a sustainable funding structure for transit. The project also project complies with the City Development Plan – 2025, Transportation Goals and Strategies, as follows: (1) Goal VI: Develop a transit system that is capable of meeting the needs of all residents of and visitors to the region; and (2) Goal X: Develop a comprehensive set of implementation strategies intended to reduce local vehicle miles traveled in accordance with the State of North Carolina transportation policies.

Pros

- The adoption of the TMP and further implementation will allow the City to operate the transit system in a more efficient way, rationalizing the routes and proposing new service.
- The TMP will improve reliability and performance, therefore improving quality of life.
- The new routing and service will increase mobility options for the community, potentially attracting more riders and reducing vehicle miles travelled, therefore reducing pollution and congestion.
- The TMP identifies capital improvements to respond appropriately to the City's growth.
- The TMP identifies funding opportunities to reduce the City's contribution from the General Fund.

Con:

- The proposed changes require an initial investment of $1.2 M and successive investments that are detailed in the financial impact section.

There are significant financial impacts associated with the implementation of the Transit Master Plan. Staff recommends that the funding of the recommendations in the plan come back to Council as part of the budget process and be considered along with other City Council priorities. Staff will also recommend revenue options for Council's consideration at that time.

City staff has reviewed the Transit Master Plan Report prepared by HDR, Inc., and *recommends that City Council accept this Report.* The Report has been developed with significant public and stakeholder input and based on sound transportation planning practices."

The following individuals spoke in support of City Council accepting the Transit Master Plan and acknowledged the inclusiveness of the public in development said Plan:

Ms. Edna Johnson, General Manager with Asheville Transit
Mr. Gene Bell, Executive Director of the Housing Authority (opposed to eliminating service to Klondyke Apartments on Saturdays and Sundays)
Ms. Hanna Raskin, Chair of the Asheville Transit Commission
Rev. Christopher Chiaronmonte
Mr. Tom Tomlin (opposed to elimination of Routes 5 and 11 on Saturdays)
Mr. Paul Van Heden, former City of Asheville Transit Systems Marketing Coordinator

Mr. Christopher Sean Hollifield explained to Council why he urged Council to not support this Transit Master Plan, mainly do to the impending deficit of up to $38 Million in the 6-10 year time span.

Ms. Michelle Johnson, Weaverville resident, explained how she has purchased two 40-passenger buses and started a bus service to Sonopress, amongst other places, to help her community.

Councilman Newman moved to adopt Resolution No. 09-229, with a statement that the City Council will still have overview and review of any proposed fee changes or fare changes or other taxes that would be used to implement the plan. This motion was seconded by Councilwoman Cape.

Vice-Mayor Davis was concerned that the public's expectations will be that the Plan will be implemented after adoption, but without the financial part, we can't implement it.

Councilman Newman said that the intent of his motion is that we like the concepts outlined in the Plan and we will look at it, along with other priorities of Council, as part of our budget process. Other than adjustments to the fare boxes, which is a relatively small piece of the funding formula, there are several different potential revenues options identified, some which we don't have in our control. If Council supports the concepts outlined in the Plan, we need to make it clear that we do and that we will address the funding piece over time and figure out what we can afford and where those revenues would come from.

In response to Councilman Russell, City Manager Jackson said that the next step will be for Council to consider this during the operating and budget capital process. Staff's preference is always that budget decisions not be made out of context of the larger and capital budget. Mr. Putnam added that we are already working with a deficit of roughly $500,000 because of some special money that we had available to us for the last two years. He agreed with the City Manager in that he envisioned that staff will put together an action plan that will follow the normal budgetary process.

Councilman Russell felt we could work on items that can be done quickly and inexpensively, similar to the Downtown Master Plan, and review the other issues through the budget process.

In response to Councilman Mumpower, Mr. Mariate Echeverry from the Transportation Department, said the City paid $100,000 for this study.

When Councilman Mumpower asked what the average subsidy is across the state of North Carolina for city transit services for every dollar of fare, Mr. Putnam felt it was about $4-5.

In response to Councilman Mumpower, Mr. Putnam felt that Chapel Hill might be a model of a city that is comparable to Asheville that has a strong impressive mass transit system.

Councilman Mumpower believed that transit, like jobs and education, is one of our best social services and we should invest in it as a city. He explained why he felt the subsidy for transit is rising and we are creating unreasonable expectations that we all want, but can't afford.

Councilman Newman noted that since 2003 the annual increase in ridership is over 10% when our population is growing maybe 1% per year. Many things with transit is going well. It will be difficult to find funding for service level improvements, but as we continue to add density, this is the kind of service that makes sense for our future.

Vice-Mayor Davis found it difficult to eliminate Route 5, but overall he felt the Transit Master Plan was good. He hoped we use the Plan as a guideline and implement it as we can afford to. He did support implementing the "low-hanging fruit."

In response to Mayor Bellamy, Councilman Newman said that he would be happy to have some additional dialogue with City staff about the elimination of Route 5.

Mayor Bellamy wanted to make sure that the opportunity for dialogue about route structures, etc. is still open. She felt it would be good to have a comprehensive implementation committee, similar to the Downtown Master Plan, that would be composed of transit, downtown residents, Warren Wilson representatives, etc. and have them report back to Council on a regular basis.

Councilwoman Cape reaffirmed that we are accepting the plan and we expect to have regular updates on what we can start doing, how we can start doing it, when changes start to affect funding, etc. She felt that before any changes were made to existing routes, we would know about it and have the opportunity to engage the community to let them know what is going on.

Councilman Miller suggested staff put together a comprehensive implementation committee to prioritize the Plan and bring it back to the City Council Annual Retreat on January 8-9, 2010.

Councilman Newman felt we have an existing Transit Commission and there are many people who are not on the Commission that worked on creating the Plan. He felt we should build the implementation committee off the existing Transit Commission in terms of carrying this forward.

In response to Councilwoman Cape if we needed a committee process, City Manager Jackson said that he did not have readily available the role of the Transit Commission, but we would look to see if this is within their scope. He felt it's a policy decision whether Council wants to use them, modify them or create two separate bodies. He did say it would be extra work for staff to work with multiple bodies to accomplish that end.

Councilman Mumpower felt that we have an existing model of the Civic Center Commission. Staff works with the existing Commission and holds public hearings as necessary to flesh out the details. He felt we would be disrespectful of the Transit Commission if we didn't use them.

Mayor Bellamy said that there is a steering committee that has been working on this for awhile which includes some Transit Commission members. It was pointed out that Warren Wilson College should have representation, representation from the NAACP, Housing Authority, etc.

Councilman Newman suggested asking the steering committee that has been working on the Plan and the Transit Commission if they feel they would like to give us any further recommendations or if they feel they have done their job and let it default back to the Transit Commission. Mayor Bellamy agreed and asked that staff make that inquiry and let Council know.

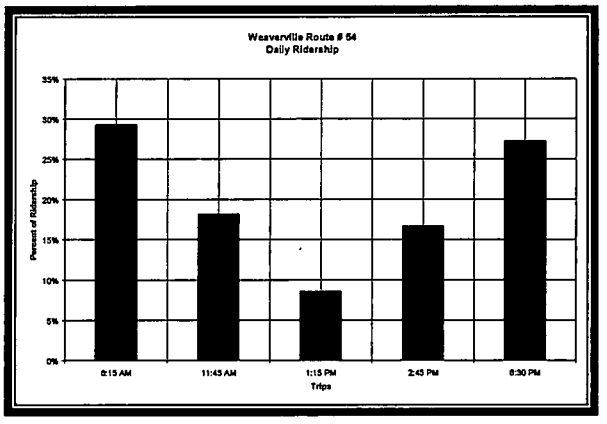
The motion made by Councilman Newman to adopt Resolution No. 09-229 and seconded by Councilwoman Cape carried on a 6-1 vote, with Councilman Mumpower voting "no."

Weaverville Route # 54 Data from Staff Report

"At the City Council meeting on October 13, 2009, a Council member presented information including a petition to keep Weaverville Route # 54 funded and in service after October 31, 2009. A concerned citizen, who uses the service, had prepared the information and submitted it to the Council member prior to the meeting. City Council asked staff to review the information and provide a response at the October 27, 2009, meeting.

Currently, Route # 54 provides 5 daily trips, one at the beginning and end of each day and 3 trips during the middle part of the day. As shown in the following chart, 56% of the typical

daily ridership uses the trips at the beginning and end of each day and 44% of the typical daily ridership uses the trips during the middle part of the day.



The N.C. Dept. of Transportation (NCDOT) informed the City in December 2008 that the intercity funding for Route # 54 would be discontinued effective November 1, 2009, because a recent assessment of the route determined that it was not compliant with Federal regulations. In addition, The Town of Weaverville indicated that they no longer wanted to partner with the City of Asheville in providing the route. Total ridership during Fiscal Year 2008-09 was more than 27,000 riders which average about 90 riders per service day including weekdays and Saturdays.

Provided to Council is a breakdown of the estimated costs to continue the funding of Route # 54 from November 1, 2009, through June 30, 2009. This breakdown also includes the costs from Fiscal Year 2008-09 for 12-month and 8-month timeframes for comparison purposes. In order to provide the most realistic operating cost estimate, the methodology of the Cost Allocation Model that is described in the Transit Master Plan was used. The total net cost to provide the same service that is provided currently until June 30, 2010, is about $169,640. If only two trips per service day are provided, the total net cost would be about $68,036.

Earlier this year, Buncombe County Mountain Mobility began a North Buncombe Trailblazer route which connects to the City's Route # 2 at the Manor Ridge Apartments along Elkwood Avenue. The subject route includes an early morning trip between 6:00 a.m. and 7:15 a.m. and an evening route between 5:30 p.m. and 6:50 p.m. The current fare is $0.50 each way. City staff met with Mountain Mobility and they have indicated that they are going to change their routing to mimic the current routing making sure that all of their patterns use Main Street in downtown Weaverville."

Councilman Mumpower said that the taxpayers of Asheville are subsidizing the Weaverville route at least $50 to $1 and it's an unsustainable transit system. He didn't believe that our notice of intent to stop the Weaverville route was effective as it needed to be and so there is some concern about we are leaving people without transportation. He asked if Council would be willing to fund the continuation of the Weaverville route for at least two more weeks to allow for the transition or other options for those who are using that service.

A representative from Buncombe County Mountain Mobility said that they have a North Buncombe Trailblazer which is a smaller bus that runs in the North Buncombe county areas. They have worked to revise the routes so that in the morning and evening runs they are mirroring what Route 54 is doing. She explained the Trailblazer route, which will occur several times in the morning and several times in the afternoon. She said they have a 50-cent fare so this is an additional cost increase to the riders. They feel confident they can duplicate the same times that Route 54 is currently doing. They have put together brochures that were e-mail out today to many stakeholders at the public hearing last week and the brochure should go up on our website tomorrow. The new revised route will start on Monday, November 2.

In response to Councilman Mumpower, the estimated cost of one additional week of transit service to Weaverville would be approximately $4,800.

Councilman Mumpower moved to continue the Weaverville route for one additional transitional week. This motion was seconded by Councilman Newman.

Mr. Christopher Sean Hollifield didn't think one additional week of transition was enough. He was concerned that there would not be enough room with the Trailblazer and stressed that the public was not made aware of the cancellation with proper notice.

Mayor Bellamy asked that City and County staff actively reach out to the public on this change of bus route. She suggested each person getting on the Weaverville route receive a flyer and that the City also place on it's cable channel the change in route, with the North Buncombe Trailblazer taking the route over, along with an update about the Transit Master Plan announcing some of the proposed changes.

When Councilman Mumpower wondered if he would have Council's support to amend his motion to continue the Weaverville route for two additional weeks, Councilman Newman said that he would second the motion; however, this is not received Council support.

The motion made by Councilman Mumpower and seconded by Councilman Newman carried unanimously.

RESOLUTION BOOK NO. 32 – PAGE 256

At 8:00 p.m., Mayor Bellamy announced a 20-minute recess at which time City Council would hold a closed session.

Closed Session

At 8:00 p.m., Councilman Miller moved to go into closed session for the following reasons: (1) To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including litigation involving the following parties: Holly Oxner; Forrest Weaver; Jeff Richardson; Lisa Roth; and the City of Asheville. The statutory authorization is contained in G.S. 143-318.11(a) (6); (2) To consider the qualifications, competence, performance, character, fitness, conditions of appointment of an individual public officer or employee. The statutory authorization is contained in G.S. 143-318.11(a)(6); and to prevent the disclosure of information that is confidential pursuant to G.S. 160A-168, the Personnel Privacy Act. The statutory authorization is contained in G.S. 143-318.11(a)(1); and (3) To prevent disclosure of information that is privileged and confidential, pursuant to the laws of North Carolina, or not considered a public record within the meaning of Chapter 132 of the General Statutes. The law that makes the information privileged and confidential is N.C.G.S. 143-318.10(e). The statutory authorization is contained in N.C.G.S. 143-318.11(a)(1). This motion was seconded by Councilman Russell and carried unanimously.

At 8:20 p.m., Councilman Miller moved to come out of closed session. This motion was seconded by Councilman Newman and carried unanimously.

VI. NEW BUSINESS:

A. UPDATE ON ANNEXATION AGREEMENT DISCUSSIONS WITH THE TOWN OF WOODFIN

City Attorney Oast said that the purpose of this memo is to update Council on the status of this matter. Using maps throughout his presentation, he said that back in 2005 Asheville and

Woodfin began discussions regarding their plans for future growth. These discussions grew out of development of the Reynolds Mountain area, and annexations by both municipalities in that area, as well as growth and development in the Erwin Hills and Leicester area. These discussions included proposals to realign the boundary in the UNC-A area to address some service-delivery issues.

These discussions also involved consideration of an annexation agreement between the two municipalities. An annexation agreement is not a precursor to annexation, or a first step in the annexation process. Rather, it is a method authorized in the N.C. General Statutes, whereby two or more neighboring or (as in this case) abutting municipalities agree not to expand into certain defined areas that may be better served by the other municipality as they are developed for urban purposes. This is a way of giving some predictability to urban growth patterns, both for municipalities and residents / property owners.

In connection with these discussions, staff from Woodfin and Asheville developed a line that essentially extended Asheville's and Woodfin's common boundary to the west and east, with reference to roads, ridgelines, and other topographic features. The areas created by these boundaries are frequently referred to as "spheres of influence." That proposal was incorporated into a draft agreement provided to Woodfin in 2007. Although an agreement has not yet been adopted, interest in reaching an agreement has remained.

Since discussions began, Asheville and Woodfin have both engaged in some annexation activities; some voluntary, some involuntary. Of concern to Asheville is that Woodfin has considered several annexations, and completed some, that are on Asheville's side of the proposed boundary line discussed above (Richmond Hill annexation) or straddle it (Sherwood Heights proposal).

Also since discussions began, a group of interested persons began an effort to incorporate the Leicester area. The area proposed for incorporation included some areas close to Woodfin and Asheville. The Leicester incorporation group solicited Asheville's support for their effort, and there were several discussions and presentations about it. The Asheville City Council ultimately adopted a resolution approving of the incorporation, with some reservations as to the size of the area. The Leicester incorporation became an issue in Woodfin's attempt earlier this year to involuntarily annex a fairly large area that included Erwin Hills. This attempt has been suspended pending further discussions regarding an annexation agreement.

Informal discussions have occurred over the summer between Asheville and Woodfin. In June the Asheville City Council adopted a resolution affirming its commitment to an annexation agreement. In September, the previous annexation agreement, with the same boundary line, was transmitted to Woodfin's Town Attorney, who responded with an alternative proposal from Woodfin.

The chief matter to be resolved is the location of the line separating the future growth areas of the two municipalities. Once this is determined, the statute outlines a process, including a public hearing, for finalizing and adopting an annexation agreement.

He provided Council with (1) the draft annexation agreement recently resubmitted to Woodfin. This is essentially the same agreement prepared in 2007; (2) a map showing Woodfin's alternative proposal; and (3) a previous staff report outlining the process for adopting an annexation agreement.

In summary, the following four issues are sub-parts of the annexation agreement for the location of the line separating the future growth areas between the City of Asheville and the Town of Woodfin: (1) realignment of the boundary in the UNC-Asheville area to address some service-delivery issues, and to get the University property entirely within Asheville's jurisdiction; (2) Sherwood Heights voluntary annexation proposal; (3) appropriate jurisdiction over the

Leicester/Erwin Hills area; and (4) the location of the proposed round-about at the entrance to Reynolds Mountain in New Bridge being in two different municipalities. He noted that the round-about issue and the UNC-Asheville area will require legislative approval. City Council and staff are continuing to work with Woodfin in the hopes that we can come to some agreement.

Mayor Bellamy asked for Council discussion and direction on the following: (1) since Woodfin has made a commitment with Leicester not to annexation into Leicester Township, Woodfin is asking Asheville to make that same commitment for the next three years (in order to let the incorporation process move forward); (2) regarding the 3.54 miles that is in Asheville's extraterritorial jurisdiction area, Woodfin is asking Asheville for a good faith effort to allow Woodfin to move the boundary line into Woodfin and Woodfin would exclude that portion of the Coleman property that is being requested to be voluntarily annexed into Woodfin to be a part of Asheville; and (3) include all of the round-about in the Town of Woodfin.

After discussion, it was the consensus of Council to realign the boundary of UNC-Asheville to bring it all into the City of Asheville.

After discussion, Council felt the Sherwood Heights area should be in Asheville since it is in Asheville's extraterritorial jurisdiction area, the entire property is in Asheville's watershed and the subdivision is accessed by only two roads which are both coming through the City of Asheville. Even though the property owners have asked Woodfin to voluntarily annex them into Woodfin, it was the consensus of Council to have staff contact the property owners to perhaps negotiate with them to annex into the City of Asheville instead.

After discussion, it was the consensus of Council to locate the entire round-about in Woodfin.

Mr. Jerry Rice urged Council to deliberate this issue in open.

When Councilman Mumpower raised a concern about process, Councilman Newman said that elected officials are talking to elected officials from another town and the information is brought back to the full boards for direction.

Rev. Christopher Chiaronmonte felt all meeting should be taped and aired on the City channel.

After discussion, Councilman Newman moved to make a commitment that Asheville will not annex into Leicester Township for the next three years, contingent upon Woodfin making that same commitment. This motion was seconded by Vice-Mayor Davis and carried unanimously.

Councilman Newman felt that Asheville has a stronger argument for the 3.54 miles in our extraterritorial jurisdiction area to be in Asheville as it is commercializing and it looks more of a part of Asheville since it is far from the core of Woodfin.

Mayor Bellamy said that she will provide timely updates to Council on this matter.

B. RESOLUTION NO. 09-230 - RESOLUTION APPOINTING A MEMBER TO THE ASHEVILLE-BUNCOMBE HISTORIC RESOURCES COMMISSION

Vice-Mayor Davis, Chair of the Boards & Commissions Committee, said that this is the consideration of appointing a member to the Asheville-Buncombe Historic Resources Commission.

Ms. Beth Gillespie has resigned as a member of the Asheville-Buncombe Historic Resources Commission thus leaving an unexpired term until July 1, 2012.

On October 13, 2009, it was the consensus of Council to interview Susan Eggerton, Susan West and John King Dean. Ms. West was interested; however, she was unable to attend the interview.

After Council spoke highly of the candidates, Councilman Newman moved to appoint John Dean as a member of the Asheville-Buncombe Historic Resources Commission to fill the unexpired term of Ms. Gillespie, term to expire July 1, 2012, or until his successor has been appointed. This motion was seconded by Mayor Bellamy and carried unanimously.

RESOLUTION BOOK NO. 32 – PAGE 257

C. RESOLUTION NO. 09-231 - RESOLUTION APPOINTING A MEMBER TO THE SUSTAINABLE ADVISORY COMMITTEE ON ENERGY & THE ENVIRONMENT

Vice-Mayor Davis, Chair of the Boards & Commissions Committee, said that this is the consideration of appointing a member to the Sustainable Advisory Committee on Energy & the Environment.

Mr. David Spector has resigned as a member of the Sustainable Advisory Committee on Energy & the Environment thus leaving an unexpired term until December 31, 2010.

On October 13, 2009, it was the consensus of Council to interview Duncan McPherson, David Brown and Claude Chandler. Mr. Brown was interested; however, he was unable to attend the interview. Mr. Chandler was unable to serve at this time.

Councilwoman Cape moved to appoint Duncan McPherson as a member of the Sustainability Advisory Committee on Energy & the Environment to fill the unexpired term of Mr. Spector, term to expire December 31, 2010, or until his successor has been appointed. This motion was seconded by Councilman Miller and carried unanimously.

RESOLUTION BOOK NO. 32 – PAGE 258

D. RESOLUTION NO. 09-232 - RESOLUTION APPOINTING A MEMBER TO THE TREE COMMISSION

Vice-Mayor Davis, Chair of the Boards & Commissions Committee, said that this is the consideration of appointing a member to the Tree Commission.

Ms. Starr Silvis has resigned as a member of the Tree Commission thus leaving an unexpired term until December 31, 2011.

On October 13, 2009, it was the consensus of Council to interview Josh O'Conner, Kathleen Zeren and Amy Kemp. Mr. O'Conner was unable to serve as he currently serves on the Mayor's Committee on Veterans Affairs and the Transit Commission. Ms. Zeren has moved out into the County.

Vice-Mayor Davis noted that the Tree Commission recently notified him that their recommendation is Debbie Emmons. After a brief discussion about the recommendation timing, Council said that they would consider her in their next vacancy on the Tree Commission.

Councilman Mumpower moved to appoint Amy Kemp as a member of the Tree Commission to fill the unexpired term of Ms. Silvis, term to expire December 31, 2011, or until her successor has been appointed. This motion was seconded by Councilman Russell carried unanimously.

RESOLUTION BOOK NO. 32 – PAGE 259

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Councilman Miller encouraged the public to (1) spread the word that Asheville is still open for business, despite the rock slide at the Tennessee/North Carolina border; and (2) take advantage of the early voting locations.

CTS Plant Site

Regarding the CTS Plant site groundwater contamination, Mr. Tate McQueen and Mr. Aaron Penland reviewed with Council the statistics of the toxic contamination of their groundwater and information on when the contamination was found. After their meetings with the Buncombe County Commissioners, the County adopted a resolution stating that any further wells that become contaminated the County will only bear up to 50% of the cost. They asked for City Council for a resolution to the U.S. Dept. of Agriculture asking them for earmarked money to help offset municipal water to their community. They presented Council with two petitions as follows (1) "Considering the level of TCE contamination detected at David Bradley's well on Chapel Hill Church Road, we the residents of Chapel Hill Church Road would like to receive Asheville City Water in the same manner as The Oaks development on Pinner's Cove Road."; and (2) "We, the undersigned, petition the City of Asheville to provide us with a safe source of water from the Asheville Municipal Water supply without delay. Our plea is based on the imminent threats of toxic contamination spreading to our well-water supply as detailed in the 2002 'Action Memorandum/Enforcement' document (Cerclis ID# NCSFN0406988) by James W. Webster, Ph.D., which has again been substantiated with the recent contamination of the well-water supply in the Oaks subdivision and on Chapel Hill Church Road." Mr. McQueen said that personally he would be happy to be annexed into the City of Asheville.

City Manager Jackson said that there are two manners in which water service can be extended. The standard process for water line extension for multiple properties is a letter of commitment process. For that process there is a $312 processing fee and a letter of commitment from the property owners. The property owners would need to have an engineering study performed and the City would evaluate it. The other is the process under which Buncombe County has established is where a public purpose is served and there is cost participation of up to 50%. In that process, Buncombe County would have the engineering study performed on behalf of the property owners (as they did in the Oaks area) and do the analysis and the City would identify our costs of service in serving that area. City staff would then come to Council with a partnership plan. That was under the leadership of the County. The County's position is that they are continuing to do well monitoring outside of one mile from the CTS Plant. The EPA is doing well monitoring within the one mile area surrounding the CTS site. At this time, there aren't any wells that indicate a level of contamination that renders an active well undrinkable. For every place that the wells register an unsafe level there is now water available from our system. The County's position is that they are monitoring the situation and they are calling upon EPA and N.C. Dept. of Environment and Natural Resources to continue their assessments. The County does not see an imminent need for action. He asked for Council's direction to (1) wait on Buncombe County's assessment; (2) respond to a private property owner petition; or (3) evaluate the voluntary interest in annexation and put the service level plan together over a period of time for those areas that would be interested in voluntary annexation.

It was the consensus of Council that Mr. McQueen and Mr. Penland meet with City Manager Jackson to explore the different avenues available including the costs. If annexation is a part of that process, Council would be supportive of staff looking at that as a tool as well.

Mayor Bellamy noted that the City has staff writing recovery dollar grants and perhaps that might be something we could pursue with the N.C. Dept. of Agriculture. Mayor Bellamy asked for a report on this matter at the November 24, 2009, agenda, if not sooner.

Rev. Christopher Chiaronmonte voiced concern over Council's rules not allowing a person to speak under informal discussion and public comment if the issue was on the agenda.

Ms. Patricia Pinner urged the City of Asheville to provide everyone within a 10 mile radius of the CTS Plant municipal water at the expense of CTS.

Mr. Jerry Rice urged Council to assist the residents around the CTS Plant.

VIII. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 10:00 p.m.

Magdalen Bowlesson
CITY CLERK

MAYOR

Tuesday – November 10, 2009 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Jan B. Davis; Councilwoman Robin L. Cape; Councilman Kelly M. Miller; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; Councilman William A. Russell Jr.; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Bellamy led City Council in the Pledge of Allegiance.

INVOCATION

Councilman Russell gave the invocation.

I. PROCLAMATIONS:

II. CONSENT AGENDA:

At the request of Councilman Mumpower, Consent Agenda Items "B", "D" and "E" were removed from the Consent Agenda for discussion and/or individual votes.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON OCTOBER 27, 2009

B. RESOLUTION AUTHORIZING THE CITY MANAGER TO ACCEPT A DONATION FROM THE ASHEVILLE-BUNCOMBE YOUTH SOCCER ASSOCIATION AND THE WESTERN NORTH CAROLINA SOCCER FOUNDATION OF FIELD LIGHTS ON THE FOUR SOCCER FIELDS AT THE JOHN B. LEWIS SOCCER COMPLEX AT AZALEA PARK

This item was removed from the Consent Agenda for discussion and/or an individual vote.

C. RESOLUTION NO. 09-234 - RESOLUTION OF INTENT TO PERMANENTLY CLOSE HAMILTON CIRCLE, A PORTION OF BROOKLET STREET AND A PORTION OF HAMILTON STREET AND SETTING A PUBLIC HEARING ON DECEMBER 15, 2009

Summary: The consideration of a resolution of intent to permanently close Hamilton Circle, a portion of Brooklet Street and a portion of Hamilton Street, requesting a public hearing on December 15, 2009, regarding this issue.

N. C. Gen. Stat. sec. 160-299 grants cities the authority to permanently close streets and alleys.

Pursuant to this statute, the adjoining property owners, Mission Health System Inc. has requested the City of Asheville to permanently close a Hamilton Circle, a portion of Brooklet Street and a portion of Hamilton Street.

The Greenway Commission is scheduled to review the closure of Hamilton Street, a portion of Brooklet Street and Hamilton Circle at their meeting on November 12, 2009.

Regarding the City Council Strategic Operating Plan, this closure allows maximum land use potential for further development complying with the Asheville City Development Plan, Land Use.

Pros:

- There will be no future compromise of ingress/egress to other property
- The closure would allow for more efficient use of the existing adjacent properties.

Cons:

- In consideration of the location of the closures and the proposed street realignment, staff can find no potential challenges.

There will be no fiscal impact related to this closure.

City staff recommends City Council adopt a resolution setting a public hearing for December 15, 2009, to close Hamilton Circle, a portion of Brooklet Street and a portion of Hamilton Street.

RESOLUTION BOOK NO. 32 – PAGE 261

D. BUDGET AMENDMENT TO PROVIDE FUNDS FOR CIVIL SERVICE BOARD LEGAL COUNSEL AND CIVIL SERVICE SECRETARIAL SERVICES AS MANDATED IN THE NEW CIVIL SERVICE LAW

This item was removed from the Consent Agenda for discussion and/or an individual vote.

E. BUDGET AMENDMENT TO COMPLETE THE OAKLEY POLICE RESOURCE CENTER

This item was removed from the Consent Agenda for discussion and/or an individual vote.

Mayor Bellamy asked for public comments on any item on the Consent Agenda, but received none.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Miller moved for the adoption of the Consent Agenda. This motion was seconded by Vice-Mayor Davis and carried unanimously.

ITEMS REMOVED FROM THE CONSENT AGENDA FOR INDIVIDUAL VOTES

B. RESOLUTION NO. 09-233 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ACCEPT A DONATION FROM THE ASHEVILLE-BUNCOMBE YOUTH SOCCER ASSOCIATION AND THE WESTERN NORTH CAROLINA SOCCER FOUNDATION OF FIELD LIGHTS ON THE FOUR SOCCER FIELDS AT THE JOHN B. LEWIS SOCCER COMPLEX AT AZALEA PARK

Summary: The consideration of a resolution authorizing the City Manager to accept a donation from the Asheville-Buncombe Youth Soccer Association (ABYSA) and the Western

North Carolina Soccer Foundation (WNCSF) of field lights on the four soccer fields at the John B. Lewis Soccer Complex at Azalea Park.

In January 2009 City Council authorized ABYSA and WNCSF to place lights on the four soccer fields at the John B. Lewis Soccer Complex at Azalea Park. Since then ABYSA and WNCSF has successfully met the requirements of the lights installation agreement and the work is complete. ABYSA and WNCSF are now making a gift of the soccer field lights to the City valued at $594,166.

The soccer field light system is the Musco "Structure Green", a leader in the outdoor field lighting industry in energy efficiency and glare control. The system complies with the City's lighting standards for outdoor sport fields as stated in the Unified Development Ordinance.

The soccer field lights complies with the City Council Strategic Operating Plan Focus Area: Green in that Asheville will be the southeastern leader in energy and environmental sustainability while preserving the city's natural beauty by making environmentally efficient capital improvement decisions and support energy efficient funding for facilities and operations.

The donation of the soccer field lights complies with the Parks, Recreation, Cultural Arts & Greenways Master Plan in that is maximizes the level of service available to the community by using partnerships to take advantage of existing facilities, share new facilities, and provide additional programming and services to the community.

The Recreation Board unanimously recommended the ABYSA and WNCSF proposal to City Council to install and donate soccer field lights at the John B. Lewis Soccer Complex at its meeting on November 10, 2008.

Pro:

- Further strengthens the partnership between the City, ABYSA and WNCSF to enhance facility development and programming at the John B. Lewis Soccer Complex.

Con:

- Increases the City's annual operating cost in facility maintenance and operation.

Addition of the lights at the soccer complex will increase the City's annual operating cost by $15,000 to $20,000 for facility maintenance and operation. ABYSA will make an annual contribution to the cost as part of the facility operating agreement between the City and ABYSA.

City staff recommends City Council adopt a resolution authorizing the City Manager to accept a donation from the Asheville-Buncombe Youth Soccer Association and the Western North Carolina Soccer Foundation of field lights on the four soccer fields at the John B. Lewis Soccer Complex at Azalea Park.

Mayor Bellamy recognized Mr. and Mrs. Lewis and thanked them for their donation to the City of Asheville. She also thanked Councilman Miller, working through the Product Development Fund, for the donation of $1.3 Million towards this effort.

Councilman Russell moved for the adoption of Resolution No. 09-233. This motion was seconded by Councilman Miller and carried unanimously.

RESOLUTION BOOK NO. 32 – PAGE 260

D. ORDINANCE NO. 3802 - BUDGET AMENDMENT TO PROVIDE FUNDS FOR CIVIL SERVICE BOARD LEGAL COUNSEL AND CIVIL SERVICE SECRETARIAL SERVICES AS MANDATED IN THE NEW CIVIL SERVICE LAW

Summary: The consideration of a budget amendment, in the amount of $71,452, from the Fund Balance to provide funds for Civil Service Board legal counsel and Civil Service secretarial services as mandated in the new Civil Service Law.

The Civil Service law was amended on August 3, 2009, by the General Assembly. This revision contained an unfunded mandate which required the City to provide outside counsel and secretarial services for the Civil Service Board. City Council was informed of this unfunded mandate and potential fiscal impact during the negotiations and deliberations regarding the revisions to the law.

This action complies with the City Council's Strategic Operating plan by promoting the City's goal of attracting and retaining quality employees through oversight of Public Safety promotional processes and overall transparency.

Pro:

- The City is complying with the newly revised Civil Service Law as mandated by the General Assembly.

Con:

- This is an unfunded mandate.

This budget amendment is funded with a $71,451 appropriation from the General Fund fund balance. Based on current estimates, the City will end fiscal year 2009-10 with a General Fund fund balance total of $14.2 million, which will equate to 15.1% of projected expenses.

City staff recommends City Council adopt the budget amendment, in the amount of $71,452, from the Fund Balance to provide funds for Civil Service Board legal counsel and Civil Service secretarial services as mandated in the new Civil Service Law.

After a brief discussion, initiated by Councilman Mumpower, about what brought the City to this point of action, Vice-Mayor Davis moved for the adoption of Ordinance No. 3802. This motion was seconded by Councilman Russell and carried on a 6-1 vote, with Councilman Mumpower voting "no".

ORDINANCE BOOK NO. 25 – PAGE 472

E. ORDINANCE NO. 3803 - BUDGET AMENDMENT TO COMPLETE THE OAKLEY POLICE RESOURCE CENTER

Summary: City Council authorized staff to purchase a student built energy efficient modular home from AB Tech in April, 2009, to replace a one-hundred year old Police Resource Center in the Oakley community, and a budget amendment, in the amount of $80,000, is needed from its Capital Reserve Fund to complete this project.

During the 2007 budget planning process, City Council allocated a one-time infusion of $500,000 into the City's Capital Improvement Fund to address the most critical city building capital maintenance needs. The Oakley Resource Center was in need of significant deferred maintenance and was determined to be no longer functional as the operational headquarters for the Patrol Division's East and North Districts. In order to replace this facility, staff identified a partnership opportunity with AB Tech, who had recently completed an energy efficient student-built modular home and was preparing to auction this home off in the near future.

Projected Budget (authorized by City Council)

Site Demolition Cost	$ 10,000

Home Purchase Cost	$110,000
Site Preparation/House Transport Cost	$ 57,000
Landscaping and paving contingency	$ 15,000
Total	$192,000

Since this project's approval, City staff has purchased the home from AB Tech and demolished the existing structure. Staff has received a low bid for the site preparation/house transport, and installation finish work at $101,000, which is significantly higher than originally anticipated. It should be noted that City staff went through the formal bid process two (2) separate times in an effort to secure the lowest and most responsible bid possible. In addition, staff has budgeted an additional $15,000 for contingency to complete this project.

The City's capital reserve fund currently has an available balance of $185,000; allocating $80,000 to fund this project will reduce the available balance to $105,000.

City staff is requesting City Council adopt a budget amendment, in the amount of $80,000, from the Capital Reserve Fund for purposes of completing the Oakley Police Resource Center project.

In response to Councilman Mumpower, Assistant City Manager Jeff Richardson explained this unique project and the reason for the total amended budget of $254,000, which is detailed as follows: Home purchase - $110,000; transportation and setting contract - $23,000; construction contract cost - $78,000; site preparation/site completion - $10,000; Information Technology services (network wiring) - $8,000; furniture/fixtures - $10,000; and contingency - $15,000. The cost is also included for the temporary move to the alternative location for this division.

Mr. Richardson responded to various questions/comments from Council, some being, but are not limited to, what is the square footage cost for the upstairs and the basement; did the building need to be personalized for the needs of the Police Department; at $200 a square foot, does staff feel the construction was standard or exceptional; has the house already been purchased; and explanation of the financial component of the entire venture.

Mayor Bellamy asked for an update on the West Asheville Fire Station 6 renovation project.

Councilman Miller moved for the adoption of Ordinance No. 3803. This motion was seconded by Councilwoman Cape and carried on a 6-1 vote, with Councilman Mumpower voting "no".

ORDINANCE BOOK NO. 25 - PAGE 474

III. PRESENTATIONS & REPORTS:

A. HILLCREST APARTMENTS FIRE

Interim Fire Chief Scott Burnette updated City Council on the current explosion and fire at Building 21 at Hillcrest Apartments. There were five families displaced from Building 21 and six families displaced from Building 20. The American Red Cross and the Housing Authority are temporarily housing those families until permanent housing becomes available. Investigators are on the scene to try to determine the exact cause of the explosion. Evidence does suggest that a natural gas release is the cause of the explosion, but how that came about is still unclear. Appliances and utilities are being examined as well as consultations with personnel from Progress Energy and mechanical inspectors from Building Safety. Additional interviews with

witnesses are also being conducted. Heavy rain conditions and structural damage to the building are slowing work progress; therefore, the investigation will continue.

B. H1N1 PREPAREDNESS FOR COMMUNITY REPORT

Interim Fire Chief Scott Burnette introduced Director of Emergency Services Jerry VeHaun and Buncombe County Health Director Gibby Harris to advise Council on what the response plan is for the H1N1 flu.

Ms. Harris updated Council with the current status of the pandemic; the H1N1 vaccinations; and public health recommendations.

Mr. VeHaun explained the emergency response plans.

On behalf of City Council, Mayor Bellamy thanked Ms. Harris and Mr. VeHaun for their informative presentation and asked if Ms. Harris would be amenable to attend a Council meeting on a monthly basis to keep the community informed of the pandemic.

B. COMMUNICATION UPDATE ON I-40 ROCK SLIDE

Councilman Miller briefed the Council on the alternate routes into Asheville due to the I-40 rock slide pointing out that we need to do keep the message out that Asheville is open for business.

C. ECONOMIC STIMULUS PACKAGE UPDATE

RESOLUTION NO. 09-235 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ACCEPT FUNDS FOR THE NORTH FORK WATER TREATMENT PLANT PUMPING SYSTEMS IMPROVEMENTS AND TO AWARD THE CONSTRUCTION CONTRACT TO HICKORY CONSTRUCTION COMPANY

ORDINANCE NO. 3804 - BUDGET AMENDMENT TO AWARD THE CONSTRUCTION CONTRACT TO HICKORY CONSTRUCTION COMPANY FOR THE NORTH FORK WATER TREATMENT PLANT PUMPING SYSTEMS IMPROVEMENTS

American Recovery & Reinvestment Project Manager Brenda Mills said that as part of City staff's recurring American Recovery & Reinvestment (ARRA) update to Asheville City Council, staff is seeking Council approval of a resolution, and budget amendment, in the amount of $375,722, to accept funds for the North Fork Water Treatment Plant Pumping Systems Improvements and to award the construction contract to Hickory Construction Company in the amount of $328,474.

The Water Resources Department applied for and was awarded ARRA funding in the amount of $510,000 for the North Fork Water Treatment Plant Pumping Systems Improvements project through NCDENR's Drinking Water State Revolving Fund (DWSRF). This loan is a 50% grant with a 50% loan requirement. Since applying for ARRA Funding, the project scope has changed to reduce the amount of work to be done and subsequent cost. Therefore, the total project cost should be significantly less than the approved $510,000.

Water Resources issued formal bids in August 2009 for construction services relating to this project. On September 9, 2009, four (4) bids were opened from the following companies:

1. Hickory Construction Company, Hickory, NC - $328,474.00
2. J.L. Construction Company, Piedmont, SC - $389,500.00

3. Huntley Construction, Asheville, NC - $496,000.00
4. Carolina Specialties Construction Inc., Hendersonville, NC - $456,277.00

The bids have been reviewed by the Water Resources Department, Brown & Caldwell Consulting Engineers, and the City's Office of Economic Development for Minority Business Plan Compliance with all parties in agreement to award the contract to the lowest responsible bidder, Hickory Construction Company, located in Hickory, North Carolina.

On October 23, 2009, the N.C. Dept. of Environment and Natural Resources Public Water Supply Section approved the Disadvantaged Business Enterprise (DBE) Package with the next step in acquiring ARRA funds for this project is governing board approval to award the construction contract for this project.

This project is part of City Council's strategic plans to improve city infrastructure and receive ARRA Funding to aid in economic recovery and operated in a fiscally responsible manner.

Pros:

- Approval of this action will allow the city to move forward with the North Fork WTP Pumping Systems Improvements project.
- This project is 50% funded from ARRA Funding.
- This project will result in energy savings needed to pump water from the North Fork Water Treatment Plant.

Cons:

- The Water Resources Department will have to fund 50% of the project cost which will come from the Water Capital Projects fund.
- The paperwork involved in accepting ARRA funds will be time consuming for staff.

The City will be responsible to pay the loan amount not covered by ARRA Funding, which is 50% of the total project cost.

Staff recommends approval of the resolution, and budget amendment, in the amount of $375,722, to accept funds for the North Fork Water Treatment Plant Pumping Systems Improvements and award the construction contract to Hickory Construction Company in the amount of $328,474.

There was a brief discussion, initiated by Mayor Bellamy, about the City's willingness to use local contractors.

In response to Councilman Newman, Ms. Mills said that if the contractor goes over the amount budgeted for the project, it changes the scope of work and staff would have to come back to Council for approval.

In response to Mayor Bellamy, Water Resources Director Steve Shoaf said that there is a contingency built into the bidding process. He said that the City has used Hickory Construction Company on several projects and they have not exceeded the bid amount on any of those.

Councilman Mumpower felt we will be using borrowed money that will need to be paid back by our children and grandchildren. He also felt that even though the City can't require subcontractors to use the E-Verify System, he felt the City should be at least asking them to screen their new employees.

When Mayor Bellamy asked for public comments, none were received.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and ordinance and they would not be read.

Vice-Mayor Davis moved for the adoption of Resolution No. 09-235. This motion was seconded by Councilman Russell and carried on a 6-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 32 – PAGE 262

Councilwoman Cape moved for the adoption of Ordinance No. 3804. This motion was seconded by Councilman Miller and carried on a 6-1 vote, with Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 25 - PAGE 476

D. STORMWATER & EROSION CONTROL ORDINANCE UPDATE

Mayor Bellamy said that before Council is given the update by Director of Public Works Cathy Ball, she asked the Council if they would prefer to have this ordinance amendment considered by the seated Council at a public hearing on November 24, 2009, or wait until the new Council is seated.

Ms. Ball briefly pointed out some of the recommendations made by the Planning and Zoning Commission at their October 22, 2009, meeting that will require significant evaluation to determine the City's legal and practical authority to carry out. Staff is prepared to analyze the recommendation from the Planning and Zoning Commission and to make a staff recommendations on Planning and Zoning Commission's actions at a City Council public hearing January 12, 2010. At that meeting, based on current information, staff would recommend that Council adopt the revised Stormwater and Erosion Control Ordinance as proposed.

After a brief discussion, it was the consensus of Council to set the public hearing on January 12, 2010, at which time public comment would be taken.

E. CABLE TELEVISION FRANCHISE REPORT

City Attorney Oast said that that in 1997, the City issued a franchise to Brenmor Cable Partners to operate a cable television franchise in the City of Asheville. That franchise contained provisions regarding such things as minimum service levels, repair and maintenance responsibilities, public, educational and governmental (PEG) channels, and provides the City an intranet or I-Net. The franchise fee for the franchise is 5% of gross annual revenues. The term of the franchise was set to run on July 31, 2010.

He explained the following relevant law:

A. Local franchising authority. Prior to 2005, a city's ability to regulate the provision of cable television service was pursuant to N.C.G.S. 160A-296 and 160A-76 which provide in essence that a city may control the use of its streets and rights-of-way, and may grant franchises to allow for the use of streets or rights-of-way by private businesses. Franchise is the legal mechanism that has historically been used for this purpose, and is used in North Carolina and other states. At the same time that it granted the franchise to Brenmor, the City adopted a cable regulatory ordinance, which prescribes the terms and conditions applicable to cable television operations in the City.

B. Federal law. In addition to federal law regulating television and other forms of electronic communication generally, the Telecommunications Act of 1996 had a

major influence on cable television regulation, and affected to a large extent how local franchises were structured, including such issues as the fees that could be charged, and what constitutes "video service." With the rapid development of digital technology, federal statutes, regulations, and case law have been increasingly important in this area.

C. State law: In 2005 the North Carolina General Assembly adopted a law that provided in essence that all cable television franchises would transition to a single franchise administered by the State. With respect to individual local franchises, this transition could occur either at the expiration of the current local franchise, or at the provider's election by giving notice of termination.

1. Cable television. As to cable television services, the State law makes the transition to the State franchise relatively seamless; there is no change in programming for the end users, and the City's revenue stream from franchise fees is maintained essentially at current levels. The State law also provides for the maintenance of PEG channels on essentially the same basis as the existing franchise. The State law requires that cable service be provided without charge to public buildings. The State law also specifically reserves to local governments the ability to control the use of its rights-of-way.

2. Other services / telecommunications ordinance. One thing that is not clearly addressed in the State franchise law is the non-video services that are now available through the same fiber bundles that carry television service. These services include internet service and telephone service. Another matter not clearly addressed is what happens with the I-Net.

He then explained the transition to State franchise as follows: With these issues in mind, Information Technology Director Jonathan Feldman, Media Production Manager Jeff Reble, and I began meeting earlier this year to plan for the transition to the State franchise that was anticipated to occur next July. One of the major concerns was ensuring that the I-Net, which is essential to many City services, remains operational. A number of other issues have arisen:

A. AT&T entry into Asheville market. In late August, we received notice that AT&T would begin providing cable services in the Asheville area under the State franchise. This is one of the events that can trigger a notice by a provider under an existing local franchise that it will terminate the existing franchise, and transfer to the State franchise. Until August, Charter was the only provider of cable television service in Asheville.

B. Termination by Charter. In mid-October we received notice from Charter Communications (the successor to original franchisee Brenmor Cable Partners) that it was terminating its local franchise with the City and transition to the State franchising, effective November 1, 2009. Charter also gave notice to Buncombe County that it was terminating its franchise with the County, effective the same date.

C. Charter bankruptcy. In the midst of all this, Charter initiated a bankruptcy proceeding and Council, acting at Charter's request, and after determining that Charter was in compliance with the franchise, adopted a resolution in July giving its conditional approval to this bankruptcy.

D. URTV. A peripheral issue is the public access station, URTV. As Council knows from a previous report, the management agreement with URTV is set to expire,

and we are negotiating with them for a short extension, with a longer extension contemplated once other issues are addressed, including Charter's transition to the State franchise.

After receiving Charter's notice of termination of the franchise, we worked for much of October to ensure that the I-Net would not be affected by Charter's transition to the State franchise, and that we would have the opportunity to negotiate for its continuation. On Thursday, October 29, we received a letter from Charter assuring us that the I-Net would continue. We have engaged the services of a law firm specializing in telecommunication issues to assist us with this process.

Other information that we are gathering and issues that we are researching include the following:

A. I-Net. While Charter installed much of the I-Net pursuant to the 1997 franchise, much of it was installed by the City (or at the City's direction and cost). We are checking with Charter to ensure that information regarding the location and cost of the I-Net is as complete as possible. This information will include the fees charged to subscribers to defray I-Net costs. We will also need to obtain more information as to Charter's other services.

B. AT&T. AT&T's cable TV service area is currently small As AT&T's service grows, however, the City may need to consider requesting PEG channel capacity or public building service from them, in addition to the service provided by Charter, as the law allows.

C. Local right of way ordinance. In 2003, the City adopted an ordinance that applies to the providers of telecommunication service that are not subject to regulation under the cable television ordinance. The ordinance regulates how our streets and rights of way may be used by telecommunications service providers. We think that this is part of the authority reserved to localities by the State franchise law. We are reviewing the applicability of this ordinance to Charter's other (non-cable television) operations. Charter is not the only ISP operating in Asheville. Limited service is currently being provided by ERC, and we had previously negotiated an agreement with Dukenet, although it was never finalized.

He said the summary and next steps are: The regulation of cable television and telecommunications is complicated and involves aspects of federal, State, and local laws and ordinances. The technological aspect of this work, which changes rapidly, is daunting, and the financial issues are not insubstantial.

Working to ensure a seamless transition to the State franchise while ensuring that the City and its citizens continue to receive what is now viewed as an essential service would be a challenging task in any circumstance. In this case, that task is complicated somewhat by Charter's bankruptcy, AT&T's new presence in the area, and URTV.

The chief issues at this time are to ensure the continued availability of television and telecommunications service in Asheville, protect the City's interests, and work with the service providers in a fair manner. As we get further into negotiations and staff review, we will report to Council.

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER A SIGNAGE PLAN FOR THE ASHEVILLE REGIONAL AIRPORT

ORDINANCE NO. 3805 - ORDINANCE APPROVING THE SIGNAGE PLAN FOR THE ASHEVILLE REGIONAL AIRPORT

Mayor Bellamy opened the public hearing at 6:16 p.m.

Assistant Director of Planning & Development Shannon Tuch said that that this is the consideration of an ordinance to approve the signage package for the Asheville Regional Airport. This public hearing was advertised on October 29 and November 5, 2009.

On September 31, 2009, the Asheville Regional Airport submitted an extensive application for a variety of different signs to be replaced or added to the airport property as they initiate their parking lot renovations and other site improvements. This request has followed several other replacement sign requests that had been permitted through interpretations extended to accommodate the unique needs and nature of the airport operations. The extent of the most recent request has prompted staff to work with the applicant on devising a basic sign package to specifically address the airports current and future needs. Approval of this package will allow the signs on the property to be replaced and amended as needed.

This request includes:

- Parking lot & traffic control signs (variety of)
- Wayfinding monument signs (terminal parking)
- Monument entrance signs
- Vehicular directional signs (Wright Brother's Way)

The parking lot signs and traffic control signs will be post-mounted while the monument signs will be free-standing and internally illuminated. The three largest monument signs are proposed to be located at the two main entrances to the terminals with the largest at the main entrance to the north, while the two smaller ones will be located at the entrance to the south and will be mounted on ornamental stone bases. In addition to the signs specifically directing travelers to and from the main terminals, this request also includes two free-standing directional signs to be placed along Wright Brother's Way to direct motorists to individual tenants located on the airport property.

The large majority of the proposed signage is designed to replace existing signs and most can be installed without a need for a permit under the City's current standards; however, it was decided to include this signage in the request to ensure that minor relocations resulting in new visibility would not result in non-compliant signs and would provide the airport the most flexibility to grow and adjust their signs over time.

On a related note, the Planning staff has recently initiated research into the creation of an airport overlay zoning designation that is being designed to allow significant flexibility with signage as well as development activity. Given the time needed to complete this research and analysis, this request is being submitted separately in order to avoid additional delay.

As indicated above, a significant portion of the signs requested would not require a permit under the current standards because they are not designed to be seen from the boundaries of the property (i.e. parking lot signage); however, the rest of the signage would be limited to one freestanding sign at 125 square feet and one attached sign at 125 square feet. This standard is better suited for commercial, institutional and office uses and does not adequately address the unique operations of an airport facility.

In order for the airport to adequately and safely direct travelers in and out of the airport, the following signs are being requested:

Wayfinding Signs

16 total (Parking Lot)
36 square feet each
8 feet-8inches tall
Monument signs mounted on stone bases
Internally illuminated

Entrance Signs
3 total
Monument signs mounted on ornamental stone bases & frames
North (S-A): 96 square feet total, including base & frame
8 feet-8 inches tall
Internally illuminated

South (S-P): 30 square feet total, including base & frame
5 feet tall
Internally illuminated

South (S-Q): 56 square feet (not including base)
10 feet-8 inches tall
Ornamental stone base
Internally illuminated

Off-premise Vehicular Directional Signs
2 total (replacing former "red" signs on Wright Brother's Way)
36 square feet each
8 feet-8inches tall
Mounted on brick bases
Internally illuminated

Regarding the City Council Strategic Operating Plan, this proposal most closely supports the goal of *sustainability* through improved identity and wayfinding supporting the economic viability of the overall project.

Pros:
- Better addresses the unique needs of the airport operations
- Improves safety and ease of travelers reaching the terminals and other destinations on the airport property
- Individual tenants on airport property will be free to pursue separate permits

Con:
- Some tenant signage is non-conforming and may require replacement with conforming signage over time

No direct fiscal impact to the City has been identified.

Staff recommends approval of the sign package as proposed with the following additions: (1) The total number of signs may be increased to accommodate new entrances and parking areas as needed, provided they are distributed at a rate that is consistent with the current spacing established; and (2) All signs must resemble each other in character (color, fonts, stonework, etc.) to clearly communicate arrival on the airport property.

Mayor Bellamy closed the public hearing at 6:21 p.m.

When Councilman Mumpower was concerned about the City providing the Airport a "special deal", Councilwoman Cape noted that the Airport has the opportunity to ask for a waiver, just as anyone else does and Council makes the determination if the waiver is reasonable or not.

In response to Mayor Bellamy, Mr. Kevin Howell, representing the Asheville Airport, explained the signs directing people to the Fixed Base Operators.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilwoman Cape moved for the adoption of Ordinance No. 3805, with the following conditions: (1) The total number of signs may be increased to accommodate new entrances and parking areas as needed, provided they are distributed at a rate that is consistent with the current spacing established; and (2) All signs must resemble each other in character (color, fonts, stonework, etc.) to clearly communicate arrival on the airport property. This motion was seconded by Councilman Miller and carried on a 6-1 vote, with Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 25 - PAGE 478

B. PUBLIC HEARING TO CONSIDER THE MASTER PLAN AND REZONING FOR THE PROJECT IDENTIFIED AS HORIZONS, LOCATED AT 136, 176 AND 180 MERRIMON AVENUE AND 17 AND 23 ELOISE STREET FROM HIGHWAY BUSINESS DISTRICT, COMMUNITY BUSINESS I DISTRICT AND RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO URBAN VILLAGE DISTRICT FOR A MIXED USE DEVELOPMENT

Mayor Bellamy said that this public hearing was continued from January 15, 2008, at the applicant's request in order to work with the neighborhood, especially since a valid protest petition was submitted, which remains in effect. Then again on July 15, 2008, the public hearing was continued to October 28, 2008, at the applicant's request in that it became necessary, due to the recent economic conditions, the ownership group is currently exhausting opportunities and trying to secure financing and/or additional partners to help with the project economics. On October 28, 2008, at the applicant's request, this motion was continued to October 27, 2009.

Mayor Bellamy said that on September 1, 2009, Mr. Chris Peterson requested this matter be removed from City Council consideration.

On October 23, 2009, the following letter was received from Mr. Marty Kocot, PE, from LandDesign Inc.: "The ownership group (Mr. Foster Shriner, Mr. Chris Peterson and Mr. Cam Pace) of the proposed "Horizons" Urban Village project have asked me to formally request an additional twelve (12) month extension on the Urban Village Rezoning currently in progress. We realize this request to extend this project again is a bit unusual but the economic conditions we are all experiencing are bit unusual as well. It is and has always been the desire of the partnership group to create a wonderful project on the Merrimon Avenue site as a gateway point to the City and an extension of time on the Urban Village Rezoning request for this project gives us the best chance to succeed. To date thousands of dollars have been spent crafting and guiding the project through TRC and P&Z only to have the economy delay us from obtaining the needed financing. We are hopeful that this additional time will allow the economic market to improve and the project to move forward for consideration by City Council. This project has the ability to create local jobs and help with the economic recovery."

On October 27, 2009, a motion was made to continue the matter for two weeks until November 10, 2009.

Regarding the protest petition, City Attorney Oast said that if the public hearing is continued, the protest petition will remain valid. However, at the time of the public hearing, if the percentages the property owners fail to meet the requirements of the protest petition (change in ownership, etc.), the protest petition will not be valid. Another option is that Council not continue the public hearing but to allow the application to remain active, and when the developer re-

submits the application in the future, a public hearing date would be set at that time which would start the protest petition process over again.

Vice-Mayor Davis moved to continue the public hearing until October 26, 2010. This motion was seconded by Councilman Russell.

Mr. Ben Gillum, President of the Five Points Neighborhood Association, said that the neighbors are concerned with this project being continued year after year and when the public hearing date rolls around that the protest petition will be invalid due to some of the signers have moved and there are now different owners. He urged Council not continue the public hearing date in order to allow the property owners to have the opportunity to submit a new protest petition when the new public hearing date is set.

Vice-Mayor Davis withdrew his motion and Councilman Russell withdrew his second.

In response to Councilman Newman, Assistant Planning & Development Director Shannon Tuch said that the cost to re-submit the plans would be approximately $350 and it would have to go back through the Technical Review Committee, Planning & Zoning Commission and then City Council.

Mayor Bellamy felt that because there was no representative from the developer present at the meeting, she felt it would be appropriate for staff to provide Council with the different options and continue this discussion until the November 24, 2009, meeting.

Councilman Russell moved to continue the continuance request until the November 24, 2009, meeting. This motion was seconded by Councilman Mumpower and carried unanimously.

V. UNFINISHED BUSINESS:

VI. NEW BUSINESS:

A. RESOLUTION NO. 09-236 - RESOLUTION TO CAP PARKS, RECREATION & CULTURAL ARTS DEPARTMENT FACILITY RENTAL FEE ADJUSTMENT

Director of Parks, Recreation and Cultural Arts Roderick Simmons said that this is the consideration of a resolution to cap Parks, Recreation & Cultural Arts Department facility rental fee adjustment.

Staff has completed a review of best practices for facility rental fee waivers. Staff completed summary of best practices of cities for granting facility fee waivers. As with any city policy of this magnitude it comes down to the community value and the level of expected governmental services.

Staff contacted eleven parks and recreation departments across the state with different community make-ups to get a feel for their community tolerance level for granting fee waiver requests. Reviewing the results indicates there is no straight forward best practice for handling fee waiver requests. The only constant theme is departments that allow facility fees to be waived have many different options for approving the request. The only other common theme is there is not a cap on the amount of fee waiver before it requires City Council approval.

Staff recommendations are as follows:

- Structure the facility rental fee waiver process similar to the City's outdoor special event co-sponsorship process, in that a maximum dollar value is established each budget year to award to organizations that meet the criteria for fee waivers. Once this dollar threshold is met during the budget year no more fee waivers will be granted. They recommend allocating a $3,000

111

cap for the first year. The annual cap amount will be considered during the city's annual fees and charges approval process.

- The maximum amount of fee waiver that can be granted per request is $500. The cap on the maximum amount per request would insure that all organizations granted a fee waiver receive the same amount of value from the city.

- Specialized facilities and enterprise funds will not be considerate for rental fee waivers. These facilities are the following: Municipal Golf Course, Nature Center, Aston Tennis Center, Food Lion Skate Park.

- Events that request assistants above this threshold will be encouraged to apply through the City's annual co-sponsorship process.

Finance Committee reviewed the recommendation to cap facility rental fee waivers on October 27, 2009.

Pro:

- To ensure all organizations granted a rental fee waiver receive the same amount of value from the city.

Con:

- Potentially could reduce the annual revenue budget for facility rentals by $3,000 per year.

Staff recommends that Council adopt the recommendations regarding request for a facility rental fee waiver for use of Park facilities.

Mr. Simmons responded to various questions/comments from Council, some being, but are not limited to: what is the average fee waiver request; what is the purpose of the waivers; is there a list of criteria that staff looks at for considering a waiver; will this be an additional cost to the City in terms of operations or will this be a waiver for space rental only; and will this open the door for more waiver request.

Councilman Russell, Chair of the City Council Finance Committee, noted this is creating a policy for better control and will be reviewed again during the fees and charges process.

In response to Councilman Mumpower, Mr. Simmons said that once the $3,000 cap for fee waivers is reached, no more waivers will be issued.

Councilman Mumpower felt that we should have fair fees for everyone and not allow any waivers, or consider waiving fees for any requests.

Councilwoman Cape was concerned that since this is a first-come, first-served type fee waiver, events at the first of the fiscal year will have the opportunity to get a waiver; however, events near the end of the fiscal year will not have that opportunity because the cap may have already been met.

Councilman Newman would support his action; however, he agreed that the Finance Committee should review this during the fees and charges process. He supported making the fees as affordable as possible.

When Mayor Bellamy asked for public comments, none were received.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Newman moved for the adoption of Resolution No. 09-236. This motion was seconded by Councilman Russell and carried on a 5-2 vote, with Councilwoman Cape and Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 32 – PAGE 264

B. RESOLUTION NO. 09-237 - RESOLUTION APPROVING THE CREATION OF THE ASHEVILLE RIVERFRONT REDEVELOPMENT COMMISSION

Urban Planner Stephanie Monson said that this is the consideration of a resolution approving the creation of the Asheville Riverfront Redevelopment Commission.

Community leaders called the Riverfront Study Group have proposed a new City of Asheville commission to support the continued development and sustainability of Asheville's riverfront. The proposed Asheville Riverfront Redevelopment Commission ("Commission") would act as an advisory board and provide policy recommendations to Asheville City Council and the Buncombe County Board of Commissioners.

In addition to reinvigorating the implementation of the Wilma Dykeman Riverway Master Plan, the Commission is envisioned to support effective management of public resources for the riverfront and assist in the pursuit of private sector investment. The Commission would also support cooperation and collaboration between property owners, merchants, residents, businesses, tenants, institutions and other members of the riverfront community.

This effort would be considered a strategic partnership and the commission as proposed includes appointees from the City, the County, RiverLink, Council of Independent Business Owners, Asheville Area Chamber of Commerce and the City's River District Design Review Committee.

A public meeting of the Study Group was convened by Mayor Terry Bellamy on October 21, 2009, to discuss the organization of the proposed commission and to receive public comment. After an hour of positive comment, the Study Group unanimously voted to recommend City Council adopt a resolution creating Asheville's Riverfront Redevelopment Commission as outlined in the draft ordinance developed by City staff.

Monthly updates on the Riverfront Redevelopment Commission proposal, including the Study Group's consideration of the draft ordinance and the stakeholder outreach process, were received by City Council's Planning & Economic Development Committee from May-September of 2009.

This action aligns with the following goals from Council's strategic operating plan: (1) Affordable: Support diversified job growth and small business development; (2) Green: Support open space preservation; (3) Sustainable: Promote sustainable, high-density, infill growth that makes efficient use of existing resources; and (4) Sustainable: Pursue a stronger riverfront redevelopment partnership and dedicated office.

Pros:

- Collaborative focus on Riverfront Redevelopment program could illuminate previously unseen opportunities to coordinate community goals in a geographic area while minimizing cost and/or maximizing public benefit.
- New Commission creation chronologically aligns with the process for the City's (funded) Wilma Dykeman Riverway Environmental Analysis, Project Development and Preliminary Design project now underway.

Con:

- Commission designed as a partnership yet will be solely dependent on City funding and staff for unknown amount of time.

Duties in the Economic Development Office were prioritized and realigned to enable an Urban Planner position to be assigned to staff the Commission and to coordinate Riverfront Redevelopment program work internally. The ordinance under consideration requires the City to create and manage an annual budget to achieve the mission and goals of the Commission. It also requires strategic partners to share in the overall cost of staffing and resource provision. If the resolution is approved, Council, along with the strategic partners, would incorporate consideration of a recommended start-up budget for the Riverfront Redevelopment Commission into their 2010-2011 budget processes.

If Council approves of the resolution, adoption of it is recommended.

Ms. Monson asked for one sentence deletion in the proposed ordinance regarding attendance as it is addressed in a different section.

Mayor Bellamy noted that she received an e-mail from Mr. Mike Plemmons, Executive Director of the Council of Independent Business Owners, and they endorse the formation of the Asheville Riverfront Redevelopment Commission as proposed.

Mayor Bellamy also noted that she received an e-mail from Mr. Richard J. Lutovsky, President and CEO of the Asheville Area Chamber of Commerce, and they adopted a resolution on October 29, 2009, endorsing the Asheville Riverfront Redevelopment Commission. He said that the Board supports the initiative taken by the City and County and acknowledges the valuable work that both have done to bring us to this point. They urged City Council and the County Commissioners to endorse the formation of the Commission and they pledged to work with us in making it a successful endeavor.

Mr. Marc Hunt, Chairman of the Greenway Commission, spoke in support of the new Commission and felt the River District is strategically the most important place in the City for development of greenways.

Ms. Pattiy Torno, Co-Chair of the River District Design Review Committee, spoke in support of this new Commission and felt that it will take the commitment of the City, County and public and private partnerships to move forward.

In response to Councilman Newman, City Manager Jackson said that funding requests will go through the normal budget process. At this time, our commitment is one full-time person (Ms. Monson) and the Economic Development Office.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Mumpower moved for the adoption of Resolution No. 09-237. This motion was seconded by Councilwoman Cape and carried unanimously.

RESOLUTION BOOK NO. 32 – PAGE 265

C. ASHEVILLE CITY MARKET FEE WAIVERS REQUEST

Mr. Mike McCreary, Market Manager for Asheville City Market, said that the Market is planning to participate in the Seasonal Sizzle celebrations in December and will be relocating to Pack Square for their final four weeks. This initiative has served the community well, supported BUY LOCAL investment in the local economy, and contributed to the sustainability of local food and local farms. It is projected by the end of this second year the market sales by farmers and

vendors will exceed $1 Million. They are looking forward to attracting visitors and customers to downtown and to contributing to the success of the holiday festivities.

Their relocation to Pack Square requires various City permit applications along with associated fees. Given the Market's need to move from their Charlotte Street location, he requested Council's assistance and ask that fees normally collected for permits, barricades, etc. be waived for the Market's four week holiday market.

Mayor Bellamy explained that the Seasonal Sizzle fireworks are shot from the Public Works parking lot and due to safety concerns, the Asheville City Market will have to be relocated. She noted that this request did not go through the City Council Finance Committee due to the timing. If Council does not grant the waiver, the Asheville City Market will have to raise money for the permits, etc.

In response to Councilman Miller, Mr. McCreary said that last year they did not move from their location; however, they closed early each Saturday. Ms. Ruggiero noted that the Fire Department has made it clear that they will not issue two permits at this location this year as it poses an unsafe condition.

In response to Councilman Miller, Ms. Ruggiero said that for all four dates, the approximate waiver cost would be $1,500-$1,700. That would include the temporary street closing permit, per metered parking spaces being closed, barricade rentals and a building and fire permit.

Mr. Fred English felt that the prices at the Asheville City Market should be reduced.

Councilman Mumpower moved to waive the fees requested by the Asheville City Market, in the amount of $1,500-$1,700. This motion was seconded by Councilman Russell and carried unanimously.

D. RESOLUTION NO. 09-239 - RESOLUTION APPROVING ENHANCED SUPPORT OF ANCHOR EVENTS FOR THE REMAINDER OF FISCAL YEAR 2009-10

Cultural Arts Superintendent Diane Ruggiero said that this is the consideration of a resolution authorizing the City Manager to approve, as needed, additional in-kind support up to 20% of the original projected costs for traffic control and police support services associated with the remaining Fiscal Year 2009-10 anchor events (Asheville Drum Circle, Asheville Holiday Parade and Downtown After 5).

The Asheville Holiday Parade organizers requested an increase in traffic control and police support services for the 2009 parade. The anticipated financial impact of the additional in-kind services for the Asheville Holiday Parade and the remaining Fiscal Year 2009-10 anchor, co-sponsorship events (Drum Circle and Downtown After 5) is $7,000. The City Council Finance Committee recommends approval of the additional in-kind services.

Councilman Russell, Chair of the Finance Committee, said that the reason for the Holiday Parade request is due to the City changing some of its public safety and traffic control issues.

In response to Councilman Mumpower, Ms. Ruggiero said that the six anchor events consist of the Asheville Drum Circle, the Asheville Greek Festival, the Asheville Holiday Parade, Downtown After 5, the Goombay Festival and Shindig on the Green.

Councilman Mumpower questioned the City's investment in festivals, parades, etc.

When Mayor Bellamy asked for public comments, none were received.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Russell moved for the adoption of Resolution No. 09-239. This motion was seconded by Councilman Miller and carried on a 6-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 32 – PAGE 271

E. BOARDS & COMMISSIONS

It was the consensus of Council to reappoint Ms. DeRothea Williams and Mr. Ken Kaplan to the Alcoholic Beverage Control Board.

It was the consensus of Council to postpone filling the vacancy left by Mr. Harry Weiss on the Downtown Commission until Council considers the four additional end of the year vacancies.

It was the consensus of Council to reappoint Mr. Richard Leatherman and Mr. Celeste Collins to the Homeless Initiative Advisory Committee. Mayor Bellamy said that City Council has been receiving several e-mails from a Mr. Young with Quality United regarding the effectiveness of the homeless services provided to the homeless community. It was the consensus of Council to instruct City Manager Jackson to investigate the allegations regarding the services and our police officers and report back to Council and to Mr. Young. She also recommended the Homeless Initiative Advisory Committee and the Asheville-Buncombe Community Relations Council review the allegations, as well as Vice-Mayor Davis' suggestion for review by the Citizens-Police Advisory Committee.

It was the consensus of Council to appoint Mr. Hutch Kerns to the Recreation Board.

It was the consensus of Council to have Assistant City Manager Jeff Richardson remain on the Pack Square Conservancy Board and when City Council makes all their member and liaison appointments in the near future to reconsider that seat.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mayor Bellamy recognized Boy Scout Troop 91.

Mr. Fred English urged Council to attend the Veterans Day Ceremony and thanked Council for their prayers on the recent passing of his daughter-in-law Marcy Jean Rogers Stamey.

Mr. Tom Rightmyer, member on the Watershed Policy Committee, urged Council to take time to look at all the information gathered prior to their decision on the stormwater and erosion control ordinance.

Mayor Bellamy recognized Council Member Elect Cecil Bothwell in the audience.

The City received a Complaint for Declaratory Judgment on November 2, 2009, generally described as: D&J Real Estate Investments, LLC vs. City of Asheville. This lawsuit involves a dispute of a sublessee, as a hotel/motel operation, to pay rent to the City. This matter will be handled in-house.

Closed Session

At 7:34 p.m., Councilman Miller moved to go into closed session for the following reasons: (1) To consider the qualifications, competence, performance, character, fitness,

conditions of appointment of an individual public officer or employee. The statutory authorization is contained in G.S. 143-318.11(a)(6); and to prevent the disclosure of information that is confidential pursuant to G.S. 160A-168, the Personnel Privacy Act. The statutory authorization is contained in G.S. 143-318.11(a)(1); (2) To discuss matters relating to the location or expansion of industries or other businesses in the area served by the City Council, including agreement on a tentative list of economic development incentives that may be offered in negotiations, provided that any action authorizing the payment of economic development incentives will occur in open session. The statutory authority is contained in G.S. 143-318.11(a)(4); (3) To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including litigation involving Charter Communications, Inc. The statutory authorization is contained in G.S. 143-318.11(a)(3); and (4) To prevent disclosure of information that is privileged and confidential, pursuant to the laws of North Carolina, or not considered a public record within the meaning of Chapter 132 of the General Statutes. The law that makes the information privileged and confidential is N.C.G.S. 143-318.10(e). The statutory authorization is contained in N.C.G.S. 143-318.11(a)(1). This motion was seconded by Councilman Russell and carried unanimously.

At 8:40 p.m., Councilman Miller moved to come out of closed session. This motion was seconded by Councilman Russell and carried unanimously.

VIII. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 8:40 p.m.

Magdalen Boulleson
CITY CLERK

MAYOR

Tuesday – November 24, 2009 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Jan B. Davis; Councilwoman Robin L. Cape; Councilman Kelly M. Miller; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; Councilman William A. Russell Jr.; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Bellamy led City Council in the Pledge of Allegiance.

INVOCATION

Mayor Bellamy gave the invocation.

I. PROCLAMATIONS:

A. RESOLUTION NO. 09-238 - RESOLUTION OF APPRECIATION FOR KELLY M. MILLER

Mayor Bellamy noted that Councilman Miller has a previously scheduled conference out of town and would not be able to attend the organizational meeting held on December 8, 2009. Therefore, she would like to recognize him at this meeting. She then read the resolution.

Resolution No. 09-238 was adopted by acclamation.

Mayor Bellamy thanked Councilman Miller for his service to Asheville and presented him with the resolution, a plaque and a City pen.

Councilman Miller thanked City Council, the Chamber of Commerce and the Tourism Development Authority staff for their support over the last year, as well as his wife, Kate, for her patience.

RESOLUTION BOOK NO. 32 - PAGE 270

B. CITY OF ASHEVILLE ORGANIZATIONAL CHANGES

City Manager was pleased to announce the new Fire Chief Scott Burnette, the Economic Development and Civic Center Director Sam Powers, and the new Director of Administrative Services Lauren Bradley.

Mayor Bellamy said that she is looking forward to working with each of these employees in their new roles.

II. CONSENT AGENDA:

At the request of Councilman Mumpower, Consent Agenda Items "C" and "E" were removed from the Consent Agenda for individual votes.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON NOVEMBER 10, 2009

B. RESOLUTION NO. 09-240 - RESOLUTION AUTHORIZING THE EXCHANGE OF REAL PROPERTY LOCATED ON COLLEGE STREET FOR PROPERTY LOCATED ON WINDSWEPT DRIVE

Summary: The consideration of a resolution authorizing the exchange of real property located on College Street for property located on Windswept Drive.

The City of Asheville is in need of property located on Windswept Drive in order to assemble the land necessary to implement the Beaucatcher Greenway. Accordingly, the City of Asheville and Zealandia Holdings, LLC have negotiated an exchange of real property at College Street for real property on Windswept Drive. Pursuant to N. C. G. S. 160A-271 a notice was duly published in the Asheville Citizen-Times on November 13, 2009, describing the exchange of properties on the following terms:

The property owned by Zealandia Holdings, LLC is located on Windswept Drive. Measuring approximately 3.95+/- acres, this parcel is comprised of PINs 9648-89-2982-00000 and 9649-80-4085-00000. The parcel is irregular in shape with Windswept Drive winding through the center of the property, wooded, steep in terrain, and zoned as RS-2, low-density residential. This parcel provides access to the historic bridge known as "Helen's Bridge," which was designed by Asheville architects Richard Sharp Smith and Albert Heath Carrier. In an appraisal dated August 26, 2009, the property was valued at $250,000. The appraisal was performed by Benjamin Beasley and Associates, Inc.

The City parcel considered for exchange is near the end of College Street. The property is 5 acres+/- in size and is a portion of tax PIN 9649-70-7463-00000. At one time, this property served the City's water needs, and a large concrete water reservoir exists on site, measuring over 150 feet in diameter. This reservoir is no longer in use and completely empty, and is considered to be an encumbrance to the property that will require removal. Large water distribution lines encumber the property as well. This parcel is wooded, mostly steep in terrain, and zoning for this property is RS-2. In an appraisal dated August 26, 2009, this parcel was valued at $330,000. This appraisal was performed by Benjamin Beasley and Associates, Inc.

In order to supply parking to the future greenway development, as well as retain the ability to develop modest resting areas with benches and walking trails, the City would like to retain ownership of approximately 1.2 acres of the reservoir parcel. Retaining the fee simple ownership of this portion will reconcile the difference in appraisal values, and the exchange will be full and fair.

In total, the exchange between the City of Asheville and Zealandia Holdings, LLC will entail several aspects. The City of Asheville will exchange 3.8 acres of property for Zealandia Holdings' 3.95 acres as an even exchange without any payments. In terms of the water infrastructure, the City has proposed to take care of the necessary water line closures and disconnections that are required; and Zealandia Holdings has proposed to perform the removal of the tank. Easements/right-of-way appropriate to each parcel will be developed for utilities and access. Closing costs will be split by the City of Asheville and Zealandia Holdings LLC.

Approval of the resolution will authorize the exchange of the properties as provided in N. C. G. S. 160A-271.

Assembling land for the Beaucatcher Greenway complies with City Council's Strategic Plan in the Green Focus Area in that it advances a multi-modal transportation plan, which includes greenways, and pursues opportunities to preserve open space. This action also complies with the 2008 Parks, Recreation, Cultural Arts, and Greenways Master Plan in that it provides for further development of an existing greenway identified in the Master Plan.

This item has been reviewed by the Greenway Commission and has received the Commission's endorsement on November 12, 2009. This item has also been reviewed the by Recreation Board and at their meeting on November 9, 2009, they recommended approval.

Pros:

- Assemblage of land necessary for the implementation of the Beaucatcher Greenway.
- Removal of abandoned water tank will improve site safety concerns.

Con:

- There is no negative impact.

The City's share of the closing costs is estimated at less than $7,000, to include the appraisals, Phase One Environmental Report, legal fees and surveys. The major expense will be the disconnections of the water lines and will be the responsibility of the Water Resources Department. The Water Resources Department intends to perform this work in-house, with an estimated value of $125,000 including labor and materials. This estimate is comparable or lesser than the estimated cost of removing the reservoir tank that will be performed by Zealandia Holdings, LLC.

City staff recommends City Council adopt a resolution authorizing the exchange of real property located on College Street for property located on Windswept Drive.

RESOLUTION BOOK NO. 32 – PAGE 272

C. BUDGET AMENDMENT FROM THE N.C. DEPT. OF ENVIRONMENT AND NATURAL RESOURCES FOR THE FISCAL YEAR 2009-10 GRASSROOTS SCIENCE MUSEUMS COLLABORATIVE FOR THE WNC NATURE CENTER

This item was removed from the Consent Agenda for discussion and/or an individual vote.

D. RESOLUTION NO. 09-241 – RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN AN AGREEMENT WITH THE N.C. DEPT. OF CRIME CONTROL AND PUBLIC SAFETY FOR FUNDING THE HAZARDOUS MATERIALS REGIONAL RESPONSE TEAM

ORDINANCE NO. 3807 - BUDGET AMENDMENT FROM THE N.C. DEPT. OF CRIME CONTROL AND PUBLIC SAFETY FOR FUNDING THE HAZARDOUS MATERIALS REGIONAL RESPONSE TEAM

Summary: The consideration of a resolution authorizing the City Manager to accept a non-matching grant in the amount of $135,714 from the N.C. Dept. of Crime Control and Public Safety, Division of Emergency Management, for the procurement of equipment and training/exercise funds to be used by Hazardous materials Regional Response Team 6 – Asheville, and the associated budget amendment.

The U.S. Department of Homeland Security and the Office of Domestic Preparedness has made funds available through State Homeland Security Grant Number: FY2009-SS-T9-0046 to implement the State Homeland Security Strategy. The strategy identifies the NC Hazardous Materials Regional Response Teams (RRT) as an integral component of North Carolina's preparation and response to manmade and natural emergencies and disasters. The purpose of the grant is to purchase specialized equipment to be used on-scene and to prepare for threatened or actual weapons of mass destruction or domestic terrorists attacks or major disasters. Training and exercise funds included in this grant will be used to provide responders the opportunity to demonstrate and validate skills learned in training, as well as to identify training gaps.

There are seven Regional Response Teams (RRT) strategically located throughout the state. Asheville Fire and Rescue hosts one of the seven state funded teams - RRT 6. The team responds to hazardous materials incidents in the twenty westernmost counties of North Carolina.

Each of the seven RRTs will receive an equal amount of non-matching funding and each will procure comparable equipment. The equipment consists of updated detection and monitoring instruments, personal protective equipment and mitigation materials required to lessen the affects of terrorist's attacks and hazardous materials incidents.

The grant is non-matching and all equipment provided through this grant will become the property of the Asheville City Government.

This action complies with the Strategic Operating Plan by better equipping the Hazardous Materials Team with upgraded equipment; this grant will assist in making Asheville a safer city, based on appropriate metrics for similarly sized cities.

The City Council Public Safety Committee reviewed and supported this item at their November 17, 2009, meeting

Pros:

- The Department of Crime Control and Public Safety, Division of Emergency Management, will provide $135,714.00 in non-matching funds for the purpose of upgrading Asheville and Western North Carolina's terrorism response capabilities.
- The equipment is state of the art and will better address the risk of terrorist's attacks and hazardous materials incidents.
- All statewide regional response teams will be comparably equipped and interoperability will be realized should an event require the resources of additional teams.
- This equipment is immediately available to Asheville residents and businesses. This level of equipment would most likely not be able to be obtained through the city's general budget process.
- Training and exercise for emergency responders will aid in the enhancement of awareness levels of terrorists tactics and hazardous material incidents.
- Firefighter and citizen safety will be enhanced.

Con:

- The City of Asheville will be responsible for maintenance and upkeep of the equipment.

There is no fiscal impact associated with this grant, as it is non-matching.

City staff recommends that City Council accept the non-matching grant from the NC Department of Crime Control and Public Safety, Division of Emergency Management, to enhance AFD's capabilities to protect Asheville and Western North Carolina, and the associated budget amendment.

RESOLUTION BOOK NO. 32 – PAGE 274

ORDINANCE BOOK NO. 25 – PAGE 489

E. RESOLUTION AUTHORIZING THE CITY MANAGER TO APPLY FOR A GRANT WITH THE U.S. DEPT. OF HOMELAND SECURITY FOR ADDITIONAL FIREFIGHTERS

This item was removed from the Consent Agenda for discussion and/or an individual vote.

F. RESOLUTION NO. 09-245 - RESOLUTION AUTHORIZING THE CITY MANAGER, HIS OR HER DESIGNEES, TO ELECTRONICALLY SIGN CONTRACTS, PURCHASE ORDERS AND OTHER ASSOCIATED DOCUMENTS ON BEHALF OF THE CITY AND THE CHIEF FINANCIAL OFFICER TO SIGN THE PRE-AUDIT STATEMENT DOCUMENTS ELECTRONICALLY OR BY ANY OTHER MEANS SPECIFIED IN N.C. GEN. STAT. SEC. 159-28.1

Summary: The consideration of a resolution authorizing the City Manager, his or her designees to electronically sign contracts, purchase orders and other associated documents on behalf of the City and the Chief Financial Officer to sign the pre audit statement documents electronically or by any other means specified in N.C. Gen. Stat. 159-28.1.

The City of Asheville processes hundreds of contracts and purchase orders in any given week. In an effort to stream line the process, the City is installing computer software which will allow for contracts and purchase orders can be approved electronically. Under North Carolina law, as delegated by City Council, the City Manager is authorized to sign contracts on behalf of the City. In addition North Carolina law requires the Chief Financial Officer to sign all pre-audit statements for all contracts and purchase orders. In order to move to a paperless system, it is necessary for the City Manager, his or her designee and the Chief Financial Officer to sign contracts, purchases orders and pre-audit statements electronically.

Regarding the City Council Strategic Operating Plan, this action complies with Affordable and Green in that the City will be reducing the amount of paper needed to process contracts and purchase orders.

Pros:

- Reduce the amount of paper used by the City
- Reduce the amount of time approval forms travel through interoffice mail
- Increase turn around times for contract and purchase order approvals
- Improve customer service

Con:

- None

The use of electronic signatures will save the organization approximately $1,800 annually by eliminating the need for purchase order forms and supplies.

City staff recommends City Council adopt a resolution authorizing the City Manager, his or her designees to electronically sign contracts, purchase orders and other associated documents on behalf of the City and the Chief Financial Officer to sign the pre audit statement documents electronically or by any other means specified in N.C. Gen. Stat. 159-28.1.

RESOLUTION BOOK NO. 32 – PAGE 278

G. RESOLUTION NO. 09-246 - RESOLUTION REAPPOINTING MEMBERS TO THE ALCOHOLIC BEVERAGE CONTROL BOARD

Summary: The terms of DeRothea Williams and Ken Kaplan expired on November 13, 2009.

At the November 10, 2009, meeting, it was the consensus of Council to (1) reappoint DeRothea Williams to serve an additional three-year term, term to expire November 13, 2012; and (2) reappoint Ken Kaplan to serve a three-year term, term to expire November 13, 2012. Both terms are until their successors have been appointed.

RESOLUTION BOOK NO. 32 – PAGE 279

H. RESOLUTION NO. 09-247 - RESOLUTION REAPPOINTING MEMBERS TO THE HOMELESS INITIATIVE ADVISORY COMMITTEE

Summary: The terms of Richard Leatherman and Celeste Collins expired on November 1, 2009. Both have served one, one-year term.

At the HIAC meeting on November 10, 2009, the HIAC recommended City Council reappoint Mr. Leatherman and Ms. Collins.

At the November 10, 2009, City Council meeting, it was the consensus of Council to reappoint Mr. Leatherman and Ms. Collins to each serve a three-year term respectively, terms to expire November 1, 2012, or until their successors have been appointed.

RESOLUTION BOOK NO. 32 – PAGE 280

I. RESOLUTION NO. 09-248 - RESOLUTION APPOINTING A MEMBER TO THE RECREATION BOARD

Summary: Pastor Spencer Hardaway has resigned as a member of the Recreation Board thus leaving an unexpired term until June 30, 2012.

On November 10, 2009, it was the consensus of Council to appoint Hutch Kerns to serve the unexpired term of Pastor Hardaway, term to expire June 30, 2012, or until his successor is appointed.

RESOLUTION BOOK NO. 32 – PAGE 281

J. RESOLUTION NO. 09-249 - RESOLUTION AUTHORIZING THE MAYOR TO ACCEPT THE DONATION OF THREE REMNANT PROPERTIES ALONG BROADWAY STREET FROM THE N.C. DEPT. OF TRANSPORTATION FOR THE PURPOSE OF IMPLEMENTING PHASE II OF THE REED CREEK GREENWAY

Summary: The consideration of a resolution authorizing the Mayor to accept, for no monetary consideration, the conveyance of three N.C. Dept. of Transportation (NCDOT) remnant properties for the purposes of implementing Phase II of the Reed Creek Greenway.

The NCDOT remnant properties identified by PIN 9649-14-7057-00000, 9649-13-9931-00000, and 9649-23-1821-00000 along Broadway Street are needed in order to reach 100% of the right-of-way necessary to implement Phase II of the Reed Creek Greenway.

Property 9649-14-7057-0000 is 0.28 acres in size, 9649-13-9931-00000 is 0.12 acres in size, and 9649-23-1821-00000 is 0.03 acres in size. The total acreage of property proposed for conveyance is 0.40 acres.

In August, 2009 staff contacted NCDOT to inquire about conveyance of the properties. NCDOT researched the properties and agreed to convey them to the city for no consideration with the stipulation that the properties will revert back to the State should they cease to be used for greenway purposes.

Upon City Council approval, NCDOT will take the conveyance proposal to the North Carolina Board of Transportation and Council of State for final approval. The City will only be

responsible for paying deed recordation fees, which should not exceed $100.00. NCDOT will prepare the deeds through the Attorney General's office.

This action complies with (1) City Council's Strategic Plan in the Green Focus Area in that it advances the promotion of emission-reducing transportation options including greenways, and pursues opportunities to preserve open space; (2) the Asheville City Development Plan 2025 in that it implements the adopted Greenway Master Plan; and (3) the Greenway Master Plan and the 2008 Parks, Recreation, Cultural Arts, and Greenways Master Plan in that it provides for further development of an existing greenway identified in the Master Plan.

This item has been reviewed by the Council's Greenway Commission and has received the Commission's endorsement on November 12, 2009. It has also been reviewed the by Recreation Board and at their meeting on November 9, 2009, they recommended approval.

Pros:

- Securing these properties will allow Phase II of the Reed Creek Greenway to be implemented.
- Increases the City's inventory of park space.

Con:

- Modest additional maintenance costs.

No monetary consideration required for the conveyance. Deed recordation fees will be the responsibility of the City, which should not exceed $100.00.

City staff recommends City Council to adopt a resolution accepting the conveyance of three NCDOT remnant properties for no monetary consideration for the purposes of implementing Phase II of the Reed Creek Greenway.

RESOLUTION BOOK NO. 32 – PAGE 282

Mayor Bellamy asked for public comments on any item on the Consent Agenda, but received none.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Miller moved for the adoption of the Consent Agenda. This motion was seconded by Councilwoman Cape and carried unanimously.

ITEMS REMOVED FROM THE CONSENT AGENDA FOR INDIVIDUAL VOTES

C. ORDINANCE NO. 3806 - BUDGET AMENDMENT FROM THE N.C. DEPT. OF ENVIRONMENT AND NATURAL RESOURCES FOR THE FISCAL YEAR 2009-10 GRASSROOTS SCIENCE MUSEUMS COLLABORATIVE FOR THE WNC NATURE CENTER

Summary: The consideration of a budget amendment, in the amount of $35,621, for a grant from the N.C. Dept. of Environment and Natural Resources through the Grassroots Science Museums Collaborative.

Each year the State of North Carolina allocates and distributes funds to the 25 to 30 member museums, science centers and nature centers in North Carolina for the Grassroots Science Museums Collaborative as supported by North Carolina Senate Bill 1741. The WNC Nature Center is a member of the collaborative.

Funds will be used to enhance Nature Center operations and to make improvements to the facility and animal exhibits at the Nature Center.

The action complies with the City Council 2009-10 Strategic Plan in the Green focus area in that it supports the operation and maintenance of all city parks. The action also complies with the Parks, Recreation, Cultural Arts & Greenways Master Plan in that it increases department funding with alternative funding via grants.

Pros:

- Provide additional funds to support the overall operating cost of the Nature Center
- Provide funds to enhance special projects and services to Nature Center visitors
- Provide funds to assist in fulfilling standards and maintaining Nature Center accreditation with the Association of Zoos and Aquariums

Con:

- None

The grant will increase the City's operating budget by $35,621 in a special projects account designated for the WNC Nature Center.

Staff recommends City Council to approve the budget amendment authorizing the City Manager to establish a budget of $35,621 for the WNC Nature Center with a grant from the N.C. Dept. of Environment and Natural Resources through the Grassroots Science Museums Collaborative.

Councilman Mumpower was troubled with the dysfunctional court system and felt that the state should use those funds for that purpose. In addition, he felt we will be using borrowed money that will need to be paid back by our children and grandchildren.

Councilwoman Cape moved for the adoption of Ordinance No. 3806. This motion was seconded by Councilman Miller and carried on a 6-1 vote, with Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 25 – PAGE 487

E. RESOLUTION NO. 09-242 - RESOLUTION AUTHORIZING THE CITY MANAGER TO APPLY FOR A GRANT WITH THE U.S. DEPT. OF HOMELAND SECURITY FOR ADDITIONAL FIREFIGHTERS

Summary: The consideration of a resolution authorizing the Fire Department to apply for a grant in the amount of $540,000 from the US Dept. of Homeland Security to obtain funding for six additional firefighter positions.

The US Dept. of Homeland Security has recently issued guidance for the Fiscal Year 2009 Staffing for Adequate Fire and Emergency Response (SAFER) program. This is a grant opportunity for fire departments to add additional firefighters. The grant is a 3 year matching grant. In years 1 and 2, the grant covers 100% of the cost for the additional firefighter's salaries and benefits. The matching portion for the grant occurs in year 3, which is the full cost of these firefighter's salaries and benefits. This could be a good opportunity for our City to add needed personnel and have their cost completely absorbed by this grant for two years.

We currently operate 4 firefighter companies on 8 of our 17 fire companies (47%). One of our companies operates with two firefighters (Haw Creek). This grant could assist with increasing additional fire companies to four firefighter staffing which helps accomplish the following strategic priorities:

- Increased firefighter safety
  - Studies performed in Providence, RI, and Austin, TX, have shown that four firefighter companies reduce firefighter injuries and reduce the physiological effects of firefighting activities on firefighters.
  - Increased efficiency translates into increased firefighter safety during fire emergencies. Tasks that are performed more quickly reduce the exposure time for firefighters as well as mitigate emergencies earlier. In summary, a small fire is safer to firefighters than a large fire.
- Increased efficiency
  - We have conducted critical task analyses of our 3 firefighter and 4 firefighter companies. These analyses of actual fireground activities showed that 4 firefighter companies perform up to 41% more efficient during fire emergencies and up to 92% more efficient during medical emergencies.
- Increased service delivery
  - Increased efficiency translates into increased service delivery for citizens during fire and medical emergencies. Performing tasks quicker provides better service to citizens. Fire and medical emergencies have been shown to significantly worsen as time progresses. Mitigating emergencies earlier lessens the impact on citizens.
  - Earlier incident mitigation places fire companies in service and available to respond to other citizen needs earlier. The increased efficiency of 4 firefighter companies increases unit reliability and lessens the amount of time that citizens are receiving help from fire stations further away.
  - Additional firefighters are the one area that increases our ISO rating performance the most and moves us closer to an ISO 2.

We recommend applying for 6 firefighter positions for the following reasons:

- The grant program guidance indicates that a much higher priority for awards will be given to applicants who are increasing staffing to comply with the OSHA 2 in/2out standard. The strongest application we can compile would be to address our 2 firefighter company at Haw Creek to four firefighter staffing. This is the only area that we currently are not meeting the OSHA standard. This is also our only stand alone company that does not operate with 4 firefighters.
- We feel that a grant that asks for less or more would not be competitive.

This action complies with the Strategic Operating Plan by increasing safety, efficiency, and service delivery; therefore this grant will assist in making Asheville a safer city, based on appropriate metrics for similarly sized cities.

The City Council Public Safety Committee reviewed and supported this item at their November 17, 2009, meeting

Pros:

- Firefighter safety, efficiency, and service delivery will be increased.
- Hiring 6 new firefighters will help reduce overtime. The firefighters obtained from this grant could be placed on shift without a requirement to be minimally staffed positions. These positions will fully meet the requirements and intent of the grant as more of our companies will be fully staffed more frequently.
- The grant covers 100% of the cost for these firefighters for two years.

Con:

- We would assume the full cost of these employees in year three (FY 12/13)

The City would receive $270,000 each year for two years. In year three, and potentially beyond, the City would have to absorb the $270,000 annually.

City staff recommends that City Council authorize the fire department to apply for a grant in the amount of $540,000 from the US Dept. of Homeland Security to obtain funding for six additional firefighter positions.

Councilman Mumpower felt we should fund our own police and fire services and not take these borrowed federal dollars that will have to be repaid by our children and grandchildren.

In response to Councilman Newman's concern about sustaining these firefighters after year two given our budget, Fire Chief Scott Burnette explained where those firefighters will be assigned and that there is a goal within the Fire Department's strategic priorities to increase staffing, safety and efficiency in service delivery to our citizens.

Fire Chief Burnette responded to Councilwoman Cape regarding the guidelines for this particular grant.

Councilman Newman felt that these positions will be effective in terms of how they will be deployed; however, when he thinks of the City's public safety priorities in general, to him the biggest needs we have are for expansion of police officers in making neighborhoods safer and where we have a lot of problems and simply need more people to address them.

Vice-Mayor Davis moved for the adoption of Resolution No. 09-242. This motion was seconded by Councilman Miller and carried on a 5-2 vote, with Councilman Mumpower and Councilman Newman voting "no."

RESOLUTION BOOK NO. 32 – PAGE 275

III. PRESENTATIONS & REPORTS:

A. GUN BUY-BACK PROGRAM INITIATIVE

Vice-Mayor Davis, Chair of the Public Safety Committee, said that the Public Safety Committee took formal action on November 17, 2009, to propose a Gun Buy-Back program for a two week timeframe prior to the December holidays ($10,000 total).

He explained that the Public Safety Committee has identified $5,000 of private grant money from Eblen Foundation and $5,000 of grant money available from the Housing Authority for the purpose of administering a Gun Buy-Back Program. The Committee has asked the Police Department to consider a $5,000 match for its Fiscal Year 2009-10 departmental operating budget. The Police Chief has acknowledged that the department has the financial capacity to earmark $5,000 for its existing Community Outreach Program, if that is the direction of City Council.

In addition, the Committee has asked for implementation of the program prior to the December holidays and to be administered through the Police Department, similarity to past programs. The Police Chief has acknowledged staff's ability to absorb this new initiative in the timeframe described, if that is the direction of City Council.

Pro:

- The Gun Buy-Back Programs effectively removes guns from the community, which serves to limit availability of guns for criminal activity.

Con:

- Re-prioritization of Community Service dollars from other community service initiatives.

As previously noted, implementation of this program would require the Police Chief to allocate $5,000, or 10%, of the total existing Community Outreach dollars accordingly.

The Public Safety Committee recommends approval and implementation of this Gun Buy-Back Program two weeks prior to the December holidays. Staff is prepared to act upon this recommendation if approved.

In response to Vice-Mayor Davis, Police Chief Hogan said that last year we purchased approximately 183 guns through the very successful Gun Buy-Back Program in a three-weekend period. Last year the City bought small guns and weapons for $50 each and for the more radical-type guns they paid $100 each.

Mr. Gene Bell, Executive Director of the Housing Authority of the City of Asheville, said that it's not unusual to find guns in vacated units in public housing. They supported any initiative to get guns off the streets and they have contributed $5,000 towards this effort.

Councilman Russell noted that guns are one of the highest targeted items in homeowner theft.

There was a brief discussion, initiated by Councilman Mumpower, about why the City doesn't re-sell the guns from the Buy-Back Program instead of destroying them (or using them for training purposes if it is a unique weapon). Chief Hogan felt the principle is that if you re-sell the guns, they could end up back in the cycle and back on the street. Councilman Mumpower felt that if we sold them to reputable, well-intended citizens that we would have the potential to create a reoccurring funding source and fund this program a couple of times a year.

Mayor Bellamy noted that if we did re-sell the guns, it was imperative that the process be transparent.

It was the consensus of Council that the Police Chief report back to Council regarding his investigation of what the best process would be to re-sell the guns and if he feels that is the best process for our community to implement.

Vice-Mayor Davis moved to implement the Gun Buy-Back Program, similar to the past, two weeks prior to the December holidays; and directed the City Manager to consider, in the future, a way to turn the re-sale of guns into a revenue stream. This motion was seconded by Councilman Russell and carried unanimously.

B. ECONOMIC STIMULUS PACKAGE UPDATE

RESOLUTION NO. 09-250 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE ON BEHALF OF THE CITY OF ASHEVILLE A CONTRACT AND ANY CHANGE ORDER WITHIN THE BUDGETED AMOUNT WITH GREEN LIGHT ELECTRIC FOR THE PROJECT KNOWN AS FAIRVIEW ROAD SIGNAL UPGRADES, TIP # U-5175/CITY OF ASHEVILLE PROJECT # ARRA 09-10-03

RESOLUTION NO. 09-252 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE ON BEHALF OF THE CITY OF ASHEVILLE A CONTRACT AND ANY CHANGE ORDER WITHIN THE BUDGETED AMOUNT WITH RIVERTOP CONTRACTING FOR THE PROJECT KNOWN AS CORRIDOR ENHANCEMENTS IN DOWNTOWN ASHEVILLE, TIP # U-5174/CITY OF ASHEVILLE PROJECT # ARRA 09-10-02

RESOLUTION NO. 09-252 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE ON BEHALF OF THE CITY OF ASHEVILLE A CONTRACT AND ANY CHANGE ORDER WITHIN THE BUDGETED AMOUNT WITH MOORE & SONS SITE CONTRACTORS FOR THE PROJECT KNOWN AS ASHEVILLE SIDEWALK IMPROVEMENTS, TIP # U-5186, CITY OF ASHEVILLE PROJECT # ARRA 09-10-05

RESOLUTION NO. 09-253 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE ON BEHALF OF THE CITY OF ASHEVILLE A CONTRACT AND ANY CHANGE ORDER WITHIN THE BUDGETED AMOUNT WITH MOORE & SONS SITE CONTRACTORS FOR THE PROJECT KNOWN AS COXE AVENUE MILLING, PAVING, RE-STRIPING, AND DRAINAGE; AND SOUTH SLOPE RE-STRIPING AND DRAINAGE, TIP NUMBERS U-5173 AND U-5177/CITY OF ASHEVILLE PROJECT NUMBERS. ARRA 09-10-01 AND ARRA 09-10-04

American Recovery & Reinvestment Project Manager Brenda Mills said that as part of city staff's recurring American Recovery & Reinvestment (ARRA) update to Asheville City Council, staff is seeking Council approval of the following: (1) A resolution to award the construction contract for the Fairview Road signal upgrade project to Green Light Electric in the amount of $58,678.95; (2) A resolution to award the construction contract for the Downtown Streetscapes project to Rivertop Contracting in the amount of $79,006.00; (3) A resolution to award the construction contract for the Asheville sidewalks project to Moore & Sons Site Contractors in the amount of $436,920.00; and (4) A resolution to award the construction contract for the Coxe Avenue resurfacing and South Slope bicycle lane marking to Moore & Sons Site Contractors in the amount of $214,208.70.

ARRA funding was awarded for these projects through the French Broad River Metropolitan Planning Organization (MPO). The grant agreements and budget amendments were approved by the Asheville City Council on August 11, 2009, and August 25, 2009, and it is now time to approve the contract award. After this Council action, the documents will receive final review by N.C. Dept. of Transportation (NCDOT) and Federal Highways, and then the contracts can be executed. Each of these contracts is a unit price contract, not a lump sum contract.

All but the sidewalk project are fully funded by ARRA, and in consideration of the bids received, ARRA funding can be expected to cover the full cost of the sidewalk project. Kimberly Avenue resurfacing, selected for funding by the MPO only if funds are available (which depends on the costs for the other MPO projects), remains on hold, probably until at least March 2010.

Fairview Road Signal Upgrades, TIP # U-5175; City of Asheville Project # ARRA 09-10-03

This project will upgrade the existing traffic signals, install pedestrian signals and will add crosswalk markings at the intersections of Fairview Road and Onteora Boulevard/Baldwin Street, and Fairview Road and Cedar Street, at Oakley Elementary School. The contract specifies that work may begin work as soon as January 4, 2010, and must be completed by May 4, 2010.

Formal request for bids was issued on October 15, 2009, and bids were opened November 5, 2009:

Bidder	Address	Bid Amount
Haynes Electric	Asheville, NC	$60,000.00
Green Light Electric	**Weaverville, NC**	**$58,678.95***

*Green Light Electric is a woman-owned business.

Downtown and Gateway Streetscapes, TIP # U-5174; City of Asheville Project # ARRA 09-10-02

This project will plant several existing medians and bulb outs in downtown Asheville. The contract specifies that work may begin work as soon as January 4, 2010, and must be completed by May 4, 2010.

Formal request for bids was issued on October 15, 2009, and bids were opened November 5, 2009:

Bidder	Address	Bid Amount
Allison Landscaping	Hendersonville, NC	$141,648.00
Landmark Landscapes	Arden, NC	$81,438.86
Rivertop Contracting	**Black Mountain, NC**	**$79,006.00***

*Rivertop Contracting is a woman-owned business.

Sidewalks, TIP No. U-5186; City of Asheville Project # ARRA 09-10-05

This project will construct sidewalks on Hilliard Avenue, Depot Street, Evelyn Place, Hendersonville Road, Linden Street, Short Michigan Avenue, and a multi-use path along Choctaw Street. The contract specifies that work may begin work as soon as January 4, 2010, and must be completed by September 17, 2010.

Formal request for bids was issued on October 21, 2009, and bids were opened November 12, 2009:

Bidder	Address	Bid Amount
Econ International Corp.	Charlotte, NC	$466,041.00*
Fletcher Grading Contractors	Arden, NC	$439,341.69
J.L.S. Company	Arden, NC	$446,084.40*
Moore & Sons Site Contractors	**Mills River, NC**	**$436,920.00**
Patton Construction	Arden, NC	$560,932.00
Tennoca Construction	Candler, NC	$908,792.03

*Econ International Corp. is a minority-owned business and J.L.S Company is a woman-owned business.

Coxe Avenue, TIP No. U-5173, and South Slope Bike Lanes, TIP No. U-5177; City of Asheville Project # ARRA 09-10-01 and ARRA 09-10-04

These two projects were combined into one construction contract. The projects will provide a full-width resurfacing of Coxe Avenue and mark bike lanes on Coxe Avenue, Asheland Avenue, Hilliard Avenue, Martin Luther King, Jr., Drive, and Choctaw Avenue. The contract specifies that work may begin work as soon as January 4, 2010, and must be completed by September 17, 2010.

Formal request for bids was issued on October 27, 2009, and bids were opened November 18, 2009:

Bidder	Address	Bid Amount
APAC Atlantic, Inc.	Candler, NC	$278,867.40
J.L.S. Company	Arden, NC	$219,058.04*

Moore & Sons Site Contractors	**Mills River, NC**	**$214,208.70**

*J.L.S Company is a woman-owned business.

Once these resolutions are adopted, the documentation can be forwarded to the NCDOT for final reviews and authorizations, including review of the contractors' Disadvantaged Business Enterprise (DBE) efforts and goals.

This project supports the City Council's strategic plan goals of proactively pursing funding opportunities with state and federal economic stimulus packages and leveraging funding for regional transportation improvements.

Pros:

- Improves Asheville's transportation facilities
- Implements projects in the City's adopted pedestrian and bicycle plans
- Provides long term investment in the City's infrastructure
- Improves pedestrian safety at a school

Con:

- The City will be responsible for future maintenance of the projects
- Project management and contract administration will consume staff time

These projects will bring more than $788,000 in active transportation infrastructure improvements to the City, and there is a reasonable expectation that no matching funds will be required. At the August 25, 2009, meeting, City Council approved the appropriation of $366,812 from fund balance to cover costs for the sidewalk and Kimberly Avenue projects that were not funded with ARRA proceeds. If this City funding is not needed for these projects then it will be returned to fund balance.

City staff recommends City Council adopt each of the resolutions identifying the recommended lowest responsible bidder and authorizing the City Manager to execute the contracts.

Councilman Mumpower could not support these actions because these are borrowed federal dollars that our children and grandchildren will have to repay.

Mayor Bellamy thanked Ms. Bills for her efforts in reaching out to our local vendors, noting that all contracts are local companies.

Councilman Mumpower felt strongly that the City needs to do everything they can to hire legal citizens to work on these projects.

Public Works Director Cathy Ball said that we were able to realize approximately $663,000 from the engineer's estimates to what the actual bids came in. One of the projects we had gotten Council approval for was Kimberly Avenue but based on the engineer's estimates we weren't going to be able to afford that. City Council then appropriated $400,000 that we might have to use to be able to fund that project. Since we now have the balance of $663,000, we went back to the NCDOT and asked if we could include Kimberly Avenue and have it fully paid for out of the balance of that amount. They have said to move forward with it; however, the City can't meet the December 31 deadline because it's impossible for the City to bid the project, get the bids in and come to City Council before December 31. She asked for Council's support to request the North Carolina Secretary of Transportation extend the December 31 deadline one month so that we can include Kimberly Avenue in this process. She understands that the State's staff and NCDOT is supportive of that, but it may take some additional action from City Council to

make that happen. She suggested a letter from the Mayor in support of that process be sent to the Secretary.

Vice-Mayor Davis asked for a friendly amendment to instruct staff prepare a letter for Mayor Bellamy's signature to the North Carolina Secretary of Transportation supporting the one-month extension of the December 31 deadline so that the Kimberly Avenue project can be included in this process. Councilman Newman and Councilwoman Cape accepted the friendly amendment.

Ms. Ball updated Councilman Miller regarding the Azalea Road project.

Upon request of Mayor Bellamy, Ms. Ball said that she would provide Council with a listing of the streets that are planned for improvements this year.

When Mayor Bellamy asked for public comments, none were received.

Mayor Bellamy said that members of Council have been previously furnished copies of the resolutions and they would not be read.

Vice-Mayor Davis moved for the adoption of Resolution No. 09-250. This motion was seconded by Councilman Newman and carried on a 6-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 32 – PAGE 284

Councilman Miller moved for the adoption of Resolution No. 09-251. This motion was seconded by Councilman Newman and carried on a 6-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 32 – PAGE 285

Councilman Newman moved for the adoption of Resolution No. 09-252. This motion was seconded by Councilwoman Cape and carried on a 6-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 32 – PAGE 286

Councilman Newman moved for the adoption of Resolution No. 09-253, and to instruct staff prepare a letter for Mayor Bellamy's signature to the North Carolina Secretary of Transportation supporting the one-month extension of the December 31 deadline so that the Kimberly Avenue project can be included in this process. This motion was seconded by Councilwoman Cape and carried on a 6-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 32 – PAGE 287

C. QUARTERLY REPORTS

Public Safety Committee Chair Report

Vice-Mayor Davis, Chair of the City Council Public Safety Committee, provided Council with an update of their activities during the last quarter. He thanked his other Committee members of Mayor Bellamy and Councilman Newman for their hard work on this Committee.

Mayor Bellamy was pleased to present Police Chief Hogan with a plaque from Getting Back to Basics Inc.'s Annual Event she recently attended. Said program originated in the Police Department and is supported also by the Fire Department. That program helps teenagers to stay

on the right track and keep them out of gangs, along with parental involvement. The program thanked the Asheville Police Department for supporting the goals of Getting Back to Basics Inc.

Strategic Operating Plan Update

Assistant City Manager Jeff Richardson reviewed with Council the End of the Year Strategic Operating Plan in the following areas (1) Affordable; (2) Green; (3) Safe; (4) Sustainable; and (5) Fiscal Responsibility.

In the affordable focus area (1) Affordable Housing Fee Rebate Program; (2) Comprehensive Annual Performance Evaluation Report; (3) 2011-2015 Consolidated Strategic Housing and Community Development Plan; and (4) Newly Purchased Land in West Asheville.

In the green focus area (1) Mills River Solar Panel Array; (2) Total Carbon Reduction: 2.5%; (3) Historic Preservation; and (4) Launched a New Pilot Project, City Share.

In the safe area of Pack Square Park (1) North Pack Street re-paved and opened; (2) The circle in front of Pack Place completed; (3) Roger McGuire Green opened to the public; (4) Interactive fountain programmed and running; (5) Veterans' monument completed; and (6) $16,817,830 raised, with $3,685,034 remaining to complete Construction/Pavilion.

Regarding safe, he provided the following chart of Asheville Police Department Drug Charges/Seizures:

	FY 08-09	FY 09-10 (33% Complete)
Dealers Charged	85	38 (45%)
Firearms Seized	121	60 (50%)
Currency Seized	$68,999	$33,569 (49%)
Individuals Charged	717	274 (38%)
Drug Dollar Amount Seized	$295,980	$363,361 (123%)

In the safe area for the Downtown Patrol Unit, (1) Number of business contacts: 2,594; (2) Citations and/or arrests: 829; (3) Special Operations: 169; (4) Hours of foot patrol: 418; (5) Hours of bike patrol: 919; and (6) Hours "Other": 663.

Also in the safe area regarding (1) Nuisance Court (a) Cases: 26; (b) Case Reviews: 9; (c) Guilty Pleas: 13; and (d) Community Service Hours: 290; and (2) Downtown Cleanliness (a) Graffiti Removal Sites: 556; (b) Sidewalk Cleaning: 9.24 miles; and (c) Private Property Graffiti Identified: 142 Locations.

Regarding sustainability, he provided the following chart of the ARRA grant success: For Year End FY 2008-09 the entitlements were $7,597,242; the grant funding applied for to date is $12,800,249; and the grant funding awarded to date is $994,500. For the Quarter 1 Fiscal Year 2009-10, the entitlements are $7,597,242; the grant funding applied for to date is $16,242,152; and the grant funding awarded to date is $1,497,500.

In the sustainable area, (1) Civic Center Roof on Schedule; (2) Shiloh Community Center Project; and (3) Expanded Partnerships with UNC-Asheville. Also in the sustainable area regarding the Downtown Master Plan (1) Action Committee; (2) Urban Design Committee; and (3) UDO Modifications Related to Economic Conditions. In the Development Services area (1) Grand Opening; (2) Completed on Time and Under Budget; (3) Permits & Projects; (4) Cooperation with Asheville Fire Department; and (5) Educational Classes.

In the area of fiscal responsibility (1) Early Retirement Program (a) 27 Staff to Date; (b) $256,755 Annual Cost Savings; and (2) Montford Commons Development Project (Public/Private Partnership Opportunity) (a) Financial Analysis Underway.

Mayor Bellamy commended Director of Administrative Services Lauren Bradley for her leadership in Council's nuisance court initiative and looked forward to working with her in her new leadership position.

Energy Coordinator Maggie Ullman responded to Mayor Bellamy when she questioned if we have a cost analysis of the return on investment for surpassing our annual carbon reduction goal.

At Mayor Bellamy's suggestion of a quarterly report on the City's investments in land purchases and what those purchases have meant to the City, City Manager Jackson said that staff is finalizing the first major annual report and will have measurements for Council to see.

Quarterly Financial Report

Chief Financial Officer Ben Durant provided Council with the following executive summary of the First Quarter of 2009-10 financial information in this report reflects the City's overall financial position for the fiscal year through September 2009.

Amendments. The General Fund budget presented in this first quarter report reflects the adopted budget of $92,688,293; plus $1,097,031 in prior year encumbrances that rolled over from FY 2008-09; along with ten budget amendments approved by Council during the first quarter that totaled $603,538. Two of the budget amendments involved an appropriation from fund balance: 1) $366,812 was appropriated from fund balance as the City match for transportation improvement projects that were partially funded with an ARRA grant; and 2) $60,000 was appropriated from fund balance to expand the number of early voting sites. The other amendments were funded with various grants and donations. He provided council with a complete list of first quarter General Fund budget amendments.

Adopted Budget	92,688,293
Encumbrances	1,097,031
10 Budget Amendments*	603,538
9/30/2009 Budget	$94,388,862

* Fund balance appropriations since July 1 total $426,812

Revenues. Through September 30, 2009, the City has collected $11,336,483 in General Fund revenue, which represents approximately 12.5% of the total General Fund revenue budget. Sales tax collections continued to decline in the fourth quarter of FY 2008-09 and the first quarter of FY 2009-10. As a result, sales tax revenue is expected to come in under budget in the current year by $1,000,000. On a positive note, during the first quarter the City received a $391,000 reimbursement check for expenses associated with the January 2008 demolition of property on Tunnel Road. *Based on current year-end estimates, staff is projecting that FY 2009-10 total General Fund revenue will come in under budget by $659,000.*

Expenditures. General Fund expenditures through September 30, 2009 total $20,793,663 or 22.0% of the budget. *Based on spending in the first quarter and historical trends, staff is currently estimating that the General Fund departmental budgets will be 99.5% committed by the end of the current fiscal year producing a budget savings of $407,000. Staff, however, is estimating that expenditures in the Health Care Fund will exceed revenues by approximately $1.0 million. It is anticipated that health care reserves, which ended FY 2008-09 at approximately $1.13 million, will be used to cover this shortfall.*

Fund Balance. The City ended FY 2008-09 with available fund balance of $16,696,979, which equated to 18.7% of FY 2008-09 expenditures. *Based on current year-end revenue and expenditure estimates for FY 2009-10 staff is projecting that available fund balance will decrease to $14,223,431, which will equate to 15.1% of estimated year-end expenditures.*

He said that Water Resources Director Steve Shoaf provided Council with information noting that in 2007 City Council approved a $40 Million Revenue Bond for water system improvement projects as part of Asheville's commitment to upgrade aging infrastructure, ensure reliable water service, and improve fire protection. In April 2008 the City launched 11 major water improvement projects which status was summarized.

He then provided Council with a brief overview of the Fiscal Year 2009-10 First Quarter Report as follows: (1) Current year budget trends show a $659,000 General Fund revenue shortfall; (2) Available Fund Balance is projected to decline to 15.1%; and (3) The FY 2010-11 preliminary budget forecast includes a significant imbalance between revenues and expenditures.

He then reviewed the current General Fund budget, along with the General Fund budget amendments.

General Fund Revenue highlights include (1) Sales tax revenue is down 12.9% in the 1st quarter - Projected to fall $1.0 million short of budget; (2) State will withhold 2/3 of beer & wines tax revenue - $250,000 revenue loss; and (3) Powell Bill revenue is down 10.4% or $250,000 compared to prior year - Anticipated in the budget.

General Fund Revenue highlights include (1) State utility tax revenue to exceed budget by $200k; (2) $391,000 reimbursement for Tunnel Road property demolition; and (3) Overall, general fund revenues are projected to *fall short of budget by $659,000*.

General Fund expenditures highlights include (1) Early Retirement Incentive Program; (a) Departmental Savings Plans to Recover Payouts; and (b) Budget Office Review; (2) Operating Budgets are Tight; and (3) Anticipate 99.5% of budget will be spent at year end - $400,000 in savings.

He then reviewed the Fiscal Year 2010 current year estimate (Fund Balance). The year-end estimate is 15.1%. Using a chart he explained the ten year Fund Balance trends.

Regarding the Health Care Fund, current trends indicate that expenses will exceed revenues by $1.0 million. Health Care Reserves total $1.13 million.

He then briefly reviewed the Enterprise Funds.

Ordinance No. 3808 – Budget amendment from the current Water Resources Fund budget to fund capital projects as outlined in the Sullivan Act Amendment

Mr. Durant said that this is the consideration of a budget amendment, in the amount of $1,657,481, from the current Water Resources Fund budget to fund capital projects as outlined in the Sullivan Act Amendment.

This report outlines progress on the identification of sources of funding for projects to be funded in FY 2009-10 in response to the June 2009 Sullivan Act Amendment. A process for identifying projects and a ranking system for project selection is presented. FY 2009-10 Water Resources funds have been identified and are ready for transfer into a designated General Fund capital account.

Water Resources staff identified funding to support the expenditure of up to 5% of Water Resources revenue as outlined in the June 2009 Sullivan Act Amendment. It is assumed that Water Resources revenue for this fiscal year will be $33,149,629, and 5% of this amount totals $1,657,481. Staff's approach for the current fiscal year was to identify money already budgeted and not likely to be used in the current year. Staff first looked to existing projects that are completed and have some amount of funding remaining. Staff also tapped funding from some existing projects that may need to be restored in subsequent years. Seven (7) capital projects have funds that could be transferred to meet the Sullivan Act Amendment requirement. These projects are:

WC0005	$ 90,890	Interest Accumulation Account
WC0501	$689,103	NCDOT Brevard Rd. Improvements
WC0703	$ 50,000	Distribution System Improvements
WC0704	$ 50,000	Master Plan Development
WC0804	$ 75,000	24" & 36" Line Replacement Study
WC0805	$500,000	River Flow meters
WC0908	$ 2,485	Parker Ave. service lines
Total from capital:	$1,457,478	

One operations account will also be used to meet the Sullivan Act Amendment requirement. It is the Meter Services Capital Outlay / Other – Improvements account.

330-5005-409-7003	$200,003	Meter purchases, etc.

To implement the enhancement of water system projects with street and sidewalk improvements, there will be a five (5) year project plan that:

1. Looks at Water Resources projects planned for the 5-year period;
2. Investigates opportunities to enhance these projects with needed associated street and sidewalk improvements;
3. Applies a ranking system that is used to assign priorities to the enhancement portion of these projects for funding via the Sullivan Act Amendment; and
4. Develops a timeline and cost estimates for projects that are likely to be implemented.

The Water Resources and Public Works Departments will collaborate to develop the 5-year project plan and present the plan to City Council for consideration as part of the FY 2010 2nd Quarter Report.

Regarding the Strategic Operating Plan, this initiative enhances the City's efforts to operate the City of Asheville's organization to the highest fiscal responsibility. Through planning and combining resources, the intended outcome will be better project conception and implementation aimed at meeting community needs.

Pros:

- Better infrastructure that meets community needs.
- Coordinated project activity that minimizes construction-related disruption and produces enhanced results.

Cons:

- The Sullivan Act Amendment will use Water Resources funds for non-water capital projects.
- Some projects may have an extended timeline to finish all phases due to a larger scope.

This change in operation will transfer approximately 5% of Water Resources revenue to the General Fund for capital projects each year. Over a five-year planning period, this represents over $7.5 million transferred from Water Resources to the General Fund.

City staff recommends City Council adopt the budget amendment approving the transfer of funds for Fiscal Year 2009 -10, and approve the concept of a five-year project planning process.

There was a brief discussion, initiated by Councilman Mumpower, regarding the process which brought the Council to this point of being allowed to transfer 5% of Water Resources revenue for eligible capital projects.

At Mayor Bellamy's request, Councilman Russell, as Chair of the Finance Committee, said that they will be providing an update on how much the City has invested in the water system thus far.

Throughout discussion, Mr. Durant answered various questions/comments from Council, some being, but are not limited to: clarification of the year-end Fund Balance; request to show the actual revenue sources that support each budget amendment; do we have any innovative programs, similar to the Asheville Project, to reduce our health care costs and request for Council to receive quarterly updates on this process; how is the projection of the $1 Million shortfall of sales tax revenue computed; how much interest does Fund Balance earn; what is the City's annual cost for health care; suggestion to possibly partner with the Metropolitan Sewerage District in their 5-year Capital Improvement Plan to see if there is some overlapping of projects for potential cost savings; due to the possibly delay any major purchases, is it feasible to delay the contract for installation of the new irrigation system at the Golf Course; is the City's data in line with the Chamber of Commerce information regarding room occupancies; concern of Council living within their means and not reaching into Fund Balance; clarification that the sales tax numbers are for July and August only; request for a graph showing the full picture of capital improvements made over the year as Council has addressed capital needs that have went unaddressed for years; what is the City's Fund Balance percentage vs. the State's suggested percentage; City should not have a large Fund Balance with capital improvements that need attention; and if the City dips to a 13-14% Fund Balance, does it affect our bond rating.

Budget Director Tony McDowell reviewed with Council the preliminary Fiscal Year 2010-11 budget forecast.

The General Fund revenue outlook is (1) Economy will continue to impact revenue growth in FY 2010-11; (2) Property & sales taxes make up 70% of budget; (3) Overall, revenues are projected to be flat; and (4) No fund balance will be appropriated.

The General Fund expenditure outlook is (1) Continued increases in health care costs; (2) Decrease in federal funding for Transit; (3) Slight increase in operating costs; (4) Allocation for employee raises; and (5) No growth in capital expenditures.

He then reviewed with Council the budget outlook of the General Fund Gap.

He provided Council with some budget balancing strategies for moving forward as (1) The $5.1 million budget gap reflects a structural imbalance between revenues and expenditures; (2) Departments will prepare 4% and 8% budget reduction packages for submittal in late January; and (3) Staff will provide a detailed white paper analysis of the City's financial position prior to the January Council retreat.

Budget Director Tony McDowell reviewed with Council the preliminary Fiscal Year 2010-11 budget forecast.

The General Fund revenue outlook is (1) Economy will continue to impact revenue growth in FY 2010-11; (2) Property & sales taxes make up 70% of budget; (3) Overall, revenues are projected to be flat; and (4) No fund balance will be appropriated.

The General Fund expenditure outlook is (1) Continued increases in health care costs; (2) Decrease in federal funding for Transit; (3) Slight increase in operating costs; (4) Allocation for employee raises; and (5) No growth in capital expenditures.

He then reviewed with Council the budget outlook of the General Fund gap of about $5.1 Million.

He provided Council with some budget balancing strategies for moving forward as (1) The $5.1 million budget gap reflects a structural imbalance between revenues and expenditures; (2) Departments will prepare 4% and 8% budget reduction packages for submittal in late January; and (3) Staff will provide a detailed white paper analysis of the City's financial position prior to the January Council retreat.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Newman moved for the adoption of Ordinance No. 3808. This motion was seconded by Vice-Mayor Davis and carried on a 6-1 vote, with Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 25 - PAGE 491

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER THE MASTER PLAN AND REZONING FOR THE PROJECT IDENTIFIED AS HORIZONS, LOCATED AT 136, 176 AND 180 MERRIMON AVENUE AND 17 AND 23 ELOISE STREET FROM HIGHWAY BUSINESS DISTRICT, COMMUNITY BUSINESS I DISTRICT AND RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO URBAN VILLAGE DISTRICT FOR A MIXED USE DEVELOPMENT

Mayor Bellamy said that this public hearing was continued from January 15, 2008, at the applicant's request in order to work with the neighborhood, especially since a valid protest petition was submitted, which remains in effect. Then again on July 15, 2008, the public hearing was continued to October 28, 2008, at the applicant's request in that it became necessary, due to the recent economic conditions, the ownership group is currently exhausting opportunities and trying to secure financing and/or additional partners to help with the project economics. On October 28, 2008, at the applicant's request, this motion was continued to October 27, 2009.

Mayor Bellamy said that on September 1, 2009, Mr. Chris Peterson requested this matter be removed from City Council consideration.

On October 23, 2009, the following letter was received from Mr. Marty Kocot, PE, from LandDesign Inc.: "The ownership group (Mr. Foster Shriner, Mr. Chris Peterson and Mr. Cam Pace) of the proposed "Horizons" Urban Village project have asked me to formally request an additional twelve (12) month extension on the Urban Village Rezoning currently in progress. We realize this request to extend this project again is a bit unusual but the economic conditions we are all experiencing are bit unusual as well. It is and has always been the desire of the partnership group to create a wonderful project on the Merrimon Avenue site as a gateway point to the City and an extension of time on the Urban Village Rezoning request for this project gives us the best chance to succeed. To date thousands of dollars have been spent crafting and guiding the project through TRC and P&Z only to have the economy delay us from obtaining the

needed financing. We are hopeful that this additional time will allow the economic market to improve and the project to move forward for consideration by City Council. This project has the ability to create local jobs and help with the economic recovery."

On October 27, 2009, a motion was made to continue the matter for two weeks until November 10, 2009. On November 10, 2009, the matter was continued again until November 24, 2009.

From Staff Report by Urban Planner Julia Cogburn: "This is the consideration of a property request for an additional twelve (12) month continuance of the public hearing on the rezoning petition for the Horizons Urban Village Project.

"In November of 2007, the Asheville Planning and Zoning Commission reviewed a rezoning petition for the Horizons Urban Village project located on an 8.54 acre site on Merrimon Avenue. The Commission voted to recommend the rezoning (7-0) and the conceptual site plan (5-2) presented by the developers/property owners of the project, and the matter was scheduled to be heard by Asheville City Council in January of 2008. At that time, the developers requested a six (6) month continuance in order to review the site design particularly as it related to the height of some of the buildings. Building height was a major issue for the adjoining neighbors of this project. In June of 2008, the property owners requested an additional three (3) month continuance primarily due to economic conditions. In October of 2008, the property owners requested and obtained an additional twelve (12) month continuance from the Asheville City Council. The property owners are now requesting an additional twelve (12) month continuance due to the continuing economic slowdown.

"The major concern with granting an additional continuance is the effect it may potentially have on the valid protest petition submitted with respect to this project. The owners of sixteen (16) properties within one hundred (100) feet of the development parcel signed a petition. This petition was deemed to be a valid protest petition in accordance with NCGS § 160A-385 as the signatories properties totaled 21.9% of the property within one hundred (100) feet of the development parcel. Twenty (20%) percent is required for a valid protest petition. NCGS § 160A-386 states that the petition must be submitted at least two (2) normal working days before the date established for the public hearing (which was done) and must meet the qualifying standards for a protest petition "at the time of the vote on the zoning amendment." The effect of a protest petition is that it triggers a supermajority voting requirement on a zoning issue. The concern is that if property ownership changes during the time of continuance of this project, that the petition becomes invalid without an opportunity to resubmit another petition.

"Options for Council include:

1. Grant the continuance. The project would be considered by Council on November 23, 2010. The protest petition may or may not be valid depending upon property ownership at that time.
2. Do not grant the continuance. The developer would have to resubmit the project at the time that they were prepared to move forward with the development.
3. Postpone the hearing indefinitely. Reschedule the public hearing when the developer is ready to move forward with the project. Staff would recommend, if this option is chosen, that the request for a public hearing must be made by a date certain.

Pro:

- Allows the property owners additional time to work on the details of an urban village project for this property.

Cons:

- Gives extensive continuation to a project that was first submitted to the City of Asheville in June of 2007.

- May create additional confusion/effort for those who previously submitted a protest petition on this project.

"City staff recommends City Council adopt one of the following three options: (1) Grant the continuance. The project would be considered by Council on November 23, 2010. The protest petition may or may not be valid depending upon property ownership at that time; (2) Do not grant the continuance. The developer would have to resubmit the project at the time that they were prepared to move forward with the development; or (3) Postpone the hearing indefinitely. Reschedule the public hearing when the developer is ready to move forward with the project. Staff would recommend, if this option is chosen, that the request for a public hearing must be made by a date certain."

Councilman Mumpower moved to allow Council to discuss the options presented. This motion was seconded by Vice-Mayor Davis and carried unanimously.

City Attorney Oast briefly outlined the three options available for Council as outlined above. If the option to postpone the hearing indefinitely and reschedule the public hearing when the developer is ready to move forward with the project is Council's choice, then the current protest petition may remain valid although there is not a lot of guidance in the statutes on this. It may extend the date or establish a new date for filing a new protest petition or correcting any deficiencies in the old protest petition because a new date would be established for the public hearing. Mr. Chris Peterson, property owner, inquired about the Permit Extension Act of 2009, but since this is a zoning approval that is pending and has not been acted on, that law would not apply.

Councilwoman Cape moved to postpone the hearing indefinitely and reschedule the public hearing when the developer is ready to move forward with the project, with the stipulation that this matter will be discussed again on November 23, 2010, if no public hearing is requested prior to that date. This motion was seconded by Councilman Mumpower and carried unanimously.

Closed Session

At 7:27 p.m., Mayor Bellamy announced a short recess, at which time City Council would conduct a closed session.

At 7:27 p.m., Councilman Miller moved to go into closed session for the following reasons: (1) To establish or to instruct the City's staff or negotiating agents concerning the position to be taken by or on behalf of the City in negotiating the terms of contracts for the acquisition of real property by purchase, option, exchange or lease. The location of the property is approximately 11 acres at Shelburne Road and Hominy Creek Road, and 615 Swannanoa River Road. The statutory authorization is contained in G.S. 143-318.11(a)(5); (2) To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including potential litigation. The statutory authorization is contained in G.S. 143-318.11(a)(3); and (3) To prevent disclosure of information that is privileged and confidential, pursuant to the laws of North Carolina, or not considered a public record within the meaning of Chapter 132 of the General Statutes. The law that makes the information privileged and confidential is N.C.G.S. 143-318.10(e). The statutory authorization is contained in N.C.G.S. 143-318.11(a)(1). This motion was seconded by Councilman Newman and carried unanimously.

At 7:52 p.m., Councilman Miller moved to come out of closed session. This motion was seconded by Councilman Russell and carried unanimously.

A. PUBLIC HEARING TO CONSIDER FLOODPLAIN ORDINANCE TEXT CHANGES AND NEW FLOODPLAIN MAPS

ORDINANCE NO. 3809 - ORDINANCE AMENDING CHAPTER 7 OF THE CODE OF ORDINANCES REGARDING ENVIRONMENTAL PROTECTION STANDARDS FOR FLOOD PROTECTION

ORDINANCE NO. 3810 - ORDINANCE AMENDING CHAPTER 7 OF THE CODE OF ORDINANCES REGARDING FLOOD PROTECTION DEFINITIONS

ORDINANCE NO. 3811 - ORDINANCE AMENDING CHAPTER 7 OF THE CODE OF ORDINANCES REGARDING DEVELOPMENT REVIEW PROCEDURES

ORDINANCE NO. 3812 - ORDINANCE AMENDING CHAPTER 7 OF THE CODE OF ORDINANCES REGARDING VIOLATIONS, PENALTIES AND ENFORCEMENT PROVISIONS

Mayor Bellamy opened the public hearing at 7:58 p.m.

Stormwater Services Manager McCray Coates said that this is the consideration of adopting the following four Unified Development Ordinances, which include the Flood Insurance Rate Maps (FIRM) and the Flood Insurance Study (FIS) report, as follows: (1) Environmental Protection Standards for Flood Protection Article XII, Section 7-12-1; (2) Flood Protection Definition Section 7-2-5; (3) Development Review Procedures, Section 7-5-12; (4) Violations, Penalties and Enforcement Provisions Section 7-18-2.

He said that the purpose of this report is to provide the Planning and Zoning Commission with information related to the proposed Flood Damage Prevention Ordinance and to ask the Planning and Zoning Commission to approve the proposed Ordinance in order for staff to present the Ordinance to the City Council.

The Federal Emergency Management Agency (FEMA) in consultation with the State of North Carolina, have issued new Flood Insurance Rate Maps (FIRM) applicable to the City of Asheville. The City of Asheville is required to adopt the new maps and amendments to its floodplain regulations consistent with the Flood Insurance Study (FIS) to maintain membership in the National Flood Insurance Program (NFIP). The NFIP provides federally backed flood insurance to property owners in the City of Asheville jurisdiction located in flood prone areas. The new FIRMs, have, in some cases, modified the location of the floodway, 100-year floodplain, and 500-year floodplain boundaries in the City of Asheville. The new locations of the floodway may limit how affected property owners may use their properties. The proposed amendments to the text of the floodplain regulations are consistent with the Flood Damage Prevention Model Ordinance prepared by the State of North Carolina, taking into consideration the revised FIS and the revised FIRMS.

In order for the City to be in compliance with the requirement necessary to remain a member of the National Flood Insurance Program (NFIP) provided by FEMA, the City must adopt a revised Flood Damage Prevention Ordinance that is in compliance with the North Carolina Division of Emergency Management Model Flood Damage Prevention Ordinance. The model ordinance was created to satisfy all current State and Federal minimum requirements for participation in the National Flood Insurance Program with regard to the adoption of required floodplain management regulations. The North Carolina model ordinances have been reorganized, simplified and expanded over the years to clarify older ordinance language.

The Special Flood Hazard Areas are those identified under the Cooperating Technical State (CTS) agreement between the State of North Carolina and FEMA in its Flood Insurance Study (FIS) and its accompanying Flood Insurance Rate Maps (FIRM), for Buncombe County dated January 6, 2010 and is adopted by the approval of the Flood Damage Prevention Ordinance

The Flood Damage Prevention Ordinance must be adopted prior to January 6, 2010, which is the effective date as established by FEMA, or the City could be removed from the NFIP program.

A Flood Ordinance Project Oversight Group has been formed to assist the staff in evaluating and making recommendations to the Planning and Zoning Commission and to City Council on the revised Flood Damage Prevention Ordinance. This group, in a limited capacity, assisted staff in the development of the proposed Ordinance. The members of the committee include John Broadbrooks, Barber Melton, Karl Koon, Karen Cragnolin, Paul Szurek and Bob Smith.

City staff has held one recent public meeting to discuss the Flood Damage Prevention Ordinance and the revised Flood Insurance Rate Maps (FIRM) with the public. Previous public meetings were held in 2008 prior to the State finalizing the FIRMs which provided the opportunity for public input related to the FIRMs.

Pros and Cons:

- The City will satisfy all current State and Federal minimum requirements for participation in the National Flood Insurance Program with regard to the adoption of required floodplain management regulations.
- The Flood Damage Prevention Ordinance follows the State model ordinance which is recommended by the NC Floodplain Mapping Program to be the best way to obtain FEMA approval.
- The Flood Damage Prevention Ordinance follows closely with other jurisdictions within Buncombe County and western North Carolina as it relates to floodplain regulations.
- The regulatory flood elevation (freeboard above the base flood elevation) is set at 2 feet for both commercial and residential. Currently it is 2 feet for residential and 1 foot for commercial.

Mr. Coates noted that the Planning and Zoning Commission, at their November 19, 2009, mid-month meeting unanimously adopted the ordinances with an amendment to the non-conforming section in Section 7-12-1 as follows: "A nonconforming use shall be deemed discontinued after a period of more than 2 years ..." to be consistent with the UDO. The original draft was 365 consecutive days.

Mr. Coates explained that through the Cooperating Technical State (CTS) agreement between the State of North Carolina and FEMA, updated FIS and FIRM applicable to the City of Asheville have been released.

City staff recommends City Council adopt the following four Unified Development Ordinances, which include the Flood Insurance Rate Maps (FIRM) and the Flood Insurance Study (FIS) report, as follows: (1) Environmental Protection Standards for Flood Protection Article XII, Section 7-12-1; (2) Flood Protection Definition Section 7-2-5; (3) Development Review Procedures, Section 7-5-12; (4) Violations, Penalties and Enforcement Provisions Section 7-18-2.

Mr. Coates explained the following Flood Ordinance modifications of the FIRM maps: (1) Three public participation meetings for new FIRM maps held on December 11, 12, and 13 of 2007; (a) December 11, Black Mountain Town Hall. Approximately 70 persons attended a presentation by the state with open question and answer with state, engineers contracted to complete the maps, and local government staff; (b) December 12, AB Tech Enka Campus. Approximately 25 persons attended; and (3) Dec 13, Asheville Public Works Building. Approximately 35 persons attended; (2) Advertising included the County and City websites; contacted fire chiefs to post; Buncombe County TV aired information; press releases sent to Mountain Xpress, Asheville Citizen Times, Urban News, WLOS, Asheville Daily Planet, WNCW, and Asheville Tribune; and (3) This resulted in several articles (a) Clarke Morrison December 13

Citizen Times article on meetings, and 90-day appeal/protest period; (b) Brian Bartlett December 11 Citizen Times entitled "Learn How New Flood Maps May Affect Your Property"; (c) December 9 the Citizen Times article entitled, "Determine Your Level of Flood Risk" which advertised each of the 3 meetings; (d) December 5 Citizen Times article entitled, "Flood Maps to be Displayed" which advertised each of the three meetings; (e) Dec. 5 Mountain Xpress article entitled, "Waterlogged: New Maps Predict Bigger Floods for Swannanoa Valley"; and (f) The three meetings were advertised in this article.

Regarding the FIRM Maps, (1) The new FIRMS have, in some cases, modified the location of the floodway, the 100-year floodplain, and the 500-year floodplain boundaries in the City of Asheville; and (2) Amendments to the Flood Ordinance text reflect required regulation changes associated with the new FIRMs, and required changes made to the N.C. Division of Emergency Management Model Flood Damage Prevention Ordinance.

With regard to the NFIP Program, (1) The National Flood Insurance Program (NFIP) provides federally backed flood insurance to property owners in the City of Asheville jurisdiction located in flood prone areas; (2) The City of Asheville is required to adopt the new maps and amendments to its floodplain regulations consistent with the FIS to maintain membership in the NFIP; and (3) The updated Flood Damage Prevention Ordinance must be adopted prior to January 6, 2010, which is the effective date as established by FEMA, or the City could be removed from the NFIP program.

He said that a municipal flood ordinance group was formed to discuss the flood regulations in Buncombe County, including representatives from the City of Asheville, Buncombe County, Black Mountain, and Montreat. Recommendations from the Group determined it was best to utilize the Model Flood Ordinance created by the NC Floodplain Mapping Program (NCFMP) as the base document to ensure State and FEMA approval. Recommendations from the Group determined it was best for the area to have similar flood damage protection requirements.

Also, the Flood Ordinance Project Oversight Group was formed to assist the staff in evaluating and making recommendations to the Planning and Zoning Commission and to City Council on the revised Flood Protection Ordinance. This group, in a limited capacity, assisted staff in the development of the proposed Ordinance. The members of the committee include John Broadbrooks, Barber Melton, Karl Koon, Karen Cragnolin, Paul Szurek and Bob Smith. This Group will continue to meet to discuss floodplain related regulations and guidelines.

Mr. J. P. Johns, PE, Principal with McGill Associates, said that the following sections of the Code of Ordinances will need to be amended: (1) Article II, Section 7-2-5, Definitions; (2) Article V, Section 7-5-12, Floodplain Development; (3) Article XII, Section 7-12-1, Flood Protection; and (4) Article XVIII, Section 7-18-2, Penalties and Violations.

He then explained in detail some of the following major changes: (1) Some definitions related to flood ordinance terminology have been added or modified as required by FEMA; (2) The regulatory flood elevation (freeboard above the base flood elevation) is set at 2 feet for both commercial and residential. Currently it is 2 feet for residential and 1 foot for commercial; (3) No new habitable structures or substantial improvements to habitable structures shall be permitted in floodways and non-encroachment areas, except this subsection requirement shall not be applicable to structures that have substantial damage; and (4) No encroachments, including fill, new construction, substantial improvements, and other developments shall be permitted in the floodway unless: (a) It is demonstrated that the proposed encroachment will not increase the base flood elevations during the occurrence of the base flood, based on hydrologic and hydraulic analyses performed by a registered professional engineer in accordance with standard engineering practice and presented to the Floodplain Administrator prior to issuance of floodplain development permit, or (b) A Conditional Letter of Map Revision (CLOMR) has been approved by FEMA. A Letter of Map Revision (LOMR) must also be obtained upon completion of the

proposed encroachment. Utilities in the floodway now must provide a No-Rise impact analysis (not required in the current ordinance). This is required by FEMA.

Mr. Johns then outlined the following processes: (1) Public Meeting held on November 17, 2009; (2) Approved by NC Floodplain Mapping/FEMA on November 19, 2009; and (3) Asheville Planning and Zoning Commission on November 19, 2009, unanimously approved the ordinances with one exception as it related to discontinued uses in the nonconforming section of 7-12-1. Originally proposed 365 days was modified to 2 years to be consistent with the UDO.

Council action is requested to conduct the public hearing and then act upon the recommended modifications to the ordinances.

When Mayor Bellamy asked for public comment, no one spoke.

Mayor Bellamy closed the public hearing at 8:09 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilwoman Cape moved for the adoption of Ordinance No. 3809. This motion was seconded by Councilman Mumpower and carried unanimously.

V. UNFINISHED BUSINESS:

A. UPDATE ON ANNEXATION AGREEMENT DISCUSSION WITH THE TOWN OF WOODFIN

Mayor Bellamy provided Council with the two Town of Woodfin's counter-proposal maps (received one day earlier in the afternoon) regarding (1) the Erwin Hills/Lees Creek area (noting the delineating line of New Leicester Highway); and (2) the line regarding Elk Mountain Scenic Highway to the Blue Ridge Parkway. As this was the last meeting of the current Council, she felt it was appropriate to let the entire body know of Woodfin's counter-proposals.

City Attorney Oast provided Council with three detailed maps of the Erwin Hills/Lees Creek area; UNC-Asheville area; and the Merrimon Avenue/Weaverville Road area.

In response to Councilman Newman, it was City Attorney Oast's understanding that there is no disagreement with the Town of Woodfin on the two boundary adjustment areas (that would

not be part of the annexation agreement) of (1) the Reynolds Mountain boundary adjustment area, subject to the N.C. Dept. of Transportation's approval; and (2) the UNC-Asheville boundary adjustment area.

Councilman Newman moved to (1) endorse the proposal submitted by the Town of Woodfin as to Elk Mountain Scenic Highway; (2) reaffirm the City's position as to the Reynolds Mountain boundary adjustment area, subject to the N.C. Dept. of Transportation's approval; (3) reaffirm the City's position as to the UNC-Asheville boundary adjustment area; and (4) reaffirm the City's position regarding the Leicester/Erwin Hills area (3.54 miles in the City's extraterritorial jurisdiction area be in Asheville) along with the City's commitment not to annex into Leicester Township for three years contingent upon the same commitment by the Town of Woodfin. This motion was seconded by Vice-Mayor Davis.

In response to Councilman Mumpower, Mayor Bellamy said that the City put a proposal forward to the property owner of the Sherwood Heights area; however, the property owner chose to continue with his voluntary annexation request into the Town of Woodfin, which Woodfin recently annexed.

Councilman Mumpower felt that all meets with the Town of Woodfin should be held in an open forum and property owners in the affected areas should be allowed to have input into that process.

Ms. Betty Jackson urged Council to be sensitive to the people who live in the area that the City of Asheville and the Town of Woodfin are talking about annexing. She asked for transparency in all discussions.

Mr. James Sheeler urged for the City to stage a forum where people can express their feelings on annexation, noting that there is no transparency is the process.

Ms. Carolyn Williamson also asked for transparency in the annexation process, noting that it is expensive for people in the affected area to fight the process.

Vice-Mayor Davis said that Asheville does not have an interest in extending the current City limits to the area Woodfin tried to annex. We have been in dialogue with Woodfin regarding future growth.

Councilman Newman stressed that Asheville believes it's a good idea that as cities grow, through whatever means, there will be areas that make sense to annex. The City is simply trying to come up with a general agreement of the City's boundaries as they will not be the same in 30 years as they area now. It makes sense for both bodies to come up with a shared vision.

Councilman Mumpower noted that there are no planned annexations by the City of Asheville.

City Attorney Oast said that prior to an annexation a public hearing is required to be published, but individualized notices are not required.

At the request of Mayor Bellamy, it was the consensus of Council for City staff to contact people in the area affected by the agreement if the agreement goes forward.

The motion made by Councilman Newman and seconded by Vice-Mayor Davis carried unanimously.

B. CONSIDERATION OF RESOLUTION REQUESTING FINAL DECISION AND CONSTRUCTION OF THE I-26 CONNECTOR

Mayor Bellamy said that Mr. Davis Gantt, Chairman of the Buncombe County Board of Commissioners, has requested that the Mayors of the City of Asheville, Town of Black Mountain, Town of Biltmore Forest, Town of Montreat, Town of Weaverville and Town of Woodfin to join in on a resolution requesting final decision and construction of the I-26 Connector. Said resolution is requesting that the N.C. Dept. of Transportation take into consideration all of the information gathered to this point and expedite any additional requirements to enable the construction of the I-26 Connector to begin as soon as possible.

Councilman Newman felt that the completion of the project as quickly as possible is a vital goal, but is not the only goal that we have for the project. Every time Council has adopted a position on this, we have included a request that it be completed as quickly as possible as part of the resolution. His concern is that we not only want to get the project completed quickly, but we want to get it done right. Therefore, he moved to add the following additional language to the resolution: "WHEREAS, we wish to thank the NCDOT for considering the concerns of the community and the design of this important project, especially the concerns of the neighborhoods that will be most directly affected by the project, including west Asheville; and WHEREAS, we also wish to thank the NCDOT for taking into consideration local land use plans as it weights on the decisions about the alternatives including the Unified Development Ordinance, the 2025 Plan, the Wilma Dykeman Riverway Plan and other city plans in previous resolutions from the City Council; and WHEREAS, we also appreciate NCDOT's efforts to continue working with the community to hone the alternatives in order to achieve the best possible design." This motion was seconded by Councilman Russell.

When Mayor Bellamy asked for public comments, none were received.

There was discussion, initiated by Vice-Mayor Davis, about how Asheville could amend the language of this resolution, which has been already adopted and signed by the other municipalities. Mayor Bellamy suggested the resolution be adopted as presented by Chairman Gantt and include a cover letter addressing Councilman Newman's additional language request.

Councilwoman Cape felt Asheville should have the ability to add additional language since the Connector is going through the center of our community. She fully supported the unified resolution, but suggested since this is not time sensitive, she suggested the amended language be re-circulated to the other municipalities and it be re-considered by Council in January.

Mayor Bellamy explained that this request is coming to Asheville at this time due to the fact that the Buncombe County Commissioners scheduled their meeting with City Council during the middle of our election process. She had suggested they postpone meeting with Council until the election was over to review their respective goals. During that time the Commissioners met with all the other municipalities and obtained approval of the resolution. The meeting with the Commissioners will be scheduled in January, 2010.

Councilman Russell suggested that instead of amending the body of the resolution with the three additional Whereas' that the resolution be amended by adding an additional resolved paragraph, as crafted by Councilman Newman.

It was the consensus of Council to delay consideration of this resolution until the joint meeting with the Buncombe County Commissioners in order to advise them of Council's concerns. Mayor Bellamy said that she would contact Chairman Gantt with Councilman Newman's proposed language to see if there is consensus to amend the resolution. Councilman Newman and Councilman Russell withdrew their motion.

C. DISCUSSION OF LIVING WAGE POLICY FOR SERVICE CONTRACTS

American Recovery & Reinvestment Project Manager Brenda Mills said that this is the consideration of a resolution adopting a living wage policy for general service contracts.

The purpose of this staff report is to provide additional analysis on the application of a living wage policy to City of Asheville contracts. At its meeting on October 28, 2008, City Council asked staff to provide information on: (1) options for applying a living wage policy to contracts awarded by the City of Asheville; (2) the estimated fiscal impact to the City of Asheville if a policy were implemented; (3) the administrative costs incurred by the City for monitoring such a policy; (4) the estimated administrative costs to contractors; and (5) additional stakeholder input.

This direction was preceded by three dates on which a living wage policy was considered by City Council. The Asheville-Buncombe Living Wage Campaign first presented the item to City Council at its meeting on March 13, 2007. On May 22, 2007, City Council established a living wage for full- and part-city employees at $10.86 per hour for employees without health insurance and $9.50 per hour for employees with health insurance. City Council then directed staff to conduct additional analysis on the financial impact of a living wage policy for City contracts at its meeting on October 28, 2008. This report addresses the City Council direction received at that meeting.

(1) Options for applying a living wage policy to city contracts

State purchasing law is complex given that the law prescribes bidding and award procedures for certain types of contracts that meet specific dollar thresholds. Staff has conducted research and consulted with the North Carolina School of Government to determine what kinds of contracts are best suited for consideration of a living wage policy. A summary of those conclusions are presented in the table below.

Type(s) of contract	Advisable for living wage policy?	Why or Why not?
• Construction or repair work $500,000+ • Purchase of apparatus, supplies, materials, or equipment $90,000+	No	State law requires formal, competitive bid procedures and that the contract is awarded to the "lowest responsible bidder taking into consideration quality, performance and time specified...". Application of policy may be in violation of the law.
• Construction or repair work $30,000-500,000 • Purchase of apparatus, supplies, materials, or equipment $30,000-90,000	No	State law requires informal bidding and contracting procedures and that the contract is awarded to the "lowest responsible bidder taking into consideration quality, performance and time specified...". Application of a living wage policy may be in violation of the law.
• Construction contracts for building projects $300,000+	No	State statutes the manner in which these projects are specified, bid and awarded. Application of a living wage policy may be in violation of the law.
• Professional services including architectural, engineering and surveying services	No	State law prescribes special requirements for the procurement of these services and stipulates that an award must be based on qualifications. Application of a living wage policy may be in violation of the law.

• General service contracts of any amount	Yes, with considerations	State law prescribes no procurement or bidding procedures for most general service contracts. General service contracts $25,000+ are covered by the City of Asheville's contract policy, which states that three informal quotes should be obtained and that the contract be awarded to the lowest responsive bidder. Application of a living wage policy may be in violation of the city's contract policy. The policy would have to be amended to accommodate provisions of a living wage policy. In addition, the volume of contracts in this category may be administratively difficult to manage if a living wage policy were applied. Outside agency contracts would fall within this category.
• Any contracts under $30,000 except for professional services including architectural, engineering and surveying services	Yes, with considerations	A city may use any procedure it deems appropriate for any contract under $30,000, with the exception of professional service contracts that must be awarded based on qualifications. Contracts under $30,000 are covered by the city's contract policy, which states that at least two price quotes should be obtained before awarding a contract. The volume of contracts in this category may be administratively difficult to manage if a living wage policy were applied. Omitting contracts for the purchase of goods from the policy would alleviate some of the volume while having a limited impact on the goals of a living wage policy because most goods and supplies are produced outside the local area. Outside agency contracts would fall within this category.

Given this analysis and taking into consideration the legal and administrative factors associated with implementing a living wage policy, staff would recommend a defined scope of contracts for City Council when consideration of this policy. This scope would include general service contracts between $5,000-30,000.

(2) Fiscal impact to the City of Asheville's contracting costs

In order to ensure bidding practices are fair and that contract awards are not determined on the ability of the contractor to pay a living wage to employees, it is the best practice for governmental entities to bear the cost of requiring a living wage as part of the contract.

Unfortunately, the ability to estimate the financial impact a living wage policy would have on general service contracts is limited by data management capabilities with the City's current financial management software (HTE), the lack of hourly wage information in current service contracts, and the reluctance of private business owners to share what they consider to be proprietary or sensitive information.

As an alternative, staff has analyzed samples of general service contracts in an effort to present a snapshot of what the financial impact might be. Information compiled by staff shows:

- Among all registered vendors with the city, general service contractors make up the largest number (see Chart 1), and so a living wage policy in this category has the potential to impact the most vendors.
- At the same time, most vendors in this category provide general services like appraisers, information technology vendors, electrical contractors, demolition services, vehicle repair and environmental services. These service areas typically pay at or above living wage levels, as shown by a sampling of current general services contracts (see Chart 2). Service providers who may not meet living wage requirements include custodial and landscaping services. These contracts may have a cost increase if a living wage is required (see Chart 3 for vendor estimates on contract increases).

Chart 1. Breakdown of Vendors registered with the City of Asheville

Type of Vendor	Number Per Category	Percentage of Total
Service	780	19.4%
Professional	54	1.3%
Procurement	529	13.2%
Construction	60	1.5%
Government Agencies	95	2.4%
Non-Profits	244	6.1%
Employees	456	11.4%
Citizens / Individuals	1794	44.7%
Total Vendors	**4012**	

Chart 2. Sampling of city contracts comparing current wages to living wage standards

Contract Type	Current Contract Price or Hourly Wage	Cost difference to adding a Living Wage
Concrete Cleaning	$12.00 to $15.00 / hour	None
Door Controls & Repair	$17.50 / hour	None
Janitorial Contract	**$7.00 to $9.00 / hour**	**$2.35 to $4.35 / hour**
Landscape & Mowing	**$9.00 to $10.00 / hour**	**$1.35 to $2.35 / hour**
Legal Services	$200 / hour	None
Mail Management	$10.00 and up an hour	None
Painting	$12.00 / hour	None
Surveying service	$50.00 to $120.00 an hour	None
Utilities Contractor	$12.00 and up / hour	None
Vault Services	$16.00 and up an hour	None
Waste Management	$12.00 and up an hour	None

Chart. 3. Sampling of city service contracts with current wages comparing with living wage rate of $11.35

Contract Type	Current Hourly Wage	Current Annual Contract Price	Cost differential if Living Wage is incorporated (estimated by vendor)	Benefits Provided
Custodial	$8.00 Janitorial (7) $10.00 Lead Worker $15.00 Supervisory staff (1)	$86,400.00	**+ $17,108.80**	Sick and Annual
Mowing Contract #1	Equip Operator $12 Supervisor $14	$33,012.00	None	One week paid vacation only
Mowing Contract #2	Five Seasonal FT Employees	$60,655.00	**+ $9,648.00**	No employer benefits

(3) Administrative costs for monitoring a living wage policy

If a living wage policy were implemented for general service contracts $5,000-$30,000, staff would recommend budgeting funds for the City to contract for auditing services during the first year of implementation. The auditor would be charged with reviewing certified payrolls provided by vendors for a sample percentage of all contracts. Staff estimates the costs for these services to be $10,000-15,000, although they may be more or less depending on the number of contracts executed during the year.

(4) Administrative costs for contractors

Currently, it is the best practice for governments to absorb incremental costs associated with a living wage policy so there is not a financial impact to the vendors doing business with the government entity. These costs would be built into the contracted fees that get passed along to the City of Asheville. According to the Asheville-Buncombe Living Wage Campaign, as of February 2009, the current living wage rates are $11.35 per hour for employees with no employer provided health benefit and $9.85 per hour for employees with employer paid health benefit. These recommended wage rates have increased since Council approved a living wage for city employees.

(5) Additional stakeholder input

There was collaboration with the Chamber of Commerce to conduct a survey to gauge business owners' thoughts on the living wage. This survey was sent to Chamber members and minority business owners in February 2009. The survey was also sent to stakeholder groups such as the Asheville-Buncombe Living Wage Campaign and the Council of Independent Business Owners (CIBO) to provide to their members.

Policy considerations:

Given the limited availability of data to estimate costs associated with implementing a living wage policy, staff would offer the following options for City Council consideration:

Option 1 – Gather additional contract data January-June 2010 for further evaluation

Without more specific data about how a living wage would affect the cost of general service contracts, staff could begin requiring contractors to provide two sets of cost proposals during the next six months, one for a standard bid and one that would include the incremental costs necessary to cover a living wage requirement. Staff could use the data provided over this timeframe to more accurately estimate the costs associated with a living wage policy.

Option 2 – Implement a living wage policy for general service contracts $5,000-30,000

This option would allow the City to apply a living wage policy to a limited number of contracts, allowing staff to assess the overall financial and operational impacts prior to broader policy application. Under this option, staff would recommend applying living wage provisions to general service contracts between $5,000 and $30,000 for a one year period beginning July 1, 2010. A program design and budget would be developed by staff for inclusion in the FY 2010-2011 budget.

Pro:

- Further progress in achieving living wage policy objectives.

Cons:

- Potential loss of vendors.
- Potential increase in service contracting and administrative expenses.

If accountability is required with implementation, audit services estimated at $10,000-15,000 would be required. Staff is unable to quantify the impact of such programs on contracting costs at this time.

Staff recommends City Council receive this information and provide direction on the next steps in consideration of a living wage policy for the City of Asheville.

Councilwoman Cape suggested delay on this matter for clarification on any legal factors associated with implementing a living wage policy. She questioned why the City would have to bear the cost of requiring a living wage as part of the contract, since the City would be contracting with the low bid and that could be a requirement.

Councilman Newman agreed with Councilwoman Cape and felt the City should require the contractor to pay a living wage.

In response to Councilman Newman and after Ms. Mills explained that the City of Durham and Durham County have living wage policies which they apply to general service contracting, Councilman Newman asked for a broader sampling of other communities.

Councilman Mumpower explained why he did not support this concept. He believed in the concept of people making a decent living; but not this way. He felt we are manipulating the system for a few people and creating, what he believed, a dishonest system. He felt we need to keep fighting the illegal immigration pool that is affecting wages.

Councilman Miller moved to direct staff to gather additional contract data from January-June 2010 for further evaluation and report back to Council. This motion was seconded by Councilman Newman.

Councilman Miller felt there may be some unintended consequences of implementing a living wage policy and would be interested in seeing that impact.

Vice-Mayor Davis, small business owner who does pay a living wage, has spoken to other small business owners who could not afford to bid on projects if they are required to pay a living wage. Contracts from $5,000-30,000 will affect a lot of small businesses. He felt it was the wrong time to start this policy that may affect existing jobs because due to our economy some businesses are barely surviving now. He would be interested in seeing additional data; however, couldn't support staff spending a lot of time on the details at this time.

Councilman Newman withdrew his second in that he felt additional information was needed; however, this is a bigger public policy issue and felt the new Council should decide on whether this will be a priority.

Councilman Mumpower then seconded Councilman Miller's motion.

Ms. Sarah Osmer, Director of Just Economics, let Council know that there is a lot of research available on what other cities have done in implementing a similar policy and they have found that the budgetary cost to contractors is less than 1/10th of 1% of their overall budget. It is also important to note that we are talking about 5 service contractors (janitorial and lawn service) and we should be able to collect the information quickly. She provided Council with a Living Wage Compliance Form that Durham County uses and it does not require an outside auditor. She felt the cost of $10-15,000 for auditing services seems high and noted some cities fold that duty into a current staff person's responsibility. She felt Council should not delay on this issue.

Mr. David Rigby, intern with Just Economics, provided Council with a form that describes how Durham County measures compliance. He felt that Council should act on this policy issue on a more timely fashion.

Ms. Laura Copeland, with the Asheville Area Chamber of Commerce, supported staff being given additional time for further analysis.

Mr. Greg Goren, with Children First Communities and Schools, urged Council to act on this issue sooner because budget discussions will almost be completed by the time the additional research is presented to Council. He ultimately hoped for a living wage for service contracts.

Mr. James Sheeler urged Council to adopt a living wage policy for service contracts.

In response to Councilman Mumpower, City Manager Jackson explained the research staff would be conducting in the 6-month timeframe; however, if Council is only interested in taking other people's research, then that can be done in a shorter period of time. Director of Administrative Services Lauren Bradley also explained that the 6-month process was not to miss the budget process, but to coincide with it.

Mayor Bellamy said that at Council's retreat there will be an opportunity to hear an update on major issues and at that time Council can decide on whether they want this issue to move forward or not. If it moves forward, then staff can proceed with obtaining data from the new software and obtain additional research, then Council can consider its options during budget deliberations.

Councilman Miller and Councilman Mumpower withdrew their motion.

D. RESOLUTION NO. 09-254 - RESOLUTION APPROVING A FUNDING PLAN TO COMPLETE $2.3 MILLION IN STORMWATER CAPITAL IMPROVEMENT PROJECTS

Director of Public Works Cathy Ball said that this is the consideration of a resolution directing the City Manger to include $2.3 million for stormwater capital improvement projects in a comprehensive bond package to be financed in December 2009.

In 2005, City Council established a Stormwater Utility Enterprise Fund. Of the approximate $2.5 Million budget, $300,000 was dedicated annually to capital improvement projects. Several projects have been completed since Fiscal Year 2006. These projects include Simpson Street, Richmond Hill Drive, Greenleaf Circle, South French Broad to Patton Avenue, All Souls Crescent, and Atlanta Avenue, Burton Street, and Bryant Street drainage improvements.

Staff has identified several additional stormwater capital projects that need to be completed. Some of these projects include failing storm drainage pipes while others are necessary to improve water quality. A list of additional projects that need to be completed is provided below:

Priority	Description	FY 11	FY 12	Total
1	Stormwater Phase II Environmental Compliance - City Vehicle Wash Bay	$300,000		$300,000
2	Old Toll Road Drainage Improvements	$350,000		$350,000
3	North Bear Creek (from Johnston Blvd to W. Rash Road) Drainage Improvements	$309,000		$309,000
4	Town Branch Water Quality Improvement	$125,000	$425,000	$550,000
5	Evelyn Place Drainage Improvements	$55,000		$55,000
6	Fairway Drive Drainage Improvements		$101,000	$101,000
7	Ballentree Subdivision Drainage Improvements		$218,000	$218,000
8	Gardenwood Road Drainage Improvements		$62,000	$62,000
9	Michigan Avenue Drainage		$274,000	$274,000

	Improvements			
10	North Market Street Drainage Improvements		$85,600	$85,600
	Total	**$1,139,000**	**$1,165,600**	**$2,304,600**

The aforementioned projects are currently not included in the Fiscal Year 2009-10 adopted stormwater capital improvement budget. In August 2009, staff recommended to the Finance Committee that one option would be for the City to appropriate stormwater capital reserve funds (i.e. fund balance) to fund some of the projects listed above.

Since that time, staff has done further analysis. The approximate capital reserve balance in the Stormwater Enterprise Fund is $1.1 Million. Finance staff recommends that we maintain at least a 40% fund balance in the capital reserve or approximately $1 million (consistent with fund balance policy for the water fund) to cover unforeseen emergencies and to provide adequate cash flow. Therefore, there is not a significant balance in capital reserve account to complete the capital projects.

As an alternative, staff is recommending that Council indentify the aforementioned projects as high priorities and direct staff to include them as a part of the fiscal Year Fiscal Year 2009-10 financing package that will be issued in the December/January timeframe. Any additional debt service costs associated with adding these projects to the current package will be paid from the Stormwater Utility Enterprise Fund through line item transfers

Pros:

- This recommendation would allow the City to complete some significant capital stormwater improvements to help reduce damage to life and property.
- This recommendation would allow the City to comply with a State mandate to contain water runoff from vehicle and equipment washing.
- This recommendation would improve water quality in the Town Branch Watershed.
- This recommendation provides for implementation of the Dingle Creek Master Plan

Con:

- Based on initial estimates, financing these projects will require a commitment of approximately $185,000 in annual debt service costs from the Stormwater Utility fund for the next 20 years.

The first debt service payment may come due in June 2010; therefore, staff is prepared to pay approximately $95,000 from the current Stormwater Enterprise Operating Fund through line item transfers. Thereafter, debt services costs would be approximately $185,000 annually. The Stormwater Fund's proposed Fiscal Year 2010-11 revenue structure may need to be adjusted to accommodate the additional annual debt service costs.

The consideration of a resolution directing the City Manger to include $2.3 million for stormwater capital improvement projects in a comprehensive bond package to be financed in December 2009.

Councilman Mumpower felt that the need is compelling; however, he could not support the action due to the economy climate.

In response to Mayor Bellamy, Ms. Ball said that there is $1.1 Million in the stormwater savings account, which is about 45% of the revenues that are generated every year.

When Mayor Bellamy asked for public comments, none were received.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Russell moved for the adoption of Resolution No. 09-254. This motion was seconded by Councilman Newman and carried on a 6-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 32 – PAGE 288

E. CONSIDERATION OF A RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH LANDSCAPES UNLIMITED LLC FOR THE INSTALLATION OF A NEW IRRIGATION SYSTEM ON THE BACK NINE HOLES AT THE ASHEVILLE MUNICIPAL GOLF COURSE

Director of Parks, Recreation and Cultural Arts Roderick Simmons said that this is the consideration of a resolution authorizing the City Manager to enter into a contract with Landscapes Unlimited LLC for the installation of a new irrigation system on the back nine holes at the Asheville Municipal Golf Course, for an amount not to exceed $238,000.

City Council approved $300,000 as part of the City's Fiscal Year 2009-10 capital improvement budget for the irrigation system and back flow preventers at the Asheville Municipal Golf Course. The City issued a request for proposals for the project and the lowest, responsible bid was received from Landscapes Unlimited, LLC, located at 1201 Aries Drive, Lincoln, Nebraska, for a cost not to exceed $238,000. This expense, along with the cost of and the installation of a water tap and back flow preventers will total about $265,000.

This action complies with the City Council Strategic Operating Goal in the Green Focus Area in that it achieves long term energy goals to reduce electricity cost and conserve water, and it supports the operation and maintenance of all city parks. This action also complies with the Parks, Recreation, Cultural Arts and Greenway Master Plan in that it ensures a continued high level of service in the park system via strategies that address maintenance and safety improvements.

Pros:

- The contract amount plus the cost of the water tap and backflow preventers will not exceed the approved project budget of $300,000.
- The new irrigation system will replace an old and antiquated system that is manually operated and in continuous need of repair.
- The new system will save considerable time and money in the form of staff time, repair costs and water use.
- The new system will increase water efficiency while improving overall playability of the golf course.
- Water and cost savings due the replacement of an old, leaking and obsolete system.
- Back flow preventers are required by the Water Department and will put the Golf Course in compliance with public health and safety standards.

Con:

- There will be some inconvenience to golfers during the time of construction and installation however construction will occur during the non-peak season.

Three hundred thousand dollars was approved in the City's Fiscal Year 2009-10 Capital Improvement Budget for this project.

Staff recommends City Council to authorize the City Manager to enter into a contract with Landscapes Unlimited, LLC not to exceed $238,000 for the installation of an irrigation system on the back nine holes of the Asheville Municipal Golf Course.

In response to Councilman Mumpower, Mr. Simmons said that the Golf Course has not broken even on the Golf Course since the City took over operation from the County. They do not plan a subsidy from the City this year.

Councilman Mumpower felt this is a nice program but not necessary, and due to our budget realities going forward, he could not support this action.

Throughout discussion, and in response to Councilman Newman, Mr. Simmons said that this contract will allow the City to be in compliance with public health and safety standards and will also give us the technology to manage the system.

Mayor Bellamy agreed that the project needed to happen, but felt that due to the anticipated budget shortfall and since this will come out of General Fund dollars, she would prefer to delay the process.

When Councilwoman Cape asked if there are fines associated with the back flow preventer requirement, Mr. Roderick said that we have received notice of violations, but no official notice of fines yet.

When Mayor Bellamy asked for public comments, none were received.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Russell moved for the adoption of the resolution. This motion was seconded by Councilman Miller and failed on a 2-5 vote, with Councilman Russell and Councilman Miller voting "yes."

F. DISCUSSION OF VARIOUS STRATEGIES PROPOSED IN THE DOWNTOWN MASTER PLAN RELATED TO PROJECT REVIEW PROCESSES

Mayor Bellamy thanked the Downtown Commission members for the enormous amount of time they have devoted to the Downtown Master Plan process. Due to the lateness of the evening and in order to give the item the proper attention by the proper body, she felt this should be considered by the new Council.

Councilman Mumpower moved to postpone action on this item. This motion was seconded by Councilwoman Cape and carried unanimously.

Planning & Development Director Judy Daniel said that when this is heard by Council, they will be pleased to see that there is virtually consensus on the first group of issues and that guidance is needed only on one issue.

G. RESOLUTION NO. 09-255 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXTEND THE DOWNTOWN DEVELOPMENT AGREEMENT DECISION MAKING PERIOD FOR THE PROPOSED PARKING GARAGE AT 51 BILTMORE AVENUE TO INCLUDE AN EXTENSION OF THE OPTION TO PURCHASE THE PROPERTY LOCATED AT 51 BILTMORE AVENUE FOR SIX ADDITIONAL MONTHS FROM JANUARY 1, 2010, TO JUNE 30, 2010

Director of Public Works Cathy Ball said that this is the consideration of a resolution authorizing the City Manager to extend the Downtown Development Agreement decision making

period for the proposed parking garage at 51 Biltmore Avenue to include an extension of the option to purchase the property located at 51 Biltmore Avenue for six additional months from January 1, 2010 to June 30, 2010.

In October 2008, City Council approved a Downtown Development Agreement with McKibbon Hotel Group, Public Interest Projects and the City of Asheville for the purpose of constructing a parking garage. The design of the parking garage is complete. The architect is in the process of applying for all applicable permits.

As designed, the project consists of the following:

- four hundred ten (410) parking spaces;
- public restrooms;
- four (4) parking spaces for electric vehicles;
- ten (10) bike lockers; and,
- public art component.

In June 2009, City Council extended the Downtown Development Agreement six months due to the inability of McKibbon Hotel Group to obtain funding due to current economic conditions.

The Downtown Development Agreement is structured to expire on December 31, 2009. The agreement allows for one additional extension. Staff is requesting that Council authorize the City Manager to execute the extension of the agreement which primarily includes the extension of the option for the purchase of the property at 51 Biltmore Avenue.

This project is in alignment with the Strategic Plan by promoting sustainable, high-density, in-fill growth that makes efficient use of resources and by making environmentally efficient capital improvements. In addition, this action complies with the Parking Action Plan adopted by City Council.

Pros:

- According to the findings of the downtown parking study, this area has a deficit of public parking. This parking garage would address this need.
- Project should allow the development of workforce housing more feasibly due to reduced capital requirements for constructing private parking which in turn supports lower priced housing units.
- Capitalize on relationship with mixed use developer who is willing to partner with the City and make private property available for public use.
- Offer the opportunity to leverage public parking as an economic development tool.
- Offers community benefits such as additional jobs and tax base for the City created by the mixed use elements.
- Public parking helps sustain existing investments and future growth of retail and office uses in the area.
- Public parking is critical for downtown office job expansion.

Cons:

- Public-private partnerships tend to be complicated and require additional coordination between the City and the private sector than traditional stand-alone projects.
- Specific performance guarantees must be made by the City to third parties. Corresponding grantees are required of the developer to the City regarding the quality and sustainability of the mixed use components.
- The cost of the land is higher than the appraised value. Originally the owner did not want to sell the property but rather lease the property to the City for sixty years. After the City

determined that it was a better financial decision for the City to purchase the property, the owner agreed to sell but with the restriction that they recoup the capital gains taxes.

The cost to extend the option for the property at 51 Biltmore Avenue for an additional six months is $5,000.

City staff recommends City Council authorizing the City Manager to extend the Downtown Development Agreement for the proposed parking garage at 51 Biltmore Avenue to include an extension of the option to purchase the property located at 51 Biltmore Avenue.

Councilman Mumpower felt it was reasonable to extend this agreement; however, he believed that with the economic reality at hand and the investment of City dollars, he could not support this action.

When Mayor Bellamy asked for public comments, none were received.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilwoman Cape moved for the adoption of Resolution No. 09-255. This motion was seconded by Councilman Russell and carried on a 6-1 vote, with Councilman Mumpower voting "no".

RESOLUTION BOOK NO. 32 – PAGE 289

H. UPDATE ON WATER SERVICE REQUEST FROM CHAPEL HILL CHURCH ROAD AREA

Water Resources Director Steve Shoaf said that purpose of this memorandum is to provide the Council requested construction cost estimate for a waterline and associated fixtures along Chapel Hill Church Road and Gilmore Drive, which is outside the City limits. This line is intended to provide water service to parcels directly connected to these two roads. This cost estimate was prepared by our Water Engineering Division.

Using a map, he explained that the installation would require approximately 2200 linear feet of 8" ductile iron pipe, approximately 400 linear feet of 6" ductile iron pipe, and approximately 400 linear feet of 2" copper line. In addition this job would require about 350 feet of ¾ inch copper line for service connections from the water main to the meter. The estimate includes a provision for the necessary fittings to be used during installation. This installation would also include 6 fire hydrants spaced along the length of the 8 and 6 inch waterlines to be used for fire protection and water quality flushing.

The total construction cost estimate is $227,630 if the waterline can be installed with minimal (one lane) of paving repair along the road. If there is a need for full-width paving, this would add an estimated $64,000 to the cost of the project and bring the total up to $277,070.

This estimate includes design, materials, equipment, and labor costs for installation. As you recall, during the nearby Oaks project, Buncombe County purchased all materials, and the City contributed the design, equipment, and labor for installation. This accounted for approximately 44% of the Oaks project costs. The included labor costs for the Chapel Hill Church Rd. project is estimated between 35 and 40 percent.

This cost estimate does not include running private water service lines from each meter to the residence. The existing off-premise meters would be abandoned and property owners would bear the expense of the connection from the meter to the house. Owners of property

developed at a later date would be expected to pay all tap and meter labor and fees similar to other connections to our system.

The preferred treatment of contaminated ground water is air stripping followed by carbon adsorption, which can create an air quality issue. A possible alternative to running water lines into this area would be the installation of carbon filtration "point of entry" devices attached to the individual wells. This option would be effective for low levels of contamination and would buy time and peace of mind for some whose wells are not contaminated at this time. A locally represented business provided budget estimates of $4,000 for purchase or $2,000 per year for lease of the necessary equipment. If purchased, the maintenance and testing costs are borne by the owner, and if leased, maintenance costs are covered by the supplier while testing costs are again borne by the end user. At $4,000 per installation, the initial cost for 21 installations would be approximately $84,000 and may represent a viable alternative to an expansion of the distribution system. Similar to the installation of waterlines, this option would need further investigation to explore practicality and efficacy.

This memorandum is provided for informational purposes only.

In response to Councilman Russell, Urban Planner Blake Esselstyn said that this property is entirely in Buncombe County. Using a map, the distance between the road and the City limits would be more than 1 mile. As a crow flies, the distance is approximately 1,000 feet from the City limits; however, one large parcel is not included in the discussions.

In response to Councilwoman Cape, Mr. Shoaf said that the closest waterline is on Pinner's Cove Road and the property owners have asked for an extension of a waterline up Chapel Hill Church Road up to Gilmore Drive. The entire length of line would be approximately 2,600 feet of waterline.

In response to Mayor Bellamy, Mr. Shoaf said that the line on Pinner's Cove Road was installed by developers to serve communities further out.

Mayor Bellamy felt it would be appropriate to send the City's analysis information to Buncombe County to assist them in their discussions. She noted that during the Sullivan Act discussions, it was clear that Buncombe County owns the lines they have installed outside the City limits. She felt this would be an opportunity for the City to ask them to address this concern that is outside the City's jurisdiction.

In response to Vice-Mayor Davis, City Manager Jackson said that his interpretation of an e-mail circulated is that the County is not extending services at this time as they did to the Oaks Subdivision. They would seek remedy from the Environmental Protection Agency and the N.C. Dept. of the Environment and Natural Resources based upon verified well contamination.

It was the consensus of Council to have the City will transmit all their information via letter to Buncombe County and copy the property owners who have reached out to City Council as well as Senator Burr. In addition, also communicate the City's willingness to partner with other governmental entities in extending water lines to the Chapel Hill Church Road area.

VI. NEW BUSINESS:

A. EMPLOYEE FITNESS POLICY

Councilman Mumpower Proposal for Annual Fitness Screen for Public Safety Employees

Councilman Mumpower said that we appear to have a number of public safety officers who may not be in a position to handle the physical demands of their respective responsibilities.

The lack of physical fitness places officers at risk and limits their effectiveness in addressing the physical demands associated with their good efforts.

His proposal is that the City of Asheville establishes a policy of annual fitness tests for all public safety employees – including our police officers and firefighters. Based on staff research requested Asheville is the only major city in North Carolina that does not have a fitness testing program for firefighters. One third of North Carolina cities conduct annual physical fitness tests for police officers – Charlotte and the Highway Patrol offer models for consideration.

Methods for implementation of a three step process is as follows:

- Year One – Voluntary participation in a nonbinding physical fitness test.
- Year Two – Mandatory participation in a nonbinding physical fitness test.
- Year Three – Mandatory participation in a binding physical fitness test w/ follow-up mediation as needed.
- Fully fund gym membership.
- Focus is on educating, salvaging, and uplifting our public safety personnel as primary mission.

He provided Council with several e-mail links and noted that the City of Charlotte has had an annual fitness test policy since the early eighties while the Highway Patrol has a semi-annual test. Support is provided through education and resources versus compensatory exercise time.

He said that he initially raised this issue about 3 years ago and have collaborated with the City Manager and staff since that time on exploring potentials. Over the past year staff has completed a thorough study of North Carolina realities on mandatory annual public safety fitness tests. Prior to completing his tenure, he wanted to assure that this issue received formal consideration.

Staff Memorandum

Ms. Lisa Roth, Human Resources Director, provided Council with the following information on physical examinations and fitness testing:

Part 1: Police & Fire

A study of annual Medical Exams and Fitness Testing compared the City of Asheville's Police and Fire Departments to similar North Carolina and South Carolina Municipalities. A summary of the finding are shown below.

Municipalities Surveyed: Gastonia, NC; Greensboro, NC; Greenville, NC; Greenville, SC; Hickory, NC; and High Point, NC:

- Annual Physical Exams
  - COA Fire Department – new and current Fire Department employees are required to submit to an annual physical separate from the medical insurance. The Physical includes a medical exam, blood work, EKG, Pulmonary Function and Stress test. The cost is $350 per employee
  - All other municipalities surveyed require their Fire Department employees to submit to an annual Physical with similar tests included. The only variable is the treadmill stress test requirements. Thirty three (33%) require treadmill stress tests for all ages, 33% is optional based on physician recommendation, and 33% require stress tests for employees age 50 and over.
  - COA Police Department – new Police Department employees are required to submit to a physical, but do require an annual physical for current employees.

- Only 1 other municipality surveyed does not offer an annual Physical to their current police department employees, but only recently (2010) changed this requirement due to budget cuts (were offered in 2009). All other police departments require (50%) or offer (25%) an annual Medical Exam to current police department employees.
- If an employee does not pass the Stress Test as a part of their annual Physical, duty status can be affected. All follow up care is coordinated through Health Services and specialist providers.

- Fitness Exams - The City of Asheville does not require or offer current Fire or Police Department employees to complete a fitness test other than the stress test for Fire Department employees. Both Fire and Police require a fitness exam for new employees.
  - All but one municipality conduct an annual or bi-annual fitness test of their Fire Department Employees. Sixty seven (67%) percent require at least an annual fitness test consisting of tasks similar to the Fire Fighter Physical Agility Test required for new hires.
  - Fifty (50%) percent of the municipalities surveyed had Fitness Committees made up of Fire Department employees in all stations.
  - Sixty seven (67%) percent of municipalities surveyed require at least 1 hour of physical activity per shift for all Fire Department Employees.
  - Thirty three (33%) percent of Police Departments conduct an annual or bi-annual fitness tests that require some form of strength, agility, POPAT or Aerobic fitness level.
  - Municipalities provide the results of fitness testing (fire & police) to employees and fitness committee (if applicable). There is no direct penalty or reward for passing test, but team effort and peer pressure designed to encourage all failures to pass test.

Part 2: CDL & Laborer Positions

- New CDL employees and promotions are required to have a limited physical exam that is handled by an Occupational Health Nurse. CDL guidelines indicate this testing should be performed on a regular basis, but not less than every 2 years. This has previously not been tracked or required by Health Services.
- Physical Labor Positions – Neither new nor current physical labor positions require any type of physical exams.

Part 3: Recommendations

All City employees have access to an Annual Physical through the City's medical insurance plan. Of the estimated 1,721 Adult employees and dependents covered by the medical plan, 565 received Preventive Services/Physical Exams through the medical plan. The average cost under the medical plan was $360, but individual prices range from $150-$1,500 depending on the services included in the exam. These figures may be artificially low since some providers code physicals with a diagnosis code (hyperlipidemia, high blood pressure, etc.). Fire Department physicals are not included in these figures because they are paid under the Fire Department budget.

The following changes would be recommended to the City's New Hire and Annual Physicals:

- Fire Department – No changes to current process of requiring annual physicals paid by AFD budget.
- Police Department – Follow the current Fire Department policy of requiring physicals based on the age of the employee. Most common recommendation is age <30 every 3

years, 30-39 every 2 years, 40+ annual exams. Physicals should be paid out of the APD budget and include hearing, labs, and stress tests. Estimated cost of $350-$500 per employee per exam.

- CDL Employees – Continue to provide CDL physicals by Health Services for all new hires. Begin immediately to follow CDL guidelines to track and provide a CDL physical exam by Health Services as required (12-24 months). Estimated impact to budget is additional staffing time and lab fees. Expected annual cost of less than $10,000.
- Laborers – Require Health Services "CDL-type" Physicals for all new and current employees. These exams should include basic hearing tests, vision, urinalysis and vitals. Health Services is not currently staffed to handle the volume required, but estimate additional nursing staff would be necessary 1-2 days per week. Workers Comp claims may be positively impacted if injuries are discovered and/or documented early.

In response to Councilman Mumpower, Ms. Roth said that the City didn't survey Charlotte, N.C., or the Highway Patrol as they studied cities Asheville's size.

Councilwoman Cape felt an annual fitness test is a form of prevention. She felt more benchmarking information might be needed on how this helps our insurance ratings, what is the offset cost, how many people are hurt on the job that may have benefitted from this program, etc.

When Mayor Bellamy asked for public comments, no one spoke.

Mayor Bellamy felt this program, and others similar to the Asheville Project, the Weight Watchers Program, nutritional counseling, etc., might help to bridge the health insurance gap.

Councilman Mumpower moved to instruct City staff to explore the development of an annual fitness testing procedure for our public safety employees to include voluntary, mandatory and other options and possibilities that could be deliberated by the future City Council. This motion was seconded by Councilwoman Cape and carried unanimously.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Councilman Mumpower stated that he would be unable to attend the December 8, 2009, organizational meeting of the new Council. It has been his pleasure to serve on City Council and thanked everyone who tried to help him fulfill his role the best way he knew how. He wished everyone the best going forward.

VIII. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 10:40 p.m.

Magdalen Burleson
CITY CLERK

MAYOR

Tuesday - December 8, 2009 – 5:00 p.m.

ORGANIZATIONAL SESSION:

Mayor-Elect Terry M. Bellamy welcomed everyone to the organizational session.

The Marine Corp JROTC led City Council in the Pledge of Allegiance.

Mayor-Elect Bellamy then introduced the Reverend James V. King from Family of Faith Fellowship who gave the invocation.

The Honorable Gary S. Cash, Chief Judge of the Buncombe County District Court, administered the Oath of Office to the following, who after sworn, thanked family and friends for their support:

Mayor Terry M. Bellamy
Council Member Cecil Bothwell
Council Member Esther E. Manheimer
Council Member Gordon D. Smith

RESOLUTION NO. 09-243 - RESOLUTION OF APPRECIATION FOR ROBIN L. CAPE

Mayor Bellamy read the resolution.

Resolution No. 09-243 was adopted by acclamation.

Mayor Bellamy thanked Ms. Cape for her service to Asheville and presented her with the resolution, a plaque, her name plate and a City pen.

RESOLUTION BOOK NO. 32 - PAGE 276

RESOLUTION NO. 09-244 - RESOLUTION OF APPRECIATION FOR R. CARL MUMPOWER

Mayor Bellamy read the resolution.

Resolution No. 09-244 was adopted by acclamation.

Even though Mr. Mumpower was unable to attend the meeting, Mayor Bellamy thanked him for his service and said we would forward him his resolution, a plaque, his name plate and a City pen.

RESOLUTION BOOK NO. 32 - PAGE 277

RECOGNITION OF VICE-MAYOR JAN DAVIS

Mayor Bellamy expressed her and the Asheville City Council's gratitude to Councilman Davis for his service as Vice-Mayor to the citizens of the City of Asheville.

Councilman Davis thanked City Council and his wife, Ann, for their support and explained what a rewarding experience the past two years have been for him. He urged the citizens of Asheville to continue to step up and serve on our boards and commissions as he felt they are the life's blood of government in the City of Asheville.

Mayor Bellamy presented Councilman Davis with a gift of pottery.

ELECTION OF VICE-MAYOR

Councilman Davis nominated Councilman Newman as Vice-Mayor of the City of Asheville. Councilman Russell seconded the nomination.

After hearing no more nominations, Mayor Bellamy closed the floor for nominations.

Mayor Bellamy called for a vote, resulting in Councilman Newman being appointed as Vice-Mayor unanimously.

Vice-Mayor Newman said that he was honored to be Vice-Mayor and looked forward to working with everyone. He thanked the City Council, his wife, Beth, and others, for their support.

COMMENTS FROM MAYOR

Mayor Bellamy recognized Buncombe County Commission Chairman David Gantt and Buncombe County Commissioner Holly Jones for attending this special occasion.

Mayor Bellamy said that four years ago she made a commitment to make sure that City Council was transparent; that we would continue to focus on the people's business; we would work on core services; work on local, state and federal level relationships; and make sure Asheville was safe city. She is really proud of what we have accomplished over the last four years and felt we have moved in the right direction as a community. As we look over the next four years, we need to realize that we are in a different economic time and it is imperative as a community that we begin to truly work together and bridge our differences. We need to focus on jobs in our community and provide opportunities for individuals who do not finish school to obtain their GED or higher learning. We also need to begin to look at issues and how we address those issues in a different way. She challenged us as a community to not only embrace our new Council Members but to begin anew. Lastly, she thanked her mom and others, but specifically thanked her husband Lamont who has shared her with the community for 10 years and if he had not been for him, she would not have been able to represent our community in the manner in which she has over the past four years as Mayor.

ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 5:37 p.m.

Magdalen Burleson
CITY CLERK

MAYOR

Tuesday – December 15, 2009 - 5:00 p.m.

Regular Meeting

Present: Vice-Mayor Brownie W. Newman, Presiding; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilwoman Esther E. Manheimer; Councilman William A. Russell Jr.; Councilman Gordon D. Smith; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: Mayor Terry M. Bellamy (representing Asheville at a White House event)

PLEDGE OF ALLEGIANCE

Vice-Mayor Newman led City Council in the Pledge of Allegiance.

INVOCATION

Vice-Mayor Newman gave the invocation.

I. PROCLAMATIONS:

A. RECOGNITION OF ASHEVILLE HIGH SCHOOL QUARTERBACK BRANDON WHITESIDE

RECOGNITION OF ASHEVILLE HIGH SCHOOL DEBATE TEAM

Vice-Mayor Newman introduced Ms. Carol Ray, Principal of Asheville High School. Ms. Ray recognized the efforts of Mr. Brandon Whiteside and the Debate Team.

Councilwoman Manheimer, alumni of Asheville High School, was pleased to read a proclamation for Mr. Brandon Whiteside, Asheville High School Quarterback. Mr. Whiteside, a senior at Asheville High is a student who is uniquely capable of identifying needs in his community and working to meet those needs. A perfect example of this is his "Pass for the Cure" campaign to benefit American Cancer Association's Relay For Life. Brandon has intimately experienced the struggles and tragedies that come along with cancer; his father died of cancer and both his little sister and mother are currently in remission with different types of cancer. Instead of festering with these hardships, Brandon has decided to be a champion for his family. Brandon pledged to donate his personal money to cancer research for every successful pass he threw this season. He finished the season with a total of 1854 yards passing. Brandon raised his money by doing chores, working a part-time job, and doing everything else he could to raise money. This season, he set a school record for yards passed in a season. As a result of his pledge, outside donations have rolled in to help support Brandon's campaign. In addition to Brandon's outstanding work with Relay for Life, Brandon is also an honor roll student and involved with many other extracurricular clubs and activities at Asheville High School.

Mr. Whiteside thanked his family and friends for their support.

Vice-Mayor Newman also recognized the Asheville High School Debate Team. Ms. Ray explained that the Asheville High Debate team participates in 15 to 20 tournaments a year both locally and nationally. It has grown to over 40 members. The team is nationally ranked and is the defending state champion in debate. Accomplishments for this year include winning the University of Florida Lincoln Douglas Championship, as well as bringing home that tournament's third place Lincoln Douglas award, two Congressional Debate semifinalist awards and two Public Forum octafinalist awards. At Wake Forest the team had the runner up in Congressional Debate, as well as the fourth and seventh place winners in Congressional Debate. The team also had two octafinalists in Public Forum at Wake Forest. The team's Congress and Lincoln

Douglas squads are currently ranked number one in the state and the Public Forum squad is in the top five in the state. The Congress squad is also the number seven team in the country in the Harvard rankings and will compete in the prestigious Harvard Invitational in February, which is the country's top invitational tournament. The head coach is Keith Pittman and the three assistant coaches are Larry Burke, Katie Williams and Jenni Davidson.

B. EMPLOYEE RECOGNITIONS

City Manager Jackson recognized (1) Women's Tapping Team consisting of Michelle Massey, Brenna Cook, Myrriah Ringgenberg and Coach Phillip Buckner; and Men's Tapping Team consisting of Jason Hyatt, David Hyatt, Bryan Todd, and Noel Campbell. Both teams have taken first place in the North Carolina State Pipe Tapping Competition; (2) Excellence in Financial Reporting Award for the 29th time the City has received this prestigious award and Distinguished Budget Award for the 19th time the City has received this prestigious award - financial reporting staff of Pat Leckey, Tia Keith, Charity Constance, Dean Luebbe, Sheri Banks and Sharlene Franklin and budget staff of Tony McDowell, Sandy Ryland and Alina Law; and (3) Fire Captain Jeremy Edmonds who was selected as State Firefighter of the Year.

On behalf of City Council, Vice-Mayor Newman thanked the employees on what they do on behalf of the City of Asheville and City Council. He was proud of City staff and looked forward to highlighting more accomplishments.

II. CONSENT AGENDA:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON NOVEMBER 24, 2009, AND THE ORGANIZATIONAL MEETING HELD ON DECEMBER 8, 2009

B. RESOLUTION NO. 09-256 - RESOLUTION AMENDING THE FEES & CHARGES MANUAL FOR PERMITTING PRECIOUS METAL BUYERS THROUGH THE ASHEVILLE POLICE DEPARTMENT

Summary: The consideration of a resolution amending the Fees and Charges Manual for permitting Precious Metal Buyers through the Asheville Police Department.

Based on North Carolina General Statute 66-165, Local Law Enforcement Agencies are to permit precious metal buyers within their jurisdiction. The permitting process requires an initial background check for the business owner and all employees. An annual renewal of the permit is also required. The statute allows fees to be charged for the background checks and administrative costs associated with the issuance of the permits. Based on a cursory overview of the businesses within Asheville that would likely purchase precious metals, staff has identified nearly 100 businesses that would require annual permits. The various businesses that set up for a few days to conduct precious metal purchasing would require special occasion permits.

The Statute sets the following fees:

- The annual fee for a permit within each jurisdiction is one hundred eighty dollars ($180.00) to provide for the administrative costs of the local law enforcement agency, including the purchase of required forms and the cost of conducting the criminal history record check of the applicant.

- Every employee engaged in the precious metals purchasing business shall, within two business days of being so engaged, register his or her name and address with the local law enforcement agency. The agency shall issue to the employee a certificate of compliance with this section upon the applicant's payment of the sum of ten dollars

($10.00) to the agency. The certificate shall be renewed annually for a three dollar ($3.00) fee.

- The filing fee for a special occasion permit application is one hundred eighty dollars ($180.00) to provide for the administrative cost of the local law enforcement agency including purchase of required forms and the cost of conducting the criminal history record check of the applicant. The fee is not refundable even if the permit is denied or is later suspended or revoked. A special occasion permit is in addition to and not in lieu of other business licenses and is not transferable. No person other than the dealer named on the permit and that dealer's employees may engage in the business of purchasing precious metals under the authority of the permit.

- A special occasion permit is valid for 12 months from the date issued, unless earlier surrendered, suspended, or revoked. Application for renewal of a permit for an additional 12 months shall be on a form approved by the Department of Crime Control and Public Safety and shall be accompanied by a nonrefundable renewal fee of one hundred eighty dollars ($180.00).

- Effective January 1, 2010 local agencies can begin enforcing this statute.

This action complies with the City Council Strategic Plan in the area of Fiscal Responsibility in operating the City of Asheville at the highest fiscal responsibility. By charging appropriate fees to recoup administrative costs of permitting, we provide efficient services for our community.

Pros:

- This action will enable better regulation of Precious Metal Buyers and their employees
- Management of the files and documentation requirements of businesses will provide another source to review for potential stolen items

Con:

- Additional time spent by Asheville Police Department staff conducting background checks and maintaining permitting files.

Revenue generated from permitting process would likely total between $15,000 and $20,000.

City staff recommends that City Council approve a resolution amending the Fees & Charges Manual for Permitting of Precious Metal Purchasers.

Chief Hogan responded to Councilman Davis when he asked if we received input from dealers in our area and if other cities in North Carolina are permitting these buyers.

RESOLUTION BOOK NO. 32 – PAGE 290

C. ORDINANCE NO. 3813 - ORDINANCE AUTHORIZING THE ASHEVILLE POLICE DEPARTMENT TO ACCESS THE STATE BUREAU OF INVESTIGATION'S DIVISION OF CRIMINAL INFORMATION NETWORK DATABASE FOR CRIMINAL HISTORY CHECKS INVOLVING APPLICANTS FOR PRECIOUS METAL PERMITS WITH THE CITY AND TO CONDUCT BACKGROUND CHECKS ON EMPLOYEES WHO WORK FOR DEALERS REQUIRED TO GET SAID PERMIT

Summary: The consideration of an ordinance authorizing Asheville Police Department to access the State Bureau of Investigation's Division of Criminal Information Network (DCI)

database for criminal history checks involving applicants for precious metal permits with the City and to conduct background checks on employees who work for dealers required to get said permit.

Pursuant to N.C.G.S. § 66-165, the Asheville Police Department is required to conduct criminal background checks for persons applying for a precious metal permit. In addition, the State requires Asheville Police Department (APD) to conduct criminal background checks for all employees who work for dealers required to obtain a precious metal permit. Currently, the City is doing limited criminal history checks through City County Bureau of Investigation. However, the City/County database only deals with crimes adjudicated by the State of North Carolina.

The Asheville Police Department is has access to the State Bureau of Investigation's DCI database which contains criminal background information for the entire country. The State of North Carolina has strict requirements for using this criminal database for non-criminal employment and licensing. In order to access the state database, City Council must pass an ordinance requiring the criminal history checks and the consequences for failing the criminal background check. City staff has passed similar ordinances allowing APD to access the DCI system for adult entertainment licenses and ABC permits.

Pro:

- The City will be able to access the DCI network to conduct criminal history checks on applicants precious metal permits and employee buying and selling precious metals in compliance with N.C.G.S. § 66-165.

Con:

- None

City staff recommends City Council adopts the ordinance authorizing the APD to conduct criminal history checks for precious metal permits and registration for employees buying and selling precious metals within the City's territorial limits.

ORDINANCE BOOK NO. 26 – PAGE 1

D. ORDINANCE NO. 3814 - BUDGET AMENDMENT FROM THE N.C. DEPT. OF HEALTH AND HUMAN SERVICES, DIVISION ON AGING AND THE LAND-OF-SKY REGIONAL COUNCIL/AREA AGENCY ON AGING THROUGH THE SENIOR CENTER GENERAL PURPOSE FUNDING FOR IMPROVEMENTS AND EQUIPMENT FOR THE SENIOR OPPORTUNITY CENTER AND HARVEST HOUSE

Summary: The consideration of budget amendments in the amount of $12,707 for Senior Opportunity Center and $12,706 for Harvest House for an appropriation from the State of North Carolina, Department of Health and Human Services, Division on Aging and the Land of Sky Regional Council/Area Agency on Aging through the Senior Center General Purpose Funding.

Funds will be used at the Senior Opportunity Center to 1) re-paint the interior of the center, 2) replace flooring in men's restroom, front entry and office areas, 3) replace furniture in the activity area, and 4) replace stove and microwave in the kitchen. The allocation requires a 25% local match which will be provided via in-kind services in staff time to manage the project.

Funds will be used at Harvest House to 1) re-paint the interior and exterior of the building, 2) clean and re-seal the deck, 3) replace wood timbers in parking lot, 4) repair heating and air system, and 5) purchase a portable room divider for the multi-purpose activity room. The allocation requires a 25% local match which will be provided via in-kind services in staff time to manage the project.

This action complies with the Parks, Recreation, Cultural Arts & Greenways Master Plan in that it 1) will increase the level of service for indoor facilities to bring older facilities up to date before building new facilities; and 2) increases department funding with alternative funding via grants.

Pros:

- Room divider will enhance the existing activity area by making it multi-purpose thereby expanding program space
- Improvements will enhance the customer experience and enhanced safety
- Replace of old and worn equipment

Cons:

- None

The allocation will increase the City's operating budget by $25,413 in special project accounts designated for the Senior Opportunity Center and Harvest House. The 25% local match will be provided through in-kind services in staff time to manage the projects.

Staff recommends City Council to approve the budget amendment authorizing the City Manager to establish a budget in the amount of 1) $12,707 for Senior Opportunity Center, and 2) $12,706 for Harvest House for improvements and equipment.

ORDINANCE BOOK NO. 26 – PAGE 3

E. RESOLUTION NO. 09-257 - RESOLUTION AUTHORIZING THE MAYOR TO EXECUTE AN INTERLOCAL AGREEMENT WITH THE CITY OF HENDERSONVILLE FOR EMERGENCY WATER PURCHASE

Director of Water Resources Steve Shoaf said that this is the consideration of a resolution authorizing the Mayor to sign an Emergency Water Purchase Agreement between the City of Asheville and the City of Hendersonville.

Asheville and Hendersonville signed a wholesale agreement in January 2007 for the sale of bulk water. Under this agreement, there are provisions for the cost of the water and the terms of the sale of water. For several years, Hendersonville has purchased approximately one million gallons of water per day from Asheville. Hendersonville has notified Asheville that effective January 1st, 2010, they wish to discontinue purchasing water from Asheville on a regular basis. Instead, Hendersonville would like an agreement to purchase water under temporary, emergency conditions.

The two water systems are interconnected in two locations, so there is no need for additional connections at this time. Key features of the agreement include: (1) definitions of what constitutes emergency water purchases and (2) the cost of bulk water from either party will adjust as the price of bulk water purchases is adjusted for other wholesale customers as per City Council action. This agreement does not imply a transfer of ownership of assets or a purchase of treatment capacity for either party.

Hendersonville's Director of Utilities and Asheville's Director of Water Resources have discussed the potential collaboration between the two cities to provide water under emergency conditions and agreed upon terms for the purchase of wholesale water under temporary, emergency conditions. This agreement provides for the sale or purchase of water by either party.

This agreement reflects the City Council's strategic initiative to operate the water system in a fiscally responsible manner. This agreement promotes efficient operation and improves regional coordination of the management of our water resources with other agencies.

Pros:
- This agreement will establish the terms and conditions that will contribute to efficient regional operation of the water system.
- This agreement will allow the contract price for water to change as the price for water is adjusted for other wholesale customers.
- This agreement will allow Asheville to obtain water from Hendersonville should an emergency situation(s) arise.

Con:
- Given the loss of revenue caused by the termination of the present agreement for water sales, this new agreement will only generate revenue when there is an actual sale of water to Hendersonville.

The City will lose approximately $35,000 per month ($420,000 per year) in water revenue due to the termination of the existing agreement with Hendersonville. The current sales to Hendersonville represent about 5% of the total water produced making them our largest customer. The new agreement does not generate revenue unless there is a condition that would require Hendersonville to purchase water from Asheville. A portion of the lost revenue will be offset by anticipated savings of operational costs by a reduction of the quantity of chemicals used in treatment and reduced electrical costs for pumping and treatment.

City staff recommends that City Council authorize the Mayor to sign the Emergency Water Purchase Agreement between the City of Asheville and the City of Hendersonville.

In response to Councilman Bothwell, Water Resources Director Steve Shoaf explained the limitation about how long we would provide water and who determines if there is an emergency situation.

RESOLUTION BOOK NO. 32 – PAGE 291

F. RESOLUTION NO. 09-258 - RESOLUTION AUTHORIZING THE MAYOR TO CONVEY A UTILITY EASEMENT TO PROGRESS ENERGY FOR AN EXTENSION OF POWER LINES TO SERVE THE ASHEVILLE HOUSING AUTHORITY ON WALTON STREET

Summary: The consideration of a resolution authorizing the Mayor to execute an easement for electric power facilities to serve Asheville Housing Authority facility at Walton Street.

Progress Energy (herein "PEC") has been working with the Housing Authority on changes to the current service at the Walton Street Apartments. The proposal involves replacing existing and outdated overhead lines to three buildings, and adding a utility pole. Currently, PEC's responsibility for maintaining the lines ends at the existing pole; the Housing Authority maintains the service lines between the pole and the buildings. Under the new configuration, PEC would have maintenance responsibility for these service lines as well. The Housing Authority is bearing part of the cost for this work.

An easement is needed because the new pole and part of the new lines will be on the City's Walton Street Park property. A pole and lines are currently there, but no easement has been found.

This action complies with the City's Strategic Operating Plan in that it supports affordable housing and the Housing Authority. The project has been reviewed by the City's Parks Department, and the Housing Authority is of course aware of it.

Pros:
- Will improve service to Housing Authority Facility

- Will reduce Housing Authority maintenance responsibility

Con:

- Lines not underground (cost prohibitive on Housing Authority budget)

Adoption of the resolution is recommended.

RESOLUTION BOOK NO. 32 – PAGE 292

G. RESOLUTION NO. 09-259 - RESOLUTION ADOPTING THE 2010 CITY COUNCIL MEETING SCHEDULE, INCLUDING THE CITY COUNCIL ANNUAL RETREAT ON JANUARY 8-9, 2010, AT WARREN WILSON COLLEGE IN CANON LOUNGE

Summary: Formal meetings would continue to be held on the 2nd and 4th Tuesday formal meetings at 5:00 p.m. in the Council Chamber on the 2nd Floor of the City Hall Building.

The City Council annual retreat would be held on January 8, 2010, beginning at 11:00 a.m. – 5:00 p.m. and on Saturday, January 9, 2010, beginning at 9:00 a.m. – 1:00 p.m. at Warren Wilson College in Canon Lounge.

RESOLUTION BOOK NO. 32 – PAGE 293

Vice-Mayor Newman asked for public comments on any item on the Consent Agenda, but received none.

Vice-Mayor Newman said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Russell moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Davis and carried unanimously.

III. PRESENTATIONS & REPORTS:

A. H1N1 PREPAREDNESS FOR COMMUNITY REPORT

Ms. Gibby Harris, Buncombe County Health Director, briefed Council on the latest numbers of the H1N1 flu pandemic. She felt that we have started to get a good penetration of the flu vaccine in our community.

B. HOUSING AUTHORITY REPORT ON RECOVERY ACT/ENERGY EFFICIENCY PROJECTS

Mr. David Nash, Chief Operations Officer of the Housing Authority of the City of Asheville, briefed Council on their Recovery Act and Energy Efficiency Investments for 2009-10.

He explained the one time funding as follows: (1) Awarded in 2009: $5.9 Million; and (2) Anticipated Energy Performance Contract Extension in 2010: $3.6 Million for a total of $9.5 Million.

Work in 2009 includes: (1) Klondyke Modernization Phase 4 (a) First 20 units are 35% complete; (b) outside contract for high efficiency gas heating system is underway; (b) 11 new employees on Modernization Crew; and unrelated (4) Extended benefits to all Modernization Crew and other full-time employees and raised HACA minimum living wage to $10.50 per hour); (2) Request for Proposals out for Pisgah View Community Services Center Phase 3; (3) Designs

complete for new roofs at Altamont and Bartlett Arms – cost estimation and pricing underway; and (4) Updated energy audit from Siemens (energy performance contractor since 2003).

Other work in 2009 includes (1) installed 10,000 CFL bulbs (last 3 years); (2) applied for and received Recovery Act competitive grants; and (3) adopting (a) integrated pest management protocols; (b) Low – VOC paints, primers, adhesives and sealants; and (c) 25% salvaged/Forest Stewardship Council certified wood.

Anticipated work in 2010 includes: (1) Complete 80-90% of construction projects discussed above; (2) Work with FLS Energy to install solar hot water systems on new roofs at Bartlett and Altamont, possibly other developments; (3) Physical needs assessment and green assessment of facilities; (4) Adopt other green operations and maintenance practices; (5) Extend Energy Performance Contract with Siemens, subject to HUD and Board approval; (6) EPC work planned: (a) Water conservation: 313 new dual flush toilets; 970 lower flow toilet retrofits; 3,600+ lower flow aerators/showerheads; (b) Weatherization: 970,000 square feet of living space in six developments; (c) Insulation: 290,000 linear feet in walls; 350,000 square feet in attics – four developments; (d) Window replacements: 900; and (e) Door replacements: 300; and (7) After approval of Energy Performance Contract, Recovery Act replacement window projects; (a) Pisgah View: 3,000; (b) Hillcrest: 2,200; and (c) Deaverview: 1,250 for a total of 6,450 windows. (scope may increase depending on final costs after the Request for Proposals)

Results expected (EPC alone) since 2003 include (1) Guaranteed annual energy savings: (a) Electricity - 680,000 kWh, (b) Natural Gas - 180,000 therms; (c) Water- 41 million gallons; and (d) Utility Bills - $757,000; and (2) Annual Carbon Dioxide Reduction: (a) Electricity - 490 metric tons; and (b) Natural Gas - 900 metric tons. www.epa.gov/RDEE/energy-resources/ calculator. html.

On behalf of City Council, Vice-Mayor Newman thanked Mr. Nash for this informative report.

C. ECONOMIC STIMULUS PACKAGE UPDATE

RESOLUTION NO. 09-260 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ACCEPT THE AMERICAN RECOVERY AND REINVESTMENT ACT LOAN ASSISTANCE FROM THE CLEAN WATER STATE REVOLVING FUND FOR THE DINGLE CREEK STORMWATER IMPROVEMENTS

RESOLUTION NO. 09-261 - RESOLUTION AUTHORIZING THE CITY MANAGER TO AMEND THE AGREEMENT WITH THE CLEAN WATER MANAGEMENT TRUST FUND TO REDUCE THE AMOUNT FOR THE DINGLE CREEK STORMWATER IMPROVEMENTS

RESOLUTION NO. 09-262 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH BLUE RIDGE GRADING FOR THE DINGLE CREEK STORMWATER IMPROVEMENTS

RESOLUTION NO. 09-263 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ACCEPT SUBGRANTEE FUNDS VIA THE N.C. DEPT. OF ENVIRONMENT AND NATURAL RESOURCES FROM THE N.C. DIESEL EMISSIONS – ECONOMIC RECOVERY GRANT PROGRAM TO SUPPORT THE PURCHASE OF 5% BIODIESEL (B5) FUEL FOR THE MUNICIPAL FLEET FOR ONE YEAR

ORDINANCE NO. 3815 - BUDGET AMENDMENT ACCEPTING SUBGRANTEE FUNDS VIA THE N.C. DEPT. OF ENVIRONMENT AND NATURAL RESOURCES FROM THE N.C. DIESEL EMISSIONS – ECONOMIC

RECOVERY GRANT PROGRAM TO SUPPORT THE PURCHASE OF 5% BIODIESEL (B5) FUEL FOR THE MUNICIPAL FLEET FOR ONE YEAR

RESOLUTION NO. 09-264 - RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN A CONTRACT WITH LANDMARK LANDSCAPES FOR THE DOWNTOWN AND GATEWAY STREETSCAPES PROJECT

American Recovery & Reinvestment Project Manager Brenda Mills updated Council on the following applications for the economic stimulus package.

As part of City staff's recurring American Recovery & Reinvestment (ARRA) update to Asheville City Council, staff is seeking Council consideration of the following:

I. Dingle Creek Stormwater Improvements

(1) A resolution authorizing the City Manager to accept a loan offer from the Clean Water State Revolving Fund for the Dingle Creek Stormwater Project.
(2) A resolution and amendment to the agreement with the Clean Water Management Trust Fund (CWMTF) to reflect a reduce award amount.
(3) A resolution awarding the construction contract for Dingle Creek Stormwater Improvements to Blue Ridge Grading in the amount of $166,495.

II. NC Diesel Emissions - Economic Recovery (NC DEER)

(1) A resolution authorizing the City Manager to enter into an agreement with the North Carolina Department of Environment and Natural Resources to accept sub-grantee funds from the NC Diesel Emissions - Economic Recovery (NC DEER) to support the purchase of 5% biodiesel (B5) fuel for the municipal fleet for one year.
(2) Budget amendment, in the amount of $30,000, accepting sub-grantee funds from the NC DEER to support the purchase of 5% biodiesel (B5) fuel for the municipal fleet for one year.

III. Downtown and Gateway Streetscapes Project

(1) Approval of a resolution authorizing the City Manager to execute a contract with Landmark Landscapes in the amount of $82,362.86 for the Downtown and Gateway Streetscapes project, TIP # U-5174.

I. Dingle Creek Stormwater Improvements

Staff is seeking City Council consideration of three actions related to the Dingle Creek Stormwater Improvements Project. This project was previously considered and approved by the Asheville City Council. The project's goal is to improve the quality of water released into Dingle Creek by installing a stormwater wet land and providing additional capacity for water storage during a storm event. This project will also provide a much needed stream bank restoration along this reach of Dingle Creek.

State Revolving Fund Acceptance and Assurance of Repayment

Earlier this year, the City Council authorized staff to apply for ARRA funds from the Clean Water State Revolving Loan for the Dingle Creek Stormwater Improvement Project. Asheville was awarded $454,500 for this project, 50% of which was in the form of a grant with the remaining 50% in the form of a loan that must be paid over a 20 year period. A technical requirement of receiving these funds requires the governing body to accept the loan offer and assure repayment the 50% loan portion over a 20 year period through formal action. As a result, staff is seeking City Council consideration of a resolution authorizing the City Manager to accept the loan offer

and all applicable assurances.

Amendment to the Clean Water Management Trust Fund (CWMTF) Agreement

When the Asheville applied for ARRA funding for the Dingle Creek project, staff intended to use previously awarded funding from the Clean Water Management Trust Fund for Dingle Creek Stormwater Improvements to help cover a portion of the 50% loan amount. The CWMTF award was originally made in September 2008 but was subsequently held in reserve by the State as a result of its budget shortfall. Since then, those funds have been released, but the original award amount has been reduced to from $335,000 to $167,500 to align with the amount awarded to Asheville through ARRA. Since the original CWMTF award has been reduced, staff is seeking Council consideration of a resolution authorizing the city manager to amend the city's agreement with the Clean Water Management Trust Fund (CWMTF) to reflect the revised award of $167,500. The city would apply the $167,500 grant award toward the 50% loan repayment, leaving a balance of $59,750 as the city's repayment responsibility over 20 years.

Award of Dingle Creek Stormwater Improvements Construction Contract

Staff is seeking City Council consideration of a resolution authorizing the City Manager to execute a construction contract to complete the Dingle Creek Stormwater Improvements project. A formal request for bids for the Dingle Creek Stormwater Improvements project was issued on October 26, 2009, and bids were opened on November 24, 2009. The City of Asheville determined Blue Ridge Grading and its bid of $166,495 as the low responsive and responsible bid. Please note that Wright Contracting withdrew their bid in keeping with GS 143-129.1.

Blue Ridge Grading will perform the construction tasks outlined in the contract set forth by the City of Asheville pertaining to the Dingle Creek Watershed. The contractor will adhere to any guidelines in accordance to the ARRA. Said contractor will also comply with any local, state, or federal requirements related to construction activity (i.e. safety, erosion control, etc.).

Bids received for this project were:

Bidder	Address	Bid Amount
Wright Contracting	Lawndale, NC	$144,500.00*
Blue Ridge Grading	**Burnsville, NC**	**$166,495.00**
Appalachian Environmental	Sylva, NC	$203,914.00
Bryant's Land & Development	Burnsville, NC	$221,335.80
Spur Construction	Waynesville, NC	$251,812.00
Backwater Environmental	Eden, NC	$268,600.00
Taylor & Murphy	Asheville, NC	$290,625.00
Tennoca Construction Co.	Candler, NC	$244,980.00

These actions comply with goals in the City Council's Strategic Plan in the areas of Affordability, Sustainability, and Green. They will allow the city to implement an infrastructure project that supports water quality initiatives while taking advantage of State and Federal resources.

Pros:

- Approving these items will allow for completion of the Dingle Creek Stormwater Improvements Project, which will protect and enhance water quality of the French Broad River Basin by reducing runoff pollutants released into Dingle Creek.
- Approval of these items will provide significant financial support for the project.

Con:

- Coordinating these funding sources will require staff time.

The City will be responsible for repaying the ARRA loan amount not covered by the

CWMTF, which could be up to $59,750 over a 20 year period. This remaining loan amount will be repaid through the stormwater utility fund.

$454,500	Estimated Project Cost awarded by ARRA State Revolving Funds
-227,250	Less 50% State Revolving Fund Grant Amount
$227,250	50% Loan Repayment Amount
-167,500	Less CWMTF Grant Amount
$59,750	City of Asheville Loan Repayment Amount

Staff recommends: (1) City Council adopt the resolution authorizing the city manager to accept a loan offer under the American Recovery and Reinvestment Act of 2009 from the Clean Water State Revolving Fund; (2) City Council adopt the resolution authorizing the City Manager to amend the CWMTF grant agreement to reflect the award amount of $167,500, and; (3) City Council adopt the resolution authorizing the City Manager to execute a contract with Blue Ridge Grading for the services described in a contact for $166,495 and to allow the City Manager the ability to approve contingencies up to 10% of the original contract price.

II. NC Diesel Emissions- Economic Recovery (NC DEER)

The City of Asheville Fleet Maintenance Division conducted a biodiesel pilot project May 2007-August 2008. During this time, all 437 municipal diesel fleet vehicles used B5. This pilot project resulted in a decreased carbon footprint with without increasing fuel costs. The pilot project terminated in August 2008 during the fuel crisis at which point biodiesel was no longer cost competitive with standard diesel fuel. Through acceptance of this award, the municipal diesel fleet will resume using B5 for a period of one year.

This grant requires no match funding; however, the City budgeted $873,000 for yearly fuel costs to which the $30,000 grant will be added. With assistance from this grant, with City will purchase roughly half a million gallons of B5, reducing the municipal fleet carbon footprint by 223 tons or 3.7%.

This action complies with City Council's Strategic Operating Plan in the following ways: (1) it supports diversified job growth and small business development; (2) it provides leadership in buying local products and services; and (3) it achieves short term and long term energy goals to reduce city carbon emissions by 2% each year.

Pros:

- Reduce municipal fleet carbon footprint by 3.7%.
- Support the local alternative fuel economy through stimulus funding.

Con:

- Staff time will be used to implement the project.

City staff recommends City Council (1) adopt a resolution authorizing the City Manager to enter an agreement with the North Carolina Department of Environment and Natural Resources for North Carolina Diesel Emissions - Economic Recovery; and (2) adopt the budget amendment in the amount of $30,000.

III. ARRA Downtown and Gateway Streetscapes Contract

At its November 24, 2009, meeting, City Council adopted Resolution 09-251 authorizing the City Manager to execute a contract for this project with Rivertop Contracting, Inc., in the amount of $79,006. Upon further review and consultation with the N.C. Dept. of Transportation (NCDOT), it was discovered that Rivertop failed to meet the project's disadvantaged business enterprise (DBE) participation goals.

This project is federally funded and requires good faith efforts to involve registered DBEs. Rivertop Contracting represented itself on its bid as a DBE, however, the company was not registered as such with the NCDOT. As a result, its bid is considered non-responsive by NCDOT and not authorized to receive funding.

Staff is seeking City Council authorization to execute a contract for the project with the next lowest bidder, Landmark Landscapes, in the amount of $82,362.86.

Bids received on this project were:

Bidder	Address	Bid Amount
Rivertop Contracting	Black Mountain, NC	$79,006.00
Landmark Landscapes	**Arden, NC**	**$82,362.86**
Allison Landscaping	Hendersonville, NC	$141,648.00

This project supports the City Council's strategic plan goals of proactively pursing funding opportunities with state and federal economic stimulus packages and leveraging funding for regional transportation improvements.

Pro:

- Fulfills the goals of this stimulus project while meeting legal requirements

Con:

- This bid from Landmark Landscapes is $3,356.86 higher than was the non-responsive bid by Rivertop Contracting

There will be no fiscal impact to the city because the project is 100% grant-funded.

City staff recommends City Council adopt the resolution identifying the recommended lowest responsive responsible bidder and authorizing the City Manager to execute the contract with Landmark Landscapes.

When Vice-Mayor Newman asked for public comments, none were received.

Councilman Smith understood that the biodiesel provided by Blue Ridge Biodiesel is recycled vegetable oil, whereas, some of the other providers are actually shipping in virgin soybean oil from other parts of the country. Since our aim is to reduce carbon footprint, he wondered if we could stipulate that we prefer the locally produced recycled vegetable oil.

City Manager Jackson said that during this interim period between now and when the contract is up in July, staff will review the specifications with a report back to Council.

Vice-Mayor Newman said that members of Council have been previously furnished with copies of the resolutions and the ordinance and they would not be read.

Councilwoman Manheimer moved for the adoption of Resolution No. 09-260. This motion was seconded by Councilman Russell and carried unanimously.

RESOLUTION BOOK NO. 32 – PAGE 299

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO PERMANENTLY CLOSE HAMILTON CIRCLE, A PORTION OF BROOKLET STREET AND A PORTION OF HAMILTON STREET

RESOLUTION NO. 09-265 - RESOLUTION PERMANENTLY CLOSING HAMILTON CIRCLE, A PORTION OF BROOKLET STREET AND A PORTION OF HAMILTON STREET

Vice-Mayor Newman opened the public hearing at 6:00 p.m.

Interim Assistant Director of Public Works David Foster said that this is the consideration of a resolution permanently closing Hamilton Circle, a portion of Brooklet Street and a portion of Hamilton Street (sometimes known as Hamilton Loop, Old Victoria Road and Victoria Circle). This public hearing was advertised on November 13, 20, 27 and December 4, 2009.

N. C. Gen. Stat. sec 160A-299 grants cities the authority to permanently close streets and alleys.

Pursuant to this statute, the adjoining property owner's, Memorial Mission Hospital, Inc., Mission Health System, Inc., and CHSA Building Partnership have requested the City of Asheville to permanently close Hamilton Circle, a portion of Brooklet Street and a portion of Hamilton Street.

The Greenway Commission reviewed these proposed closures at their meeting on November 12, 2009, and supported the closures, provided the bike lanes are installed on Victoria Road per the Comprehensive Bicycle Plan. The City Traffic Engineer has worked with Mission's engineer to develop a plan to add bike lanes to Victoria Road as well as the new proposed roadway.

Regarding the City Council Strategic Operating Plan, this closure allows maximum land use potential for further development complying with the Asheville City Development Plan, Land Use.

Pros:

- There will be no future compromise of ingress/egress to other property
- The closure would allow for more efficient use of the existing adjacent properties.

Con:

- In consideration of the location of the closures and the proposed street realignment, staff can find no potential challenges.

There will be no fiscal impact related to this closure.

City staff recommends City Council adopt the resolution to permanently close Hamilton Circle, a portion of Brooklet Street and a portion of Hamilton Street.

Mr. True Morse, Director of Facility Planning for Mission Health System, explained that there is a bigger picture involved for this area – a project for cancer care in western North Carolina. He showed Council a picture of the Master Plan for the campus. The road project is to widen and actually straighten Victoria Road. They have asked for the name of Hospital Drive to be reserved and it will connect into McDowell. He noted that Hamilton Street is not actually closing, but closing for public use. In their design it will still be open, but privately maintained. He explained the need for the road closures, especially as it relates to their ability to provide proper public access to the health care campus. The closing will also set the stage for the ability to implement future projects. He explained how they have worked closely with the N.C. Dept. of Transportation, the City of Asheville, A-B Technical Community College and Asheville City Schools. He asked for Council's support of these closures.

Mr. Bill Roark, civil engineer for the project and road closures, said showed Council the existing conditions and proposed plans. He explained that since this is such an important corridor, their plan is to maintain access levels that are comparable to what is there today. They have met with the Greenway Commission and City staff and their project will include bicycle lanes on Hospital Drive and Victoria Road, along with sidewalks on both sides.

The following individuals spoke in support of the road closings:

Mr. Brian Moffitt, representing the Aycocks, who own properties on Victoria Road
Ms. Claudia Nix, representing the Bike Pedestrian Task Force
Mr. Charlie Glazener, representing Asheville City Schools
Mr. Dick Mauney, representing A-B Technical Community College
Mr. Mike Soule, representing Asheville on Bikes

City Attorney Oast explained the voting procedures due to Mayor Bellamy's absence.

Councilwoman Manheimer commended Mission Hospital for communicating with the various groups. She hoped that this cooperation will be precedent-setting when we implement the Bicycle Master Plan to have all interests and concerns met.

Vice-Mayor Newman closed the public hearing at 6:13 p.m.

Vice-Mayor Newman said that members of Council have previously received a copy of the resolution and it would not be read.

Councilwoman Manheimer moved for the adoption of Resolution No. 09-265. This motion was seconded by Councilman Russell and carried unanimously.

RESOLUTION BOOK NO. 32 – PAGE 300

B. PUBLIC HEARING TO CONSIDER AMENDING THE UNIFIED DEVELOPMENT ORDINANCE REGARDING CHANGES TO THE SIDEWALK ORDINANCE

ORDINANCE NO. 3816- ORDINANCE AMENDING CHAPTER 7 OF THE CODE OF ORDINANCES REGARDING CHANGES TO THE SIDEWALK ORDINANCE

RESOLUTION NO. 09-266 – RESOLUTION AMENDING THE FEES AND CHARGES MANUAL TO ALLOW DEVELOPERS ELIGIBLE FOR THE FEE-IN-LIEU OF CONSTRUCTION TO PAY 50% OF THE FEE IF SIDEWALK IS ONLY REQUIRED ON ONE SIDE OF THE STREET

Vice-Mayor Newman opened the public hearing at 6:16 p.m.

Public Works Director Cathy Ball said that this is the consideration of (1) an amendment to the Unified Development Ordinance (Section 7-11-8) pertaining to the sidewalk ordinance; and (2) a resolution amending the Fees and Charges Manual to allow developers eligible for the fee-in-lieu of construction to pay 50% of the fee if sidewalk is only required on one side of the street.

Staff recently conducted a review of the sidewalk ordinance given the recent economic conditions. Based on this review staff would recommend the following changes to Section 7-11-8 of the Unified Development Ordinance. These changes are intended to address some clerical/housekeeping changes in addition to three issues:

1. Consolidate the geographical areas where the fee-in-lieu of construction funds can be spent.
2. Allow developers eligible for the fee-in-lieu of construction to pay 50% of the fee if sidewalk is only required on one side of the street.
3. Provide the ability for the fee-in-lieu of construction amount not to exceed 15% of construction costs even if the sidewalk is shown as a needed linkage on the Pedestrian Thoroughfare Plan.

She reviewed when sidewalks on both sides of the street are required.

This action complies with the City Council Strategic Operating Plan of sustainability by reforming and streamlining the development review process.

The requested change was presented to the Planning and Economic Development Committee (PED) at their July 2009 meeting. The PED Committee unanimously recommended that these recommendations move forward to the Planning and Zoning Commission and City Council. The Planning and Zoning Commission unanimously supported the recommended changes.

Pros:

- Allows more flexibility in where the City can spend fee-in-lieu of construction funds by combining the existing two areas into one.
- Allows developers to pay a fair amount in fee-in-lieu of construction when sidewalk is only required on one side of the street.
- Prevents the fee-in-lieu of construction fee from stopping the feasibility of a project and allows for fairer assessment of smaller impact projects.

Con:

- Potentially reduces amount of money that can be spent to build sidewalks in the fee-in-lieu of construction account.

These changes could potentially reduce amount of money that can be spent to build sidewalks in the fee-in-lieu of construction account. Staff is not able to accurately estimate the impact at this time.

Ms. Ball noted that the effective date of the ordinance will be immediately, not January 6, 2010, as the ordinance currently before Council reads.

Staff requests that City Council (1) amend the Unified Development Ordinance (Section 7-11-8) pertaining to sidewalks; and (2) adopt a resolution amending the Fees and Charges Manual to allow developers eligible for the fee-in-lieu of construction to pay 50% of the fee if sidewalk is only required on one side of the street.

Ms. Claudia Nix, representing the Bicycle Pedestrian Task Force, noted that the cost for sidewalks is low now but was concerned about what happens when the cost goes back up. She felt we are cutting the potential growth of the funds.

Mr. Alan Ditmore felt that sidewalks increase the price of housing and that would be a detriment to the affordability of a house.

Mr. Chris Pelly, President of the Haw Creek Community Association, noted that they have worked with the City for many years to bring sidewalks to their community. He questioned if this amendment would stay in place or go back as the economic climate improves. Ms. Ball responded by saying that we are not changing the dollar amount on how much they pay per linear foot, just the percentage that they pay.

Vice-Mayor Newman closed the public hearing at 6:28 p.m.

Throughout discussion, Ms. Ball responded to various comments/questions from Council, some being, but are not limited to: a brief explanation of how the fee-in-lieu of requirement is applied; what was the rationale behind the 50% cost and would 75% still be an incentive; what was the rationale behind the cap of 15% of the construction costs; how are the sites for sidewalks prioritized when using the fee-in-lieu of funds; does the City take over the maintenance of the sidewalks that lead to nowhere; and what percentage of the fee-in-lieu funds make up the total sidewalk fund.

City Manager Jackson explained that with this incentive we are trying to increase the pool of funds to close gaps in the system, e.g., sidewalks closer to the Central Business District and in those networks that serve the schools. That is why we are really interested in gaining more payments in-lieu-of because under this current formula it's cheaper for a developer to put a sidewalk in rather than pay a fee-in-lieu of.

Councilman Bothwell understood the idea of helping people out in economic bad times; however, if we use that as a criteria to make decisions, we put ourselves into a position on who benefits and who doesn't, noting that we don't give our residents a tax cut during these economic times.

In response to Councilman Smith, City Manager Jackson said that staff will be coming to Council for a review of the different transportation plans as staff sees a need to tie all those plans together in order to move people in a multi-modal fashion.

Councilman Russell said that there are places in Asheville where the property owner has been required to build a sidewalk 300 feet and no one uses it. He felt this amendment will be a win/win in that we will take half that money and build 150 feet of sidewalk to connect to a school, etc. He felt this is a step in the right direction.

When Councilwoman Manheimer felt it would be beneficial to have a red-lined copy of the ordinance showing changes made, Ms. Ball apologized for that omission and walked the Council through the changes in the ordinance.

Councilwoman Manheimer felt that this amendment is economically driven. Since the cost to build sidewalks is cheap now and where developers that have the option, most will make a bottom-line number crunch and build the sidewalk. She did think that the incentive will be a motivating factor. Since Asheville has a priority of working on the sidewalk problem, she is concerned that a vote in support of this may be a step backwards. She sees the good intentions, but hoped that we watch this carefully since we have a meager sum for sidewalks. To just consider the issue of a sidewalk where development is going in is not the reality of it. When you grow a city's overall population and put in more infrastructure, you are creating an overall increase demand for sidewalks and pedestrian areas. She felt we need to think about this more globally in terms of an overall impact to our city. To her, if this is a positive move and does incentivize people to pay into this fund, then we have done a good thing. She would have liked to seen data from other communities that have done this and see their results.

Vice-Mayor Newman felt that the value of getting sidewalks in key places where we need them is more important than getting them where development is happening.

Councilman Smith felt it would be beneficial for Council to receive a report in 12 months to see if the reality matches the theory.

Vice-Mayor Newman said that members of Council have previously received a copy of the ordinance and resolution and they would not be read.

Councilman Russell moved for the adoption of Ordinance No. 3816 with a 12-month review. This motion was seconded by Councilman Davis and carried unanimously.

ORDINANCE BOOK NO. 26 – PAGE 7

Councilman Russell moved for the adoption of Resolution No. 09-266. This motion was seconded by Councilman Bothwell and carried unanimously.

RESOLUTION BOOK NO. 32 – PAGE 302

V. UNFINISHED BUSINESS:

A. RESOLUTION NO. 09-267 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH H & M CONSTRUCTORS FOR THE CONSTRUCTION OF THE RECREATION CENTER AT LIVINGSTON STREET PARK

ORDINANCE NO. 3817 - BUDGET AMENDMENT TO INCREASE THE BUDGET TO SUPPORT THE CONSTRUCTION OF THE RECREATION CENTER AT LIVINGSTON STREET PARK

At the request of Councilwoman Manheimer and upon concurrence of City Attorney Oast, Councilman Russell moved to excuse Councilwoman Manheimer from participating in these actions due to a conflict of interest (firm Councilwoman Manheimer is a partner in represents two companies that participated in this bid process). This motion was seconded by Councilman Davis and carried unanimously. At this time, Councilwoman Manheimer left the Council Chamber.

City Attorney Oast then explained the voting procedures which must be met due to the absence of Mayor Bellamy and the excuse of Councilwoman Manheimer.

Parks, Recreation and Cultural Arts Director Roderick Simmons said that this is the consideration of a resolution authorizing the City Manager to 1) enter into a contract with H & M Constructors for the construction of the Recreation Center at Livingston Street Park for an amount not to exceed $1,954,000, and 2) approve a budget amendment in the amount of $1.83 million to increase the budget to support the construction of the center.

On October 13, 2009, City Council approved a financing plan to support the initial phase of construction for the Recreation Center at Livingston Street Park. Thereafter staff followed the procedure for contracts over $500,000 and issued a request for proposals to construct the project. The lowest, responsive, responsible bid is H & M Constructors for a cost of $1,954,000.

Staff determined H & M Constructors located at 187 Deaverview Road in Asheville is the lowest, responsive, responsible bidder for the project. This determination included assessing the bidder's qualifications in terms of general and specific project performance, and LEED construction experience since these skills are critical to a successful project of this unique design requirement. The evaluation team comprised of staff and the project architect deemed H & M Constructors responsible for this work due to the following qualities:

- Project Manager and Site Superintendents have managed LEED certified projects
- The LEED Accredited Professional had managed three LEED certified projects
- Their prime sub-contractors have worked on a number of LEED certified projects and geo-thermal projects

This construction contract action complies with (1) the City Council Strategic Operating Goal in that it pertains to the Green Focus Area via reduced energy consumption, and it fulfills the Sustainable Focus Area goal to address the city's aging infrastructure; (2) the Sustainability Management Plan in the Facilities Focus Area to support the City Council Resolution 07-91 for LEED certification for new City building. The center is over 5,000 square feet and will be constructed to the "gold" LEED standard which will provide an energy savings pay back period of not greater than 10 years. Construction of the recreation center will be the City's first new construction built to the LEED "gold" standard; and (3) the Parks, Recreation, Cultural Arts and Greenway Master Plan in that 1) the recreation center as the most priority capital project to fund and implement, and 2) ensures a continued high level of service in the City's park system.

The portion of the budget amendment in grants and donations complies with the Parks, Recreation, Cultural Arts & Greenways Master Plan in that it increases department funding with alternative funding.

Pros:

- Greatly enhances the City's ability to provide unique, vital and community based recreation services via this first phase of development at a site with more expansion potential
- The new location enhances the facility's linkage to the neighborhoods in the future via the Town Branch Greenway whose first phase is under construction
- The new facility will be a landmark structure that serves several the nearby neighborhoods
- The facility will meet the "gold" LEED standards and the first municipal construction to meet the standard

Cons:

- The project will require a substantial financial investment by the City beyond grants and donations
- Future construction phase(s) will be needed to meet the remaining programming needs as identified by the community

The WC Reid Center Capital Project currently has an authorized project budget of **$600,000.** Approximately $467,000 of this budget has already been spent or committed to be spent for design-related services, including the development of a site master plan and associated construction documents. A balance of approximately $133,000 remains in the project budget that can be used for construction costs.

In conjunction with the award of the construction contract, an amendment to the project budget in the amount of **$1.83 million** is needed to cover construction costs. A portion of this amendment is supported by $737,982 in grants and donations revenue raised from various sources since 2006. The remaining portion of the amendment will be supported by $1.09 million in installment purchase proceeds that will be secured through a private bank loan. Approval of the budget amendment, plus the $133,000 remaining balance of funds from the original $600,000 project budget, will provide approximately **$1.96** in construction funds. The total project budget for the Reid Center will now be $2.43 million.

The estimated financial impact of the $1.09 million bank loan is to increase the city's annual debt service expenses by approximately $110,000 per year. This is based on a financing term of 15 years and a conservative interest rate of 6%. Due to timing issues related to issuing the debt, the City is only likely to incur a half a year's debt service payment in the current year, which would reduce the Fiscal Year 2009-10 financial impact to $55,000.

Staff recommends City Council 1) authorize the City Manager to enter into a contract with H & M Constructors not to exceed $1,954,000 for the construction of the Recreation Center at Livingston Street Park, and 2) approve the budget amendment authorizing the City Manager to increase the budget for center construction by $1.83 million.

Councilman Russell said that he originally supported this project but unfortunately withdrew his support due to the grant funding withdrawal and the cost escalating. The project was originally $7-8 Million then trimmed down to $1.2 Million with $500,000 of City funds (which he supported). But now the project is back up to $2.5 Million, with $1.6 Million coming from the City. He did not think the City could afford the project at this time.

Mr. Alan Ditmore felt that given our economy he didn't think Council will have enough funds to achieve their top four goals, noting that there will also be emergency priorities that will need to be met.

The following individuals spoke in support of moving forward with the construction of the Recreation Center at Livingston Street Park for various reasons, some being, but are not limited to: the community has worked on this for several years; the current building is beyond repair; the current building is old and is not maintained (broken windows, no air conditioning, constant heat, disrepair kitchen, wasted space); this is a needed safe haven for our youth; request that people who live in that community have the opportunity to be employed to work the Reid Center; if youth in the area were employed to work on the Reid Center it would be a wonderful training opportunity; as development occurs throughout the City, no community should be left behind in redevelopment; other community centers are not as utilized as much as the Reid Center; the center has brought positive structure for the youth; and the center is a place where the youth go to escape their hardships and is a safe haven with adult supervision:

Ms. Mildred Nance Carson, Chairman of the Advisory Board at the W.C. Reid Center
Mr. Dwayne Barton
Mr. Bill Rhodes, current user of the facility
Six youth from Getting Back to the Basics Program

Vice-Mayor Newman closed the public hearing at 7:10 p.m.

Councilman Davis recognized the need for the center and noted that the new center will be a classroom complex. The gym part of the project is not in Phase I and if the new center is constructed, the City will have the expense of maintaining the new center, along with the existing center for the gym. Before Phase II is considered, he supported selling the existing building and using that money to fund subsequent phase. With that in mind, he felt he could support moving forward.

Vice-Mayor Newman felt that there has been a lot of work into this project and perhaps we could have built a building with a lower price tag, but we have over $700,000 in private funding that will be lost if we do not move forward on this project by the end of the year.

In response to Councilman Smith, Mr. Simmons said that the Reid Center serves 300-350 youth a day. He said that there are 20-25 youth in the After-School Program and the rest are youth that come there to have a safe place to go. He said that in that neighborhood there are roughly 3-4,000 children.

Councilman Smith said that the annual debt service of $110,000 for 300 kids that are off the streets and are safe, is about $350 per kid per year and that sounds like money well spent. As far as the project has come, he felt we have an obligation to keep it moving forward. He wondered how we can bring those kids in to be a part of the sustainability measure so they can have work training and feel a part of what we are trying to do as a City with moving forward with the green initiatives and the sustainability initiatives that we have. He also hoped that people at the Reid Center who have worked hard on this for years will continue to work hard to bring in grant monies.

Councilman Bothwell noted that the 300-350 kids served at the Reid Center will not be served at this new facility directly because the new facility isn't fulfilling the gym function. He agreed that the heating system in the existing building does need to be repaired and there are other repairs that need to be done as well because that building will be continue to be used.

In response to Councilman Bothwell, City Manager Jackson said that we do have in writing from the private donors that their funds will be withdrawn if construction does not begin by the end of 2009.

Vice-Mayor Newman agreed that for some time we will be managing two facilities and that is not attractive from an operational or capital expenditure standpoint. However, in the alternative we would have to spend so much money to upgrade the existing facility and still not have the facility that we want. If we commit to do Phase II there will probably be some positive economic value.

Vice-Mayor Newman said that members of Council have been previously furnished with copies of the resolution and ordinance and they would not be read.

Councilman Davis moved for the adoption of the Resolution No. 09-267. This motion was seconded by Councilman Smith and carried on a 4-1 vote with Councilman Russell voting "no" (Councilwoman Manheimer being excused from voting).

RESOLUTION BOOK NO. 32 – PAGE 303

Councilman Davis moved for the adoption of Ordinance No. 3817. This motion was seconded by Councilman Smith and carried on a 4-1 vote with Councilman Russell voting "no" (with Councilwoman Manheimer being excused from voting).

ORDINANCE BOOK NO. 26 – PAGE 11

At 7:25 p.m., Vice-Mayor Newman announced a short recess.

At this time, Councilwoman Manheimer came back into the Council Chamber.

B. REQUEST FROM THE BUNCOMBE COUNTY TOURISM DEVELOPMENT AUTHORITY TO WAIVE STREET CLOSURE PERMITS AND STREET CUT PERMITS ASSOCIATED WITH THE INSTALLATION OF THE WAYFINDING PROJECT

Transportation Planner Dan Baechtold said that this is the consideration of a request from the Buncombe County Tourism Development Authority (BCTDA) for a waiver of permit fees associated with the installation of the wayfinding signs.

Per City Council's direction, staff has been working with area partners for the past three years on a comprehensive wayfinding and signage program for Asheville and Buncombe County. The project is in the implementation phase, which includes the installation of pedestrian level signs, informational kiosks, and directional and destination signs within Buncombe County, of which the majority are in the City of Asheville. City-owned facilities such as parks, parking decks, and the Civic Center are included in the project.

The installation process for wayfinding signs requires Street Closure Permits and Street Cut Permits from the City of Asheville. Because the project has been a partnership between the City and the BCTDA, the BCTDA has asked for a waiver of the fees associated with these permits. This could result in as much as $10,000 in savings to the project.

The following is some background information:

- In 2006, the City joined with the Convention and Visitors Bureau, the Towns of Weaverville, Woodfin, and Black Mountain, and Buncombe County to form the Partnership on Wayfinding.
- The partners jointly funded the development of the Wayfinding Master Plan.
- Through a public input process, designs were selected that included pedestrian level signs and kiosks, vehicular signs, and gateway signs.
- In December 2007 Buncombe County Tourism Development Authority approved funding for construction of the wayfinding system in the amount of $1.65 million.
- In September of 2008 City Council adopted the Wayfinding Master Plan, and approved an interlocal agreement to cover the ongoing maintenance of the wayfinding signs.

Pros:

- Supports a successful regional partnership
- Makes a relatively small contribution to a project investing $1.65 million in the City.
- Allows Wayfinding funds to be invested in infrastructure instead of administrative costs.

Con:

- Processing the permits requires staff time, which will not be covered if the fees are waived.

This action complies with the City Council Strategic Operating Plan as the wayfinding program aims to address several identified City Council goals: 1) improving signage into and out of City facilities; 2) providing information kiosks in the downtown; 3) removing sign clutter and obsolete signage; 4) improving directional signage for residents and visitors.

Granting the fee waiver request would be a loss of potential revenue for the General Fund up to as much as $10,000. The waiver would be a savings, however, to a project to which the City is a primary partner. The City's budgeted contribution toward this project totals

$107,240, which is included in the Parking Services Capital Fund. The BCTDA is contributing the majority of the capital funds toward a project that benefits the City.

City staff requests City Council consider a motion to waive permit fees associated with the installation of the wayfinding signs.

In response to Councilman Bothwell, Mr. Baechtold said that the total project is approximately $1.8 Million and the City's portion is $107,240.

Councilman Russell moved to waive the street closure permits and street cut permits associated with the installation of the Wayfinding Project. This motion was seconded by Councilman Davis and carried unanimously.

VI. NEW BUSINESS:

A. RESOLUTION NO. 09-268 - RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN A CONSTRUCTION CONTRACT WITH CAROLINA SPECIALTIES CONSTRUCTION LLC FOR THE WILLIAM DEBRUHL WATER TREATMENT PLANT BACKWASH LAGOON PROJECT AND A CHANGE ORDER INCREASING BROWN AND CALDWELL'S AGREEMENT FOR ENGINEERING SERVICES FOR SAID PROJECT

ORDINANCE NO. 3818 - BUDGET AMENDMENT FOR FUNDING OF THE CONSTRUCTION CONTRACT WITH CAROLINA SPECIALTIES CONSTRUCTION LLC AND BROWN AND CALDWELL'S CONSTRUCTION ADMINISTRATION AND ENGINEERING COSTS

When Councilwoman Manheimer disclosed that Carolina Specialties Construction has been, but is not currently, a client of her law firm, City Attorney Oast felt that this does not rise to the level of a disqualifying conflict of interest for Councilwoman Manheimer.

Water Resources Director Steve Shoaf said that this is the consideration of a resolution authorizing the City Manager to (1) sign a construction contract with Carolina Specialties Construction, LLC in the amount of $405,874.35 for the William DeBruhl Water Treatment Plant (WTP) Backwash Lagoon Project; and (2) sign a change order increasing Brown and Caldwell's agreement for engineering services to $107,766 for said project; and adopt a budget amendment, in the amount of $93,410, for funding of the construction contract with Carolina Specialties Construction, LLC ($34,732), and Brown and Caldwell's construction administration and engineering costs ($58,878).

When the filters are cleaned during the water treatment process, the dirty water is discharged into a holding pond, or backwash lagoon. The N.C. Dept. of Environment and Natural Resources (NCDENR) has declared the backwash lagoon at the William DeBruhl Water Treatment Plant in a state of disrepair and in need of replacement in the current fiscal year. The Water Resources Department (WRD) issued an Advertisement for Bids for the furnishing of labor, materials, equipment, incidentals, site work, piping, structures, erosion/sediment control, and demolition for the construction of the 500,000 gallon backwash holding lagoon at the William DeBruhl WTP. In response to that Advertisement for Bids, the WRD received six (6) bids.

Companies responding were:

- Bryant's Land and Development Industries, Inc. – Burnsville, NC
  Total Base Bid: $453,480.50

- Carolina Specialties Construction, LLC – Hendersonville, NC
  Total Base Bid: $405,874.35

- MacKenzie Company – Asheville, NC
  Total Base Bid: $473,106.70

- Patton Construction Group – Arden, NC
  Total Base Bid: $477,000.00

- Spur Construction – Waynesville, NC
  Total Base Bid: $563,690.05

- Turner Murphy Company, Inc. – Rock Hill, SC
  Total Base Bid: $609,919.81

A review team, comprised of staff from multiple City departments including James Lee, the City of Asheville Minority Business Coordinator, reviewed these bids and selected Carolina Specialties Construction, LLC as the lowest responsible bidder at a bid of $405,874.35.

In addition, Brown and Caldwell was originally hired by the City through a competitive process to provide the Design, Permitting, Bidding, and Construction Services for said project in the amount of $49,088. The initial contract dated June 5, 2009, provided for the Design, Permitting, and Bidding services only. The Change Order in the amount of $58,678 will allow Brown and Caldwell to perform Construction Services, which will include a preconstruction meeting, inspections, record drawings, and other construction-related tasks. With the change order, the total agreement amount with Brown and Caldwell will be $107,766.

This project is part of City Council's Strategic Operating Plan to improve city infrastructure and provide local companies with labor opportunities.

Pros:
- Approval of the construction contract and engineering change order will allow the City to move forward with the project in the current fiscal year in order to ensure compliance with applicable state/federal laws.
- Approval of the construction contract to the lowest responsible bidder will invest City funds in the local economy.
- This project will result in improved infrastructure.

Con:
- Failure to award a construction contract and engineering change order may delay the project beyond the current fiscal year, which may result in fines from NCDENR for being out of compliance with applicable state/federal laws.

A majority of the funding needed for this project is available in the project budget ($371,143). The remaining funds needed for this project ($93,410) will be reallocated from the Allen Mountain Tank (serving the Town of Black Mountain) upgrade project that will receive replacement funding in a future fiscal year.

City staff recommends City Council approval of the City Manager (1) to sign a construction contract with Carolina Specialties Construction, LLC in the amount of $405,874.35 for the William DeBruhl Water Treatment Plant Backwash Lagoon Project and (2) to sign a change order increasing Brown and Caldwell's agreement for engineering services to $107,766 for said project; and (3) adopt a budget amendment, in the amount of $93,410 for funding of the construction contract with Carolina Specialties Construction, LLC ($34,732), and Brown and Caldwell's construction administration and engineering costs ($58,878).

When Councilman Smith asked if there anyway to alter the permitting of this site to reflect the actual volume that is being treated there, Mr. Shoaf said that we are not close to the

threshold. The issue is if we re-rate the plant down to what we actually doing now, it will handicap us in terms of future water treatment capacity. The prudent thing to do is to retain that capacity. The Bee Tree Reservoir came on line as an additional source of water and we found that we do need it during drought periods. In 2007, which was a very severe drought year, we needed to run the plant at full capacity. We do have a Drought Management Plan and the Bee Tree Plant is written into that Plan.

When Vice-Mayor Newman asked for public comments, none were received.

Vice-Mayor Newman said that members of Council have been previously furnished with a copy of the resolution and ordinance and they would not be read.

Councilman Russell moved for the adoption of Resolution No. 09-268. This motion was seconded by Councilwoman Manheimer and carried unanimously.

RESOLUTION BOOK NO. 32 – PAGE 305

Councilman Russell moved for the adoption of Ordinance No. 3818. This motion was seconded by Councilwoman Manheimer and carried unanimously.

ORDINANCE BOOK NO. 26 – PAGE 13

B. STATUS ON MASTERS PARK PLAN

City Manager Jackson said that the December 15, 2009, agenda includes an item at the request of Mayor Bellamy to consider policy issues related to the Masters Park.

On November 27, 2007, City Council approved the acquisition of the Masters Park in partnership with private donors, State of North Carolina, Buncombe County and the Haw Creek Community Association. The acquisition occurred on October 20, 2008.

Since the acquisition, City staff from multiple departments have collaborated in developing an action plan to perform environmental assessments in-house and enable park development to begin.

On November 5, 2009, in response to an e-mail from Mr. Chris Pelly to Mayor Bellamy, staff provided the following timeline for the environmental assessments and park design work:

- Task 1 – Field Site Visit – November 2009
- Task 2 – Preliminary Design – December 2009
- Task 3 – Review/Comment on Design – January/February 2010
- Task 4 – Final Design – April/May 2010

Upon completion of the design, the Haw Creek Community Association may undertake clearing of trails and the parking area.

Councilman Russell felt this was a great collaboration of the City and the Haw Creek Community Association.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

The following claims were received by the City of Asheville during the period of November 13-25, 2009: Cecilia Johnson (Sanitation), Crystal Snyder (Transit), B&B Pharmacy (Police), Linda J. Kush (Streets), Mary Trauner (Sanitation), Lewis Blodgett III (Transit), Amber Moran (Water) and Matt Lillibridge (Water). These claims have been referred to Asheville Claims Corporation for investigation.

Mr. Alan Ditmore supported domestic partner benefits.

VIII. ADJOURNMENT:

Vice-Mayor Newman adjourned the meeting at 8:05 p.m.

Magdalena Burleson
CITY CLERK

MAYOR

Friday – January 8, 2010 - 11:00 a.m.
Saturday – January 9, 2010 – 9:00 a.m.
Warren Wilson College
Gladfelter Building – Canon Lounge

City Council Annual Retreat

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Brownie W. Newman; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilwoman Esther E. Manheimer; Councilman William A. Russell Jr.; Councilman Gordon D. Smith; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Mayor Bellamy convened the meeting and welcomed everyone to the annual City Council retreat. She asked all present to introduce themselves and say one thing they are grateful for. She then explained her goal of the retreat is to have a shared vision for the City of Asheville.

Mayor Bellamy then introduced Ms. Margo Flood, Director of the Environmental Leadership Center of Warren Wilson College, and briefly outlined the successful national model of partnership between the City of Asheville and Warren Wilson College. She thanked Ms. Flood for hosting City Council's retreat.

On behalf of the President of Warren Wilson College, Ms. Flood welcomed City Council to the Warren Wilson College Campus and explained their shared vision of sustainability. She then outlined the many areas of partnership between Warren Wilson College and the City of Asheville.

Mayor Bellamy then introduced Ms. Margaret Henderson, facilitator with the School of Government. Ms. Henderson reviewed the ground rules for effective groups; asked each Council member (and Mayor Bellamy asked City staff) what they hoped to gain from the retreat and what they have to contribute to the success of working together; and what reputation or legacy does Council hope to collectively create for the benefit of Asheville now and in 2020. Assessing the internal and external circumstances, at Ms. Henderson's request, Council members stated their thoughts about circumstances in the City and circumstances outside the City but with local impact.

Setting Goals for 2010-11

Mayor Bellamy noted that the strategic goal-setting process will be for the period of July 1, 2010, through June 30, 2011, as the City is currently working on the 2009-10 Strategic Goals. She explained that after Council identifies their 2010-11 strategic goals, City staff will wordsmith the goals and bring the individual focus areas back to Council for their approval, and then Council will adopt their entire 2010-11 Strategic Goals. Council agreed to this process and reaffirmed the existing 2009-10 goals.

Councilman Davis provided Council members with the following list of items he would like addressed: (1) Downtown Issues (A) continue implementation of Downtown Master Plan; (B) accelerate discussion of Business Improvement District; (C) cleanliness, educate property owners of their responsibility, City lead the way; (D) parking, sooner than later evaluation of fee structure – on-street parking suffering, back-up in garages with new equipment; (E) Pack Square Park fee structure, push backs from users; and (F) homelessness (i) A-HOPE; and (ii) western gateway corridor; (2) Civic Center Issues (recognizing budget constraints, be accomplished utilizing the Civic Center Commission working with staff and Council (A) continue improvement of image (i) actively promote the number and quality of events, the success stories; (ii) track economic impact – overnight stays, zip codes of patrons, restaurant impact; and (iii) promote small subsidy to

taxpayers; (B) improvement of facility (i) cleanliness; (ii) customer experience, (iii) opportunity to use residual of actual revenue below budget for capital improvement; and (iv) Sports Commission; and (C) Southern Conference bid (opportunity to partner with Tourism Development Authority); (3) Continue support of Riverfront Redevelopment Commission; (4) Stormwater Utility (A) understanding of revenue generated; and (B) accomplishments. Action items include (1) Azalea Park Road paving; (2) Continue active partnership with UNC-Asheville, Chamber of Commerce, Buncombe County, Asheville Tourists Baseball and City to recruit, coordinate and leverage athletic and recreational events sharing venues and assets promoting economic development ultimately leading to a Sports Commission; (3) Successful bid for the Southern Conference Men's and Women's Basketball Tournament for 2012-15; (4) Big South Lady's Basketball Tournament bid; and (5) Trash receptacles in western gateway corridor.

Throughout considerable discussion by Council, the following goals were grouped into the five focus areas: Affordable, Fiscal Responsibility, Green/Sustainable, Safe, and Job Growth/Community Development.

Affordable

- Transit oriented affordable housing
- Hold the line on taxes and support efforts to look at tax and fee relief
- Support diversified job growth and small business development
- Support the Housing Authority to develop a comprehensive plan for public housing; continue to pursue redevelopment of public housing with a HOPE IV-type project
- Support initiatives to end homelessness in Asheville
- Continue support of Housing Trust Fund
- Eagle-Market Street Redevelopment – Support progress and momentum in Mt. Zion Property
- Explore opportunities to enhance affordability through reducing utility costs and energy efficiency programs (public facilities and community and private properties)
- Implement reforms to Unified Development Ordinance that will enhance affordable housing as outlined in the Affordable Housing Plan
- Affordable transportation options; align with affordable housing development
- Small business support revisions through reduction in taxes, fees, restrictive regulations (e.g., sign regulations)
- Improve frequency of transit on major corridor service
- Restructure water rates to encourage conservation, affordability for residential user
- What will City's policy on affordable housing be? Look at zoning in key corridors to encourage affordable housing, e.g. public support for affordable developments via public/private partnerships. Creative financing to incent the type of development Council wants to see
- City support of non-profits that develop affordable housing
- Continue support for HOPE VI-type projects
- Continue to support initiatives to end homelessness with emphasis on Housing First philosophy and related strategies
- Balance affordability goals with fiscal responsibility
- Provide free bus passes to individuals who receive sources at A-HOPE
- Explore Bus Pass Program to enhance affordability
- City staff directed to capture language about broad support for affordable housing.
- Ensure stormwater program effectiveness and value for fees charged
- Better communicate/understand the stormwater utility revenue and how it is used and invested in community; review policy direction of utility and Capital Improvement Plan
- Ensure appropriate utility rates

Fiscal Responsibility

- Maintain balanced budget and review Fund Balance levels/policy
- Review revenue streams and reliability
- Discuss financing of capital improvements and infrastructure with City and through partnerships
- Explore funding opportunities through county partnership
- **Combine** - Attract and retain quality employees with an emphasis on local labor pool development opportunities **AND** Ensure operational effectiveness by paying sound wages and benefits
- **Combine** - Ensure financial accountability by matching resources with strategic initiatives and creating meaningful performance measures **AND** Filter City Council's strategic planning through the probability of a near-term economic turndown **AND** Operate the City of Asheville's organization to the highest fiscal responsibility
- Sustain a healthy Fund Balance in accordance with recommended State standards
- Leverage internal and external partnerships for Capital Improvement Projects and infrastructure improvements; think creatively about City property (Mayor Bellamy used a PowerPoint presentation to point out several different partnership opportunities)
- Form subcommittee to review Master Plans and interdependencies
- Explore feasibility of bond program now or in future years; get information about financial options outside of property tax increase
- Implement ways to reduce City-wide solid waste
- Efficiencies in Master Plan implementation
- Proactively pursue funding opportunities with state and federal economic stimulus packages
- Review cost recovery for sewer line improvements
- Review utility billing cycle and methods (Finance Committee)

Green/Sustainable

- Work with regional partners to create incentives for green building, energy conservation and energy independence
- Expand community education programs to attract volunteers to initiatives, including climate awareness, water conservation, recycling, stormwater, and sustainability
- Take sustainability program/energy reduction goal to the next level (4% minimum – how do we get there)
- Set a community energy/energy efficiency reduction goal
- Integrate and implement a multi-modal transportation plan including sidewalks, bike paths, signal preemption, transit, greenways, and other system improvements resulting in a funding priority list
- Work cooperatively with state and county elected officials to enable the city to implement practical water system management and voluntary annexation policies

Job Growth/Community Development

- Provide leadership in buying local products and services
- Increase downtown cleanliness and beautification efforts
- Support the riverfront redevelopment partnership and dedicated office
- Complete the Downtown Master Plan process and begin implementation of the Plan
- Expand partnerships with UNC-Asheville, A-B Tech, Mars Hill College and other institutions to achieve common goals, including health and wellness, workforce development, and sustainable economic development

- Partner in regional economic development strategies, including the HUB; continue partnership in the Economic Development Coalition
- Enhance diversity throughout the City as an organization so that the workforce more closely resembles the community, especially in the area of public safety
- Pursue models for re-formatting the Unified Development Ordinance
- Promote sustainable, high-density, infill growth that make efficient use of existing resources

Safe

- Make Asheville the safest city in America based on approved metrics for similarly sized cities (City staff directed to look at survey data and come back with a specific bullet on accountability)
- Track and monitor performance of nuisance court
- Reaffirm commitment to eliminate open air drug market in Asheville
- **Mayor to re-work bullet** - Support of recreation and employment alternatives for youth at risk of gang exposure
- Support the Safe Routes to School program by implementing one school this year
- Develop an Action Plan for maintaining fire and rescue standard of cover
- **Staff to work on language** – Maintain Fire Accreditation and ISO ratings and continue to increase inspection program to 90%

Councilman Russell asked that more detailed information be included in the fiscal impact section on staff reports.

Mayor Bellamy stated that she was not comfortable in pursuing annexations this year. Vice-Mayor Newman stated that he would like to place on an upcoming Planning & Economic Development Committee meeting agenda the City policy of not annexing manufacturing facilities in areas that meet annexation requirements, with an idea of possibly phasing in their property tax over a reasonable period of time.

It was the consensus of Council to direct the City Manager (1) to provide Council with a report regarding studying the impact of the changes in the Minimum Housing Code, such as rescinding mandatory rental property inspections; (2) to review bicycle safety from the bicyclist and automobile driver points of view and report to the Public Safety Committee prior to being reported to the full Council.

City Council expressed their appreciation for City staff's efforts in preparing the Financial Crossroads paper.

After a quick evaluation of the process, at 5:10 p.m. Mayor Bellamy recessed the meeting until 9:00 a.m. on Saturday, January 9, 2010.

January 9, 2010 – 9:00 a.m.

Present: Mayor Terry M. Bellamy Presiding; Vice-Mayor Brownie W. Newman, Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilwoman Esther E. Manheimer; Councilman William A. Russell Jr.; Councilman Gordon D. Smith; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

At 9:00 a.m. Mayor Bellamy reconvened the meeting. There was a brief reflection on the goal setting process.

Master Plans

City staff responded to various questions/comments throughout the introduction and update on each of the following Master Plans making sure that Council aware of what staff is currently working on and trying to implement: City 2025 Plan, Water Asset Management Plan, Affordable Housing Plan, Comprehensive Bike Plan, Downtown Master Plan, Downtown Parking Plan, Parks & Greenways Master Plan, Pedestrian Thoroughfare Plan, Sustainability Master Plan, Ten Year Plan to End Chronic Homelessness, Wayfinding Master Plan, Wilma Dykeman Riverway Plan, Transit Master Plan, Water System Master Plan, Civic Center Renovation Study, and Swannanoa Flood Damage Assessment Study.

City Manager Jackson was directed to compile a report of the accomplishments of the Pedestrian Thoroughfare Plan, the Parks & Greenways Master Plan, and the Comprehensive Bike Plan, particularly noting the use of economic stimulus funds. He was also directed to prepare a report summarizing the bicycle infrastructure improvements, sidewalk improvements and bicycle and pedestrian improvements that are forthcoming.

When Public Works Director Cathy Ball noted that the biggest hold-up in moving forward on some plans is getting easements, Councilwoman Manheimer commented on how labor intensive it is for staff to negotiate easements and noted that MSD outsources their condemnation components. Mayor Bellamy, member on the MSD Board, explained MSD's procedure. City Manager Jackson was directed to (1) bring back the existing City policy on non-condemnation for Council to revisit; and (2) in the next six months, review the MSD model for right-of-way condemnations for the Planning & Economic Development Committee review prior to coming to the full Council under the Consent Agenda, if appropriate.

City Manager Jackson was directed to provide Council a review of the 2008 Consultant's Report on bond capacity during the next quarterly update.

Partnerships

Mayor Bellamy noted that the City has a bi-monthly meeting with the Chamber of Commerce and felt it would be beneficial for City Council to be prepared to discuss partnership opportunities with them. She felt it was important to discuss the current and potential partnerships we have with the Chamber of Commerce, the N.C. Dept. of Transportation, the Buncombe County Commissioners, the State legislators, the Tourism Development Authority, and others. However, due to time constraints, it was the consensus of Council to schedule a worksession on Tuesday, January 19, 2010, at 5:00 p.m. in the First Floor North Conference Room to discuss strategic partnerships with other governmental, private and non-profit entities.

City Council Rules of Procedure

Mayor Bellamy provided Council with a copy of the City Council Rules of Procedure. She reviewed the "Form to Request Items on City Council Agenda" ("Form") that she felt would be beneficial to the process.

It was the consensus of Council that (1) all Council Members would submit the Form to the City Clerk for an item to be placed on the agenda; and (2) an urgent item would be considered by Council (without having to go through a Council Subcommittee) if a total of three Council members requested it. The Form would still need to be sent to the City Clerk. City Attorney Oast was directed to prepare an amendment to the City Council Rules of Procedure pertaining to this item to be placed on the January 26 agenda.

It was the consensus of Council that once a Council Committee has reviewed an item that unless there is some significant new aspect, it would not have to be reviewed again by that Council Committee.

City Attorney Oast was directed to see if there was a way to compress the number of times a project must be brought before the Council.

Work Processes

City Manager Jackson provided Council with a memorandum outlining protocols and procedures used by staff in the City Manager's Office to provide administrative support to the Mayor and City Council.

After a brief discussion, it was the consensus of Council that if a Council Member wants to have a meeting to conduct City business during normal business hours in the City Hall, Public Works Facility or the Municipal Building and the space is reasonably available, that City staff will accommodate the request for space only, not staff support. If space is not available in those buildings, then the meeting will need to be held in one of the community centers.

It was the consensus of Council for Mayor Bellamy to place on a future Council meeting agenda consideration of approval of the RICH Task Force, Mayor's Committee on (Dis)abilities, and Mayor's Committee on Veteran's Affairs in order for these programs to receive City staff resources. Mayor Bellamy also supported keeping the City of Asheville Youth Leadership Academy program as a Council program.

Boards & Commissions Members/Liaisons Assignments for 2010-11

Discussion and appointments were made for the City Council liaison and mandatory seats for Council on the various boards and commissions. City Clerk Burleson has a complete listing of all appointments made.

Adjournment

At 1:35 p.m., Mayor Bellamy thanked City Council, Ms. Henderson, City staff and Warren Wilson College for their participation in the retreat and adjourned the meeting.

Magdalen Burleson
CITY CLERK

MAYOR

Tuesday – January 12, 2010 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Brownie W. Newman; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilwoman Esther E. Manheimer; Councilman William A. Russell Jr.; Councilman Gordon D. Smith; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Bellamy led City Council in the Pledge of Allegiance.

INVOCATION

Mayor Bellamy gave the invocation.

I. PROCLAMATIONS:

A. PROCLAMATION PROCLAIMING JANUARY 14-18, 2010, AS "DR. MARTIN LUTHER KING JR. WEEKEND"

Mayor Bellamy read the proclamation proclaiming January 14-18, 2010, as "Dr. Martin Luther King Jr. Weekend" in the City of Asheville. She presented the proclamation to Ms. Oralene Simmons who briefed City Council on some activities taking place during the weekend and Council's continued support.

II. CONSENT AGENDA:

At the request of Mayor Bellamy Consent Agenda "D" was added.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON DECEMBER 15, 2009

B. ORDINANCE NO. 3819 - BUDGET AMENDMENT TO THE POLICE/PATROL DIVISION'S SPECIAL PURPOSE FUND

Summary: The consideration of a budget amendment, in the amount of $1,000, from a Court-ordered action, to the Police/ Patrol Division's Special Purpose Fund for the purpose of investigative costs.

Asheville Police Department vice officers conducted an investigation into a gambling operation in March 2009. US currency was seized during the investigation. The case was heard before the Honorable Buncombe County District Court Judge Calvin Hill. Judge Hill signed an Order that $1,000 cash of the amount seized during the execution of a search warrant to be turned over to the Asheville Police Department Patrol Division's special purpose fund.

This action conforms to the City Council's Strategic Operating Plan under Safe - Asheville will be one of the safest and most secure communities when compared to similar cities - Partner to launch a nuisance court to achieve more efficient and effective prosecution of offenses that impact the quality of life.

Pro:

Revenue will be used in the course of special investigations which include surveillance, undercover operations, and investigative cost.

Con:

None noted

This will have a positive impact on the Police Budget by increasing the Special Purpose Funds used to conduct special operations. There will not be any further costs to the City of Asheville as a result of accepting these funds.

City staff recommends City Council adopt the budget amendment, in the amount of $1,000, to the Police/Patrol Special funds.

ORDINANCE BOOK NO. 26 – PAGE 15

C. RESOLUTION NO. 10-1 - RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN A SERVICE AGREEMENT WITH HERSEY METERS CO. LLC FOR THE FIVE YEAR AUTOMATED METER READING PROJECT

Water Resources Director Steve Shoaf said that this is the consideration of a resolution authorizing the City Manager to sign a service agreement with Hersey Meters Co., LLC, for the five-year Automated Meter Reading (AMR) Project contingent upon City Council approval of funding for the remaining four (4) fiscal years for the purchase and installation of approximately 52,000 AMR Devices to complete installation throughout the water system.

In Fiscal Year 2002, the Water Resources Department installed approximately 500 AMR Devices as part of a pilot program. In Fiscal Year 2005, the program was expanded to include 3,000 additional AMR Devices, which were installed by department staff. In Fiscal Year 2006, a requirement was made as part of the Engineering Standard Detail and Specifications that each new water meter installed shall have an automated meter reading unit installed as well. To date, a total of approximately 3,800 devices have been installed throughout the water system. These devices were installed at locations that are very difficult to access and that pose a safety threat to Meter Reading employees. The installation of automated meter reading devices at these locations eliminated serious safety hazards. In addition, the pilot program has proven to be very cost effective by reducing the time to read these AMR meter locations by 85%.

In July 2009, the City issued a Request for Proposals on the Automated Radio Frequency Meter Reading System for the Water Resources Department. On August 17, 2009, proposals were received from the four (4) following companies:

1. Hersey Meters Co., LLC
2. Metron-Farnier, LLC
3. Neptune Technology Group, Inc., and
4. Vanguard Utility Service, Inc

A review team, comprised of staff from multiple City departments, including Finance (Purchasing) and Information Technology, reviewed these proposals and selected Hersey Meters Co., LLC, located in Cleveland, North Carolina, as the lowest responsible bidder at a total project bid of $6,666,625.86.

This project complies with the City Council's strategic plan to improve city infrastructure. It will leverage technology to allow for more efficient and effective operation of Meter Services within Water Resources.

Pros:

- Significantly reduce meter reading time, which will reduce future personnel needs for meter reading. This will allow existing employees to address other needs.
- Reduce the safety hazards of reading meters at locations that are difficult to access.
- Improve customer service by reducing meter reading errors, and by identifying meter performance and leak issues in a timely manner.
- Reduce the unit cost of meter reading devices by purchasing them in bulk.

Cons:
- Initial project capital cost is significant.
- Training to utilize the new equipment will be necessary.

The total five-year cost to purchase 52,000 AMR devices is conservatively estimated at $7.0 million. Of that amount, the initial capital investment cost of $2.8 million for the AMR program is currently funded in the Fiscal Year 2010 Water Capital Improvement fund, leaving a remaining capital investment of up to $4.2 million to be funded over the next four years. The Water Department's Fiscal Year 2011 through 2014 budget and financial plans assume pay-as-you go contributions of up to $1.1 million per year from the Water Operating Fund to the Water Capital Improvement Fund to cover this remaining $4.2 million capital investment in the AMR program. This budget and financial plan is dependent upon the availability of funds and normal rate adjustments. The impact to Meter Services staffing will be the reduction of time required to read meters, thus allowing staff time for other functions (testing, repairs). The reduced time required to read meters may allow a change from bimonthly reading and billing to a monthly reading and billing which would make bills more affordable to customers and improve the City's Water Resources cash flow.

City staff recommends City Council authorize the City Manager to sign a service agreement with Hersey Meters Co., LLC, for the five-year Automated Meter Reading (AMR) Project. The agreement will recognize the funds available for this year and include a provision for extension of the contract as additional funding is available. This is contingent upon City Council approval of funding for the remaining four (4) fiscal years for the purchase and installation of the remainder of the approximately 52,000 AMR Devices to complete installation throughout the water system.

RESOLUTION BOOK NO. 32 – PAGE 308

D. RESOLUTION NO. 10-2 – RESOLUTION AMENDING THE 2010 CITY COUNCIL MEETING SCHEDULE

Summary: Due to time constraints at the City Council annual retreat on January 8-9, it was necessary to schedule a City Council worksession on Tuesday, January 19, 2010, at 5:00 p.m. in the First Floor Conference Room, City Hall, 70 Court Plaza, Asheville, N.C., to discuss strategic partnerships with other governmental, private and non-profit entities.

RESOLUTION BOOK NO. 32 – PAGE 310

Mayor Bellamy asked for public comments on any item on the Consent Agenda, but received none.

Mayor Bellamy said that members of Council have been previously furnished with copies of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Russell moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Davis and carried unanimously.

III. PRESENTATIONS & REPORTS:

A. H1N1 PREPAREDNESS FOR COMMUNITY REPORT

Ms. Gibby Harris, Buncombe County Health Director, briefly updated Council on the H1N1 flu and urged the public to continue to get the vaccine.

B. PRESENTATION OF THE FISCAL YEAR 2009 COMPREHENSIVE ANNUAL FINANCIAL REPORT

Chief Financial Officer Ben Durant said that at the conclusion of each fiscal year, an annual audit of the city's financial statements is conducted. The purpose of the audit is to obtain reasonable assurance that basic financial statements are free of material misstatement; to examine evidence supporting the amounts and disclosures in the financial statements; and to assess accounting principles used and the overall presentation of the financial statement.

Mr. Brian Broom, Director of Dixon Hughes, PLLC, summarily reviewed with Council the annual audit. He said that the following is the audit and financial statement summary: "Our report for the 2009 audit expresses an unqualified opinion on the fair presentation of the basic financial statements in all material respects, in conformity with accounting principles generally accepted in the United States of America. Our report can be found on Page 1 of the Comprehensive Annual Financial Report (CAFR). Our reports on compliance and internal control, in accordance with Government Auditing Standards, OMB Circular A-133, and the State Single Audit Implementation Act, disclosed no material weaknesses in internal controls or instances of non-compliance in the administration of federal awards programs. Our compliance reports and a summary of the results can be found in the Compliance Section of the CAFR. Also, we noted some areas for improvement in the City's accounting function that we have communicated to management in a separate letter dated November 12, 2009.

Mayor Bellamy thanked Mr. Broom for the thorough audit and Mr. Durant and his staff for their work associated with compiling the CAFR. She was pleased to see that the City is complying with all requirements and that the audit revealed no material weaknesses or instances of non-compliance in the administration of federal and state grant programs.

C. AFTER ACTION STORM BRIEFING

Assistant City Manager Jeff Richardson said that Asheville and the surrounding areas recently experienced a major winter storm lasting from December 18 – 22, 2009. He provided Council with information related to the key decisions taken to prepare and manage emergency operations during this time. He also provided information relative to preparation, snow removal and public safety. At this time we are pursuing FEMA reimbursement of $525,342 and would suggest a policy review of the sidewalk maintenance ordinance.

The information compiled in this presentation is to update City Council on key decisions taken to address the December 2009 winter storm. No action is necessary at this time.

Mayor Bellamy and Council members expressed their appreciation of City staff's and other agencies efforts and communication during the storm.

D. ECONOMIC STIMULUS PACKAGE UPDATE

ORDINANCE NO. 3820 - BUDGET AMENDMENT TO ACCEPT ENTITLEMENT FUNDS FROM THE DEPT. OF ENERGY FOR THE ENERGY EFFICIENCY AND CONSERVATION BLOCK GRANT PROGRAM

American Recovery & Reinvestment Project Manager Brenda Mills said that as part of City staff's recurring American Recovery & Reinvestment (ARRA) update to Asheville City Council, staff is seeking Council consideration of the following:

1. Energy Efficiency and Conservation Block Grant (EECBG)

Staff is seeking approval of a budget amendment in the amount of $804,700 to accept entitlement funds from the Department of Energy for the Energy Efficiency and Conservation Block Grant (EECBG) program.

2. Update for Other ARRA Funding

Energy Efficiency and Conservation Block Grant

The EECBG program through the Federal Department of Energy (DOE) is funded for the first time through the American Recovery and Reinvestment Act (ARRA). The City of Asheville has been allocated $804,700 of entitlement funds through this program. The funds must be committed within 18 months of receipt of award and expended within 36 months. The primary requirements for use of this funding include: job creation, energy reduction, renewable energy production, carbon emissions reduction, and partnership creation. Through the evaluation of the Sustainability Management Plan the over arching objectives for Asheville's use of this funding were established in an Energy Efficiency and Conservation Strategy (EECS) which was approved by DOE in September 2009. These goals are as follows:

- Reduce energy consumption through energy efficiency
- Increase renewable energy usage
- Increase voluntary energy conservation efforts
- Reduce vehicle miles traveled
- Incorporate sustainability into the City's decision making process
- Incorporate sustainability into City communications and outreach efforts
- Reduce solid waste disposed at landfills

In June 2009 City Council approved the following projects:

Funding Category	Program Description	Project Funding	% of total allocation
$254,700	**Internal Sustainability Programs**		
	Solar thermal for Fire Station 6	$17,000	**2.1%**
	Building Inspector and Building Maintenance Energy Efficiency Training	$35,000	**4.3%**
	Sustainability Outreach Specialist (2 yrs)	$47,700	**6.6%**
	Civic Center Banquet Hall HVAC Replacement	$88,000	**10.9%**
	Fire Station 8 weatherization and solar thermal	$67,000	**8.3%**
$220,000	**Internal Energy Revolving Fund**		
	IT Server Downsizing	$100,000	**12.1%**
	City Hall Lighting Retrofit	$120,000	**14.6%**
$250,000	**Competitive grants for community projects**	$250,000	**31.1%**
$ 80,000	**Grant administration**	$80,000	**10%**

$804,700	**TOTALS**	**100%**

Pros:

- Reduce municipal energy spending
- Reduce municipal carbon footprint
- Support job creation in the local energy sector

Con:

- Implementing the programs within the grant require staff time, however the actual administration costs of the grant are covered through the $80,407 grant administration allowance

The grant will cover 100% of the costs, so there is no impact on the City's current General Fund budget. The installation of energy reduction measures will lower future costs, but the exact impact cannot currently be quantified.

City staff recommends City Council adopt the budget amendment in the amount of $804,700.

Update on Other ARRA Funding

As a part of the American Recovery and Reinvestment Act which was signed into law on February 17, 2009, the City of Asheville has received to date $7,597,242 in entitlements and $1,494,500 in grant funding. The following information is a short breakdown of the funding and where we are in the process of contracting and granting funds:

CDBG-R - $332,942- This funding is currently in the implementation phase. This funding was provided to Mountain Housing Opportunities for Tier II Emergency Home Repair ($75,000), Weed and Seed Weatherization Program ($75,000), Mountain BizCapital ($26,000), the City of Asheville ($123,648) for sidewalks to serve a lower income neighborhood in the city and the remaining funding of $33,294 for allowable administrative costs (10%).

Edward J. Byrne Justice Assistance Grant (JAG) - $265,466 -This project is in the bidding process to be opened on January 14, 2010. With time to review the request for proposals, we hope to bring to Council's next regular meeting for award of contract.

Homeless Prevention & Rapid Re-housing Program (HPRP) - $509,460 - Contact executed with the HPRP Team which includes ABCCM, Eblen Charities, WNCAP, United Way's 2-1-1 and Pisgah Legal Services which began October of last year. Clients are being served and staying in housing.

Transit Capital - $2,590,439 - Funding is being used by the City of Asheville to purchase 5 diesel buses and ten (10) shelters. As part of the sub-recipient agreement, the City will acquire two small CNG buses and one CNG van and will lease the vehicles to Henderson County who received a portion of this funding. These items were purchased in the fall of 2009 and currently awaiting delivery.

NCDOT Surface Transportation (STP-DA) - $3,094,235 - Four contracts have been let for this funding which were executed by December 31, 2009 which included the Downtown Streetscapes ($79,006.00), Fairview Road Signal Upgrades ($58,678.95), Sidewalk Gaps ($436,920.00) and Coxe Avenue Resurfacing and Restriping ($214,208.70). We were able to do the Kimberly Avenue Project because the initial bidding was under the estimated costs. This

project was let on December 31, 2009, and will be brought to City Council on January 26, 2010, for approval of contract award.

Drinking Water State Revolving Fund (NCDENR) - $510,000 - Funding will be used for the North Fork Water Treatment Plant Pumping System Improvements. Contract approved by NCDENR and final documents signed in December to proceed with contracting.

Clean Water State Revolving Fund (NCDENR) - $454,500 - Funding will be used for the Dingle Creek Stormwater Improvements ($166,495) which was approved by City Council for award on December 15, 2009. Contract must be approved by NCDENR to proceed with contracting.

Mobile Source Emissions Reduction Grant (NCDEER) - $30,000 - Council approved this funding budget amendment on December 15, 2009. These funds from the NC Diesel Emissions- Economic Recovery (NC DEER) will support the purchase of 5% biodiesel (B5) fuel for the municipal fleet for one year.

Clean Cities: Carolina Blue Skies & Green Jobs Initiative - $749,015 - This funding will provide the incremental cost of purchasing 11 new CNG pick up trucks, retrofit to convert 11 existing to CNG and upgrade the CNG station. The funding applied for as a sub-grantee with Triangle J Communities (Raleigh, NC) through the Land of Sky Regional Council was $749,015. The funding has been reduced and we are still awaiting word of the final number (estimate $500,000).

In response to Councilman Davis, Energy Coordinator Maggie Ullman explained the details on the competitive grant for community projects process.

Vice-Mayor Newman outlined some questions and concerns from the Housing & Community Development Committee, noting the large amount of staff time and energy to spend on a one-time grants program.

Mayor Bellamy said that the goal in the future is for the Federal Department of Energy to add funds annually as they do with Community Development Block Grant Funds.

Mayor Bellamy said that members of Council have bee previously furnished with a copy of the ordinance and it will not be read.

Councilman Bothwell moved for the adoption of Ordinance No. 3820. This motion was seconded by Councilman Smith and carried unanimously.

ORDINANCE BOOK NO. 26 – PAGE 17

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE CONDITIONAL USE PERMIT FOR THE GLEN ROCK MIXED USE DEVELOPMENT (FORMERLY IDENTIFIED AS DEPOT AND RALPH STREETS) LOCATED AT 362, 372 AND 403 DEPOT STREET, IN ORDER TO AMEND THE MIX OF USES PROPOSED IN PHASE III OF THE PROJECT AND TO REVISE THE APPROVED LANDSCAPE PLAN

ORDINANCE NO. 3821 - ORDINANCE AMENDING THE CONDITIONAL USE PERMIT FOR THE GLEN ROCK MIXED USE DEVELOPMENT (FORMERLY IDENTIFIED AS DEPOT AND RALPH STREETS) LOCATED AT 362, 372 AND

403 DEPOT STREET, IN ORDER TO AMEND THE MIX OF USES PROPOSED IN PHASE III OF THE PROJECT AND TO REVISE THE APPROVED LANDSCAPE PLAN

At the request of Vice-Mayor Newman, Councilman Davis moved to excuse Vice-Mayor Newman from participating in this matter due to a conflict of interest. This motion was seconded by Councilman Russell and carried unanimously. At this time, Vice-Mayor Newman left the Council Chamber.

City Clerk Burleson administered the oath to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process. This process is the issuance of a conditional use permit, which is a quasi-judicial site specific act. At this public hearing, all the testimony needs to be sworn.

Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing. Mayor Bellamy disclosed that she was employed by Mountain Housing Opportunities during the approval of the first and second phases of this project and that she has no pre-judgment and will make her decision based solely on what is before Council at this hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

City Attorney Oast said that the Authorized Practice Committee of the North Carolina State Bar has issued an advisory opinion that appearing in a representative capacity for a party before a local governmental body in a quasi-judicial proceeding is the practice of law, especially with respect to such aspects of the hearing as examining or cross-examining witnesses, or advocating for legal conclusions or results. This does not prevent persons, including land use professionals, from presenting information or expressing opinions within their knowledge or area of expertise.

After hearing no questions about the procedure, Mayor Bellamy opened the public hearing at 5:59 p.m.

Urban Planner Julia Cogburn submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Ms. Cogburn said that this is the consideration of an ordinance to amend the conditional use permit for the Glen Rock mixed use development (formerly identified as Depot and Ralph Streets) located at 362, 372 and 403 Depot Street in order to amend the mix of uses proposed in Phase III of the project and to revise the approved landscape plan.

Ms. Cogburn said that the project site (2.11 acres total) is located within the City Limits between Ralph and Depot Streets at the intersection with Bartlett Street (Attachment to City Exhibit 3 – Aerial Map) . The property was conditionally rezoned from CI (Commercial Industrial) to UP CUZ (Urban Place Conditional Use Zoning) in 2005 by the Asheville City Council. At that time, a Conditional Use Permit was also approved for the project. The Conditional Use Permit (CUP) was necessitated due to the size of the project (Level III). The original CUP approved the rehabilitation of the Corner Market building for retail/gallery, office/studio, or light industrial use. It also established approval for the construction of a new building with a 46,800 square foot footprint with a mix of retail/gallery, office/studio, and community and residential development;

and renovation of the Glen Rock Hotel for mixed uses with residential units on the upper floors. At that time eighty-five (85) dwelling units were proposed for the new building which would house structured parking and 31,009 square feet for other uses. An approved uses list was incorportated in the approval.

Since 2005, the project has been developing in four phases. Phase I is complete, Phase IIA is under construction, Phase 2B has not yet begun, and Phase III is the primary subject of this report. (City Exhibit 4 – Site Plan)

Parking for the Glen Rock project, originally proposed to be provided all internally and on-street, is now proposed to be provided in a gravel lot on the site, on-street, and in a free-standing lot across Depot Street as a cost saving measure. The change to allow use of this lot, not part of the CUP, was approved under separate Level I project review in early 2009.

Phase I involved the conversion of the Old Corner Market Building at 362 Depot Street. It has been completed and is now occupied.

Phase II was to include approximately 46,800 square feet of mixed-use (retail/gallery/ office/studio/community) space, 85 dwelling units, and structured parking. In 2008, staff approved a modification of this phase reducing its size (overall square feet and number of dwelling units) and eliminating the structured parking facility. Proposals to reduce the size of a project have not generally been brought to the Council for review.

Phase IIA, currently under construction, involves the construction of a new building containing 124,726 square feet of gross floor area (17,002 for various permitted uses and 60 dwelling units). All dwelling units will meet the City's affordable housing standards.

Phase II B is not moving forward for now. If developed, it is to include up to an additional twenty-five (25) dwelling units and up to an additional 17,707 square feet of other approved uses in addition to the Phase IIA structure. The site for that addition is, however, being used for twenty (20) parking spaces serving the project (as noted above). Due to that change, any proposal to move forward on Phase II B would need to consider how it would affect parking for the entire site since both that parking area and the structured parking area not available for the project.

Phase III of the project involves the renovation of the old Glen Rock Hotel building, which was proposed to be converted into retail and community space on the first floor and twenty-five (25) dwelling units on the upper floors. This phase is the subject of this request. While originally proposed primarily for residential purposes, the developers now seek greater flexibility of uses following the renovation of the structure. The approximately 30,000 square feet in the building are presently being designed for office and community space. However, the proposed CUP amendment would allow this building in the future to be used for any of the proposed uses on the previously approved list (including residential use). If approved, Level II review by the Technical Review Committee would be required for a change of use, but no additional amendment to the CUP would be needed.

Cumulatively, the change approved and requested for this project reduce the number of residential units from one hundred and ten (110) units to a currently proposed sixty (60) units and the parking from one hundred eighty-four (184) spaces to the currently proposed one hundred nineteen (119) spaces.

Project Landscaping - The concept plan approved in 2005 for the Glen Rock showed street trees on both sides of Depot, Bartlett, and Ralph Streets and on both sides of Else Alley. MHO is requesting modification to that approved concept plan. First, the trees on Bartlett, Ralph and Else Alley were shown as alternative compliance in lieu of buffer that could not be provided due to site constraints. Buffer is no longer needed under the City's new landscaping ordinance

approved in 2007. Next, there are significant utility conflicts on and off the site which prohibit planting all trees as originally proposed. (City Exhibit 5 – Site Plan)

Because of these constraints, MHO is requesting an amendment to allow modification of their landscape plan as follows:

- Reducing the number of street trees on the MHO property along Ralph by one. Bulbouts with groundcover will be placed on both sides of the street.
- Street trees along Bartlett and Depot Streets – Due to utility conflicts MHO will place shrubs and groundcover in bulbouts and evergreen trees (some in planters) along with shrub border at arcade wall along these streets.
- In lieu of meeting the technical standards of the ordinance regarding landscaping, a request to instead add additional plantings throughout the site in courtyards, islands, along walkways and along the building façade.

On December 21, 2009, these proposed amendments were reviewed by the City's Technical Review Committee. The committee approved these changes with the conditions.

City Council must take formal action as set forth in section 7-9-9(c)(4) of the Unified Development Ordinance (UDO), and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case (UDO 7-16-2(c)).

1. **That the proposed use or development of the land will not materially endanger the public health or safety.**

   The proposed project has been reviewed by City staff and previously by the Asheville City Council and appears to meet all public health and safety related requirements once the conditions enumerated by the Technical Review Committee are met. The project must meet the technical standards set forth in the UDO, the City Standards and Specifications Manual, the North Carolina Building Code and other applicable laws and standards that protect the public health and safety.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.**

   The applicant is incorporating the gradual slope of the property in the design of the proposed new mixed-use building. The developer is incorporating the channeled Town Branch Creek into the project and is proposing a clean up of the area surrounding the creek and the creation of a public amenity along the creek.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.**

The Glen Rock development is being developed in a once vibrant area of Asheville that has experienced neglect in recent years. The design of the project is meant to bring vitality back to the area by bringing in a mix of uses at a significant density and by including a number of amenities to enhance the livability of the entire area. Significant vegetation is proposed to further enhance the beautification of the property that will be brought about as a result of this project.

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.**

The Glen Rock hotel building will basically be used in its current configuration on the property. The Urban Place District is envisioned for further application in this area and other locations along the urban riverfront to encourage redevelopment of the same scale and density as is seen in the Glen Rock and the Wilma Dykeman Plan envisions precisely this scale of development.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.**

The *Asheville City Development Plan 2025* calls for the promotion of adaptive reuse of vacant and unterutilized structures and encourages the construction of affordable housing throughout the community. The City's smart growth initiative, contained in the comprehensive plan, encourages mixed use developments and compatible, higher density commercial and residential development.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.**

Development on the site will require final technical approval from all applicable departments including representatives of the Water Resources, MSD, Engineering, Fire and Building Safety Departments. While transit does not currently service the location, the developer is examining the issue of providing transit services with the City's transit services staff.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.**

The City's Traffic Engineer has reviewed the proposal and has determined that there are no traffic issues created by this project nor is a traffic impact analysis warranted.

Pros:

- The Glen Rock renovation is the final phase of a development proposed in an area that has been neglected over recent years. It is believed that this development will bring renewed interest in development to this area and vitality that will help to further enhance the livability of the area.
- The project supports numerous goals and strategies outlined in the City's 2025 plan as it relates to affordable housing, infill development, rehabilitation, and smart growth.
- Several amenities (e.g., creek enhancement, pedestrian facilities) are incorporated in the design of this project.

Cons:

- The reduction in parking provisions allowed in the Urban Place District may present some parking issues in the area. However, the developer meets the Urban Place parking requirements and is promoting multimodal transportation at the site.

City staff strongly supports these amendments to a project which it is felt will jumpstart the implementation of the Wilma Dykeman Plan, adaptively reuse an older structure having significant architectural and historic character, and establish a strong residential presence in this underdeveloped area of our City.

Ms. Cindy Weeks, representing Mountain Housing Opportunities, briefed Council of the Glen Rock Depot project. She explained the prior phases and said that they have scaled the project back due to the economy, but are still building the 60 affordable rental apartments as part of the new building. Using photographs, she showed some of the progress to date (Applicant Exhibit 1). The new building at 372 Depot Street, which is a 90,000 square foot building housing 60 affordable apartments and 9,000 square feet of commercial space, is 40% complete. This building will increase the value of that property by about $6 Million dollars. At the same time as the economic forces were taking place, construction costs decreased so they invested in green and sustainable features in the new building. The new building will be LEED certified and all apartments will have solar thermal heat. She then explained the financing for the renovations of the Glen Rock Hotel and how they hoped to complete it as a historic tax credit project which will bring about $1 Million in equity to the project. She urged Council to approve the amendment to the conditonal use permit.

After hearing no rebuttal, Mayor Bellamy closed the public hearing at 6:13 p.m.

Councilwoman Manheimer appreciated the efforts of Mountain Housing Opportunities. She felt that we are beginning to see in the new economy more creative solutions for financing these kinds of projecs and that we can't depend solely on private developers to do afforable projects.

Based on findings of fact as stated by staff, Councilwoman Manheimer moved for the adoption of Ordinance No. 3821 to approve the conditional use permit to the Glen Rock project. This motion was seconded by Councilman Smith and carried unanimously (with Vice-Mayor Newman being excused).

At this time, Vice-Mayor Newman re-entered the Council Chamber.

ORDINANCE BOOK NO. 26 – PAGE 19

B. PUBLIC HEARING TO CONSIDER THE ISSUANCE OF A CONDITIONAL USE PERMIT FOR THE PROJECT IDENTIFIED AS MISSION OUTPATIENT CANCER CENTER LOCATED ON HAMILTON STREET

ORDINANCE NO. 3822 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR THE PROJECT IDENTIFIED AS MISSION OUTPATIENT CANCER CENTER LOCATED ON HAMILTON STREET

City Clerk Burleson administered the oath to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process. This process is the issuance of a conditional use permit, which is a quasi-judicial site specific act. At this public hearing, all the testimony needs to be sworn.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

City Attorney Oast said that the Authorized Practice Committee of the North Carolina State Bar has issued an advisory opinion that appearing in a representative capacity for a party

before a local governmental body in a quasi-judicial proceeding is the practice of law, especially with respect to such aspects of the hearing as examining or cross-examining witnesses, or advocating for legal conclusions or results. This does not prevent persons, including land use professionals, from presenting information or expressing opinions within their knowledge or area of expertise.

After hearing no questions about the procedure, Mayor Bellamy opened the public hearing at 6:17 p.m.

Urban Planner Jessica Bernstein submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Ms. Bernstein said that this is the consideration of the issuance of a conditional use permit for the project identified as Mission Outpatient Cancer Center located on Hamilton Street for a 229,521 square foot medical building and parking deck, with a request to reduce the required number of parking spaces.

The applicant is requesting review of site plans for the construction of an outpatient cancer center (medical building) and associated parking deck. This project is considered a Level III review pursuant to Section 7-5-9(a) of the UDO which designates review for institutional developments with a gross floor area of more than 100,000 square feet. Level III projects are reviewed as Conditional Use Permits in the Institutional District.

The project site consists of four parcels with a combined area of 3.02 acres (according to submitted site plans) with frontage on McDowell and Hamilton Streets, in between Brooklet Street and Victoria Road. The area is zoned Institutional and is developed primarily with hospital-related uses (Attachments to City Exhibit 3 – Aerial and Location Maps)

The applicant is proposing to construct a new medical building and associated parking structure on the site. The building is proposed to be used as an outpatient cancer center and will be 118,821 square feet and 6 stories tall (approximately 112' feet in height to the top of the highest architectural element at the tallest point of the structure). The associated parking structure is 110,700 square feet and 2 stories tall (approximately 52' feet in height at the tallest point of the structure) for a combined total square footage of 229,521 square feet. The site slopes approximately 30 feet from east (Private Drive) to west (McDowell Street), which results in a variety of height calculations depending on the façade elevation (Attachments to City Exhibit 3 – Site Plans).

The infrastructure shown on submitted site plans as existing is part of a conditionally approved major subdivision (BP # 09-4835) and a proposed road closure, but is not currently in place. Access to the site is proposed from "Private Drive" which is currently Hamilton Street. Plans propose five curb cuts off of "Private Drive" – three for access into the parking structure (to the north of the site), one for trash dumpster access and one for a patient drop-off / pick-up location (at the southernmost end of the project site).

The 2-story parking structure accommodates a total of 348 spaces (projected 147 spaces for staff and 201 spaces for patient use). Five percent of the total number of parking spaces has been designated for bicycle parking. There are sidewalks shown on the McDowell Street, Private Drive and Hospital Drive frontages.

Landscaping required for this project includes building impact landscaping, street trees, street buffer and parking deck screening. Five percent of the lot area is required to be set aside for urban-style open space amenities (0.15 acres). The plans indicate more than the required amount of open space. There are a number of retaining walls on the site – two of which appear

to trigger compliance with the retaining wall screening and landscaping requirements. Detailed landscaping review will be completed during the Final TRC process.

The UDO bases parking requirements for medical uses on the footprint of the building. In this case, a range of 475-594 parking spaces are required. The applicant has studied this specific use for the site and has found that a total of 348 spaces are needed (based upon 147 spaces for staff and 201 spaces for patient use). Because the building and use is a component of the overall Mission-St. Joseph's Hospital Campus, staff feels that any overflow parking needs can be adequately addressed through shared parking at existing surface lots and parking structures in the immediate vicinity.

This project was approved with conditions by the Technical Review Committee on November 2, 2009. There was no public comment and as of the writing of this report, no communication has been received regarding this proposal.

The Planning & Zoning Commission reviewed this proposal at their meeting on December 2, 2009. The project received unanimous support (4-0; 2 members recused). There was no public comment. Commissioners discussed how the separate infrastructure improvements address alternative transportation such as bus routes, bicycles and pedestrians. The applicant provided information from the TRC-Major Subdivision review and approval, such as sidewalks and sidewalk connections throughout the project area, provisions for bike lanes and an easement for a future transit stop. There was some discussion about how this project would fit into the closest greenway (sidewalk connections along Hamilton Street/Private Drive north to the Choctaw greenway).

City Council must take formal action as set forth in Section 7-5-5(e)(3) of the Unified Development Ordinance (UDO), and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case pursuant to Section 7-16-2(c). Staff's review indicates that all seven standards are met as proposed in the site plan.

1. **That the proposed use or development of the land will not materially endanger the public health or safety.**
   The project will meet State building code requirements and will be reviewed in detail by the Technical Review Committee to ensure compliance with safety requirements.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.**
   The proposed use and development of the land is compatible with the natural and topographic features on the site. There is a change in grade of approximately 30 feet from east to west and the design of the structure and parking garage accommodates this shift including a partial floor on the lower side. There are several retaining walls on the site, primarily located at the southwestern corner of the parcel. These walls will comply with screening standards found in the UDO.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.**
   The parcels in the area surrounding this site are largely owned and operated by the Mission Health System for the hospital and medical offices or other similar, supporting uses. All parcels in the immediate area are also zoned Institutional. This general location has been established as a medical hub for some time. The Outpatient Cancer Center is expected to be a complimentary use and should not injure the value of adjoining or abutting properties.

Although not a part of this application, the owners of several properties in the immediate area have raised concerns about the impact of TRC-approved roadway improvements on the value of their properties. Those property owners are, however, meeting with representatives of Mission Health Systems and City staff and there is good progress toward an agreement, while not yet a final solution.

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.**
The new Outpatient Cancer Center is proposed at 6 stories in height, which is similar to other structures in the immediate area and while there are some lower buildings nearby, this development is proposed in a design similar to other buildings and structures on the Health Systems campus. There will be significant vegetation on the site with trees, shrubs and both green open space as well as a hardscaped open space area along Hospital Drive, reducing the coverage of structures on the lot. This site is an appropriate location for a medical use and this development is compatible with the scale, bulk, coverage and character of the area in which it is located.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.**
The Asheville City Development Plan 2025 refers to the Sustainable Economic Development Strategic Plan, which notes that the top strength of the City is "availability of adequate health care." Furthermore, Goal IV in the Land Use & Transportation section recommends that "the City should enhance its role as western North Carolina's regional medical and education center," with the specific strategy of working with Mission-St. Joseph's Health System in the implementation of their Master Facilities Strategic Plan. This proposal enhances and expands the region's access to medical services and furthers the goals of the Hospital's master planning efforts.

Additionally, this project is proposed to be LEED certified, which aligns with Smart Growth policies recommended in the Plan.

Although not specifically linked to this approval, the associated roadway improvements in the immediate area that make this project feasible directly support goals in the transportation section of the Plan that seek to make infrastructure improvements that will support economic development and community needs. The Plan does recognize all modes of transportation, including cars, transit, bikes and pedestrians – this proposal is proximate to four transit routes and sidewalks are included on all street frontages. The Bicycle Master Plan does recommend bike lanes along Victoria Road, which has been noted in the TRC Staff Report and was discussed by the Greenways Commission during their evaluation of associated roadway closures.

This proposal works to achieve City Council's goals on being green by seeking LEED certification on the facility and on sustainability by the commitment to infrastructure with the related roadway improvements. Although not a part of this Level 3 review, the project is linked with improvements to Victoria Road and the creation of Hospital Drive, which will provide a link between Biltmore Avenue and McDowell Street, easing and improving traffic issues and congestion between the Health System campus, A-B Tech and Asheville High School.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.**
This proposed development is located near major road facilities and interstate connections as well as proximate to several transit lines (Rtes. 4, 8, 6 & 12). In addition,

the project has been reviewed by the Technical Review Committee who found that existing infrastructure appears adequate and preliminary review has not revealed any problems for future service to the development.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.**
The proposed project has been reviewed by the City's Traffic Engineer. Based on the proposed street infrastructure improvements that were approved by TRC as a part of a separate Major Subdivision review, this development is not expected to cause undue traffic congestion and/or create a traffic hazard. This development was included in a traffic impact study that identified the need for the proposed street infrastructure improvements.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Pros:

- The proposal satisfies a key goal in the comprehensive plan which seeks to advance and maintain a top strength of the City – the availability of heath care.
- The applicant will be seeking LEED certification, meeting key "green building" goals of the City.
- Parking for the project is proposed in a structured deck, thereby reducing the impervious area that a surface lot would consume.
- Related infrastructure improvements will create and enhance connectivity between Biltmore Avenue and McDowell Street.

Con:

- The applicant is seeking a modification for a reduction in parking based on the specific use – the parking provided does not satisfy the requirements of the UDO.

Staff recommends approval of the Level 3 development proposal for a new outpatient cancer center and associated parking structure as proposed, including support for the parking requirement modification.

Mr. True Morse, Director of Facility Planning at Mission Hospital, reviewed with Council a PowerPoint (Applicant Exhibit 1) and provided Council with the vision statement of the Cancer Center - "to create a regionally integrated and economically viable comprehensive Cancer Center of Excellence to reduce risk of cancer and improve cancer survival for citizens in WNC." Using pictures he showed the Mission Campus now, showing Victoria Road; the Mission Campus in the future with Hospital Drive; and the Cancer Center site plan. He urged Council to adopt the conditional use permit for this very important project.

Ms. Karen Grogan, Administrative Director of Cancer Services at Mission Hospital, explained the physical structure of (1) 118,000 square foot building - $59 Million Cancer Center, deck and equipment; (2) dedicated parking deck of 348 spaces (a) high mileage vehicles/bicycles; and (b) parking space variance; (3) five stories – top floor unfinished – flexible space; (4) Mission Hospital's first LEED certified building (a) dedicated recycling/14% energy efficiency; (5) location on McDowell side of Mission Campus; and (6) Victoria Road redesign (a) Hospital Drive will be 5 lanes/easy access to Center. She explained the Cancer Center facility building and stacking. The need for Cancer Center of Excellence (1) must prepare for expected growth in outpatient volume; (2) improve cancer survival and reduce risk; (3) consolidate outpatient services for access and efficiencies; (4) stop outward migration for services provided in WNC – Spares families from traveling for treatment; (5) space to house cutting edge technology; (6) expand clinical cancer research; (7) offer multi-disciplinary disease clinics; (8) expand pediatric and adolescent oncology services and space; (9) incorporate integrative therapies with

traditional cancer treatment; and (10) align a National Cancer Institute site. She explained the benefits of a formal affiliation with UNC-Chapel Hill (1) expanded access to clinical trials and research; (2) enhanced telemedicine capabilities; (3) expansion of Mission's patient navigator program; (4) hire oncology medical director with faculty appointment at UNC; and (5) access to survivorship programs. She requested approval of the proposed Cancer Center facility and adjoining deck, with parking space variance, to be located on Hospital Drive.

The following individuals spoke in support of the conditional use permit:

Mr. Fred English (who requested an item in the Center be named in memory of his daughter-in-law Marcy Rogers Stamey who worked at Mission Hospital)
Mr. John Locke, Mission Health Care Foundation, on behalf of Vice-Chair
Dr. Eric Kuehn, Oncologist at Mission Hospitals
Dr. Orren Beaty, Pediatric Oncologist in Asheville, N.C.

After rebuttal, Mayor Bellamy closed the public hearing at 6:39 p.m.

Based on findings of fact as stated by staff, Councilman Russell moved to adopt Ordinance No. 3822, approving the Conditional Use Permit for the proposed master plan for the Mission Outpatient Cancer Center including the parking requirement modification subject to the conditions recommended by City staff and the following conditions: (1) The project shall comply with all conditions outlined in the TRC staff report; (2) All site lighting must comply with the City's Lighting Ordinance and be equipped with cut-off fixtures and directed away from adjoining properties and streets. A detailed lighting plan will be required upon submittal of detailed plans to be reviewed by the Technical Review Committee; (3) All existing vegetation that is to be preserved must be clearly indicated and dimensioned on the site, landscape and grading plans; (4) The building design, construction materials and orientation on site must comply with the conceptual site plan and building elevations presented with this application. Any deviation from these plans may result in reconsideration of the project by the reviewing boards; and (5) This project will undergo final review by these TRC prior to issuance of any required permits. This motion was seconded by Councilman Smith and carried unanimously.

ORDINANCE BOOK NO. 26 - PAGE 24

C. PUBLIC HEARINGS REGARDING THE STORMWATER AND EROSION CONTROL ORDINANCE

Councilman Russell moved to table the stormwater and erosion control ordinances pending review by the City Council Planning & Economic Development Committee, as Council had additional questions about the ordinances that staff had not previously answered. This motion was seconded by Councilwoman Manheimer and carried unanimously.

When Mayor Bellamy asked for comments on the motion (prior to it being adopted), no one spoke.

V. UNFINISHED BUSINESS:

A. DISCUSSION OF VARIOUS STRATEGIES PROPOSED IN THE DOWNTOWN MASTER PLAN RELATED TO PROJECT REVIEW PROCESSES

Planning & Development Director Judy Daniel said that this is the first portion of the conceptual overview of the Downtown Master Plan. She gave a brief overview of the process which started last spring. The committees that are looking at the Unified Development Ordinance (UDO) changes are reviewing the elements segment by segment. The first segment is this process steps. She explained that once the Downtown Commission subcommittee has looked at it, it goes to the Planning & Zoning Commission and normally they would go before the City

Council Planning & Economic Development Committee (PED); however, the PED Committee did not meet in November or December of 2009. They then moved the process steps forward to City Council review, since this is only a conceptual overview and no action is a part of this. This will come back to Council as a complete package.

Mayor Bellamy asked that in the future all items go before the PED Committee prior to coming before the full Council.

Urban Planner Julia Cogburn said that this is consideration of various strategies proposed in the Downtown Master Plan related to project review processes.

Earlier this year, Asheville City Council adopted in concept the Downtown Master Plan, following almost a year of public forums and meetings. At the time of adoption, Council directed staff to begin looking at the implementation of the various elements contained in the plan. Five subcommittees have been established by the Downtown Commission (DTC) to work on this implementation. One of these subcommittees, the Downtown Master Plan Urban Design Subcommittee (UDS), is charged with reviewing the elements of the Master Plan that will result in amendments to the Design Guidelines for Downtown and amendments to the Unified Development Ordinance (UDO).

The UDS began its work by looking at the review process recommendations in the plan. Strategy 6 of the plan calls for making downtown project review "transparent, predictable, and inclusive of community input." Staff identified eleven action steps contained in the plan that target this goal for project review. These eleven action steps are noted on a matrix included with this report. The matrix notes the element, describes current practice on each issue, lists any current UDO reference(s), suggests a UDO amendment to enact the change, provides staff commentary as appropriate, and details the recommendations/comments of the Urban Design Subcommittee and the Downtown Commission on each issue. The matrix also contains suggestions on variance and appeals processes which were not clarified in the Downtown Master Plan.

The proposals for change summarized in the matrix were reviewed by the DTC on November 13, 2009. While there was general acceptance of most of the Committee recommendations, there was not agreement among all members present regarding Action Step 6D, as noted on the matrix. These proposals were present to the Planning and Zoning Commission (P&Z Commission) on Thursday, November 19th, and their recommendations are included in the matrix. At this meeting, City Council has the options of directing staff whether or not to proceed with these proposals and draft them into code amendments for review and approval or make any changes to the proposals before drafting the code amendments.

The staff will be bringing the recommendations of this Committee to the Council over the next several months as the Committee completes its work. Each report will include the Committee recommendations and the comments/recommendations of the Downtown Commission and the Planning and Zoning Commission. When the Council has had the opportunity to review all of those recommendations, and request any changes to those recommendations they may choose; the staff will bring the drafted code amendments to Council for a vote. At this time it is anticipated that the work of this Committee will require several more months.

This action supports the City Council Strategic Operating Plan goal of completing the Downtown Master Plan process and beginning implementation of the plan.

Pros:

- The recommendations are the first step in implementation of the review process elements of the Downtown Master Plan.
- The recommendations have been reviewed in detail and deliberated by a subcommittee appointed by the Downtown Commission.

- One of the recommendations suggests Council have discretion over the largest of projects in the downtown "core." This differs from the master plan recommendation that Council only review on technical merits.

Cons:

- One of the recommendations suggests Council have discretion over the largest of projects in the downtown "core." This differs from the master plan recommendation that Council only review on technical merits and reservations regarding that element were expressed by some members of the Downtown Commission.

The Planning & Zoning Commission, Downtown Commission and Design Action Committee recommendations are presented on the matrix.

Ms. Cogburn then went into detail of the recommendations. She said the process elements include (1) First Review of Urban Design Subcommittee – Process Elements; (2) DTMP Strategy 6 – DT project review to be "transparent, predictable, and inclusive of community input."; (3) 11 Action Steps Identified by staff; (4) Suggestions on Variances and Appeals – Silent in Plan; and (5) Matrix created.

For Action Step 6A1, the following applies:

- Recommendation - large projects require early developer sponsored meetings
- Current practice – highly recommend that the developer meet with representatives of the neighborhood
- Suggestion - Level II and III project meetings be mandatory at design phase of project; Level I projects recommend meetings
- Suggestion – DTC recommends meetings should require certain notification – posting; advertising; letter to owners within 200 feet
- Meeting to be developer organized and run; staff attends to provide information on process
- Consensus agreement on most proposals from DTC, P&Z Commission, and staff
- Disagreement about advertising: DTC supports, staff and P&Z Commission do not recommend required advertisement

For Action Step 6A2, the following applies:

- Recommendation – All official review meetings should have advertised opportunity for public attendance and input
- Current practice – All official review meetings are advertised; DTC does not list projects being reviewed in the advertisement of their meeting
- Consensus agreement – UDS and DTC with proposed recommendation. Would require project listing in DTC advertisement

For Action Step 6C1, the following applies:

- Recommendation – Revise project level definitions to alter the thresholds for downtown proposals.
  - Level III – Above 175,000 square feet or above the Intermediate Height Zone (145 feet)
  - Level II – 20,000 to 175,000 square feet and up to the Intermediate Height Zone

- Level 1 – less than 20,000 square feet

- Current practice – UDO levels same for all districts.
- Consensus agreement of UDS, DTC, and P&Z Commission with proposed recommendation. Still evaluating threshold levels.

For Action Step 6C2, the following applies:

- Recommendation – Require formal written findings detailing how a project does or does not meet requirements
- Current practice – Provide formal written reports on all reviews
- Consensus agreement of UDS, DTC, and P&Z Commission with proposed recommendation. Formalize by placing in ordinance

For Action Step 6C3, the following applies:

- Recommendation – Level I reviews should be handled at staff level including design review
- Current practice – Same as recommendation
- Consensus agreement of UDS, DTC, and P&Z Commission to continue current practice

For Action Step 6C4, the following applies:

- Recommendation – Level II review to TRC first, then to DTC, then to P& Z Commission (final reviewing body)
- Current practice – Projects go to DTC first, then to Technical Review Committee (TRC) (final reviewing body)
- Consensus agreement of UDS, DTC, P&Z Commission with proposed recommendation.

For Action Step 6C5, the following applies:

- Recommendation – Level III projects reviewed by TRC first, then to DTC, then to P&Z Commission, final review by Asheville City Council
- Current practice – Projects go to DTC first, then to TRC, then P&Z Commission, and to Council as a Conditional Use Permit (CUP).
- Consensus agreement of UDS, DTC, and P&Z Commission with proposed recommendation. Significant discussion on type of review to be conducted by Council.

For Action Step 6D, the following applies:

- Recommendation – Apply the CUP process only to projects on conditional use permit listing for Central Business District (CBD) (not reviewing based on size)
- Current practice – All Level III projects are treated as CUPs allowing City Council the ability to evaluate a project more broadly and add conditions

- No Consensus - DTMP found CUP problematic, did not like quasi-judicial process. Called for more stringent rules with greater certainty in approval.

- Significant discussion by UDS and DTC on review of largest projects: Should there be some discretion for Council? If no discretion is review repetitive?

- UDS recommended:
  - Level III projects in the "core" to require conditional zoning approval (not quasi-judicial but is a legislative decision).
  - Projects outside the "core" also go to Council but would only be reviewed on technical merits.

- DTC – no consensus; mixed views.
  - Concerns expressed about not following a central premise in the DTMP.
  - Others felt that Council needs to have wide latitude in reviewing the largest projects, particularly in the traditional downtown.

- P&Z Commission consensus agreement on DTC proposal

For Action Step 6E, the following applies:

- Recommendation – Large development proposals with phased components should submit a master plan

- Current practice – May submit a master plan but it is not required

- Consensus agreement of UDS, DTC, and P&Z Commission to require a master plan when phasing a project

For Action Step 6I, the following applies:

- Recommendation – Establish a time limit between submission and written findings for each project review step

- Current practice – DTC recently adopted bylaws change:
  - Review limited to 120 days without developer concurrence.
  - TRC required to take action within 10 days of review of plans. Level I projects have 10 day turnaround. Council and P&Z Commission generally take action within two meetings on an item

- Consensus agreement of UDS, DTC, and P&Z Commission that with this change it is unnecessary to do anything but codify the DTC review limit of 120 days

For Action Step 6J, the following applies:

- Recommendation – Allow project sponsors to choose immediate project review by Council if: project review has extended past time allotted; design approval has been denied for not meeting standards; in lieu of making a contribution to Community Benefits Fund

- Current practice – No process to skip to Council in project review

- Consensus agreement of UDS, DTC, and P&Z Commission that not necessary to do anything at this time with bylaws change by DTC and no Community Benefits Fund

For variances, the following applies:

- Recommendation – Not addressed in DTMP
- Current practice – Variances from UDO requirements are heard by the Board of Adjustment (BOA). The DTC can modify guideline requirements as they are voluntary in compliance. Council can grant modifications to certain UDO requirements as part of a CUP or Conditional Zoning review
- Consensus of UDS, DTC, and P&Z Commission to allow staff to flex up to 10% of some standards – setbacks; openings; expanses of wall. All other variances would go to P&Z Commission. *Exception* – alternative compliance to Tree Commission

For appeals, the following applies:

- Recommendation – Not addressed in DTMP.
- Current practice – Appeals from staff go to the BOA. There are no appeals from DTC as compliance is voluntary. Appeals from P&Z Commission go to Council. Appeals from Council go to courts.
- Consensus agreement of UDS, DTC, and P&Z Commission that appeals from staff or DTC go to P&Z Commission. Appeals from P&Z Commission go to Council. Appeals from Council go to courts.

Next steps include: (1) Get Council direction on these issues; (2) Begin drafting ordinance amendments; and (3) Return through process for review and approval of ordinance amendments.

Ms. Cogburn responded to various questions/comments from Council noting direction from Council on the individual issues; some being, but are not limited to, how does this coincide with Council looking at an overall revamping of the UDO; with a substantial change in the review process tied in with more stringent regulations (for not such a subjective review process), it seems difficult to adopt the segments in phases; recommendation to be consistent regarding the core area and the traditional downtown area; concern about setting the 145 ft. height level is a de facto limit (and the square footage limit) because builders will stay at that limit rather than going through Council approval; concern of raising the Level III review from 100,000 to 175,000 square feet; concern that people expect City Council to listen and make decisions and projects outside the core area would only be a Council review on technical merits; how as the 10% number arrived at for flexing variances; are there appeal provisions for citizens with standing or special damages; is there some process available for appeals at various levels of the process even though a quasi-judicial decision is not being made; what kind of review is the Planning & Zoning Commission level for a Level II project; question if the Downtown Review Commission limit of 120 is short enough; concern that a project would have to go through four different committees even though the standards are laid out; request that not so many ordinances are brought back to Council for review at one time; request staff use visualization tools when bringing the rest of the segments to Council; request for a clear sense of how the parcels connected to Pack Square Park will be considered with the core threshold of 175,000 square feet; Strategy 6C1 and 6D appear to be in conflict; is it possible for Council to review projects in concept prior to the Technical Review Committee so that if Council does not approve of the project it will save the developer time and money from proceeding further in the process; and is there an appeal process whereby an appeal from the Planning & Zoning Commission goes straight to the Courts, by-passing City Council.

When Ms. Daniel asked to come back to Council in early May with an update, Mayor Bellamy asked that the review go through the PED Committee first.

It was the consensus of Council to instruct staff to begin the process of drafting the ordinance amendments, based on comments by Council, and then take it through the PED Committee, prior to coming before the full Council.

B. ASHEVILLE ENERGY INDEPENDENCE INITIATIVE

Vice-Mayor Newman explained the Asheville Energy Independence Initiative, which is a community campaign to create jobs, promote stewardship, and save money for businesses and families in Asheville. This topic was discussed by Council last year in conceptual form when we were going to the state legislature asking for legislative authorization to even consider having such an initiative. The legislature has taken steps to grant authorization to cities for these type of energy efficiency initiatives.

He said that Asheville has never been afraid of being a leader in supporting clean energy with citizens and political leaders from Asheville and Western North Carolina who developed and championed the passage of the North Carolina Clean Smokestacks Act in 2002, which committed our state to the strongest clear air standards in the nation. As a result of passing that legislation the Progress Energy power plant here in Asheville is 95% cleaner than it was prior to the technology improvements required by that Act. Asheville has also been a leader by committing ourselves to reduce our energy use by 80% at a rate of 2% per year on our public facilities. We have been very successful in meeting those commitments and we have saved taxpayers a lot of money in the process. The initiative to reduce energy and carbon pollution from our public facilities is one of the things he is most proud of that we have accomplished over the past several years. We all know that our citizens want Asheville to be a national leader in promoting clean renewable energy and this proposal represents what many people believe to be the most powerful way to create an initiative that our entire community can participate in.

He briefly reviewed with Council the following PowerPoint:

Opportunity and need: (1) There are compelling arguments –from national security, to global warming to job creation– for our country to free ourselves from dependence on polluting fossil fuels; (2) Buildings consume 39% of all energy in the United States and 68% of electricity; (3) There are proven technologies to reduce energy use in a cost-effective manner; (4) Innovative financing models make implementation of energy efficiency measures simple and scalable; and (5) In 2009, NC Legislature provided authority to local governments.
